The annual general meeting of shareholders in the above Company was held on Monday, at the Club. The following were present:—Mr. C. J. King, in the chair; Messrs. A. Lind, J. Welch, J. Foster, W. Keswick, T. M. Drysdale, J. Jaques, Wm. Murray, T. Brewer, H. Sutherland, M. Hawtrey, F. Groom, Wm. Mitchell, J. Macgregor (Provand & Co.), S. Daly, J. H. Drought, G. Jamieson, J. P. Bisset, J. Macgregor (Jardine, Matheson & Co.), P. Maclean, Wm. Kidner, J. Wilson, G. A. Lindsay, Overbeck, J. B. Tootal, Carnie, J. Mackillop, R. S. Gundry, T. Olyphant, Lucas, J. J. Buchheister, R. Fergusson, Rodewald, A. Hennequin, A. Little, Alex. J. Pollock, Secretary.

The CHAIRMAN commenced the proceedings by reading the notice calling the meeting, advertised in the *North China Daily News*. He afterwards alluded to the report of the Directors, which had been in the hands of the shareholders for some days, there being, therefore, no necessity to expatiate upon the facts which it revealed. They would see that the result of the year's working, if the recommendations of the Directors were adopted, would be to return to the shareholders 5 %, and to the contributors, 2½ %, leaving a reserve of 1⅓ %; being together about 9 % on the paid-up capital, or Tls. 19,250.18, after providing interest on advances from Hongkong and Shanghai Bank, Tls. 2,623.43, and for all old and bad debts, Tls. 1295.01; or 9½ % on the total capital of the Company—in all, Tls. 2,316.62. On comparing the accounts of 1873 and 1874, the shareholders would see that business was well maintained, in spite of increased depression, which made 1874 the worst year in respect to imports in the history of Shanghai. Repairs during the year had cost Tls. 728.34, against Tls. 197.88 in 1873; and House and Land Taxes had amounted to Tls. 1,078.20 against Tls. 657.39. Other charges were slightly favourable for 1874, but the Directors could not deduce hopes of future improvement from a consideration of those figures. They had urged the adoption of a uniform tariff with Hunt's and Heard's Wharves, and the agents had done their utmost to obtain the concurrence of Messrs. Jardine, Matheson & Co., who, while admitting the propriety, positively declined co-operation. Opposition and competition had never been more active in reducing the rates of wharfage and storage, than during the late winter months, when the Northern ports were closed and more opportunity afforded by the absence of the steamers engaged on that line. A proposal was before the meeting, intended to remove those inconveniences; but before arriving at that business, and in the absence of any further information required, he would propose that the report and accounts of the Directors be read and passed.

Mr. LIND seconded the proposition, and it was carried unanimously.

REPORT.

In submitting the Accounts for the past year, the Directors regret that the increase of business has not been important, the gross earnings of the Wharf being Tls. 64,809,23, against Tls. 64,239.26 in 1873, while the net earnings of the Company shew a diminution of Tls. 5,890.44, of which amount, a discount of 10 per cent. on Wharfage and Warehouse Accounts represents Tls. 5,527.20, which concession, in face of a similar practice by competing establishments, was necessary for the maintenance of the business.

The Directors regret that hitherto they have been unable to obtain the co-operation of other Wharf proprietors in an amended tariff of charges, without which they are unable to recommend the adoption of higher rates by the Company.

An interim dividend of 4 per cent. was paid to Shareholders for the six months ending 30th June last, but the year's Account leaves a balance to the credit of Profit and Loss of only Tls. 5,022.98 after making full provision for the Balance at Debit of that Account on the 31st December, 1873, and for all bad debts and omissions on that and the preceding year, representing together a sum of Tls. 1,295.01. The Directors can only therefore recommend the payment of a further dividend of 1 per cent., making in all 5 per cent., for the year 1874, and carrying Tls. 2,872.98 to the credit of a Reserve Account.

The CHAIRMAN said the next business was the appointment of directors for another year. It was with very great regret that he had to inform them of the retirement of Mr. Behn and Mr. Lind from the direction; though in fact all the directors retired, as noticed in the report; and Mr. Bell and himself (the Chairman) were the only two old directors who were candidates for re-election. Messrs. Hennequin, Sutherland, and Drysdale had, however, expressed their willingness to be put on the Board of Directors, and they would make up the required number; but if any other gentlemen were willing, he would be happy to propose their names. Otherwise he should ask them to give their consent to the election of the five whose names he had given.

No other names being mentioned,

Mr. GROOM proposed that Messrs. C. J. King, F. H. Bell, H. Sutherland, T. M. Drysdale, and A. Hennequin be elected as directors for the ensuing year.

Mr. MACGREGOR seconded the proposition, and it was carried unanimously.

The CHAIRMAN said they had now come to the most interesting part of the business of the meeting, which was to consider the terms of their proposed amalgamation with Hunt's and Heard's Wharves. The shareholders had had before them the memorandum relating to it, which had accompanied the Report; and in laying the question before them, he (the Chairman) should simply make such comment upon the proposals contained in the memorandum as struck him as being necessary.

The memorandum of proposals alluded to, was as follows:—

Memo. of terms of proposed amalgamation of Hunt's & Heard's Wharves with the Shanghai & Hongkew Wharf Company.

That the Wharves known as "Hunt's & Heard's" and the "Shanghai & Hongkew," shall be worked together under the Agency of Messrs. Jardine, Matheson & Co., and that the terms and conditions of the combined working shall be as follows:—

1.—That Hunt's & Heard's Wharves shall be admitted into the amalgamation on the basis of their net earnings during the year 1874, say Tls. 32,675, and the Shanghai & Hongkew Wharf on the basis of 10 per cent. on the Company's Capital, say Tls. 24,200, and that out of the Working Account (provided the earnings admit of it) the said sums shall be paid in full; or in the event of the earnings not reaching Tls. 56,875, then the sum actually earned shall be divided *pro rata* in accordance with the above valued income of the respective properties.

2.—That the Working Account of the combined Wharves shall be debited with the expenses necessary to the business, such as Coolie Hire, General Disbursements, Office Charges, Fire Insurance, Municipal Taxes, the rent of the Sailors' Home frontage, Directors' Fees, Commissions, and all ordinary and necessary repairs to the Wharves and premises of the character usually borne by tenants.

3.—That out of the profits divided between them, Messrs. Jardine, Matheson & Co., as representing Hunt's & Heard's Warves on the one part, and the Shanghai & Hongkew Wharf Co. on the other part, shall each severally and separately pay the expenses that are usually borne by Landlords and that may attach to their respective properties, such as the maintenance of sufficient accommodation and, if it be necessary, the extension of accommodation to meet the requirements of the business of the Wharves, the reconstruction of Old Buildings and the erection of New Buildings, and the cost of dredging or of otherwise keeping deep and serviceable water in front of their respective properties.

4.—That in case any expenditure is required for the construction of New Buildings (not the re-erection of Old), or for the extension of the accommodation of the Wharves as provided for in the preceding clause, interest at the rate of 10 per cent. per annum shall be paid on all sums so expended, and such interest shall be debited in the General Working Account, and be paid to Messrs. Jardine, Matheson & Co. or the Shanghai & Hongkew Wharf Co. as the case may be.

5.—That if in the opinion of Messrs. Jardine, Matheson & Co. and the Directors of the Wharf Co. the earnings of the Wharves to the 30th June in any year will admit of an *ad interim* payment on account of the sums named in Clause 1, such payment shall be made, provided it does not exceed one-half of the said respective sums of Tls. 32,675 and Tls. 24,200, or say to Messrs. Jardine, Matheson & Co. the sum of Tls. 16,337.50 and to the

Shanghai & Hongkew Wharf Co. the sum of Tls. 12,100.

6.—That as soon as practicable after the 31st December each year, the Accounts of the Wharves shall be closed, and if it should then appear that there is a balance of profit in the Working Account after making the payments of the said respective sums of Tls. 32,675 and Tls. 24,200, the said balance shall be equally divided between Messrs. Jardine, Matheson & Co. as representing Hunt's and Heard's Wharves and the Shanghai and Hongkew Wharf Co. respectively.

7.—That Messrs. Jardine, Matheson & Co. as General Agents of the Wharves shall charge 5 per cent. Commission on the gross earnings of the Wharves, and that the senior representative of the said Firm in Shanghai shall be *ex-officio* Chairman of the Company and of the Board of Directors.

8.—That this Agreement between Messrs. Jardine, Matheson & Co. as representing Hunt's and Heard's Wharves, and the Shanghai and Hongkew Wharf Co., shall extend to the 30th June 1887, when it shall terminate unless otherwise arranged.

The subjoined correspondence had passed on the subject :—

Shanghai, 22nd February, 1875.

Dear Sirs,—We have this day laid your draft proposal before the Directors of the Shanghai and Hongkew Wharf Company, and we are by them instructed to inform you that it will be necessary, in order to bring it before the meeting of our shareholders on the 1st March, that we receive it in a form that may be printed for circulation among our shareholders not later than Wednesday morning the 24th instant, for which purpose we return the draft herewith.

Without further comment on the proposal for the amalgamation of the wharves, the opinion of our Directors to render it successful requires the guaranteed independence of the Direction, and that the Agency should be subordinate to the Board, of which the Senior representative of Messrs. Jardine, Matheson & Co., if the proposal is adopted, would in all propriety be a member and the chairman.

We are, Dear Sirs,
Your's faithfully,
(Signed) Chapman, King & Co.,
Agents Shanghai & Hongkew Wharf Company.

Messrs. Jardine, Matheson & Co.
Shanghai.

Shanghai, 23rd February, 1875.

Dear Sirs,—We are obliged for your letter of yesterday's date, and as requested hand you a revised copy of the proposals which have been mutually considered by us for the amalgamation of our respective wharf interests. The concluding part of your letter constrains us to say that with the independence of the Board of Directors, the contemplated amalgamation would not interfere, and further that we consider it important that the Agents should have the privilege of appointing or removing the officers and employés of the wharves, with a view to the efficient working of the staff.

We remain, Dear Sirs,
Your most obedient Servants,
(Signed) Jardine, Matheson & Co.

Messrs. Chapman, King & Co.
Agents Shanghai & Hongkew Wharf Co.

The Chairman referred to each clause of the above memorandum, separately, as follows :—

Clause I.—In the combined earnings of the wharves, is proposed a division of the profits—

To Hunt and Heard's Wharf..	Tls. 32,675
To the Hongkew Wharf.....	24,200
	Tls. 56,875

Representing the utmost earning power of Hunt's and Heard's Wharves; and to enter on such a proposal for twelve years might be rash, with little hope of any increase on these figures to the advantage of the combination.

A similar calculation, based on the frontage of the Companies' Wharf 1510 feet, irrespective of the Sailors' Home frontage, would make our earning power on present rates Tls. 55,000 net, and without more than an allusion to the circumstance that a large proportion of Hunt's and Heard's Wharves (extending along Broadway) is occupied by houses, making the available area of the Hongkew Wharf probably double that of Hunt's and Heard's, while its water frontage alone is more then half as much again.

Clause II.—Omits mention of the Government Land-tax.

Clause III.—Provides for the expenses to be borne by each party as Landlords in the conservancy of their properties, and as I have before noticed, our larger extent of Wharf would occasion a greater outlay than the smaller premises of Hunt's and Heard's Wharves. To be provided out of the more slender share of the earnings proposed to our shareholders, and would necessitate the appropriation of a more or less sum to be deducted from the 10 per cent. on their capital calculated in Clause I.

Clause IV.—Provides for the extension of buildings &c., the weight of which obligation, if the amalgamation is adopted, must necessarily fall on the portion of the Wharf now the property of the Company. Hunt's and Heard's Wharf is to a considerable extent held, under lease; and apart from the natural desire to avoid the construction of permanent buildings on such land, the most useful sites for such extension would be found on our larger property, and this consideration is of great importance to our shareholders; for whereas we have no funds for the purpose, we shall have to borrow money for which the proposed allowance of 10 per cent. from the combined working account, will do no more than provide the interest, while the additional profits to be derived from such extensions will, under Clause 6, be equally divided with Hunt's and Heard's wharf.

Clause V.—Provides for the payment of an interim dividend.

Clause VI.—I have already noticed in connection with Clause IV., as giving to Hunt's and Heard's wharf, an equal benefit with ourselves in extensions most likely to occur from a further outlay of capital by our shareholders, and in addition to the sum of Tls. 32,675, which I take to be the maximum earning power of their property.

Clause VII.—I shall not notice, further than to remind the meeting that to give it effect requires a change in the fundamental regulations of our Company, and that in my opinion the Chairman of our Direction should be duly qualified as a shareholder for that post, and that the agency of the Company can only be properly reposed in persons with whom the interests of the Company are pre-eminent—and if the interests of all parties can be consolidated in a manner which may secure the interests of the Company, I shall with reluctance resign the confidence you have so long reposed in my firm as agents of the wharf, with which they and myself have been connected for 13 years, during which time we have enjoyed many periods of great success, and adversity. I cannot see any recourse at this meeting than to propose that the Directors who have just been appointed by you should resolve themselves, with the aid of other persons, whom they may call into their councils, into a select Committee to go into the matter of the proposed amalgamation of the wharves, and to lay such amended proposals as they may be able to obtain from Jardine, Matheson & Co. before an adjourned meeting of the shareholders at an early date.

In conclusion, the Chairman proposed a resolution to the effect that the consideration of the proposed amalgamation should be left to the Directors as a Committee, to report at a future meeting.

Mr. Forster seconded the resolution.

The Chairman, in submitting the resolution, said that any suggestions that would tend to promote the labours of the Committee would be gladly received by them. He was speaking only as one of the Committee, but knew these were the sentiments of his colleagues; and he would be happy to hear any remarks that the proposal might call forth from anybody present at the meeting. In order to afford an opportunity, he would not put the resolution yet; or, if he did, he hoped it would not stop any further conversation upon the subject, for it would be much better to deliberate upon it, and give it thorough ventilation.

Mr. Keswick would wish to make a few remarks in connection with the memorandum, over which the Chairman had passed in review. He drew attention to the figures contained in Clause I, and wished the shareholders to observe that whereas Hunt's and Heard's Wharves were entered at their actual earnings, the Company's Wharf was put at fully 35 % more than it had earned last year, a point to which the Chairman had not alluded, but which he assured the shareholders was most important, and entirely disposed of the Chairman's hint that because Hunt's and Heard's Wharves were valued at their maximum earning power, the sum of Tls. 24,200 was a disadvantageous one upon which to admit the Company's Wharf. The next point was to the effect that some of the clauses would bear unequally upon the properties. In drawing up the memorandum he endeavoured to arrive at what was fair and just to both parties, and if it could be shown that anything in those clauses bore more upon one side than the other he would be glad to alter it. The object he had in view was that the proposal, if carried into effect, should bear upon them all fairly. (Hear, hear.) He would come to Clause 7, in which it was said that Jardine, Matheson and Co. should be represented upon the direction; and he thought it should not be forgotten that, as representing Hunt's and Heard's Wharves, they contributed to the property an interest far greater then any other firm. He did not wish to give them undue preponderance and prominence, but there could be no doubt the value of the property his firm brought into the concern entitled them to the representation he asked for, when he desired they should have a seat *ex officio* on that Board. He quite acquiesced in the matter being considered in the way proposed, but he might state, in order to prevent any misconception, that in the fundamental principle of the amalgamation, as proposed by himself, there could be no alteration.

Mr. William Murray said—At the request of several of the shareholders, I rise with the object of making a few remarks on the merits of the proposed scheme of amalgamation, as set forth in the document recently circulated amongst the proprietors. It is possible that some of the gentlemen present may not have given the amended scheme that careful consideration which the importance of the subject requires, and possibly my own construction of the terms may be erroneous; and if so I shall be glad to be put right by the Chairman, as it is very desirable that all present should know the full bearings of the scheme before this meeting is dissolved. It is my intention to take each clause separately, when comment is necessary. Clause 1st,—I should remark that this, in my opinion, is the most important clause in the scheme now submitted for our calm consideration. According to the figures, at first sight, I acknowledge the terms would appear to rest entirely in favour of one side, or say in favour of Heard's and Hunt's Wharves; but if we view the case calmly, we perceive that the net earnings are actually Tls. 32,675, and Messrs. Jardine have netted the sum in the face of very keen competition, as the Chairman has just remarked, for "business has been for the past year exceptionally dull and competition unusually severe," or words of similar import. On the other hand, we must not lose sight of the fact that when the scheme in question comes into operation, the collateral advantages which will accrue to the general agents, such as increased commissions, the sole control of loans and finance business generally, with other concurrent advantages, which need not be here enumerated; I say, taking these facts into account, it is but reasonable that Jardine, Matheson & Co. should reduce their terms from the original basis of Tls. 32,675. It would be well to point out

also that Heard's and Hunt's Wharves were full to their utmost capacity during most of the preceding year. Should the special committee be appointed, doubtless the gentlemen elected will do their utmost to have the item reduced to as reasonable a figure as they may consider just to our separate interests. I feel assured, however, that Messrs. Jardine will act equitably towards the interests of proprietors of the Shanghai & Hongkew Wharf, and will not quibble regarding concessions to be made, if they can do so consistently with their own individual interests. It is but fair that Mr. Keswick should base his terms on last year's earnings, and it is but natural that the proprietors should hold out for the most advantageous terms procurable. I am led to believe that a very liberal scale of charges will be adhered to as regards the public, and I believe the firm in question, if appointed agents, are quite alive to the importance of rendering the Company as popular as it is possible to make it, by being fair to every one ; and from the circular which I have just received it will be seen that the powers of the Directors will be as free and as unfettered as ever they have been. *Clause 2nd.*—This requires no comment, as Mr. King as gone fully over the same ground. *Clause 3rd.*—The Shanghai & Hongkew Wharf being greater in size and extent, will perhaps have considerably more expenses to bear, while on the present basis Hunt's & Heard's Wharves will receive proportionably fully ¼th more of the joint net earnings. This no doubt requires looking into, and will fall to the duty of the select Committee for modification. *Clause 4th.*—I have just learnt that the alternative with regard to this clause is that 9% be fixed as interest, and 4% as depreciation, which I dare say will be agreeable to every one, even to experts who are qualified to give an opinion on the subject. *Clause 5th.*—Calls for no comment. *Clause 6th.*—With reference to this clause, I think it desirable that some provision should be made for a Depreciation Fund, or Reserve Fund, or call it what you may. It is well that provision should be made for a bad year or for any unusual contingency. We have often had forcible illustration of the benefits arising from accumulative profits when bad years occur ; of course I merely suggest this in the event of the present scheme being successfully carried through. *Clause 7th.*—This has already been fully explained. *Clause 8th.*—I see no objection to this clause if the proposed scheme meets with approval. In conclusion, I would only observe that it is for the interest of the proprietors to decide on the course of action to be adopted regarding the future management of their property. The past year has not shewn satisfactory results, as you all know, but I am strong in the belief that should the present amalgamation scheme be carried through effectually, on what may be considered a fair and equitable re-adjustment, the value of the property will not only become enhanced in the future, but that the future working of the Company will be as satisfactory to the public as it ever has been in the past.

The CHAIRMAN would make only one remark. When they were talking about a reserve, they must not overlook the fact that it must be created, and that it meant earnings. A reserve could only be created out of earnings, and in their case by some increase of business. But the business of the past year was described properly by the united business of these Wharfs; so there was no room for the increase which they anticipated. Of course, increasing the tariff somewhat would make the accounts better, but that would have to be done with great discretion and judgment. He thought that people who had not gone into these calculations, would be disappointed in the result of their ideas as to the facility and ease with which incrased profit could be derived from that source.

Mr. GROOM thought that when the Wharf was established, a certain tariff was drawn up. Might he ask if that tariff was still acted upon?

The CHAIRMAN—No, it is not. We have a tariff, and adhere to it as nearly as possible, but the result of competition is such that we sometimes do business for almost nothing at all.

Mr. GROOM—Where does that competition come from?

The CHAIRMAN—From the other two wharves.

Mr. GROOM—Then, if that competition is done away with, you can return to the old tariff?

The CHAIRMAN—If that were done, it would have to be done very carefully.

Mr. GROOM—I think I am right in saying there has been a reduction of 40 *a* 50 per cent. in some things. Take coal, for instance.

The CHAIRMAN—I think coal is a sufficiently highly-taxed article.

Mr. GROOM—But still you get it? Then there is nailrod iron?

The CHAIRMAN—We get 1½ c., instead of 2 c. per picul for it.

Mr. GROOM—In that case, if the present earning power is Tls. 64,000 ; if you went back to the old tariff, the earning power of the Wharf would be increased 30 per cent., bringing it up to Tls. 80,000.

The CHAIRMAN—I think not. Storage is only one part of the business. The transit and wharfage of goods would not be affected by it.

Mr. MACLEAN said if the tariff were raised too much, ships would discharge in the stream. Some did so even now.

Mr. KESWICK said the tariff could be raised upon some articles and reduced upon others, but it must be done very carefully, and only to bring the rates up, and fix them, upon such a scale as would enable the shareholders to get a fair return for their money, and not drive the contributors of business to store elsewhere. At the same time, competition had bought about a scale of charges which in some cases were unduly low, while the rate in other cases needed lowering. He agreed that a rate could be arranged which would give a larger return, but the re-arrangement of the scale would require great care.

Mr. J. MACGREGOR said that as shareholders they must not forget that it had been explained an attempt would be made to raise the rates, with the view of giving the shareholders a better dividend. With reference to a remark made by the Chairman as to the earning power of the frontage, he (Mr. Macgregor) might say he was sent to the Municipal Council, to represent to the Finance Committee the unfairness with which Hunt's Wharf was taxed in conparison with the Hongkew Wharf. Probably the meeting would be surprised to hear that Hunt's Wharf was taxed 20 per cent. higher than the others.

The CHAIRMAN pointed out that what caused Hunt's Wharf to be more heavily taxed was that there were houses built upon it, and the Assessment Committee always attached more value to land that was occupied with houses, and nearer the town. The Chairman then put the resolution formally to the meeting, but, before the votes were taken,

Mr. KESWICK begged to repeat what he had said before, that no fundamental change could be made in the proposals before them, and he therefore thought the resolution should be more precise. The composition of some of the conditions he was prepared to reconsider, but the fundamental principle he could not consent to change. Therefore it would be wrong for him to permit an idea of that kind to go forth, and any consultation upon it would be a waste of valuable time.

Mr. J. B. TOOTAL said be supposed that what Mr. Keswick meant was with reference to the relative amounts set down.

Mr. KESWICK said be meant the money conditions contained in Clause 1.

The CHAIRMAN said they all wanted time to consider the matter. It would be better to waste a little time than to take a hasty step ; and he thought they could not do wrong in appointing a Committee to consult with Jardine, Matheson and Co., through Mr. Keswick.

Mr. KESWICK said he did not wish to be obstructive in the matter at all, but there were certain matters which were admissible, and others that were not. It was not of any use to appoint a committee to meet him upon any other principle than that embodied in the memorandum, from which he could not depart. He thought it was useless to appoint a committee at all to consider the question, unless the principle were adopted.

The CHAIRMAN said that for one or two reasons, he thought it would be better to appoint a committee to look into the question more maturely than they could do at that meeting. Probably they might see a way (through difficulties) which they had not yet seen.

Mr. KESWICK said that for the reconsideration of all the clauses he was quite prepared, and would be glad to see it take place ; but with regard to the fundamental principle he had already mentioned, he thought it was quite needless for him to discuss it with a committee.

Mr. GROOM thought the meeting did not clearly understand what was meant by the fundamental principle. Perhaps Mr. Keswick would explain it more fully.

Mr. KESWICK said he was prepared to consider any concession with the exception of the principle embodied in Clause 1. With reference to this he might mention that he was willing to reduce the Tls. 32,725 to Tls. 30,000 ; but he could make no other change.

Some desultory conversation followed, and

The CHAIRMAN afterwards said, unless any amendment was proposed, he would now put the resolution to the meeting. He thought the resolution really met all the requirements of the case. They were not in a position to say more than that the directors of the company should consider the proposal, and bring any amended proposals before an adjourned meeting at an early date. They were not now prepared to lay any amended proposals before the meeting, although Mr. Keswick had said he would be prepared to accept alterations.

Mr. KESWICK said he would be glad to have the clauses reconsidered, with the exception he had named.

The CHAIRMAN then formally submitted the resolution to the meeting, and it was carried unanimously.

Mr. MURRAY thought it would be well to have another meeting at a period not greater than ten days hence, to enable them to have a thorough understanding of what was meant. There was an impression abroad that all tariffs would be raised and no one would derive any benefit from the amalgamation besides Jardine, Matheson & Co., but this would be met by gentlemen who really understood the matter. He thought to leave the adjourned meeting to an indefinite period would be a wrong step.

The CHAIRMAN said it was not intended to leave the meeting over to an indefinite period, but that was a question that might be left to the directors.

Mr. MURRAY thought it should be decided by the present meeting when they would adjourn to. It they left it to an indefinite period they did know what might happen.

The CHAIRMAN said nothing serious was likely to happen. The meeting might be held not later than fifteen days from the present date. It could hardly be held earlier.

Mr. Murray considered the time should be fixed, and he should move that the meeting he held ten days hence.

Mr. J. B. Tootal said it would be of no use calling another meeting in ten days, if the committee could not get through the work in that time.

Mr. Murray said the work could be got through in two days, but he would say this day fortnight. He thought it was for the interest of everybody concerned that it should not be held later.

The Chairman thought it had better be left to the committee.

Mr. Murray—But the committee have not been appointed.

The Chairman—By this resolution the directors are appointed a committee. I have put it to the meeting, and it has been carried.

This closed the discussion, and with a vote of thank to the Chairman, the proceedings terminated.

CHINKIANG LAND RENTERS' MEETING.

Minutes of the Annual Meeting of the Land Renters in the British Concession Chinkiang, held at H.B.M. Consulate Thursday, the 4th day of Feb., 1875.

Present:—

	Votes.		Votes.
W. Bean,	7	G. Williamson,	1
A. E. Salter,	1	A. Novion,	1
E. Starkey,	8	J. G. Gearing,	3
W. F. Walker (by proxy)	1	T. W. Duff,	1
A. W. Spencer,	1	D. A. Emery,	1
Revd. Père Massa,	1	E. A. Hardoon,	1

A. R. Hewlett, *Chairman.*

The Minutes of the last Meeting, held on the 3rd July, 1874, were read by the Chairman, and, on the proposition of Mr. Bean, seconded by Mr. Salter, were adopted and confirmed.

Six Electors having offered their services as Members of the Municipal Council for the ensuing year, a poll was taken which resulted as follows:—

1.—E. Starkey,	27	votes.
2.—W. Bean,	27	,,
3.—T. W. Duff,	27	,,
4.—J. G. Gearing,	20	,,
5.—G. Williamson,	17	,,
6.—A. E. Salter,	10	,,

The first five gentlemen were declared to be duly elected as Members of the Municipal Council for 1875.

The retiring Council then handed in their Report for 1874, as follows:—

The Municipal Council for the year 1874 beg to inform the Electors that,

The Bund has been an unexpected drain on the funds of the Municipality to the extent of Tls. 490, which sum has been absorbed in the execution of necessary repairs.

As the retiring Council are of opinion that the Bund in its present form is likely to be a source of continual expense for like repairs in the future, they would strongly recommend that professional advice be taken before further outlay is made thereon.

The Roads are at present in good order, having been gravelled, repaired and improved at a cost of Tls. 490.39. But a trifling expenditure will suffice to maintain them in fair condition during the ensuing year.

Two jetties have been erected as deemed necessary to facilitate the landing and shipping of cargo. Their constant use is the best proof that they meet a requirement.

Trees have recently been planted wherever thought requisite. In the event of any of the same failing within twelve months, the Contractor agrees to replace them free of charge. Substantial wooden guards have been placed for the protection and support of the trees.

The Central Drain now carries the sewage of the Chinese quarters bordering on the South of the Concession, rendering an iron grating at that extremity a necessary adjunct. This has been provided at a cost of Tls. 18.60, but the Council beg to call the attention of the Electors to the fact that this expense, as well as the more important matter of the nuisance of native sewage having an outlet on the foreshore of the Concession, has been forced upon them by the authority of the British Consulate, although, in their opinion, the main drain of the West Gate Street could have been rendered available for that purpose.

The Council leave it to the Electors to decide whether or not they are prepared to have their property forcibly availed of for the advantage of those without, to the detriment of those within the Concession, and to relinquish so important a Bye-law as No. 6 annexed to the Land Regulations.

The construction of a new Road from the south-west corner of the Concession to the Nanking Road is strongly advocated by the Council. The pressing need of such a thoroughfare will, they think, not be questioned; and that the longer the acquirement of the necessary land is delayed, the more expensive and difficult will it be to carry out the project, must be evident to every resident.

The retiring Council would therefore suggest that their successors be authorised to expend such monies and take such steps as they may deem prudent to attain this end.

Among the minor improvements which the Council would have been glad to see carried out, had the funds at their disposal admitted, they would mention those of walling in the Club Lot and of increasing the police staff so as to allow of having a night patrol. These matters they have had to leave for the consideration of the incoming Council, as being at present impracticable.

(Signed) A. E. Salter,
Geo. Williamson,
William Bean,
Municipal Councillors.

With reference to a paragraph in the foregoing Report, headed "The Central Drain," the Chairman begged to remark that the Council were not quite accurate in stating that their action with reference to Père Massa's application to make use of this sewer for the drainage of the native quarter adjoining the south side of the Concession "had been forced upon them by the authority of the British Consulate." From a letter which he would now read, the meeting would see that he had conveyed officially to the Council the opinion that Sir Edmund Hornby, the Chief Judge of the Supreme Court at Shanghai, had pronounced on this subject—which was that Père Massa was entitled to have his land drained through the Municipal sewer.

[Copy.]

H. M. Consulate,
Chinkiang, 29th December, 1874.

The Secretary,
Municipal Council, Chinkiang.

Sir,—Père Massa has requested me to apply to the Council for permission to discharge the drainage of the street, and part of the Chinese quarter adjoining the South side of the British Concession, through the main Municipal sewer to the river.

I am aware that permission has been refused by the Landrenters on the ground that Père Massa should pay for the privilege of making use of the Municipal drains; but I beg leave to point out that permission cannot any longer be legally withheld by the Council, as the Chief Judge of the Supreme Court, to whom the question was referred, has recently given it as his opinion that the Fathers are entitled to have their ground drained through the Municipal Sewer.

Such being the legal aspect of the case, and Père Massa having offerred to undertake at his own cost the drainage of the Marshy ground situated close to the Concession, as well as of the street which divides it from the Concession, it would be in my opinion in the highest degree inexpedient were the Council to offer any further objection to the removal of a nuisance which is becoming every day a great source of danger to the health of every resident in the Settlement, and which there are no means other than those proposed, of abating. I need scarcely add that the draining of the street referred to will add very materially to the comfort of the foreign community.

Under these circumstances I cannot doubt that the Council will, in reply, authorise me to state to Père Massa that, in view of the very fair proposition he has made, they are prepared to grant him the permission he has applied for, and to consult with him as to the best means, as far as they are concerned, of putting his project into execution.

I am, &c.,
(Signed) A. R. Hewlett.

To this letter the Council had sent no written reply; but Mr. Bean, the Municipal Secretary, had replied to it by calling at the Consulate and by stating, after, it is true, some objections, that if Père Massa would communicate with the Municipal Contractor he would be shewn the manner in which he must proceed in order to make use of the Municipal drain.

Mr. Bean begged to point out that there must have been some misapprehension on the subject, as he had never felt authorised to grant the permission applied for.

Mr. Williamson remarked that the other Members of the Council had never seen Mr. Hewlett's letter, and had had no voice in the assent said to have been given.

The Chairman replied that, for this omission, no one but the Secretary to the Municipal Council could be held responsible, as an official letter had been addressed to him on the subject, which it was only natural to suppose would be handed in due course to the other Members of the Council.

Mr. Emery regretted to find so large an item as Tls. 490 incurred in last year's estimates for repairs of the Bund, as the Land Renters had been given to understand by Mr. Bean, that the Contractor was bound to keep the Bund in repair for two years.

Mr. Bean pointed out that this was a mistake, as no such contract existed.

Mr. Bean then proposed "that the Report of the Municipal Council for 1874 be adopted." This motion was seconded by Mr. Novion, and carried nem. con.

The following abstract of accounts for 1874 was then handed in:—

Abstract of Municipal Accounts for 1874.

Receipts.

House Property	Tls. 423.60
Concession Lots	180.00
Native Banks	300.00
China Navigation Company	500.00
Chinese Taxes	195.16
	Tls. 1,598.16

Expenditure.

Balance from 1873	Tls. 31.09
Roads	490.39
Bund	390.00
Police	325.00
Jetties, Trees, and Sundries	254.16
Printing and Stationery	73.15
Balance due by the Treasurer	34.37
	Tls. 1,598.16

On the proposition of Mr. Salter, seconded by Mr. Starkey, the Accounts were passed nem. con.

The following Resolutions were then put to the Meeting:—

That H. B. M. Consul be requested to furnish the Electors with a copy of the Statement submitted to the Chief Judge of the Supreme Court, in rê Père Massa's claim to the use of the Municipal Drain, as the Land Renters are wholly at a loss to understand upon what grounds so important a Bye-Law as No. 6 annexed to the Land Regulations can have been overruled, had the facts of the case been fairly represented.

Proposed by Mr. Starkey, seconded by Mr. Gearing.

Carried nem. con.

That a tax of 3 per cent. be collected from the owners of Concession lots on the assessed annual rentals of their house property.

Proposed by Mr. Williamson, seconded by Mr. Bean.

Carried nem. con.

That a tax of Tls. 150 be collected from each of the two pawnshops.

Proposed by Mr. Spencer, seconded by Mr. Emery.

Carried nem. con.

That a call of Tls. 10 be made on each Concession Lot.

Proposed by Mr. Starkey, seconded by Mr. Bean.

Carried nem. con.

That the Taotai be invited to contribute say Tls. 200 towards the expenses of repairing the Bund.

Proposed by Mr. Bean, seconded by Mr. Gearing.

Carried nem. con.

With reference to this resolution, the Chairman stated that, in the absence of instructions from H.B.M. Consul at Shanghai, he should not feel justified in conveying this application to the Taotai, as, in forwarding the sum of Tls. 200 towards the repair of the Bund last year, the Taotai had expressly stipulated that such a contribution was not to be looked upon as an annual charge.

That the Council be requested to hold a meeting once a month, and to circulate the Minutes of such meeting for the information of the Ratepayers.

Proposed by Mr. SPENCER, seconded by Mr. NOVION.

For the resolution 7
Against ,, ,, ... 1
Carried by a majority of 6

That a road from the Concession South being urgently needed, the Municipal Council be authorised to take steps to acquire possession of the portion of land between the Concession and the Nanking Road which is bounded on the East by the present Community pathway and on the West by the Yin Hill.

Proposed by Mr. BEAN, seconded by Mr. WILLIAMSON.

With reference to this, the CHAIRMAN stated that he had been in communication with the Taotai, who had received the scheme for a new road from the Concession very favourably, and who had undertaken to assist the community in acquiring the land required. The Chairman need hardly urge the importance of acquiring the land without delay, as the difficulties attending its purchase would increase year by year.

An amendment to the above resolution was proposed by Mr. STARKEY, and seconded by Mr. DUFF, as follows :—

That the Municipal Council be requested to ascertain for what consideration the present owners of the ground bordering upon the proposed new road are prepared to cede their property, and that, this being ascertained, a special meeting of the electors be called to decide whether the necessary ground shall be purchased.

The amendment was put to the meeting and carried nem. con.

That the newly elected Council be instructed to procure professional advice and report upon the present bunding of the Settlement before incurring further expenditure for repairs thereto.

That, should the construction of a more substantial form of bunding be recommended, as being more to the interests of the Ratepayers than repairing the present structure, the Council be requested to elaborate a scheme for carrying out the work and submit the same for the consideration of the Electors at a Special Meeting to be convened for that purpose.

Proposed by Mr. WILLIAMSON, seconded by Mr. DUFF.

Carried nem. con.

The following memorandum of valuations of Rentals for House Property on the British Concession for 1875 was then read to the meeting:—

Lot No.	1	Annual	Rentals	valued	at	Tls. 6,000.
,,	2	,,	,,	,,	,,	1,000.
,,	3	,,	,,	,,	,,	1,200.
,,	5	,,	,,	,,	,,	1,200.
,,	6	,,	,,	,,	,,	1,000.
,,	11	,,	,,	,,	,,	1,000.
,,	12	,,	,,	,,	,,	1,000.
,,	14	,,	,,	,,	,,	900.
,,	15	,,	,,	,,	,,	500.

Mr. STARKEY represented that a reduction should in fairness be made on the assessment of Lot No. 1.

The CHAIRMAN pointed out that, in accordance with Rule IX. of the Land Regulations, Mr. Starkey should appeal to a Committee of Electors for a reconsideration of the valuation now assigned to Lot No. 1.

A vote of thanks to the retiring Council for the able manner in which they had discharged their duties during the past year was proposed by Mr. SPENCER, seconded by Mr. STARKEY, and carried nem. con.

The proceedings terminated with a vote of thanks to the Chairman, proposed by Mr. WILLIAMSON and seconded by Mr. BEAN.

A. R. HEWLETT,
Chairman.

H. B. M. Consulate,
Chinkiang, 4th Feb., 1875.

THE CHINA FIRE INSURANCE COMPANY.

The sixth ordinary meeting of shareholders took place on the 18th instant. Present: The Hon. Mr. Lowcock (in the Chair), the Hon. P. Ryrie, Messrs. McIver, W. Wilson, Kirby, C. M. Kerr, M. W. Boyd, T. Hall, J. S. Cox, J. G. Smith, H. Kiær, J. Noble and Coughtrie, (Secretary).

The adoption of the report was proposed and unanimously carried.

REPORT.

The directors have now the pleasure to present a statement of the Company's Accounts for the year ending the 31st December, 1874.

The net profit accruing to the year 1873 is as follows :—

Balance at credit of "working account," as per last report	$86,038.63
Deduct losses and claims paid in 1874	4,768.71
Net profit.....	$81,269.92

25 per cent. of this amount, or $20,317.48, is due to contributing shareholders, yielding a bonus of $14.87 per cent. on their contributions during 1873, and the remaining 75 per cent., representing $60,952.44, has been added to reserve fund, which now amounts to $248,614.30.

The balance at the credit of "working account," 1874, $69,870.39, shows a falling off from that of the previous year in consequence of a considrable decrease in the amount of premia collected. The Directors are, however, of opinion that this decrease is, in a great measure, owing to the altered conditions of the trade of China generally.

Mr. Henry Lowcock and Mr. W. H. Forbes retire from the Board in accordance with the 86th clause of the articles of association, and both gentlemen being eligible for re-election offer themselves accordingly.

The re-election of Messrs. Lowcock and Forbes as Directors was likewise carried *nem. con.* The confirmation of Mr. Kerr, and the re-election of Mr. Deacon as auditors was also agreed to.

The CHAIRMAN then observed that there was nothing connected with the affairs of the Company that he might say had not been embodied in the report. The amount of premia collected during the year was certainly less than formerly, but there was no decrease in the Company's customers. The falling off was therefore attributable to the general decrease of business in the China trade. He thanked those present for their attendance and hoped they would not only continue to contribute business, but would influence their friends to do so too. (Applause).—*China Mail.*

THE CHINA TRADERS' INSURANCE COMPANY.

The Ninth Ordinary General Meeting of Shareholders of the above Company was held on the 19th inst., present :—Messrs. M. W. Boyd, (Chairman), A. F. Heard, A. McG. Heaton, Stephens, C. P. Chater, Middleton, J. J. dos Remedios, Deacon, Anton, J. S. Lapraik, Nicáise, E. Sharp, Davis, McCulloch, Captain Sands, Leong Wing Choon, Choy Achan, and Mellish.

The CHAIRMAN, having read the notice calling the meeting, said that as the report had been in the hands of the shareholders for several days, he thought they might take it as read. The business of the Company had been on a larger scale than during the previous year, but notwithstanding this, the result of the year's working had not been so satisfactory, owing to the unprecedented typhoon which visited the Colony in September last, and by which the Company lost over $130,000. Before moving that the report be adopted, he should be glad to answer any questions.

REPORT.

The committee have much pleasure in submitting to the shareholders a statement of the working of the Company for the twelve months terminated on the 31st October, 1874.

The premia collected at the Head Office and Agencies amount to $347,381.34.

After deducting returns, re-insurance, losses, and all charges appertaining to the year; carrying forward to next year's accounts $15,285.06, the amount of premia on risks unexpired on 31st October, and the sum of $71,000 to meet estimated claims, and providing for directors' and auditors' fees, there remains a balance of $24,338.46 available for general distribution.

The apportionment of this amount, under clause 133 B of the articles of association, will be as follows :—

To Shareholders, ...	$ 8,112.82
,, Contributors of business,....	16,225.64
	$24,338.46

The sum of $34,362.25 has been received for interest; of which, as provided by clause 133 C of the articles of association, $12,475.07 has been carried to reserve fund, increasing it to $300,000, and the remainder, $21,887.18, has been placed to the credit of shareholders, making the general dividend, with the amount of $8,112.82 stated above, $150 per share.

The Chinese Loan just issued offering an opportunity for the investment of a portion of the reserve fund, the sum of $49,589.46 has been placed in same.

Mr. Kaye having resigned his seat at the Board in consequence of his departure from the Colony, Mr. M. W. Boyd has been appointed to fill the vacancy. That gentleman and Mr. J. J. dos Remedios retire by rotation, but offer themselves for re-election.

Mr. STEPHENS wished to ask whether the committee thought it necessary that the capital should remain in the hands of the General Agents any longer. He should like to propose that part of it be invested in some manner to be decided upon by the general committee or by a meeting of the shareholders.

The CHAIRMAN asked if it would not be better to leave the matter to the committee and the General Agents.

Mr. STEPHENS said he was quite willing to do so, and had only wished now to call their attention to it.

The CHAIRMAN said it would have their due consideration. He then proposed that the report (a copy of which we have already published) and accounts be passed.

Mr. MELLISH seconded, and it was carried.

Mr. HEARD said there was one matter which he should like to refer to, because he did not think that a liberal and generous policy should be passed over without notice. What he alluded to was the manner in which one of the banks met the desire of the General Agents and the committee respecting a portion of the reserve fund. It was in the bank at five per cent., and when they wished to invest it in the China Loan, Mr. Boyd kindly allowed them to withdraw it from the bank with which he was connected, at only very short notice. He was sure they were all obliged to Mr. Boyd for doing so. (Applause).

Mr. STEPHENS said there was one other question he should like to ask, and that was whether the sum of $43,478 in the hands of the London agents was merely on a running account.

The CHAIRMAN said it was necessary to have £10,000 in London, and that sum stood there in the name of the Company.

Mr. HEARD proposed the re-election of Mr. Boyd and Mr. J. J. dos Remedios on the committe.

Mr. DEACON seconded, and it was carried.

The Auditiors, Messrs. R. Deacon and H. Smith, having been reappointed, the meeting terminated with a vote of thanks to the Chairman.—*Daily Press.*

THE VICTORIA FIRE INSURANCE COMPANY.

The fifth annual meeting of shareholders was held on the 22nd Feb. Present :—Messrs. A. F. Heard, (Chairman), F. D. Sassoon, André, Cordes, Karberg, M. W.

Boyd, McCulloch, Head, J. Noble, Kiær, Alabor, Mody, and Kleczkowski.

The Chairman, having read the notice calling the meeting, said the report and accounts had been in the hands of the shareholders for some days, and they might be taken as read. He did not think they called for any special remark. There was a falling off in the total premia for the past year, but this was to be attributed to the bad state of trade generally. They would observe that the reserve fund was now made up to the full amount required by the articles, and in addition to that a small portion of the excess was now available for distribution to the shareholders. He proposed that the report and accounts be accepted and passed.

Mr. Kiær seconded, and it was agreed to.

Report.

The directors have the pleasure of submitting their report upon the affairs of the Company for the year terminated 31st Dec., 1874.

The gross earnings of the Company for the year amount to $124,442.68, of which $92,083.72 consist of premia collected and the balance of $32,358.96 accrues from interest on Investments.

Working Account, 1873.—The balance of $76,562.36 at credit of this account has been appropriated in accordance with the articles of association as per annexed statement, giving to shareholders a dividend of 4.25 per cent. and a bonus of 15 per cent. on their contributions.

Reserve Fund.—This account now shows a balance of $179,821.83 exclusive of the working account of the past year.

Working Account 1874.—After deducting re-insurances, losses, interest on paid up capital, commissions, and charges, there remains the sum of $50,278.48 to be carried forward to credit of this account.

Directors.—Messrs. Kaye, Rowett, S. D. Sassoon, and George F. Heard having left the Colony, Messrs. M. W. Boyd, Albert F. Heard, F. D. Sassoon and P. Karberg were elected to fill the vacancies. Messrs. André and Boyd retire from the direction in accordance with clause 79 of the articles of association but offer themselves for re-election.

Messrs. Boyd, A. F. Heard, F. D. Sassoon, and P. Karberg, were elected to fill the vacancies caused by the departure from the Colony of Messrs. Kaye, Rowett, S. D. Sassoon, and the late G. F. Heard.

Messrs. André and Boyd, who retired by rotation from the direction, were re-elected. —*China Mail.*

HONGKONG AND SHANGHAI BANKING CORPORATION.

(Daily Press.)

The Ordinary Yearly General Meeting of the shareholders of the above Corporation was held in the City Hall, Hongkong, on the 18th instant. W. H. Forbes, Esq., chairman of the directors, presided; and amongst those present were Messrs. André, Heard, Belilios, Cordes, Hoppius, F. D. Sassoon, Hayllar, Greig, Lemann, Kingsmill, Green, Middleton, Woonwalla, Cama, Bottomley, McIver, Burrows, Alford, Wasserfall, Kruse, C. P. Chater, Cohen, Strack, Landstein, Fairbairn, Ede, Millar, Budde, Linstead, H. Smith, May, Mylne, Mitchell, Nicaise, Mellish, Russell, Ozorio, Hancock, Nelson, Mehta, Dunn, Demée, Pereira, Beart, Hughes, W. Morgan, Weeks, J. T. Chater, the Hon. P. Ryrie, Baron von Overbeck, Dr. Adams, Dr. Young, Dr. Wharry, Capt. Bernard, &c, &c.

The Chairman, having read the notice calling the meeting, said the report and abstract of assets and liabilities had been in the hands of the shareholders for some days, and he did not think there was any necessity for him to read it.

Mr. Kingsmill: I think it had better be read.

The report was accordingly read.

The Chairman then said: Before asking you to pass this report, I wish to make a few remarks. I regret I have again to present you an unfavorable report and statement of accounts, the more so as on the last occasion we met here I gave expression to such strong hopes of a speedy return to a better state of things. *Small Profits.*—The bank has again been unfortunate in its operations during the past half-year. Trade generally in the East has been dull and unprofitable, and we can but echo what some of the other banks connected with the East have already said—viz., that their business in China has not paid. Such being the case with them, you can easily imagine how it is intensified in our case, our business and interests being so closely and largely connected with the China trade. But better times must come for trade generally connected with these parts, and when it does we shall doubtless derive our full share of benefit from them—it shall be our endeavour, at all events, to do so. Our report informs you why, in our opinion, the half-year's results have been so unsatisfactory, and had it not been for the China Loan there would, I regret to say, have been no profit available. If you refer to the previous statement of accounts presented to you, you will find our advances then were 13 millions of dollars, whereas now they are only $9\frac{3}{4}$ millions, and they include the China Loan nearly $2\frac{1}{2}$ millions, which only came in towards the close of the half-year, so that we may almost say in so far as earning interest is concerned, that our advances were towards the end of December $5\frac{3}{4}$ millions less than at 30th June last. Our deposits again are $2\frac{3}{4}$ millions more than at 30th June last, so that at present we are at double disadvantage. *Interest on Deposits.*—I may mention here that a further reduction of the rate of interest on deposits has had our attention, but there are so many reasons against adopting such a course that we have not yet decided to do it. If the interest on deposits was reduced to 4 per cent. undoubtedly a good deal of the money now with us would be withdrawn, 4 per cent. being not sufficiently tempting to the bulk of depositors. *Losses and amounts written off.*—The losses and amounts now written off are extremely heavy, but with the present state of affairs generally, the policy of writing down the value in our books of some of our securities must be apparent to you all. It is, of course, possible that our action may have a depreciating effect on the realizable value of some of these securities, but we are confident that it is best in your interests. *Indo-Chinese Sugar Company.*—The amount written off for the Indo-Chinese Sugar Company's account reduces the value of the estate in our books to half the value our special agent has placed upon it, as stated in the report. The value at which it now stands appears in statements of account which the general manager has prepared, showing the position of this account as well as that connected with the Sugar Refinery and the Pier and Godown Company, which may be consulted by any shareholder in the general manager's room. Having regard to the ultimate realization of the property, the directors think it altogether undesirable to make public here the actual values to which these properties have been written down respectively. The factory at the Sugar Company's estate is now in good order, and by latest accounts from the bank's special agent was working not unsatisfactorily. The season's working will be over in little more than two months, and it is not our intention to expend any more money after this season. The money being advanced for this season's working will, if our last advices be confirmed, come all back with something to the good besides. We hope to realise the the estate soon, such being, we know, the desire of many of our shareholders. *London Losses.*—It has been pointed out to us by a shareholder that at the last meeting I stated that our manager there (London) had on his own responsibility, and without our knowledge or consent, made some considerable transactions in bonds and securities, outside of English and Indian Government paper; and the result has been a heavy loss. We have considered it advisable and best in your interest to provide fully for this loss, though we do not accept it on account of the Bank, and in the meantime we have asked for explanations, and in their present report the Directors say "the amount placed against London losses is required on account of transactions entered into prior to the present half-year. Although these transactions were known to the directors at the date of the previous meeting, they had no reason, from the information then in their possession, to look upon them as bad. Subsequent advices, however, shewed that a considerable amount had to be provided for them, which has now been done." We have been asked for certain explanations with reference to these two paragraphs, which I am glad to have now the opportunity of giving. The transactions referred to by me at the last meeting and those mentioned in the present report, are, with one trifling exception, different. The total amount which has been provided for London losses is about £71,000. At the last meeting we had written off £30,000. We have now written off $160,000. In London itself £8,000 had been written off in April, 1874. The losses provided for at the date of the last meeting arose from transactions chiefly in Spanish Bonds and American Railways. The amount of securities outside of English and Indian Government stock now stands in our books at only £1,800, and the Directors mean to have that realized immediately. The losses now written off arose chiefly from advances which should never have been made, and would never have had our sanction had we been asked about them beforehand. Immediately we knew the nature of the transactions we used every effort in our power to get them settled, but without avail. We had no reason to consider the advances otherwise than good at date of last meeting, or of course we would have provided for them. The true state of affairs only reached us subsequently, and cruelly shocked and surprised us. Had not the Directors unfortunately reposed the greatest confidence in the integrity and caution of their London manager, it is probable that many of these losses would have come to their knowledge months before information about them was received; but unhappily they remained misinformed until it was too late. The Directors feel very keenly the position in which these matters have placed them with respect to the shareholders, and the regret which has been expressed outside cannot exceed that which they themselves experience. The appointment of a local Committee in London, regarding which immediate steps are to be taken, will remove any likelihood of a recurrence of such transactions as I have just referred to. *Sterling Bills.*—The losses on sterling bills are such as almost no Exchange Bank, doing a large business, can be entirely free from in bad times. The utmost care is exercised in purchasing these bills at all times, but it is impossible occasionally to guard against errors in judgment in their selection. *Head Office.*—The amount written off Head Office accounts, is a very large one, and is appropriated as mentioned in the report. We have written off considerable sums from the value in our books after various items referred to, not so much on account of our believing previous valuations would not be realized, but in order that on realization we may not have to come to you again with deficiency. The Sugar Refinery suffered a good deal by the typhoon in stock and buildings, but the business progresses

favorably and has apparently become solidified; no advances are made to the Refinery, and none are required, almost all the manufacture is sold for cash. During 1874 just over 100,000 piculs were thus sold. We of course still adhere to our resolution to dispose of the property on the first favourable opportunity. The Pier Company's property has been written down in our books for much the same reason as the Refinery. *Sundry Losses.*—The sundry losses are mostly made up of deficiencies on the value of goods advanced on at some of the branches previous to the half-year, the borrowers not having been able to pay margins when called upon. Many of the goods have since been realized and the losses are written off. These are the particulars of the amounts now written off, and we hope that a considerable amount may yet be recovered. *Shanghai Premises.*—A good deal has been said outside regarding our new Shanghai premises, and it may be well that I should now give you some particulars regarding them. The lease of our present premises in Shanghai expires shortly, and the terms on which we were offered a renewal, viz., that the place should be rebuilt, would have cost us a very high rent. With this in view, and considering it indispensable that the Bank should be on the Bund, the Directors had, about 18 months ago, decided that the Bank should purchase premises in Shanghai, and bought the present site for Taels 60,000. A contract was made for the buildings for Taels 44,000. Some iron pillars, &c., were ordered from England, costing about Taels 8,000, and the architect's commission was to cost Taels 3,640, making a total cost of Taels 115,640, and, so far as we know, these amounts will not in any way be exceeded. Taking the highest rate at which we receive deposits, viz. 5 per cent. this would cost us Taels 5,782 per annum, and we shall have most commodious premises, with accommodation equal to that for which we now pay Taels 5,040 per annum rent. *Shanghai Sub-Manager.*—The Directors have deemed it advisable to appoint a Sub-Manager in Shanghai, and have selected Mr. John Walter. They consider this step will have a good effect on the local business there, and it will give the manager more freedom to attend to business generally.—Before moving the adoption of this report, I shall be glad to answer any questions which shareholders may desire to put to the Directors.

Mr. KINGSMILL then said he had given notice that he wished to ask a few questions upon certain matters connected with the Bank. He did not think it would be fair either to the directors or the shareholders or the chief manager, that no questions should be asked. It would not be honorable either to screen such questions, and he had given notice of them because he thought every opportunity should be given of considering them beforehand and meeting them in the best way. At the outset he was happy to say that the Chairman in his address had met a number of the questions he intended to put—had met them, he was bound to say, in some cases very satisfactorily, and in no instance unsatisfactorily. (Hear, hear). He had intended to ask some questions about the sums written off with respect to what he might term the three bugbears—the Indo-Chinese Sugar Company, the Pier and Godown Company, and the Sugar Refinery. But after the statement which had just been made by the Chairman, and the tabulated summary in the chief manager's hands, which altered the complexion of things considerably, he thought it would be quite unnecessary to put questions referring to them. But, beyond this, there were certain questions which he really should have to ask, and one of them was about that London manager. It was not his (Mr. Kingsmill's) intention in the slightest degree to attribute any misconduct whatever, either to the present Board of Directors or to any preceding Board, with reference to these losses in London. He was sure they had resulted from the gross mismanagement of the Corporation's manager there, although he was bound to state that he thought the Board had placed overweening confidence in him. But Mr. Vacher was a man well known in China years ago. When he (Mr. Kingsmill) was in the East before, he knew him, and he was looked upon as an owner of considerable property and a good business man. He was not, therefore, very much surprised that so much confidence had been reposed in him; although he believed it would be a sound policy for the Board not to overtrust any of its servants. The remarks made by the Chairman, as he had already said, had cleared up some of the matters upon which he wished for information; but some questions were yet necessary. Was he, for instance, to understand that all the transactions with Mr. Vacher, which were taken into account at last meeting, consisting of speculations in Spanish Bonds and American Railways, realised their amount, with the exception of some £1,700 or £1,800?

The CHAIRMAN said the balance now remaining for the purposes of the Bank was some £1,800.

Mr. KINGSMILL said he supposed then that the loss was the difference between that amount and the amount advanced. He wished to know if the Board had taken any valuation of the losses which they thought would turn out sound?

The CHAIRMAN said they were included in the $160,000.

Mr. KINGSMILL: Will you kindly tell me if any losses besides those received out of the said transactions, accrued in respect of advances made by the London Branch in which Mr. Vacher has or had any interest? If so, what is the amount of said losses?

The CHAIRMAN: The Directors know of no other losses. A dispute has arisen with reference to one amount which is now under litigation, and from the information at their disposal the Directors expect a successful issue to their suit. The amount in question is £10,211 0s. 8d.

Mr. KINGSMILL: At what date did Mr. Vacher cease to be a servant of the Bank?

The CHAIRMAN: Mr. Vacher ceased to be a servant of the Bank on receipt of a telegram from the Head Office, sent on the 8th January, 1875. He had for some months before that been on leave, and had not acted for the Bank since the date of last meeting.

Mr. KINGSMILL: May I ask who managed the Bank in Mr. Vacher's absence?

Mr. CHAIRMAN: Mr. D. Maclean, the sub-manager.

Mr. KINGSMILL: When did Mr. Maclean first inform the Directors about the transactions by Mr. Vacher?

The CHAIRMAN said the information came in gradually after the last meeting. Mr. Maclean discovered the transactions and made them known.

Mr. KINGSMILL said it was really very important to the shareholders that they should know the exact date.

The CHAIRMAN said he could not then give him the exact date.

Mr. KINGSMILL: Is it a fact that, in the course of the past year, 1874, the Directors granted a bonus of $10,000, or of any other and what sum to be distributed among certain of the employés of the Bank, in addition to their regular salaries?

The CHAIRMAN: The Directors have granted no such bonus.

Mr. KINGSMILL: Is it a fact that the Court of Directors granted Mr. Rowett a sum of money as a gratuity before his leaving Hongkong. If so, what was the amount so granted?

The CHAIRMAN: It is a fact that the Directors did grant to Mr. Rowett a gratuity before leaving Hongkong. The sum was £500. Mr. Rowett had accepted office in the Bank, and, to enable him to do so he has resigned the Directorships of various Companies including the Bank, the emoluments of which brought him in a considerable annual income. Had it not been for Mr. Rowett's acceptance of office in the Bank, it had not been his intention to resign his appointments, nor to leave the Colony for at least a year. When Mr. Rowett therefore resigned the office which he had accepted under circumstances which, as they are pretty generally well known, it is not necessary to detail to this meeting, he clearly became, in the opinion of the Directors, entitled to some compensation; and it should be added that that which he accepted amounted to a very inconsiderable ratio of the emoluments he had previously given up.

Mr. KINGSMILL: I will make no comment on that. One of my questions is with reference to the Shanghai branch. Were the Directors warranted in incurring such an expenditure for the building in Shanghai?

The CHAIRMAN: We wanted office accommodation in Shanghai, and we could not get it, and that is why we built the premises.

Mr. KINGSMILL: Has it been contemplated by the Directors to sanction an outlay of the sum of $20,000, or any other and what sum, in purchasing furniture for the Shanghai premises?

The CHAIRMAN: The furniture referred to has not yet been ordered; but it is contemplated by the Directors to sanction an expediture not exceeding £4,000 to furnish the premises properly when occasion requires. But the bulk of the money will not be spent until better times come.

Mr. KINGSMILL: Two half-years gone over, and no dividend to the Shareholders; over a million dollars lost to the Bank, and now the Directors sanction an outlay of £4,000 for furnishing the premises at Shanghai! (Shame!) Is it a fact that $79,000 or any other and what sum was offered for the purchase of the Hongkong Pier and Godown Company's premises? If so, why was not that offer accepted?

The CHAIRMAN: The highest bid made at the auction of those premises did not reach the limits which had been previously fixed by the Directors by way of reserved bidding. This property had shortly before the auction cost the Pier and Godown Co., Limited, on the whole nearly $300,000, and the Directors had fixed their limit at a figure which they considered more than sufficiently low.

Mr. KINGSMILL: Is Mr. Maclean's inspection to extend to the working the details and the accounts of the Head Office of the Bank here in Hongkong, as well as, and in the same manner as, to the different branches?

The CHAIRMAN: Yes, it is.

Mr. KINGSMILL: Is Mr. Maclean's report, or the substance thereof, to be communicated to the shareholders, or to any select number or committee of shareholders as representing the general body?

The CHAIRMAN: The report will be laid before the Directors, who will communicate its substance to the shareholders.

Mr. KINGSMILL: Will the Directors inform the shareholders of the names of the gentlemen proposed to form the local committee in London before making any appointments, and consult the shareholders as to the appointments?

The CHAIRMAN: Under Article 144 of the deed of settlement, the appointment of local committees rests exclusively with the Court, and it is their intention to act in accordance with their powers.

Mr KINGSMILL: Are we to understand the shareholders are not to be told the names of the committee?

The CHAIRMAN: After the appointment, of course you will be told.

Mr. Kingsmill: Is it contemplated to allow any remuneration to the members of such local committee? If so, what is the amount of remuneration contemplated?

The Chairman: It is so contemplated. The amount at which such remuneration will be fixed has not yet received discussion by the Court. It will not exceed what is usual in such cases.

Mr. Kingsmill: Does it form part of Mr. Maclean's instructions, or is it within the scope of his inspectorship, that he shall inquire into and report on the position and working of the Bank's various establishments with reference to the expenses, the efficiency, and strength of the staff, whether excessive or not at each office?

The Chairman: Yes, certainly.

Mr. Kingsmill said it was a very unpleasant task that had fallen upon him. He had considered the propriety of framing certain queries for the Directors to answer, and considered it was his duty to come forward and ask these questions before the body of the shareholders. He had endeavoured to do so fairly and honestly, and he felt bound to say, before he sat down, that there was a great deal that had transpired in the Chairman's address, and from the replies that had been given to some of the questions, that was satisfactory to him, and, he was sure, to the great body of the shareholders present. Many of these replies had given them a very fair insight into the real state in which the Bank stands, which he believed they had never had until that day. At the same time he must say the answers respecting the furniture for the office at Shanghai had rather startled him. But, from what he had heard that day, and if the sums written off bore a fair proportion to the value put on the various properties, if no more money was wanted, and if the directors ceased advances to those who would turn the Bank into a Cave of Adullam, and turn over a new leaf, he for one was bound to say that the Bank was never in such a strong or solvent condition as at that moment (applause.)

Captain Bernard wished to know the amount advanced to the Anglo-Chinese Sugar Company at Saigon.

The Chairman: The Bank has no interest in property at Saigon.

A Voice: You mean Siam.

Captain Bernard: Siam or Saigon; at all events, I mean out of this Colony. Is there no Director on the board now who took an active part in advancing that money?

The Chairman: I don't know; but I don't think there is.

Captain Bernard: What was advanced on the Distillery?

The Chairman: Nothing.

Captain Bernard: Well, upon the Sugar Refinery then?

The Chairman said Captain Bernard could see the accounts at the office, but he had alluded to the subject in his speech.

Captain Bernard: What has become of the money set aside to meet and make provision for all doubtful debts?

The Chairman: It has been meeting those accounts.

Captain Bernard: I should very much like to know more about those losses. They surely must have been very severe, for we have been writing off, and are not finished with it yet. There's going to be a local committee in London, I see. Have the Directors appointed that committee?

The Chairman: Not yet. I have already stated it is in contemplation.

Captain Bernard: Is it likely to include men who have been Directors?

The Chairman: That we cannot tell.

Captain Bernard: I bel eve this report states that we have a reserve fund of a million.

A Voice: A hundred thousand.

Captain Bernard: Well, a hundred thousand. What is the new building at Shanghai to cost?

The Chairman: About 115,000 taels.

Captain Bernard: You had better write that off. If there is an apothecary present, I should like to ask him for an ounce of civet.

The Chairman then proposed the adoption of the report.

Mr. Kingsmill, who unfortunately was at times inaudible, said that he had already expressed himself not quite satisfied on some points that had been discussed that day, but nevertheless he was willing to second the adoption of the report for many reasons. He was glad to see the Directors awaking to a sense of their position, and meeting the shareholders like men. It gave them hopes of better times. He himself had no fear of the Bank. Years ago, when at home, a stockbroker there, a friend of his, who was honorary secretary of the Stock Exchange, said to him, "Kingsmill, the only danger to that Bank is from within. If they are true to themselves the Directors can hold their own." The history of the Bank had shown the truth of this remark. As he was in the position of a seconder, he might add a remark that would assist the shareholders in estimating the position of the Bank. It was in 1870 that the first sum was written off, namely $268,507. In 1873 nothing was written off. Last year $334,000 was written off, and now they had the sums of $106,000 and $675,000, making $1,383,507. So that except $268,507, all the writing off had taken place since the beginning of last year. Confining himself to the report and accounts, he had great pleasure in seconding them. If the directors had met the questions put to them in a different manner, he would have been the first to propose the adjournment of the meeting and the suspension of the Court until the receipt of the advices.

The report was then put to the meeting and passed unanimously.

Mr. Cordes then proposed that Mr. F. D. Sassoon be appointed a director in the room of Mr. S. D. Sassoon who had left the colony.

Mr. Chater seconded, and it was agreed to.

Mr. Hoppius then proposed the re-election of Messrs. André and A. F. Heard.

Mr. Linstead seconded, and it was carried.

The Chairman proposed the re-election of the auditors, the Hon. P. Ryrie and Mr. F. W. Mitchell.

Mr. Burrows seconded, and it was passed unanimously.

Mr. May said he should have hesitated to address the meeting, except for what he had to speak about. It was a simple matter, and the first point he had to notice had reference to the feeling of the Directors, and he had a resolution to propose, which was especially interesting to the shareholders. The Chairman and other gentlemen had placed their hands to the plough, and although the furrows had not been straight they had been marvellously deep, which was not owing to the incompetence of the ploughmen, but to the restive nature of the horses they were driving, the Pier and Godown, the Sugar Company, &c. In the old days, when everything was flourishing, an investment in the shares of the Hongkong and Shanghai Bank was looked upon as the safest possible investment both for business people and widows and orphans. Now, owing to the recent losses many of the latter were in the greatest distress, and many more were put to the greatest inconvenience. They had said that hard times and the great depression of business accounted for this, but he asked the Directors, as men of feeling, to escape from the accusations which had been made against them, with a certain amount of injustice, it was true, but they were made. People outside accused some of the members of the board of a desire for the loaves and fishes. He did not desire to say one word offensive or personal, but it was impossible for him to convey an idea of the suffering entailed on many families by the present state of affairs without using the language he did. Now this presented an opportunity to the Directors to show their sympathy and share in the suffering which had been caused under their direction, if not by their fault. They could say—"We voluntarily, and by our own desire, but not without the suggestion being giving at a public meeting, give up a moiety of our remuneration to be carried for the benefit of these parties." (Applause). Many of those present had lived in the Colony during the reign of the merchant princes, when the enormous profits made in mercantile transactions enabled them to exercise unbounded liberality. No one could look back to those times but with regret; but they had now come to a time when it was necessary to enforce stern economy. This applied to all around them and why not themselves? This was what the directors might, and he was sure would, say. He therefore begged to propose that, in consideration of the altered state of mercantile affairs in China, and the present depressed condition of the Bank, the remuneration to the directors be reduced from $20,000 to $10,000 per year, commencing from the first of January last. (Applause).

Mr. Hayllar said that resolution could not be put at that meeting, as the deed of settlement required two days' notice to be given of any special motion. Even, therefore, if the meeting accepted Mr. May's resolution, it would be informal. He suggested that the matter be left to the Directors themselves. (Cries of "No, no.")

Mr. May said he desired to keep to the form, but the deed of settlement certainly appeared to him to give the power to any general meeting to alter the remuneration of Directors.

The Chairman then suggested that the matter should be left to the Directors themselves.

Mr. May said he placed much reliance in the Chairman, and if he said it would receive his support, he thought it would be acted upon.

The Chairman said he could only repeat that the board would give it their consideration. It seemed to him they were trying to push it down their throats.

Mr. May: Ah-h-h. (Laughter).

The Chairman said the resolution had taken them by surprise.

Mr. May said his resolution had reference to the future, not to the past.

The Chairman asked if Mr. May thought the directors' fees should be cut down for good.

Mr. May said he thought that, at least at present, they should be one-half of what they were in bygone days.

Mr. Kingsmill said he thought the remuneration of the Directors was too high.

The Chairman again said the matter would be taken into consideration, and he had no doubt it would be settled to the satisfaction of the shareholders.

Mr. May: Would you not take the sense of the meeting on the subject?

The Chairman said he did not think so; it was scarcely worth while.

Mr. Belilios: I regret it is not legal to put Mr. May's motion, for I was prepared to second it. (Enthusiastic applause).

Mr. May asked if the Chairman decided that the question could not be discussed.

The Chairman said he had gone by the articles of association. The directors were not supposed to tell the shareholders what they were to do. Everyone of them had a copy of the deed and could read it for themselves.

Mr. Russell said he only asked for information, as it was important as regarded future meetings. Personally he agreed wi'h the Chairman.

Mr. HAYLLAR said he thought two days' notice ought to have been given. Mr. Kingsmill had done so with his question.

Mr. KINGSMILL said he had, but it was not necessary, he thought. He saw nothing in the articles of the association against Mr. May's motion.

The CHAIRMAN said he was relying on the opinion of the Bank's counsel.

Mr. KINGSMILL said that on the present occasion that meeting had nothing whatever to do with counsel.

The CAIRMAN: Very well, I will not state my reasons, but merely say that I think two day's notice ought to have been given.

Captain BERNARD asked if the remuneration was to be reduced.

The CHAIRMAN: I have suggested that the matter be left to the directors.

Captain BERNARD: But we do not like the security. We are like the lawyer and Mrs. Bardell. I think there is a great want of delicacy in cavilling at such a resolution. If you feel that you have done your duty you are entitled to double remuneration.

The CHAIRMAN: If the meeting thinks that I have not done my duty, I shall be happy to resign my direction now.

Captain BERNARD again repeated that they seemed to be cavilling about the resolution. When people had lost so much, it was only fair that the directors should be content with half remuneration.

The CHAIRMAN: If Captain Bernard does not withdraw that personal remark, my resignation is before the shareholders.

Mr. ANDRE: And mine is before the shareholders too.

Mr. MAY said Captain Bernard was labouring under some excitement as to losses he had sustained. He (Mr. May) had the firmest reliance in the sufficiency and capability of the directors in conducting the affairs of the Bank. But he earnestly hoped that they would agree to their remuneration being reduced one-half.

Mr. KINGSMILL said the Chairman and directors should let such remarks as those of Mr. Bernard, pass.

The CHAIRMAN said he was perfectly willing to have an adjournment if the meeting desired it.

Captain BERNARD: That is what I want you to do.

Mr. FAIRBAIRN proposed that the question of remuneration be left entirely to the discretion of the directors.

Mr. RUSSELL said the Chairman had decided that the question of the remuneration of the directors could not be discussed at that meeting, and the motion therefore could not be put.

The CHAIRMAN then declared the meeting dissolved.

Amusement.

THE SHANGHAI AMATEUR MINSTREL SOCIETY.

On Monday evening, a negro entertainment, rather a novelty on the Shanghai boards, was presented to the public by sixteen amateurs. The object being charity, the tickets sold freely, and notwithstanding the unfavourable weather the house was well attended. The curtain rose with commendable punctuality, and the performance commenced with a selection from "La fille de Madame Angot." This passed off quietly; it might have been more effective if Bones and Mr. Pompey had been better acquainted with the air. The second piece was the Song and Chorus "Driven from Home." In the absence of a list of the *Dramatis Personæ*, we can only speak of this part of the programme as being well executed and well deserving of an encore. The Chorus was supplemented by several musical instruments, one or two of which were rather too powerful. A far-fetched conundrum followed, which created only half a laugh, after a few minutes consideration. The remaining portion of the first part of the programme consisted of Songs and Choruses, interspersed with riddles and funny sayings, the most appreciated of which was one by Mr. Pompey, who informed his brethren and the audience that the portico in front of the new Hongkong and Shanghai Bank was intended for the display of the Bank Dividend, when it had one to show.

After an interval of fifteen minutes (termed five on the programme,) the second part opened with a piece on the clarionet, accompanied by the piano. This was undoubtedly the *chef d'œuvre* of the evening. The accompanyist, we have heard before, as we have the clarionet player, at some of our most brilliant musical entertainments.

A sketch of negro life, or as the programme stated, a "Comic Sketch," which followed, was feeble, and even elicited some murmurs of disapproval. After an interval, we welcomed the return of the pianist, quickly followed by a leading member of the Society, dressed regardless of expense, who performed the "Big Sun Flower," a plantation song and dance.

"Three Black Crows" was next put on, and we have to commend the trio for the brevity of their ejaculations. A Cornet Solo was set down as the next item, but did not come off—we are told, the performer failed the company at the last moment. The whole concluded with "The S. A. M. S.'s trip to Woosung" by the whole strength of the company. We will not attempt to describe this; but merely remark on the appropriate scenery, prominent among which was a tailor's shop, bearing a signboard Thorne, Silver & Co.'s trousers, 12s. 6d. each. During the time allowed for rest at one of the supposed stations, the audience were entertained by a quadrille with banjo accompaniment. A grand finale resulted in the upsetting of the supposed carriages and sudden death of the occupants.

We are given to understand that the Minstrels are greatly indebted to the A.D.C. for their kind assistance and co-operation.

PROFESSOR IBURG'S CONCERT.

Professor Iburg's Concert on Tuesday evening, in the Lyceum Theatre, was the most interesting from a musical point of view of any which we have yet had this season. The performance of Schumann's piano quintett would alone have sufficed to stamp the entertainment as one of the very highest order; but in addition to this we were treated to a movement from one of Beethoven's Violin Sonatas, and variations by Haydn, while more general tastes were consulted by the introduction of two violin solos, three songs and two choruses. So solid and so varied a bill of fare should have filled the house from floor to ceiling, but (it is with something like shame that we say so) the attendance was not at all good.

The Concert opened with Schumann's Quintett, Op. 44, a work which shows the composer at his best. Concert-goers will remember the excellent performance of the same composer's piano Quartett, Op. 47, at Mr. Magnussen's first *Soirée Musicale* last winter. We hardly know which of the two works to give the preference to, both being absolutely perfect in the artistic point of view. We are glad to be able to say that the rendering of the Quintett by Mr. Iburg and the associated Amateurs left really nothing to be desired. Like so much modern concerted music, the piano has a leading part in the piece, and special recognition is due to the highly accomplished Amateur who rendered that portion of the score. Later in the evening, the same gentleman played Haydn's Variations in F minor, with even more than his usual success; the *pianissimo* passages, especially, were brought out with a delicacy and clearness which recalled Madame Goddard's happiest efforts. The first violin part in the Quintett was, of course, taken by the concert-giver himself, who in this and his other pieces showed himself an able performer and a true musician. His *technique* is only inferior to that of the foremost professionals. His bowing is remarkably free, and his tone is round and full, though better in the lower register than in the high notes, some of which were not quite accurate in intonation. His powers as a solo player were displayed in Vieuxtemps' beautiful *Rêverie* and a brilliant *Fantaisie* by Alard, in both of which he greatly pleased his audience, who recalled him after each. Beethoven's ninth Violin Sonata, a portion of which inaugurated the second part of the concert, is, as a work for the violin, only inferior in importance to the great Concerto, Op. 61. It was written for, and dedicated to, the celebrated violinist, R. Kreutzer, and abounds, of course, in technical difficulties. The middle only was given, the stately *andante*, with its four variations. This exquisite *morceau* was the gem of the evening, and was excellently rendered by the violinist and Mr. Fentum. The demisemiquaver variation for the violin showed Professor Iburg to the greatest advantage, and the difficulties for the pianoforte in the fourth variation were not less successfully overcome by his associate. We had only to regret that this noble work was not given in its entirety.

Our excellent and obliging *Basso* gave us two songs in his best manner. The tenor songs were likewise well given, but the gentleman who sang them can do better. He possesess a well-cultivated voice, and sings perfectly in tune—a very uncommon thing with Amateurs. Whether, however, owing to cold or some other cause, he was not in his usual "form" on Tuesday evening. Each section of the Programme terminated with a chorus lustily and effectively given by the Liedertafel, but we think they might have been taken a quarter of a tone lower with advantage.

We sincerely hope that we have not seen the last of Professor Iburg, though, after the somewhat limited encouragement he has received, he may not care to adventure a second Concert. Meanwhile, we must congratulate him on the artistic success of his late enterprise, and at the same time thank him sincerely for the treat he has afforded to ourselves and all lovers of classical chamber music.

Law Reports.

CIVIL SUMMARY COURT.

Shanghai, Feb. 26th,

Before R. A. MOWAT, Esq.

A. CAMERON *v.* J. F. TAYLOR.

The parties to this action are pilots, and plaintiff sued to recover $99, being money claimed by him through defendant refusing to allow him the use of a certain pilot schooner, he being a partner therein.

Mr. MYBURGH appeared for the plaintiff.

The defendant did not appear, and

His HONOUR said that on Tuesday (the day on which the summons had been served) the defendant had come to the Court, and applied that either the case should be heard on one of the two following days (Wednesday or Thursday), or that its hearing should be postponed till his return to Shanghai, as he was engaged to pilot the *Benledi* out on Friday. The plaintiff was communicated with, and requested to attend on Wednesday morning, when the defendant was also to be in attendance, so that the case could be then heard, if plaintiff were agreeable; otherwise it was to be postponed. The plaintiff came,

but instead of waiting quietly till I was disengaged, and the defendant had come, he made a great noise outside the Court, saying he would have it heard on no other day than Friday, and went off. When the defendant came, immediately after, I suggested his trying to find the plaintiff and arranging with him to have the case heard on Thursday, but on his saying that it would be no use trying, as he was sure the plaintiff would not consent, I made an order postponing the hearing till after the defendant's return to Shanghai.

Mr. Myburgh—But ought he not to have received a notification of the postponement?

His Honour—Certainly not, he knew of the application; and if he was so discourteous as not to wait to hear the result, the Court was not to run after him to tell him. (To plaintiff)—Why did you go away?

Plaintiff—I wanted to get the case off on Wednesday, but these gentlemen (pointing to the Court officials) told me it could not come off then.

The Usher explained that on Tuesday the plaintiff came to the Court for a summons and wanted to know if the case could be set down for Wednesday. He (the Usher) then told him it could hardly come on, on Wednesday, as there would probably be no time to serve the summons, the defendant being a pilot.

His Honour—And when it turns out that the case can be heard on the Wednesday, as he at first wanted, he vehemently objects to its being heard before Friday—probably because he then knew the defendant was going away in the *Benledi* and could not be here. Engagements of that kind are known and talked about among pilots, of course.

Mr. Myburgh—I must object to that assertion. Your Honour is not justified in imputing motives to my client. I say he ought to have been informed in the usual way, of this postponement.

Plaintiff (to His Honour)—Can't you do something with the case to-day?

His Honour—You could give me your version of the case, but that would be of no use, the case would still have to be adjourned.

Mr. Myburgh—Then I am to take it that the proper course is to adjourn a case on the application of a defendant, and not give the plaintiff notice of it? That is not the usual custom, and I must say with due deference that I consider the course adopted most unfair and irrregular. I consider my client has been prejudiced by it. His witnesses are pilots, and their convenience should have been consulted as well as that of the defendant. Besides that, he has been put to the expense of bringing me here to-day, which might have been avoided if notice had been served. His going away from the Court in the way stated did not justify this proceeding.

His Honour—He did not in my opinion, after his conduct, deserve notice. Besides, he had notice in the first instance, and when once he comes in compliance with such notice, he is, by our Rules, affected with knowledge of all that takes place in the matter of his particular case. If he does not choose to stay and hear what takes place, he has himself only to blame.

Mr. Myburgh—And then, about the plaintiff's witnesses?

His Honour—What witnesses has he?

One witness, named Peters, a pilot, came forward; another, Sutherland, from the body of the Court, said he was a witness.

His Honour asked Peters if he was here on Wednesday and Thursday?

Peters replied that he was.

His Honour—Then the plaintiff could, so far as that witness is concerned, have had the case heard on either of those days. And Sutherland was with him on Wednesday at the Court. What other witnesses are there?

Plaintiff said there was another, but he was not in Shanghai.

His Honour—Then so far as he too is concerned, the case could have been heard on Wednesday. I cannot imagine why you did not have the case heard on that day, when all parties were present in Court, unless it was with the view of putting (as you hoped) the defendant at a disadvantage.

Hearing adjourned until one side or the other gives notice of the defendant's return.

POLICE COURT.

Shanghai, Feb. 22nd.

Before R. A. Mowat, Esq.

R. *v.* William Stevens.

Drunk and Incapable.

Defendant, an able seaman of the steamer *Ocean*, was found by P. C. Piper in the Tiendong road, on Sunday, drunk and incapable. He admitted having been before the Court on a former occasion, charged with a similar offence, and now had no excuse to offer.

Fined $2.

R. *v.* Philip Barnard.

This defendant, a fireman of the steamer *Benledi*, was charged by P. C. Stean, with a similar offence, also on Sunday, in the Woosung road. Being his first offence here, he was let off with a caution.

Feb. 24th.

R. *v.* Duncan Matheson.

Drunk and Incapable.

Defendant, a fireman of the steamer *Ocean*, was paid off from his ship on Tuesday, and was found by P. C. Boysen, at half-past twelve the same night, drunk and incapable in the Broadway, Hongkew.

Cautioned and discharged.

Feb. 27th.

Reg. (Master of the *Omba*) *v.* George Grey.

Using threatening language and absent without leave.

Captain Thomson charged George Grey, an A.B. on board, with being absent without leave, and using threatening and disgusting language towards himself and officers of the ship, on Sunday last.

The Captain stated that, since the arrival of the vessel in this port, defendant had given a great deal of trouble, and had in consequence been logged on several occasions. On Sunday last defendant was ordered forward by the Chief Officer, when he refused to go and made use of very bad language; later in the day defendant left the ship and did not return until Tuesday morning.

Defendant admitted the charge of being absent, but denied using any bad language, and averred that the mate had abused him with foul language.

His Worship said that he should not go into the question of language. It was clear the Captain had borne with defendant's bad conduct for a long time, and had been very lenient. Had he been brought to Court sooner, it would perhaps have been better for him. He should now sentence him to four weeks imprisonment with hard labor, during which time he would have to pay for his maintenance, and also to pay the cost of these proceedings. Should the ship sail before the expiry of the term of imprisonment, he would be put on board.

March 1st.

R. *v.* Pamero, Quarter-master of the P. & O. steamer *Sunda*.

Drunk and incapable.

Defendant admitted the offence, and was cautioned by his Worship and dismissed, having been locked up all night.

March 2nd.

Before R. A. Mowat Esq.,

Reg. (Master of the *Corea*) *v.* John Lundstrum.

Drunk and incapable on board.

Defendant admitted being drunk, and unable to do his duty on the 1st inst.

Ordered to pay the cost of the summons.

Samuel Polow, cook of the *Corea*, was also charged with being drunk and incapble near the Soochow creek, at 11.50 p.m. on the 1st inst.

The defendant on getting into the box, said in answer to His Worship, that he was sober enough now, only he had a frightful head ache.

His Worship.—Well, I will let you off on this occasion, and I hope that the head-ache you have will teach you not to get drunk again.

Christopher Petersen *v.* Charles Churchley.

Assault.

Defendant and complanant were both seamen of the *Corea*.

Complainant stated—Yesterday I was standing near the after companion. Defendant came aft and asked for some breakfast. The steward told him to go to the cook. I walked forward, and defendant followed me, and when near the galley he struck me; knocking me down; he then kicked me on the side. In falling I struck the winch and hurt my arm. I can hardly move it now. No one else struck me but defendant.

His Worship—You hear what the charge against you is; did you assault the complainant?

Defendant—I suppose so; I don't know. I had no reason to do so, that I know of.

His Worship to complainant.—Has the defendant ever abused or struck you before during the voyage from England?

Complainant.—No Sir, but either he or I must leave the ship now.

His Worship.—Have you seen a doctor about the injury to your side?

Complainant. — The doctor came in the morning, but I did not see him.

His Worship to defendant.—I see that there are two other charges against you, one for broaching cargo, and another for threatening to take the captain's life; is that true?

Defendant.—No, false.

His Worship said he would remand the defendant in custody until Friday, for the purpose of obtaining a medical certificate as to the nature of the injuries upon the complainant, and for the production of the proper witnesses on the charge of broaching cargo.

Reg. *v.* Thomas Cowley.

Drunk and refusing duty.

Defendant, a seaman of the *Corea*, was charged by the captain with being drunk and unable to do his duty on the 1st inst.

Captain Adams stated, that on Monday morning the second officer reported that several of the crew were drunk and unfit to work. Defendant was one of the men.

Defendant said that he worked all day on Saturday, and on Monday.

The Usher of the Court stated that he served the summonses in all these cases on Monday at about 3 p.m., and had to go down into the forecastle, where defendant and several others were lying in bed. A man named Duncan was also summoned on a similar charge, but he had not appeared.

Captain Adams said Duncan had said this morning that he was sick, so he let him remain on board.

His Worship said a warrant would be issued against Duncan, which the officer could serve later in the day, after the doctor had visited the ship.

Defendant was ordered to pay the cost of the summons, and forfeit six days' pay to the ship.

PRICE of the *NORTH-CHINA HERALD and S. C. & C. GAZETTE*.—Per Annum, Taels 12; Six Months, Taels 6.50; Three Months, 3.50;—*all payable in advance*. Credit price, Tls. 13.15 per Annum. Subscriptions will be considered as renewed, unless notice to the contrary be given before the expiry of the current term.

TERMS FOR ADVERTISING.—Ten Lines and under, *One Tael*; each additional line *One Mace*. One-half of these charges for repetitions. Contracts may be made for 3 months, or longer, *payable in advance*.

SUBSCRIPTIONS received, and Single Copies Sold, by George Street,

30 Cornhill.

LONDON (*E.C.*)

☞ *Advertisements will be repeated unless countermanded.*

COMMERCIAL INTELLIGENCE.

SHANGHAI, MARCH 3RD, 1875.

ARRIVALS.—*Egeria*, s.s., from Hamburg; the s.s. *Glenartney*, *Glamis Castle*, and *Foochow*; and the s.v. *Belted Will*, from Great Britain.

TELEGRAMS.—*Mid. Or. Cotton*, 8⅛d. per lb.; 8¼-lb. *Eagle Grey Shirtings*, 9s. 9d.; *Iron*, £10 10s.; and *Lead*, W.B., £23 7s. 6d.

THE first batch of Northern steamers left this on the 27th ultimo. They comprised those mentioned in last Report, and also the *Haining*. The *Chihli* has since sailed with cargo for Chefoo and Newchwang.

TIENTSIN advices to 15th of last month per overland courier were received two days ago. They note some improvement in *American Drills* and mention sales at Tls. 3.20 of sea-damaged Dragon chop, which were bought at Auction here in November last, at fully that equivalent. Otherwise trade was quiet, not having been fairly resumed since New Year. Letters from HANKOW under date 27th ultimo, state that "only a limited business has been done and prices are unchanged." There were sellers of best 9¾-lb. *Eagle Grey Shirtings* at H. Tls. 2.59 per piece, and of 8¼-lb. of second quality—same chop—at H. Tls. 1.86 per piece. The foreigners at Chinkiang are still "looking for an active trade." At the present time "the finest makes of 7-lb. T.-Cloths and 8¼-lb. Shirtings command no attention." The P. M. S. str. *Oregonian* from Japan arrived on 25th ultimo, but brought nothing interesting in regard to Piece Goods. Some small orders for inferior cotton came over by her, however, and there has in consequence been rather more stirring in our Cotton market since last mail day.

PIECE GOODS.—With the exception of one sale of over 9,000 pieces *American Sheetings*, and another of 8,000 doz. *Handkerchiefs*, transactions have not been important. At same time the aggregate business has been considerable. As reported it sums up as follows:—

6-lbs. Grey Shirtings	5,000	pieces	Common	at Tls.	1.30	@ 1.31	per piece.
7-lbs. Do.	9,000	,,	Common to best	,,	1.35	,, 1.50	,,
8¼-lbs. Do.	8,200	,,	do.	,,	1.60	,, 1.91	,,
9¾ *a* 10-lbs. Do.	13,000	,,	do.	,,	2.50	,, 2.62	,,
6-lbs. T-Cloths	2,500	,,	Common	,,	1.08	,, —	,,
7-lbs. Do.	3,000	,,	Mexican	,,	1.32	,, 1.40	,,
8-lbs. Do.	8,000	,,	Ordinary	,,	1.60	,, 1.62½	,,
15-lbs. Drills, English	2,040	,,	Levita's Dragon	,,	2.50	,, —	,,
8-lbs. Jeans, do.	2,000	,,	Ord. & Peacock	,,	1.80	,, 1.83	,,
Sheetings, American	9,200	,,	Lion, &c.	,,	3.75	,, —	,,
Dimities	500	,,		,,	1.50	,, —	,,
White Brocades	250	,,		,,	2.25	,, —	,,
Chintzes	2,500	,,		,,	1.30	,, —	,,
Muslins—Printed	700	,,		,,	0.95	,, —	,,
Lastings—Black	100	,,		,,	10.25	,, —	,,
Camlets, English and Dutch	700	,,		,,	13.25	,, 13.60 and 19.00	per piece.
Figured Orleans	1,200	,,		,,	2.80	,, 3.30	per piece.
Mohammedan Cloths	300	yards		,,	0.14½	,, —	per yard.
Handkerchiefs	11,000	doz.		,,	0.45	,, 0.52	per doz.

Long Ells and Crapes, nothing; and very little in Mediums, or in Spanish Stripes beyond those disposed of at auction week since.

Heavy Shirtings have been in strong request, and within the last two days stocks, and floating cargo close at hand, have advanced in value from 2 *a* 5 cand. per piece. Thus far the excitement has extended to these supplies only, buyers being afraid to touch long distant shipments. Common 7-lbs. have also been in good demand, and rates may be quoted 1 cand. per piece or so firmer, but in 8¼-lbs. business has been very dull, and the few sales recorded are barely sufficient to establish quotations. A few of Collie's *Green Lion* chop have brought Tls. 1.83 per piece.

White Shirtings.—Occasionally there has been an enquiry for 56 *a* 60 Reeds, but it has borne but little fruit. The market appears to be steady however, and the article apparently is wanted, judging from the price paid, Tls. 1.76; at Auction the other day for some sea-damaged 60s. In the higher counts no business has been published.

T-Cloths.—The demand noticed on Wednesday last has not changed. It still runs on the common descriptions of the different weights. Yet no improvement in value can be noted. This is not a little surprising as regards 7-lbs., of which there is not a piece in stock, and very little known to be on the way. The natives say, however, that it will pay them better to buy low Mexicans at Tls. 1.30 *a* 1.31, than to give any advance for the commoner counts. To-day, 50 bales of *Tai-ping* Dewhurst's 8-lbs. T-Cloths have been sold at Tls. 1.80 per piece.

Drills.—Enquiry has been limited, but the clearances for the North have been heavy, and the Northern men are now waiting, professedly, to learn the result, or the prospective outturn of these their first shipments.

Jeans.—Nor has the demand for these been on an extensive scale, and the market closes weak with sellers.

Sheetings.—Buyers evidently could not give the prices demanded for the cargo of the *Golden State*, from NEW YORK last year, in stock, and so the holders have wisely accepted Tls. 3.75 per piece for the lot. *English Sheetings* are repeatedly asked for, but the supply continues limited.

Fancy Cottons.—The trade wants have not been very comprehensive. The articles embraced are common *Chintzes* at low prices, *Handkerchiefs*, *Dimities*, *Mahomedan Cloths*, and *White Brocades*, with the results as noted above. *Blue Mottles* or *Denims* have also been wanted, and in the absence of stocks, some sales to arrive have been effected.

Woollens.—*Figured Orleans* of good quality and of approved pattern and assortment have been in some request, but it is very difficult to suit the taste of buyers, and hence only a few have been settled. *Camlets*—The business in these—outside auction sales—is trifling, still it is enough to show a stiffening tendency in prices. At the auction last week an advance of one mace per piece was paid. *Long Ells.*—100 pieces scarlet C.P.H. at Tls. 7.26 free of brokerage is about the only transaction reported. *Lastings*—In addition to the sale of black at Tls. 10.25 per piece mentioned above—about 500 pieces of C.P.H. assorted have been quitted at Tls. 12.60 per piece. *Spanish Stripes* and *Medium Cloths*—nothing to report. An auction sale of the latter was attempted last Friday but it fell through, the prices offered being altogether too low. The No. 2 *Russian Cloth* reported as sold in my last circular, was not the genuine article but an imitation.

METALS.—*Nail Rod Iron.*—The tone of the market has somewhat improved since last week, although dealers still complain of dulness. A demand from Japan for small sizes has induced shippers to take advantage of the present cheap rates of steamer freight, and of 10,000 bundles good M.M. cargo, which has been settled this week at Tls. 2.85 *a* 2.90 per picul, about one half goes to the Japanese markets. *Lead.*—A decline of £1 2s. 6d. per ton was telegraphed from home on 26th instant, and rates have since become rather weaker in consequence, small sales of L.B. having taken place at Tls. 6.15 *a* 6.20 per picul. Holders still cling to the hope that the natives must come into the market before many days are over, and that their wants, being imperative, must be supplied at any cost, but the latter appear to entertain slightly different ideas. At all events, and although it is evident that they do require the article, they steadily refuse to meet holders to any great extent on present terms. Whether they can hold out remains to be seen. *Tin.*—The slender improvement noticed last week has not been maintained, and quotations have receded to their former level, the market closing very quietly.

COTTON.—Upwards of 7,000 piculs have been settled this week, and under the influence of the prevailing activity, prices have risen about 4 mace per picul all round. Purchases have embraced every quality, and are destined for the South, for Hankow, and for Japan. The excitement is bringing supplies more liberally in from the country.

EXCHANGE.—Rates are firmer, the Bank quoting 5s. 9d., at which a fair business has been done. There is but little Private paper offering. Credits are quoted at 5s. 9⅜d., and Documents at 5s. 9½d. On India, there is a demand for Rupees at 307 on Calcutta, but no business has been reported. On Hongkong, 26¾ is the closing rate.

SILK.—Latest London telegrams quote Gold Lion No. 1 at 18s.; Red Peacock, 15s.; common No. 5 Tsatlee, 12s. per lb., and business confined to a few auction sales. Since the 25th February a fair business has been done, considering the advanced period of the season; the inferiority however, and consequent rejection of a good deal of the silk settled, has reduced purchases accepted to 800 bales, amongst which are the following well-known chops, showing a slight a decline on last quotations.

	Per picul.	Per lb.	Per kilo.
Koo-fong-sing Chop No. 3 Tsatlee	Tls. 415	20s. 6d.	Frs. 57.30
Kukee's "Chin Jan" and "Kin Hock" Tsat.	Tls. 340 & 310	16s. 10d. & 15s. 4d.	Frs. 47.10 and 43.05
Pagoda Chop No. 2 Tsatlee Beautiful Woman Chop No. 2 Tsatlee Buffalo Chop No. 2 Tsatlee	Tls. 325	16s. 1d.	Frs. 45.10
Blue and Yellow Elephant	Tls. 325 & 300	16s. 1d. & 14s. 11d.	Frs. 45.10 and 41.70
Red Peacock	Tls. 320	15s. 10d.	Frs. 44.40
Bird Chop "King-ling"	Tls. 307½	15s. 3d.	Frs. 42.52

For the larger proportion of the stock on the market Chinese are eager sellers, whilst for the few desirable lots that are left they are fairly firm on a basis of the above quoted prices. The estimated unsold stock is barely 3,500 bales, and consists chiefly of very inferior descriptions.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods for the week ending 1st March, 1875, compiled from the "Customs Daily Returns," Nos. 40 @ 45, both numbers inclusive.

COMMERCIAL POSTSCRIPT.

March 4, 1875.

Arrivals.—February 25th, British barque *Ceres*, from Newcastle, N.S.W.; 25th, British ship *Silver Eagle*; March 1st, British barque *Kate Waters*, both from Sydney.

Departures.—February 27th, British ship *Northampton*, for New York.

The French mail steamer *Ava* takes about 800 bales of Silk.

The P. M. S. S. Co.'s steamer *Oregonian*, which left Shanghai on Tuesday morning, took 265 bales of Silk, for New York.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 9d. *a* 5s. 9⅛d. First-class Credits to Bank, 5s. 9⅜d. First-class to Private buyers, 5s. 9¼d. Private and Documentary, 5s. 9⅜d. *a* 5s. 9½d. On Paris, Bank, Frs. 7.27½. Private, Frs. 7.32½. On India—Bombay Bank, demand, Rs. 305. Calcutta Bank, Rs. 306½. On Hongkong, Bank Bills, demand, 26¾ per cent. discount. Private, 15 days' sight, 27¼. Gold Bars, Tls. 173.00. Bar Silver, Sh. Tls. 111.20 Mexican dollars, Sh. Tls. 73.80 per 100. Carolus dollars, Sh. Tls. 80.80, per 100. Copper cash, —— per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

S. S. N. Co.—Sales were made on 26th ultimo at Tls. 70 per share, since which a fair business has been done at the same rate, and there is now a feeling of improvement in the market.

H. & S. Banking Corporation.—After the issue of our last report, the rate touched 20 % discount and ex 73, at which business was done up to 1st March, when a reaction took place, which has resulted in considerable sales at all rates up to 14 % discount and ex 73¾. Buyers now offer that price, but cannot get shares.

Fire Insurance Shares.—*Chinas* have been placed at $131, and *Victorias* at $120 per share; and both are in demand. *Hongkong Fires* are on offer at $500 per share.

Marine Insurance.—*Chinese* are in demand, and *Yangtszes* and *Japans* are on offer at quotations.

Hongkew Wharf Co.—Rates advanced to Tls. 105 per share with business, but shares are now freely offered at quotations.

The Weather cleared on Saturday and Sunday—the latter day especially being bright and mild, with a Southerly wind. Heavy rain fell again on Monday afternoon, but a strong Northerly wind set in on Tuesday morning, and the weather has since been again clear and cold. The thermometer has fluctuated between 33 and 49.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, MAR. 11, 1875.

RETROSPECT OF 1874.

Foreign Relations continued.

Although our political position is unsatisfactory, our relations with the people have been generally friendly. The old awe of the foreigner has greatly disappeared, but has been succeeded by the tolerance of habit. There have been collisions, but they have generally had special causes, and have not arisen from sheer dislike to foreign intrusion. There have been, as usual, missionary troubles; notably at Che-meh in Shantung (*N.-C. Herald* June 13th), and at Hoochow (*N.-C. Herald* Dec. 17th). Both were eventually settled by negociation. A serious riot also occurred in the French Concession at Shanghai (*N.-C. Herald* May 9th), through a dispute between the Ningpo guild and the French Council. The latter wished to lay out and metal a road which had been traced on an old plan of the Settlement, and which they contended therefore had been virtually reserved as Municipal property. The Chinese urged that the road would run through an old graveyard, and offered to give other adjacent land. The Council refused; much excitement arose, large crowds gathered about the Joss House, and eventually a collision with the police precipitated a riot. The mob burned and gutted a number of houses, maltreated several French persons, and were proceeding wildly with the work of destruction, when the Volunteers were called out and sailors were landed from the various men-of-war. At their approach the rioters scattered. A proclamation issued next day by the French Consul-General, terminated the difficulty by yielding the point at issue. M. Godeaux's action was severely criticised, and time has not altered popular opinion. The great majority of foreign residents favoured the Chinese view of the question at issue between the Guild and the Council; but every one condemned M. Godeaux's concession under mob pressure, as politically bad and a dangerous precedent. He acted, moreover, without the knowledge and in opposition to the wish of his colleagues, who were loyally standing by him in his difficulty. The punishment of the rioters and the restoration of the damaged property should have been insisted on, as preliminary to any further negociation.

An affair, trifling in itself, but which gathered some importance from the violent action of the Chefoo Taotai, occurred in connexion with the Lighthouse work on the Shantung Promontory (*N.-C. Herald*, Aug. 8th). Some dispute arose between the workmen and the country people; a foreigner in charge of the work was assaulted, and struck one of his assailants with the butt of a revolver, which went off and killed a man behind. The Chinese of course accused him of murder, and he was brought up for trial before H. M. Consul, in the presence of the Taotai. No sufficient evidence was forthcoming, and Mr. Lay acquitted the accused, when the Taotai was guilty of most unseemly violence, declaring at first, that no one should leave the Court till the judgment was altered. Mr. Lay, however, was quite equal to the occasion; the matter passed over, and the accused left Chefoo. He was subsequently re-arrested by the order of the Chief Judge, and tried but acquitted by a jury. We quote the case chiefly to record the impertinence in which the Chinese magistrate indulged. We can understand that, as it was clearly a bullet from the foreigner's pistol which caused death, he was to the Chinese mind guilty of murder. But no Chinese magistrate would have ventured ten years ago, to comport himself as did the Taotai of Chefoo towards a British Consul.

Riots have also occurred in Foochow, in connexion with the projected

telegraph line from that city to Amoy. Sanctioned by the Authorities when war with Japan appeared imminent and quick communication with Formosa was important, the work was thwarted directly that danger had passed. Unable to evade the sanction they had at first given, the officials seem to have got up the farce of popular opposition. Mobs, in which the presence of yamen runners was accused, attacked the workmen and destroyed certain property of the Telegraph Company. The neighbouring villagers subsequently disclaimed, to the Foreign Superintendent, any personal hostility to the project, the Elder expressing himself rather favourably to the undertaking, as providing remunerative work. It remains to be seen what action the Danish Government will take, and what assistance will be lent to its Minister by the Representatives of other powers, in the remonstrances which will necessarily have to be first made, at Peking.

Rumours got afloat at one time, of renewed agitation at Tientsin, and of an intended fresh outbreak against foreigners; but they probably originated in the uneasiness which preceded an émeute among Li Hung-chang's troops. It was felt that something was coming, but it was not known exactly what. The mutiny, when it did occur, was promptly quelled.

An idea gained ground in the early part of the year, that Ichang would be shortly opened to foreign steamers, but no symptom has yet appeared of any intention to make that concession. We should not be surprised to see the steamers of the C. M. S. N. Co. run there, with the declared object of bringing away tribute rice; nor should we be surprised to see the innovation let pass, without a like a privilege being insisted on for foreign steamers.

No move has yet been made towards deepening the Woosung bar; and the Inspector General of Customs is credited with the chief opposition to the measure. He believes that Shanghai is doomed to extinction, that foreign interests are moribund, and that Chinkeang is the port of the future, where only a few foreign agents will contrive to eke out a painful livelihood, while Chinese merchants flourish and the Chinese flag floats proudly in the ports of Liverpool and London. As we disagree with Mr. Hart, we still hope against hope that the Chinese will be some day made to do a work which no civilised nation would hesitate about. The Woosung bar wants dredging, and the Hwangpoo river wants dredging; but only reasonable care and conservation are needed, to preserve the latter as the important channel of commerce it now is.

An attack on the steamer *Spark* during her voyage from Hongkong to Macao, proved that piracy is yet far from extinguished in the south, though it has apparently been routed out from the Eastern coast. A number of pirates who went on board as passengers, rose during the trip and murdered all the foreigners on board except one, Mr. Mundy, who however was so badly injured that his recovery is surprising. A pirate junk then ranged up and took off the murderers and the valuable portion of the cargo. The Chinese engineers took the steamer into harbour. Active research led to the discovery of some criminals and some cargo, but the greater part seem to have escaped.—Mr. Mundy asked Lord Derby to claim compensation for him, from the Chinese Government, but was refused. And, in fact, we do not see just ground for the claim. The outrage was certainly perpetrated by Chinese, but it was not perpetrated on Chinese soil or under the Chinese flag. The steamer was a foreign one, and the Chinese Government might reply that it was the business of the foreign owner to take the necessary precautions for discipline and safety during the passage.

On the whole, the record of Foreign relations with China during the past year is an unsatisfactory one, though marked by no political incident of note. A sense of stagnation weighs upon us, and a feeling that the position and prestige which were conquered in 1859, and which should have been upheld and exalted by moral influence, are being rather let fall. The error of consenting to treat as equal a nation which is not our equal, becomes every year more apparent. One does not argue with children; one reflects on what is best, and desires them to conform.

Piece Goods, concluded.

Sheetings.—Against an importation of 25,200 pieces of all kinds, there was a delivery of 82,000 and the heavy supply with which the year began was reduced to 1,700 pieces at its close. The enquiry set in at the end of last winter, and continued—with only short-lived intervals of quiet—until most of the northern dealers left for their homes in December. The stock of December 31st, 1873—viz., 50,000 pieces—together with the slight accessions it received from time to time by fresh imports, was worked off long before autumn, at prices—opening at Tls. 2.10 *a* 2.20 per piece for fair to ordinary descriptions of 14 *a* 15-lbs. English Cloth, and going as high as Tls. 2.60 *a* 2.80 as the demand continued and as the supply got into fewer hands. The later arrivals were taken off as quickly as they were placed on the market, and many of them sold as high as Tls. 3.00 per piece. It is needless, almost, to say that the results of the business done during the first half of 1874 was unfortunate for holders, but although hope whispered better things, despair—the offspring of former experiences—was the stronger sentiment, and, there being no sign of any future improvement, it counselled progress with the goods on hand. Further, there was *Mildew* amongst the stocks—and *Mildew* in *Sheetings* is *a very serious matter*, when a sale is being negotiated—and that too impelled owners to realise as fast as they were able. In early autumn, however, and on to the closing of the northern trade, things changed, and the out-turn of the few parcels of English Sheetings from time to time received, showed a little profit to the importer. *American Sheetings.*—The business of 1874 was transacted between the months of February and July, and every Lot that came to hand was easily placed at Tls. 3.20 *a* 3.40 per piece. In the course of the month last named, stocks were entirely exhausted, and they were not replaced during the remainder of the season; but it became known in December that there were 500 bales (10,000 pieces) in the "Golden State," from New York—arrived January, 1875—and the northern men, through their deputies, made offer several times of Tls. 3.75 per piece for the lot without avail. We may mention here that the parcel has since been sold at that figure.

Fancy Cottons.—This term embraces a great variety of articles, and the list, which to no small extent is dependent on the ingenuity of money-makers, is yearly being added to. There are certain standards, such as *Velvets*, *Turkey Red Shirtings*, and *Gentian Shirtings*, in which the only important alteration or improvement attempted is the shade of colour, and quality of the cloth; and there are others—viz., *Brocades*, *Damasks*, *Handkerchiefs*, and *Chintzes*,—whose designs and assortments are subject to the caprices of fashion or taste. The trade in these has not varied greatly in its nature or extent from that recorded in previous years, although it must be conceded that, on the whole, the balance is against 1874. The consumption of some articles has fallen off, while that of others has increased. Take *Turkey Reds* for instance. The trade requirements of 1873 were satisfied with 110,000 pieces, while, during 1874, upwards of 130,000 pieces went into consumption. The respective importations of these two years were 126,000 pieces and 98,000 pieces, the deficiency between the imports and deliveries of last season being supplied out of the heavy stock on hand at its commencement. On the other hand, *Velvets*, *Chintzes*, and *Brocades* show a decrease, but with regard to the first, this is easily accounted for by the larger direct shipments from home to Japan. In all these articles, too, as well as in the article of *Velveteens*, there has been a heavy falling off in the supply, so that the position of our merchants, at the beginning of 1875, cannot be regarded as much worse than it was at the opening of last year. In *Handkerchiefs*, the business has expanded considerably, the deliveries for 1874 being computed at 245,000 doz., against 126,000 doz. in 1873, and by reason of the very moderate importations during last year—under 170,000 doz., the stocks on 31st December were reduced to 73,000 doz., against 150,000 at the close of the previous twelve months. Amongst those Fancies which are only occasionally quotable, we find *Blue Mottles* or *Denims*, *Printed Cashmeres*—which of late has almost taken the rank of a standard, and from which rank on the other hand, *Dyed Spotted Shirtings* have well nigh disappeared.—*Muslins*, plain and figured, and *Dimities*. These last two fabrics, a

few years ago, held a much higher place here than they seem to do now, and had it not been for the help accorded us by Japan, the sales—of *Muslins* more particularly—on this market last year, would have been very insignificant indeed. The deliveries of *Muslins* for the period under review amounted to only 38,000 pieces, against receipts of 31,000, the deficiency being supplied from the remainings of 1873, and the *Dimity* statistics are even less favorable, the imports being in excess of consumption by 6,000 pieces. A similar remark, but stronger in degree, is applicable to *Damasks*, the difference against consumption being 14,000 pieces.—And as with the general decrease, so has it been with the returns to those concerned in the trade. *Turkey Red Shirtings* is about the only article that has done any good. The year was opened by sales "to arrive" at rates which showed a very fair margin of profit, and throughout its course the importer of a fair to good quality and current chop seldom found much difficulty in disposing of it on favourable terms. A contract for 2000 pieces 3-lbs., of the approved description, to arrive in March, was entered into in January, at Tls. 2.20 per piece, and business was done in the same import as it arrived on market during the year, at figures little short of that, much to the satisfaction of the proprietors of the chop. It was otherwise, however, with some importations of narrow width and inferior chops. Such could be passed off only in times of great scarcity and of excited demand, and these might—not inappropriately—be likened unto "angels visits." The owners were forced to sacrifice, and that word occasionally signifies loss. Of *Velvets* and the other manufactures that make up the class comprehended under the heading of Fancies, it is unnecessary to say more than that the foreign dealers in them—with very rare exceptions—have had little reason for desiring to continue in the business. Indeed, several confess that, were it not for the fact that the possession of some fancy work occasionally brings dealers about, and so ministers to or facilitates some more important sales, they would give up the trade at the earliest opportunity.

Woollens.—The year 1874, like many of its predecessors, has not been a profitable one—at least so say some of those who have been interested in Woollens. Both foreigners and natives unite in saying that the balance of trade has been against them. The Western provinces have again been blessed with most bountiful harvests, and everything connected with the internal prosperity of the country has favoured the introduction of our Yorkshire manufactures amongst the Chinese people; but the *Li-kin* has cast its withering influence over the trade, ruining the natives, and creating general dissatisfaction. To this cause, principally, is ascribed the falling off in the consumption of woollen goods, during the past year. In 1873, when the Mandarins were less exacting, the trade made wonderful progress; and strong hopes of a still increasing business were entertained at the beginning of last year. But those hopes have not been realised — nor in our opinion, will any permanent good be experienced until the internal transit is better regulated, and the natives are more considerately treated by their authorities. So far as we can see, there is nothing, save *Camlets*, amongst the chief woollen imports whose position contrasts favorably with those of previous seasons, and the statistics of *Camlets* show an increase in the deliveries of only 4,000 pieces over those of 1873. But the following table speaks for itself on this subject :—

	Camlets.		Long Ells.		Lustres Plain and Figured.	
	Impts.	D'lvries.	Impts.	D'lvries.	Impts.	D'lvries.
1874 pcs.	79,000	81,420	79,800	90,000	175,000	196,600
1873 ,,	85,300	77,130	77,000	120,000	293,000	273,000
1872 ,,	57,800	65,100	82,900	126,000	192,000	262,000
1871 ,,	67,000	73,400	105,000	125,000	117,000	197,000

	Spanish Stripes.		Broad & Med. Cloths.		Lastings.		
	Imports.	Deliveries.	Imports.	Deliveries.		Imports.	Deliveries.
1874..	74,200	96,700			1874..	46,000	37,000
1873..	119,000	106,000			1873..	51,000	47,000
					1872..	26,000	35,000
					1871..	45,000	38,000

And this untoward state of matters has happened under circumstances which, had the trade otherwise been allowed free scope, have been exceptionally favorable to consumption. We refer more especially to the system of auctioning sound goods that was instituted here at the end of May last. By that system, a constant weekly supply of *Camlets* and *Spanish Stripes*, and of *Long Ells* occasionally, was placed on the market, and sold. "Without reserve" is the principle on which these auctions are conducted, and buyers at them regulate their prices according to the requirements of the day. If a good demand prevails, they compete, and run up rates pretty close to actual market value; but if times be dull, they combine to secure the goods at figures on which they imagine there cannot be any loss in the future. A great thing in favour of the system is that the chops sold are all well known and approved ones, and some them are the exclusive property of the auctioneers. Thus there is nearly always a market for them, or if there is not, they are bought and held until one arises, and so it often happens that other importers are unable to make any progress whatever. In times of scarcity, of course, the general importer can readily dispose of his wares, and he invariably obtains higher rates than are paid at the auctions, but the amount of business he can do is small as compared with what is put through at the weekly sales, which certainly have now a fair hold of the situation; in illustration of this we present our readers with the following aggregate :—

	Sales at Auction from 29th May to 31st December.	Re-exports and local deliveries for same period.	Balance, the business done by all other importers for same period.
Camlets	25,000	51,000	26,000 pcs.
Long Ells	10,200	67,000	56,800 ,,
Spanish Stripes	11,000	43,000	32,000 ,,

We do not profess to enter into the question as to whether the results of these auctions are encouraging, but, judging from the groanings of the general trade, we conclude that they might be a little more satisfactory without doing the auctioneers any serious harm. *Long Ells* have been short in stock throughout the year, and at times, when wanted, there were scarcely any—save the commonest descriptions to be found, but notwithstanding this, they have seldom risen in value so much as to yield a profit on cost. *Camlets*, *Spanish Stripes* and *Medium Cloths* likewise have given discouraging out-turns indeed, this may be said of almost every description of Woollen Goods in which business has been transacted here during 1874; the results to the importers of *Figured Orleans*, of the lower qualities more particularly, being very unfavorable. For many months, inferior makes have been saleable only at a heavy sacrifice, and even the finer kinds have frequently had to be forced off. Special chops, designs and assortments—have sometimes done a little good, but the profits they have shown are but "drops in the bucket," as compared with the losses sustained by importers generally. The cause of this collapse is rather difficult to determine. Some say, and we think there is reason in what they do say, that it originates in the abundance and cheapness of silk, which is now within the reach of many natives who formerly were contented with *Figured Orleans*, and who, consequently, now dispense with them. In this article, a growing trade with JAPAN has to be recorded, and to that country we are indebted for the lion's share of business done in *Plain Lustres* during 1874. *Black Lastings*, too, have been frequently shipped hence to the Japanese markets, but the qualities taken have, as a rule, been inferior—costing from Tls. 9.50 to 10.50 per piece,—and the final sales of them seldom did much more than cover these figures.

Summary of News.

The French mail of the 15th January arrived on the 5th inst., by the M. M. steamer *Hoogly*

The English mail of the 22nd January also arrived on the 5th, by the P. & O. steamer *Avoca*.

A mail leaves to-morrow for Europe by the P. & O. steamer *Sunda*.

The following Reuter's telegrams have been received during the week :—

The missing boat of the steamer *Hongkong* has been saved.

Prussia has resolved to require the Bishops to recognize the Supremacy of the State over Papal authority under the penalty of disendowment, and it is intended to re-establish the placet in Ecclesiastical documents.

The American Congress has withdrawn the Pacific Mail subsidy.

The American Senate has voted the Revenue Bill.

Archbishop Manning has been summoned to Rome to receive the Cardinal's hat.

The exportation of horses to Germany has been prohibited.

A meeting of subscribers to the Shanghai Library was held on Monday afternoon. The report and accounts showed that the institution had been prospering during the year; and a well-deserved vote of thanks was passed to Mr. How, the Hon. Sec., for the efforts on his part which had greatly conduced to this result.—There are now 147 subscribers on the list. And there is no doubt that, with a continuance of the attention shown during the year, the future welfare of this old and valuable Library will be secured. A satisfactory feature of the meeting, was the drawing for payment of six debenture bonds.—The Rev. Canon Butcher, Messrs.

Medhurst, Cordier, McClellan, FitzGerald, How, and Dr. Macgowan were re-elected as a Committee.

We are requested to publish Minutes of a meeting of the Museum Committee, held on the 23rd ultimo. The most interesting information is about tigers. Chinamen have offered to supply an entire animal (dead) weighing 400-lbs., for $200.

We congratulate the French Municipal Council on having obtained the withdrawal of the Chinese soldiers who have been stationed in their Settlement since the riot in May last. The presence of either Chinese soldiers or policemen within Municipal limits, is eminently undesirable.—We cannot think that the Council are equally wise in insisting on their right to the roads which occasioned the riot. A letter has been written to the Chargé d'Affaires at Peking, asking him to confirm the right of the Municipality to these roads. It would be wiser to let the matter drop, and to require only the surrender of the adjacent land originally offered by the Guild as an alternative line of road.—Consultation is to be had with the English Council, as to regulating the wheelbarrow traffic.—The Chairman has written a very courteous and friendly letter to the Chairman of the English Council, in answer to the one which we published on the 24th ulto.—We see that the Council purpose asking the Gas Company to reduce the price of gas. By their original agreement with the Council, the Company are bound to lower their rate directly they pay 12 %. They never have paid 12 %, preferring to divide 11 % and carry the balance to reserve; but their earnings would have permitted the higher dividend, and the Council intend asking for a reduction in price, on that plea.—Steps are to be taken to widen certain portions of the Rue du Consulat.

At a meeting of the Municipal Council held on the 1st instant, Tls. 600 were voted for making a new road between the Soochow Creek and Tiendong Road, along the line of Kingsmill Creek.—Delegates were appointed to discuss with the French Municipal Council the subjects—Division of Wheelbarrow Fees, Jinricksha Regulations, Construction of Honan Road bridge over the Yang-king-pang, and the encroachment on that stream by the French Bund.—We regret to find that the hope which had been raised, of a Bund line being fixed, is premature. The Harbour Master is only preparing a plan of the present Bund and wharves.—Application has been made to Hongkong for a drill-sergeant.—The French Council adhere to their decision to bear only ⅓ of the cost of bridges over the Yang-king-pang. We cannot quite see the ground of this position.

The Trustees of the Eurasian school held an examination of the pupils on Monday, and expressed themselves well pleased with the progress of the children. Prizes were given to the two best in each class; and smaller presents, by way of encouragement and mark of approval, to the remainder—for Mrs. Gill gives all the children an excellent character, both as to behaviour and effort to learn.

The fortnightly literary and musical entertainment given, on Saturday night, under the management of the Shanghai Temperance Society, was numerously attended. Some of our best amateurs gave their services on the occasion, and the audience frequently showed the pleasure they experienced, by loud applause. An address by the Rev. Canon Butcher, couched in his usual popular style, was listened to with attention.

A case having much local interest was entered on before the U. S. Consular Court, yesterday. In form, it is simply a suit by the Municipal Council against Mr. W. H. Fogg for arrears of land-tax, which his agents refuse to pay because they say he is over-assessed. The interest arises from the nature of the defence. Mr. Twombly questions the whole status of the Council, impugning the validity of the Land Regulations and denying his legal liability. The Regulations, he contends, have not been signed by the Chinese Government, and have not been sanctioned by the United States Government, but only by their Representative at Peking, and are therefore not legally binding.—However, he has always been willing to contribute his quota towards the maintenance of good order in the Settlement; but he refuses the present demand as wrong on two grounds. In the first place 6 mow out of the 14 with which he is charged are surrendered to the public, and in use as roads, or lying waste as foreshore to which his right is not recognised; in the second, he contends that the rate of valuation is excessive. The Council are quite willing to reduce the assessment to 8 mow, if the title deed is revised, the excess cut off and the stated area reduced to the actual area of Messrs. Fogg & Co.'s compound. (It was mentioned that this had been already done in another case.) But the area stated on the title deed has always been taken as the standard for taxation, and the Council adhere to it. Mr. Twombly declines the alternative;—and hence the suit. The case was only partially gone into yesterday, and stands adjourned till Tuesday.

About 100 Volunteers turned out on Friday afternoon, and went through some battalion drill with very creditable precision. Marching past was first practised, and was accomplished successfully. Some échelon movements of companies were gone through exceedingly well. The first charge was rather shaky, but a second, later in the afternoon, was done more steadily. The Band was on the ground, and played during several of the movements, but it rather overpowered the words of command. A number of ladies were present in the compound—and a still larger number of men, who would have figured with much better credit in the ranks of the Volunteers. There were enough able-bodied onlookers to form two strong companies, and the exercise of the drill would have been far more healthy—and useful.

The Rangers turned out for drill on Monday afternoon, and again on Tuesday, under the command of Captain Savage, and went through some steady drill inside the Race Course.

An advertisement has been published, announcing the opening of the Rifle Range for practice; the establishment of prize competitions for recruits, as well as for those members of the corps who have never won a prize; and the adoption of a weekly musketry drill at the Main Guard. The prize-shooting for recruits will take place in April, and the usual Spring competition in May.

It does not very often happen that we get two European mails on the same day. It is worth nothing, therefore, that this happened on Saturday; the *Avoca* with the mails of 22nd January, and the *Hoogly* with the mails of the 15th, coming in, one shortly after the other.—The *Avoca's* performance is rather a triumph for the P. & O., her mails having been actually delivered here several hours before those brought by the M. M. str. *Hoogly*. She was four days ahead of her time, the *Hoogly* two days behind her's.

The almost simultaneous departure of the steamers from Hongkong, at noon on the 2nd inst., had caused some little interest in the Settlement as to whether the mails of the 15th or 22nd January would arrive first. The question was solved by the arrival at 3 a.m. on the 6th, of the *Avoca*, the *Hoogly* not reaching Woosung until about eleven the same morning. While coming up the river, the *Hoogly* took the ground on the Woosung Spit, between the Red Buoy and the old Joss-posts, and remained fast. At a quarter to twelve, the steamer *Kwashing* went alongside and attempted to tow her afloat, but could not do so. She, therefore, took off mails and passengers, and brought them up to Shanghai, returning immediately to the scene of the mishap; lighters were also sent down, and the discharging of cargo into them was at once commenced. An anchor was got out astern of the *Hoogly* so as to keep her in the same position, and her yards and topmasts were sent down; tugs were also held in readiness to tow her off at the rising of the tide. We are glad to hear that she was got off successfully; and has since arrived in port, but in manœuvring to an anchorage at Woosung, she carried away the Red Buoy. We are told that the cause of her grounding was the fact that the Red Buoy was considerably to the Northward of its true position, thus misleading the pilot.

The French iron-clad *Montcalm* came up the river Monday afternoon. Her arrival gave rise to various rumours among the Chinese about an intention to enforce the opening of the roads alongside the Ningpo Joss-house.

The Paper Hunt Handicap on Saturday was won by Mr. Brandt, on *Sea Bird*. Some particulars of the run will be found on another page. The ground was heavy, and very trying to the ponies. It was at first thought that the handicap would have to be run on the Steeple Chase Course, owing to the apparently impracticable state of the country. But two days' sun so far dried the ground that it was eventually resolved to run it off in the country, and the Stewards selected a line between Sikawei and the Bubbling Well. It is purposed to have a Handicap

Steeple Chase on Saturday, inside the race-course.

The competition did not seem to be very keen, at the auction held on Wednesday at the Horse Bazaar, and we are told that only a few Griffins were sold, at prices ranging from Tls. 65 to Tls. 120. The ponies were rather a good-looking lot, and in the "pow" which usually follows the auction, one purchased for Tls. 65 went in very good form.

Mons. Remusat has announced that he will give a grand vocal and instrumental concert at the Masonic Hall, on Tuesday evening, the 23rd instant.

We are glad to hear that, although the weather was so unfavorable at the recent performance of the Shanghai Amateur Minstrel Society, the sum available for the institution in whose aid the entertainment was given—viz. the New Hospital—amounts to $103.40. We hear that another performance will be given at an early date, with the same charitable object.

Mr. Iburg gave a second concert at the Lyceum Theatre, on Tuesday. It was well attended and gave general pleasure.

The S. S. N. Co.'s steamer *Shanse*, Captain J. F. Crowell, was the first to arrive in Tientsin, and the first to get back to Shanghai. She arrived in port on Tuesday morning, and reports having passed the *Haining*, *Appin*, *Shinking*, *Shantung*, *Nanzing and Fusing*, all bound in, and the steamer *Chihli* at 7.30 A.M. on the 5th, bound up. The *Lee Hung* (late *Leven*) was passed in the river, disabled.—The *Appin* also arrived, direct from Tientsin, in the afternoon.

We understand that a correspondence has taken place between the United States Consul-General, the Agency of the "Mitsu Bishi" Steamship Company, and the Japanese Consul, in regard to the transmission of mails between this port and Japan by the Company's vessels. The Postal Convention between the United States and Japan provides that the mails shall be made up at the U. S. Postal Agency for Japanese mail packets hence to Japan. The question is, whether the vessels of the Company can be considered mail packets. The question has been referred to the Japanese Government and the United States Minister at Yedo, and it is hoped that a satisfactory settlement will be reached. This matter is of interest, as the "Mitsu Bishi" steamers have orders at present to receive no mails in Shanghai. These orders seem at variance with the purposes of the Company, as expressed in the letter of their Agent, which was published in our issue of the 15th February.

Reuter's telegram of the 3rd instant, seems to remove any apprehension about the crew of the *Hongkong*. If "the missing boat has been saved," we may infer that all on board except those in it were already safe.

The *Halloween*, Captain Watts, which sailed from Shanghai on the 21st October last, with a full cargo of Tea and Silk, has made the run home to the Isle of Wight in 90 days. The round voyage from London to Sydney, Shanghai and home, was accomplished in nine months and seven days, of which seventy-eight days were used in port.

H.M.S. *Dwarf*, 4, double-screw composite gun-vessel, Commander the Hon. Edward G. Dawson, arrived in harbour from Hongkong, on Thursday, after, as we are informed, the unprecedentedly long passage of eighteen days. The ship seemed unable to make headway against the monsoon, and on some days made as much leeway as progress. She was obliged to put into Amoy to coal. The *Dwarf* was recommissioned in November last at Hongkong, and this was her first trip afterwards. It is not the first time that similar complaints have been made respecting vessels of the *Dwarf* class; and although it may be well to utilise them now they are here, it would seem wiser to keep them in one place as guardboats, than to move them about—especially against adverse monsoons.

We have pleasure in stating that Chên, the Mixed Court Magistrate, has divided amongst the Gutzlaff, Hongkew and Chinese hospitals, the sum of $366 and Tls. 27—amounts that have been further recovered out of the bribes taken in the "General Yang" abduction case.

Our former Taotai, Ting Jih-chang, subsequently Governor of this province, left Saturday afternoon for Soochow, having spent six days in Shanghai. He resided at the Arsenal, of which he is the founder, and looks it is said, with much pride on his work. Natives remark that he is unostentatious and affable, and they have much to say in commendation of his probity and energy.

We have to acknowledge a pamphlet, entitled "The Returns of Trade at the Treaty Ports in China, as published by order of the Inspector-General of Customs, critically examined. Reprinted with additional notes and an appendix. — By Johannes von Gumpach."

We have the January-February number of the Chinese Recorder and Missionary Journal. Dr. Bretschneider continues his "Notes on Chinese Mediæval Travellers to the West," which have a great deal of quaint interest.—Dr. Williams contributes a paper on "Moveable Types." He seems to fix the invention (in China) of printing from wooden plates, about A. D. 581; and that of moveable types about A. D. 1056. —Mr. Phillips continues the discussion as to the locality of Zaitun, and identifies it with Changchow, instead of Chinchew which Col. Yule selects. — A paper on "Whisky in Mongolia," over the pseudonym of Hoinos, accuses the Mongols of drunkenness, and says, "if Christianity is ever to do any good in Mongolia, it must go hand in hand with teetotalism." Dr. Gauld writes on Medical Missions, in reply to a paper by the Rev. W. Scarborough, which appeared in the May-June number.—The Rev. T. McClatchie contributes a paper on "Paganism."—Correspondence, and sundry items of missionary news, complete the number.

A correspondent sends some notes of an overland trip from NEWCHWANG to Peking, which give a striking sketch of the condition of the country. We have heard a good deal from our Newchwang correspondent, and from the Peking *Gazette*, of the robbers of Manchuria. Our correspondent's experience supplies practical details of their proceedings. They are apparently masters of the country; the people are afraid of them, and the soldiers either indifferent or unable to cope with them.

We have no news from NEWCHWANG, other than commercial. Messrs. Bush Bros.' Circular of the 16th February, says there had been little doing of late, owing to the New Year holidays. Business, however, was reviving, and some sales of imports were reported.—As regards exports, rates were, for cash now and delivery in Spring.

Peas,	Tls. 2.10	per 300 c.
Beancake,	,, 2.85	,, 10 ps.

Arrivals from the Interior amounted to Peas, 345,000 shees; Oil, 520,000 piculs.

Our TIENTSIN correspondent, writing on the 22nd February, says the ice in the river was then 11 inches thick, and the exposed thermometer (at dawn) marked 20°. The ice was thought likely to break up about a week later. Large flocks of wild fowl had been seen flying North.—It was rumoured that Li was to go to Peking, to be present at the coronation of the young Emperor.

The ice in the Peiho began breaking up on the 25th February.—The S. S. N. Co.'s steamer *Shanse* was the first of the season to reach Tientsin. She arrived off the Settlement at 5 a. m. on the 2nd instant. The *Haining* was also off the mouth of the river on that day.—The Danish Minister was expected down from Peking, en route for Amoy. Four Danish engineers skilled in torpedo manufacture, were expected from Shanghai.—Li Hung-chang is likely to take up his residence in Tientsin shortly. —The Peruvian Minister was also looked for at an early date, to exchange ratifications of the treaty.

The HANKOW market Report says the market has been dull during the fortnight; Grey Shirtings alone having been dealt in to any extent, and business in those is below the average of former years. Sales of all weights amount to 20,750 pieces for the fortnight, of which 15,000 were 8¼-lbs. Messrs. Gordon Bros. write that raw cotton is still being shipped from Shanghai, but prices nevertheless have advanced to Tls. 10 *a* 11.50 per picul. Stock about 31,000 piculs.

Messrs. Spencer and Wolff report from CHINKIANG, 8th March, 1875:—Although a fairly active business has been transacted in Cotton Goods since the date of our last, sales have not been on so large a scale as was anticipated, many of the most important dealers not having yet arrived from the country. Prices, however, appear to be hardening, and we expect to see extensive operations at improved rates during the ensuing week. There has been a good demand for Opium throughout the week, and it has been freely met by holders at current rates.

Mr. Jonathan Russell has been appointed United States Consul for MANILA.—The Manila Jockey Club has decided that the Races there shall take place on the 8th, 9th and 10th April.—The *Diario de Manila* contains an account of a destructive fire which occurred at Pampanga, Manila, on the 14th ultimo. Seven houses and twenty godowns, the latter filled with sugar, were destroyed, and other premises much damaged. The body of a young girl was found in one of the ruins.

Editorial Selections.

MANDARINS AND THEIR FOREIGN INSTRUCTORS.

Our recent review of the Arsenals in China would not be complete without mention of that at Tientsin, commenced by Mr. Meadows, under the auspices of Chunghow, as a powder manufactory. Mr. Meadows has scarcely yet received the amount of appreciation which he might have fairly looked forward to, for his share in founding this establishment. The combination of the two scarcely compatible objects, a Powder mill on the one hand and an Arsenal on the other, seems mainly to be the cause why the Tientsin Arsenal has never proved itself able to afford an outturn in any respect commensurate with the large sums which have been expended on it. The Arsenal was commenced, it will be remembered, when Chunghow was in power; and when that official was sent away to endeavour, in France itself, to clear his conduct in connexion with the Tientsin massacre, the Arsenal works fell into other hands. The story of Mr. Meadows' treatment is akin to that of the other foreigners connected with the Chinese Arsenals. As soon as a certain proficiency was thought to be obtained, plots were started in all directions to get rid of the foreign Head, or, failing to oust him, to reduce his position to the lowest possible standard. It was too irksome to the pride of an uneducated Chinese Mandarin, to find that a foreigner should have any control along with himself. He could not see, because he had not the necessary knowledge, that the foreigner had something within him, in the naturally inductive turn of his mind, to which he himself, as a member of a different race, was a stranger. To him, it seemed only necessary to learn, superficially and by rote, the details of the various processes, in order that they might be carried on successfully. The long train of inductive agreement on which each detail, however apparently trivial, was founded, was to his mind an utter blank. So, from the moment in each case where the European was superseded, or reduced in nominal or actual power, the story has been the same, of rapid degeneration from day to day.

The history of Chinese literature and Chinese philosophy shows us that the Chinese mind has never risen above the subjective stage. When we consider that the Greeks themselves, with all their strivings, never thoroughly emancipated themselves from the same blemish, we can form some conception of the difficulties which the Chinese mind has in grasping the practical details of problems so far removed from its ordinary experience. European speculators on the advance of the Chinese, have omitted this most important element from their calculations. We doubt not that the Chinese have got some vague ideas of progress; they are willing to acknowledge that in many, or, if they speak as their mind honestly dictates, in most, things, they are behind the natives of Europe. But they have not appreciated the true reason of their backwardness; which is, that they have never been able to grasp the inductive as distinguished from the subjective method. If we quote the remarks of G. H. Lewis on the Philosophy of Plato, we shall have a fair idea of the highest range of the Chinese intellect. "The method employed by Plato," he tells us, "was the subjective. The test he uniformly applied, was that of submitting the external order to his conceptions of what was rational, without previously determining how he came by those conceptions of rationality, and what guarantee they offered of being themselves demonstrable." Such opinions would never have led to the revival of the world after the darkness of the Middle Ages. To Aristotle, the philosophic world owes the first promulgation of a truer principle; but to the rude and practical wit of the Teutonic race, which after worrying itself over the childish sophisms of the schoolmen, at last took a firmer hold of the doctrines promulgated by the great Greek philosopher, and finally culminated in the inductive minds of Bacon and Descartes, the world is indebted for the steady but real progress of the last four centuries. This phase is so entirely wanting in the Chinese character, that we may search the literature of the Empire from its earliest foundation to the present, without finding a trace of it. We wonder at Fengshui, but Fengshui is only the hard setting of primitive truths in the subjective mind of the Chinese. The processes learnt to-day, would, were foreign influence withdrawn, become to-morrow the foundation of a similar system. The inductive learning which led up to their invention, would be forgotten in a maze of speculations as to their abstract relations. The processes themselves, in the state of degeneracy to which they would assuredly fall, might, under such a system, be preserved, but it is certain that in such a frame of mind no improvement would be possible. This is our experience of the Chinese. We have been acquainted with them for many years; *tot homines, tot sententiæ;* we might naturally have imagined that many of our processes, when submitted to men accustomed to work in a different groove, would have received some slight modification, which, under the circumstances, we would have accepted as an improvement. Our experience, however, tells us that, amongst the thousands of artisans in China who have been brought in contact with foreign appliances, not one has ever attempted the slightest modification which could have been construed into an improvement. If he have made a change, it is invariably, as in the case of the Camps and the Arsenals, a reversion to a former state of things, acknowledged to be inferior.

THE HONGKONG BANK AND THE SUGAR COMPANIES.

The present condition of the Hongkong and Shanghai Bank is an instance of the obstacles at present existing in China, to all enterprise. Its difficulties have mainly arisen through its unlucky connection with an attempt to introduce improved methods of manufacture into China. The scheme of the Sugar Company, in which so much money has been sunk, looked well at first. China is a large sugar producing country, but, notoriously, the system of extracting the sugar from the cane is conducted in a rude and inefficient manner, entailing much waste and reducing the quality of the article. With all these drawbacks, Chinese sugar has been gradually but slowly making its way in the world, and is at times, when the market allows, exported to California and the Australian colonies. To make use of improved machinery to express the juice, and improved methods to refine it, was an idea which has ever presented itself as practicable. The originator, however, reckoned without his host; those most to be benefitted, the Chinese producers, with a shortsightedness that we have, however, seen displayed in other countries, set themselves against the scheme; the Chinese associated in it at the beginning played false, and sought from their position the opportunity of making private pelf instead of advancing the concern. The original company divided into two; machinery was put up in Hongkong, away from the sugar producing districts, and it was intended that unrefined sugar should be carried there from Canton, Swatow, Manila or other ports. Finally, everything seemed fair and square, and the company established itself at Saigon, where favourable sugar grounds existed, and where the Government took a sort of paternal interest in its welfare. Such, as far as we can learn, is a brief sketch of the sugar industry; for notwithstanding numerous enquiries, we have been unable to solve the mystery of the two sugar companies, their origin and development, and, we are sorry to have to add, apparent collapse. At all events, a sugar company was finally established at Saigon; and from this, good hopes of a favourable outturn were looked for. Floods, markets, and one thing or another, have however year after year proved unpropitious, and from what we can learn, the affair has never even paid its expenses. The prospect of the sugar company becoming a financial success, led to the starting of other branches of industry in Hongkong. We were to have distilleries, rice mills, &c., &c., and to help out these a pier and godown company was started to fill an acknowledged want. The Hongkong and Shanghai Bank, having gone in heartily for the first scheme, might naturally be expected to back it up by affording assistance to its satellites. The idea was a grand one, to make Hongkong a commercial centre, with the local bank the great director of finance. Unfortunately, the collapse of the sugar companies destroyed the foundation of the structure; and the bank, which had, as we believe, honestly endeavoured to change the character of the trade of Hongkong, finds itself relegated to a position scarcely better than that at which it started. Doubtless a lesson is to be learned from all this, and that is, that industrial reforms in the East must proceed by slow degrees. It would be a mistake to condemn on principle the action of the bank, though in practice its conduct was undoubtedly reprehensible in a high degree. Unfortunately, so serious an error as has been committed will not be without its deterrent effects. The memory of the sugar disasters will long remain a stumbling block to future industrial movements, and in localities where the true cause of the collapse is entirely unknown, will be quoted as a instance of the folly of taking any further steps towards improving the

productions of China. We have stated above that we are ourselves in a state of crass ignorance of the history of the origin, progress and decay of the sugar companies; yet this history would be both interesting and useful. Some of our Hongkong friends, who have watched the course of proceedings from beginning to end, are doubtless in a position to enlighten us. If so much ignorance prevails at Shanghai, we may imagine how little is known elsewhere on the subject. Apart from its illustrating a curious chapter in the past, the experience gained is worthy of being recorded as an example for the future.

ARE WE TO HAVE A CATHEDRAL.

ARE we to have a Cathedral? It very rarely happens that an Ecclesiastical question forms the topic of conversation in Shanghai society, but during the past week the above enquiry has been very frequently made, and the *pros* and *cons* discussed with considerable interest. The reason is obvious. For once, a Church question involves a point of which the community are tenacious, viz., the rank of the Settlement. In spite of our supposed longing to return home—a feeling which is often more imaginary than real—the residents are as a body attached to the place, and take an honest pride in the position which it has attained. In spite of gloomy auguries, Shanghai is now, and is long likely to continue, the foreign capital of North China, and as such it deserves an ecclesiastical as well as a legal status. This Port is the Head Quarters of the Supreme Court; it is the most influential Consulate; and it certainly ought to be the seat of a Bishop. We can conceive no possible difficulty in carrying out the scheme. Technical objections, we are assured, there are none; and, indeed, the legal propriety of the step is guaranteed by the fact that the proposal to convert the Church of the Holy Trinity into a Cathedral, was seconded and recommended by Sir Edmund Hornby. Precedents, if such are required, can easily be found; but it is our impression that the present state of affairs is that which would be difficult to justify or explain; and, though it may not be in the strict sense of the term unprecedented, it is certainly anomalous. We may go further, and say that the proposition brought forward at the last meeting of subscribers to Trinity Church embodied an idea that has been long present to the minds of the residents. In our own columns, and in those of our contemporaries, the word "Cathedral" has often slipped in unconsciously for "Church," in paragraphs relating to the large and superb building which occupies such a prominent place in the Settlement; and, therefore, no violence would be done to the feelings of the community by the official and formal bestowal of that name to which the popular voice has already become accusomed. The present state of affairs is, we repeat, anomalous and perplexing; and though a Bishop may discharge his functions without a Cathedral, there is a certain propriety in his having one which has been recognized universally in those countries where Episcopal Churches exist.

The erection of our Church into a Cathedral may be regarded from two points of view. From the Bishop's standing point, it may be regarded as a recognition of the zeal and earnestness which induced the residents to provide a church superior, in an artistic point of view, to any structure devoted to Protestant worship in the East. The plans were adopted in days of prosperity, but it must not be forgotten that the design was carried through at considerable sacrifice, and that formidable difficulties had to be faced before the funds could be raised to complete the building. Such perseverance in a good cause cannot fail to be pleasing to the Chief Pastor of the English Church in North-China. On the other hand, the residents in Shanghai cannot but feel glad that they have it in their power to offer a tribute of respect to Bishop Russell. Long and diligent service as a missionary earned him the post he holds, and he has borne himself in his important office in a way which has secured him the personal regard of all those who have been brought into contact with him. It may seem strange that the proposal made at the last Church meeting was not made when the Bishop first came amongst us. This, however, is easily explained; regular Church meetings are only held once a year, and are regarded as matters of routine. Apathy, and an unwillingness to make changes, steal over dwellers in the East, and make them often omit obvious duties; besides, as has been suggested, some doubt existed as to the extent and character of Bishop Burdon's jurisdiction. All these objections are now removed, and we hope the necessary measures will be taken without delay, to give effect to the resolution adopted at the Church Meeting.

A COURT FAVOURITE.

THE case of Wang King-ki, in the Peking *Gazette* of the 11th February, exhibits a curious phase in Chinese character. Wang, the son of a distinguished scholar, became himself a man of considerable literary attainments in the Chinese sense of the word. An assistant Expositor of the Hanlin college, his reputation for learning was so well established that he was appointed, last year, Examiner at the provincial examinations for Honan. He was likewise employed about the palace of the late Emperor, where he raised himself to the position of favourite, and Chinese rumour says that he accompanied his young master on those midnight excursions, to which he seems to have eventually owed the infectious disease of which he died. That Wang-King-ki should, under these circumstances, have incurred the extreme displeasure of the Empresses is but natural, and it is equally natural that they should take the first opportunity of degrading and dismissing him from Court. Their procedure is, however, characteristic of the orderly manner in which the Chinese prefer, if possible, to execute such a punishment. Wang has good reason to be thankful that he is a Chinese, and lives in an empire whence all semblance of law and order has not yet departed. Had he had the misfortune to have served any other Asiatic potentate, he would most likely have been quietly strangled, or have disappeared in a mysterious manner, and none of his former friends would have had the boldness even to mention his name. Not so in China; whatever may have been his guilt, the Government will only proceed to punish him in the regular manner. He has been unfaithful to his trust, but this is a matter needing proof, and some prosecutor must come forward. The Censor Ch'en-I accordingly appears as the accuser. The matter of the accusation is equally characteristic with the manner of it. The surest blow to aim at a Chinese official, is to call in question his due observance of filial obligations. Wang's father, when going to preside over the literary examinations at Canton, died on the way. The son went forward to make the necessary preparations for the funeral, and probably insisted rather too strongly on the expenses being met out of the pockets of the mandarins of the province whither his father was travelling on important State business. For this, a black mark was evidently placed opposite his name, to be used as occasion served. He, however, did not apparently suffer in position or reputation at the time, for last year we find him following in his father's footsteps, as Examiner in Honan. Here, however, he is stated to have again offended against public manners. After he had finished the examinations, he, the Examiner, and therefore the example of good morals, went round to places of dissipation dressed in plain clothes. These two instances were held to be sufficient specimens of his life in general. Touching his Peking escapades, the *Gazette* is cautious. It does not care to trench on so delicate a subject as the private life of the late Emperor, but says enough to hint the substantial truth of the rumours which were current. The Censor had a firm belief that the divinely bestowed intelligence of his late Majesty would sooner or later penetrate Wang's real character; but the dignity of the State was concerned, and, therefore, for the time, he held his tongue. Now, however, that so great a calamity has occurred in his lamented decease, the time has come that none but men of good character should be employed about the Court.—Of course, the action of the Censor had been previously arranged, and only the pretext was needed for putting in effect the intentions of the Government. No one however will deprecate Wang's dismissal; and it would be well if the guardians of the new Emperor would learn a lesson from his rise and fall. Had his late Majesty been allowed to see a little more of the world, he would not have so readily fallen under the influence of a worthless favourite. Possibly, as the Censor suggested, his heaven-sent intelligence would in the long run have led to him to form a clearer judgment. But the sudden step from practical imprisonment to unrestrained liberty was too great. The education of a boy-monarch is always most difficult, but no system could be worse than the state of isolation in which the Empresses brought up the late Emperor. We can only hope that a more manly training will be given to the child who now occupies the throne.

Outports.

TIENTSIN.

I have taken the opportunity of the publishing of the two following Decrees by the Regents, to make some further remarks on the position of the Ta-heo-sze, and the Chinese Ministers of the Cabinet. I am led by the succession of the son of the Prince of Chun to the Throne, to come to the conclusion that a new era of the Manchow Dynasty has commenced. Foreign relations on the Russian side of China, and on the seaboard, from where Corea touches it to the South-western extremity of the province of Kwangtung, are being every day closer entwined with Chinese political events; and every word touching on the political position of the chief ruling powers of China cannot but have some interest for every foreigner who pays attention to Chinese political affairs. I have, therefore, presumed in this letter to again refer to the subject of the executive officials of the Central Government at the metropolis.

In the Peking *Gazette* of the 8th February, there are two short decrees, namely one announcing that Ying-kwei 英桂, holding the post of President of the Board of Civil Office, had been raised to the rank of Hee-pang-ta-heo-sze (協辦大學士) which I shall translate, "Assistant Privy Councillor"; and the other, that Shin Kwei-fên 沈桂芬, holding the post of President of the Board of War, a Keun-ke-ta-chin (which I translate, "A Minister of the Cabinet)" and a chief of the Tsung-le Yamun, had also been raised to the rank of Hee-pan-ta-heo-sze, or Assistant Privy Councillor. Dr. Morrison, in his dictionary, translates Hee-pan-ta-heo-sze, "Title of the 5th and 6th Ministers of State in China." Dr. Williams, in his dictionary, just published, translates the same characters, "An Assistant Cabinet Minister." Foreigners, who have been paying attention to Chinese official affairs at Peking of late years, are aware that Shin Kwei-fên has been for several years back a Keun-ke-ta-chin (軍機大臣) that is to say, that he has been a minister of the Keun-ke-choo (軍機處). These last characters are translated by Dr. Morrison, "Privy Council"; and by Dr. Williams, "The General Council of State." The four characters, Keun-ke-ta-chin, I prefer, for reasons given further on, to translate, "A Minister of the Cabinet," and the characters Keun-ke-choo, "The Cabinet."

Li Hung-chang (a Chinese) holding the post of Governor-general of the province of Chihli; Wănseang (a Manchow), a Minister of the Keun-ke-choo, and a chief of the Tsung-le Yamun; Paou-keun (a Manchow), a Minister of the Keun-ke-choo, and a chief of the Tsung-le Yamun; and Tso Tsung-tang (a Chinese), holding the post of Governor-general of the provinces of Shen-se and Kan-suh, are at present the four high officials holding the rank of Ta-heo-sze, translated by Dr. Morrison, "Ministers of State;" and Ying-kwei (a Manchow) and Shin kwei-fên (a Chinese) are the two high officials now holding the rank of Hee-pan-ta-heo-sze, translated by Dr. Morrison, "Assistant Minister of State." Now, as Li Hung-chang is stationed at Tientsin, 80 miles from Peking; and Tso Tsung-tang is stationed at Sin-gan-foo, 845 miles from Peking, it is not possible for Englishmen, who are accustomed to see the ministers of state residing at the metropolis, near the Court, as advisers to the Queen, to view these two high officials as being advisers to the Emperor in the current affairs of State. The late Governor-general of Kwantung and Kwangse, Juy Lin, was a Ta-heo-sze, and when at his post at Canton, was 5494 *li*, or 1831 miles English, from Peking; so, as holding the rank of Ta-heo-sze, he could not at Canton be considered by us as an adviser to the Throne on the current political affairs of the Empire. Hence I have come to the opinion that, for foreigners to render the characters Ta-heo-sze and Hee-pan-ta-heo-sze, as "Ministers of State" and "Assistant Ministers of State," or as "Grand Secretary," and "Assistant Grand Secretary," tends to mislead the foreign public, who peruse the news on Chinese political affairs published in the Shanghai and Hongkong Press, as to the real positions of the high officials holding these ranks. I am of the opinion that these titles, *at the present day*, are simply honorary titles; and that to avoid misleading the foreign public we ought to render them, "Privy Councillors" and "Assistant Privy Councillors." In England we have many Privy Councillors who are not Cabinet Ministers, nor even belong to the Ministry for the time being; and I am of the opinion that the positions of Li Hung-chang and Tso Tsung-tang, so long as they shall fill high appointments in the provinces, accord very closely with those of such English Privy Councillors. I do not suppose, when these officials are at the metropolis, simply to have audiences of the Throne, that they can attend the Cabinet Councils by virtue of their being Ta-heo-sze; but that they must wait to be specially summoned to appear. I am the more certain of this from late announcements in the Peking *Gazette* of the 30th and 31st days of January (and in the absence of a Chinese sage at my elbow, to instruct me otherwise on the point), that when Li Hung-chang was at the metropolis just at the close of last year, and when the Regents simply summoned the Ministers of the Cabinet thus 召見軍機, only the Prince of Kung, Wănseang, Paou-keun, Shin Kwei-fên, and Li Hung-tsaou—the five members of the Cabinet, which I have hitherto understood as such—attended the Council Room, and Li Hung-chang did not appear at it; but when they summoned the Ministers of the Cabinet and Li Hung-chang thus 召見軍機 李中堂, then Li Hung-chang appeared at the Council Room with the Ministers of the Cabinet.

Wănseang is a Ta-heo-sze, Paou-keun is a Ta-heo-sze, and Shin Kwei-fên is a Hee-pan-ta-heo-sze, and they are all, also, Cabinet Ministers; but although Ying Kwei is now a Hee-pan-ta-heo-sze, and is resident at the metropolis as General-in-Chief of the Nine Gates of the City, I have yet to learn that he is a Cabinet Minister and can attend at the Council Room by virtue of his position of Hee-pan-ta-heo-sze. What I mean to say is, that it does not follow that an official, holding the rank of Ta-heo-sze or Hee-pan-ta-heo-sze, becomes also, by virtue of such rank, a Minister of the Cabinet.

In former years, when the Ta-heo-sze and Hee-pan-ta-heo-sze were all residing at the metropolis, they, doubtless, actually filled the positions of advisers to the Throne, and would be considered then in the light of Cabinet Ministers; and I think they bore a close resemblance to the men who were selected by Queen Elizabeth from among her Privy Counsellors to be her Ministers of State; as, for instance, Sir Nicholas Bacon, the Lord Keeper; Sir William Cecil, Secretary of State; Sir Walter Mildmay, Chancellor of the Exchequer; Sir Thomas Smith and Sir Francis Walsingham—all doubtless considered by Queen Elizabeth the most able men amongst her Privy Councillors. On the Chinese Ta-heo-sze being stationed at the provinces, in the posts of Governors-General, they virtually ceased to be advisers of the Throne, and, consequently, Cabinet Ministers of State. We learn from the Peking *Gazette* that their positions at the metropolis as Cabinet Ministers came in course of time to be filled by officials holding the position of members of the Keun-ke-choo 軍機處 which virtually became the Cabinet. The Ministers of the Cabinet at present (at least up to the time of the death of the late Emperor) are the Prince of Kung, Wănseang, Shin Kwei-fên, Paou-keun, and Li Hung-tsaou, five in all; but it is very probable that ere long we shall hear of a change having taken place in the Cabinet, as Wănseang is not in good health, and is desirous of retiring from the cares of public life. In the statesman Shin Kwei-fên, the Imperial Regents have a very able man. At the conferences of the Tsung-le Yamun with foreign officials, even when the Prince of Kung is present, he takes a very leading part. He holds, as mentioned above, the post of President of the Board of War; and Chung-how, as Vice-president, acts with him cordially in the discharge of the duties of that important office.

I ought to mention that on Tso Tsung-tang, the Governor-general of Shen-se and Kan-suh, being raised to the rank of Ta-heo-sze—Privy Councillor—the Chinese literary men made the remark that he was, within the time of the present dynasty, the first man having only the literary degree of Keu-jin, who had been raised to that rank.

During the past week, I have heard of no particular news having coming here from Peking. At Tientsin we are enjoying tranquil times. The heavy mail, bringing our newspapers, arrived this forenoon, bringing us the *North-China Daily News* up to the 27th January, and London newspapers up to the 11th December, 1874. By the last Customs mail we received London telegrams up to the 25th January.

All yesterday we had a northerly dust storm. The thermometer at daybreak today stood at 20° Fahrenheit, and the river ice off the British Settlement was found to be, this forenoon, 16 inches in thickness.

15th Feb.

To-day, the ice in the centre of the river, off the British settlement, is eleven inches thick. The thermometer at dawn stood at 23° Fahrenheit inside the verandah and outside in the open at 20°. I am thus inclined to think that a week hence we shall see the ice break up, and that it will be possible for steamers to come up to Tientsin before the 1st March.

On the 25th instant, the coronation, as we would call the ceremony, of the young Emperor Kwang-seu, will take place. There has been a rumour here these last few days that Le Hung-chang had left Paouting for Peking, to be present at it; and that he would afterwards come to Tientsin, instead of again proceeding to Paouting. On the 19th instant, the twenty-seven days of mourning for the demise of the late Emperor came to an end; and on that day the local authorities used the red seals and red cards, and commenced again to wear their buttons of rank. On the 21st instant, his Excellency Sun Sze-ta, the Customs Taoutai, called on the Consuls at this port, being the first visit of a Chinese official in the reign of Kwang-seu.

In the Gazette of the 13th instant, we notice that the Cabinet Ministers and the Prince of Chun (the father of the Emperor) were together summoned to the Council room. It would thus appear that the Prince of Chun still continues to take part in the transaction of public affairs at Court.

The Chinese trading people are now all again following their usual occupations, after the new-year holidays, and as the crops were gathered in successfully last year all around here, the labouring classes are in fair circumstances, food and fuel being cheap. During the winter the inland and sea junks, large and small, have had

their usual yearly overhaul, and are all ready to be launched directly the ice leaves this river. It is said, however, that the inland traders will this year be fewer than last, as more of them will go to Hankow and the river marts for their goods. Besides other causes, this absence from the Tientsin market is attributed to political events which have taken place lately in the North of China.

22nd February.

During the past two weeks, large flocks of wild geese, ducks, and bustards were to be seen all day flying over here, in a northerly direction. On the 23rd ult., the tabogans ceased to run on the river to and from the city, the ice having become unsafe for bearing heavy weights, and having even in some places altogether disappeared. Two forces had been, for some days previously, at work to cause the wasting away of the ice—the heat of the sun directly upon it, and the friction underneath it of the warm water coming from the sea; hence it had been very rapidly disappearing. Although the thermometer had gone during the same period, from 8 to 11 degrees below freezing, each night, the cold had not apparently done much to counteract the heat of the sun during the day and the heat of the sea-water every flood tide. On the 25th ult., the river became open and free of fixed ice; and on the following day the ferry-boats were launched and began to ply.

At about 5 o'clock this morning, the S. S. N. Co.'s steamer *Shanse* arrived off the settlement, being the first steamer from Shanghai of the year 1875. I was in bed and asleep when she passed, and by the time a servant had awoke me and I had got out on the verandah, she had gone on into the darkness. Being only in my sleeping dress, and there being a biting easterly wind blowing, I lost no time in getting back to my bed. Such was my experience of the arrival of the *Shanse* in the year 1875. When the first steamer of the year arrives at the Chinese audience hours of the day, a considerable portion of the brilliancy of the great event becomes lost to the foreign community. If she had arrived about 10 a.m. or 2 p.m., all the community would have been out on the Bund to welcome her; but at the uncivilized hour of 5 a.m., all the community were in bed and probably fast asleep.

The Shanghai steamers having, then, made their appearance, we consider that our Tientsin winter has come to an end. When we look back, we cannot mark it as having been a severe or boisterous one; but, on the whole, as having been moderately cold; and we have had throughout it many pleasant bright days. We have been assuredly highly favored, as compared with former winters, in regard to getting news from the outer world. Our letters from Shanghai have been received weekly with remarkable regularity by the Customs mail. For this inestimable favor, the Tientsin community have again to thank the Inspector-General of Customs. Our newspapers, we received pretty regularly about every 12 days through the Chinese bankers and merchants postal conveyance, as Mr. Solomon, the Chairman of the Municipal Council, had previously arranged. And in addition to the above, Messrs. Russell & Co., the Agents of the S. S. N. Company, in accordance with the progressive American spirit, furnished the community with the telegrams which had been each week received at Shanghai. For this considerate and generous favor, the Tientsin community have to render their best thanks to the head of that firm in Shanghai.

The Customs Taotai, [illegible] addressed the Consuls in regard to certain steps for establishing regulations for the future prevention of collisions on this river. The subject is now under consideration. In the meantime, we must say that the action of the Taotai is, without doubt, a move in the right direction.

From a number of petty mandarins who arrived here on the 24th ultimo from Peking, we learnt that H. E. Ying Han, the newly appointed Governor General for the provinces of Kwangtung and Kwangsee would arrive on the afternoon of the 26th ultimo, on his way to the south. He made his appearance accordingly, and took up his residence in the premises of the Chinese Steamer Company. Since then, the high civil and military officers of Tientsin have been calling on him, as also the foreign officials at this port. Yesterday, H. E. returned the visit of Dr. Morgan, Her Majesty's Consul, and he has since returned the visits of the other Consuls. I should think that he will be a popular man with foreign officials, as he is evidently meeting his new position amongst foreigners in a friendly spirit, and appears to be a man of great good sense and tact: saying the proper thing at the proper time. He declares himself to be a relation of Chung-how; and in his manners to foreigners resembles him a great deal. His Excellency, it appears, will leave here for Shanghai in the steamer *Hsiang*.

We learnt here, in due course, that the ceremony of the coronation of His Majesty Kwangsu took place early on the morning of the 25th ultimo (in the Tae-ho-tein) in the Imperial palace of the metropolis. On the same day, the foreign and Chinese vessels of war, lying in this harbour—namely, one British, one French, one Russian, and one American—dressed ship, and at noon fired Royal salutes of twenty-one guns, to celebrate the event which had taken place that day at Peking.

2nd March.

The *Appin* arrived here this morning about 5 o'clock, and was subsequently notified to leave for Shanghai *direct*, to-morrow morning. The C. M. Co.'s steamer *Fusing* arrived here a little after noon; and the *Shantung* and *Shingking* about 3 p.m. The steamer communication between this port and Shanghai has consequently got fairly to work for this season.

General Raasloff, the Danish minister, is expected here this evening from Peking, to go by one of the steamers in port to Shanghai.

I am not aware of any news of interest to foreigners having come here lately from Peking; beyond the talk that the Roman Catholic priests at Peking are going to erect a residence for the Belgian Envoy; and that as the present residence of the German legation is too small, it is going to remove to a larger building; and the Japanese legation are going to occupy the present building (which adjoins the British legation.) The steamer *Shingking* has just been circulated to leave here *direct* for Shanghai, to-morrow morning, and I hear that H. E. Ying Han and suite go in her to Shanghai. If we are really engaged with anything, it is with import news and not export news. The temperature is every day becoming warmer.

5th March.

PURITAN.

FOOCHOW.

The *Advertiser* understands that the native authorities contemplate dredging the river between Lim Poo and the Arsenal.—It is also said that Mr. Betts, of the Provincial Arsenal, has been recently employed in reconnoitring the inner limits of the bar, with a view to the erection of forts.—The [illegible] arrived on the 19th on her [illegible] and anchored outside the bar. [illegible] corvette was sent out to meet His Excellency and convey him to Pagoda Anchorage, where he became the guest of M. Giquel.—The Proprietor of the Foochow Printing Press is about to publish a Chinese newspaper. It will appear once a week. The subscription is to be $1 per annum.—It is said that the Local Government have offered to help the Telegraph Company to recover the property stolen from them. The offer would seem scarcely needed; it is their duty to do so. The *Advertiser* goes further, and suggests that it would have been better if they had prevented, or refrained from inciting, the outrage. "The whole affair will be referred to the Danish Minister at Peking, and we trust that His Excellency will be fully supported by the other foreign ministers—all of whom should, if they have the interests of their nationals at heart, assist in obtain a settlement of the Company's claims."—Publication of the Chamber of Commerce Circular will be discontinued for the present, and resumed on the opening of the New Tea Season.

HONGKONG.

Hongkong is intent on racing, so there is of course very little other news in Hongkong papers. We extract from the *Daily Press* a report of the proceedings.—The annual meeting of shareholders in the Hongkong and Whampoa Dock Co. was held on the 24th, when the report and accounts were passed.—News of the affray between Formosans and Chinese, which came here by the *Glenmistake*, has also reached Hongkong, but without further details.—A mutiny occurred on board the German bark *Suwa*, on the high seas, on her passage up, one of the crew attacking the mate, and the rest assisting.—The German Brig *Gazelle*, of 198 tons register, has been sold for $9,500.—Messrs. W. McGregor Smith and W. F. B. Sams passed their last examination in Bankruptcy on the 24th.—The *China Mail* also takes up the matter of official appointments to which we referred last week, and asks why Mr. Stewart's name is always omitted from lists of promotion. The answer is:—"He does his work so well that the Government is disinclined to move him." But, adds the *Mail*, "it is dangerous to establish the rule that marked efficiency in any one post, is a bar to promotion."—A shark 11 feet 9 inches long has been caught at Sowkewan.—H. M. S. *Audacious* arrived on the 2nd March. Admiral Ryder is following in the *Vigilant*, which was expected directly.—The *Hongkong Times* says:—Great fears are entertained as to the safety of the German bark *Eudora*. She left Cardiff for Singapore with coal, and from there was ordered to Bangkok with her cargo, having discharged which and taken in a cargo of rice, she left there on December 11th for Hongkong, and has not been spoken or heard of since that date.

NAGASAKI.

There is very little news from Nagasaki. A Japanese barque lies stranded at the entrance of Simonosaki Straits.—The barque *Ariel* arrived on the 20th February, after a passage of 18 days from Kobe.—Bad weather appears to have still prevailed on the coast about that time. Both the *Ariel* and the steamer *Yokopoma*, which arrived in Nagasaki from Yokohama on the 24th, report strong North-westerly gales.

HIOGO.

The *Hiogo News* says—Travellers from [illegible] report that the snow [illegible] in some places. This [illegible] unusual [illegible] and in some of the districts bordering upon Lake

Biwa.—A rather severe shock of earthquake was felt about 10 p.m. on the 19th. —The str. *Fuyo-maru*, engaged in the inland sea traffic, has been burned near Kobe. The scene is thus described by a foreigner who visited the scene of the accident. When he reached the vessel he found that her crew had run her ashore and that the terrified passengers had been landed, together with the captain, who was engaged in personally superintending the landing of a box of treasure. The crew were busily engaged in ransacking the baggage of the unfortunate passengers, stuffing the sleeves of the fine dresses which they had selected from their booty, with such unconsidered trifles as struck their fancy during their search for loot. With a view to making the best of a bad job, Mr. Taylor strongly urged the officer in command to scuttle the vessel, as being the only way to extinguish the flames, but all to no purpose. The fire was allowed to pursue its ravages unchecked, and in a short time nothing was left but the gutted hull of the ill-fated craft.

YOKOHAMA.

Arrangements have been made for the departure of the Royal Marine Battalion on the 1st March. The French troops will embark on the same day, in the contract mail steamer.—The Corps seems in the meantime to be going through a severe round of excitement. The Japanese Minister of War inspected them on Saturday. On Monday the officers of the Imperial Marines were present at an inspection of the Corps, and were subsequently entertained at dinner. A ball in honor of both French and English detachments was to take place on the 26th ulto., and a special train was to be run to Yeddo at 2.30 a.m., to carry back guests.—Mr. Wilkin has resigned the office of president of the Chamber of Commerce, and Mr. Winstanley has been elected in his stead.—Several fires have occurred lately in Yeddo. The *Japan Mail* says:—On Friday afternoon a fire broke out in the new "Ecole Militaire," erected in the grounds of the late Owari Yashiki, which was only extinguished after a considerable portion of the buildings had perished. On Saturday, at about 11 o'clock A.M., another fire occurred in the residence of Dr. Anderson, Chief Surgeon attached to the Naval Hospital, at Tokanawa, and within a quarter of an hour the house was completely destroyed, the owner failing to save any of his property. We regret to learn that Dr. Anderson's loss comprises a valuable library of medical and miscellaneous books and works of art, and that he was uninsured. The sparks from the burning house, carried in the direction of the wind, ignited a block of native buildings in the neighbourhood which were destroyed. At seven o'clock last night a fire was reported in the neighbourhood of the Nihon-Bashi, but appears to have been extinguished before much damage was done.

The *Mail* also says "It is rumoured that negotiations are pending between the Government and the Pacific Mail Company, for the purchase of the vessels which form the coast line between this and China. It has been generally understood that the Government promoted the formation of the Mitsu Bishi Company to utilize the many steamers they found on their hands after the settlement of the Formosa affair; and it must be a very serious question whether it is prudent to extend a risk already very large, by the purchase of a number of vessels which are so far obsolete that the work they do can be done by steamers of more economical construction, at far less cost. It is inconceivable that the purchase of these vessels by the Government might remove the only existing impediment to a competition of a very formidable nature."—But it is by no means clear from all this, whether the Government are negociating to buy out the Pacific Mail steamers, or the P. M. S. Co. to buy up the Mitzu Bishi steamers.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Feb. 5th.—No *Gazette* published this day, being the eve of Chinese New-year.

Feb. 6th—8th—(Court Circular). The Board of Astronomers report that the wind set to-day (6th) from the *Kén* 艮 quarter, presaging a year in which longevity and prosperous harvests will prevail.

(1 and 2) Decrees as follows: Let Shên Kwei-fên become Assistant Grand Secretary, in conjunction with his post as President of the Board of War;—Let Ying-kwei become Assistant Grand Secretary in conjunction with his post as President of the Board of Civil Office.

(3) A decree of the two Empresses, expressing their Majesties' sorrow on learning the news of the death of the Yung-an 榮安 Imperial princess (only sister of the late Emperor). Their Majesties will proceed in person to offer a funereal libation before the remains.

(4) A decree appointing Ch'ên Sze-kieh 陳士杰 as Judicial Commissioner of Shantung, in place of Ch'ang-kêng, who is granted leave to retire on the ground of ill-health.

(5) The Governor of An-hwei reports a rehearing of an appeal case referred back from Peking. It has no features of importance.

(6) En-si, Governor-General of the Grain Transport, reports the execution of eight of the prisoners taken in the expedition against the Turban brigands in northern Kiangsu, which was undertaken in August last.

Feb. 9th—10th—(Court Circular). The Governor of Shun-t'ien Fu memorializes, stating that a fall of snow of more than an inch in thickness has taken place at Peking.

(1) A Decree in reply to a memorial by the Censor Wang Yung-Kwan, with reference to sundry reforms he has to propose. As regards the redress of irregularities in the mode of official employment, provincial governors are bidden henceforward to be careful to make appointments from the staff of officials within their own jurisdiction, and not procure, without sufficient reason, the transfer of individuals from other provinces to their own, to the end that abuses, in the way of intrigue and machinations for personal advantage, may be checked. With reference to the representations made by the Censor on the subject of remissions of taxation granted in times of distress, to the effect that squeezes are levied by the official underlings from the inhabitants of distressed districts, before they will consent to report on the condition of the people requiring relief,—that the actual gravity of the circumstances is not truthfully represented—and that, after a remission of taxation has been decreed, the placarding of the edict is delayed until the underlings have exacted all they can get—such conduct as this, turning the Imperial beneficence to naught, in callous neglect of the sufferings of the people, is indeed most scandalous. The provincial governments are commanded to investigate the circumstances, and severely punish any who may be found guilty of acts of the kind. They are similarly directed to guard against illegal fees and extortionate additions to the authorized amounts of the tribute rice collections. The Governor of Shantung, in conclusion, is called upon to take whatever measures are needful toward guarding against further breaches in the embankment of the Yellow River, the waters of which, in the course of last year, flooded certain portions of Kiangsu; and to consider the propriety of deepening the bed of the Ta-ts'ing Ho, in order to provide an adequate means of outlet for the river.

Feb. 11th-12th.—(1).—A Decree directing that ten sticks of Tibetan incense be forwarded to Wên-pin, the Governor-General of the Grain Transport, to be reverently offered at the temple of the God of the Rivers, in thanksgiving for the safety of the banks of the Grand Canal during a period of danger at the autumn freshet.

(2) Ch'ên-I, superintending Censor of the Fin-kwang division, memorializes denouncing an officer of high literary grade, for unworthy conduct. Beginning with remarks on the necessity which is recognized in the most ancient classics, of employing only men of worth if the confidence of the people is to be obtained, the Censor states that Wang K'ing-k'i 王慶祺, an Assistant Expositor of the Hanlin College, is a man with whom good character has been habitually disregarded, and who has by his conduct exposed himself to no small degree of public comment. When, for instance, his father, Wang Tsu-p'ei, was sent in 1870 to preside over the literary examinations in Kwang-tung, but died in Kwang-si while on the road thither, instead of returning with all despatch in charge of his father's remains, as it was his duty to do, Wang K'ing-k'i went on to Canton, distant as that point is from Kan-chow where the decease of his father took place, and obtained subscriptions from the high officials there toward the expenses of the journey. It was only when urged by them to refrain from going about in public to pay visits, that he set out again on his unauthorized travels and returned to Kiang-si. The Censor remarks that, although it unavoidably happens from time to time that an official, if in embarrassed circumstances, may be compelled to ask assistance from his brother officers and friends, yet greed of gain such as was shewn in this instance, in utter disregard of the conduct proper to a state of bereavement, is what a person of the lowest station would scarcely condescend to. It is reported, moreover, that when Wang K'ing-k'i was sent last year as Examiner to Honan, he publicly frequented haunts of dissipation, dressed in plain clothes, after the examinations were over. This was known to many in the city of K'aifêng Fu. These two intances may taken as specimens of his conduct in general; whilst, with regard to the rumours which are current about him, but which rest on no actual evidence, the Censor does not venture to obtrude these on the imperial notice, although they clearly testify to the fact of his habitually unworthy character. The Censor has long been desirous of bringing his charges forward; but he was restrained by the consideration that Wang K'ing-K'i held employment about the Imperial person, and the dignity of the State was consequently involved in the matter. He felt convinced, moreover, that the divinely bestowed intelligence of his late Majesty would sooner or later penetrate the real character of the individual. Now, however, that loss has so unexpectedly befallen the State, and that in the tender youth of his present Majesty the employment of men of rectitude is of the highest importance, he no longer ventures to keep silence, and he has consequently brought forward the present charges. (N.B.—A rescript has already appeared stripping Wang K'ing-k'i of his rank and functions. As a member of the *Nan-Shu-Fang* or Imperial Studio he was in intimate personal relations with the deceased young Emperor).

Feb. 13—14—(Court Circular). It is mentioned that Kwoh Sung-tao 郭嵩燾 (a former governor of Kwangtung), has

arrived at Peking to pay his respects, and has had audience.

(1) A Decree. Let the Lieutenant-general King-jui be associated with the Commissioners in charge of the building works for the mausolea at P'u-t'o Yü 菩陀宮. (N. B. The mausolea in question are the sites which are being prepared for the future interment of the present Empresses Regent. A sum of six million taels is allotted to the construction of tombs, on a site selected by the Empresses at the Eastern Hills, on the occasion of their visit thither in April, 1873).

(2) The Governor-General of the Yellow River memorializes, forwarding the report given by one of his subordinates, the Sub-prefect of Siang Ho, respecting the supernatural protection to the embankment works, which was afforded in the Autumn freshet season by a deified being known as Wang Tsiang Kün 王將軍 or the [heavenly] General, Wang. At a time when the banks were in imminent peril from floods, he appeared in visible shape, upon which incense was burnt and prayers were offered, and the danger forthwith passed away. The Governor-General adds that Wang Tsiang-Kün was during life acting Sub-prefect of the Siang Ho division, and was named Jên-fu 仁福. He was precipitated into the river and drowned, in 1867, through the slip of an embankment, and since then, a temple in honour of his memory having been erected with the Imperial sanction, he has on repeated occasions supernaturally interposed for the protection of the works An application has now been received from the gentry and people of the locality, forwarded through the proper officials, for the bestowal by his Majesty of a title of honour on this divine being; and, in conformity with a statutory provision, the Governor-General recommends this for consideration. —Rescript: Let the Board of Ceremonies consider and report.

Public Meetings.

THE SHANGHAI MUSEUM.

Extracts from Minutes of Meeting No. 4 of the Museum Committee, held at the Asiatic Society's Rooms, 23rd February, 1875.

Present—Messrs. Medhurst, Cordier, Kingsmill, Quekett, and Hawtrey, and Pryer, Hon. Secy.

Minutes of last meeting were read.

The HON. SECRETARY read a list of contributions from Messrs. Harvie, Taylor, Milsom, Brandt, G. de St. Croix, Dumaresq, J. H. Mackenzie, Malteau, Hamilton, Walker, Russell, Ramsay, Hawtrey, Ballantine, J. Cooper, and W. Cooper, since the meeting of the 9th inst. Several birds, including one or two species fresh to the Museum, had been sent anonymously. One of the most interesting of the contributions was a hen pheasant given by Mr. Malteau, shot by him in the reeds by the Yeshing lake. It is believed to be identical with a pheasant discovered by Mr. Swinhoe at Ningpo, about three years ago. This is supposed to be the first instance on record of any pheasant but the common *P. Torquatus* having been obtained during a shooting trip from Shanghai. The cock bird (sent by Mr. Forrest about two months ago from the Ningpo lakes) is also in the Museum. Three specimens of the Chinese wild boar had been presented; two of them were in course of being set up, and one was going to be sent to England for examination. Mr. Hawtrey drew attention to the desirability of contributors giving exact information as to the precise locality from whence the specimens were obtained. Birds apparently of the same species, from localities so little apart even as the north and south of the Tai-Hu lake frequently varied in their plumage.

The present accommodation for specimens being so small, it was decided to have one large case the whole length of the back wall. There was some discussion as to whether the frameworks should be iron or wood, and the matter finally was left entirely in Mr. Kingsmill's hands.

Mr. MEDHURST drew attention to the rapidly increasing value of the collections, and suggested that they should be insured, which was agreed to.

The HON. SECRETARY mentioned that he had put up a collection of Shanghai snakes in long glass tubes, which had been made in Shanghai by a Chinaman specially for the purpose, and had named as many of them as he could; they would be round at the Museum in a day or two. The tigers' skulls which he had bought were being cleaned under the experienced superintendence of Mr. Schrider, and would also shortly be on exhibition. He (the Hon. Secy.) had opened communication with the village these tigers' heads were said to come from, and the Chinese had offered to send down a dead tiger entire, of not less than 400 lbs. weight, for $200. He would like to go up and find out for himself what truth to attach to these stories.

There was some discussion about the form of label to be adopted for the specimens, and it was decided that all well ascertained species should have their names attached at once, but that any there were the slightest doubt about, should be sent to England for identification.

THE SHANGHAI LIBRARY.

The annual meeting of subscribers to the above institution was held on Friday. Present, Rev. Canon Butcher in the chair; Dr. Macgowan; Messrs. Allum, Kent, Kingsmill, McClellan, and A. J. How, Hon. Sec. and Treasurer.

A letter was read from Mr. W. H. Medhurst, regretting his inability to attend the meeting, in consequence of having to be present at a meeting of the Church Trustees; also from Mr. Cordier, who was detained by other business; and it was stated that Mr. FitzGerald was prevented being present by indisposition.

The minutes of the last meeting were read, confirmed, and signed.

The CHAIRMAN then rose and said—I need not detain you long on the present occasion with words of preface and introduction. It is my pleasing task to draw your attention to a Report which shows that a favourable change has passed over the prospects of the Shanghai Library. Still, we must not imagine that our difficulties are finally got rid of. If this institution is to be preserved in a state of efficiency, and to prove equal to the growing literary wants of this increasing Settlement, we must all work hard and constantly to keep it up. Not only are the exertions of the Committee needed—the active co-operation of all subscribers is imperatively demanded. We have tided over a crisis, but in order that this crisis may not recur, we must endeavour to keep alive an interest in the Institution. And I must add, we must individually observe its Bye-Laws. The great secret of the success of a Library is a brisk demand, met by an adequate supply of books. Unless people get the volumes they want—feel that there is a necessity for reading them quickly, return them with promptitude and get more out, a Library stagnates. There is nothing so fatal as retaliation for not having the volume required, in. We have known the evils of a day of stagnation, but I hope we shall know them no more. Recollect, however, we still require more subscribers, and more subscribers will mean more books. In many departments of Literature our shelves are scantily furnished. Many standard books are wanted. French and Italian and German works ought to be ordered. In a word, we have done something, but there is a great deal more to be done before the Shanghai Library is as efficient as its well-wishers desire to see it. I will now request the Hon. Secretary and Treasurer to read the Report.

Mr. A. J. How read as follows:—

REPORT.

The Committee of the Shanghai Library congratulate the subscribers upon the improved condition and prospects of the Institution. At the beginning of the year 1874, there was a marked falling off in the income of the Library, and it seemed at one time probable that the valuable collection of books accumulated during twenty-six years would have to be sold. The Recreation Fund was applied to, but the Trustees did not consider that they would be justified in using their means for such a purpose, and the Shanghai Club refused to entertain the proposal of purchasing our collection. The residents were finally appealed to, and sixty-four new subscriptions had the effect of recovering the Institution from its apparently hopeless condition. At this critical period it became necessary to elect a Librarian, and considerable difficulty was found in choosing a suitable person for the post. The appointment was ultimately conferred on Mr. and Mrs. Woodward, and there is so far every reason to be satisfied with the selection. A new Record Book of all works issued and returned, modelled on the Register used in the best London Libraries, has been introduced. For the guidance and better information of subscribers, every volume will have a label with the Bye Laws, which have been lately revised, printed on it. Greater strictness in requiring the return of Books within the prescribed time has been observed, but except when the same book is required by numerous applicants, the greatest latitude in this respect is allowed to the subscribers, and their convenience only consulted. Advertisments of missing books have been inserted with satisfactory results in the daily papers. Messrs. Sotheran, the London agents, have been instructed to forward a liberal supply of new publications, and have been furnished with a list of approved writers in all departments of Literature whose books should be sent to the Library immediately on publication. Imperfect sets of standard works are being gradually filled up. The Committee trust that by these and similar means the wishes and requirements of the subscribers may be met.

Mr. How concluded by saying that he must omit the remainder.

The CHAIRMAN.—Oh, no, gentlemen; the remainder is this:—

They cannot close without thanking Mr. T. Payne, of the Comptoir D'Escompte, for auditing the accounts, and expressing their grateful acknowledgments to A. J. How, Esq., who in his double capacity of Secretary and Treasurer has been mainly instrumental in bringing about this favourable state of affairs, which the Committee trust the increasing support of the Community will render permanent. They have to add that they feel themselves justified in recommending the payment of 6 Debenture Bonds. (Hear, hear.)

The statement of accounts was as follows:

ACCOUNT OF THE INCOME AND EXPENDITURE OF THE SHANGHAI LIBRARY FOR 1874.

Dec. 31st, 1874. *Dr.*	Tls.
To Amount received from 156 Subscribers and [illegible]	1,415.46
,, Bequest by the late Francis Collison	76.13
Shanghai Taels	1,491.59

Dec. 31st, 1874. *Cr.*	Tls.
By Balance due Treasurer for 1873	31.92
,, Fire Insurance, Tls. 2,500 on Building..15.00	
Do. 3,500 on Books 28.00	43.00
,, Librarian's Salary 12 months at Tls. 45 per month	540.00
,, Amount remitted to London Agents, for Books and Periodicals £150 @ 5/3	533.33
,, Subscriptions to "Harpers' Magazine," for 1875	3.46
,, Sundry Expenses, viz.	
Advertising and Printing 40.67	
Coolie 61.00	
Gas 28.64	
Stationery, &c. 32.18	
Stamps for Collecting Subscriptions 20.00	
Petty disbursements..... 35.74	218.23
,, Interest paid Hongkong and Shanghai Bank	8.66
,, Balance carried for to 1875	112.99
Shanghai Taels	1,491.59

DEBENTURES.

To Credit.

Subscriptions for 1875.
Rental of the Upper Room to the Museum for 1874 and 1875.
Value of Maps.
Do. Black-wood Table.
Do. Building, Tls. 2,500 *a* 3,000.
Do. Books.

To Debit.

Current Expenses for 1875.
Debenture Bonds, 70 @ 25 Tls. each, Tls. 1,750, of which 6 are now to be drawn.

Mr. KENT moved, and Mr. KINGSMILL seconded, that the report and accounts be passed.—Carried unanimously.

The CHAIRMAN said they would now proceed to the drawing of six debenture bonds.

Mr. KINGSMILL said before proceeding with that part of the business, he thought it was only fair on behalf of the subscribers, to offer thanks to Mr. How for the care and attention he had shown in rescuing the Library from the parlous state into which it had fallen. It was to him alone that they owed its resuscitation. From some cause or other that he (Mr. Kingsmill) did not know, the Library had decayed very much, and some people said it was of no use subscribing; but the credit of rescuing it from that Slough of Despond was due to Mr. How; and now, when people saw that new books and periodicals were coming out from home, he thought it would be a great incentive to them to come forward and give the Library increased support.

Dr. MACGOWAN would also wish to say a word or two of thanks to Mr. How, for his labours as hon. sec. and treasurer. He had had much trouble in those offices—almost as much as the founders must have had; and it was due to his energy that a moribund institution had taken a new lease of life. The institution was now likely to become one of which Shanghai would not be ashamed.

Mr. How said he had demurred to that which the Chairman had read; and while he was much obliged to Mr. Kingsmill and Dr. Macgowan, he considered it somewhat hard that any invidious distinction should be made in a matter for which all had worked so well. He hoped the result of their labours would be to excite public interest in the Library, and that it would go on from good to better. The accounts for the past year were favourable, but there were from 20 to 25 secessions, caused by death, removals, &c., which they must try to make up. The work had been to him a labour of love; for he did not like to see the Library, which had been in existence for twenty-five or twenty-six years, and the accumulation of which had cost Tls. 40,000 or Tls. 50,000, sink without an effort being made in its behalf. If the books had been dispersed, he believed the sound of the auctioneer's hammer would hardly have been heard before they would have wished them back again. He hoped the Library would prosper still more.

Mr. MCCLELLAN asked how many subscribers were at present on the books?

Mr. How said that at the close of the year there were 156 names down, twenty-five of whom had seceded; but there were eighteen new subscribers to be added, so that there were nearly the same number to begin the year with.

The CHAIRMAN said they would proceed with the drawing of six debenture bonds.

The six numbers drawn were 51, 70, 65, 24, 69, and 1; the owners of which will be paid on application to the treasurer.

The election of the Committee was the next business, and

Mr. KINGSMILL moved that the old Committee, consisting of the Rev. Canon Butcher, and Messrs. W. H. Medhurst, Cordier, McClellan, Macgowan, FitzGerald and A. J. How, should be re-elected.

Mr. ALLUM seconded the motion, and it was carried.

Mr. How said the Committee would be glad to receive and attend to any suggestions from the subscribers.

A vote of thanks to the Chairman terminated the meeting.

CONSEIL D'ADMINISTRATION MUNICIPALE DE LA CONCESSION FRANCAISE.

Résumé des délibérations du Conseil.

Séance du 2 Février, 1875, sous la présidence de M. A. Voisin. Conseillers présents: M.M. A. Hennequin, L. Ewald, F. D. Hitch, H. Maignan, E. Millot. H. Sayn, secrétaire.

M. Lang, empêché, n'a pu assister à la séance.

Lecture d'une lettre de M. le Consul-Général de France, informant l'Administration que par arrêté Consulaire le sieur Wéber, brigadier de la garde municipale, a été nommé sergent, et que le sieur Lesventes a été promu au grade de brigadier.

Le Président informe ses collègues que d'aprés l'opinion de M. le Consul-Général il ne pourrait être procédé à Shanghai à la formation d'un jury d'expropriation, et que dans le cas où l'Administration voudrait user du droit incontestable d'expropriation que lui donne le Règlement d'organisation Municipale, elle aurait à poursuivre devant ses juges naturels la partie qui refuserait de se prêter à une expropriation à faire dans l'intérêt public.

Lecture et approbation de la lettre adressée à M. le Chargé d'Affaires de France à Pékin, lui demandant la confirmation des droits de propriété de la Municipalité sur les rues de Ningpo et de Saigon telles qu'elles figurent sur le plan dressé en 1863 par ordre du Consul-Général de France.

Lecture et approbation d'une lettre adressée à M. le Consul-Général France, pour demander conformément aux désirs précédemment exprimés par le Conseil, le retrait des soldats Chinois cantonnés dans les limites de la Concession.

Demande d'un Agent de la Garde, sollicitant, en considération de 12 années de service, un emploi plus avantageux que celui de simple Agent. Le Conseil n'ayant aucun emploi à offrir à cet Agent pour le récompenser de ses services, exprime toutefois l'opinion qu'il serait désirable d'adopter une mesure générale qui permette de donner une prime quelconque à de longs et bons services dans la Garde, et il renvoie l'étude de la question au Comité des Travaux et de la Police.

Approbation des gratifications de fin d'année sollicitées par les Chefs de service en faveur du personnel Chinois.

Le Conseil décide de demander au Municipal Council quelles seraient ses vues sur les mesures à adopter pour remédier à l'encombrement et au danger que présente la circulations des brouettes.

Le Conseil renvoie à l'examen du Comité des Finances, les mesures à prendre pour que la taxe sur les sampans, atteigne les prévisions budgétaires.

Le renouvellement du dépôt fixe de Taëls 20,000, est approuvé pour un an avec intérêts à 5 %.

Transfert de licence pour débit de boissons.

Séance du 16 Février, 1875, sous la présidence de M. A. Voisin. Conseillers présents, M.M. A. Hennequin, W. Lang, H. Maignan, E. Millot. H. Sayn, Secrétaire.

M. Ewald, absent de Shanghai, et M. Hitch, empeché, n'ont pu assister a la seance.

Lecture d'une lettre de M. Lang, annonçant son prochain départ pour l'Europe. Le Conseil exprime ses regrets de voir partir M. Lang, et de ne pouvoir plus compter sur lui pour prendre part à ses travaux.

Approbation des propositions suivantes émises par le Comité des Travaux et de la Police, dans ses séances des 5 et 16 Février.

Exécution en Régie des travaux de reconstruction de la muraille du quai du Yang-king-pang, entre le pont No. 2 et la rue Discry.

Exécution en Régie du montage des Consoles à Gaz.

Achat de 50 Tonneaux sable de mer, pour le jardin et le cimetière.

Achat de 7260 pieds de pierres, pour bordures et rigoles de trottoirs.

Application d'une couche de peinture sur le Garde-fou en fer du quai du Yang-king-pang.

Drainage d'un passage rue du Weikwé.

Vente de vieille ferraille.

Augmentation du nombre de coolies employés au balayage conformément aux prévisions du budget.

Arrangement à prendre pour l'entretien du télégraphe.

Exécution en Régie des travaux de reconstruction du pont No. 4.

Rechargement de la rue Touranne.

Et agrandissement de la Sellerie.

Lecture d'une lettre de M. le Consul-Général de France, informant l'Administration que le petit détachement de soldats Chinois qui avait été laissé dans la Pagode Ningpo, vient d'être retiré. Par cette lettre M. le Consul-Général annonce aussi que la lettre qu'il a été chargé de faire parvenir à M. le Chargé d'Affaires de France à Pékin, lui a été transmise.

Communication d'une lettre de M. le Consul Général de France, informant l'Administration que le nommé Civilini a été nommé agent dans la Garde municipale en remplacement du nommé Lesventes, promu brigadier.

L'Agent Voyer ayant trouvé la possibilité d'utiliser les verres pour lanternes à Gaz que l'Administration tenait à disposition de l'Expéditeur, le Conseil revient sur sa décision de les laisser pour compte de ce dernier, et charge le Secrétaire de remettre le montant de la facture dont ils sont l'objet.

Rapatriement du garde Mingaud, avec une allocation de Tls. 50, comme indemnité.

Dépôt du rapport annuel des Agents de la Hongkong Fire Insurance Company.

Transfert de licence pour débit de boissons.

Lecture et approbation de la lettre adressée le 1er Février au Municipal Council, pour l'informer de la décision prise à l'égard de la mise en place du pont en fer No. 4.

Communication d'une lettre du Municipal Council faisant savoir qu'il a reconnu, comme le Conseil, que la largeur de 40 pieds donnée par le plan de la Fairbairn Engineering Company au pont en fer proposé pour remplacer le pont en bois No. 1, n'était pas suffisante, et informant le Conseil que le plan qui lui a été transmis par l'Administration a été soumis à l'examen de l'Ingénieur Municipal.

En raison des bénéfices que réalise la Compagnie du Gaz, et de la possibilité d'une répartition de dividende de 12 % qui semble avoir été praticable, le Conseil décide de demander une réduction dans le prix du gaz fourni à l'Administration.

En attendant que l'Administration avise à la création d'une fourrière publique, les jin-rick-shaws et chevaux mis en fourrière seront reçus provisoirement par M. Charrier aux prix suivants:

Jin-rick-shaws ... .$0.05 par jour.
Chevaux.....$1.00 ,, ,,

indépendamment de l'amende à percevoir au profit de l'Administration qui est fixée á

$0.15 par Jin-rick-shaw.
$1.00 ,, Cheval.

Examen des rapports du Médecin.

Examen des rapports des Chefs de service.

Examen du rapport de l'Inspecteur des marchés.

Séance du 23 Février, 1875, sous la présidence de M. A. Voisin. Conseillers présents. M.M. A. Hennequin, F. D. Hitch, H. Maignan, E. Millot. H. Sayn, Secrétaire.

M. Ewald, absent de Shanghai, n'a pu assister à la séance.

Approbation des propositions émises par le Comité des Finances, relatives:

A la démarche à faire auprès d'un contribuable pour obtenir la rentrée d'un bulletin en souffrance.

A l'encaissement à effectuer de Taëls 43.97, comme dividende sur la créance Glover, Dow et Co.

Le Conseil charge le Secrétaire de remettre f. 4,605.95 à l'expéditeur d'un envoi fournitures de bureaux, et d'un envoi livres à souches pour l'Exercice 1875-1876.

Le Conseil renvoie à la prochaine séance la discussion des mesures à prendre à l'égard de la taxe sur les sampans.

Communication d'une lettre de M. le Consul-Général de France, annonçant au Conseil, qu'en raison de son départ pour l'Europe, M. Lang lui a donné sa démission des fonctions de Conseiller Municipal.

Communication d'une lettre, en date du 16 Février, par laquelle le Président du Municipal Council exprime en son nom et au nom de ses Collégues, le desir de continuer à faire regler par une delegation de deux ou trois membres de chaque Conseil les

affaires d'intérêt commun aux deux Administrations, et par laquelle il fait valoir en même temps quelques considérations à l'appui de la réclamation faite contre l'empiétement du quai du Yang-king-pang.

Lecture est donnée de la réponse suivante à la dite lettre.

MONSIEUR,—Le Conseil, à qui j'ai communiqué la lettre que vous m'avez fait l'honneur de m'écrire le 16 Février, me prie de vous informer qu'il avait cru devoir renoncer au système des délégués, dont il avait été le promoteur, parce qu'il avait conçu l'impression que votre Conseil, n'y ayant jamais eu recours, préférait un autre mode de discussion pour amener la solution des questions sur lesquelles les vues des deux Municipalités peuvent être différentes. C'est donc avec plaisir que le Conseil étant informé por votre lettre des désirs du Municipal Council, revient sur sa décision, et c'est avec empressement qu'il se prêtera, avant d'entrer dans une correspondance officielle, à la discussion préalable, par deux délégués de chaque Conseil, de toutes les questions qui pourraient amener une divergence d'opinion entre les deux Municipalités.

Afin de donner suite à ses intentions, le Conseil a confié à M. Hennequin, Président du Comité des Finances, et à M. Voisin, Président du Comité des Travaux, le soin de discuter, avec les deux délégués que votre Conseil choisira, les questions pendantes, et entre autres celle de réctification du quai sud du Yang-king pang. Il me semble, donc, inopportun de répondre ici aux arguments ayant trait à cette question que vous faites valoir, puisqu'ils pourront être soutenus et examinés dans une réunion des délégués des deux Administrations qui pourra être fixée aussitôt que vous aurez bien voulu me faire connaitre les intentions de votre Conseil.

"Il me reste à vous remercier des sentiments que vous m'exprimez tant en votre nom qu'au nom de vos collègues, et à vous assurer que le Conseil ne cessera de faire tout ce qui dépendra de lui pour maintenir les relations entre les deux Municipalités dans les terms de cordialité et de bonne entente qui sont pour lui une tradition et pour nos commettants un avantage.

"Je suis personnellement heureux que vous et votre Conseil ayiez partagé les idées que j'ai eu l'honneur de vous exprimer de vive voix, relativement à la correspondance échangée entre les deux Administrations sur des sujets importants, puisque cela me fournit aujourd'hui l'occasion de vous assurer des sentiments avec lesquels,

J'ai l'honneur d'être, Monsieur,
Votre très empressé serviteur,
Le Président du Conseil,
A. VOISIN.

Communication d'une lettre du Municipal Council informant le Conseil qu'il n'a aucune raison pour modifier la décision qu'il a prise pour discontinuer le partage par moitié de la taxe sur les brouettes.

Les délégués sont chargés d'examiner avec ceux du Municipal Council, s'il y a lieu de prendre des mesures pour règlementer la circulation des brouettes.

M. Hennequin, l'un des membres chargés d'examiner les faits signalés dans une réclamation en décharge d'impôts de M. Yates, étant empêché ; M. Voisin est chargé de le remplacer dans cette mission.

Le Président est chargé de s'entendre avec les R. Pères Jésuites, pour l'acquisition de parcelles de terrain necessaires à l'élargissement de la rue du Consulat.

Lecture et approbation de la lettre adressée à M.M. les Administrateurs de la Compagnie du Gaz, pour demander une réduction dans le prix du gaz fourni à l'Administration.

Accusé de réception d'une remise de f. 6,405.80, pour solve à un envoi roues et harnais de tombereaux.

Le Secrétaire est chargé de faire circuler parmi les membres du Conseil un rapport du Contrôleur sur la situation générale des impôts et les industries qui ne sont pas soumises à la taxe mensuelle.

Transfert de licence pour débit de boissons.

Examen des rapports des Chefs de service.

THE MUNICIPAL COUNCIL.

Minutes of a Meeting held on the 1st March, 1875.

Present:—John G. Purdon (Chairman,) A. G. Wood, Geo. J. W. Cowie, F. E. Heyden, W. Kidner, F. W. Lemarchand, Robt. Mackenzie, S. D. Webb and the Secretary.

The Minutes of the last meeting were read, confirmed, and signed.

The Cash State for the 27th February was laid on the table.

Appropriation.—The sum of Tls. 600 was voted for making a new road from Soochow Creek to Tiendong Road, running along the line of Kingsmill Creek, and construction of drain therein.

Staff.—Agreements with Messrs. E. H. Oliver, Municipal Engineer, J. A. Pond, Accountant, and J. McMillan, Local Postmaster, were signed by the Chairman, and the seal of the Municipality affixed thereon.

French Municipal Council.—The following letter from the Chairman, French Municipal Council was read :—

[The French text is published among the minutes of the French Council meeting.]

[*Translation.*]

Shanghai, 25th February, 1875.

SIR,—The Council,—to whom I have communicated the purport of your letter of 16th instant, which you did the honour to address to me,—begs me to assure you that it came to the conclusion to abandon the system of Delegates, of which it had been the initiator, simply because it had received the impression that your Council, having never had recourse to it, preferred other methods of discussing questions on which the two Municipalities might hold different views. It is, therefore, with pleasure that the Council, being made acquainted with the wishes of the Municipal Council, revokes its decision, and agrees for the future before entering into official correspondence, to the previous discussion by two delegates from each Council, of all questions upon which difference of opinion may exist between the two Municipalities.

In order to put in practice its intentions, the Council has requested Mr. Hennequin, President of the Committee of Works, and Mr. Voisin, President of the Committee of Finance, to represent their body, and to meet the two Delegates whom your Council may appoint, for the purpose of discussing all unsettled questions, and amongst others that which treats of the rectification of the South bank of the Yang-king-pang. It seems, therefore, to me unnecessary to reply to the arguments put forward by you on this question, since every aspect of the case can be minutely entered upon and examined at the meeting of Delegates, the date of which can be fixed so soon as you have been good enough to make known to me the wishes of your Council.

It remains for me to thank you for the kind sentiments conveyed on behalf of yourself and of your Colleagues, and to assure you that the Council will leave nothing undone on its part to continue as hitherto the friendly relations and good feeling between the two Municipalities, the maintenance of which is of advantage to our Constituents.

I am personally happy to find that you and your Council should have endorsed the views which I had the honour to explain to you *viva voce*, regarding correspondence passing between the two Administrations upon important subjects, since it gives me the opportunity to-day of assuring you of the sentiments with which

I have the honour to subscribe myself,
Your very obedient servant,
The President of the Council,
(Signed) A. VOISIN.

Delegates were appointed to discuss with Messrs. Voisin, and Hennequin, the following questions :—

Division of Wheelbarrow Fees.

New Regulations for Jinrickshas.

Construction of Bridge No. 4 Yang-King-Pang.

Encroachment on Yang-King-Pang by French Council.

Bund Line.—Read letter from the Harbour Master, stating that the plan he is at present engaged in drawing, is simply a new survey of the present Bund and Wharves of this port, executed at the request of the Consular Body, to enable it to decide upon a proper Bund line for both banks of the River.

Volunteers.— Instructions were given to the Secretary to write to the Military Secretary at Hongkong, for a Drill-Sergeant to be sent up at once.

Yang-King-Pang Bridge No. 1.—Read the following letter from the French Municipal Council :—

Shanghai, le 1er Mars 1875.

Pont Yang-king-pang No. 1.

MONSIEUR,—En réponse à votre honorée du 15 Février, je suis chargé de vous informer que le Conseil n'a point altéré sa décision, que du reste je vous ai déjà fait connaître, de ne supporter qu'un tiers des dépenses occasionnées par les ponts sur le Yang-king-pang.

Veuillez agréer, Monsieur, l'assurance de ma considération la plus distinguée.

Le Secrétaire,
H. SAYN.

MONSIEUR E. B. SOUPER,
Secrétaire du Municipal Council.

[*Translation.*]

Yang-king-pang Bridge No. 1.

In reply to your letter of 15th February, I am directed to inform you that the Conseil has in no wise changed its decision—which I have already communicated to you,—of bearing but 1/3rd of the expenses entailed by the Bridges across the Yang-king-pang.

Accept, Sir, &c., &c.
(Signed) H. SAYN,
Secretary.

Consideration was deferred until after the meeting of Delegates had taken place.

Reports from Heads of Departments were read and considered.

The Minutes of last meeting were approved and passed for publication.

Amusements.

THE PAPER HUNT HANDICAP.

This, the final run of the season, came off on Saturday afternoon. The late rains had made the ground so heavy as to render it extremely unlikely that a cross country course could be selected, and it was at one time decided that the Handicap should be contested over the Steeplechase course. Two or three days of fine weather, however, induced the Stewards to alter this decision, and it being believed that the ground was sufficiently hardened, a course starting from a point opposite the Hermitage at Sicawei and finishing at the old jump near the Bubbling Well, was ultimately selected. The start was fixed for three o'clock, and shortly after that hour the five divisions of ponies were duly marshalled in position, according to the time handicap awarded to them. The number of starters was thirty-four, and included all the well-known cracks of the Settlement, besides some which were probably entered as much for the fun of the race, or in reliance on the chapter of accidents, as from any deliberate hope of success.

The start afforded a pretty sight to a large number of spectators, whom the fineness of the weather had brought out in every conceivable kind of vehicle, as well as on foot. Within a few yards of the starting post was a tolerably wide ditch, over and through which the successive squadrons scrambled at half-minute, one-minute, one-and-a-half minute, and two-minute intervals, and then away for the open country beyond. A brisk breeze was blowing, which carried away so much of the paper from some of the lays, as to make it difficult to find the course, and hence one or two checks occurred. But this was not the only difficulty the Nimrods had to contend with—in fact it was in one sense an advantage—for the ground was in some places so soft that the unfortunate ponies sunk in it to their knees, rendering the work hard to an extreme, and completely pumping many of them early in the race.

At the finishing jump, which under ordinary circumstances would have been easily cleared, a scene ensued unparalleled during the season. It was with considerable surprise that Mr. O. Brandt, (heavy-weight) on *Sea Bird*, was first seen coming home a winner by an unknown number of lengths. The plucky pony, after one refusal, took his final jump with an effort that just landed him safely ; and then the attention of the spectators was directed to the other approaching competitors, only a few of whom, however, were even yet in sight, so great was the tail. Mr. Hinckley (light weight) on *Choctaw* was second ; Mr. Tiefenbacher (light weight), on *Schwalbe*, third ; and Mr. A. J. How (heavy weight), on *Oriflamme*, fourth The gameness of these animals was manifest from the fact that *Sea Bird*, *Choctaw*, and *Oriflamme* gave time to all the others, and must therefore have passed through all the handicapped ponies ; while *Schwalbe* started in the fourth division, and passed everything in the remaining three divisions. The stragglers came in in wretched plight from mud and water, several of them so exhausted as to be unable to clear the last jump, and dropping with their riders souse into the water. Two of the ponies, *Dunraven* and *Forest King*, were with the greatest difficulty extricated, having for a time no power to help themselves. It was admitted, so far as we heard an opinion expressed, that the run had never been exceeded for severity. The distance covered was estimated at nearly six miles, and occupied the winner about thirty minutes.

The number of spectators at the finish was very great, the road for a considerable distance or either side being lined by traps

and other vehicles, in waiting for their occupants, who were scattered over the adjacent country. We regret that several accidents to vehicles happened during the drive home. In one case, a gentleman was thrown from his pony, made restive by the rapid passage of a dogcart which caught his flank, and caused the animal to cannon against a trap which was completely disabled; while in other quarters damage of less extent was done; but fortunately there was little injury to person. We are told that the driver of the dogcart above mentioned kept up his pace, without stopping to ascertain the mischief he had done.

MR. IBURG'S CONCERT.

We are very happy to be able to record that Mr. Iburg's audience last Tuesday evening was in point of numbers much more nearly commensurate with his merits as a musician than the rather scanty attendance which went to hear him last week. The fact is that Mr. Iburg was comparatively unknown here before his previous concert. He had, indeed, given concerts in Hongkong, and won golden opinions from the newspaper critics there. But it is not everybody, we fear, who reads the musical critiques with the regularity and attention which those valuable productions deserve; hence it is that none but the comparatively few who take a special interest in musical matters were cognisant of Mr. Iburg's high reputation as a *virtuoso*, and hardly any but these went to hear him. As, however, everyone who did go spoke in the very highest terms of what he had heard, it is not surprising that the second concert should have attracted an audience more worthy of Mr. Iburg's powers and of the musical reputation of Shanghai.

The first event of the evening was, as before, Schumann's deservedly favourite piano Quintett. This is one of those popular works, like Beethoven's and Hummel's Septetts, for instance, which are always welcome, and can never be heard too often. While sufficiently stamped with the composer's individuality, it does not contain any of those harsh and obscure passages which are to be found in his more characteristic compositions. We do not for a moment echo the reproaches of those who charge Schumann generally with wildness and unintelligibility; nor do we admit the claim of those who regard him as the founder of what is known as the Music of the Future. Schumann never broke with the traditions of Absolute Music, and no one was severer in his judgment of Wagner, as a reference to his critical writings will show. He must, on the whole, be classed among the followers of Beethoven—the greatest of them, perhaps; and, if he stands related to Wagner at all, it is as being, at the most, only the Precursor of the musical dispensation of which Richard Wagner himself is the Paraclete. As we have said, the Quintett is one of his most genial works, one of those most readily "understanded of the people," and its second performance was as successful as its first, and equally welcome to those, even, who were listening to it for the second time.

The second number of the programme was an Aria for Bass voice, by Haydn, but we hardly consider that the singer was fortunate in his selection, though with such a voice as his, anything sounds well, and nothing written by Haydn can be absolutely devoid of interest. Mendelssohn's Violin Concerto is only inferior to Beethoven's similar composition, and Mr. Iburg selected the slow movement for his first solo. Anything more beautiful he could not well have selected, and it was beautifully played. High as was our previous judgment of this artist, it was decidedly enhanced by this performance. He plays with the greatest execution, taste, and expression, and his second performance gave comparatively few indications of the single drawback which we had previously noticed. The magnificent *aria* from *St. Paul*, "For the Lord is mindful of his own," the finest inspiration, perhaps, in the Oratorio, and only surpassed as a sacred song by the "Oh! rest in the Lord" of the *Elijah*, was admirably sung by a lady amateur, endowed with a very rich and well-cultivated contralto voice. The effect would have been greater, had not some of our weaker musical brethren been (through a mistake of the programme) under the impression that they were listening to a song from an Opera of Gluck's; and thus a work which, properly announced, would have made a deep impression, suffered much by its false presentment as an operatic piece, and produced a sense of incongruity and bewilderment which the occurrence of such proper names as *Jerusalem* and *Paulus*, in the supposed Opera of "Orpheus," must have considerably aggravated. The applause was, notwithstanding, loud and long, and was, indeed, only stopped, at last, by the singer appearing again, and giving a pleasing German song, which she did with the greatest grace of manner, and the truest expression. The first portion of the entertainment terminated with the late Sir Sterndale Bennet's charming little programme-suite for pianoforte solo, which was carefully played by Mr. Fentum, who left little to be desired as regards mechanism, though his style lacks the grace, warmth, and colour necessary to do full justice to these finished and thoroughly Mendelssohnian little pieces.

The string quartett is a familiar form of musical composition, and it has been pronounced by so eminent a critic as Wagner to be the most perfect form which musical art has yet found for its expression. It is not a little curious that of late years this delightful combination has not been heard (publicly at least) in Shanghai. We have had piano quartetts and quintetts not unfrequently, but these hardly furnish the same pure enjoyment in the artistic point of view. The piano, as Mr. Haweis remarks, in his admirable work "Music, and Morals," is an intruder, its tone does not blend with that of the strings, and in later works of this class, the part given to it is often so preponderant in interest and importance as to produce the effect of a pianoforte concerto with accompaniment of small orchestra. Indeed in Schubert's posthumous quartett (*Adagio* and *Rondo*) the piano part is marked with the indications "solo" and "tutti," just as if it were a concertante instrument. We have to thank Mr. Iburg for the opportunity he has afforded us of hearing, once again, not indeed a complete string quartett, but a movement, at least, from one. The *Andante Cantabile* from Op. 18, No. 5, in A. (there are six numbers in this *Opus*), was probably selected as much for the prominence of the first violin part in it as for any other consideration. The *motif* is, for Beethoven, not remarkable, and, did we not previously know that the variations were his, we should have set them down at once to Haydn. Beethoven's earlier compositions of this class (the six alluded to), though beautiful and melodious to a degree, are in his so-called First manner, written when he was still under the full influence of his illustrious predecessors, Mozart and Haydn. It was not till after the lapse of a long period, during which his genius was gradually expanding, and working itself out in new and independent developments, that he again tried his hand at the quartett; and this time, in the immortal series Op. 59 (Nos. 1—3), he revealed himself as Beethoven in all his majesty. These three compositions, which Mendelssohn pronounced to be the most "Beethovenish" of all the great master's works, are, however, so difficult as to be beyond the skill of any but professional players. We cannot, therefore, blame Mr. Iburg for only attempting what he could reasonably hope to compass in a creditable manner with the time and resources at his command, and though we did not derive quite so much enjoyment from this piece as we had anticipated, we nevertheless consider it one of the most interesting items in the programme, and would greatly have preferred hearing the other movements than the violin solos which followed later. Mr. Iburg fairly dazzled his audience by his extraordinary display of *technique* in the Solo by Léonard (the Parisian Violinist, we presume). It is not uncommon for violinists of pretensions to make displays of this sort before a new audience, which accepts them as, in a manner, the artist's credentials; but no one knows better than the performer himself the worthlessness of these things, artistically regarded. Mr. Iburg's execution, the double stops, enharmonies, cadenzas, chromatic passages, &c., cleverly, beyond all doubt, as they were done, left us comparatively cold, or moved, at best, by the vulgar emotion of wonder, which would have been equally excited if the respected artist had chosen to stand on his head. A pleasing, if not very novel, effect was produced when both melody and accompaniment were given together on the Violin—a *tour de force*, we should imagine, which can be effectively achieved only by a thorough master of the instrument. Maurice Hauptmann's song, "Der Fischer" with Violin *obbligato*—a perfect gem, was, as music, *the* song of the evening. This admirable composer, to whom, it is said, Spohr used to submit his MSS. for revision, is now unaccountably neglected. His six Violin-and-piano sonatas (Opp. 3 and 25 especially the former), are, according to some critics, only inferior to Beethoven's famous ten.

English music was represented in this part of the programme by a song of Cowen's, the composer of the well-known (in England at least) Cantata "The Rose Maiden." The song, which was originally, we believe, written for a soprano, was transposed to the tenor register, and sung by an amateur who possesses a tenor voice (to quote from a contemporary) of "true ring." It was given with much taste and feeling, and we were glad to perceive that a certain tendency to mannerism which we noticed when first we heard this gentleman has almost entirely disappeared. A very warm re-demand elicited Balfe's well-known song, "Come into the garden, Maud," which, perhaps, has been heard often enough by this time. The concert concluded with the familiar Fantaisie on *Guillaume Tell*, by de Beriot and Osborne, a work which every amateur tries, and one out of a hundred learns. Notwithstanding Mr. Iburg's previous hard work—unnecessarily increased by an unreasonable, though well-meant *encore*—he "came up smiling," and attacked the Fantaisie with unexhausted *verve* and vigour, throwing the melody of the march, especially, off the strings with wonderful fire and *brio*. This closed what was, in the opinion of every one whom we have heard expressing an opinion on the subject (and we have heard many), one of the most enjoyable concerts ever given in Shanghai. It is consoling to think that a programme, made up exclusively of classical or quasi-classical compositions, should have achieved this success. As we should forfeit our critical character were we to conclude without discovering a fault somewhere, we would observe that the Concert was rather too long. The same criticism, it is true, applies still more forcibly to these remarks.

HONGKONG RACES.

(Daily Press.)

FIRST DAY.—FEBRUARY 25th.

1.—THE WONG NEI CHONG STAKES, for China, Manila and Japan Ponies. Weight for inches. Entrance $5 each, with $75 from the Fund. Half-a-mile.

Mr. Pye's *Coronet* 11st. 4lb 1
Mr. Fohkien's *Benachie* 11st. 11lb..... 2
Mr. St. Leger's *Zero* 11st. 11lb 3
Mr. Paul's *Tallapoosa* 11st. 8lb 0

Coronet and *Tallapoosa* were the favourites. It was believed that if *Coronet* got the start it would be difficult to pass him, and the supposition turned out correct. A good start was made. *Coronet* led, followed by *Benachie*, with *Tallapoosa* third, and *Zero* about an equal distance behind. This order was maintained for a short time, but on turning the corner at the straight *Benachie* came up slightly. He failed, however, to get ahead of his antagonist, but came in a good second, *Coronet* winning by only a neck. *Zero* managed to distance *Tallapoosa* before getting home, and passed the winning post a bad third. Time—1m. 1sec.

2.—ASHLEY CUP, presented by Mr. SASSOON, value $50, for China, Manila and Japan Ponies. Entrance $5. Weight for inches. One mile.

Mr. Fohkien's *Rouble*, 10st 12lb 1
Mr. Paul's *Schoolcraft*, 10st 12lb..... 2
Mr. Caledonia's *Chance*, 10st 12lb 3
Mr. Pye's *Recruit*, 11st 11lb 0

A very good start was effected. When passing the Grand Stand the first time, *Recruit* was leading. On making the sweep, *Rouble* shot to the front, followed closely by *Schoolcraft*. When the turn was reached they were about neck and neck, in which position they passed the Black Rock. Before the next turn was made, *Rouble* had taken the first position, but *Schoolcraft* still kept well up. On coming down the straight, it was evident that *Rouble*, who had been the favourite, would come in first. He won easily by two lengths. *Chance* tried hard to pass *Schoolcraft*, but it was no use, although the former came in a good third. *Recruit* was nowhere. Time—2m. 14sec.

3.—THE HONGKONG DERBY, Sweepstakes of $20 each, half forfeit if declared on or before day of closing Entries, with $100 added for 1st Pony, and $50 for 2nd. For all China Ponies *bonâ fide* Griffins at date of entry. First Pony, 70 per cent.; Second, 20 per cent.; Third, 10 per cent. Weight 10st. 7lbs. One-mile-and-a-half.

Mr. Sydney's *Cherokee* 1
Mr. Pye's *Pantagruel*..... 2
Mr. Marlborough's *Pioneer* 3
Mr. Waxem's *Tarantula* 0
Mr. Deacon's *Bar Silver*..... 0
Mr. Herbert's *Zephyr*..... 0
Mr. Canton's *Joint Account* 0

This was a large field, but nevertheless a fair start was obtained. *Cherokee* at once made to the front, a position which he kept to the last. *Tarantula* took the second place, which he managed to maintain nearly three parts of the distance. They passed the Grand Stand almost in a ruck, with the exception of *Joint Account* and *Zephyr*, who were considerably to the rear. On the last round *Tarantula* gave place to *Pantagruel*. Coming down the straight, *Cherokee* kept his position well, and won by at least a length. *Pioneer* was a bad third. The others followed at some distance. Time—3m. 20½sec.

The rider of *Pantagruel* claimed a foul against the winner, but the claim was disallowed.

4.—THE GARRISON CUP, value $200,—presented,—for China, Manila and Japan Ponies. Weight for inches. Four Ponies from opposing Stables to start or no race. Winner of the Ashley Cup, 7lbs extra. Entrance $10. Once round.

Mr. Fohkien's *Benachie*, 11st. 11lb. 1
Mr. Paul's *Tallapoosa*, 11st. 11lb. 2
Mr. Pye's *Gargantua*, 11st. 11lb. 3
Mr. St. Leger's *Zero*, 11st. 11lb. 0

The first start made was a false one, but on the second attempt the ponies got off well together. *Benachie*, who was the favourite and had the rail, at once made to the front, closely followed by *Tallapoosa*. *Gargantua* was some little distance behind, and *Zero* was still further back. This order was maintained all the way, though *Gargantua* made every endeavour to gain the second place. When the straight was reached, *Benachie's* rider was confident of success, and kept looking back at the rider of *Tallapoosa; Benachie* won easily by two lengths. A bad third. Time—1m. 58sec.

5.—THE CLUB CUP, value $150, for China, Manila and Japan Ponies, that have never won a Race (Canton Winners excepted), previous to this meeting. Weight for inches. Entrance $5. Three quarters of a mile.

Mr. Sidney's *Cherokee*, 10st. 12lb. 1
Mr. Pye's *Panurge*, 10st. 12st. 2
Mr. Waxem's *Tarantula*, 11st. 11lb. ... 3
Mr. Deacon's *Bar Silver*, 10st. 9lb..... 0
Mr. Forbes's *Buddha*, 10st. 12lb. 0
Mr. Marlborough's *Pioneer*, 11st. 4lb... 0

A good start was made. *Cherokee* of course was the favourite. For some time after getting away, *Cherokee*, *Panurge*, and *Tarantula* kept well together. Before the straight was reached, however, they parted and came down in the order that they passed the winning post, *Cherokee* winning hands down by three lengths. *Tarantula* was a bad third. Rest beaten off. Time—1m. 36½sec.

6.—THE FOOCHOW CUP, value $200,—presented by the Foochow Community,—for China, Manila and Japan Ponies. Weight for inches. Entrance $5. Two miles.

Mr. Jediar's *Alexis*, 11st. 4lb. 1
Mr. Waxem's *Monitor*, 11st. 11lb. 2
Mr. Fohkien's *Caprice*, 10st. 9lb... 3
Mr. Lind's *Royalist*, 10st 12lb..... 0
Mr. Caledonia's *Chance*, 10st. 12lb..... 0
Mr. Annfield's *Dollar*, 11st. 11lb..... 0
Mr. Paul's *Marathon*, 10st. 12lb. 0
Mr. Kushan's *Fei Yuen*, 11st. 11lb. 0

This was the best race of the day. A very good start was made. On passing the Grand Stand the first time, *Royalist* was leading and promised well, although going rather fast. *Dollar* was second and *Alexis* third when the Black Rock was reached. *Monitor* was going well at this time, but *Chance* was entirely out. When the Black Rock was passed on the second round, *Alexis* was leading, with *Monitor* second, and soon afterwards *Royalist* was far in the rear. *Alexis* and *Monitor* kept their places coming down the straight, when a capital race ensued. *Alexis* won by a neck. *Caprice* was a good third. Time—4m. 43sec.

SECOND DAY.—FEBRUARY 26th.

1.—THE SCURRY STAKES, for China, Manila and Japan Ponies, being *bonâ fide* Griffins at the date of Entry. Weight for inches. Winners of one Race at this meeting 7lbs. extra, and of two Races 10lbs. extra. Entrance $5, with $100 from the Fund. Three-quarters-of-a-mile.

Mr. Pye's *Pantagruel*, 11st. 11lb 1
Mr. Sydney's *Cherokee*, 10st. 12lb 2
Mr. Waxem's *Tarantula*, 11st. 11lb..... 3
Mr. Prior's *Lardy-Dardy*, 10st. 12lb... 0
Mr. Deacon's *Bar Silver*, 10st. 9lb 0

Cherokee was undoubtedly the favourite for this race; in fact he was counted upon as almost a certainty if everything went well. After a couple of false starts, the ponies got off pretty fairly. *Cherokee* got well away. Before the Black Rock was reached, however, *Pantagruel* was leading by about a neck and a half. A little farther on, *Tarantula* was first and *Bar Silver* second. On passing the village, however, *Pantagruel* again shot ahead, and was followed by *Cherokee*. A good race ensued down the straight, and *Pantagruel* won easily by nearly two lengths. A bad third. Time—1m. 38 sec.

2.—THE GERMAN CUP, value 100 guineas,—presented,—for China, Manila and Japan Ponies. Weight for inches. Entrance $10. Two miles.

Mr. Fohkien's *Rouble*, 10st. 12lb... 1
Mr. Waxem's *Monitor*, 11st. 11lb..... 2
Mr. Paul's *Tallapoosa*, 11st. 11lb..... 3
Mr. Pye's *Recruit*, 11st. 11lb..... 0
Mr. Jediar's *Alexis*, 11st. 4lb. 0

This was the principal race of the meeting, and was well contested. At the start *Rouble* got in front, but when the Grand Stand was passed *Tallapoosa* was leading, with *Monitor* second. On passing Black Rock, *Tallapoosa* and *Rouble* were neck and neck. On reaching the same place the second time, *Rouble* was first and *Monitor* second, and when the village was passed he had got a little ahead. For a moment after the straight was entered, it seemed to be a toss up between them, but *Rouble* kept well up, and came in easily by a length and a half. A bad third. Time—4m. 37 sec.

3.—THE VALLEY STAKES, of $100 with $10 entrance added, for China, Manila and Japan Ponies. Weight for inches. Winners of one Race at the Meeting, 7lbs. extra, and of two or more Races, 10lbs. extra. Once round.

Mr. Paul's *Schoolcraft*, 10st. 12lb..... 1
Mr. Pye's *Coronet*, 11st. 4lb..... 2
Mr. Williams's *Tally-Ho*, 10st. 9lb..... 3
Mr. Fohkiens's *Caprice*, 10st. 0lb..... 0

There was some slight delay at starting owing to the restiveness of *Caprice*. They ultimately got off well together, and before the first turn was reached *Coronet* was leading. He was well ahead at the Black Rock. It was then seen that there was no chance for *Caprice*, who was considerably in the rear. *Schoolcraft* was third and *Tally-Ho* second. As the village was passed, the race seemed to lie between *Coronet* and *Tally-Ho*, but coming down the straight, *Schoolcraft* quite unexpectedly came to the front, and after a capital race came in first by a head. His victory was undoubtedly owing to his rider. Good third. Time—1m. 59½sec.

4.—THE LUSITANO CUP, value $150 for China, Manila and Japan Ponies. Winners at this Meeting excluded. Weight for inches. Previous non-starters to carry 12st. Entrance $5. One mile and three-quarters.

Mr. Pye's *Panurge*, 10st. 12lb. 1
Mr. Caledonia's *Chance*, 10st. 12lb..... 2
Mr. Paul's *Marathon*, 10st. 12lb..... .. 3
Mr. Lind's *Royalist*, 10st. 12lb. 0
Mr. Fohkien's *Caprice*, 10st. 9lb. 0
Mr. Fohkien's *Souvenir*, 11st. 4lb. 0
Mr. St. Leger's *Zero*, 11st. 11lb. 0
Mr. Annfield's *Dollar*, 11st. 11lb. 0
Mr. Kushan's *Fei Yuen*, 11st. 11lb. 0

This was the largest field of the day. *Souvenir* seemed to be the favourite, and it was conjectured he would win if he ran steadily. A fair start was made, *Chance* leading off, with *Souvenir* behind. *Panurge* was second and *Fei Yuen* third. Before the Black Rock was reached, *Souvenir* got well up. When passing the Grand Stand, *Chance* was still leading, and *Panurge* had managed to reach the second place. On the second round, *Souvenir* seemed to make some headway, but failed to keep a place. At the Rock, *Panurge* had passed *Chance*, and there was no doubt then that the race lay between them. They took the straight wonderfully near each other, but *Panurge* maintained the lead and won easily by two lengths. A bad third. Time—4m. 6sec.

5.—THE CELESTIAL CUP, value $150, for all *bonâ fide* Griffins at the date of Entry. Weight for inches. Winner of the Hongkong Derby, 7lbs. extra. Entrance $5. One mile and a quarter.

Mr. Sydney's *Cherokee*, 10st. 12lb 1
Mr. Pye's *Pantagruel*, 11st. 11lb 2
Mr. Waxem's *Tarantula*, 11st 11lb 3
Mr. Prior's *Lardy Dardy*, 10st. 12lb ... 0
Mr. Deacon's *Bar Silver*, 10st. 12lb ... 0
Mr. Marlborough's *Pioneer*, 11st. 4lb... 0

A very bad start was obtained. *Tarantula* got off first, with the others pretty well behind, *Bar Silver* being far in the rear. When half way, *Cherokee* made to the front, and was for a short time closely followed by *Pantagruel*. As the straight was reached, however, he distanced *Pantagruel* by a long way and won easily by half a distance. Half a length between second and third. Time—2m. 52sec.

6.—THE WELTER STAKES of $5 each, with $100 from the Fund, for China, Manila and Japan Ponies. Weight 12st. Half-a-mile.

Mr. Pye's *Coronet* 1
Mr. Fohkien's *Benachie*..... 2
Mr. Paul's *Schoolcraft* 3

Coronet got a good start, followed closely by *Benachie*, *Schoolcraft* being at least a length behind. This position was kept pretty much throughout. Coming down the straight, *Schoolcraft* seemed to make a spurt to the front, but he failed to overtake his competitors. *Coronet* won easily by two lengths and a half. Bad third. Time—1m. 1½sec.

Third Day—27th February.

1.—The Subscription Challenge Cup,—presented, value 100 Guineas, for China Ponies, the *bonâ fide* property of Hongkong and Canton residents of not less than six months immediately previous to date of Entry. Weight for inches. Entrance $5. To be won two years consecutively by a Pony or Ponies, the *bonâ fide* property of the same Owner. Two miles.

Mr. Sydney's *Cherokee*, 10st. 12lb. 1
Mr. Waxem's *Monitor*, 11st. 1lb. 2
Mr. Paul's *Marathon*, 10st. 12lb. 3
Mr. Annfield's *Dollar*, 11st. 1lb..... 0
Mr. St. Leger's *Zero*, 11st. 1lb. 0

Monitor was the favourite. At the start, *Dollar* led off with *Chance* second. Before the Black Rock was reached, on the first round, *Cherokee* was leading, *Monitor* being next the rails. The ponies passed the Stand the second time in pretty close order, *Zero*, *Cherokee*, and *Monitor* being neck and neck. *Monitor* and *Cherokee* were leading at the Rock, with *Zero* still third. All hopes of *Monitor* were not given up till the ponies were opposite the village, when *Cherokee* shot far ahead and won easily by three lengths. A neck between second and third. Time—4m. 56sec.

2.—The Ladies' Purse,—for China, Manila and Japan Ponies that have run at this Meeting, to be handicapped by the Stewards. Entrance for Ponies accepting $5. Once round.

Mr. Fohkien's *Benachie* 1
Mr. Waxem's *Tarantula* 2
Mr. Paul's *Schoolcraft* 3
Mr. Jediar's *Alexis*..... 0
Mr. Marlborough's *Pioneer* 0

At the start, *Benachie* was somewhat in the rear but soon made to the front. After the course had been half traversed, it was seen that the race lay between *Benachie* and *Tarantula*. Coming down the straight, the former was first by a long way, and won hands down by four lengths. Time—2m. 7 sec.

At the close of the race, Mr. Gore-Booth, of Shanghai, who rode the winner, was presented with the Ladies' Purse by Mrs. Deane.

3.—The Canton Cup,—value $200, for all Ponies. Winners at this meeting excluded. Weight for inches. Entrance $5. Three-quarters of a-mile.

Mr. Kushan's *Caractacus*, 10st. 12lb... 1
Mr. Lind's *Royalist*, 10st. 12lb. 2
Mr. Pye's *Gargantua*, 11st. 1lb. 3
Mr. Fohkien's *Caprice*, 10st. 9lb..... 0
Mr. ,, *Prince Charlie*, 10st. 12lb 0
Mr. Caledonia's *Chance*, 10st. 12lb..... 0
Mr. Deacon's *Bar Silver*, 10st. 9lb..... 0
Mr. Robison's *Maron Glacé*, 10st. 12lb. 0

This was a large field, but nevertheless the ponies got well away together. *Royalist* shot into the first place. A splendid race ensued down the straight, *Caractacus* winning by a length. There was a head between second and third. A capital race. Time—1m. 42½ sec.

4.—The Ke-Chong Cup,—value $200,—presented,—for China, Manila and Japan Ponies. Weight for inches. Three Ponies from *bonâ fidé* opposing Stables to start or no Race. From the Black Rock twice round and in.

Mr. Kushan's *Fei Yuen*, 11st. 1lb. 1
Mr. Fohkien's *Rouble*, 10st. 12lb..... 2
Mr. Paul's *Tallapoosa*, 11st. 1lb..... 3
Mr. Fohkien's *Caprice*, 10st. 9lb..... 0
Mr. Waxem's *Monitor*, 11st. 1lb..... 0
Mr. Pye's *Pantagruel*, 11st. 1lb..... 0

Soon after the start *Fei Yuen* got into the front, with *Rouble* second and *Monitor* third. This order was maintained when the Grand Stand was passed the first time, and all the way round. As the Black Rock was reached *Tallapoosa* made some way, but failed to keep his position, or to interfere with the order as above. A splendid race home ensued, *Fei Yuen*, who had been a little behind, coming up beautifully, and winning by a short length. Half a length between second and third. Time—5m. 27½sec.

5.—The Stand Plate.—A Steeple Chase for China, Manila and Japan Ponies. Weight 11st. Three Ponies from opposing stables to start or no Race. Entrance $5, with $100 from the Fund. Once the two mile post, twice round and in.

This race was postponed till Monday afternoon.

6.—The Champion Stakes. — A forced Entry for all China, Manila and Japan Ponies, winners at this Meeting; optional to beaten Ponies. Weight for inches. Entrance $20, with $100 from the Fund. One mile and a half.

Mr. Fohkien's *Benachie* 1
Mr. Sidney's *Cherokee*..... 2
Mr. Pye's *Panurge* 0

At the start *Benachie* led followed by *Cherokee*. *Panurge* soon lost ground and continued to do so. *Benachie* and *Cherokee* passed the Grand Stand together the first time, and kept together all the way round till passing the village, when the former assumed the lead, and walked in by six lengths. Third pony beaten off. Time—3m. 36½sec.

7.—The Consolation Stakes,—for all beaten China, Manila and Japan Ponies at this Meeting. Catch Weights. Entrance $5, with $75 from the Fund. Once round.

Mr. Lind's *Royalist*..... 1
Mr. Pye's *Gargantua* 2
Mr. Paul's *Tallapoosa* 3
Mr. Caledonia's *Chance* 0
Mr. Waxem's *Tarantula* 0
Mr. Prior's *Lardy-Dardy* 0
Mr. Deacon's *Bar Silver*..... 0
Mr. Marlborough's *Pioneer* 0
Mr. Annfield's *Dollar*..... 0
Mr. Robison's *Maron Glacé* 0

This was the largest field of the meeting, and the start was perhaps as good as it could be under the circumstances. At the turn, *Chance* was leading, but was collared and passed by *Royalist* before the Rock was reached. *Gargantua* and *Tallapoosa* then struck out and got into their places, which they kept throughout. *Royalist* won by two lengths. A good third. Time—2m. 5sec.

Fourth Day.

Match between *Benachie* and *Rouble*.—The sport commenced with a private match between *Benachie* and *Rouble*, and resulted with

Benachie 1
Rouble 2

Rouble seemed to have the start, but the ponies kept well together the first round. When ascending the slope near the Black Rock, *Benachie* took the lead, and before the village was reached had shot right way. He won by two lengths.

Match between *Panurge* and *Caprice*.—Two miles. The result was

Panurge..... 1
Caprice 2

The ponies kept well together the first round, but *Caprice* failed in taking the hill at the Rock the last time, and *Panurge* won easily by several lengths.

The Coast Cup.—An extra prize, presented by Mr. Fohkien and Mr. Pye, value $200. For the beaten ponies.

Tallapoosa 1
Chance 2

Four ponies entered for this race—*Tallapoosa*, *Chance*, *Lardy-Dardy*, and *Monitor*. The ponies kept well together the first round, when *Tallapoosa* and *Chance* broke off, and the race lay between them. *Tallapoosa* won by several lengths.

The Cherokee Cup.—Extra prize.

Recruit 1
Gargantua..... 2
Zero 3

The following ponies entered:—*Dollar*, *Zero*, *Recruit*, *Marathon*, *Gargantua*, and *Tarantula*. *Recruit* won easily. A good third.

The Native Scramble, for China Ponies only; First Pony, $25; Second, $10; Third, $5; to be ridden by Chinamen. Catch Weights. One round.

Benachie 1
Rouble 2
Pantagruel 3

Seven started for this race, which was well contested, and very amusing.

The Steeple Chase was not run.

This concluded the meeting for the year.

Miscellaneous.

THE OPIUM QUESTION.

As usual, the "Commercial Reports from Her Majesty's Consuls in China for 1873," only reach the hands of the public a year after their compilation. Consequently the greater part of the tabular returns of exports and imports are stale, after the publication of the Imperial Foreign Customs Reports in the early part of this year. Nevertheless, they contain much useful and interesting information regarding the fluctuations of external trade and native produce, which are not to be found in the rival returns; and, as they bear the official consular stamp, the statements they contain may be relied on. This is especially noticeable in the Blue Book just issued, now before me, where nearly all the Consuls make remarks, more or less, upon the increasing extension of opium-poppy plantations in China, and how it affects the import of Indian opium. Strange to say, in the List of Report, Shanghai becomes conspicuous from its absence, and so is the port of Chinkiang. Regarding your Settlement, this is not easily to be accounted for, as your experienced and active Consul has not the reputation of being dilatory in sending his reports to the British Secretary of State for Foreign Affairs.

In respect of general remarks free from "red tape" restrictions, the report of Acting-Consul Harvey at Newchwang is not only the most comprehensive regarding the opium question, but all branches of trade in China affecting British interests, which it would be well that his colleagues at other treaty ports should imitate. Under the heading, "Native Opium," he states: "There can be no doubt that the cultivation of the poppy is on the increase throughout the whole of Manchuria. The area under cultivation is considered to have been greater last year than it was in 1872. The extent to which it is cultivated in the immediate neighbourhood of this port town is inconsiderable, but the fact that small amounts were grown last year at Tien Chuang-tai, twenty miles to the North, and at Kaichow, thirty miles to the South of this place, shows that the cultivation is gradually extending from the north Southwards. The action of the Imperial and local authorities is very irregular and uncertain. Proclamations are issued from time to time forbidding the cultivation of the poppy; on the other hand, the existence of the native drug has been recognised in this place, and the *lekin* tax upon it is fixed at one-third less than that levied on the foreign article. In spite of this, however, no revenue seems to be derived from native opium. It is to all intents and purposes an underhand trade. It cannot be purchased here in larger quantities than a catty at a time. It is smuggled in, in small quantities, concealed about the person, or hid in bags containing grain and other produce. The want of uniform action by the authorities may afford the required explanation. Some officials wink at its growth, others are zealous to suppress it. Publicly recognized here, it is forbidden further North; but whether recognized or not, it is probable that the petty officials, tax-gatherers and the like, represent it as illicit, and exact bribes to refrain from interference." From these remarks one would infer that the increasing production of native opium will gradually drive the Indian drug out of the market. Such, however, is not the case, at least as far as Newchwang is concerned; for, although the imports decreased during the previous five years, in 1873 there was a small increase. Mr. Harvey states that the consumption of Indian opium has been but slightly affected by the increased cultivation of the native drug. "In Newchwang

and the surrounding district, the latter is only used for mixing with the former, generally in the proportion of seven parts of foreign to three of native opium. The number of those who only smoke the native article is extremely small, and they are to be found solely amongst the poorest of the population, or in the interior away from towns and the main highways of traffic, in spots where foreign opium may not have penetrated. Many, indeed, begin with the native drug, but as they become confirmed smokers they sooner or later adopt the Indian. There can be no doubt as to the superior estimation in which foreign opium is held." In the face of this statement it would appear that the large imports are not likely to decrease, if they do not increase; yet the cultivation of the poppy, according to the other reports, is spreading in all the Northern, Midland and Western provinces. In the province of Chekiang, and on the borders of Fokien, several districts are mentioned where poppy farms and opium manufactories existed, but the quality of the narcotic is inferior to the foreign article, excepting Persian, which is unsaleable at renumerative rates, so that some imports have been returned to their native country. Indeed, the Chinese opium can only hold its own against Indian on account of its selling price being about fifty per cent. less than Malwa, which is most in demand for mixing. "The whole future of the opium trade with China," Mr. Harvey remarks, "hinges upon the quality of that grown in China. As far as our present knowledge and experience go, it would seem that the inferiority ascribed to it is absolute and inherent, as being due to soil and climate; but if it can be accounted for by want of skill on the part of the producers, or by the practise of adulteration among the dealers, it is evident that improved cultivation and greater honesty must in time render it a serious rival to the Indian drug." Speaking of the effects of opium-smoking on the constitution, Mr. King, Vice-Consul at Kewkiang, furnishes some data from personal observation, showing that it is not injurious if practiced moderately by hard-working men. He says, "During my tour on the Upper Yangtsze and in Szechuen, I was thrown into the closest relations with junk sailors and others, almost every adult of whom smoked more or less, and I was much struck with the effect it had upon them. Their work was of the hardest and rudest kind; rising at four and working with hardly any intermission till dark, having constantly to strip and plunge into the stream in all seasons, and this often in the most dangerous parts. The quantity of food they eat was simply prodigious, and from this and their work it seems fairly to be inferred that their constitutions were robust. The two most addicted to the habit were the pilot and the cook. On the incessant watchfulness and steady nerve of the former, the safety of the junk and all on board frequently depended; while the second worked so hard from 3 A.M. to 10 P.M., and often longer, and seemed so independent of sleep or rest, that to catch him seated or idle was sufficient cause for good humoured banter. I do not imagine that the Szechuen drug differs sufficiently from the Indian to account for these instances of harmless smoking, nor, on the other hand do I wish to express it as my opinion that opium-smoking does no harm; but my opinion with regard to it has been modified, and I am bound to recognize the fact that the habit can, and does exist, without detriment to health or capability, merely affording a solace and a stimulant."

This is important evidence, and should the Opium question be discussed in the ensuing session of Parliament, will no doubt be availed of by those in favour of the existing British Opium Policy. Regarding the adjudication of the prize essays, I learn that it will shortly be given, as Mr. Edkins has finished the translation of those in Chinese, of which there are said to be about thirty out of a total of between fifty and sixty.—*Nous verrons.*

SAMUEL MOSSMAN.

Correspondence.

THE HONGKONG AND SHANGHAI BANK.

To the Editor of the
NORTH-CHINA HERALD.

SIR,—I observe by the report of the Hongkong and Shanghai Bank, that, with the view of restoring public confidence, the Directors declare that they have stated their unrealized assets at a considerable per centage under the value placed on them by their official valuer; and they appear to entertain the sanguine hope that this statement, combined with the appointment and arrival of Mr. Maclean as Inspector, will restore them to the position in the confidence of the public they used to hold.

Looking on the maintenance of a local Bank as essential to the proper development of the resources and energies of a port in which I am largely interested, and desiring above all things to see the Hongkong Bank flourishing and prosperous, I trust I shall be excused in saying that neither the appointment of one of their own servants as inspector, or any statement the ex-directors may make, will be sufficient to satisfy the pubilc that the actual position of the Bank is assured; and until the public is so satisfied, it is impossible that the conditions necessary to the satisfactory working of the Bank can exist.

To restore public confidence, it is needed that a perfectly independent commission should be appointed, utterly unconnected with the Bank, and not even holding shares therein; who would take actual stock of the Bank, examine books, &c., make personal enquiries, ascertain the actual value of the securities, and generally thoroughly look into everything.

If such a commission, which should consist of some high official, say, one of the judges of the Hongkong or Shanghai Courts, a merchant of high character and position, and a high-class accountant, were appointed, and after careful investigation of the nature of the securities in the Bank hands, of the amount of overdrawn accounts and their discountable value, of the actual present value of the goods and properties hypothecated to the Bank, (they might indeed require some three months to conduct their enquiry) the Bank would, if their Report were favorable, at once recover the confidence it is supposed to have greatly lost.

To open out the profitable fields for foreign enterprize the Chinese Empire affords, to develope the mines of wealth yet untouched and even scarcely thought of, a local institution like the Hongkong Bank is absolutely necessary; and it seems a pity its position should be endangered or its efficiency even temporarily crippled, for want of some such step as that I have sketched out, being taken.

Yours obediently,
MERCATOR.

Shanghai, 25th Feb.

Law Reports.

CIVIL SUMMARY COURT.

Shanghai, March 3rd.
Before R. A. MOWAT, Esq.,

SING-FOW *v.* J. SNOWDEN.

Plaintiff sued defendant to recover $30.49, for wages and money advanced and expended. He said, however, that defendant lent him $5 at the China New Year, which reduced his claim by that amount.

It was stated that defendant, who is a pilot, had gone down the river with the *Northampton*, and had not returned.

Hearing adjourned in consequence.

Shanghai, March 4th.

HUGH CAMERON *v.* J. T. TAYLOR.

Mr. MYBURGH appeared for the plaintiff.
Defendant conducted his own case.

The parties to the action were pilots, and the plaintiff sought to recover $99, for loss sustained by him through the defendant's refusal to let him use a certain pilot schooner, the *Daniel Webster*, of which he was a co-owner.

Mr. MYBURGH said it was really a case to try the right of the plaintiff, as purchaser of a quarter share, to the use of the schooner. The facts were, that some time ago the schooner was sold by an order of the Court, and she was purchased by four persons, Messrs. Jurgessen, Taylor (the defendant) Vaughan, and Peters; and as far as he could understand there was no agreement made as to the sale of their shares to any other persons, but that they were to use the schooner jointly.

His HONOUR—Were the four men to go in the schooner together?

Mr. MYBURGH said he did not know. On the 25th of January last, Jurgessen sold his quarter-share to the plaintiff, and Peters, one of the part owners, witnessed the signatures. The deed was drawn up by Mr. Robinson, and after the sale, plaintiff asked for the use of the schooner, in common with the others, but was refused by Taylor, who wrote a letter, in which he quoted "Smith on Partnerships," to the effect that a man could not become a partner without the consent of all existing partners. He (Mr. Myburgh) contended that there was no partnership between the parties named as having purchased the schooner, but that it was only a tenancy in common, or co-ownership, and in support of this view he cited "Lindley on Partnerships and Companies." He thought there could be no doubt that Jurgessen, as one of the original purchasers, had a right to use the schooner, and that the plaintiff, as the purchaser of his share, had just the same right to the use of the vessel.

Defendant, on being directed to state his view of the case, entered into a lengthy statement, the gist of which was that in the Black Ball Pilot Company there were eight partners, one of whom (Simpson) had died. On the dissolution of that company, the vessels belonging to it were sold by auction. Jurgessen, Vaughan, and himself bought the *Daniel Webster*, and Peters was taken in as an apprentice-pilot, on the understanding that if he did not obtain his license at the end of six months, the others would buy his share of the schooner.

Mr. MYBURGH—Do you dispute the sale of Jurgessen's share to Cameron?

Defendant—I do; I know it is not a *bonâ fide* sale.

His HONOUR—Then you say that Jurgessen, Vaughan, Peters and yourself were partners?

Defendant—Yes, we were.

His HONOUR—What did you say about Peters? There are two points to be considered—you might have been joint owners of the schooner, but yet not partners in the business of pilots.

Defendant—The four were partners in the schooner to use her for piloting. Peters was taken in to be taught the business of a pilot.

His HONOUR—The plaintiff had better be sworn.

Plaintiff was accordingly sworn, and deposed:—I have been a pilot for three and a half years. Mr. Jurgessen had a quarter share in the *Daniel Webster*. I bought it of him. The agreement produced is that of the sale. It is signed by Jurgessen and myself, and was witnessed by Mr. Robinson and Mr. Peters. I bought the share on the 25th January last. Mr. Taylor was in possession of the boat, and I notified him on the 12th February, of the sale and of my desire to use her. That was the first time I could see him. I had no opportunity before, the schooner being outside. He told me, in reply to my application, that I could not come on board the schooner. I asked him why. He said, afterwards, that he had no objections to me, but to the party who sold. He refused to let me come on board. I made no further application, but a correspondence ensued, the first letter being from

myself on the 11th February. I took a letter on the same day I purchased the quarter share (a letter from my vendor), in order to give it to Mr. Taylor, but I could not see him until the 12th February. I had that letter in my possession all the time. My average earnings are about Tls. 200 per month.

By defendant—I am a shareholder in the *Daniel Webster*, to the extent of Tls. 1,000. I have given a note of hand to Mr. Jurgessen for the whole amount. I propose to pay the amount in twelve months out of my earnings, a certain portion of which will be set aside for that purpose.

Defendant—That means that, by being my partner, you hope to pay it?

Plaintiff—I do not hope to do it at all, I have arranged to do it.

His Honour—Why should he not put aside a portion of his earnings to pay this sum?

Defendant—He can't, unless he becomes my partner.

Mr. Myburgh—He does not necessarily become a partner. If Jurgessen chooses to sell his share in the schooner, he has a perfect right to do so. It is his own look-out whether he gets paid.

Defendant—We can't work in the schooner, or pilot ships, without being partners.

Plaintiff—We were to be partners in the expenses of the schooner. Have an agreement drawn up, and then there will be something solid.

Defendant—He must be a partner, because if there are two ships to pilot, I should keep one, and he would have the other; or I might be ill, and he would have to do the work.

His Honour—It is not because he buys a share in the schooner, that he becomes a partner with you as a pilot. When you have gone down the river one day with a ship, he might take the schooner the next day, and get another ship, and not divide your earnings. You might share the expenses of the schooner, but not divide your earnings at any time. You might both go down the river in the same boat, as being cheaper than two boats; one of you might get a large ship and the other a small one to pilot, but it does not follow that you would put your earnings together and divide them.

Defendant then renewed his questions to the plaintiff, but elicited nothing material to the point at issue. He also proceeded to read a number of letters that had passed, to which

Mr. Myburgh objected, as not being evidence.

Defendant said he could not make his case understandable unless His Honour would hear them. He was not assisted by legal advice, and trusted to His Honour's ideas of justice and equity.

His Honour said the letters had better be read—it would perhaps save time in the end.

Defendant then read the letters which had passed between the plaintiff and himself, the only material point contained in them being contained in his reply to the plaintiff's notification of his purchase of the share, in which he said, "No person can become a partner, unless by the consent of all the other partners. On this principle I intend to stand; otherwise I shall apply to the Judge for power to sell the property." That was his position to-day.

His Honour—The point upon which you are at issue is this—that there is no evidence as yet of any partnership existing. When defendant comes into the box, he will be able to tell how they stood together.

Defendant—I wrote to plaintiff, that he must establish his claim to be my partner, in a court of law, according to "Smith on Partnership."

Plaintiff was at this period questioned by his Honour, as to whether he had obtained the consent of the other partners to his purchase of Jurgessen's share. He replied that he had asked Vaughan and Peters, neither of whom had any objection. He did not ask Taylor's consent, because he was not in town. On being pressed to say if Taylor's absence was his only reason for not asking him, the plaintiff did not give very clear replies.

Mr. Myburgh said he did not see what Taylor's consent had to do with it.

His Honour said plaintiff evidently thought somebody's consent was necessary, else why did he go to Vaughan and Peters. Probably he thought they were willing, and that Taylor was not.

Plaintiff—No, that was not it.

His Honour—The $99 you claim, is it in respect of your loss of time between the 12th and 22nd February.

Plaintiff said it was.

His Honour—Is not the loss your own fault? You might have taken out the summons on the 12th, but you did not do so until the 22nd. The defendant is not to blame for your delay. He refused you permission on the 12th, to use the schooner; why did you not sue him then?

Plaintiff—I thought he might have written to me, saying whether he was willing for me to join.

Mr. Myburgh—He wished to give the defendant time to think over it.

Plaintiff—I did not wish it to come to such proceedings as these.

His Honour said Peters had better be examined.

Jordan Peters, said he was owner of a quarter share in the *Daniel Webster*:—I had no objection to Mr. Jurgessen selling his share to the plaintiff. There was no stipulation against either of the owners selling his share. I sailed six months as an apprentice-pilot, to serve my time. I have received no money from any others, nor have I paid for repair. I only paid for my food. I paid Tls. 1,050 for my share. I left it to the other pilots to make all arrangements. Mr. Taylor has sailed frequently in the schooner. So far as I know, neither Jurgessen, Vaughan and Taylor have put their earnings together, nor did I know of any agreement to do so. I do not know whether Vaughan or Jurgessen contributed to the repairs of the schooner.

By defendant—It was understood that no other partners were to be admitted, but that we were to keep the schooner among ourselves. It was not understood amongst us all that if I was unable to get my license, the other three owners were to buy me out. I never knew of it until my six months were expired. You did tell me afterwards. The other owners were willing that I should receive the money.

Defendant, sworn, deposed—The *Daniel Webster* was sold on the 23rd Feb., 1874, for Tls. 4,200. I purchased her, on account of myself and the three other persons named. There was no agreement drawn up.

His Honour—That is at the bottom of the whole thing, and has led to this confusion. I believe in no other place but Shanghai, would property to the value of Tls. 4,200 be purchased on account of four persons, without an agreement being drawn up to show the terms on which it was purchased, and the purposes for which it was to be held. What was the verbal agreement, if there was one?

Defendant said they trusted to each other's honesty. There was a verbal agreement, that Vaughan and Jurgessen should remain in Messrs. Siemssen's employ in which they then were; and that all expenses were to be shared. It was thought that I also would be employed by Messrs. Siemssen, and that we would then club our earnings. They, however, found they did not want three pilots, and things went on as before. That went on till October last. An amalgamation of all the pilots in Shanghai, was next proposed, but that also fell through, and matters still went on as before, Vaughan and Jurgessen piloting the Hongkong steamers as usual. I have been working the boat myself, and they have not joined their earnings to mine, although I have often asked to do so.

His Honour—Then, by your own showing, there was no partnership between you.

Defendant—But partnership in piloting is different to anything else,—at least Sir Edmund Hornby ruled so in the Black Ball case.

Mr. Myburgh—But they had articles of association.

His Honour—I do not remember Sir Edmund Hornby ever ruling in the way you say. Community of profits is the test of a partnership.

Defendant—In the case of the *Lucerne*, we helped to save the crew, and rendered other assistance, and then divided the money equally. As we were partners then, we are partners now. With all deference, I contend it is a partnership. It is very hard upon me to have to take this man in, when it will interfere with my business to do so.

His Honour—You are not obliged to take him in. There are two or three ways out of the difficulty. For instance, you can sell your own share.

Defendant.—We all wish to sell. But could we not sell the schooner by auction?

His Honour.—Yes, you can do that, if you choose. But there is nothing to prevent Mr. Jurgessen selling his share or giving it away. He might give it to anybody.

Defendant.—It will vitiate my share very much to take plaintiff in.

Mr. Myburgh—You want it altogether for yourself.

Defendant—No, I do not; but I want respectable men to join me, so that captains will give me employment.

His Honour—I now come to the question of damages. Plaintiff says his average earnings are Tls. 200 per month.

Both plaintiff and defendant were questioned as to their earnings in the months of December, January, and February, which from their replies appeared to be nearly approximating to the plaintiff's statement.

His Honour said it was clear from the evidence that there was no partnership in the piloting business. Four men had bought a schooner between them in common, and it was perfectly open to any one of them to sell his share to whom he pleased. The person who bought it, stood in the shoes of the seller. Consequently, the plaintiff being the new owner of the share, defendant was wrong in refusing him permission to use the schooner. By reason of that act, the plaintiff had suffered loss, which he assessed at $99. He appeared to have been idle from the 12th to the 22nd February—to have lain by on his rights; of course he was not disposed to encourage plaintiff in such a proceeding, because his right of action commenced on the day of the defendant's refusal, and the case could have been heard soon afterwards, and the point decided. Still plaintiff was entitled to damages in respect of the clear invasion of his right of property, and he would allow him $25.

Mr. Myburgh—And costs?

His Honour—I will not allow more than the ordinary costs of Court. This is the result of dealing with valuable property without some written agreement, which could be produced to the Court.

Defendant—There was a verbal agreement.

His Honour—Your experience should teach you that a verbal agreement is of no use whatever.

Shanghai, March 5th.

Le-Ta-Li *v.* Kate Jessop.

Plaintiff claimed $74.25 for wages and money expended, as cook in the employ of the defendant.

Through Heding, the interpreter, he said his wages were $16 per month, and were three months and twenty-five days in arrear. The remainder of the amount claimed was for money expended. He went into the service in October, and never received any wages, although he applied for payment monthly. He found all the provisions required, for $35 per week, for sometimes four, five, and six persons. There were five persons living in the house. In the first three weeks he was paid clear, after that there was always a balance. Plaintiff produced his account book in Chinese, and said he had also a foreign account book, but it was taken away from him. He could not read, and his accounts were kept by a friend. The $35 per week were not to include wages. On the food account, there were now $13 due. On the 30th day of the Chinese month, he applied for payment of $35, and was told a foreign bill was necessary. He supplied one and received $32, leaving $3 on that account. The other $10 were due before that time. He did not put it down altogether, because the bills were weekly. He went one day to get provisions, and when he came back he found another cook in his place. He did not take out a summons earlier, because he was sick for two weeks, and afterwards because $3 were wanted for the summons, and he had to get it from his friends. He did not apply for payment when he was dismissed, and not until after he recovered. When he used to apply for payment, he was threatened to be beaten.

Defendant said the plaintiff's statement, as to the amounts he was to receive, was true. He was not dismissed, but left on his own account; and she had not seen him since, until now in Court. She had paid him everything, through her boy, who had got a receipt from plaintiff in Chinese, and she did not owe him a cent.

Defendant's boy was called, and said he sometimes paid the plaintiff—and sometimes

the defendant did. When plaintiff left, he paid him $32, the defendant having cut him $3. Plaintiff took the money. (Witness produced a receipt from plaintiff.)

His HONOUR said this was written on Jan. 28th.

Witness said that was when plaintiff was paid $70. He did not usually get a receipt, but did on this occasion, because it was found plaintiff was always making mistakes. $70 were paid to plaintiff the week before the 28th January, by witness, for which he also got a receipt, but it was lost. When plaintiff was paid the $32, he did not say any money was due to him. Plaintiff was not paid $35 regularly,—sometimes more, sometimes less. When he received the $32, he left the house, and at dinner time had not come back. After dinner he came back. There was another cook there at that time. He said something about his money being in arrear, and went away again. Witness did not pay him any money on account of wages. The servants' wages were always paid to them, personally.

Plaintiff on being asked, said he had nothing more to say.

Defendant, sworn, deposed—I paid plaintiff at different times, sometimes so much for the table, and so much for wages. I was very sick, and when I got well I paid him all I owed him, $70, for which I had a receipt in English, which I cannot find. He left without my knowledge, and I was obliged to get another cook. He came back late the same night, took his things, and I have never seen or heard of him since.

Plaintiff recalled, and shown the receipt above mentioned, said he remembered nothing about it.

The boy, recalled, said plaintiff gave it to him.

His HONOUR said he was not satisfied that any money was due. All the circumstances of the case seemed to point to the fact that plaintiff had been paid. He received the sums of $70 and $32 without demur; and then was the time for him to have complained. He did not think it likely that he would be paid for the table allowance, and nothing for his wages from first to last.

Judgment for defendant.

———

Shanghai, March 9th.

HUGH SUTHERLAND *v.* JONATHAN BRANTHWAITE.

Plaintiff sued to recover $99, for damage done to his pilot-boat (No. 8), through the ship *Belted Will*, of which the defendant is captain, fouling her as she lay at anchor, near the mouth of the Yangtze, at two o'clock on the morning of the 26th ult.

WILLIAM MCKAY, boatkeeper of the No. 8, deposed that, at the time named, the boat was at anchor about four miles from the light-ship, waiting for the plaintiff, who was expected to come down the river with a steamer. About twenty minutes past two, Macpherson, a pilot, who was on board, said there was a ship coming up, which he supposed wanted a pilot, and he afterwards ordered a Chinaman to get out a flashlight, to show the captain where the boat lay. Four or five minutes afterwards, he ordered the Chinaman to show another. Soon after that, Macpherson came to witness in his berth, and told him to look out for himself, as he was sure the ship would run the boat down. Witness heard the orders given about the flashlights. He did not stop to dress, but ran on deck, and noticed the lantern in the rigging was burning quite brightly. He had been about three minutes on deck when the ship, which he afterwards ascertained to be the *Belted Will*, came in collision with the boat. Her starboard bow touched the boat's starboard bow, then passed along, grazing the boat's side, to her quarter, carrying away a lanyard and also the masthead, and damaging the bulwarks. The weather was pretty clean at the time. The boat was brought up the river to be repaired. The mast was broken close to the forestay.

By Plaintiff—The lantern was carried away at the same time, and the step of the mast has since been found to have been broken. The boat leaks a little more than she did before, and is "started" on both quarters.

Plaintiff was then sworn, and deposed that he was the owner of the boat. After she was brought up the river, he examined her, and found her damaged as above described. He had called in a Chinese carpenter to estimate the cost of repairing her, which he set down at Tls. 100. (Estimate produced.) Plaintiff had spent Tls. 70 on the boat only a month before, strengthening and repairing her. Flash-lights were used to let ships know the whereabout of a pilot-boat, and also as a means of preventing danger.

JOHN MACPHERSON, the pilot referred to by the first witness, was also examined, and entered very minutely into details as to the boat's position, and also that of the ship when approaching her. He was under the impression that the vessel wanted a pilot, and therefore ordered the flash-lights to be burned, and ordered his crew to commence to get the boat underweigh, to save time in getting to the ship. He burnt a second flashlight, because he thought the ship was coming too close to him, but she still came on. He then hailed the ship, to put the helm hard-a-starboard, so as to avoid striking the boat, and heard some one on board ship cry out, "a light right ahead," but heard no answer. The ship's course was, however, slightly altered, and so avoided a direct collision. It was a clear morning, and Gutzlaff light was visible. The remainder of the witness's testimony was corroborative of that the first witness.

The defendant's statement was to the effect that, at about two in the morning of the 26th, he was on deck, near the man at the wheel. The pilot was also near at hand, and the ship was steering toward the lightvessel, when he suddenly heard the chief officer, who was on the forecastle securing the anchor, suddenly call out to starboard the helm, as there was a light ahead. The word was passed two or three times, showing the case was urgent, and he (the captain) ran to the wheel to assist the man to get it round quickly. After that he looked over the side and saw a small boat a little on the starboard bow, but no light. The ship was close to her, and as she passed, her foreyard caught the boat's mast and broke it. The people on board the boat were "singing out," and appeared in great confusion. All that could be done had then been done on board the ship, and it was a narrow escape for the boat's crew.

FRANCIS GRANDIN, the chief officer, and ROBERT DAVIDSON, the second officer, of the *Belted Will*, also gave evidence, which was in effect a repetition of the main facts contained in the captain's statement. The second officer, however, admitted that he heard the look-out man report a light ahead, and it was not till his second report (about a minute afterwards) that any order was given to starboard.

WILLIAM WITTHOFT, the look-out man on board the *Belted Will*, deposed that about two in the morning of the 26th ult., he saw a small light, "like a steamer's light far away," and reported it, but got no answer. He turned round to see if anybody was behind him to pass the word along, but there was a great noise of men bawling, and he turned to look at the light again, and then saw a flash-light, where he had seen the other, and reported it again. No notice was taken of this, and he turned round once more to see what it was. He then saw the flash-light moved backwards and forwards, and as he was reporting a light for the third time, he heard the mate calling out to hard-a-starboard the helm. Between the time of his first seeing and reporting the small light and the helm being altered, perhaps two minutes had gone, and witness thought if the helm had been starboarded when he first called out, the boat would have been cleared.

Plaintiff cross-examined all those witnesses, but elicited nothing more material than the facts above given.

His HONOUR said that however it might have been on the evidence of the captain and chief officer, it was quite clear, after the evidence of the second officer, and more especially of the look-out, that the ship was in fault. The fact was the officer of the watch was superintending the crew in the work of securing the anchor, and, consequently, either the report of the look out was not heard or was not attended to. It was no use having a look-out, unless attention was paid to his reports, and the steps necessitated by them taken. In the present case, there could be no doubt that, if the order had been given to starboard on the first report of the look-out, the boat would have been easily cleared, considering it was after a delay of about two minutes, she was all but cleared. It was not necessary to go into the question whether the boat had a proper light or no, because the evidence showed she was seen from the ship in ample time to enable those on board to avoid a collision. He (his Honour) believed that there was a proper light, and if not was not seen by the captain and officers, it was not seen till the flare-up light was being waved about, and the effect of that would be to obscure the smaller lantern light. Judgment would therefore be entered for the plaintiff on the point of the collision being ascribable to the ship. As to the amount of damages,

Defendant said he had reason to think the amount claimed was exorbitant.

His HONOUR said he ought to have gone and examined the boat, in order to be prepared with his view of the amount of damages. He had now better take his carpenter, and make an examination of the boat, with the plaintiff. If they could agree on the amount themselves, there would be no necessity for coming to the Court again on that point.

Plaintiff and Macpherson asked for Tls. 10 per day each, as compensation for the detention of the boat, as they had been unable to pursue their avocation as pilots since the occurrence.

His HONOUR said he was not trying that question now, and could not entertain it at that moment.

Clippings.

A correspondent writes from San Francisco under date December 24th :—

"We are here in the midst of a mining stock excitement and crisis unparalleled I believe in the history of the world; the advance in the last six weeks, representing hundreds of millions of dollars, and based on genuine developements of such bodies of ore as the world has never heard of before."

———

One appointment deserves particular notice—that of Mr. Lister to the Post-Office. At all hands it is acknowledged that Mr. Mitchell has been a most excellent Postmaster, and his departure from us we shall sincerely regret. But Mr. Mitchell has essayed other offices—Magistrate, Auditor of several Companies, etc.,—and thrice in the last few years has, we believe, been upon a tour of inspection. During his absence at such times, and on all occasions, the control has devolved, as Assistant Postmaster upon Mr. S. Barff, who came out from England some six years ago, after probationary training at the London General Post-Office, through the influence of the Duke of Buckingham, upon the nomination of the then English Colonial Secretary, to fill the position he still holds. Ever attentive and indefatigable in his duties, he was led, by the countenance and recommendation of his superior, to look for recognition of his services, by promotion. Such has been withheld from him, and an entire stranger to the routine of a Post-Office appointed over his head. Mr. Lister we have not a word to say against. Our readers can judge for themselves how he has fulfilled the obligations of Coroner, Sheriff, &c., &c., &c., but this we do say, that it is poor encouragement indeed for a proficient man, striving his best, to be shelved in this manner. It must look as if he was not deserving of confidence and responsibility, and most certainly is calculated to damage his or any other individual's prospects in life. We trust the appointment of Mr. Lister is but temporary, and consider that for the mantle of Mr. Mitchell to fall upon Mr. Barff would, by the Colonists, be thought a graceful and deserved act by the Home Authorities. How to account for the selection of Mr. Lister, we know not, unless it is that at "Government House" *Kissing goes by favour!* We hope that it is not yet too late to move in the matter of this appointment, and should be pleased to note that a memorial in favour of Mr. Barff received a warm response, which, as the Governor is leaving for the old Country, he surely could not refuse to convey to Lord Carnarvon, upon whom, we presume, his first call will be made. Better still, and we suppose the finances of the Colony will admit of the trifling expense, for His Excellency to telegraph to His Lordship. It would, *palmam qui meruit ferat*, be one more proof that he has regarded the best interests of the Colony.—*Hongkong Times.*

COMMERCIAL INTELLIGENCE.

SHANGHAI, MARCH 10TH, 1875.

Arrivals from Europe, since 3rd instant, have been the steamship *Diomed* from Liverpool, and the London mails of 15th and 22nd January, per M. M. steamer *Hoogly* and P. & O. steamer *Avoca*.

Telegram.—That from London dated 5th March, quotes W. B. *Lead*, £23 per ton; *Iron*, £10 per ton; *Cotton* and *Cotton Goods*, unchanged. The export of plain *Cottons* to Shanghai, during last month, was reported as 19,000,000 yards.

PIECE GOODS.—Communication with Tientsin by sea has this year commenced about a week earlier than usual. The ice in the Peiho broke up on 25th ultimo, and the first steamer hence, the *Shanse*, reached Sze-Tchu-Lin on 2nd instant. She returned to this port yesterday morning, with advices a shade more hopeful than was expected. Sales of Common 7-lb. *T-Cloths* at Tls. 1.22 *a* 23 per piece, and of Dewhurst's best 64 Reed *White Shirtings* at Tls. 2.29, receding in the course of a few hours to Tls. 2.23 per piece, to arrive had been effected, and although business in *Grey Shirtings* had not been fairly resumed, there was a better feeling abroad, and the following are given as the probable opening rates, viz., *Globe* Chop Tls. 1.60 per piece; *Peacock* Tls. 1.61 *a* 1.62; *Two Lion* Tls. 1.66; *Double Cash* Tls. 1.56 per piece and so on. Common 7-lb. *T-Cloths*, *Drills* and *Jeans* were in good request, and "*Woollens* in strong "demand, especially *White Camlets*, for which almost any price can be obtained; Scarlet also wanted." The foreigners at Hankow have not been doing much by way of sales, and the quotations furnished in their latest letters compare unfavorably with what have been paid here by buyers for the river districts. Japan.—By last accounts the markets were very quiet. Nagasaki was the only place at which there was any business going on, and that was confined chiefly to the commoner makes of 8¼-lb. *Grey Shirtings*. These, however, were saleable in little lots at saving rates.

On this market there has been a large general trade in Piece Goods since this day week, and a strengthening tendency in the enquiry for several articles is apparent at the close.

Grey Shirtings.—Ordinary 7-lbs. have been in constant request at Tls. 1.36 *a* 1.39 per piece, but buyers have not been able to get many within that range. They have, however, secured a few of the better descriptions, paying for Mendel's *Horse and Jockey* Tls. 1.42, for *Red Pheasant* Tls. 1.43, and for Collie's *Spread Eagle* Tls. 1.45 per piece. Sales 12,000 pieces, and the lower qualities still wanted. 8¼-lbs.—Attention has been fixed on Dewhurst's *Eagle* principally, and there has also been a few transactions in good medium chops; but, until yesterday, when a faint enquiry sprang up, the market for the inferior classes was depressed. Holders of Dewhurst's *Eagle* chop have succeeded in establishing a further rise. On 6th instant, favorite letters realised Tls. 1.93 per piece, and on the 8th Tls. 1.93½ was refused for D. A. An improvement is also noticeable in the offers for Mendel's *Hand and Branch* which is worth again Tls. 1.96 *a* 1.97 per piece, while other passable chops, such as *Dog*, *Collie's Lion on Bale*, *&c.*, have found merchants at Tls. 1.70 *a* 1.74 per piece. A speculative parcel of Dewhurst's *Red Pheasant* has been on offer for some days, however, at Tls. 1.79 per piece and as yet no buyer has turned up. Sales 48,000 pieces. *Heavy Shirtings*.—A strong demand has prevailed throughout the week. Every piece of cloth in stock and most of the floating cargoes have been bought up, while buyers' operations have extended to Dewhurst's *Eagle* not yet shipped from home. A sale of the last character comprising 5,000 pieces at Tls. 2.65 was effected as last mail was leaving, and a like quantity to arrive per steamship *Nestor* was booked on 8th instant at Tls. 2.70 per piece. For *Tunsin* (Dewhurst's) Eagle, the retail figure is over Tls. 2.90 per piece. Collie's *Spread Eagle* has also been settled for distant arrival, the price being Tls. 2.62; and other chops have been disposed of on terms equally favorable to the sellers. Total business in *Heavy Shirtings* estimated at over 35,000 pieces.

White Shirtings.—The enquiry for 56 *a* 60 Reeds has hardened a little, and rather more business in them has been done at quotations. There have also been some transactions in 64 Reeds at a slight improvement on former prices. Sales, 7,000 pieces.

T-Cloths.—8-lbs. 36 inch of the ordinary classes have been much sought after, and some chops have improved in value 2 *a* 3 c. per piece. The total of the week's sales is very nearly 30,000 pieces. The demand for Common 6-lbs. and 7-lbs. has also continued, and for some of Collie's *Lion-on-bale* quality, the dealers have given Tls. 1.28 per piece. The recent arrivals have not brought supplies of these low counts, and in the absence of stocks, or business, quotations are nominal.—Ordinary Mexican kinds have likewise received much notice, but holders, as a rule, demand higher prices than buyers are willing to give, and hence business in them has been smaller than it would have otherwise been. A few thousand pieces of the fine to finest makes have changed hands, and a sale of 5,000 pieces of *Chop Dollars* at Tls. 1.53 per piece is reported on the market. Estimated sales of 6-lbs. and 7-lbs. *T-Cloths*—47,000 pieces.

Drills, Jeans, and Sheetings.—For each of these fabrics some enquiry has prevailed, and trifling sales in them have taken place. 15-lbs. *English Drills.*—*Dragon*—have been settled to extent of 2,500 pieces at Tls. 2.36 *a* 2.39 per piece. Of *Jeans*, the settlements reach nearly 6,000 pieces at Tls. 1.83 *a* 1.88 per piece, and *Sheetings*—English 15-lbs.—figure in the market book at Tls. 2.95 for 1,500 pieces. The probability is that a larger trade in *Drills* and *Jeans* will now be done—the news from Tientsin regarding both being considered favorable. As for *Sheetings*, there are no more in stock.

Fancy Cottons.—*Handkerchiefs* have again been largely dealt in at Tls. 0.52 per dozen, and a stronger market for *Dimities* has resulted in a few cents advance. There have been sales of *Irishes* also at improved prices, and *Chintzes* have been more frequently asked for at rather better rates. The sales of *Fancies* reported are as follows:—*Dimities*, 2,000 pieces at Tls. 1.35 *a* 1.55 per piece. *Handkerchiefs*, 14,000 doz. at Tls. 0.49 *a* 0.53 per doz. *Muslins* or *Lawns*, 500 pieces at Tls. 0.90 per piece. *Irish Linens*, 500 pieces at Tls. 3.20 per piece, and *Chintzes*, assorted, 1,250 pieces at Tls. 1.30 *a* 1.35 per piece.

Woollens.—The business of the week comprises—1,380 pieces *Medium Cloths* at Tls. 1.00 *a* 1.30 per yard; 1,100 pieces of *Camlets*, assorted, principally C.P.H., at Tls. 12.50 for black, and Tls. 13.25 *a* 14.00 per piece. 250 pieces of H.D.B., plain black *Lustres*, at Tls. 4.00 per piece; 1,000 pieces of black *Lastings* at Tls. 10.25 *a* 10.45 per piece; and 1,300 pieces of *Figured Orleans* at Tls. 2.89 *a* 3.20 per piece. *Spanish Stripes* are light in stock, and a slight speculative demand that has lately been making itself felt, has not resulted in any sales, offers being too low. In *Long Ells* there has been no movement.

METALS.—*Nailrod Iron.*—Fair settlements are again reported of "M.M." and "Belgian" at Tls. 2.85 *a* 2.90 and Tls. 2.60 per picul respectively, importers being willing sellers at these rates. Arrivals of best Iron continue light, and prices remain firm, but common qualities are in over-supply and quotations are rather weak. *Lead.*—The additional decline of 7s. 6d. per ton has not strengthened the tone of our market, but at the same time foreign holders thus far have taken but little regard of the lower rates telegraphed from home, and few of them care to sell hard cargo at Tls. 6.10 per picul, which is the rate established for L. B. by resales amongst the natives. Transactions to arrive at Tls. 6.00 per picul for L. B. on foreign account have been entered into, and there are to-day rumours of business for delivery two months hence at lower rates. *Tin.*—The quietness prevailing at the close of last week has continued and quotations upon a very limited businss have fallen 2 to 3 mace per picul. *Copper.*—Enquiry has entirely subsided. Stocks of best *Copper* are exhausted, and quotations for *Ore* are purely nominal.

COTTON.—A smaller business has to be recorded this week, the delivering of former settlements having engaged most attention. Quotations for low and fair staples are nominally the same as those given last week, but prices for the lowest, or *refuse*, have gone up in consequence of orders from YOKOHAMA.

EXCHANGE.—Rates are again firmer, one of the Banks having sold a fair amount at 5s. 9¼d. At the close, however, the best rate quoted is 5s. 9⅛d. In Private paper there is not much doing. The business done has been at 5s. 9⅜d. *a* 5s. 9½d. for Credits, and 5s. 9⅝d, for Documents. On India, business has been done at Rs. 306½ on Bombay, and Rs. 307½ on Calcutta. On Hongkong, 27 per cent. is offered by the Banks without meeting much demand.

To Great Britain—Black	Excess	6,374,704	lbs.
,, ,, —Green	Excess	1,466,624	,,
To United States—Black	Excess	1,042,788	,,
,, —Green	Deficiency	3,294,871	,,

Shipments to date have gone forward as under :—

To Great Britain (per Steamer)	51,684,532	lbs.
,, ,, (per Sailing Vessel)	24,179,680	,,
To America (per Steamer)	11,384,342	,,
,, (per Sailing Vessel)	7,242,836	,,

Black.—There is nothing to report.

Green.—There has been a more general enquiry since our last, and prices for the finer qualities of country Teas are now firm at about last mail's quotations ; for common chops prices have been less firm, and some purchases have been effected at lower rates than have been current for many years.

The Stock is now moderate and is being rapidly reduced, Teas of good quality especially being scarce.

				Against 1874.

SILK.—By last public telegrams the London silk market is reported as "Flat and little doing." Fair No. 5 Tsatlee is quoted at 12/6 ; Hangchow Tsatlee at 12/6 ; and inferior Kahing Taysaams at 11/6 per lb. ; and the deliveries of Chinas to the 9th instant, are given as 1,000 bales.

The M. M. steamer *Ava* which left on the 4th instant, took 933 bales, of which 467 were for London, 455 for the Continent, and 11 for the Coast, and the following prices were paid for well known chops.

	Per picul.	Per lb.	Per kilo.
Koo-fong-sing Chop No. 3 Tsatlee	Tls. 415	20s. 6d.	Frs. 57.30
Kukee's "Chin Jan" and "Kin Hock" Tsat.	Tls. 340 & 310	16s. 10d. & 15s. 4d.	Frs. 47.10 and 43.05
Pagoda Chop No. 2 Tsatlee Beautiful Woman Chop No. 2 Tsatlee Buffalo Chop No. 2 Tsatlee	Tls. 325	16s. 1d.	Frs. 45.10
Blue and Yellow Elephant	Tls. 325 & 300	16s. 1d. & 14s. 11d.	Frs. 45.10 and 41.70
Red Peacock	Tls. 320	15s. 10d.	Frs. 44.40
Bird Chop "King-ling"	Tls. 307½	15s. 3d.	Frs. 42.52

Settlements this week reach 900 bales, giving a total of 1,700 for the fortnight, amongst which the most notable purchases are :—Chick Chop, Nos. 3, 3½ & 4 Tsatlee at Tls. 417½, 397½, 377½ per picul ; Pang-e-tai's, "Ting-how" and

"Tay-or" Tsatlee, at Tls. 332½, and 312½ per picul; Beautiful Woman, No. 2 Tsatlee, at Tls. 322½ per picul; Red Peacock, at Tls. 320 per picul; Fatmow's chop, No. 2 Haining, at Tls. 312.

A few purchases of re-reeled Tsatlees are reported for the American market, at prices showing *a slight advance*, on those paid for last mail.

Arrivals continue very insignificant, and the unsold stock is reduced to 2,800 bales.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods for the week ending 8th March, 1875 compiled from the "Customs Daily Returns," Nos. 46 @ 51, both numbers inclusive.

* Exclusive of import cargoes ex *Sunda, Corea, Egeria, Glenartney, Belted Will, Glamis Castle, Foochow, Avoca, Hoogly, Diomed,* several Coasters, and of sundry re-exports.

COMMERCIAL POSTSCRIPT.

March 11, 1875.

Arrivals.—March 9th, American barque *James S. Stone*, from Newcastle, N.S.W., and British ship *Her Royal Highness*, from Singapore; 9th, British s.v. *Dilpussund*, from Sydney.

Departures.—None.

The English mail steamer *Sunda* takes about 680 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 9⅛d. First-class Credits to Bank, 5s. 9¾d. First-class to Private buyers 5s. 9⅞d. *a* 5s. 9½d. Private and Documentary, 5s. 9⅝d. *a* 5s. 10d. On Paris, Bank, Frs. 7.30. Private, Frs. 7.35 *a* 7.37½. On India—Bombay Bank demand, Rs. 306½. Calcutta Bank, Rs. 307½ *a* 308. On Hongkong, Bank Bills, demand, 27⅛ per cent. discount. Private, 15 days' sight, 27⅝. Gold Bars, Tls. 172.00. Bar Silver, Sh. Tls. 111.20 Mexican dollars, Sh. Tls. 73.175 per 100. Carolus dollars, Sh. Tls. 80.50 per 100. Copper cash, 1,540 per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

S. S. N. Co.—There has been a considerable business done since our last report at rapidly improving rates. The market opening at Tls. 70, and closing with sales at Tls. 83 for cash, and Tls. 84½ for 30th April.

H. & S. Bank.—The improvement noted in our last, continued till 5th instant, when the rate touched 10 per cent. *dis.* and Exchange 73½; after that rate the demand fell off, and quotations were nominal till yesterday, when a fair business was done at 16 per cent. *dis.* and Exchange 72½. There is now some enquiry at better rates.

Fire Insurance Shares.—*Chinas* and *Victorias* have been in fair demand, and rates have improved to $133 for the former, and $124 for the latter, but little business has transpired owing to the scarcity of shares. There has been no business reported in *Hongkongs*, which are obtainable at $490.

Marine Insurance.—No business reported, all shares firm at quotations.

Hongkew Wharf Co.—Pending consideration of the proposed amalgamation with Jardine's Wharves, there has been very little enquiry for shares. Sales were made yesterday at par ex. div.

The Weather continued fine till Sunday, when rain began to fall, and it has since been damp and warm. The thermometer has fluctuated between 33 and 70, the maximum having been attained on Saturday. It has since fallen to (yesterday) 55.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, MAR. 18, 1875.

RETROSPECT OF 1874.

General. It would be an omission not to note the marked recognition which the Chinese have twice shown, during the year, of the growing influence of the Press. The first occasion was in connection with the famous Yang yeh-liu trial. Our readers will remember the brutal torture to which this man was subjected by the Che-hsien because he, an actor, dared to marry a Canton lady. Cantonese society was outraged, and the Che-hsien, also a Canton man, lent his willing aid to vindicate the proprieties. The girl was flogged for presuming to say she liked her husband. The husband was tortured to make him confess he had abducted his wife. It is unnecessary to recapitulate the tortures he was subjected to; nor to say that he was eventually sentenced to imprisonment and banishment. How could one actor resist the influence of the Cantonese Guild, backed by the sympathy and power of the Che hsien! Suffice it to say that the whole procedure excited the indignation of the Northern Chinese, and that the *Shunpao* frankly and fearlessly echoed their opinion. The Che-hsien was furious at its strictures, and the Cantonmen threatened demolition of its office as among the mildest punishments to be incurred. Perhaps a conviction that any such effort would meet a dangerous opposition from foreigners checked their ardour. An attempt was made, instead, to bring to bear on the Chinese writers of the *Shunpao*, the same pressure which had crushed the unhappy actor. But the editor of the *Shunpao* is an Englishman, and the English Consul threw the ægis of the Treaty over his employés. Mr Major was responsible. If cause of complaint existed, they might sue Mr Major in an English Court! The Cantonese wisely spared themselves the waste of time, and sought revenge in starting a rival paper, which was to extinguish the *Shunpao* utterly. The new journal, the *Wei-pao*, has distinguished itself by an insolent tone towards Foreigners, which appears to hurt them about as badly as its competition has hurt the *Shunpao;* and, we believe, the latter has rather benefitted by the rivalry.

The second instance to which we have alluded, of acknowledgment of newspaper influence, occurred in February (*N.-C. Herald*, Feb. 12); when the Chinese merchants of Shanghai advertised, in the *Shunpao*, a petition to the Taotai against the extravagant Li-kin taxation, explaining that they did so in order that "the subject might gain publicity far and near." The petition itself is a striking instance of the discontent prevalent; and the recognition of the force of public opinion implied by the publication of the memorial, is noteworthy.

In connection with this subject, we may mention that a Reading-Room and Polytechnic Institution for Chinese has been got up, in Shanghai, and promises to have considerable success. The conception is, we believe, Mr Medhurst's, and his energetic efforts to carry out the idea have been ably seconded by the committee.

A similar energy has also been thrown with success into the working of the Foreign Library. This venerable institution, which was almost condemned as moribund at the beginning of the year, has been revived and re-invigorated, and launched, apparently on a new lease of life, greatly through the exertions of the Honorary Secretary, Mr A. J. How.

The Museum, which we have so often recommended as an addition to the Library, has become an accomplished fact, and promises to prove a great success. The numerous foreign sportsmen who make so frequent up-country excursions during the Shanghai winter, have contributed largely; and an interesting collection is being rapidly arranged.

From a Municipal point of view, the year has been quiet; without inaugurating any startling policy, the present Council have administered our affairs

carefully and well. They have at last taken up the question of widening roads, on the importance of which we have so often insisted. Several improvements in this respect have been made, and we trust the policy will be energetically followed up.

Two important points were raised at the Ratepayers' annual meeting, and seem to have had less attention. The need for revision of the Land Regulations has been often urged, and is generally admitted. A committee was appointed for the purpose, in 1873, but did nothing. Another was appointed in May last, but seems to have been equally inactive during the past year. We have often said that the form of revision that is chiefly needed, is entire re-writing. Additions are wanted to the present code; but its great fault is obscurity, resulting from the patchwork manner in which it was compiled, altered and amended in Committee and at public meetings. The groundwork is good, if the meaning were clearly expressed; whatever additions are needed may be well noted in Committee; but the only way to attain to a satisfactory code, will be by handing over the whole thing to a man who can write lucid English, to remodel. The second matter to which we have referred, is proxy-voting. The principal that ratepayers who are present in Shanghai, but do not care to attend Ratepayers' annual meetings, may still be represented by proxy, has been objected to from the beginning, and has been found to work badly in practice. It is right that absent land-owners, whose interests are permanent, should be represented by their attorney; but it is not right that a man who votes in virtue of a tenancy—whose interests are essentially present—should have the same privilege. A man who is in Shanghai should be required to register his vote personally. A resolution in favour of this view was passed by a large majority at the last Ratepayers' meeting, and an able letter was subsequently addressed by Mr Carter to the Treaty Consuls, setting forth the reasons for the resolution he had proposed. We have not yet heard that the Treaty Consuls have taken any action in the matter.

Another Municipal matter which has been much discussed, is the annoying presence of the Opium Guild runners in the Settlements. We have no sympathy with the opium trade, and would not interpose a word to prevent its extermination; but the exaction of petty taxes on a few balls of opium as they are moved from hulks to opium shops neither will, nor is intended to have, any deterrent effect; it is a simple case of petty exaction; and it should be our policy to oppose stringently the levy of these petty taxes on trade within Municipal limits. Opium is not the only article so harrassed; and to admit opium tax-gatherers within our limits, is to admit an intrusion and an organisation that cannot be too strongly condemned on principle. The limits of the Port should be at least identified with those of the Settlement. Foreign goods, of whatever description, do not pay import duty for the mere privilege of coming up the river; additional dues cannot in reason be exacted for the privilege of passing over 100 yards of road. Whatever right the Chinese may have to tax opium in its subsequent adventures, that right can hardly begin in the port itself—or the tariff rate had better be struck out of the Treaty. However, we are not writing to defend opium, but to protest against the innumerable exactions of which the Opium Guild runners are a type; and which, we contend, should not be allowed in our midst.

The Law business during the year has been considerable, as our records will show. But, perhaps, the only case of historical interest is the action entered by the Race Club against the Recreation Fund Trustees, to prevent the erection by the latter of any buildings within the interior of the Course. In an elaborate judgment (*N.-C. Herald*, June 20), which had the sympathy of the community, Sir Edmund Hornby sustained the Race Club in their objection.

Several new buildings have been erected during the past year—notably the handsome structure of the Hongkong and Shanghai Bank, which is nearly completed, on the site of Messrs. Turner and Co.'s old hong, on the Bund; and a new Chinese Hospital, which has been constructed on the site of the old one, in Shantung Road.

The usual talk has taken place about a Sanitarium, with the usual result. We seem to be no nearer having one now than when Messrs. Hanbury, Coghill, Henderson, and Cunningham first went to Pootoo in 1863, in search of a suitable site. As a matter of fact, there are any number of suitable sites. The Saddles, Pootoo, Chusan, would all answer the purpose well. But the thing will never be settled by committee reports. It could be settled at once by any person or any company who would establish an hotel on either of the islands, and make arrangements for transport. We suspect the real hitch is, that there is not sufficient demand to make such an establishment pay. The tide of summer emigration has set towards Chefoo; and an island hotel, depending as it would entirely on summer visitors, could not exist on half-support.

Another matter of prime importance, in which we regret that no steps have been taken, is that of harbour conservation. We pointed out last year, in protesting against the construction of the C. N. Co.'s wharf off the French Bund, how the course of a sluggish river had been interfered with, to the serious detriment of its channel; and how usefully a dredger could be employed in conserving the whole seaward course of the Hwangpoo, as well as dredging the Woosung bar. Not only, however, has the completion of this wharf been allowed, but no step has yet been taken towards defining the Bund line, as a protection against future encroachment, or applying machinery for the conservation of a deteriorating channel. What we think has to be realised, is that our river, although draining a large extent of country, has a force of current so slight as hardly to overcome any adventitious obstacle: and that it needs mechanical assistance to enable it to hold its own in the face of the mechanical and natural difficulties that have been placed, and are often arising, in its way.

Various changes have taken place in the fortunes of the steamer companies running from this port. The year has witnessed the demise of the U. S. N., which [illegible] better have wound up its affairs [illegible] adventured on the coast, after it [illegible] been bought off the Yangtze. The new line which had been started to compete with the P. M. S. Co. for the trade between China and America, has also died, and its vessels are being run [illegible] its older rival. The China Merchants' Steamer Company thrives by the aid of its great subsidy; but the "Shanghai Steam" and "China Coast" Navigation Companies seem to hold their own against it notwithstanding, on the Northern line. On the River, it has not yet made any serious invasion; but the two great companies which now have the Yangtze virtually to themselves, may expect it to encroach more and more, and to cut down ordinary freights with one hand, while carrying "tribute-rice" at inflated rates with the other.

Summary of News.

The American mail of the 1st February arrived on the 13th inst., by the P. M. str. *Nevada*.

The French mail of the 29th January arrived yesterday by the M. M. str. *Iraouaddy*.

A mail will leave to-morrow for Europe, by the M. M. str. *Hoogly*.

The following Reuter's telegrams have been received during the week:—

The cargo of the *Ulysses* has been landed damaged.

The following is the arrangement of the new French Ministry:—Interior—Buffet; Justice—Dufaure; Finance—Say; Instruction—Wallon; Commerce—Meaux; Others unchanged.

The Emperor of Germany is ill.

The stoppage of Messrs. J. C. Im Thurn & Co., of East India Avenue, is announced. The liabilities are stated to be two millions.

A meeting of shareholders in the China Coast Steam Navigation Co. was held on Friday. The accounts showed a profit of Tls. 61,349. A dividend has been paid at the rate of 10 per cent., and Tls. 42,599 carried to Reserve.—Messrs How, Wilson, and Tong-king-sing were re-elected directors.—A change, providing for the rendering of the accounts yearly instead of half-yearly, was made in the deed of settlement.

The annual meeting of shareholders in the S. S. N. Co. was held on Saturday. The report and accounts showed a net profit on the year's working, of Tls. 183,372; be[illegible] securities. A dividend has been paid at the rate of 7 per cent., absorbing Tls. 157,500; Tls. 40,500 have been returned to contributors, and Tls. 27,323 are carried to reserve. Material changes have been made in the figures under Capital Account the Company's property having been written up to a value nearer its real worth, and the steamers having been written down undoubtedly below theirs.

The A. D. C. gave their third performance for the season at the Lyceum, on Friday. The pieces selected were T. J. Williams' comedietta "I've written to Brown," and George Colman's comedy, "The Heir at Law." The performance was an undoubted success, and attracted a full house.—[illegible]

was repeated on Tuesday, and was again well attended.

Saint Patrick's day was celebrated by a dinner at the Club last evening. About five-and-twenty Irishmen assembled and, with characteristic hospitality, entertained an equal number of guests. The room was tastefully decorated with evergreens and shillelaghs, and the table spread with shamrock. Dr. Jamieson occupied the chair, supported by Mr. J. I. Miller as Vice. A very pleasant evening was spent, and song and toast were still rapidly succeeding each other, under the seductive influence of the punch, when we left at 1.30 a.m.

Another Paper Hunt Handicap was run on Saturday afternoon, twice round the Steeple Chase course. It was won by Mr. E. H. Gore-Booth, on *Furore*, Mr. Morriss on *Southdown* coming in second. The Grand Stand was thrown open to enable ladies to view the race, and was largely availed of.

A rather curious claim for brokerage, brought by "Mr. R. H. Gore-Booth *v.* Little and Company," has been tried before the Supreme Court. It was an action to recover Tls. 3,500, for work done and services performed, as broker, in the sale of a steamer to the C.M.S.S. Company; the said sale however having been never completed. We give, elsewhere a full report of the proceedings. It will be seen that, while deciding against the Plaintiff, the Judge held there was sufficient doubt to justify the plaintiff in bringing his action, and decreed therefore that each party should pay his own costs.

The Court of the United States Consulate-General was again occupied on Tuesday, from ten in the morning until six in the evening, with the case "Municipal Council *v.* W. H. Fogg." Judgment was reserved.

A correspondent calls attention, in a very practical letter, to the question of water supply. The need for steps being taken to provide a supply of pure water has been urged often enough, and we lately referred to a scheme which was under consideration, for getting up a company to erect the necessary works at Loonghwa. Our correspondent objects that this is too expensive, and suggests a plan for raising water from the Soochow creek. The question seems to be one of money. If the Loonghwa scheme could be started, it would be preferable, both as regards completeness and quality of water; and it must not be overlooked that the pipes would pass through the city and suburbs, in which a great quantity of water could be sold, from fonts to the erection of which the authorities are, we believe, favourable. If the necessary capital cannot be raised, the Soochow creek plan would be a practicable alternative.

As the question of Water supply is now under discussion, Mr. H. Evans has shown us a plan of a scheme which he conceived some time ago, for supplying the settlement with water from the Defence Creek. He would convert the whole of this into a reservoir. 800 ft. (A) of the space nearest the Soochow creek, to hold water admitted at a certain stage of the tide; the water to be pumped from this into a raised reservoir and filter, which would occupy the adjacent sections (B & C). The water so filtered would run out into the next (800 ft.) section (D)—which would form the supply tank of pure water. A steam engine to pump the water from the first section into the filter; and a second engine to pump the pure water through an arched pipe 150 ft. high, so as to create the necessary head for forcing a supply into the Settlement.—There would still remain 800 ft. of the Defence creek, which could be utilised as a swimming bath, to be supplied by conduit pipes from A. The estimated capacity of A (the first reservoir) D (the pure water tank), and E (the swimming bath), is each 1,016,800 gallons; while the filtering capacity of C is estimated at 306,600 gallons in 24 hours. —A further suggestion is the construction of sluice pipes in A, for the purpose of flooding drains and providing a supply of water in case of fire.—Suggestions are always valuable when a project is under discussion, and we are glad to give publicity to that which Mr. Evans has explained to us.

H. E. the Danish Minister arrived from the North on Tuesday. General Raasloff will stay a few weeks in Shanghai, and then return to Peking.

The intention to close the Shanghai Branch of the Deutsche Bank was known here some weeks ago, and instructions were received yesterday, by the *Iraouaddy*, to close the establishment by the 30th of June next.

H. M. S. *Dwarf* will leave Shanghai, on Sunday morning next, for a cruise to Chefoo and Tientsin.

Reuter's telegram about the *Ulysses* is slightly more disconnected than that about "the missing boat of the *Hongkong*." The courtesy of the agents enabled us to explain, a week ago, what had happened to the *Ulysses*, so Reuter's effusion becomes intelligible; otherwise—so far as it is concerned—the *Ulysses* might be just wrecked in the Channel.

Some of our readers may remember that a pair of crows selected the P. & O. flag staff, last year, for their nest. They were not disturbed; and it is curious to note that they have come back and begun to build again, this year, in the same place.

At the sale by auction at the Horse Bazaar on Tuesday, the whole (25) of the ponies offered were sold, at prices ranging from Tls. 35, 50, 75, 90 up to Tls. 120. The ponies were a good-looking lot, and the bidding was spirited. Two ponies realised the top price.

The Peking *Gazette* of the 15th-16th February, contains an interesting batch of edicts in regard to Formosan affairs. It is rather amusing to find military rewards given in connexion with the late difficulty; and rather remarkable to find the famous Koxinga dragged again into notice, and canonised.

The Peking *Gazette* of the 23rd February describes the programme observed on the occasion of the young Emperor's accession. He was first to offer homage before the remains of the late emperor, then receive homage in the Chung-ho throne-hall, and afterwards pass to the Tai-ho throne-hall to promulgate the manifesto of accession.

The *Gazette* of the 24th February contains an edict on the subject of finance, which would be satisfactory, if we could hope it will take effect. The Board of Revenue is directed to compute the total amount of receipts in all the provinces, from the land and salt taxes, rice-collectorates, and also likin taxes, and sale of titles and offices. This having been done, expenditure is to be so ordered as to come within the limits of income. A return of all likin tax stations is also to be required from the Governors of Provinces.—It is evident from all the memorials and edicts that have been lately appearing, on this subject, that the attention of the government is being seriously called to the state of the national finances. Whether the will and the power exist, to effect reform and retrenchment, remains to be seen.—One paragraph in the edict creates a suspicion that it is pure verbiage. A return to the old system and prices is to be effected, in the matter of war *matériel*. In its full meaning, this would imply abandoning arsenals and a return to jingals and Chinese powder—which will not happen. If retrenchment had been spoken of simply, it would have implied a better appreciation of actual facts.

We publish on another page an interesting narrative of an overland journey from Newchwang to Peking. It would seem that floods in Chihli have been more destructive than even robbers in Manchuria. The picture of the two provinces is, on the whole, far from brilliant.

We hear that the Bund in front of the British Concession at CHINKIANG has partially given way, in consequence of the deepening of the river in front. The bunding in front of the Custom house gave way some few weeks since, and was partially restored by the native authorities in a haphazard sort of way. We learn that the late wet weather has been too much for this also, and that the new erection, only finished within the last few days, has again collapsed.—Messrs. Spencer and Wolff write, 15th instant:—Imports of cotton goods during the past week have been rather heavy, and the demand has scarcely been equal to the supply; we cannot, however, complain considering the unsettled state of the weather. The enquiry for the better marks of 8¼-lbs. *Grey Shirtings* has shewn an improvement, while Common chops do not demand so much attention. 7-lbs. *T-Cloths* are rather quiet at quotations. *Metals*—dull.

The *Daily Press* has some particulars about the late disaster to Chinese troops in FORMOSA. The origin of the trouble seems to have been the murder of two Chinese officers in January. 200 men started to punish the village in the neighbourhood of which this happened. They found the village almost deserted, and gratified themselves by burning it and massacring the old women and children [illegible]. They, however, captured an [illegible] on the way back, and killed half their number, including their leader.

Editorial Selections.

THE CHINESE LOAN.

A humourous picture was drawn in an English paper, at the time of the first Turkish loan, of the delight and astonishment of the Mussulman at finding such a mine of wealth in the easy confidence of the Giaour. It was only in 1854, at the time of the Crimean war, that the first Turkish loan was contracted—under, we believe, the joint guarantee of England and France; and the subsequent course of Turkish finance has fully justified the satire we have quoted. In 1858, 1862, 1863, twice in 1865, in 1869, 1871, and 1873, the Turkish Government has appeared again and again as a borrower, in the European market. What can be simpler? they have only to ask, and the money comes. True they have now to pay the high rate (for Europe) of 11½ per cent; but they can borrow afresh if they go in arrear. Ministers do not hold office long in Constantinople. Each one says *après moi le deluge*, and gives the ball another roll. There must be a limit; it will reach a size one day, when all the strength of the Finance Department will fail to give it another turn, and it will be very apt then to roll back and crush those who make the effort; but in the meantime it moves with comparative ease. We should be sorry to think China will, twenty years hence, have landed herself in the same financial slough; and we have recalled the experience of Turkey chiefly because we imagine the feeling at Constantinople in 1854, is paralleled twenty years later at Peking. What a relief must it be to a Government embarrassed by the legacies of foreign and civil wars, its revenue checked by oppressive taxation, and its resources drained by unprofitable expeditions, to find an outlet from embarrassment in the wealth and generosity of the Barbarian. Was it embarrassed by the result of the Formosa muddle? A loan of a million sterling at once smoothed the difficulty. Do the troops in the North-west ask for pay and provisions as an inducement to march on Turkestan? A loan of three million taels will send them on their way rejoicing. And if it should occur to Li Hung-chang that another three millions would be usefully spent in armour-plating the Taku forts, no doubt the money could be at once obtained. The sums are small, in comparison with European loans, but they must be a great relief to embarrassed financiers; and their very smallness suggests how real must be that embarrassment. China is not like other countries, where a man's money is recognised as his own, and he can only be made to contribute to the wants of the State by taxes imposed with popular sanction, or by loan offered in the open market. The paternal Government of China claims a profound interest in the property of its subjects. The only limit to taxation is the rebellion of the taxed, or the attainment of a point at which taxation chokes the sources of revenue. And do not memorials in the Peking Gazette indicate that each limit has been attained, in several provinces of the Empire? And does not the resort for money to extraneous sources seem to confirm the tale? Besides, what could be more simple? Foreigners supply both principal and interest. Foreigners lend the money, and taxation on Foreign Goods supplies the necessary interest. We can imagine this is exactly the specious way in which the transaction commends itself to the mental vision of Chinese statesmen. That taxation on trade impedes trade, and thereby hinders the prosperity of their people, is a fact of which they are ignorant or careless. And, really, a loan of two millions sterling would be a very trifle to such a country as China, if it were not for the indications we have noticed, of grave financial embarrassment. The resources of the empire are enormous, if only they were allowed to be developed. Its mineral wealth and commercial capabilities are practically unlimited, if only it were intelligently governed. That such a country should be reduced to borrowing so paltry a sum, is the strongest possible commentary on the incapacity of a Government which we persist in treating as an equal. Properly governed, China could support a great debt with ease, and it would be an intelligent act on the part of her Rulers, to borrow largely for the purpose of developing her resources. Any movement in this direction would facilitate her operations by the greater financial promise it would open up, and by the greater confidence it would give in a Government that showed an intelligent appreciation of its duties. But loans contracted to replace money squandered on Arsenals, and to supply funds for profitless expeditions, only go to increase embarrassments. Already there is a rumour of a third loan, to be brought out on the London market, and we should not be surprised at any moment to hear the report confirmed. One good effect may possibly ensue. Attention will be drawn to China. People will want to know what she is doing with this money; and may urge their Rulers to demand some guarantee in the shape of progress, for the money which she asks them to lend. If the result of these loans should be to impart some vigour to our relations with Peking, the gain will be great to both foreigners and Chinese.

II.

If the rumour is true, that a new Chinese Loan is to be placed on the London market, it will be interesting to see at what rate it can be floated, as compared with the two loans contracted by Japan. The small portion offered in London, of the loan made lately through the Hongkong Bank, hardly affords a criterion. Otherwise, the public seem to have fixed the interest in that case at a little over 8 per cent. The difference between this rate and that of the more recent loan from the Oriental Bank, which is reported to be 10½, seems at a first glance to be startling; but it is, we believe, as regards the rate paid by the Chinese Government, more apparent than real. The high rate of exchange which was charged by the Hongkong and Shanghai Bank fully covers the difference between 8 and 10½%, as a total charge on the loan. What we have now to do with, however, is the market value of the stock, and it is curious to note that the Chinese 8 per cent. stock is quoted here at exactly the same rate which the Japanese 7 per cent. stock commands in the London market. Unless, therefore, we assume that a higher value will be eventually put upon the Chinese stock in London than it commands here, we may take it that Japanese credit is 1 per cent. better than the Chinese, in the money market. The comparison is hardly flattering to China, and it remains to be seen how her apparent inclination to increase her debt will affect her future credit. She is actually paying now, at the outset of her career, very nearly as much (10½ p. c.) as Turkey, which is thought to be nearing the end of its financial tether. The public are apparently willing, as yet, to let her have money more cheaply. But the loans are thus far secured on the revenue of the Foreign Customs, and if the Government goes on much longer at the present rate and in its present mood, all available receipts from this source will be soon completely pledged; and we may be sure that, this limit once reached, a much higher rate of interest would be at once required. It would not be a little strange, if the result of the so-called patriotic agitation in China should be to turn all the direct income derived from duties on foreign trade, back into the pockets of the foreigner himself.

At the time of the threatened difficulty with Japan, the Chinese professed to look down with contempt on the little State which was galling them. Rightly judging money to be the sinews of war, it seemed surprising that a country undeniably possessing considerable financial resources, should not be able to make a better show in that transaction than did their own. We have recently shown what have been the true reasons of the collapse of China, in both its military and financial aspects. In neither has she that confidence in herself without which a nation cannot be prosperous. Rudely disturbed in its dreams of universal pre-eminence, the Chinese Government discovered that its troops, armed with the antiquated weapons of the Middle Ages, were no match against European levies. It saw the necessity of reform, but commenced the reform at the wrong end. It endeavoured to imitate the external aspect of those forces to which it had to succumb, but left out the fundamental principles of action by which such forces are regulated. So in finance. Finding that its revenues from trade, in place of displaying the elasticity which the return of the Empire to a state of internal tranquillity would have naturally produced, were actually falling off, it took the course, not of alleviating the incidence of those taxes, but of endeavouring to increase their amount. Warnings have been given from all quarters, of the effect of those measures. One Province after another has protested against the manner in which it has been forced to increase the burdens upon the resources of the people. To all this, there has been but the one stereotyped reply, desiring the provincial officers to see that their subordinates do not squeeze. As it is necessary, in order to meet the demands upon them, that the higher officials should exact as much as they possibly can from those below them, and those in return have recourse to their own inferiors for a similar purpose,

—it needs no special prescience to foretel the result. We do not mean to say that there are no well-meaning officials in China. The occasional able and straightforward memorials which appear in the Peking *Gazette*, are sufficient proof to the contrary. The best of men, however, works with the millstone of an utterly corrupt system round his neck, and in some respects, the higher the office, the more corrupt does the system seem to become. In nothing does this position of affairs appear in more unenviable light, than in the rescripts to the memorials which from time to time appear in the Peking *Gazette*. Possibly an utter want of power to grasp the true bearings of the subjects submitted, is at the bottom of the unmeaning verbiage with which important memorials are quietly shelved. If a memorial be of too important a nature to be thus quietly put to one side, the device, not unknown indeed in other quarters, is adopted of referring it to one or other of the Boards. Thus it is, that the memorial of Hu Ting-kwei, to which we referred some time ago, is delegated to the Board of Revenue. Hu, our readers are aware, requested that the revenue and expenditure of the various Provinces should be stringently audited, and that a travelling commission to enquire into abuses be formed. We doubt if the Board of Revenue, or the Government in its present state of comparative feebleness, could give effect to such a sweeping proposition. It could, however, do much. At all events, it could commence reforms near home; but there is no symptom of the purpose or the will to do even this.

THE MONEY MARKET.

A HIGH rate of interest is, in many men's minds, considered indicative of a crisis in trade; and that a high rate is generally a resultant of such a state of affairs cannot, in the face of the panics which within the century have interrupted the even flow of commerce, be denied. It would, however, be nearer the truth to state that a brisk demand for money indicates a wholesome condition of trade; and as this brisk demand has the effect of raising the charge at which money can be obtained, we generally find that times of commercial prosperity are those at which money fetches its fair price in the market. In times of depression, on the other hand, money, like other commodities, becomes a drug on the market; it cannot be safely employed to the same extent as when business is in a more wholesome condition, and hence the amount to be lent out on really safe security is so much in excess of the demand, that the rate of interest obtainable falls to the lowest point. China is at present passing through such a condition of affairs. An unwholesome state of trade is accompanied by a low rate of interest, because no profitable use can be made of the sums of money usually available for commercial purposes. It is not only in the case of the Hongkong and Shanghai Bank, that this want of power to make a profitable use of capital is experienced; native capitalists are suffering from the same plethora, and the money lying in native banks is but little more serviceable to its owners than have been the stocks of unemployed silver which remained during the past season in the treasuries of the foreign banks. There is no doubt that a great deal of this stagnation is directly due to the artificial impediments imposed on native trade by official exactions. They have made the cost of trading so dear that it could not survive the infliction, and hence, in the face of cheap money and the well known passion of the Chinese for trade, it still refuses to respond to the natural demands of the country. In the Settlements, this stagnation is telling severely. The lines of untenanted Chinese houses, looked on with satisfaction by a portion of the community, bespeak only too truly the decadence of native trade, and with that decadence is intimately connected the present unsatisfactory condition of that portion of the trade of China in which foreigners are directly interested. The first effect of such a depression as we have noted, is very frequently to cause an apparent rise in the value of real property. Some two years ago, we drew attention to the then apparent tendency to enter on another land speculation, such as was found so ruinous in the years 1862-64. Though no such rash speculation as then took place did happen, it is certain that the market for real property in Shanghai has, through the want of other openings for capital, been unduly elevated. At all events, it has not followed the evident depreciation occurring in rentals. The same want of a more legitimate outlet for capital was greatly instrumental in producing the share mania of two years back. Capital, owing to the taxes levied on trade, could not be profitably employed in ordinary commercial undertakings. Trade, though it had commenced to feel the effects, had still enough of apparent vitality left to raise the hopes of those who trusted in the ultimate results of enterprises suited to a different position of affairs. Although capital could not be safely invested in commodities themselves, it seemed to those who had the capital to expend, that the interchanges of those commodities would still be maintained; a result which, in the nature of affairs, could not and did not happen. Hence the dissipation of a vast amount of capital, yet not enough to restore the money market to its normal state. Had the Chinese Government, in going into the market to borrow money, had any intention of using the money so obtained for reproductive works, the recent loans would have been an encouraging feature. As it is—being merely taken to make up for revenues lost through undue exactions, and affording the promise of an increase of, rather than a relief from, those burdens—the present position of affairs offers little cause for congratulation. A Government which would set itself heartily to reform the abuses of the last ten years could effect wonders; but although the present Government of China has, by the force of circumstances, been made to see the impolicy of the course it has been pursuing, it does not by any means follow that it will have the energy to take the requisite measures to amend that course. It has apparently hit on an easy device for throwing on its successors the responsibility of introducing measures distasteful to itself, and is content, so long as it is unmolested—to let matters take care of themselves. It can of course plead, in extenuation, that it is not singular amongst governments in this disposition; yet, at most, this is an extenuation, not a defence. Sooner or later the collapse must come, and of necessity will be the more severe, the longer reform is delayed. For outsiders, a lesson however, remains to be learned. If those who filled the treasuries of the banks in China with sycee, for which no outlet could be found, had duly pondered over the condition of China two years ago, they would have seen how hopeless would be the attempt to alter the condition of matters. The very activity with which joint-stock schemes were being taken up, was an indication that something was at bottom wrong with the condition of mercantile affairs. Exchange had been going hopelessly down from the accumulation of capital, of which no use could be made; but in the face of these facts, the treasuries of our local banks were filled to more than overflowing with sycee, some of which at least had been picked up at extravagant rates. These indications were unobserved by those who were floating with the stream. To them, everything wore a *couleur de rose;* and the result has been a collapse, felt widely and keenly by the whole of the foreign community.

THE DEADLOCK AT TIENTSIN.

Our Tientsin letters describe a curious deadlock that has lately occurred at Tientsin. On the 8th March, the Customs Taotai issued a proclamation, laying down certain rules with regard to the collection of duties on native merchandise:—

Tientsin, 29th of 1st Moon.

"The Customs' and Foreign Affairs' Taotai, &c., of Tientsin, issues a Proclamation:

Whereas, according to law, it is incumbent on Chinese merchants when importing native goods from steamer or sailing ship, after payment of duties at the Foreign Customs, to apply to the Hou Kwan (Native Customs) and then hand in *li-kin* duties; the previous Taotai, Tsung, fearing that cargo would be smuggled through, after passing the Foreign Customs, laid down regulations, as reported by memorial to the Throne, to the effect that the Foreign Customs should draw up, in triplicate, schedules of native goods passed, for the guidance of the Native Customs. These regulations, however, have degenerated by length of time into an empty formula, and native merchants no longer make application to the (Native) Customs in conformity with the schedule. Still worse, they craftily declare the cargo to be Foreign property, give false marks, return less weight, falsify quality, change packages, and are guilty of all species of malpractices. Since the opening of Foreign commerce, native goods, coming formerly by internal water routes, now arrive by sea, and the Hou Kwan (Native Customs) at present depends entirely on *li-kin* duties to make up the deficiency in its proper duty receipts. Therefore, in view of the loss arising from the smuggling practices of merchants, it behoves the Taotai to at once carry into effect the regulations referred to, and to take strong measures to suppress recent practices, and in addition to deputing officers to take stringent and coercive measures, it is proper that this admonitory proclamation be issued.

Let, therefore, all merchants and shop keepers, concerned with entering Impo at the Customs, know that, hencefo

Imports of native cargo, after passing the Foreign Customs, must at once, in accordance with the schedule made by the Foreign Customs, give particulars to the "Hou Kwan" of marks and contents, name of lander and date of entry, and pay dues in conformity. In this way, when the cargo is transferred to other Godowns, or sold and sent away, there will be means of identifying the packages. Passes can be issued, and attempts at nefarious gain and smuggling will be suppressed. Therefore, from this date, let all conform to these instructions by at once handing in at once to the (Native) Customs specific particulars of their imports. And, in the event of any one being detected in the design to violate these orders, they will be heavily punished. Let all trembling obey."

A report immediately got abroad that foreign goods were to be also subject to the same regulation, and the native merchants one and all refused to take delivery of their Shanghai consignments. The steamers of course could not keep the goods on board, so they were discharged on to the Bund, which was soon laden and blocked with merchandise. Foreign merchants appealed to their Consuls to protest against the innovation which was causing the stoppage, and the Consuls remonstrated with the Taotai. But the Taotai repudiated any such intention as that imputed, appealed to the language of his first proclamation, and issued a second, emphasising the distinction between "native" and "foreign"—which terminated the difficulty :—

Tientsin, March 9th, 1875.

Sun, Customs Taotai, &c., &c., makes the following proclamation :—

Chinese merchants who receive consignments of native imports have of late been disregarding the Regulation established by H. E. Chung-how, ex-Superintendent of Trade, which requires that after duty has been paid at the Foreign Custom House, the triplicate certificates there given shall be taken to the Revenue office for payment of the Revenue taxes ; and the result of this has been that smuggling has been carried on at pleasure. For this reason the existing Regulation was promulged in a special proclamation, wherein it was distinctly stated that native goods belonging to Chinese merchants, and not Foreign goods, were referred to.

It has come to my knowledge that unprincipled native merchants have been circulating canards to the effect that all foreign goods, whether intended for local consumption or transit to the interior, after paying duty at the Foreign Custom House, must be reported at the local Revenue office and pay the duties there. These people presume to take it upon themselves to leave all their foreign goods on the bund, and refuse to take delivery ; and they designedly instigate foreign merchants to take action, hoping in this way to resist payment of taxes on native goods. Such malignity is utterly detestable. I have sent police to vigorously, but secretly, track out and arrest such offenders, and have also communicated with the Foreign Consuls on the subject. This proclamation is now issued for the information of all merchants concerned. Hereafter, when native goods imported per foreign steamers or sailing vessels have paid duty and been cleared at the Foreign Custom House they must, according to the Regulation for triplicate certificates, be reported the same day at the head Revenue office for payment of Revenue taxes.

Should any one presume to secretly engage in smuggling, he will on detection be unrelentingly punished according to law.

Obey with trembling !

&c., &c., &c.

The impression seems to be, among foreigners in Tientsin, that the Taotai did purpose collecting from foreign goods as well as native ; and it is possible the native dealers may be aware that such is actually the case. The Taotai, however, distinctly denies any such intention. He says he was simply re-inforcing certain old regulations, established by Chunghow some years ago, but allowed to fall into abeyance ; and he implies that the Chinese merchants were mis-reporting the case to foreigners, in order to enlist their aid in fighting a false battle. It must be admitted that the Taotai's assertions are borne out by the language of his proclamation ; and we are inclined to believe him. In that case, if our Tientsin correspondent is well informed, there would seem to have been a huge mistake made at the Foreign Customs.—At any rate, the second proclamation distinctly settles the matter, and after its appearance the Chinese at once took delivery of their goods

Outports.

TIENTSIN.

The S. S. N. Co.'s str. *Shingking*, with his Excellency Ying Han, the new Governor-General of Canton, and suite, passed through this anchorage about 3.30 p.m. The crew of the Chinese gunboat *Chin-hai*, moored at the bottom of the anchorage, manned yards, and the band played some sort of tune (presumably the Chinese national anthem, whatever that may be), and after the *Shingking* had got about three yards past her, she fired a salute of three guns.

This morning, we had seven merchant steamers lying off our Settlement Bund, and if the steamer *Taku* had arrived three-quarters of an hour earlier, we should have had eight. This is a wonderful change from ten days back, when the river was covered with ice and not a single merchant steamer was in port. The Bund was also without a single package of merchandize upon it ; and to-day it is almost covered with foreign and Chinese goods.

In the Peking *Gazette* of the 1st March, there appears another memorial relative to the retention of Ting Show-chang, late territorial Taotai at Tientsin ; and it concludes by saying that if it be of national importance that he should be retained in Chihli, then he shall be so retained ; but his case must not in future be quoted as a example.

The barometer has been falling these last three days, and I fancy we are going to have rain with a gale. The wind to-day is North-east. The wild geese are flying over in great numbers to the North-east. The thermometer at daylight stood at 29° Fahr.

6th March.

H. E. General Raasloff, the Danish Minister, arrived from Peking yesterday, and leaves at noon to-day in the *Paouting*, for Amoy and Foochow—I hear of no news from Peking, and here all is quiet. Li Hung-chang is expected shortly.

7th March.

The Bund, about the third of a mile in length, is pyramided from one end to the other with foreign imports and import merchandize generally, the Chinese owners refusing to take delivery of them from the foreign steamer agents. This arises from the Chinese Government having demanded from the Chinese Shanghai importers a *likin* tax upon them, *directly* on their passing the foreign or sea Custom house. Hitherto all *likin* taxes were exacted on the goods on their being either sent into the interior, or on being sold for consumption on the spot. A proclamation was issued to-day on the subject, but as I only heard of it this evening, I have not yet seen it nor obtained a copy of it ; so as yet I do not know precisely the terms of the present exaction. I am told generally, however, that it is to refund the disbursements for the Formosa occupation, and the warlike preparations thereby called into action on the part of the Government of China. By the last steamers departed for Shanghai, the Chinese merchants, here called in common parlance "brokers," wrote to all their mercantile friends in the South, Shanghai, &c., &c., not to send them any more goods, as they could not meet the claims of the Chinese Government here as to the *likin* exactions on such. I do not suppose that any one ever saw such a sight as our Bund at present offers—hills of merchandize from one end of it to the other. A stranger coming here, and looking at the scene from the deck of the steamers, would undoubtedly exclaim, "Rain must never fall at Tientsin, at this season at least, and thieves must never have any existence in the British Settlement." In other places the goods would have to be placed in warehouses, under cover, to protect them from the weather, and under lock to protect them from thieves. I hear that the Consuls have addressed the Customs on the subject, protesting against the exaction. The matter will no doubt have to be referred to the Governor-General of Paouting, by the Customs official here, for instructions as to giving a reply to the protests.

There is naturally, just on the commencement of the season, great excitement amongst all business classes of the Chinese about this *likin* exaction. We hear that some of them have closed their doors, and have prepared for troubles here with the Government.

A couple of days back, I heard a rumour of disturbances having broken out amongst the people of Tzechow, the district where the China Merchants' Steamer Company intended, we heard some months back, to work the coal mines by foreign machinery. This evening the report has become more general, and is that the people are opposed to the working of the mines with foreign plant.

In my next, I shall have more information to send you on the *likin* exactions, and on the disturbances at Tzechow.

His Excellency Herr von Brandt, the new German Minister to the Court of Peking, arrived here from Shanghai this morning, in the S. S. N. Co.'s steamer *Chihli*, on his way to the metropolis. Mr. Brandt is no stranger in Tientsin, having, as Secretary of Legation, resided here several weeks when, in 1861, the German treaty was being negotiated with China. His Excellency Li Hung-chang, not having yet returned to Tientsin, there is at present no high Chinese official on whom Mr. Brandt can call during his stay. This fact shews the necessity of a Chinese high official being always stationed at this place, the port of Peking, with whom foreign Ministers could meet on equal terms for the transaction of business or on visits of courtesy. Mr. Brandt will leave to-morrow for Peking, going by boat.

The thermometer this morning stood at 28° Fahrenheit. We are having charming Spring weather. Wild geese still continue to fly over to the North.

8th March.

On the evening of the 8th instant, I wrote to you hurriedly and briefly, that a total stoppage had taken place in the usual mercantile and shipping traffic of this port, in consequence of the Customs Taotai having demanded payment, from the Tientsin native dealers, of interior *likin* taxes

on the importation of merchandize from Shanghai by steamers and sailing vessels, instead of waiting to collect them on the transmission of the merchandize into the interior. I have since had handed to me copies of the Taoutai's proclamations. In the first proclamation, bearing date the 5th instant, the Taoutai informs the native merchants that he will hereafter demand from them the payments of the whole of the Barrier taxes 卡稅 on all imported native merchandize 土貨 coming here in steamers or in sailing vessels, at the time of the payment of the import Customs' duties.

The foreign public here were subsequently told that, after the Tientsin native dealers had perused the proclamation in question, they repaired to the Custom house for further information on its tenor; and were then informed that all the Barrier taxes would be levied on all their imported merchandize, both native and foreign, at the time of paying the import Customs duties on them. The proclaimed Customs information, and the verbal Customs information, it thus became obvious to the native dealers, differed very materially. As they were not inclined to acquiesce in the new regulation of the Customs, they consulted together, and came to the determination not to take delivery of their goods, come by the steamers; but to allow them to be discharged on the British Settlement Bund by the steamers, and to remain there under the charge of the steamer agents till they could come to a satisfactory arrangement with the Taoutai on the subject. They, besides, wrote to their agents at Shanghai by the out-going steamers, to stop sending any more goods to them at Tientsin; and they even came to an arrangement with Mr. Moore, the agent of the S. S. N. Co., for the *Chihli* to take back to Shanghai their goods still on board her, rather than land them and incur the payment of the Barrier taxes.

On the 8th instant, the British, American, and German merchants of this port, addressed their respective Consuls on the position of affairs. Mr. Mongan, H. B. M.'s Consul, exchanged letters with the Customs' Taoutai about the new regulation, and respecting the complaints of the British merchants; and afterwards sent a despatch to H. B. M.'s minister at Peking on the subject and on the situation generally. Mr. Bismark, Consul for the Emperor of Germany, and Mr. Sheppard, Consul for the U.S. of America, during the afternoon of the 9th instant, had a personal interview with the Taoutai at his yamun, respecting the state of affairs. About nine o'clock in the evening of the same day, the Taoutai issued a second proclamation, which was posted near the gates of the different foreign Hongs in the British Settlement, stating distinctly that the Barrier taxes would only be levied at the Custom House on native merchandize and not on foreign merchandize. On the 10th instant, the Tientsin dealers commenced taking delivery of their goods from the Bund and the *Chihli*, to lighter them up to town to their warehouses. The traffic here to-day is going on as formerly.

Five days ago, I was told that disturbances had broken out in the district in this province about 1,000 *li* south from Tientsin, called Tsze-chow (磁州), the people being dissatisfied with the local authorities, in consequence of these latter having taken possession of some lands. Two days back, the same news was told to me by other Chinese, so I fancy there must be truth in the rumour. I have hitherto understood that the Chinese Steamer Company intended working coal-mines in that district by aid of foreign machinery. Whether or not this news has reference to steps which may have been taken by the local authorities in relation to the working of the coal-mines, I am at present unable to say.

Yesterday, a French barque, the first sailing-vessel of the season, arrived off this settlement. The second sailing-vessel of the season, a German barque, arrived to-day. I should mention that we have two steam-tugs—old British gunboats—belonging to the Taku Pilot Company, working on this river; so sailing-vessels, now-a-days, can come up to this harbour and go down to sea from it easily, in one tide. The S. S. N. Company and the Chinese Steamer Company have each a steam lighter to bring up cargoes from outside Taku. The steamers have commenced to take ice away from here; and I suppose will continue to do so every trip for some time to come.

On the evening of the 9th instant, H. E. Herr von Brandt left here by the river for Peking. Having been here while the stoppage of the traffic existed, he will, on his arrival at the metropolis, be able to inform his colleagues of the aspect of the Settlement on the occasion.

The members of the Tientsin Race Club held a meeting at six o'clock yesterday afternoon, for the purpose of electing stewards for the year, and of setting other matters in connection with the spring meeting, which, I may say, it was decided will take place on the 13th, 14th and 15th days of May. Messrs. Bismark, Cordes, Jackson and Meadows were elected the stewards for 1875.

Small-pox has, this last winter and spring, been very rife in Tientsin and the surrounding districts, and numbers of Chinese children have died and are yet daily dying of it. Four deaths occurred this winter amongst the men of the foreign vessels-of-war in port. At present, two of the Settlement residents are ill of small-pox.

There is a rumour to-day that the Governor-General would start yesterday for Tientsin, from Paouting

The thermometer at daylight to-day stood at 33° Fahrenheit; yesterday, wild swans, bustards, and geese were still seen flying over in a northerly direction.

PURITAN.

11th March.

FOOCHOW.

The *Foochow Herald* says the dredging of the river Min between Limpoo and the Arsenal has been fully determined, and that powerful steam dredges will be ordered from Europe. It is not to be supposed the officials are doing this from any desire to facilitate commerce, but because "the river is fast filling in front of the Arsenal, and if matters are allowed to go on at the present rate, that establishment will have to be given up, and millions of Taels written off as useless expenditure. So long as foreigners alone complained of the inconvenience and injustice of being deprived by this barrier of easy access to their ships, at a Treaty Port, nothing was done or even attempted; but now, when it is found that an establishment belonging to the Imperial Government is in peril, through causes that should never have been permitted, the officials are rousing themselves to a sense of their duty." The origin of the trouble does not appear to be "heaven-sent," in the present case. It consists of a mass of granite laid across the channel at Limpoo in 1842, to prevent foreign vessels coming up in time of war. There is some hope, therefore, for the Hwangpoo. When, therefore, the approach to the Kiangnan Arsenal threatens to become closed, perhaps the officials may see fit to order out dredgers. Of course, it is not at all worth while doing this for the sake of commerce; but Mr. Hart will admit that it would be a pity all the money spent on the Arsenal should be wasted.—Mr. Giquel is going home.—It is rumoured that Captain Tracey will soon arrive to take command of the Chinese corvette *Yang-woo*, which will be despatched on a cruise round the world.—The Racket Club has not flourished so well as usual during the year, owing to the absence of many players.—The *Herald* also says reinforcements are being despatched to Formosa to avenge the defeat lately inflicted by the savages upon the Imperialist troops. "A few days ago, we (*Herald*) witnessed the embarcation of some of these embryo heroes. They were well armed—with umbrellas."

HONGKONG.

A curious case has been tried before the Hongkong Court, arising out of the late Macao coolie traffic. A Dr. Fabregas, who was interested in the coolie trade, sued Mr. Espantoso, who was also actively engaged, for $19,500. In the halcyon days of the trade, there used to be an Emigration Agents' Association, in which each member deposited $25,000. Fabregas wished to retire, and Espantoso took his place. $18,000 of his deposit were repaid and Espontoso became responsible for the remainder, but has never paid it: $7,500, money lent, made up the total claim A jury gave a verdict in favour of plaintiff. The *Hongkong Times* regrets that, because two Macao coolie-brokers squabble over the terms of their agreement, the aid of a British Court should be invoked in setting their disputes.—The same paper tells an amusing tale of a Chinawoman (resident in Hongkong) who was supposed to be dead, and whom her friends were busily "wakeing," when she came to life and remonstrated against the unearthly row.—Tableau, horror of mourners, and disappointed relations! The occasion is taken, of urging that no interment should be allowed without medical certificate—a point which the Municipal Medical officer is, we believe, urging as respects foreigners in Shanghai. —The Hongkong Museum has had a valuable collection of birds of the Pellew islands presented to it, by Mr. H. Cohen. —The Registrar and Referees are still struggling with the *Ava-Rona* case.—A meeting of shareholders in the Indo-Chinese Sugar Company was held on the 8th instant, for the purpose of closing the Company. A report submitted by the Directors said—The proposed alterations and repairs to the Factory were satisfactorily completed in November last, the new machinery purchased by Mr. Homan at Mauritius, consisting of two batteries, a vacuum pump and engine, arrived safely, and have been satisfactorily erected under the superintendence and with the assistance of a staff of employés who were engaged for the Factory and brought on from Mauritius; and early in the month of January last, the Administrator reported the Factory ready to begin crushing the crop. The financial arrangements by which the Directors were enabled to carry out the above were made with the Hongkong and Shanghai Banking Corporation in March and April, 1874, and naturally contemplated the supply of the necessary funds for the working of the present season, the results of which it was understood were to determine the future of the Company. In furtherance of this, every preparation was made by the Directors for the crop 1874-75, advances were obtained from the Bank for the purchase of the necessary outside cane, fuel and other material, and in fact since the 9th of January, the Factory has been in full operation and the last advices received from the Administrator at Laconchaisee were of a satisfactory nature. It was therefore with no little surprise that the Directors received on the 13th of

February last, a formal demand from the Bank, for the immediate payment of the entire sum due, and at the same time read in the published Report of the Bank Directors that "steps had already been taken to realize this Company's property with all despatch."—The Chairman said that the action taken by the Hongkong and Shanghai Bank would necessitate the sale of their property, which would not, at a forced sale, cover the amount due to the bank. The only thing left for them to do, therefore, was to go into voluntary liquidation. A resolution to this effect was carried.—The *Hydaspes*, which took away the mail of the 12th Feb. from Shanghai, broke down between Hongkong and Singapore. At 4 A.M. of the 23rd-Feb., when about 275 miles from Singapore, the piston on the high-pressure cylinder was found to be loose. The engines were at once stopped and the head of the cylinder lifted; after the engines had cooled sufficiently, the nut at the piston was removed, when it was found that the thread had worn away. The wind being very light, the steamer could do nothing under canvas, and so was obliged to lie-to while the engineers and machinists repaired the damage. It was found necessary to fit a "cotter" through the piston rod, over the nut at the piston, which was accomplished at 0h. 40m. p. m. of the 25th, after a delay altogether of 56 hours, after which the vessel was able to steam ahead at full speed.—The *Patroclus* left Singapore for Hongkong on the 5th.—Two Chinese gunboats have been ordered to go to Hongkong to meet the new Viceroy, Ying Han, —who it will be remembered arrived here on Tuesday in the *Shingking*.—M. Plichon, now at Yokohama, has been appointed French Consul at Hongkong.—The villagers at Yow-mah-tee have shewn remarkable public spirit. They have made a collection of $208.03, which they forwarded to the Superintendent of the Government Fire Brigade, begging that he would lay their request before the Government to have a small fire-engine stationed over there and a fire brigade formed, the sum forwarded to assist in defraying expenses. This petition is to be granted, and an engine has been sent over, hose and all complete.—The *Daily Press* records a series of incidents in natural history. The shark caught at Show-kewan had in its inside a pig weighing 13 catties. Two sea otters took into their heads the other day, to walk up the Praya steps into the road. Chase was given after them, but one got into the sea a ain; the other was caught by a Chinaman, when a stranger came deliberately up and claimed half of $2 offered for it by a shopman close by. The captor being exasperated at this, decided the claim by setting the other at liberty again, throwing it into the sea.—Two wild boars have been shot (by foreigners) at Kowloon, one weighing 127 and the other 165 catties.—A public market is to be erected at Shek-tong-tsui.

NAGASAKI.

A new paper has been started in Nagasaki, called *The Cosmopolitan Press*. Among its news items we find mention that anxiety is felt about the *Britain's Pride*, which had left Yokohama for Nagasaki 43 days.—The *Rising Sun* records a good deal of boisterous weather.—The men-of-war in harbour were decorated with flags on the occasion of the Emperor of Russia's birthday.

HIOGO.

The Kioto Exhibition was supposed to be opened on the 1st March, but no details have yet come down.—The *Hiogo News* records the upset of a steamer in Lake Biwa, and the loss of 50 lives. A small screw steamer called the *Mame-maru*, which was engaged in conveying passengers between Shiotzu and Otsu, capsized on Friday last, when within a few miles of the latter town. There were about sixty people, mostly fishermen, on board the boat at the time of the accident, and according to the account given by the survivors, three of the passengers went at the same time to the side of the vessel to look overboard, or for some other purpose, and so crank was the boat that this simultaneous movement was sufficient to make her list. This caused an alarm, and a rush of passengers to the opposite side to right her; the strain proved too much, and in a moment the wretched craft canted over, and turning bottom upwards, precipitated her living freight into the lake. The scene must have been an awful one, for out of the sixty persons on board no less than fifty are reported to have perished. Searching parties were out seeking for the bodies of the missing men.—A heavy fall of snow occurred at Osaka on the 21st ulto.

YOKOHAMA.

The ball given to the English and French Marines on the occasion of their departure, seems to have been a great success. The *Japan Mail* says more people were assembled than on any previous occasion in the Settlement. The officers of both corps had farewell interviews with the Mikado. They have also been entertained at dinner by General Saigo and other chief officers of the War Department. It is reported that the English Marines are to go to Natal.—A heavy fall of snow occurred here also, on the same day as at Osaka.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Feb. 15th-16th. (1.) A decree in reply to a memorial by Shên Pao-chên, soliciting rewards on behalf of the officials who have distinguished themselves in the opening up of the mountains in Formosa.—The officials who have served under the direction of Shên Pao-chêng in successively throwing open the territory occupied by the savages in Formosa, have achieved a degree of meritorious exertion for which it is fitting that rewards should be bestowed. In the case of Lo Ta-ch'un, naval general of the province of Fuhkien, let the sentence heretofore recorded against him, of deprivation of rank with retention of office, be remitted, and let a distinguished mark of approbation be submitted for sanction by the Board. [Here follows a list of civil and military subordinates who are accorded advancement in different degrees.] With regard to the supplementary memorial, in which it is stated that general T'ang Ting-kw'ei 唐定奎, invested with the command-in-chief of the Ming, Wu, 銘武 and other divisions, who, since his arrival in Formosa, has taken his military measures with minute care and has maintained a strict and enlightened discipline, it is ordained that he be honoured with the distinction of the Yellow Jacket.

(2) A decree in reply to a memorial by Shên Pao-chêng and his colleagues, requesting the bestowal of a posthumous title of dsitinction on a hero of the times of the Ming dynasty, and the erection of a temple in his honour. The feudatory of the Ming dynasty, Chu Ch'êng-kung, had a temple erected to his memory at Nan-ngan by imperial command, during the reign K'ang-hi; and as it is now reported in the memorial received that the departed chieftain, already illustrious through his heroic virtues and steadfast loyalty, has given ear to supplications whenever addressed to him in times of flood or drought, thus adding to the benefits for which Formosa has to thank him, We ordain that the request b egranted, and that a memorial temple be erected at T'ai-wan Fu, and a posthumous title of canonization be conferred upon him, in gratification of the public wish. Let the proper Board take note. (Note.—The deceased hero referred to above was the celebrated freebooter Chêng Ch'êng-kung, 鄭成功, who, for his services in the cause of the Ming dynasty in its last struggles against the invading Manchus, was honoured by the bestowal of the surname of the imperial family, in exchange for his own. He is consequently spoken of above as Chu 朱 Ch'êng-kung; and from the fact of his investiture with the *Kwoh-Sing* or surname of the rulers of the state, he was designated among his adherents by the title of Kwoh-Sing Yeh 國姓爺, which was rendered by the Portuguese as Koxinga or Koshinga. Beside waging a bitter warfare against the Manchus, he undertook, for his own benefit, the expulsion of the Dutch from their settlements in Formosa, which he successfully achieved in 1661-1662. He died almost immediately after victory had rewarded his efforts in this direction; and his achievement tended only to the foundation of the Manchu Sovereignty over the island, which was surrendered in 1683 to the Manchu authorities of Fuhkien, by his grand-nephew Chêng K'êh-shwang).

(3) A decree in reply to a memorial by Shên Pao-chêng and his colleagues, requesting that the ancient interdict upon the cultivation of lands in the interior of Formosa, be removed. From the time when the whole island of Formosa became part of the Imperial dominions, in view of the alien customs prevailing among the various savage tribes of the interior, Chinese subjects of the mainland have been prohibited against crossing over to Formosa, and likewise against illicit entry into the savage territory, to the end that disturbances might be obviated. Now, inasmuch as Shên Pao-chêng and his colleagues have taken steps to throw open the interior, it is eminently necessary that cultivation of the lands lying waste should be encouraged, and the existing institutions should be modified in consonance with the requirements of the present time. The removal of all prohibitions heretofore in force, restricting Chinese subjects from crossing over to Formosa, is hereby granted, and the interdict upon trade in iron and bamboos is at the same time rescinded, with the object of affording encouragement. Let the proper Board take note.

(4) A memorial by the Censor Wu Hung-ên, dwelling upon the importance of placing none but persons of staid and correct conduct in attendance upon his present Majesty. (For rescript of the two Empresses, see *Gazette* of Jan. 30th).

Feb. 17th-18th. Ting Pao-chêng, Governor of Shantung, memorializes reporting the measures undertaken for the repair of the breach in the embankment of the Yellow River at Shih-Chwang-Hu 石庄戶. He has already transmitted plans and specifications for the work which it was deemed advisable to carry out, in consequence of this occurrence, at Kia-Chwang 賈庄 in the Ho-tsêh district (in Ts'ao-chow Fu, on the Western border of Shantung). Imperial orders for the execution of this undertaking, as a matter affecting the interests of several provinces, were received on the 29th December; and steps were immediately taken to urge on the work, preparations for which were already in hand. The labour of constructing the necessary embankments has been greatly impeded by the downrush of ice which has swept over the flooded district, and also by the frozen condition of the soil;

but it is hoped that before the month of March the dykes which are in process of construction from North to South, and *vice versâ*, will have been brought together, and the further egress of the river water Southwards be thus prevented.

Feb. 19th-20th.—The whole of this day's *Gazette* is occupied by the memorial of Li Hung-chang and his colleagues of the Grand Secretariat, in response to the Decree, dated the 15th January last, in which the determination of the posthumous titles of the late Emperor was enjoined. (See *Gazette* of January 15th). The Grand Secretariat proceeds hereupon to extol the virtues and endowments of his late Majesty in a strain of fulsome adulation, its memorial consisting in a prodigious concatenation of phrases extracted from the ancient classics, by means of which his late Majesty is compared to the most illustrious sages of the ancient world. (For the titles by canonization adopted in pursuance of the recommendations of this memorial, see *Gazette* of January 23rd.)

Feb. 21st—22nd. (1) A decree of the two Empresses, referring to their decree of the 12th January, in which they ordained that on the birth of a son to his late Majesty's adopted successor, the child shall become the adoptive heir of the deceased Emperor. A memorial has now been addressed to the Throne by Kwang-an 廣安, Assistant Reader of the Grand Secretariat, requesting that the high officials of the Court be directed to deliberate respecting the issue of a Warrant inscribed on iron (in token of unchangeableness) to this effect. This ill-considered and offensive suggestion gives occasion for a feeling of the utmost astonishment. Let Our message of reprimand be communicated to Kwang-an.

(2.) A Decree. Let Ts'ung-shih (President of the Board of Punishments) and K'i-yüan proceed by post—relay to Moukden—to hold an investigation. Let the Secretaries who accompany them travel similarly.

(3.) Memorial by the Censor Li Kwei-lin, representing the popularity of the ex-Taotai of Tientsin, Ting Show-ch'ang, among the people under his jurisdiction, and transmitting their entreaty that, although compelled by the death of a parent to resign his office, he may still be left, by a stretch of the Imperial prerogative, to discharge official functions among them.—(See *Gazette* of February 3rd-4th.)

Feb. 23rd-24th.—(Court Circular, 24th.) His Majesty will proceed to-morrow at 4.15 a.m., to offer homage at the Kwan-têh Tien [before the remains of his late Majesty], and thence return to the Imperial apartments. At 6.15 a.m., His Majesty, issuing from the K'ien T'sing gate, will ascend the Chung Ho Throne-hall from the folding doors at the back, and receive homage, passing thence to the T'ai Ho Throne-hall, to receive congratulations and promulgate the manifesto of accession, and thence return to the Imperial apartments.

(1). A Decree. On the removal this day of the golden coffin of Our elder sister, the Princess Yung-an, to the (temporary resting-place) at Tsing-an Chwang, let the Beilêh Tsai Ch'êng proceed thither and offer a funereal libation, as a token of our affectionate remembrance. (Note—the decease of the princess Yung-an, daughter of Hien-Fêng, and only sister of the late Emperor, who died in childbed at the beginning of this month, was recorded in the *Gazette* of the 6th inst. By his adoption, the present Emperor became placed in the relation of a brother to the deceased lady, though in reality only her cousin.)

(2) A decree in reply to a memorial by the Censor Wang Chao-lan, who has submitted his views on financial administration, civil government, and military efficiency. All these are acknowledged as deserving attention. On the subject of revenue and expenditure, the Board of Revenue is directed to compute the total amount of receipts in all the provinces from the land tax, salt and rice collectorates, as also from the *li-kin* tax and the sales of titles and offices. This having been done, expenditure is to be so ordered as to come within the limits of income. The governors of provinces are further directed to require from the commissioners of Finance a return of all existing *li-kin* tax stations, to be transmitted to the Board of Revenue, as well as returns of the annual receipts and disbursements. Should delays in this respect be wilfully indulged in, as heretofore, the offending officials are to be denounced for punishment. The Board is likewise to scrutinize the expenditure which is resorted to under the head of military requirements in the provinces generally, and to effect a return to the old system and prices in the supply of *matériel*. As regards the government of the people and the selection of trustworthy officials, scrupulous care is enjoined on the high authorities.

(3) A memorial by the Vice-director of the Sacrificial Court, Chow Jui-ts'ing, panegyrising the deceased high official Tsiang Yih-li, formerly Governor of Kwang-tung, and asking that his name be included among the state biographies. (For rescript see *Gazette* of 3rd instant.)

(4) A further memorial by the same writer, protesting in strong terms against the continuance in public employ, under the orders of the Governor-General Li Hung-chang, of the late Taotai of Tientsin, Ting Show-ch'ang, who has been placed in mourning by the death of his father. (For rescript see *Gazette* of 3rd instant.)

(5) The Censor Li Hung-mu memorializes, in virtue of the Decree calling for unrestricted counsels, to entreat that men of worth be rightly appreciated and the untrustworthy be put far away. Referring to the terms of the decree, in which the Empresses have called for advice from all officials who have the right of address, and to the paramount importance which the character of its servants has for the interests of the State, he recalls the time when, in the first year of T'ung-che (1862), their Majesties the Empresses undertook the regency on behalf of his late Majesty, then a child. The policy they ever pursued was that of surrounding themselves with Ministers grave, respected, and of tried capacity, whilst in the case of those who were leagued together in the execution of evil designs and whose ill repute was notorious, such men, if not sent to undergo the highest penalty of the law, were banished in disgrace. Now that once more a youthful sovereign has commenced to reign, and a regency is again inaugurated, the character of those who serve is more than ever the point of most urgent importance. Among individuals, who at the present day are by common consent acknowledged as men of worth, there is Kwei-ts'ing, holding the office of Vice-president of the Board of Works at Moukden; and among those who are universally pointed to as evil men, there are none more conspicuous than the Comptrollers of the Imperial Household, Wên-si and Kwei-pao. According to the accounts the Censor has heard, Kwei-ts'ing, when in office as Comptroller of the Household, discharged his duty with stern integrity, without fear or favour, and made himself the terror of self-seeking underlings. If the sacred favour be moved to recall him to employment in the Palace, an incentive will be applied to due exertion and a public wish be gratified. On the other hand, Wên-si, when employed as assistant Comptroller, relying upon the fact of his father, Ming-shan, being one of the Comptrollers, made himself the object of loud animadversion by the lavish expenditure he contrived for his own illicit advantage. Kwei-pao, again, intrigued dishonestly in connection with the fraudulent proposals of Li Kwang-chao for the supply of timber for Yüan-ming Yüan. The dismissal of these two officials from their posts in the household is solicited. (For rescript, dismissing Wên-si and Kwei-pao, see *Gazette* of 1st inst.)

Public Meetings.

THE CHINA COAST STEAM NAVIGATION CO.

A Meeting of Shareholders was held at the offices of Messrs. Jardine, Matheson & Co., on the 12th March.

Present:—W. Keswick (in the chair)—A. J. How, J. Wilson, M. S. Gubbay, W. Jaffray, E. Ward, E. Gippnerich, C. Rivington, F. G. White, J. MacGregor—representing 3,512 votes.

The CHAIRMAN read the report and accounts as follows:—

REPORT.

The directors beg to submit to the Shareholders the accounts of the Company to the 31st December, 1874, and in doing so have pleasure in referring to the earnings of the Steamers during the six months then expired. It will be observed that the net profit on the 61,349.28 including Tls. 1,379.08 brought forward from the previous half year's account. Out of this sum a Dividend at the rate of 10 per cent. per annum has been paid, and the balance, amounting to Tls. 42,599.28, has been carried to the Reserve Fund which now stands at Tls. 62,522.10.

The Company's Steamers have been overhauled and put in thoroughly efficient order during the close of the Northern Ports.

The Directors have purchased for the Company a new Steamer adapted to the requirements of the Northern trade, and expect she will arrive towards the end of the present month.

The present Directors and Auditors now retire, as provided by the Deed of Settlement, but are eligible for re-election.

PROFIT AND LOSS ACCOUNT.

Shanghai Tls.	[illegible]

The report summarised everything that need be said of the Company. He considered the results shown had proved as satisfactory as the Directors anticipated when they last met, and he looked forward hopefully to the next report being equally favourable. There would be increased earning power, he hoped, in the addition which was announced to the fleet. The new steamer was named the *Conquest*, and was in capacity similar to the *Appin*; and from the reports received of her, he believed she would be found an economical and profitable boat. Captain Hutchison is bringing her out, and it is expected she will be here in a fortnight or three weeks.

Before proposing the adoption of the report and the passing of the accounts, he would remark with particular satisfaction that the Company is much indebted to the skill, energy, and attention to their duties, of the commanders, officers aud engineers of the fleet, for the successful work which the accounts exhibit. He now proposed—

That the Report and Accounts of the Directors of the Company for the half-year ended 31st December, 1874, as printed and circulated, be accepted and passed.

Seconded by Mr. Gubbay, and carried *nem. con.*

The Chairman said the next business was the re-election of the Directors. It was not clear that their re-election was quite necessary; but in view of the changes about to be proposed, it would be better to have the Directors re-elected for the full period.

Mr. Gubbay thought that, as the Directors had done so well, they could not do better than re-elect them. He proposed—

That Messrs. A. J. How, John Wilson, and Tong King-sing be re-elected Directors for the current year.

Seconded by Mr. F. G. White, and carried *nem. con.*

Mr. MacGregor next proposed, and Mr. Ward seconded.

re-appointed auditors for the current year

Carried.

In reply to Mr. Ward, the Chairman said the *Conquest* had left London on the 24th January and had passed the Canal on the 14th ulto. She ought now to be near Singapore.

This closed the business of the half-yearly meeting.

The meeting then resolved itself into an extraordinary one, to consider certain proposed changes in the Deed of Settlement.

The Chairman said he had explained at the last meeting, that inconvenience arose from the terms of the articles of association requiring that the accounts of the Company should be made up half-yearly, and that the Directors considered it would be necessary to propose, at an extraordinary meeting to be held at the same time as the general meeting, in February or March, an alteration in Clauses 14 and 54, making the accounts annual and the year to end on the 31st December. The present rule that dividends fell due on 30th June and 31st December, the Directors would not change, but the rendering of the accounts annually would enable the working of the Company to be more intelligibly given than when the year, as at present, was unnecessarily divided. Notice of the proposed resolutions had been thus given, and they had been published in the papers for the information of those interested. The Directors did not propose any change in the payment of the half-yearly dividend, only that the accounts should be rendered yearly, instead of half-yearly. It was unnecessary to say anything more in favour of the change, the advantage of which must be patent to every business man. He would now propose that Rules 14 and 54 of the Deed of Settlement of the China Coast Steam Navigation Company be altered to read as follows:—

"14.—The General Agents shall render "to the Company once in every year, that "is to say, on or before the 31st day of "March in each respective year, an account "of the business transacted by the Com-"pany, and of the profit or loss arising "therefrom, and generally of the financial "state of the Company, (so far as can fairly "be ascertained) and also a general balance "sheet for the twelve months terminating "on the 31st day of December in each "year."

"54.—A General Meeting of the Share-"holders of the Company shall be held "once in every year, at such time and "place as the Board may from time to "time determine, but such meeting shall "take place not later than the last week "in April in each year."

The Deed of Settlement provided that the Rules might be altered by the shareholders at an extraordinary meeting, after thirty days' notice, if 2,000 registered shareholders were represented. There were 3,512 represented at the present meeting.

Mr. Wilson seconded the resolution, which was carried unanimously.

This concluded the business, and the meeting broke up with the usual vote of thanks to the Chairman.

THE S. S. N. CO.

The annual meeting of shareholders was held on the 13th inst. Present:—Messrs. John Dent, (Chairman); A. G. Wood, F. D. Hitch, E. Cunningham, (Directors); F. H. Bell, W. S. Fitz, Koo Fong Sing, Peter Maclean, E. W. Rice, D. Weld, Dr. G. K. Barton, N. B. Hinckley, W. W. Lovett, G. H. Noetzli, H. Overbeck, Sep. Daly, G. H. Wheeler, G. Rohl, J. B. Tootal, J. P. Bisset, J. Hart, A. White, J. F. Rodewald, G. A. Butler, F. G. White, E. Seligmann, J. F. Goodfellow, H. Cordier, D. Brand, Choping. Representing 16,277 shares.

On the motion of [illegible], Mr. Dent was called to the chair.

The Chairman said the meeting was called in accordance with the notice which had been advertised, to present the Report and Accounts of the Shanghai Steam Navigation Co. for the past year. The Report had been in the hands of the shareholders for many days, and all had had an opportunity of examining it. To the Directors it appeared satisfactory, and they hoped it would appear equally so to the shareholders. He had no further remark to make, except that if any shareholders wished any further information, the Directors would be happy to supply it.

Report.

The net gain for the year was Tls. 188,372.21. After allowing for the declared dividends of 7 %, there remains Tls. 27,323.96, to be carried to the credit of Insurance and Depreciation Fund.

The casualities of the year are confined to the loss of the *Chusan*, insured for the cost of the hull and new work, but not for the engine from the old *Chusan* which was valued at Tls. 30,000, and is written off. The vessel can probably be replaced at a saving in cost equal to the amount lost, and the chief cause for regret in this disaster is the untimely death of Captain Johnson and eight of the crew, whose loss is deeply to be deplored.

The companion hull, for which the *Kiangloong's* engine is intended, is to come out in sections by steamer from Glasgow. She will not be in service for a year, but as these vessels were ordered well in advance of their need, to allow for accidents, the delay is no inconvenience to the Company.

In order to convey to distant shareholders as close an estimate as possible of the value of the Company's property, it has been re-valued, and the steamers are written down, not only to cover present depreciation, but in the case of the wooden steamers depreciation in the future. Three of these, being perishable property, are reduced to a nominal value, though still sound and efficient and as good for present service as new vessels. The *Nanking*, *Hirado* and *Fusiyama*, for all practical purposes, are the same as iron hulls, their frames being imperishable, and the only peculiar repairs beyond those required by iron vessels being the occasional replanking above the water line. The amount thus written off is Tls. 390,737.16. A list of the Company's steamers at the new valuations is added to the usual statements, and a perusal will show the sound and efficient state in which the fleet now stands.

The re-valuation of real estate was based on actual sales of other property in close proximity, and was made with much care. It is intended and is believed to be, still below its actual value as well as cost; it having been added to, through successive years, without increase of cost in the accounts. Besides their steamboat dock, the Company possesses three extensive estates, situated at nearly equi-distant points on the river, and commanding the best frontages in the port, aggregating nearly half a mile of river bank. Their dock is the only one here capable of receiving river steamers of the dimensions now built. The enhancement of the property in the books is Tls. 337,662.00, and it now stands at Tls. 763,600.

The agreement entered into in March with the China Steam Navigation Company has proved successful in its arrangements, and the Companies work in harmony with only such degree of friendly rivalry as secures to the public the most efficient service, and to the Companies the most careful economy.

The directors think the promise is good for a prosperous business in the ensuing year. The interior is reported to be in a peaceful and flourishing condition, which should react favorably upon the carrying trade.

Mr. P. Maclean proposed—

That the accounts for the year 1874, as presented to the meeting, be accepted and passed.

And in doing so, he congratulated the Directors and Shareholders on the very satisfactory position of the Company.

Seconded by Mr. NOETZLI, and carried unanimously.

Mr. D. BRAND then proposed, and Mr. RICE seconded, the following resolution.

Mr. Dent retiring from the board, it is proposed that Mr. W. Scott Fitz be elected President, and Messrs. F. H. Bell, F. Nissen, F. D. Hitch and A. G. Wood be elected directors, and Mr. Rowley Miller auditor to same, until the next general meeting.

Carried unanimously.

The CHAIRMAN said the Directors had no other business to lay before the meeting. If any shareholder had any proposal to make, or question to ask, they would be happy to hear it.

Nothing offering, Mr. CUNNINGHAM proposed that the thanks of the meeting be given to Mr. Dent for presiding, and also for the efficient assistance he had given to the Company through a series of years, during which his advice had always been of great value to the agents in the management of the Company's business.

Mr. HITCH seconded the proposal, which was unanimously approved.

Mr. DENT briefly acknowledged the compliment, and the meeting broke up.

Amusements.

THE PAPER HUNT HANDICAP.

The Paper Hunt Handicap on Saturday, twice round the usual Steeplechase Course, attracted such a crowd of ladies and gentlemen that the Grand Stand enclosure looked quite as if it were a Race day.

Fears had been entertained that the sport would have to be po tponed owing to the recent heavy rains, but it was decided by the stewards, and wisely as the result showed, that unless it actually rained the Handicap should come off. The ground was of course very heavy, and in some places actually under water for a few yards, but this did not prevent the appearance of a first rate field ; there being no less than 17 or 18 starters out of nineteen entries.

After a slight delay, during which an energetic photographer took a view of the restive and quiet, the word *off* was given. Messrs. Hunt and Nickels, riding *Maloo* and *Sky Pilot*, emerged from the ruck and crossed the *Double* simultaneously. The allotted 15 sec. having elapsed, the second batch came forward, prominent amongst whom we noticed *Oriflamme*, ridden by Mr. How, and *Gameboy* by Mr. Daniell. Quickly followed the 3rd batch, and last of all came the scratch ponies, they being 45 sec. behind those handicapped. Now the race waxed warm, and *Furore*, ridden by Mr. E. H. Gore-Booth, was seen to be working his way through the crowd, and was the first to cross the Wall, followed by *Southdown*, *Gekko*, *Schwalbe* and *Gameboy*. The Double was crossed a second time without any serious mishap, *Furore* not having once refused. Of the handicapped lot little was to be seen, as all attention was centred in the leading four ponies, which passed and re-passed most of their opponents. Opposite the Stand, *Furore* led by 200 yards, splendidly ridden. He eventually won, hands down, crossing the Double for the third time equally as well as the first. A good race ensued for 2nd place, which was gained by *Southdown* closely followed by *Schwalbe*. Owing to *Gekko's* eagerness in an attempt to secure second honour, he slipped, and placed himself and rider at the bottom of the Double instead of over it.

Nearly the whole of the ponies went unusually well, although the croppers were by no means like angels' visits, as the take off at most of the jumps was so slushy and slippery that the ponies were unable to collect themselves properly before leaping. It is impossible to give any detailed account of the Handicap, as to do so one must have been ubiquitous ; suffice it to say that no accidents of a serious nature occurred, the occasional duckings only adding to the excitement of the sport and the amusement of the spectators, and that the Steeplechase was one of the very best that has ever taken place over the Course. So many ponies went straight and well, that it would be invidious to make any comparisons. The two first in, *Furore* and *Southdown*, thoroughly deserved the honour they won, having jumped magnificently throughout.

THE A. D. C. PERFORMANCE.

The third performance of our Amateurs at the Lyceum, on Friday, was unquestionably the success of the season. There had been some doubt as to the wisdom displayed by the Committee in selec ing the "*Heir at Law*," but after the first act, no hesitation could exist as to the propriety of the choice or the ability of the corps to carry out the parts assigned to them. We shall not attempt to follow the plots of the two dramas presented ; as "*I have written to Brown*" is far too slight and absurd to bear a serious process of investigation, and the sturdy old comedy by Colman is so well known that the critic is absolved from the necessity of analysis. With regard to the first piece, we may give great praise to Messrs. Thomas Hawk and Barkins. The former actor is the best representative of Charles Matthews' parts, we have ever had on the Shanghai stage. He is full of life and animation—easy and natural in his by-play, and, besides, he has the great advantage of being always distinctly audible. His entrance after the supposed robbery was capital, his prompt changes of policy to meet the varied requirements of constantly changing circumstances were assumed with great spirit and effect, and his mastery over the mind of the unhappy *Dotts* was as complete and farcical as one could desire. Miss Castor played well and looked well, and the new actress, Miss Edmunds, promises to be a great acquisition to the corps. If Mr. Waffles exhibited a tendency to over-act, it really did not much matter, as the more absurdity that was crowded into the piece, the better. Those of the audience who came late wanted time to get settled in their places and to look round the house, and those who came early were none the worse for a hearty laugh at whimsicalities which formed a good introduction to the old-fashioned humour and conventional construction of the comedy that was to form the *pièce de resistance* of the evening's entertainment.

The "*Heir at Law*" is a good specimen of the old comedy. It ranks with "*John Bull*," "*Speed the Plough*" and "*The West Indian*," but though cast in an antique mould it is still rich in knowledge of stage effect, and abounding in capital characters. There is always considerable risk in putting on a piece which hinges on one actor, but here we have at least four parts of striking prominence. If *Pangloss* fails, the success of the drama may be retrieved by *Zekiel Homespun*, and if *Zekiel Homespun* is not all one can wish, a *Dick Dowlas* who is in earnest, will do wonders to keep the audience in good humour. On Friday all the leading parts were admirably filled. Mr. Walbro' thoroughly appreciated the character of the Gosport chandler turned Lord. There was a completeness and a finish in his version of the *pseudo* Baron Duberley that we do not often find. The voice, the gait, the uneasiness in his fine clothes, were all true and unexaggerated traits, and perhaps the best scene of the evening was that in which he comes out with homely proverbs suited to a retail tradesman, when *Stedfast* is expecting the stilted periods of a Parliamentary orator. *Dick Dowlas* is not a gracious character to play, and yet it is second to none in difficulty. Mr. Montressor has never acted so well, and indeed in the first act he could not have entered more thoroughly into the spirit of the scene than he did. His altered manner to the honest friend of his boyhood, when he hears he is a Peer's son, was very well rendered, and if his subsequent repentance was less favourably received by the house, he must console himself by the reflection that it was getting late, and the audience were tired of applauding.

Dr. Pangloss, the typical charlatan tutor of a past generation, is, we presume, the favourite character in the play, and the remarkable success which has recently attended the revival of the "*Heir at Law*" in England, is to be attributed to the excellence of Mr. Clarke's impersonation of the classical quack. Mr. Carpenter gave us a careful and level rendering of the Doctor. He attempted no varieties of facial expression ; he did not make all the usual points, nor give the accustomed grotesque emphasis to the classical quotations, but he had evidently studied the part with the greatest care, and his exit at the end of Act 2 excited hearty laughter. But the event of the evening was the debut of Mr. Kidnapper as [illegible] remembered by Shanghai Playgoers for many years. The new actor has the one quality which insures success. He has *earnestness*. Directly he spoke, he carried the house with him. Sympathy was at once established between the audience and the actor, and whenever he was on the stage his presence was felt. The part of the honest countryman, with his friendship for *Dick*, his loyal love for his sister, and his grateful tenders of aid to her patroness, *Miss Dormer*, when he finds himself suddenly affluent, is a part calculated to enlist the interest of the spectators, and the generous sentiments, in spite of cynic criticism, are always favourably received. Mr. Kidnapper will we hope appear often again. He is a valuable accession to the company, and will strengthen any cast to which he contributes his aid. We must not forget, however, in our eulogy of the brother, to accord a large measure of praise to the fair *Cicely*, who found a charming representative in Miss Castor. She looked exceedingly pretty, was most becomingly and appropriately dressed, and presented a picture of a Somersetshire country lass that Gainsborough might have painted.

We are compelled to dismiss the other characters with a shorter notice, but we may say generally that all were well filled. The *Stedfast* of Mr. St. Aubyn was sententious and emphatic. *Deborah Dowlas*, alias *Lady Duberly*, and *Caroline Dormer* were not easy parts and require practised performers, but considering the difficulties that they had to encounter both Miss Jenny Rickshaw and Miss Robin deserve to be commended. The *Henry Morland* of Mr. Doolittle was perhaps a trifle too ponderous, but a man who had undergone the various misfortunes that *Morland* is supposed to have suffered, may be pardoned for being somewhat sombre in demeanor. *Kenrick*, the comic Irishman, was given to Mr. Tristan d'Acunha, and was played *con spirito*. In a word, we must congratulate the A. D. C. on the general effect of their third performance. It was a marvel of good management. The actors were well up in their parts, the scenery was charming, and everything worked without a single hitch. The feeling that all is not right behind the curtain very soon communicates itself to those in front, and when all is going well on the stage, the audience are easy and in good humour. Last night Actors and Audience were thoroughly at one with each other, and though the entertainment did not end until after 12 o'clock, the interest never flagged.

The orchestra was very strong, and played the following selections with brilliancy and effect.

Debatten Waltz—Gung'l.
Selection from les Huguenots.
La périchole Quadrille.
"Spring Gentle Spring" Waltz.

Miscellaneous.

THE FIRE ON THE FRENCH BUND.

The premises on the French Bund occupied by the Mitsu Bishi Steam-ship Co. were burned down yesterday morning. The fire-bell rang out the alarm about 6 a.m.; and the several Companies of the Fire Brigade were quickly on the spot, and in a very short time twelve streams of water were brought to bear upon the burning building. The men-of-war in harbour also landed detachments with great promptitude, who were active in saving merchandize and such moveables as could be got at. Nearly all the office furniture, safes and books were thus saved. The flames spread, however, with great rapidity, and in an incredibly short time the whole building was ablaze. The efforts of the firemen were greatly directed to saving the adjoining premises of the Messageries Maritimes Company, in whose godowns some 370 bales of silk were stored; and their efforts were successful. The danger at one time seemed imminent that these also would catch, and the heat was so great that several windows were broken.—By 8 a.m. the fire was so far got under that all danger of its spreading was past; but the buildings in which it originated were destroyed—with the exception of one room, which seems to have escaped almost intact. A bedstead standing in it was apparently uninjured, and a small dog was found under it none the worse for his adventure; though he was so thoroughly frightened that it was with some difficulty he was persuaded to leave his post.

The origin of the fire has not, so far as we can learn, been ascertained; but we are informed that a smell of burning wood was perceived about 3 a.m., and our informant went round the godowns under his charge, but could not ascertain whence it came. Several streams of water were kept playing upon the ruins till late in the day, to secure the complete extinction of the embers, and prevent a fresh outbreak. The accident does not involve a heavy loss to the Insurance Companies.

NOTES OF AN OVERLAND JOURNEY FROM NEWCHWANG TO PEKING.

On the morning of 12th November, 1874, a "large" clumsy cart with straw mat-awning, drawn by two horses and a mule, came to my door. In this I journeyed to Peking and back. The axle of this "large" or goods cart, is firmly wedged into the wheels and revolves with them. The cart is mentioned in the "Lwun Yü," along with the "small" or travelling cart used all over the North and in the streets of the capital. Confucius may have often sat in one on the opposite side of the ferry. Clad in a fur suit and with abundance of wrappers, 10° below zero could be looked calmly in the face. In this large cart one can recline at full length or sit up at pleasure. Jolting in ruts on the plains, bumping against rocks in the mountains are some of the minor evils inseparably connected with all cart travelling, for the luxury of springs is unknown, and I fear impossible before the construction of something worthy the name of roads.

As it was full mid-day before the team was got in motion, we got no further than 60 *li* the first day. By the time we arrived at the bank of the deep, wide, swift-flowing Liao, the sun had gone down, and all attempts to summon the boatmen from Tien-jwang-tai were futile.

We knocked at the gate of the largest compound in the small hamlet on the East of the river and, after some parley, were admitted. The landlord turned out, throwing over his shoulders an outer garment which had known better days. Never did I see a Chinaman with a more listless, spiritless expression than this man wore on his face, pale and thin from want of food. "No," he said, "there is no business. Those robbers have driven it all away." On my return homewards it was reported that the robbers had crossed the river, plundered the desolate inn of its few possessions and taken the poor man's life.

Next morning by sunrise we were at the river-bank expecting the ferry boat. At seven o'clock she still had not come. At eight I became impatient and sent the carter across in a "sanpan." At nine I could stand there no longer, and in no very peaceful mood summoned a small boat to take me across to the ferry-house. A very obliging, respectable Chinaman accosted me by name;—had supplied me with beef, etc. in Newchwang, and readily conducted me to the ferry-house. He was most frank and friendly, and by the time we approached the ferry-house my wrath was evaporated and he was quite ready to acknowledge that the ferry was his! It was about mid-day before the cart was got fairly across. I mention this man, who was an intelligent Mahommedan, because in the course of a long conversation as to the origin and progess of his religion in China, I happened to say that a gentleman had informed me of a belief common among Chinese, that the present dynasty was about to expire, and that the next would be a Mahommedan. "No," said my friend with a most thoughtful, serious countenance looking to the ground, "No, we do not wish that, we do not desire to see a Mahommedan, lord of China. Our sacred books declare that immediately upon the accession of a Mahommedan dynasty there will break out a period of two hundred years anarchy, universal confusion and war. And this period over, comes the last day, when the earth shall be destroyed. No, we dont want that." At Tienjwangtai commences the "robber-producing" country" as my man called it. This robber tract took us five days to pass through, on account of the bad roads. It is about a hundred miles from E. to W., with a number of goodly sized villages, though not so populous as the region to the W. of it, nor as that to the E. of the Liao.

Early one morning, as we were about to pass before a village inn, a carter coming from the west whispered, "They are taking money in there." My carter hurriedly drove his team to the left, in order to pass through the village by another road. The meaning of the words turned out to be, that there were three armed robbers in the inn, levying black-mail of ten taels on each empty cart, in default seizing horses or mules, and taking what they would find useful from other carts. There were twelve carts, representing at least fifteen men, detained then. The three men went up on the house-top and looked after our cart as long as it was in sight, seemingly undecided whether or not to attack it. In the evening it was reported there were seven "white wolves," but they feared foreign arms. When some miles away we observed a large white cloud behind us, and ascertained it was a stock of winter fuel fired by those robbers, because the owner would not or could not pay the sum of money demanded.

The robbers of Manchuria have not a particle of the generosity ascribed to the Robin Hood class. The poor foot-traveller is stripped of his cotton-wadded garment as readily as the wealthy of his fur-robe. The innkeeper has to furnish the best in his store in abundance, and of course "without money," while the wives and daughters of the poorest are ravished, and any woman remarkable for beauty is forcibly dragged to their mountain dens. The knight errant has yet to be created. The great majority of these robbers are Mahomedans, proudly claiming descent from the Arab bandits of the far West. Mahommedans are however plundered with the same impartiality as Buddhists. There is no sign of connivance or secret understanding of innkeepers and carters with the banditti, for these classes suffer most.

In those districts which are their haunts, one robber is as powerful as twenty. The carters at the above inn, though a hundred strong, would not dare defend their property for fear of vengeance; in less than twenty-four hours an inn or village would be burned to the ground, where any of the gang has been attacked.

One afternoon we put up at a large and good inn under the supervision of a jolly friar of the Buddhist order. He has a small temple with two disciples, but his heart is in the inn, where he employs from seventy to eighty men. He looks the rotund land-lord rather than the ideal abbot. His left eye is a large round one, looking a great deal too much to the left, and is always weeping, not I fear from religious emotion. His right is a very small, scarcely perceptible eye, but is large enough to look after the main chance. It was commonly reported that robbers dared not attack this inn, nor come within 20 *li* of it; not from religious motives but because of the 80 men. Unfortunately for him this belief was belied, for just before my return a party of fully one hundred robbers attacked and pillaged his premises.

About 100 miles West of Tienjwangtai is the busy village of Shŭsanjantsŭ, where the road viâ Tienjwangtai converges with the high road from Moukden to Jinchow and Peking. Once here, it was said there was no further danger from robbers, as the road was so much frequented, bands of soldiers passing over it almost daily. On the way back the heroic conduct of a band of 50 soldiers from Jinchow was much praised. This band were sent Eastwards to punish or check the robbers who had pillaged "Abbot's" inn. They came upon a party of 50 robbers, while the latter were enjoying their opium pipes in the largest inn of Shŭsanjantsŭ, killing 4 of them and driving the rest Eastwards as far as the hills to the South of Moukden. Arriving at the above village, I found this story considerably modified. Fifty soldiers were on their march into the robber district, but found it pleasant to sleep in the inn above mentioned, before beginning their campaign. During night a party of 50 robbers, who had heard of the movement of the soldiers, rushed upon the inn, fired it, killed 3 men and got one killed, putting the soldiers to flight. I saw the inn with scarcely half the wall standing. So much for Chinese veracity. Chinese soldiers cannot root out this pest, for they dare not attack the mountain retreats.

Nearing Jinchow on our way home, we saw a number of heavily loaded carts turning back, many others standing undecided. The reason of this was, that the Jinchow authorities had given orders to hire a certain number of carts to transport soldiers to the seat of war in the East. Very few carts were needed, but the "yayi" pounced upon all the empty country carts in the city. The hire given by the Jinchow authorities is pocketed by the yayi, the innkeepers being compelled to feed soldiers, drivers and teams. But there were no soldiers to act the paymaster for the carts returning, hence the great reluctance of drivers to enter the city. But why seize so many carts? Because all who had some spare tiaos gladly paid a ransom to be freed from the "press-gang." And the process of "pressing" carts is continued long after all the soldiers are gone. It is one of the many ways in which

the half-paid or unpaid Yamun attachés find their wages.

On the way from Jinchow to Moukden, the roads were such as to remind one forcibly of the bye-gone ages in the West, as described by Sir W. Scott. From every cart were flags flying of various devices, from the yellow, falsely pretending to wave over imperial goods, to the red of the common guard, called "Bao Biao;" also spears, swords, bayonets and muskets, not "gleaming," for they were all rusty, for show not for use. We met one long train of travelling carts with these accompaniments and a rear-guard of 50 "Bao-biao" besides. Except my own, there was no solitary cart.

We travelled two stages per day, the first commencing from two to four a.m., ending at from eight a.m. to one p.m. for breakfast; the second from breakfast time till four p.m., sometimes till dark; going over 80 to 120 *li* per day. The mode of conveyance is no more different from that of the South than are the food and habits of the travellers. The tea of the South is replaced by boiling water in the North, the native traveller drinking a considerable quantity on arrival at his inn. His brick sleeping kang is comfortably heated by a fire of the stout millet stalks which form ninety-nine hundredths of the native winter fuel, as does the millet grain of the native food.

After passing Jinchow to the West, I observed that the common kettle was displaced by a copper tube 3ft. long and 3in. in diameter, its handle just at the mouth. This is thrust in among the millet stalks under the kang, and the traveller's hot drink speedily prepared.

At their meals, all the natives drank heated undiluted samshoo, without charge. Yet among the thousands I saw drink this strong spirit, only one was uproarious. Drunkards I have not met, though instances of men and women becoming drunk are not uncommon. At certain seasons of the year it is the custom to get drunk, but this is inside the house. There are enormous quantities of raw spirit consumed; drunkenness is however, not a Chinese vice.

For 400 or 500 *li* East of Shanhaigwan (mountain custom house), the border town between Chihli and Manchuria, or "Gwanli" and "Gwandoong," the high road intersects range after range of mountains, separated by valleys which as a rule are very narrow. In this part of the road there is probably as much artificial cutting as I have seen in all my travels. It reflects far greater credit on the perseverance and wealth of the Tang (or other) dynasty, than on their engineering skill. There are many hundreds, perhaps thousands of clay hillocks cut right in the centre, while a tithe of the cost would have sufficed to cut a good road on the face of the hill. The engineers seem to have been more afraid of curves than even the old railways. Another advantage they would have gained by this slight detour is that they could easily make a road broad enough for two carts to cross, while at present the carter entering a cutting from one side, has to use his lungs unsparingly to prevent the entrance of carts from the opposite direction. Occasionally, however, even carters' lungs are insufficient to warn, and two carts or two lines of carts going in opposite directions are inside; and then what a waste of words and loss of time! Chinese draught animals are taught to draw only, as a rule they cannot "back"—hence the cart has to be dragged backwards outside the narrow cutting by the drivers. There is also a good deal of cutting in solid rock. These mountain ranges all run from N.E. to S.W., parallel with the great mountain chains, nearly two hundred miles to the East and extending into Corea; the rich and populous plain watered by the Liao and its numerous tributaries, lying between. It is rare to find any exception to this South-westerly course. The "Chien Shan," presenting mountain scenery as grand as any country can produce, lies at right angles to the Eastern range. Like the Eastern, by far the greater proportion of those mountains consists of very coarse-grained granite; white prevailing in the Eastern, red in the Western. Limestone is not scarce, and is pretty extensively burnt in both the East and the West. Gneiss and several kinds of trap occur, but are far from common.

We came across three coal-producing districts between Tientsin and Jinchow. About a day's journey West of Shanhaigwan, very early one morning, with thermometer about zero, I came up with a farmer, busy collecting horse manure for his fields, and said, "You get coal here, do you not?" "Yes," he replied, "at the distance of a few *li*." "I thought so," I said, "for there are so many trees standing." Beyond Shanghaigwan, I found the province of Chihli ("Gwanli") very poor. Many houses in the towns are crumbling to ruin, more standing in much need of repairs the means for which seem wanting. A few villages are virtually deserted. No new ones building, that I can recollect. This state of matters appears to be the result of perpetual floods. Last year's was a good season, yet provisions of all kinds cost 50 per cent. more than in Manchuria ("Gwanwai"). If they have two good crops in seven they consider themselves wealthy, if only one, they can barely exist.

There are two things remarkable by their absence, fossils and black earth. Over two thousand miles of country, N., S., E. and W., I have not come across a single fossil more interesting than lignitic coal and some quartz crystals in granite rock. Strange that plutonic rock should be so universal! Possibly coal mines and lime quarries may yet produce some fossils. How account for the absence of black soil? I have not yet crossed over 200 yards of black earth. All the earth is of a clayey consistency, except in the wide river beds, which are sandy and sometimes gravelly. Red clay is not uncommon, but a pale grey is the general colour. In all the plantations known to me at home, the earth was black, and black in proportion to the thickness of the trees and shrubbery; in almost all marshy ground—in all bogs, it was black, and peculiarly so in old graveyards. Is the blackness the result of, and in proportion to the amount of, animal or vegetable decomposition? Chinese use up all straw—even roots—for fuel.

The people have a saying, "Every five *li* a '*dwun*' 墩, every ten *li* a '*tă*' 塔;" the *dwun*, a square brick fire-beacon is there in excellent preservation, but there is only one *tă*, and it occurs just outside Shanhaigwan, a hundred feet square. The remains of ancient earth-works lie round about it, for here, it is said, the ancient Chinese warriors used to marshal their hosts in order to meet the Corean foes who held Jinchow, and who have left two Corean towers to the west of it. Many must have been the battles before the Coreans where driven first beyond the Liao, and finally the Yaloo, where they are all but inaccesible to any army marching through Chinese soil.

At every two and a half *li* is a small house, neat and clean, for it is yearly white-washed and painted South, East and West with large black characters, intimating that inside is the catcher of thieves, and giving the names of the district town and the nearest inns east and west of it. In each is supposed to reside a Manchu soldier, to protect the trees which should grow at each side of the road as "guides;" but there are more empty than occupied houses, and nearly as many houses as trees.

The thin edge of the wedge has got pretty far into the tree of Chinese practices and customs in the North. In the vicinity of Tientsin is a large number of tall chimneys, regardless of "Fungshuy," used in the manufacture of war-stores.

In Tientsin, I was particularly interested in the scene of the murder of the French nuns. From the rumours current, I fear there was some basis for the fury of the populace, in a want of prudence on the part of those who paid so dearly. We know to what a pitch of fury the people of the West could be roused by tales of the "resurrectionists;" and however groundless and absurd the calumny that children's eyes were used for the preparation of foreign medicines, it was the part of prudent people to allow and even invite all needful examination to remove that calumny. Roman Catholics object to throw their nunneries open to government inspection. They carried out this policy in China, and, as in the West, people believed there was something evil to conceal. This missionary question is difficult, only because of the open or secret opposition of most politicians to all missions of every kind. If politicians went calmly to work to check imprudence on the part of such men as are imprudent, they would gain the hearty support of the best missionaries; but, as long as they lump all missionaries together, as more injurious than drunken soldiers or licentious clerks, they need surely not expect the co-operation of any missionary worthy the name. Protestant missionaries may be, and perhaps sometimes are, guilty of indiscretions, for which, if serious, they should be called to account; but there are some practices (not acts merely) common among Roman Catholics which should be put down by those who have or ought to have the power.

The Chinese officials are correct in stating that the people do not know the distinction between Protestant and Roman Catholic. Where contact with Protestant missionaries is frequent, the existence of the difference is known, but the great majority of the natives are ignorant of it.

Experience tells me that missionaries should be encouraged as much as possible by our authorities to visit the interior. On my journey Westwards, it was often with difficulty and always with grumbling we found entrance to the inns; we were received with open arms whenever, on our return, we fell in with the track already passed. I do not think anything will open up the interior so readily as the frequent visits of the missionary, who should, as a rule, speak the language better than the merchant, and who presents the Chinese with a side of Western life not always found accompanying cotton and opium

In regard to the future of trade in these parts, much cannot be said. North of Tientsin, Newchwang is and shall long continue to be the principal outlet for the export trade. It is the most accessible to carts from the great grain-producing north, and its deep river throws it open to shipping. There is some coasting trade carried on by Jinchow and Shanhaigwan, both of which cities border the sea, but the gulf is shallow. It is my impression that a fair amount of import trade to Jinchow might be carried on by flat-bottomed steamers. Land carriage adds largely to the expense of cheap goods. Grain, which sold in Jinchow at 26, was selling in Moukden at 15, the difference, principally, showing cost of land carriage over 500 *li*. Cottons, too, are both heavy and bulky in proportion to their value; hence every hundred *li* makes an appreciable difference in the price, and the supply of cottons rapidly decreases till at last they disappear. This is true of Jinchow, which is nearly 500 *li* from Newchwang, and goods carted thither have to pass over a road very expensive in horse feed. Opium is the only thing which heeds not cart-hire, being expensive in proportion to its weight and bulk. Hence it is found everywhere.

Jinchow is without exception the busiest Chinese city I have seen. Its population

should number not much less than 150,000; its streets are lined with good shops, daily thronged by thousands of country customers. It is much superior to the lines of booths forming the Capital. Its streets, like those of all Manchurian cities, are well paved. To the North, on the way to Moukden, are two good cities of about 50,000 souls each, besides some large villages; one needing only a wall to be called a city. To the West are several cities besides Shanhaigwan, some of which are very busy. Upon the whole, I think Jinchow would become a pretty good centre for foreign trade, provided the gulf would be found deep enough.

As a mission centre, it presents the same advantages as for trading. The Irish mission located here have taken that route, as we learn from an Irish paper. We wish them all success.

Newchwang, 30th Jan.

Correspondence.

MANCHURIA.

To the Editor of the
North-China Herald.

Dear Sir,—Perhaps you may think it worth while to insert a few lines, which may help to clear up some of the obscurities caused by the very peculiar spelling for Chinese names, which your correspondent has adopted in his interesting account of his overland journey from Newchwang to Peking.

The large city of *Jinchow*, of which he gives a description, is no other than the well known *Kinchow-fu* 錦州府, the chief city of the smaller of the two *fu* or departments into which Shêngking or Southern Manchuria is divided,—Moukden being the chief of the other. Your comspondent's estimate of its population is, it is certain, very greatly in excess. The walls of the city are only about a mile and a half in circuit, and the suburbs, with the exception of the Eastern one, are insignificant. It does not cover one-fourth of the area that Moukden does, and three independent estimates of the population of Moukden agree in placing it at about 200,000. It is scarcely possible that Kinchow-fu contains as many as 50,000 inhabitants, and it is much more likely that the population is under 40,000. Its principal industries are the manufacture of felt and leather articles of all kinds, the raw materials for which are obtained from the extensive grazing tracts in its vicinity, and from the plains of Mongolia to the North. Besides these, its trade is comparatively unimportant, as it is not the centre of a large agricultural district. The city itself lies twelve miles inland, north of the North-western extremity of the Gulf of Liaotung, which is here so shallow that junks drawing six feet of water lie at anchor in an open roadstead eight or ten miles from the small town which answers for the port of Kinchow-fu.

The region which your correspondent disguises under the spelling of *Gwandoong* is Kwantung, a very commonly used popular name for Southern Manchuria; and his *Shanhaigwan* will be recognized as Shanhai-kwan, the important point where the Great Wall terminates in the sea. So his Shŭsanjantsŭ is *Shihsan-chantze* 十三站子, a large village at the junction of the highroads running from Newchwang and Moukden to Peking. His picture of the robbers which infest the province only too strongly confirms what we have been told of their doings of late years.

Yours very truly,

T.

Shanghai, 12th March.

WATER.

To the Editor of the
North-China Herald.

Dear Sir,—The chief objection to the plans recently proposed for supplying the Settlement with water, seems to be their great cost. Those who take the pains to consider them, after dwelling upon their agreeable completeness, come to the distressing total of cost, put their hands into their empty pockets and sadly walk away.

The general outlines of the proposal are—water drawn from the river at the Pagoda, brought here in large mains, pumped up to raised reservoirs, and, finally, a distribution through the Settlement extending to the foreign houses and possibly the native also.

This elaborate plan is on the principle of "Let us do the thing well while we are about it." But when the want is pressing for a simple supply of good water, why should we care to go beyond the need, at the hazard of preventing all action for a long time to come?

It is not increased luxury that we want, which term may be applied to carrying water over our houses, but the supply of one of the first needs of life in the simplest manner in which it can be brought to us.

The first extravagance in the plan is the drawing the water at the Pagoda, involving the cost of two reservoirs and two sets of pumping gear, in place of one, and some miles of very expensive pipe. We already know by experience that there is no practical difference in the quality of the water drawn at the Pagoda and at points near the Settlement, including the Soochow Creek, the fact being that the earthy sediment, which fills and colors all the running water here, helps to precipitate impurities, and the water clears itsef in a remarkably short time. I believe we may safely take it for granted that water drawn from the middle of the Soochow Creek, at half tide and upwards, somewhere near the outlet of the Defence Creek, and properly settled, would be good enough for the purposes of the community, and vastly better than any we get at present.

Proceeding upon the economical principle—having determined upon a point near the Settlement, a piece of land of about 25 to 30 *mow* must be bought, say of a size sufficient for two capacious ponds, or ground reservoirs, and the space required for a raised reservoir of more moderate dimensions.

The ponds could be simple excavations, with sloping sides, of as great a depth as possible without taking water from the percolations through the subsoil, say, perhaps 8 feet deep, and say 400 by 100 each. These ponds would fill at above half tide in the creek, by mains which would admit the creek water through sponges and coarse gravel. As one pond settled, the other would be drawn from by the pumps, which would throw the water into the raised reservoir. This last could be built of brickwork and cement on a mound of earth, provided by the excavation of the ponds. I do not know the head that would be required, but I suppose that 40 feet would force the water to all parts of the Settlement, on the level of the streets; and that height could be got partly by the mound of earth and partly by arches, without extreme expense. The raised reservoir, however, is the costly portion of the arrangements, and, whatever the cost, must be made as substantial and perfect as possible. Next comes the distribution. There are about 27 miles of streets, and water fonts should not be more than 800 feet apart. Allowing for the streets crossing each other, and for some fonts thus answering in four directions, the number of fonts would be about 150. The fonts should have springs, so that the water would not run without the hand upon the spring, in order to prevent waste.

Supposing it necessary to raise a revenue from the water, either to recompense a private Company or pay interest upon a Municipal water debt, it could be done by farming out the various water stations to Chinese contractors, who could keep them locked except at stated hours, and whose charge would be checked by the fact that anyone who preferred could supply himself from the present water courses, as now. Where the labor of water carriers is so cheap as in China, and the mode of life makes such a method of supply almost as convenient to foreigners as pipes in the house, it seems a needless extravagance to contemplate any more perfect supply than one which will be within 400 feet of everyone's gate. Indeed most of us would prefer the water carrier to the pipes, considering the imperfect nature of such work here, the carelessness of our servants, and the consequent danger to our interiors, if our houses were filled with pipes, tremulous with a pressure of water.

Will not some one of your clever readers and contributors give his opinion upon this simple scheme, and perhaps also the approximate cost? Until that is given I venture to sign myself (comparatively).

Cheap Water.

Law Reports.

H. B. M. SUPREME COURT.

Shanghai, 10th March.

Before Sir Edmund Hornby, *Chief Judge*.

In re the bankruptcy of Michael Martin.

This was an application by Mr. McLoughlin, the Trustee of the estate, for his discharge.

Mr. Robinson appeared for the trustee.

Mr. Robinson said this was a simple application that, the bankruptcy having been closed in the regular way by order of the Court, the Trustee be granted his release. To entitle him to this release the Act provides that he should call a meeting of creditors, lay before them a statement of accounts, and a report showing the manner in which the business had been conducted, and inform them of his intention to apply to the Court for his discharge. The meeting of creditors had been held, and the accounts had been rendered, with the unfortunate result that the estate owes the trustee $89. The only outstandings were a promissory note by Mr. Ritchie, and whatever accounts might be collected by Mr. Smidt in the estate of Compton & Co., of which this estate claimed ¾. The Trustee had attempted to collect what he could, and had succeeded in getting $14. The Committee of inspection considered the remainder practically valueless. At the meeting of creditors, a resolution in favour of granting the Trustee his discharge had been proposed by Mr. Silverthorne, and seconded by Mr. Sayle, both members of the Committee of inspection; 6 votes had been given in favour of it, and 1 creditor (for $169) had abstained from voting. The resolution was as follows:—

1. "That the thanks of the creditors be "and they are hereby tendered to Eugene "McLoughlin, Esq., the Trustee of the estate "of Michael Martin, the above named bank-"rupt, for the time and trouble which he "has expended in investigating the affairs of "the bankrupt and at his own personal "expense."

2. "That the statement of the accounts "of the bankrupt's estate laid before this "meeting be approved and passed, and that "the release of the Trustee is recommended "to the Court."

He did not think it was necessary to lay any other facts before the Court; the creditors were the best judges of their own interests, and Mr. McLoughlin being himself a heavy creditor would satisfy the Court that the best had been done—and done at his own expense,—he would therefore simply ask for his release.

The application being unopposed, it was granted.

Shanghai, March 12th.

ROBERT HENRY GORE-BOOTH *v.* ARCHIBALD JOHN LITTLE and ROBERT WILLIAM LITTLE (trading together as "Little and Company.")

Mr. WAINEWRIGHT for the plaintiff.

Mr. ROBINSON for the defendants.

The action was brought to recover the sum of Tls. 3,500, for work done and services rendered as a broker.

The Plaintiff's petition was as follows :—

Petition.

1.—The plaintiff is a Commission Agent and Broker, carrying on business at Shanghai, and the defendants are Merchants carrying on business at Shanghai.

2.—In or about the month of January, one thousand eight hundred and seventy-three, the defendants applied to and requested the plaintiff to act as their broker or agent, in finding a purchaser for a steamship which they were about to get out, or in the event of a purchaser being found, would get out, from England for sale; and the plaintiff agreed to act as such broker or agent, at the same time informing the defendants that his commission or brokerage would be five per cent., and this the defendants gave the plaintiff to understand they would pay.

3.—The plaintiff accordingly made enquiries, and in the course of a short time introduced the defendants to certain persons, or a certain person, in Shanghai, representing a certain Company or partnership known as the China Merchants' Steam Navigation Company, which said Company was desirous of purchasing a steamship to be used for the purposes of their business.

4.—The defendants and the said representative of the said Company, thereupon entered into negociations, which resulted in the latter, on behalf of the said Company, agreeing verbally to buy from the defendants a certain steamship, and, in payment for the same, to transfer to them a certain other steamship called the "*Aden*," which was valued at thirty-five thousand Taels, and to pay to them the sum of thirty-five thousand Taels, in cash. In the negociations aforesaid, the plaintiff took an active part.

5.—A written contract was prepared in the Chinese language by the said intending purchasers, embodying the terms referred to in the last preceding paragraph, and was sent to the defendants for signature.

6.—The defendants then, for the first time, objected to the amount or rate of the Commission which the plaintiff had stipulated for, and refused to sign the said contract, unless the plaintiff would reduce it. The plaintiff refusing to do this, the defendants did not sign the said contract, and by reason thereof the said sale went off.

7.—The plaintiff alleges that he did all things necessary on his part to entitle him to his Commission of Five per cent. on the sum of seventy thousand Taels, the value placed upon the said steamship by the defendants, and agreed to by the said intending purchasers, and that the said sale and purchase, having gone off solely by the acts or defaults of the defendants, they, the defendants, are liable to indemnify him, the plaintiff, for the loss of his said commission, or, to compensate him for his work and labour in and about the premises; and the plaintiff claims in respect of such indemnification or compensation the sum of three thousand five hundred Shanghai Taels.

8.—The plaintiff also sues the defendants for money payable by the defendants to the plaintiff, for the work, journeys and attendances of the plaintiff by him done, performed and bestowed as the agent of and for the defendants and otherwise, for the defendants, at their request, and for commission and reward due from the defendants to the plaintiff in respect thereof.

The plaintiff therefore prays

1.—That the defendants may be decreed to pay to the plaintiff forthwith the said sum of three thousand five hundred Taels, or such other sum of money as shall be found to be due from the defendants to the plaintiff.

2.—That the plaintiff may have such further or other relief as the nature of the case may require.

The defendant's answer ran thus :—

Answer.

1.—No contract or agreement for the sale and purchase of a steamship was ever concluded between the defendants and the Representative of the China Merchants' Steam Navigation Company, as stated in the 4th paragraph of the plaintiff's petition.

2.—It is not the fact as suggested in the 6th and 7th paragraphs of the plaintiff's petition that the proposed sale and purchase of a steamship went off solely by the acts or defaults of the defendants. The defendants would have been well pleased to sell their steamship to the said Company, but were unable to do so in consequence of the said Company's refusal to agree to the terms of the defendants.

3.—By reason of such refusal by the said Company, no sale of the said steamship was ever effected, and the plaintiff was never entitled to any commission.

4.—As to the whole of the petition, the defendants say they never were indebted to the plaintiff in any sum of money for any of the causes of action alleged or stated in the said petition.

Mr WAINEWRIGHT, in opening, said it was a suit brought by the plaintiff against the defendants to recover remuneration for work done by him for them in negotiating the sale of a steamer to the C. M. S. N. Company. He then read the petition and answer, as above given, and went on to say that the facts of the case were tolerably few. The plaintiff, in the month of November, 1872, had sold to the C. M. S. N. Company, on behalf of George Barnet and Co., a steamer called the *Daybreak*, at a good price. Shortly afterwards, he met one of the defendants, Mr. Robert Little, with whom he had some conversation respecting transactions of that kind. Mr Little suggested that he should do something of the same kind for them, and the result was that a correspondence ensued, the plaintiff sending the defendants a number of estimates or calculations respecting steamers. The defendants had had much to do with shipping and the chartering of ships, and they entered into the affair with considerable heartiness. They telegraphed to England for particulars of steamers, and afterwards gave plaintiff the particulars of three steamers, to offer to the C. M. S. N. Company. One of them was a very large vessel, and would be distinguished in the case as the "Tls. 80,000 steamer;" the second was a smaller vessel, which would be known as the "75*a* steamer;" and the third was the one afterwards known as the *Laptek*. The particulars of these vessels were handed to the plaintiff, and he handed them to the China Merchants' Company. He spent a good deal of time in the matter, and finally brought them to terms, getting the price which had been named to him by the defendants, for the "75*a* steamer." In all essentials, he concluded the sale of that steamer. Much correspondence passed on the subject, there being some 72 letters; but he (Mr Wainewright) did not propose to burden the Court by reading the whole of them. He and his friend (Mr Robinson) had read them, and were prepared to admit the contents of some. The others he would read as he proceeded with his opening.

Mr. ROBINSON—Do I understand you that he negotiated for the sale of "75*a*."?

Mr. WAINEWRIGHT—He virtually concluded a contract with the Company for the sale of "75*a*." On the 4th January, 1873, the defendants stated the price at which they would sell the "75*a*."

Mr. ROBINSON—I suppose my friend proposes to put all those letters in.

Mr. WAINEWRIGHT said he proposed to put in everything, and he then read a letter from the defendants to plaintiff, which gave the prices of the steamers, and pointing out that "5 per cent. was a large commission, and that they thought he might offer his friends half of it and so get them to fix." On the 25th January, plaintiff wrote to the defendants that he had settled the sale of the steamer at last, provided the contract which Mr. Chu had drawn up was mutually satisfactory. That letter was endorsed by one of the defendants, R. W. Little, "Gore-Booth, steamer sold Chu." Two days afterwards, on the 27th January, the defendant (Mr. A. J. Little) wrote again to plaintiff, to the effect that "Broom came to him about the *Aden*, and that he had referred him to plaintiff," at the same time intimating that he thought the price of the *Aden* should be fixed at Tls. 40,000, and that if they could not sell her, they would load her with new teas from Foochow to Melbourne. Mr. Wainewright then read three other letters, showing, he contended, that the defendants looked upon the sale of the "75*a*" as virtually concluded to the C. M. S. N. Company, and that they were willing to contract for the sale of the *Aden*.

His LORDSHIP—If they got her.

Mr. WAINEWRIGHT—Yes, if they got her.

Mr. ROBINSON—But there was no contract made.

Mr. WAINEWRIGHT—There was no formal contract made. He then went on to say that after some months' hard work, plaintiff got the C. M. S. N. Company to buy upon the terms stated by the defendants; and on the 1st Feb., he went up country, returning somewhere about the 19th. On the 21st, he met Mr. A. Little on board the steamer *Appin*, then on a trial trip, who told him that they (Messrs. Little & Co.) had altered the sale of the steamer, by substituting the *Laptek* for the "75*a*," for which they were to get Tls. 10,000 more. The plaintiff would tell the Court that he was informed his commission was all right, and that Chu could not back out of the bargain. It was clear that the plaintiff was still regarded as the middle man between the parties, for he was written to again on the 23rd February, to try and persuade Chu to purchase the big steamer, which was represented as "dirt cheap" at £21,000. The defendants had thus gone on from the "75*a*" to the *Laptek*, and were prepared to go on to the large steamer. He would here put in a letter of defendants to Mr. Broom, with respect to the *Aden*. It showed that they looked upon her as theirs, and that they were prepared to deal with her.

His LORDSHIP—They wanted to sell her.

Mr. WAINEWRIGHT said that was so. They now came to the 23rd February. About this juncture, the defendants stated to the plaintiff that they had so fixed the Chinese Merchants' Manager that he could not get out of the bargain. A formal contract was prepared, which had been made by defendants in Chinese, which was accepted, and a translation of which he would now put in.

His LORDSHIP—Who was that prepared by?

Mr. WAINEWRIGHT—That will come out in the course of the case.

Mr. ROBINSON—If his Lordship wishes to know, I can tell him at once. It was sent by Chu.

His LORDSHIP—Fix the date of the sending.

Mr. WAINEWRIGHT—It must have been between the 21st and 25th Feb. He thought it would appear so in the contract, when it was itself produced. On the 25th February, the plaintiff received a letter from defendant, A. J. Little, in which he said, "If you like to agree to accept 1½% brokerage, I will sign the contract with Chu to-day. * * * The price which Chu offers will not allow us to pay you more than this. I do not want to cut down your brokerage, but I cannot make a loss, or even risk one, to enable you to earn your 5%. You should have made Chu pay a better price." On that letter the plaintiff lays considerable stress.

His LORDSHIP—That letter implies that there had been an alteration of the terms which had been arranged between Messrs. Little and Mr. Gore-Booth?

Mr. WAINEWRIGHT—No, my Lord; not that, I apprehend.

His LORDSHIP—It would appear from it, that some alteration had been previously notified.

Mr. WAINEWRIGHT was of a different opinion, and thought it would not be disputed that all through the correspondence the plaintiff's commission was to be 5 %, but that, at the last moment, the defendants, in going over the thing, came to the conclusion that they were selling too cheaply, and wanted to get something more by lowering the plaintiff's commission.

Mr. ROBINSON—I suppose my friend is reading from his instructions?

Mr. WAINEWRIGHT said he was.

Mr. ROBINSON—They are greatly at variance with mine.

Mr. WAINEWRIGHT went on to say that the defendant's action could be explained in no other way than that he had stated. When the defendant said, "I will sign the contract to-day," what could have been meant? He never could have said that, unless the contract had been in shape. If there had been no contract, he never could have said "I will sign, if you will take off 3½ % off your com-

mission." That was a very strong point in the plaintiff's case. The plaintiff declined to do this. He had been at an immense deal of trouble, and was not in a position to lose a considerable part of his renumeration. The defendants would not give in, and after a considerable amount of negotiation and correspondence, the affair went off. There was another letter of Mr. A. J. Little's, written on the 26th February, 1873, in which he says, "I will do one of two things, either pay you Tls. 1,000 clear of all claims, or make your 5 % brokerage dependant upon my gaining a clear 5 % by the transaction first. The steamer that you first negotiated about, you could not settle in accordance with Chu's stipulation. With the settling of the second steamer, you had technically nothing to do. I consider this reasonable, and if you do not agree to it, I shall consider the transaction at an end, as I informed Chu when he was here this morning." If plaintiff had nothing to do with the sale of the second steamer, why did defendants send for him to their office on the 25th? On the same day there appeared to have been a letter sent by plaintiff to the defendants, which he (Mr. Wainewright) had not received, because, also on the same day, a second letter was sent to plaintiff by Mr. A. J. Little, in which he said, "I think you don't clearly understand; I will get the steamer out for Tls. 65,000, and of this give you Tls. 1,000, *and take all risks.*" Somewhere about this time, Mr. A. J. Little wrote to plaintiff a chit, inside an envelope, "Tell him I have offered you Tls. 1,000, and that you can't accept it, but that if he comes up Tls. 2,000 and waives objectionable stipulations, I will sign a contract, taking Tls. 30,000, or *Aden*, immediately on arrival of *Daybreak*. If it can't be settled to-day, please consider the thing definitely off. I really can't bother about it any more, and I think you are only wasting your time, too." There was no date to that chit. The plaintiff was trying to get Chu to give more money, and he would tell the Court how the negotiations went on at that time. Mr. Wainewright read and referred to other letters of later dates, having a similar tendency "to let the matter drop" unless Chu could be brought to defendant's terms; until at length the plaintiff consulted counsel, and he (Mr. W.) wrote a letter to defendants, and got a reply which he would put in. It contained a sort of conditional proposal for a compromise, under certain conditions.

His Lordship—Without prejudice?

Mr. Wainewright—Yes, without prejudice.

His Lordship—If so, I do not care about going into it.

Mr. Wainewright said his friend had not touched upon it in his answer to the case, and therefore he himself did not care about it. The remainder of the history of the case showed that the plaintiff, to make it easier for Little & Co., did make attempts to sell the steamer, and it might be stated with respect to the contract spoken of, that the defendants telegraphed to England, the result being that the *Laptek* came out, and she was chartered to one person or another. The defendants said that they tried to sell her, and the plaintiff was always hoping they would sell, so that his claim might be settled. The thing went on month after month, during which the defendants apparently did nothing to get a sale. The plaintiff pressed them for payment from time to time, until finally the *Laptek* was lost. There was other correspondence which he thought he must put in for certain purposes, but he need not trouble the Court by reading it now.

His Lordship—You mean the correspondence subsequent to the time of your writing?

Mr. Wainewright replied in the affirmative. The object of putting it in was to show that the sole difficulty of settling the question was the price. Then there was another point. The defendants' reply to a letter of the 6th October, contained the following: "As promised, we continued our endeavours to sell our steamer, and we very nearly came to terms. The difficulty was this, the other parties who sold to the Chinese got bargain money. Mr. Chu had no money to give us, and he agreed to let us have the *Aden;* but at the last moment he either could not or would not deliver the *Aden.*" That letter also contained an intimation that Mr. Gore-Booth's figures were far from accurate—the steamer cost a great deal more than either he or they expected, and had they sold her to the Chinese they would have made a very heavy loss.

His Lordship—What was the date of the letter in which Mr. A. J. Little said he did not think Chu could get out?

Mr. Wainewright said that was in February. The date was fixed by the trial trip of the *Appin.* He might state that Tong-king-sing took charge of the Company's affairs on the 25th June, 1873.

(Numerous other letters were referred to; on one occasion, as many as five of one date, but those above quoted contain the gist of the case.)

Mr. Wainewright concluded by citing several cases in support of his contention that the plaintiff was entitled to his commission, although the sale had fallen through, because the failure to sell was occasioned by the defendant's default and from no act of plaintiff's. The cases cited were "Prickett *v.* Badger" (26 L. J., C. P. 33); De Bernardy *v.* Harding" (22 L. J., Ex. 340), "Green *v.* Reed" (*Foster and Finlayson*, 3rd vol. 226 p.); "Topping *v.* Eley" (same vol.); "Green *v.* Bartlett" (32, L. J., C. P., 261), and some others. What he (Mr. Wainewright) should try to prove was that in the present case the defendants, if they had chosen, could have completed the contract for the sale of the steamer.

His Lordship—Upon the terms made by the broker?

Mr. Wainewright replied in the affirmative, and said he thought it would appear that Chu was prepared to give the price asked, and that the sale fell through solely through the defendant's act. It was hardly possible to come to any other conclusion. He had only one witness to call, the plaintiff, and he would now put him in the box.

Plaintiff said—I am broker, acting in the sale of ships and merchandise. In November, 1872, I acted as broker for Geo. Barnet & Co., in selling the steamer *Daybreak* to the C. M. S. N. Co. The price was Tls. 100,000. I had an interview with Mr. Robert Little some short time afterwards. He asked me if I could not give him one of those little things like the *Daybreak.* I told him, I should be happy to do so if he would telegraph to England for particulars of steamers. He did telegraph, and got particulars of three steamers. One was a very low class steamer, called "75*a*"; the second was the *Laptek*; and the third was the "Tls. 80,000" steamer. I showed all these particulars to the C. M. S. N. Company, and had a number of interviews on the subject. The Chinese said they did not want to buy any more steamers, and I suggested that they should give the *Aden* and some money for one of them. They offered the *Aden* and $20,000 for the "75*a*." Mr. Little wrote that Tls. 25,000 would do, and nothing less. At last the mandarin authorised me to settle it upon those terms. I wrote to Mr. Little to say so, on the 25th January, 1873. It was well understood between the defendants and myself that my commission was to be five per cent. Two or three days afterwards I went up country. Before I went, I tried to help Mr. Broom to sell the *Aden.* I came back a day or two before the trial trip of the steamer *Appin.* I can't remember how many days I was absent. I met Mr. A. Little on board the *Appin.* He said his friends at home had telegraphed that they could not recommend him to buy the "75*a*" steamer, and he was strongly advised to take the *Laptek* at £3,000 more. Mr. Little told me that he had seen Mr. Chu, and that he had agreed to give him Tls. 10,000 more and take the *Laptek,* and that my commission was safe. I said, I hoped the thing would not fall through, and that he had got the Chinaman to sign a contract. He said Chu could not back out of it. I have heard the letters read, and those written by the defendants were received by me. My instructions from Messrs. Little and Co. said nothing about bargain-money. I suppose the Chinese contract was sent in while I was up country. I understood afterwards that it was for the *Laptek.*

Mr. Robinson—It was a different thing altogether.

Mr. Wainewright—There was no contract ever sent in about the 75*a.*

Plaintiff resumed—My steamer was not refused. Mr. Little preferred changing her for another steamer, the *Laptek.* The next thing, as far as I can remember, was the letter of Mr. Little wanting to cut down my commission. I offered to meet him in a friendly way, but he would not do anything, and I applied to a lawyer. I have never varied my claim in any way, and tried to get him to settle it amicably, but he never met me in any way. I do not remember that defendants told me there was any other difficulty in the terms of contract, than the price.

By Mr. Robinson—It had been noised abroad that I had sold the *Daybreak* for Geo. Barnet & Co. It was soon after I sold the *Daybreak,* that I saw Mr. Little. I cannot fix the date. It was not in 1873. I said if they would get me particulars of steamers, I would try to sell them. I believe Mr. Chu dined with either myself or Mr. Little at the Club. I do not know that he was introduced for the purpose of translating the telegrams. Mr. Little was with me in company with Chu while negociations were proceeding. I think I wrote letter "B 2" before Mr. Little telegraphed to England. (The letter advised defendants to at once get out a steamer at £17,000 cost, of certain dimensions, as she could be sold at a large figure to the C. M. S. N. Co., and a large profit cleared.) Shortly after that I wrote letter "C. 3"—there is no date. (It was to the effect that plaintiff had seen the natives, and they would purchase two steamers at about Tls. 75,000 each, whereby defendants would be likely to clear $10,000, if it was done at once.) I do not remember that Mr. Chu ever sent me any contract. He told me to come and get it to-morrow. I do not remember that I went. He said if there was any great mistake, he wished to have the option of refusing it. That meant if there should be a great error in Mr. Little's figures. It had nothing to do with mine. I understood by the words, "I have settled," that I settled to sell the steamer. I considered that Mr. Chu had bought the steamer. I was in a position to sell the steamer for the *Aden* and a certain sum, and did so. If the contract was not mutually satisfactory, I suppose I should not have been entitled to my commission, but I contend there was a contract. I knew that Messrs. Little knew nothing of the steamers beyond the descriptions telegraphed. I think they might have signed a contract to sell "75*a*" before they knew they had bought her. I cannot answer such a question plainer. I left Shanghai a few days after the letter of the 25th January. My impression is that I was up-country for ten days or a fortnight. I was back on the day of the trial trip of the *Appin.* I think I had been back two or three days. The trial trip was on the 21st February. I looked the date up in a newspaper. I did not know before I went up-country that the "75*a*" steamer could not be sold to the Chinese. I have no recollection of telling Mr. Little not to say anything about "75*a*" to the Chinese. I do not know why she was not saleable to them. He might have shown me a telegram, but I do not remember. I do not remember seeing a telegram that the "75*a*" steamer was uninsurable. I do not remember telling Mr. Little not to tell the Chinese so. I think it would have been a foolish thing to have said so. I do not remember telling Mr. Little to tell the Chinese that she was sold. I gave the particulars of the *Laptek* to the Chinese. She was one of the three steamers given me by Messrs. Little to sell to the Chinese. I think I did nothing further than give particulars. Mr. Little substituted one steamer for another, and I suppose he must have conducted the negotiations. It was done while I was up-country. I do not know why the negotiations for the sale of the "75*a*" steamer fell through, except it was upon the representations of the people at home, who could not recommend her. I did not stipulate for any bargain money. If a buyer rejected a steamer because she did not come up to the description given, I think I should be entitled to my commission in strict law. I asked Tong-king-sing to carry out the contract and buy the *Laptek,* without prejudice to my commission. He said he would call a meeting of the directors. I did not see a letter from Tong-king-sing rejecting the ship, as unsuitable. (Letter produced, dated 27th August, 1873.) I do not consider I have found a buyer, unless he conforms to the wishes of my principal and completes the transaction.

By Mr. Wainewright—The letters of mine were, I do not think, anything more than mere estimates and suggestions. The defendants

gave me descriptions of the steamers. They are in my book, and there can be no mistake about it. Defendants were not to have bargain-money. It was not one of the terms of settlement. I cannot say if purchasers of steamers out here are to have the option of a trial trip, as a regular understanding. The purchasers had in this case. When I went up-country, I believed the sale was settled. People do contract to buy steamers here, upon specifications and a description from home. The *Daybreak* was bought in that way. I do not recollect telling Mr. Little not to say something to the Chinese about the "75*a*." The price I got offered for the "75*a*" was the same as Messrs. Little asked. There was no reduction. I endeavoured to procure a sale of the *Laptek*, merely to bring about an amicable settlement of the affair. I should not have charged any commission for that.

Mr. WAINEWRIGHT said that was his case.

Mr. ROBINSON, before entering upon the defendants' case, would like to be guided by the Court a little, as to how he should proceed. His own impression was that he should not argue the case, but ask his Lordship to nonsuit the plaintiff. That was the argument he should rely on. If the Court thought otherwise, he proposed to call his evidence first.

His LORDSHIP said he thought, if there had been a jury, there was a sufficient case to be laid before them.

Mr. ROBINSON—Very well; then I will now call my evidence. He then called

ALEXANDER N. BROWN, who deposed—I am a merchant in Shanghai, and have had some experience in the buying and selling of ships. I have sold ships, but do not remember whether through a broker. I never heard of any case where commission was paid to a broker where no sale had taken place. In chartering or selling a ship, if the contract was signed by both parties, and the contract fell through, I think the broker would be entitled to his commission. In the course of my experience I have never known of commission being paid to a broker where neither sale nor charter have taken place.

Mr. WAINEWRIGHT did not question the witness.

TONG KING-SING deposed—I am manager of the C. M. S. N. Company, and have been so since 25th June, 1873, I succeeded Mr. Chu. Among some papers in a bundle, were the documents (in Chinese) produced. The translation in English is a correct one. (The first documents were a draft contract for a purchase of a steamer, and the reply from Messrs. Little & Co., saying they would wait before signing until the steamer came out.) We did not buy the *Laptek*, as her carrying capacity was not large enough for our purpose. I have read the contract in Chinese for the purchase of the *Laptek*, sent by Chu to Messrs. Little & Co. Supposing it had been signed, I would not have taken her, because she was not according to the specifications.

By Mr. WAINEWRIGHT—I went on board with Mr. Spedding to examine her. I went all over her. I do not know what her class was. If I had been a Lloyds' surveyor, I would not have classed her "90*a*." Did not measure her length, nor take any step to test her engine power, or consumption of coal, or speed. I heard that in coming out from England she did not do nine knots. I had not seen the specification before I went on board. All I did was to look at the *Laptek*, and found she was not a likely steamer to pay us. I should not have bought the *Aden* if it had been left to me.

T. R. WHEELOCK deposed—I have had experience in ship broking—selling and chartering ships. If I was employed upon certain terms to effect a sale or charter, and my principal afterwards declined to be guided by those terms, I think I should not be entitled to my commission.

A. J. LITTLE deposed — I am one of the defendants. The plaintiff was endeavouring to sell a steamship to Mr. Chu, which we were about to get out from England. I had many conversations with the plaintiff on the subject. The plaintiff was authorised to do the best he could to get us an offer, on the basis contained in his letters. I impressed upon Chu that one of the conditions was that we should have bargain-money, or an equivalent. I told Mr. Gore-Booth so. I remember receiving a letter from the plaintiff, telling us that the Chinese wanted two steamers at Tls. 75,000 each. I telegraphed to England, in consequence, for particulars of steamers. We received particulars of three steamers. One was a first-class steamer, "100 A1," Lloyds; one was "90 A1" *(Laptek)*; the other, "75*a*"—the lowest class of steamer. The latter could have been purchased for £17,000. Our particulars were for steamers carrying 1,000 tons, on a light draft. (The telegrams were sent on the 15th Dec., and replies received on the 18th.) I gave those particulars to the plaintiff, and he began to negotiate upon them. I wrote to plaintiff on the 25th of January, that I insisted upon selling according to the description I got. I never received any draft contract concerning the sale. After I had received the letter on the 25th Jan., that he had settled the steamer business, provided the contract was mutually satisfactory, on the same day, I received another letter from plaintiff, urging me to telegraph, *viâ* Nagasaki, and secure the "75*a*" steamer, saying we should clear $10,000.

His LORDSHIP asked which of these two letters was written first.

Witness said he judged by their contents that they were written in the order he had mentioned them.

Mr. ROBINSON — First of all it is settled; then he telegraphed to complete the purchase.

His LORDSHIP said it was not material, but it struck him the reverse was the case.

[The original telegrams were here produced, giving particulars of the three steamers, and witness read them.]

Defendant resumed—We afterwards telegraphed, on the 26th January, "give us refusal of No. 3 steamer; if new, register and name; part cash, remainder on arrival." If the purchase fell through, the broker would not have been entitled to his commission. On the 31st of January, I wired to England to buy "75*a*" steamer. We received no answer to the telegram asking for refusal. We had heard she could be bought for £12,000, and we determined to buy her at our own risk at that price. On the 7th February, I received telegram, "insurance offices decline to take risk on No. 3 steamer."

His LORDSHIP—What has that to do with it? If Mr. Gore-Booth is authorised to find a purchaser for a steamer, and does so, it does not matter if all the insurance offices in the world refused her.

Mr. ROBINSON—But the contract was not signed. What is Mr. Gore-Booth's own version of it? He says, "if the contract is mutually satisfactory."

Defendant said the Chinese knew he was telegraphing about it. Three telegrams passed on the 7th Feb., and on the 9th we received one to the effect that the second steamer *(Laptek)* could not be bought for less than £17,000. The plaintiff saw all the telegrams. Our agents telegraphed on 20th January that they did not think well of "75*a*" steamer. Plaintiff said it was the business of the Chinese to accept her or not; and on the 25th he wrote that "he had settled the steamer business." It is so long ago, that I cannot remember whether I told Mr. Gore-Booth "75*a*" was uninsurable, before he went up-country or not. I had a conversation with him about it, and he said, "Do not tell that to the Chinese; say you cannot get her, or that she is sold." I remember that distinctly. I conducted the sale and purchase of the *Laptek* myself. I got Chu to give Tls. 65,000, and I accepted it under certain conditions. One of those conditions was that we were to have the *Aden* at once, instead of bargain money; and another was that I should settle with the plaintiff. It was then that I wrote to him to accept 1½ per cent. brokerage, and telling him if he accepted I would sign the contract that day. I meant to say that if he would take 1½, I thought I could put the matter through. When I came to examine that contract, I found variances. One was with respect to the *Aden*. My verbal understanding was that we were to have her at once. The written contract was that we were to have her after the arrival of the *Daybreak*. We could not have made the Chinese give us the *Aden* upon that contract. My verbal understanding was that Chu was to accept the vessel as described by wire. In the written contract, Chu was to be at liberty to reject her if she was not up to specification. If she was not up to the work, she might be left on our hands. I would not effect the transfer until I had got a purchaser for the *Aden*. Chu had given Tls. 50,000 for her, and wished her to appear in the Company's books at Tls. 30,000. He was going to enter my steamer at a higher sum. As a point of fact, the *Aden* is not yet sold. When plaintiff objected to lower his commission, I wrote and told him I did not wish to apply to Chu for any more money, and that the matter had better drop. I meant, that I had spent a month negociating with Chu, and that I was tired of the thing. In consequence of those letters, I declined doing anything more, until the arrival of the vessel out here. I have told Chu so, in the letter returning the contract. I have no recollection of telling Mr. Gore-Booth that his commission would be all right.

By Mr. WAINEWRIGHT—The letter "A1" refers to an ideal steamer. The nearest one to answer to the description contained in it, was the *Laptek*. We had never had any experience in getting out steamers before, and relied a good deal on the plaintiff's judgment. I talked to Chu about bargain money, and it was provisionally arranged that he should deposit it in the Hongkong Bank, so as not to lose interest. He afterwards suggested that we should take the *Aden* instead. We never authorised Mr. Gore-Booth to conclude any contract without bargain-money, because we looked upon Mr. Chu's position as uncertain. I received no further particulars of the *Laptek*, until after we had decided to buy her. In a later telegram, our agents said they did not think well of her engines; that was on the 20th Feb. The particulars that appear in the schedule were contained in the telegram of December. I remember a conversation I had with the plaintiff on board the *Appin*. I told him I thought the sale of the *Laptek* to Chu was virtually settled. I do not think I had seen the contract on the 21st February. I had instructed plaintiff to settle the "75*a*" steamer for Tls. 25,000 and the *Aden*. I put the *Aden* at Tls. 30,000. The price for the *Laptek* was Tls. 65,000, being all we could get. I had no further discussion with Chu about delivering the *Aden* to me. I told him that unless he could deliver the *Aden* at once, we could not come to any agreement. He was trying to arrange to give it us. It is so long ago that I cannot say whether I meant that Chu should buy the Tls. 80,000 steamer as well as the "75*a*,"—I should say it was instead of it. I imagine it was because our agents in London had telegraphed that they did not like the "75*a*."

By Mr. ROBINSON—We never authorised plaintiff to conclude any contract. That was to remain with our firm.

By His LORDSHIP—The letter authorising Mr. Gore-Booth to sell the steamer for Tls. 65,000, I consider did not authorise him to sign any contract. If he had sold a steamer in accordance with that letter, I should think he would be entitled to his commission, but he must have come back to us to sign the contract. It was at his suggestion that we telegraphed for particulars of steamers, but nothing could be concluded until we had got a steamer to sell.

It being now past five o'clock, the Court adjourned till ten next morning.

March 13th.

We resume our report of this case. The action was brought to recover the sum of Tls. 3,500, for work done and services rendered as a broker.

Mr. WAINEWRIGHT asked permission of the Court to recall the plaintiff for a moment. He had been taken by surprise by Mr. Little's evidence, and wished plaintiff to speak to one or two matters in connection with it.

Mr. ROBINSON did not wish to put any obstacles in the way of plaintiff's case, but he might ask upon what point was he to be examined?

Mr. WAINEWRIGHT—As to the date of the telegram which said they could not insure the steamer. Mr. Little had said he had shown all the telegrams to the plaintiff, but he (Mr. W.) thought it could be proved that the plaintiff had not seen this one, as it arrived after he went up-country.

His LORDSHIP said in strict law, Mr. Wainewright was not entitled to recall the plaintiff, for the reason given; but perhaps it would save time, if Mr. Robinson had no objection, if plaintiff was recalled. His Lordship added that he did not understand Mr. Little to say anything of the kind; and, referring to his notes, read, "He saw them all, because he

(plaintiff) was in and out of the office all the time."

Mr. Robinson said he would not object to the plaintiff being recalled.

Plaintiff was accordingly put into the box, and said—I have taken steps to ascertain the date of my going up-country. I applied to Mr. Overbeck, who went with me, and he referred to his small cash book, in which my name occurs. It is there stated that coolie hire begun on the 3rd Feb., and we were away fourteen days. I did not see the telegram to the effect that the *Laptek* was uninsurable. I could not have gone up-country if there had been any hitch in the negotiations.

Mr. Wainewright—I am told the telegram did not arrive until the 7th Feb.

By Mr. Robinson—I think we went away on the 3rd, certainly not so late as the 5th. I cannot remember if any coolies were hired before the 3rd.

Mr. Robinson—Supposing, when you came back from the country, you had found that the negotiations had fallen through, and that Messrs. Little & Co. had not substituted another steamer, would you have been entitled to your commission?

Plaintiff (after some consideration)—I cannot answer the question.

Mr. Robinson then addressed the Court on behalf of the defendants. Characterising the claim as extravagant, he said the main question in the case was—What was the nature of the employment of plaintiff by the defendants? If the Judge settled that question, there would be no difficulty in dealing with the claim. Was the plaintiff sent out into world, with the particulars of those steamers, and if he came across anybody wanting them, to deal at the prices given him? Was that his authority? or, was he sent out with those particulars to see if he could find anybody who would purchase a steamer on those conditions, and, if he found anybody, to take him to the defendants, to see if they could come to terms, and in the event of their coming to terms, to be entitled to his commission? He submitted, from the contents of the letters that had been read, and from the evidence given by Mr. Brown and Mr. Wheelock, as being in accordance with custom, that the employment of plaintiff by the defendants was in accordance with the last position. Now, what was the evidence? He called his Lordship's attention to letter No. 1, which was anterior to the dealing for those three steamers, and in which the plaintiff asks if defendants would be willing to contract for a steamer of certain dimensions, "cash on delivery; 20 per cent. to be paid as bargain-money—you either to pay my commission of 5 per cent., or give me half of net profit, whichever I choose, at time of contract." That letter showed the plaintiff knew there must be a contract before he could do anything to earn his commission. Those were the elements which absolutely governed the plaintiff's employment, and in addition there was the evidence from the plaintiff's own lips. Mr. Little had deposed that those terms were the basis on which the business was to be conducted, and on which the plaintiff acted throughout. The plaintiff founded his claim upon this—that, in or about the month of January, 1872, the defendants asked plaintiff to find a purchaser on their behalf for a steamer they were about to bring out, and that he did find a purchaser. On behalf of the defendants, he (Mr. R.) denied that plaintiff ever found a purchaser—they were, in fact, unable to sell their steamer on any terms. What was the meaning of finding a purchaser? In the course of business like this, must it mean a purchaser who can buy on conditions satisfactory to the broker? With regard to the proposed sale of "75*a*" steamer, that sale his friend on the other side said went off through the defendants' default, he said it went off from a cause which was incidental to the business itself. The sale went off from circumstances over which the defendants had no control. The plaintiff said he could not answer the question put to him just now—a very weak reply. The whole case showed that plaintiff could only claim his commission in the event of the steamer being sold—that the mere bringing of parties together was not sufficient to entitle him to his commission. It was clear, in the first place, that the plaintiff knew, and that the defendants knew, that the expectation was that Tls. 75,000 could be got for the steamer, and that a contract was to be made on those terms. If no such contract was provided, then the plaintiff had never done anything to entitle him to his commission. Then, in the next place, the defendants were to have bargain money. The Court had that from the plaintiff's own mouth. The consideration of bargain-money was an essential which the plaintiff in his employment was bound to stipulate for, unless it was waived by the defendants. In the third place, it was clear that there must be an actual sale of a vessel, because the plaintiff made it appear that his commission depended entirely upon a sale taking place, and he showed it was to be paid from profits to be derived. Now, no profit could be derived unless there was a sale of the vessel; and fourthly, it was apparent that a contract was to be signed. Therefore, unless there was a contract signed, he was not entitled to his commission. On those grounds, the defendants were justified in refusing, until they saw some such advantages arising to them. When they found they could not sell at Tls. 75,000, and could not make the brokerage, they were bound to make it known to the plaintiff, and they did so in the most courteous manner. He (Mr. R.) would say that if the defendants, for any reasonable cause as regarded their own interest, chose to decline the contract, they were legally empowered to say, "I have received a more advantageous offer," and the broker could not then recover his commission. In this case, there had been no contract, and, therefore, it could not have been broken by the defendants. Therefore, on the ground that the plaintiff was to find a purchaser, and that event not having happened, he submitted the plaintiff must be nonsuited. He supported this view by citing a few cases,—"Read *v.* Rann" (10, Barnewall and Cresswell); "Dalton *v.* Irving" (4, Carrington and Payne, 289); "Bull *v.* Price" (7th Bingham, 237); "Alder *v.* Boyle" (Common Bench, 16 L. J.); "Addison on Contracts" (7th Ed., p. 595)—all of which went to show that no commission could be charged or recovered in such a case as the present unless an actual purchase was completed and concluded. Upon those cases he submitted a simple proposition, that the event upon which alone the plaintiff was to have commission, not having happened, he was not entitled to his commission. The question that next arose was whether the plaintiff was entitled, *quantum meruit*, to any renumeration for his services, and he (Mr. R.) submitted that he was not entitled to recover any remuneration for those services. The only ground upon which he could base such a claim would be that the proposed sale fell through by the wilful default of the defendants. He denied that it did so,—the equality of evidence contradicted it peremptorily. The defendants simply declined to sell upon terms on which Chu proposed to buy. There was no bargain-money, and, in addition to that, Chu would not agree to accept the steamer according to the description which the defendants had received. It was, therefore, reasonable on the part of the defendants that they should decline to fix themselves to deliver a particular steamer, before they knew they could get the vessel. The matter fell through, therefore, from causes incidental to itself, and not from any act of the defendants. Defendants said it would be impossible to contract to deliver a steamer on the conditions asked by Chu, because the builder himself, in the case of a new steamer, could not tell what depth she would draw. The defendants might have entered into such a contract if they found there was such a steamer. They did find there was such a vessel, but it was virtually as good as no steamer, because she was uninsurable. The defendants, therefore, did not enter into the contract from circumstances incidental to the business itself. The plaintiff must have been aware of that fact, and he had put it to him in the strongest possible manner in his question of that morning, which plaintiff said he could not answer.

His Lordship asked where was the evidence that the payment of commission depended upon the happening of something?

Mr. Robinson replied, in the original instructions to the plaintiff, in letter 1, and in the evidence of Messrs. Brown and Wheelock. It was a contingency inseparable from the conduct of the business. The defendants were attempting to sell a steamer through a broker. Were they to expect a contract to be signed before they knew they could get a steamer? If the steamer could not be got, a jury (and his Lordship was sitting as one) would at once say the thing was at an end. He next called attention to letter 3, in which the plaintiff suggested that the defendants had better telegraph to Liverpool, and then they might be able to make a contract, and said it showed that the plaintiff knew that a contract was a *sine qua non*. There was, however, no contract, and he repeated that the plaintiff must have understood from the beginning that it was necessary there should be one.

His Lordship—The plaintiff's argument is that there was a contract, but that it fell through by defendants' default.

Mr. Robinson—Where is the evidence of such contract?

His Lordship—Mr. Little says, "I will sign the contract to-day." Plaintiff says, "It is by your default it is not signed, and therefore I sue you for my commission."

Mr. Robinson—Defendant said he would sign the contract, because there was a contract spoken of, and not signed. It appears to me a perfect *non sequitur*.

His Lordship—Plaintiff says "there was a contract ready to be signed, I prove this by your own letters." That is what his argument maintains.

Mr. Robinson—And I say there is no force in the argument. The evidence on both sides shows that a contract should have been signed, but it was not; and until there was a contract signed, it was not settled what his commission was to be.

His Lordship—I am not prepared to consider that the first letter has anything to do with the three ships which come in after.

Mr. Robinson said the particulars were obtained of those three ships, and how it could be said the first letter had nothing to do with them, he could not see. But upon that his Lordship would decide. Another reason why it could not be contended that the contract fell through by default of the defendants, was that it contained a stipulation that if not approved, the vessel could be rejected. How, then, could it be assumed that the sale fell through by default of the defendants? How could the plaintiff, by any possibility, have a claim to commission, when the contract fell through by reason of one of its own terms? There is positive evidence that the Manager of the Company said that if left to him he would not take the steamer, and on her arrival she was actually rejected. In such a case, there being no sale, how could plaintiff recover his commission? He could not even recover upon a *quantum meruit*. His services were valueless to the defendants, and there was no evidence of failing to complete on their part. He would give authorities on the point of *quantum meruit*. "Reed *v.* Rann" and "Dalton *v.* Irving," were conclusive on the point; but there was a third case, "Green and another *v.* Mules" (30, L.J., C.P. 143), equally so.

His Lordship—That case turns upon the question of influence.

Mr. Robinson said it showed how strictly the law construed such things; and in the present case, the event not having happened, the plaintiff was not entitled to recover. He was just going to refer to the case of "Prickett *v.* Budger," upon which his friend had relied. That case was distinct from this on two grounds. The plaintiff found a purchaser, but the defendant was unable to complete the sale. There was, therefore, every difference in the world. In this case, the plaintiff had not done all that was required—in that case, the plaintiff had done all he was called upon to do. He had found the land wanted, and had done all he possibly could to earn his commission. It all turned upon one point, that the person who was resisting payment had put it out of the plaintiff's power to complete the contract, and by his default had caused plaintiff to lose his commission. But there was a vast difference between a contract for selling land and a contract for selling or dealing with ships—a very broad distinction between the cases of a house agent and a ship broker. That was recognised in "Simpson *v.* Lamb" (116, L. J.,) a case well worthy his Lordship's attention. So here, if Little & Co. had sold the ship by putting her into the hands of another person, the plaintiff could have got nothing. The cases his friend had cited from "Foster and Finlayson" were open to the same

objection—they did not fall within this particular case. With regard to the letter offering 1½ per cent. commission, it seemed to him that owing to the diminution in price they were to receive for their vessel, it was perfectly valid on their part to make the offer. They contracted to give plaintiff 5 per cent., provided they got a particular sum; if they could not get that sum, they were perfectly justified in declining to give so high a commission. If plaintiff would not abate his commission, then defendants could say, "We will not enter into a contract."

His LORDSHIP thought the explanation of the letter was, that defendants were negotiating for sale of a steamer, and could not get for it so much as they expected; they therefore said in effect to plaintiff, "If you will abate your commission to 1½ per cent. we will go on with it."

Mr. ROBINSON said that was precisely the ground on which he put it. He had forgotten to refer his Lordship to one case, "Broad *v.* Thomas," (7th Bingham, 99), which was also strongly in point. Mr. Robinson concluded by saying he thought he need not occupy his Lordship's attention any longer. Upon the grounds he had mentioned, he contended that the proper course would be that the plaintiff should be nonsuited. Plaintiff had said that if he had known of any hitch he could not have gone up-country. Defendant wished the attention of the Court to be called to the telegram received on the 20th January, before plaintiff started to go up-country, which ran, "we do not think well of third steamer: lengthened: ½-old." He thought that that was sufficient to show that matters were not going smoothly. He would now leave the case in his Lordship's hands.

His LORDSHIP, referring to a letter of the defendants to plaintiff, inviting him to an interview with Chu, asked if that interview ever took place?

Mr. WAINEWRIGHT said that the plaintiff could not remember.

Defendant—No, it did not; I went.

Mr. WAINEWRIGHT then proceeded to reply upon the whole case, saying that his client was claiming for introducing two persons, who however, did not do any business. He was not wishing to add to the loss the defendants had sustained, as had been insinuated,—there was no proof of loss having been sustained. It was quite obvious that if his client was to go without anything, he would be the loser, because he had spent a great deal of time and trouble for the defendants over the matter, and if he got nothing for it, he would be at a loss. The question was, what was plaintiff engaged to do, what were the terms of his employment, and how far had he carried them out? The defendants argued that the plaintiff had no authority to make a contract in the matter. Plaintiff did not deny that he had no authority to sign any engagement binding defendants. What he contended was, that he was to find a purchaser for a certain steamer upon certain terms. He said, that having found a purchaser upon those terms, he had performed the whole of the duty that was cast upon him as a broker; and that if the defendants chose, for reasons of their own, to proceed no further in the matter, it was not the default of the plaintiff, and that his claim for payment of his commission was not vitiated thereby. His friend had tried to look upon the earlier letters that had passed between the parties, and especially one written in December, 1872, as being the foundation of all that followed. It never could be said, without further evidence than that, that an undated letter would bind the parties through all the subsequent proceedings—through the whole course of the affair. There was nothing to show that the defendants accepted the suggestion thrown out by the plaintiff in that letter, nor that the defendants would be willing to contract on those terms. There was plenty of evidence that they would allow plaintiff to take half the profit. He, therefore, submitted that those five or six letters might be dismissed from the case. The evidence showed that the plaintiff was employed by the defendants to sell to the C. M. S. N. Co., or to anybody else, certain steamers, the particulars of which had been given to him—the real fact being contained in the letter of the 4th January, 1873, which gave the particulars of the steamers. There was nothing said in the letter about bargain money or any other terms whatever. He contended that that letter was really the first in which they would look to find the terms upon which the plaintiff was employed. His friend had next gone on to say that the plaintiff never did find a purchaser on those terms; but he (Mr. W.) had to contend that he did find a purchaser. He found a buyer, who was willing to give the money, and communicated the fact to the defendants. The defendants evidently believed that a contract had in effect been made—that one could be signed on those terms—because they endorsed the letter at the time, "Steamer sold Chu," and forthwith entered into the offers submitted to them by another broker to sell the *Aden*. They telegraphed home to England in January, to their agents there, to purchase the 75*a*, and there was no doubt about their then so far carrying out the arrangements made by plaintiff. The plaintiff had sworn most positively that nothing was said to him about bargain money or of the nature of it. The defendants now said there was to be something, either bargain money or an equivalent for it; and that the *Aden* was to be handed over to them in the nature of bargain money. He would like to ask how it was that, in the letter of the 27th January, the defendants said, "I think you had better settle her to be delivered within three months." What were the defendants going to do in those three months with the *Aden*? They had it in evidence that the *Aden* was to be delivered on the arrival of the *Precursor* and the *Daybreak*, and it had been stated that the *Daybreak* arrived on March 22nd and the *Precursor* on the 24th April. Those ships, therefore, arrived within the period of three months. He submitted that that was the understanding the defendants arrived at, that the *Aden* was to be delivered within three months. They now said she was to be handed over at once, but everything pointed the other way. It was clear, therefore, that the defendants were, in that way, perfectly prepared to take a considerable amount of risk, for although they now said it would be madness and folly to have done so, they were then willing to do it. They telegraphed home to have a steamer sent out, and they actually committed themselves to become purchasers at home before anything was said about bargain money. They were perfectly willing to become purchasers of the 75*a* or the *Laptek*, whichever came out. So far as regarded bargain money, and as regarded other matters which the defendants said they stipulated for, he thought he should be able to show that plaintiff did everything they asked for, for he contended that the transactions of the 75*a* and the *Laptek* must be taken as one and the same affair. The plaintiff carried out all his arrangements completely for the sale of a steamer to the C. M. S. N. Company, and all parties considered it was virtually settled. He went away, and in his absence, the defendants got out further information as to the 75*a*, and substituted another steamer for her, writing the C. M. S. N. Company, "You can't have the steamer, but there is another, costing £3,000 more; if you will give that or its equivalent, Tls. 10,000, you can have her." This was agreed to, and a written contract was drawn up. That was mentioned in the conversation between plaintiff and defendant on board the *Appin*. The recollection of the plaintiff and defendant on that point somewhat differed, but there could be no doubt as to the fact. Plaintiff expressed his surprise that a dearer steamer had been substituted for the 75*a*, and about this time defendant was in possession of the contract from Chu, for the purchase of a steamer at Tls. 10,000 more, but when this steamer was seen by Tong-king sing, who had then succeeded Chu, he rejected her as being unsuitable. Mr. Wainewright addressed himself at considerable length to various other points raised and cases cited by Mr. Robinson, contending that those he had himself cited were applicable to the case.

His LORDSHIP—Where do you find the evidence to which you allude, that the defendants had concluded a contract with the Chinese?

Mr. WAINEWRIGHT—The evidence of that is, that the plaintiff had found a purchaser for the 75*a*, and that the defendants themselves substituted the *Laptek* for her, and received a contract from the Chinese.

His LORDSHIP—And he says his commission accrued by arranging for the sale of the 75*a*, and that defendants had no right to substitute another steamer for her, and deprive him of his earnings. But where do you find any evidence that the defendants had concluded a contract for the sale of the *Laptek*?

Mr. WAINEWRIGHT—The plaintiff has sworn that on board the *Appin* the defendant said he had arranged for the sale of the steamer to Chu, for $10,000 more, and that Chu was fast bound and could not draw back.

His LORDSHIP—And that the defendant denies.

Mr. WAINEWRIGHT—He did in his evidence in chief, but on cross-examination, he said he did speak about both, but could not remember the exact words. But the plaintiff's story is substantially correct, that he did sell to Chu, and it may be looked upon as strict evidence that on the 25th February defendants received a contract from Chu in this form. Putting those two things together, they showed that defendants had agreed with the C. M. S. N. Company to sell on the terms of the contract; and he (Mr. Wainewright) thought that after an interval of two years the letter ought to weigh against verbal testimony. The letter could be construed only in one way.

His LORDSHIP—It says practically, I have been forced to abandon my price; if you will not abandon part of your commission, I must abandon the whole thing.

Mr. WAINEWRIGHT—But then he says he agreed to sell at a certain price to those people, that he had made a losing bargain, and plaintiff must come down in commission. That, however, cannot be proved, because he never got the *Aden*. It does not follow that he would not have made a profit on the *Aden*. He might have sold her, or insured her, and run her on a rock—(he did not mean purposely)—and after all she might have been as lucky as the *Laptek* was. The defendants spoke of the *Aden* as virtually their own. That was his (Mr. W.'s) view of the letter of the 25th February—the only difficulty in the defendants' mind apparently being that they would suffer a loss, and that the plaintiff must share it. He could hardly believe that the defendants would have written such a letter without that meaning, and thought it clearly showed that there was a contract to sell, which afterwards fell through, by no default of the plaintiff's, and that he had done nothing to forfeit his right to commission. He could not understand the distinction drawn by his friend between transactions in land and ships—a defective title in land was the same as one for a ship. The cases of "Read *v.* Rann" and "Broad *v.* Thomas," turned, be believed, upon the custom of the port of London only.

Mr. ROBINSON—Upon mercantile usages generally—the express words are "mercantile usage."

Mr. WAINEWRIGHT—In this case, custom is done away with—custom does not apply to a case of specific agreement, and here the defendants, by their act, prevent the plaintiff earning what they had agreed to pay him.

His LORDSHIP—Putting aside the whole of the negotiation for 75*a*, do you contend that if it had fallen through, plaintiff would have been entitled to his commission—and that he did anything besides the introduction in the case of the *Laptek*.

Mr. WAINEWRIGHT—I contend it must all be taken as one transaction, and that what the plaintiff did for 75*a* he also did for the *Laptek*.

His LORDSHIP—There is no doubt she was one of the three steamers originally mentioned.

Mr. WAINEWRIGHT said he thought he need say no more. He had sufficiently enlarged upon his view of the case. The whole thing must be viewed as one transaction, and in point of fact the contract the plaintiff was employed to bring about, was that which was brought about; and that there was nothing, in point of fact, to justify the defendants in refusing to sign it.

His LORDSHIP, in delivering judgment, said—In this case, sitting as I do as a jury, I conceive that I have to address myself to it very much in the way in which a jury would, I imagine, deal with it under the direction that I would give them. Now, what ought my direction to a jury in this case to be? I should ask them, in the first place, whether in their opinion the plaintiff had negotiated a binding contract with reference to the "75a" steamer; for only if he did, was he entitled to commission. I should at the same time tell them that in my own opinion there was no binding contract, as the language of the plaintiff's own letter of 25th January—

"provided that the terms of the contract are mutually satisfactory"—clearly showed. The second question I should ask the jury would be—"Are you satisfied that there was a definitive contract with reference to the *Laptek*, concluded by the defendants with Chu? Because if you are, although this contract was not negotiated by the plaintiff, but by the defendants themselves direct with Chu, yet being due to the plaintiff's introduction of the defendants to Chu, he is entitled, if your answer is in the affirmative, to commission on the contract; and if you take the letter of the defendants of the 25th February as conclusive on the subject, you must be of opinion that it was solely by the fault of the defendants that it was not carried out." But I think they would be wrong in doing so, because I look upon that letter as simply written to induce the plaintiff to reduce his commission; and as a matter of fact there never was any contract as to the terms of which Chu and the defendants were ever *ad idem* about, for the defendants made their assent to the contract depend either on Chu's giving more money, on his paying the plaintiff's commission himself, or on the plaintiff's reducing his commission. As a matter of fact, therefore, there was no binding contract between the defendants and Chu; and I think it was open to the defendants—considering no right to commission had ever accrued under the first negotiation—to make what terms they liked as to the second, and such terms were never in fact come to. Therefore, the plaintiff is not entitled to any commission. But I think that the letter to which I have referred (of the 25th February) induced the plaintiff to believe that the only obstacle to the conclusion of the contract was an abatement by him of his commission, and that, therefore, he was justified in bringing the action.

Viewing the rights of the parties by this light, I shall order the verdict to be entered for the defendants, but inasmuch as I think their note of the 25th February misled the plaintiff, and as costs are in the discretion of the Court, I shall order each party to pay his own costs.

CIVIL SUMMARY COURT.

Shanghai, March 16th, 1875

HENRY CALICE *v.* J. BARKER.

Claim $116.75 *on a Judgment Summons.*

Mr. Haas appeared on behalf of plaintiff (deceased), and said that defendant was summonded in order to ascertain if he had any means of discharging the debt.

Defendant averred that the money had been paid by Messrs. Cheshire & Co., at the time the execution was taken out.

The record of the case having been produced, it appeared that the constable, who had the warrant to execute, had returned it into Court with the endorsement that he had made due and diligent search but could find no sufficient goods of the said J. Barker to levy the execution on.

Defendant being sworn, stated—I am not in a position to pay now. I am certain that the money was paid by Messrs. Cheshire & Co. for me. I am not receiving any wages. I cannot tell until the oyster season is over, which will be at the latter end of next month, whether I shall have any means. I am employed by Mr. Minck. He said that he would give me something then. My name never appeared over the door. I am only manager of the Oyster and Supper Saloon. Everything in the house belongs to Mr. Minck. I commenced in November last. I believe he is satisfied with my management.

His WORSHIP ordered the defendant to report at the Court a month hence, as to his means and prospects of being able to pay the claim, cautioning the defendant that if any of his statements were found to be false, he was liable to punishment.

POLICE COURT.

Shanghai, March 3rd.

Before R. A. MOWAT, Esq.,

R. (G. E. ADAMS) *v.* P. J. WHITE.

Defendant, an apprentice of the *Corea*, was brought up on a warrant, charged with being absent from that ship without leave.

In answer to the charge, the defendant, a well-spoken youth, admitted that he went ashore on Sunday night, between eight and nine o'clock. It was his first voyage, and he was so disgusted with a sea-life, that he thought he would try to leave it. He had been brought up to office work at home, and could not stand the change. While he was on the quay, the mate came up and took hold of him by the neck, then got him on board, and threw him down on the deck, hurting him much. His hands were also lashed behind his back, and that treatment still more confirmed him in his desire to leave. He lay on his chest for some time, and he believed the Captain ordered his hands to be unlashed. He afterwards managed to get ashore. He was bound apprentice by his guardian; but the owners said if he did not like the sea he could leave.

The Captain stated that the defendant was on shore on the Sunday afternoon. He met him in Hongkew, and told him to take care of himself. At night, defendant came to the ship; and hearing the mate calling out, he (the Captain) went on deck, and saw defendant and the mate struggling together on the wharf. Defendant, who was the worse for drink, was then got on board. The mate said defendant had drawn a knife upon him and threatened his life; but the defendant said the knife had fallen out of his pocket, and he (the Captain) was willing to believe that statement. As defendant said he was determined to get ashore again, his hands were lashed. The defendant was a respectable youth, and was bound apprentice to the owner for four years, but he (the Captain) did not know the terms of his articles.

His WORSHIP said defendant must go back to his ship, and put up with the inconveniences of a sea-life until he returned to England. Then, perhaps, if he told his guardian his dislike to the sea, an arrangement could be made with the owners for him to leave. It was useless his attempting to stay ashore in Shanghai, and he hoped defendant would take the advice now given him, and go back to his duty. His Worship also cautioned defendant against indulging in drink, and ordered him to pay the cost of the summons.

The Captain said he would be very glad, and he had little doubt the owners would also be, to let the defendant leave when he got home. It was no use keeping the lad on board, if he was unwilling to remain.

March 5th.

R. (MOSES) *v.* CHARLES ENGLAND.

Charge of Assault.

There had been an auction at which defendant, who was the auctioneer, sold to complainant two dozen towels. Complainant went to defendant's shop and made a noise, saying there were two towels short. Defendant, who was ill, asked him to be quiet, but he made more noise, whereupon he (defendant) pushed him out of the shop.

Complainant said defendant hit him on the head with a book, and kicked him. This was denied by defendant, who admitted, however, shoving prosecutor out towards the door.

His WORSHIP said defendant must keep his hands to himself. It was likely that, being ill, the noise made by complainant excited him, but it was no excuse for striking. By his own showing he pushed the complainant, who, however, did not appear to have suffered much. Defendant must pay the cost of the summons.

R. (G. E. ADAMS, Captain, *Corea*) *v.* CHARLES CHURCHLEY.

Charge of Broaching Cargo, Drunkenness, &c.

Defendant is a seaman of the ship *Corea*, and was brought up on remand, charged with the above offences. The following additional evidence was heard:—

ALFRED FREDERICK ABBOTT, an able seaman, said he was sent into the hold, and saw a case of gin opened, and one bottle short. A case of sherry had been broken open also, which the stevedore showed him.

By defendant—It was not possible for you to have got at the cases, either at sea or in harbour, where I saw them.

By His WORSHIP—The ship came into port on the 24th February. Some powder had been discharged down the river, and the hatches replaced. They were again taken off on Saturday afternoon. It was on Monday morning I went down into the hold. I saw the case of gin between decks. It had been brought there before I saw it. The stevedore told me there was also a case of sherry broken open in the lower hold, which he brought up. The wood was smashed in. That might have happened by lowering it into the hold. I missed a bottle of gin, but did not count the sherry.

His WORSHIP—What other evidence is there, to connect the prisoner with the bottle of gin?

Captain ADAMS said the lower hold was not full, and access was gained to it through a hole broken in the forecastle. He believed other persons were concerned in the matter, but the reason he suspected the prisoner was that for all one day, while at sea, the 11th February, the prisoner was drunk and off duty. He found the prisoner on the quarter deck, talking very loud. He ordered him off, but he would not go, and he (the captain) pushed him on to the main deck. Prisoner then threatened what he would do to him. He then ordered defendant aloft. He went up very slowly, making a great noise still, and saying if he could only get two or three more to join he would do for him (the captain). He afterwards came down, and refused to go aloft again. His hands were then lashed, but after a time he became contrite and was released. He was very much intoxicated, and from the state he was in he must have been drinking during the day. He went to his berth at noon, and did nothing till six next morning. He (the captain) had the forecastle examined, and found a hole had been broken through the bulk-head, by which the 'tween decks and hold were reached.

Prisoner denied that he was drunk on the day named, and it was not true that he went on the quarter deck and made a noise. He only went to speak to the captain, "as a man should." The reason he remained below was because of his leg being bad from the captain and mate pulling him about.

The Mate gave evidence confirmatory of the captain's statement. Prisoner smelt of liquor on the day named, and while he was in his berth in the afternoon, he would not speak when witness wanted him to turn to; and witness believed he was drunk. He came on deck next morning, and complained of his leg. According to the ship's manifest, there were two cases of gin and one of wine missing. There was a regular door in the forecastle to get into the between decks, but it was nailed up in London, and the nails had been drawn.

Prisoner said that the door was opened to let out three cats that had been put on board in London. The door was not fastened up again, and prisoner drew the mate's attention to it, but no notice was taken of it.

The Mate said that was three months ago, and the door was afterwards nailed up again, after which it had been re-opened.

His HONOUR said, if there was no one here who could speak to the number of cases that were put on board in London, he could not presume that the cases stated to be missing had been made away with. But the fact of those cases that were found broken open with bottles missing was different, they spoke for themselves.

Captain ADAMS did not wish to press the charge of the missing cases against the prisoner. The affair was much worse than it appeared, for there were 100 tons of gunpowder on board, and to get at the spirits, whoever went into the hold must have carried a light across the gunpowder. It was impossible to go into the hold without a light. [*See next case.*]

R. (CHRIS. PETERSEN) *v.* CHARLES CHURCHLEY.

Violent Assault.

The same defendant was charged with assaulting the complainant, who was his shipmate.

Complainant still bore marks of the violent usage he had received at the hands of the defendant; but said that, as the man was drunk when he committed the assault, he did not wish to press the charge.

His WORSHIP said it was very good of the complainant to wish to overlook the assault, but it was of such a character that he could not permit it to be overlooked. He should fine defendant $10 and costs. With respect to the charge of broaching cargo, that was an offence of a very serious nature. The prisoner was drunk, and he must have

obtained the drink on board. Bottles were missing from broken cases, and under the circumstances there could be no doubt that if the prisoner had not actually abstracted the bottles, he must at least have partaken of the liquor. Besides, his conduct had been altogether mutinous. The sentence upon him would, therefore, be four weeks' hard labour.

R. (Captain of *Corea*) *v.* LANCELOT DUNCAN.
Drunkenness

Defendant, a seaman of the above ship, was charged with drunkenness and neglect of duty. He had neglected to appear to a summons, and was brought up on a warrant.

Defendant now said, he was so ill, and had been so for a long time, as to be unfit to go to sea. He could not get any medicine on board.

Captain ADAMS said defendant had been ill four months out of five that he had been on board, and had used up all the linseed in the ship. He (the captain) produced a doctor's certificate to the effect that the defendant was suffering badly, but that it was not necessary for him to keep his berth.

His WORSHIP said that perhaps the defendant had better be examined by the Consular doctor, as to whether he was fit for sea or not. The defendant would, however, have to bear the expense.

Defendant, with doleful countenance and tone, said a doctor had seen him, but he believed had not yet found out what was the matter with him.

Captain ADAMS said he was willing to discharge the defendant, and pay him all the wages due to him. His wages were £3.15 per month.

His WORSHIP said if that were so, and the man was willing to be discharged, it would be the best course, if he had money enough to take him into the Home. For the offence he had committed, he must pay the cost of the summons and forfeit six days' wages.

R. (Master of *Sally*) *v.* LOONG.
Charge of Theft.

Prisoner, a Malay seaman, was charged with stealing a piece of silk, the property of the Chinese supercargo of the above vessel, while she was in harbour at Nagasaki.

It appeared that the supercargo missed a piece of what was described as silk, and after the ship had arrived at Shanghai, the captain was told by another Malay seaman that he had seen the prisoner, with his wife (who was also on board), cutting a piece of silk to make a singlet.

The prisoner produced a small bundle containing a silk jacket and two pieces of silk, all of chocolate colour, and these the Malay witness said were of the same colour as the piece he had seen the prisoner cutting.

The Chinese supercargo now said that it was a roll of black satin that was missing, and that the silk produced was not his property.

His WORSHIP said that under those circumstances, there was an end of the case, and the prisoner must be discharged. He thought that the man (who looked a respectable man) should not have been charged with such an offence without more enquiry.

March 8th.

R. (MATILDA COURTNEY) *v.* F. W. TEMPLEMORE.
Charge of Using Threatening Language.

Defendant, formerly a Custom-house officer, was brought up on a warrant, charged with threatening to do the complainant grievous bodily harm, on the 4th instant.

His WORSHIP read the information of the prosecutrix to the prisoner, and asked him, if he admitted having threatened as she had stated.

Prisoner said he should like to apply for a remand for forty-eight hours, to enable him to obtain legal advice.

His WORSHIP said he had no objection, but prisoner must be remanded in custody.

Remanded accordingly, till Wednesday, at eleven o'clock.

R. (W. BOWEN) *v.* MICHAEL FOX.
Desertion from a Ship.

Defendant, an elderly man, was charged with deserting from the ship *Northampton*.

Mr. BOWEN, Superintendent of the Sailors' Home, produced the memoranda showing when the defendant joined the ship and when she cleared and sailed.

Defendant, on being called upon by the Court to explain his conduct, said the captain told him to pack up and go ashore. He had told the captain he was sick, but could not say on which day it was. It was a week ago, and he had been part of the time since in the German Home, and the remainder in the Sailors' Home. He went back to the Sailors' Home two days after he was put ashore, but did not know whether the ship had then sailed.

Mr. BOWEN stated that the defendant shipped on the 18th February, and joined on the 24th. The captain did not wish to have him on board before. He was, however, put on board with his effects on the 24th. The *Northampton* sailed on the 27th. Several days after the ship had left, the defendant came back to the Sailors' Home. That was the first intimation he had that the man had not sailed in the ship. He told defendant he would have to be taken before the Court, as his statement was a doubtful one. It was the defendant's duty to have come back to the Home before the ship cleared, so that Captain Barclay might have been questioned about it. On the 1st March, witness received a notification from the agents that the defendant had not sailed, and claiming the return of the advance, $15.20 Witness had not then seen the man. The agents forwarded the advance note to witness, and he was obliged to pay it.

His WORSHIP read a note from Captain Barclay to the agents, in which he said, "Fox came on board, but did not turn to work. He went on shore, and did not return." It was very suspicious that the defendant should have come ashore in that manner. When did the captain tell him to pack up and come ashore?

Defendant said it was the morning after he went on board. He had gone on board in the afternoon, and afterwards went aft and told the captain he was very ill. He was not ill when he was shipped, it came on afterwards. It was something in his side, like pleurisy. Was aboard all that night, and slept close to the forecastle door, and supposed he took cold. The crew brought his clothes aft, when he told the captain he was ill, and put them in a sampan. He was landed on the beach, abreast of the ship, and found he could get no further than the German Home, he was so ill.

Mr. BOWEN said when the defendant came first to the Sailors' Home, he had a chest of clothes, but on his return he had only a bag. He said he had given the chest away, and sold some of the clothes.

Defendant, in reply to questions, said he did not see a doctor while he was in the German Home. He was very bad still.

Bailey, the constable of the Home, said he put the defendant on board the *Northampton* on the morning of the 24th, at nine o'clock. He was quite sober, but had a bottle of grog with him, which the mate took away from him. Witness saw him again at the Home, in the evening of the same day. He then seemed to have been drinking, and said the mate had given him leave to come on shore. Witness kept him at the Home all that night, and gave him a breakfast next morning, after which he was again put on board, on the morning of the 25th ult. He did not complain of being ill.

His WORSHIP said after that testimony, he did not believe the defendant's statement. The night he had said he slept near the forecastle door and caught cold, it turned out that he had slept at the Home. And with respect to the captain's note, it was not likely the captain would have written in such a way had the defendant been ill and been ordered ashore in consequence. He (his Worship) did not believe he was ill at all. By his conduct he had made the Sailors' Home liable for the re-payment of his advance. It was a very dishonest trick—defendant shipped, got his advance, and then left the ship. If he was really ill, why did he not go at once to the Superintendent of the Home, and tell him, so that he might have put another man in his place.

Mr. BOWEN said the *Northampton* put to sea one hand short, in consequence of defendant's not informing him.

Six weeks' hard labour.

R. (Master of *Glamis Castle*) *v.* ALEXANDER BAIN.
Refusal of Duty.

Defendant is chief engineer of the above ship, and was summoned by Captain Raisin for refusing to obey orders.

Complainant stated that on Thursday last, eighty tons of coals were to be brought on board, and he wished them to be weighed before being shipped. He requested the defendant to send a man to take the weights, and he refused to do so.

Defendant's excuse was that he told the captain he could not spare a man from his department for the duty, and wished to employ a Chinaman to do it. If he had sent a man from the engine-room, the work in that department would have been delayed.

His WORSHIP.—That was the captain's affair. There are not two captains in a steamer any more than in a ship. You seem to want to put yourself in the captain's position. I should have thought you would have known better.

Defendant—I was doing it for the benefit of the owners.

His WORSHIP—You have nothing to do with the owners—the captain is responsible to them, and you to him. He engaged you, and you have to obey him.

Complainant said he had no desire to press the charge against the defendant.

His WORSHIP—Very well; it seems to have arisen from a mistaken idea of duty but *it* must not occur again. Defendant mus pay the cost of the summons.

R. (C. PETERSEN) *v.* G. E. ADAMS.
Abusive and Threatening Language.

Defendant is captain of the *Corea;* and Complainant an able seaman of the same ship, summoned him for using abusive and threatening language to him, while at sea on the 11th February.

Complainant deposed that, on the evening of the day named the ship was caught in a squall, and he and others were ordered aloft, after letting go the foretopsail halyards, to furl the sail. He had been ill, and as it was raining at the time, he went below to fetch his oilskins, as he did not want to get wet On coming on deck again, the captain came to him, and said "I do not want any more nonsense from you, you d—— thief." He told the captain he was not a thief, when the captain took up a belaying pin, made a motion towards him with it, and said he would knock his brains out. Complainant retorted, "Do it, but you must take the consequences." The captain also threatened to throw him overboard. The crew were close by at the time, and heard it all.

Captain ADAMS said the weather had been squally during the day in question, and at four in the afternoon the ship was caught in one of the squalls. He gave orders to let go the foretopsail halyards, and the complainant at once went below, rendering no assistance. He did not go aloft to help to furl the sail, for which he (the captain) told him he was lazy and hung back when work was wanted. When the work was all done and the sail secured, he came on deck. It was raining slightly at the time.

One of the crew, who had been summoned by the complainant as a witness, corroborated his evidence. It would only have taken two minutes to do the work aloft.

His WORSHIP said if the complainant was ordered to go aloft, the ship being caught in a squall, it was his duty to have gone at once, without waiting to fetch his oilskins. The time so lost might not have made much difference to the complainant, but it might to the ship under the circumstances. He should not, either, have answered the captain back in such a manner, but have gone about his work without discussion—that was conduct which could not be sanctioned. The summons would be dismissed.

R. (Master of *Corea*) *v.* C. PETERSEN.
Neglect of Duty.

The parties to the last case then changed positions, the former complainant being now charged with neglect of duty in not keeping watch.

Captain ADAMS said that the ship was lying in the stream, and it was necessary to keep a good watch. At three o'clock on Saturday morning he went on deck, and found

no one keeping watch. He aroused the mate, who said he had set the watch as usual, and that it was the defendant's turn. Further investigation showed that the defendant had left his post and gone below. On Saturday night, it was the defendant's watch again. He (the captain) had been ashore, and on returning on board found the deck again deserted. He called out loudly, but no one answered, showing that the defendant must have been asleep.

Defendant said he went to sit down in the forecastle, but was not asleep.

His Worship ordered defendant to pay the costs in the case.

Defendant—I wish to leave the ship.

His Worship—You must arrange that with the captain.

Captain Adams—I'll discharge him.

9th March.

R. (Chinese) *v.* Alfred Rose and Robert Burke.

Defendants are seamen, at present staying at the Sailors' Home, and were charged with being drunk and disorderly in the public streets on Monday night; also with having broken a jinriksha and thrown the pieces into the Yang-king-pang, and resisting a French constable. Rose has been before the Court on a previous occasion, for assaulting the steward of the *Star of Jamaica*.

Hoding interpreted on behalf of the coolies plying with the jinricksha, the first of whom deposed that, on Monday, he and his companion were hired by two men from nine o'clock in the morning until eight o'clock at night. In the evening they were ordered to wait on the bank of the Yang-king-pang, and while sitting in the jinriksha, the two prisoners came up, and Rose, in spite of Burke's endeavours to prevent him, pushed the jinriksha and the coolies into the creek, it being low water at the time. Witness was not hurt, but his companion was, on the hand; the shafts of the jinriksha were broken and the vehicle otherwise injured. The men then ran away. They were not the men who hired the vehicle in the morning. Those men came, and when they saw the jinriksha was broken, they paid witness 25 cents and went away.

His Worship—Twenty-five cents for a day's hire?

Witness replied that that was all they gave him. When he and his companion climbed up out of the creek, the prisoners were in the custody of a French constable.

Rose, on being asked for his version of the affair, said that he and Burke hired the jinriksha, and at night they were a little the worse for liquor. They called at a house on the Yang-king-pang, and gave the jinriksha coolies half-a-dollar to get change, with which to pay the hire of the vehicle. The coolies tried to get away with their vehicle, without giving any change. He (Rose) took hold of the jinriksha, and one of the coolies pushed him into the creek. Burke then interfered, and he (Rose) supposed the jinriksha was broken in the struggle. By his fall, he was bruised "all over." He denied pushing the vehicle into the creek. When pushed, he fell a depth of seven or eight feet.

The second coolie was examined, and he also said the defendants were not the men who had used the vehicle during the day. He corroborated the evidence of his companion.

A French constable was also questioned, and confirmed the coolies' evidence in several particulars. He said if Rose had been pushed into the Creek, his clothes would have been muddy.

Rose said his clothes were muddy, but on being called out of the dock to be examined, there was but little dirt seen on them.

The jinricksha, on being inspected was found to have been broken as above described.

His Worship said there was no case against Burke, and he would be discharged, and called as a witness.

After hearing a portion of his statement, however, it became evident that he was suffering severely from the effects of drink, and

His Worship said he would adjourn the further hearing of the case until Thursday, at ten o'clock, and ordered Rose (who was likewise suffering, and who slept during nearly the two hours the Court was afterwards occupied) to be detained in custody.

R. (W. H. Dunn) *v.* James Hughey.

Both men are seamen of the *Ceres*, and according to plaintiff's statement, they were engaged in getting in a chain, when some words passed between them, and defendant slapped him in the face. The blow was not a very severe one, but the defendant, although he had tried to teach him the duties of a sailor, had acted disagreeably towards him since the ship left Newcastle, N.S.W.

Defendant admitted that he pushed the complainant, because he would not lift the chain along.

His Worship ordered the defendant to pay the cost of the summons.

March 10th.

R. (Matilda Courtney) *v.* F. W. Templemore.

Charge of using Threatening Language.

This case was adjourned on Monday, by defendant's application, to enable him to obtain legal assistance, defendant being detained in custody.

His Worship asked if defendant was provided with Counsel?

Defendant replied that the legal gentleman he had spoken to was gone up-country. He went on Friday, and had not returned.

His Worship—Do you wish the case further adjourned?

Defendant—No; I would rather plead guilty, and express my regret for using the language, or even going near the house. I will never molest her any more.

His Worship—That is the best thing you can do. From what I see of the information made by the complainant and supported by a witness, I cannot see what Counsel could do in the matter. Your language was calculated to excite great alarm, particularly in the mind of a woman. It is likely to make her afraid, when you threaten to take her life. She did perfectly right to apply to the law for protection. The only thing I can do, as I told you before, is to call upon you to find sureties to keep the peace against the complainant and all her Majesty's subjects. Can you find sureties?

Defendant—I have not ascertained.

His Worship—It is absolutely necessary that you should find sureties; your own bond will not be sufficient. In default you will be imprisoned.

Defendant made no response.

His Worship—What do you say, Mrs. Courtney; he says he regrets that he ever went near your house, and will not go any more. Will you be content with that assurance from himself alone?

Complainant (hesitating)—Yes, sir.

His Worship—You say his language puts you in a state of alarm and bodily fear. If you are not satisfied with his assurance, he must find sureties; and if he cannot find them, he must go to prison.

Complainant—I do not wish him to visit me any more.

His Worship—He says he will not. Are you satisfied with that promise on his part? (To defendant)—You are out of employment. What are you going to do?

Defendant—I am going to Japan. I was going this morning, and had everything packed up to start. I cannot go now for a week.

His Worship—Are you going to get employment in Japan?

Defendant—I believe so.

His Worship—That is the best thing that can happen, and Mrs. Courtney would not be in any further alarm. Is there any one in Court who will become surety for him?

No one responded.

His Worship (to defendant)—Have you any explanation to offer? Your language, as represented to me by the complainant and her witness, makes it appear that you are a very desperate and violent man, and that you mean to carry out your threats. You were not under the influence of drink at the time. I must take that view of your conduct.

Defendant made no reply.

Complainant—If he goes away to Japan, I shall be satisfied.

His Worship—But he says he cannot now go for a week. He gives no explanation of his conduct. I cannot understand such threats towards a woman, and I must make an order that defendant enter into his own recognizances of $100, and find two sureties in $50 each, to keep the peace for six months towards the complainant and all her Majesty's subjects; in default he must be committed to prison, but he may be released to go to Japan. If he is really going to Japan, his confinement will not extend over a week; and if he can find sureties in the meantime, he will be released at once. He will be allowed every opportunity of communicating with his friends.

The defendant was then taken back to prison.

16th March.

Reg. (O. Schuffenhauer) *v.* Chukee Chun.

Chukee Chun, a Chinese, was charged by Mr. O. Schuffenhauer with obstructing the road and using exceedingly bad language towards him on the evening of the 14th instant.

Complainant, who objected to being sworn, but said that he would affirm the truth, stated, that on Saturday evening last, he was driving by the Soochow Creek; defendant, who was intoxicated, joined hands with two other Chinese and stood across the road, causing his pony to shy, narrowly escaping being capsized into the Creek. He got down out of the trap and took defendant into a European Hong (No. 35, Szechuen Road), and detained him until a constable came and took him into custody.

Defendant, who was dressed in Chinese costume, but spoke English with great fluency, said he was intoxicated, and that his friends were taking care of him. Complainant had struck him on the head with his whip, and he being under the influence of liquor, had become noisy. He was very sorry for what happened, and it should not occur again.

Complainant, in answer to His Worship, said, that he would not be positive that the defendant did not get touched with the whip, as the pony was very restive. In the confusion he might have struck him accidentally.

His Worship to defendant—What are you?

Defendant—I was formerly in the Canton gunboat service, and also in Messrs. Lane, Crawford & Co., in Yokohama. I came to Shanghai in order to try and get employment in the gunboats here.

His Worship—Yes, and the first thing you do is to get drunk and create a disturbance. I shall fine you $5.00, or in default one week's imprisonment.

Complainant said that he should be glad to say anything to mitigate the fine. He did not wish to press the case against defendant, and thought that the time he had been locked up would have been sufficient punishment.

Mr. Stripling said that defendant had been admitted to bail.

Defendant paid the fine.

17th March.

Reg. *v.* John Hill and Charles Wylie.

Defendants are firemen of the British steamer *Ocean*, and were charged by P. C. Watts with being drunk and fighting in the Tien-dong road at 1.20 a.m. this morning.

The Constable stated that there were a number of men collected, and prisoners were fighting, the other men assisting them. He arrested the combatants, and took them to the Police Station.

Defendants said that they were both drunk and did not know anything about the affair.

Fined $3.00 each, and ordered to return at once to their ship.

Reg. (Master of the *Corea*) *v.* Robert Langlands.

Defendant, who was Chief Officer of the British barque *Corea*, was charged by Captain Adams with refusal of duty.

Defendant, in answer to His Worship, said that he did refuse to do any more duty, on account of the bad treatment he received from the captain. He had asked for his discharge on the ship's arrival in port, and three times subsequently, but received for answer that he, the Captain, had too much fear that he could not get rid of him.

Capt. Adams, said he would have been only too glad to get rid of defendant, but although he had tried since his stay in port, he had been unable to get another man.

His Worship—What sort of man is your second mate?

Capt. ADAMS—I discharged him on my arrival, as he was incompetent. I have discovered that the whole source of my trouble with the crew here, has been due to the conduct of my officers. Defendant knew that the hold had been broken open three weeks before he reported it to me. The carpenter reported to the defendant that the goose-neck of the whiskers was broken two days after we arrived in port, yet the fact was not reported to me until yesterday, when the ship was ready to sail.

His WORSHIP to defendant—You seem to have done your duty in a very un-officer like manner, to say the least. Now you had better take my advice and return to your duty.

Defendant—I will not go to sea again with that man, after the treatment I have received. He has threatened to turn me forward out of the cabin, and called me all sorts of names. I have been 15 years mate of a ship, and hold a master's certificate. I was six years in my last ship, the *Naturalist* and have certificates from two captains who sailed in her during that time.

His WORSHIP after examining the papers handed in by defendant said, I see these are all good, I suppose you do not wish to forfeit all these good characters now; you had much better return to your duty.

Defendant—No sir, I would rather go to prison than go back. I told the captain when we arrived, that I would not leave Shanghai with him. He told me that he would be only too glad to get rid of me.

His WORSHIP—You see how serious the matter is; if you persist in refusing I shall have to send you to prison.

Defendant—I was aware of that when I refused yesterday.

His WORSHIP—The effect of my committing you to prison, will be to nullify all your previously good character. I cannot think of sending you on board against your will as I might a seaman. The captain states that he is willing to discharge you, providing he can get another man.

Defendant—I can't help it. I will not go another month in the ship.

Captain ADAMS—I think, Sir, that he has a strong reason for not remaining on board. There is a large quantity of cargo to be accounted for to the owners, and he dreads going home.

His WORSHIP to Defendant—Are you married?

Defendant—Yes, Sir, I have a wife and family at home. I leave half-pay, £3.5 per month, for them.

His WORSHIP—Of course that will be stopped now. I never was more reluctant to punish a man; but since you persist, and are determined to incur all the evils I have pointed out, I shall send you to prison for one month, and you must pay your expenses while in gaol.

Clippings.

We are enabled by the *Daily Press* to understand one of Reuter's telegrams which lately puzzled the community. That the exportation of horses (? from England) "to" Germany should be prohibited, seemed in the very last degree unlikely. As published in the *Daily Press*, however, the telegram reads "from" Germany, and becomes intelligible.

We have Newchwang letters to the 24th February, but there is no news whatever. Our correspondent writes:—"This courier is despatched to learn the fate of one whom we fear is lost, with our heavy mail, as we have been without papers from home since beginning of November, although we have later letters *viâ* Peking."

The *London & China Express* says that on the 27th January, when the adjourned case against J. F. H. Trautmann, late of Shanghai, was again called on, the charge was withdrawn, the prosecuting counsel admitting that circumstances which had transpired since the adjournment, rendered that course absolutely necessary. All imputations against the defendant were also withdrawn.—Mr. Poland said the defendant had been brought to the Court under a complete misapprehension of the circumstances, and there was not the slightest foundation for the charge.—The Lord Mayor said it was a proper case for enquiry, and he was glad that it had resulted in the defendant entirely freeing himself of the charge made against him. He dismissed the summons.

Referring to the Chinese loan, the *Economist* says:—We suppose from the definiteness and particularity of a Reuter's telegram from Hongkong, published this week, that there is at length no doubt of the fact that China is to be added to the number of States having a public debt. It is stated that a loan has been actually contracted on account of the Chinese Government, that the amount is £627,675, that it will bear 8 per cent. interest and be issued at the price of 95 per cent. through the Hongkong and Shanghai Bank, that it will be secured by the Customs Revenue, that £300,000 is to be placed in China, at the exchange of 4s. 1¼d. per dollar, and that the subscription lists will close on the 16th inst. The operation is thus one which makes it resemble some of the worst issues of foreign loans which come into the market. The rate of interest particularly is very high for so small a loan by a country of such vast population and resources as China, and almost implies that the Chinese Government must be wastefully using its home resources, since with proper economy and without the burden of a great funded debt it ought to be able to borrow temporarily at a much less rate of interest than 8 per cent., or do without loans altogether. As regards the way in which such a loan should be treated by investors here, we do not think there can be much doubt. The moderation of the amount of the proposed loan is no doubt an element in favour of China, but whatever the amount, the points to be kept in mind by investors are that China is practically an unknown country, an unknown country undergoing a tedious political and social revolution in consequence of its enforced contact with Western powers, and that it is quite uncertain whether such a country can possess that kind of political stability which is essential to financial good faith. Lending to China may be a good enough speculation for those who know something about it and can afford to take the risk, but the case is one where much knowledge is required and should be used, and where the risk, judging by the rate of interest, will presumably be appreciable. It is to be feared, however, that China, like Japan and other new borrowers of recent years, will be demoralised by the cordiality of its welcome to the money markets of the West, and will be tempted to exceed the proper limits of indebtedness, even if it should now be keeping within them. Yet why should China be able to borrow a sixpence without first producing its accounts of revenue and expenditure?

PASSENGERS.

DEPARTED.—Per str. *Shanse*, for Tientsin—Mr. and Mrs. Jackson, Messrs. Walker and C. R. Thatcher. For Chefoo—Mr. O'Malley. Per P. M. str. *Nevada*, for Yokohama—Mr. C. J. Andrews. For San Francisco—Mr. and Mrs. F. E. Haskell, and Dr. C. Adolph. Silk—156 bales. Per str. *Tokio Maru*, for Nagasaki—Capt. Forrest, Dr. Beaumont, Messrs. J. F. Rodewald, A. Bean, D. McAllister, H. Overbeck, and Tajuoya; 3 Chinese and 1 Japanese in steerage. For Hiogo—Messrs. J. Gorman, S. C. Pass, Tack Hing, Eh Fow, Ah Yoo; 1 Chinese in steerage. For Yokohama—2 Chinese in steerage.

ARRIVED.—Per str. *Nevada*.—From America—Mr. and Miss Kelly. From Yokohama—Messrs. Lavers and Heitman; 1 in steerage. From Hiogo—Messrs. Pryai and Budd. From Nagasaki—5 Chinese in steerage. Treasure—$70,400. Per str. *Tokio Maru*, from Japan—Rev. C. Rubia, Messrs. Fredk. Hayne, Thos. D. Skelly, S. M. Sato, H. M. Fleischer, S. O. Pass, Tung Fu Tai; 2 Japanese ladies and child; 15 Chinese in steerage. Treasure—$18,100. Per str. *Ningpo*, from Hongkong—Ritter L. von Riess, Mr. E. Herton; 113 Chinese. Per str. *Dragon*, from Foochow—Mrs. Pichon, Dr. Beaumont, W. L. Hunter, Esq., and 39 Chinese. Per str. *Chihkiang*—72 Chinese. Opium—112 chests. Per str. *Peking*, from Hankow—Mr. Boyce. COMMERCIAL INTELLIGENCE.

SHANGHAI, MARCH 17TH, 1875.

Arrivals.—The U. S. mail of 1st ultimo, per steamer *Nevada*, viâ Japan. From Europe, the M. M. steamer *Iraouaddy*, with the London mails of 29th January last.

Telegrams.—No change to note under this heading.

PIECE GOODS.—On Friday—12th instant—our market was thrown into a state of ferment by the news, that the Tientsin Tautai, Sun, had imposed, or had threatened to impose an additional squeeze on all goods landed within, or passing through the limits of his jurisdiction, and the excitement increased until Monday afternoon, when the S. S. *Yungching* arrived with counter-advices, to the effect that Sun had been misunderstood, and that native produce and native manufactures alone were the objects of his pressing attentions. The following is a translation of the proclamation which caused the recent storm :—

Proclamation, issued at Tientsin, 29th of 1st Moon.

The Customs' and Foreign Affairs' Tautai, &c., of Tientsin, issues a Proclamation :—

Whereas, according to law, it is incumbent on Chinese merchants when importing native goods from steamer or sailing ship, after payment of duties at the Foreign Customs, to apply to the Hou Kwan (Native Customs) and then hand in *li-kin* duties : the previous Tautai, Tsung, fearing that cargo would be smuggled through, after passing the Foreign Customs, laid down regulations, as reported by memorial to the Throne, to the effect that the Foreign Customs should draw up, in triplicate, schedules of native Goods passed, for the guidance of the Native Customs. These regulations, however, have degenerated by length of time into an empty formula, and native merchants no longer make application to the (Native) Customs in conformity with the schedule. Still worse, they craftily declare the cargo to be Foreign property, give false marks, return less weight, falsify quality, change packages, and are guilty of all species of malpractices. Since the opening of Foreign commerce, native goods, coming formerly by internal water routes, now arrive by sea, and the Hou Kwan (Native Customs) at present depends entirely on *li-kin* duties to make up the deficiency in its proper duty receipts. Therefore, in view of the loss arising from the smuggling practices of merchants, it behoves the Taotai to at once carry into effect the regulations referred to, and to take strong measures to suppress recent practices, and in addition to deputing officers to take stringent and coercive measures, it is proper that this admonitory proclamation be issued.

Let, therefore, all merchants and shopkeepers, concerned with entering Imports at the Customs, know that, henceforth, Imports of native cargo, after passing the Foreign Customs, must at once, in accordance with the schedule made by the Foreign Customs, give particulars to the "Hou Kwan" of marks and contents, name of lander and date of entry, and pay dues in conformity. In this way, when the cargo is transferred to other Godowns, or sold and sent away, there will be means of identifying the packages. Passes can be issued and attempts at nefarious gain and smuggling will be suppressed. Therefore, from this date, let all conform to these instructions by at once handing in to the (Native) Customs specific particulars of their imports. And, in the event of any one being detected in the design to violate these orders, they will be heavily punished. Let all tremblingly obey.

And here also is a translation of the second proclamation which Sun found it necessary to fulminate in order to quiet the public mind :—

Proclamation :—

In view of the non-conformity of Chinese merchants to the regulations established by Imperial assent, by the former Tautai, Tsung, requiring that importers of native cargo should, after making entry at the Foreign Customs, hand in a copy of the schedule made in triplicate to the Hou Kwan, and pay *li-kin* duties ; in accordance, the said regulations were again brought into force by proclamation in order to suppress smuggling. The notice specially pointed to native merchants as importers of native cargo, and has no bearing on Foreign Goods.

But it has now come to the information of the Tautai that some rascally merchants have spread false and inciting reports to the effect that all descriptions of Foreign cargo, whether or not destined for the interior, will have to pay duty at the Hou Kwan immediately after passing the Foreign Customs. All the goods have further been piled up on the quay with the obvious intention of instigating Foreign merchants to action, and thereby to resist the payment of the *li-kin* duties. The circumstances are really abominable, and it becomes necessary to make a rigid investigation, in order to apprehend the guilty. Besides requesting the Foreign Consuls to make enquiries, the Tautai issues this proclamation. Let all merchants and Hongs know that all native goods imported by steamers and sailing ships will, after entry at the Foreign Customs, have to be at once reported duty paid at the Hou Kwan, and pay duty in accordance with the "Schedule" regulations. Smuggling will be heavily punished. Let all tremblingly obey.

In regard to these, the native brokers here are not slack in saying that the Tientsin dealers are not altogether blameless. They found that their first shipments hence were considerably in excess of the wants of the North-Western traders, who were provided with credits and funds to the extent of their requirements only. Thus, the prospects for the large surplus were not very promising. Further, exchange took rather an awkward turn for holders. And another story has it that Sun's proclamation is aimed at the system which gives to native shippers of native produce by native owned steamers greater privileges than those enjoyed by shippers who avail themselves of the foreign lines. His revenue was suffering, and he simply now demands what he considers himself justly entitled to, which is, that all produce, whether imported in native or in foreign owned bottoms, shall be subject to one tariff, and if this be true he deserves to be supported in his efforts to abolish the differential scales that are said to exist. Against this, however, the dealers are indignant, and hence their cry of *extra likin*, which, fortunately, was stifled before it had time to accomplish the wished-for effect. These are aspects of the affair which may or may not be true, and they are given here simply for what they may be worth.

The effect of the misunderstanding at Tientsin is thus described by a correspondent—

It is almost needless to say this put a stop to all business, in fact the Chinese will not even take delivery of their cargo from the steamers. A deputation of Chinese were taken to the different Consuls at this port, and represented the case in such a way that I am given to understand induced them as a body to remonstrate with the Tautai. It has not transpired yet whether this has had any effect. The natives threaten to shut up their shops if the Tax is enforced. The Bund is one mass of cargo.

And the same writer advises the termination of the business as follows :—"The Tautai has been obliged to give in regarding Manchester "goods. Chinese produce, however, has to pay the *li-kin* tax whenever landed. Business will commence at once—the Brokers going "about to-day"—11th instant—"but up to this time no sales have taken place."

The market news from Japan, by the last steamer, was worse, and thus, business, here, since last mail day, has been confined to buying for the River Ports, for Ningpo, and some little things for Chefoo. In this way, however, a fair amount has been put through, and a further rise in the value of best 8¼-lb. *Grey Shirtings* and common 6, 7 and 8-lb. *T-Cloths* has been established.

Grey Shirtings.—The lighter weights, and more particularly the low to medium grades of 7-lbs., have been much wanted, but their continued scarcity restricts business, and renders quotations little other than nominal; Tls. 1.52 per piece has been refused for Dewhurst's *Eagle* chop. Amongst 8¼-lbs. the finest classes have realised better values—Dewhursts *Eagle* having at last touched Tls. 1.95; and Tls. 1.98 having been given for Mendel's *Hand and Branch*. The very lowest qualities are also rather stiffer in price, but ordinary to good medium chops remain stationary, and in limited but strengthening request. The excitement in *Heavy Shirtings* seems to have sobered down a little, but there are still buyers "to arrive" at last week's quotations, and goods on hand command extreme rates. Total sales of Shirtings, 52 *a* 55,000 pieces.

White Shirtings.—A slight decline on former currencies is noticeable. Transactions have been insignificant. The TIENTSIN unpleasantness is partly accountable for this.

T-Cloths.—Nothing new in the position of this article. The demand for the lower counts of 6 to 7-lbs. has continued, and the inferior makes of 36-in. Cloth have been steadily enquired for. In all these—owing to their scarcity—sellers have had the advantage, and the tendency of prices is still against buyers at the close. Considerable transactions in low 6-lbs. and 7-lbs., to arrive by an early steamer, have been entered into at Tl. 1.11 and Tl. 1.25 per piece. There has also been a strong enquiry for ordinary Mexican 7-lbs., and the sales recorded establish improved values; but the best descriptions have not been much sought after, and although business has taken place at previous quotations—Tls. 1.53 for Collie's *Dollar* chop—the market seems weak. Estimate of week's business—65,000 *a* 70,000 pieces.

Drills.—Some fifteen hundred pieces of good Dutch 14-lbs. at Tls. 2.36 per piece nett, and 8,000 pieces of Mendel's *Pillar*—same weight—at Tls. 2.30 *a* 2.32, less brokerage, comprise the settlements of the week, and these were effected mostly before the Tientsin news reached Shanghai.

Jeans.—The American *Jeans* (2,000 pieces) ex *Golden State*, have been placed at Tls. 2.75 per piece. In addition to these, the purchases of English *Jeans* aggregate 6,000 pieces, at Tls. 1.83 *a* 1.86½ per piece.

Sheetings.—The quotations for English 15-lb. cloth still stand at Tls. 2.90 *a* 2.95 per piece, and sales to extent of nearly 1,100 pieces out of recent arrivals are reported at these figures. The article is wanted at the close, but holders demand some improvement, to which the dealers at present are opposed.

Fancy Cottons.—The transactions in this class are summarised as follows:—Assorted *Brocades* dyed, and also black and white—2,000 pieces at Tls. 2.72½; 2.62½ and Tls. 2.25 per piece respectively; *Printed T-Cloths*, 1,350 pieces at Tls. 2.50; 2.60; and Tls. 2.70 per piece. *Black Velvets*, 180 pieces at Tl. 0.18 per yard; *Handkerchiefs*, 1,500 doz. at Tl. 0.54 per doz.; *Blue Mottles*, 1,000 pieces at Tl. 0.05 *a* 0.05½ per yard; and 1,000 pieces of *Irishes* at Tls. 3.15 per piece.

Woollens.—Business in this department has been very slack during the week. Indeed—*Camlets* excepted—there has been nothing done worth recording. But dark blue *Camlets* of good quality and fast color have been in fairly steady demand, and sales at from Tls. 13 *a* 15 per piece for English, and Tls. 17.75 per piece nett for ordinary Dutch, to extent of about 1,000 pieces, have been concluded. *Long Ells* have declined in value, and are not wanted at the fall. *Figured Orleans* of Tientsin designs have found buyers in small lots on the basis of Tls. 3.20 *a* 3.25 per piece for a good cloth, with a goodly portion of light green in the assortment. *Lastings* have been offered on the market without effect, and so have the better description of *Medium Cloths*. *Spanish Stripes* have not received any notice whatever; and 500 pieces of Black plain *Lustres* is the only operation reported in that article. To-day a sale of 800 pieces imitation *Russian Cloth* at Tls. 24½ per piece is rumoured.

METALS.—*Nailrod Iron.*—Sales of some 6,000 bundles good quality at Tls. 2.87½ *a* 2.85 per picul indicate declining rates, but holders of best iron continue firm for prices which at present appear to be unobtainable. *Lead.*—Only one little sale of L.B. has been reported on this market since Thursday last, the price being Tls. 6.10 per picul, but the *Dragon*, s.s., with it is said, between 2,000 and 3,000 picul on board, cleared yesterday for Foochow, where the article appears to be wanted at high rates—$9.50 per picul. In the other *Metal* imports, there is no change to advise.

COTTON.—The Szechuen merchants have been almost the only buyers this week, and their settlements aggregate nearly 3,000 pieces of best Shanghai staple. The quotations of last week are unaltered.

EXCHANGE.—The rate for Bank paper still remains at 5s. 9⅛d. *a* 5s. 9¼d. At the latter rate a good business has been done. There is not much private paper offering, but rates are firmer. Credits to private buyers have been placed at 5s. 9½d., and to Banks at a farthing higher, while documentary are quoted 5s. 9⅝d. On India, a small transaction was reported at Rs. 308½ on Bombay, but the closing quotations are Rs. 308 on Bombay, and Rs. 309 on Calcutta. On Hongkong, the rate is firmer, and Bank paper can be got at 27¼.

* Exclusive of import cargoes ex *Glenartney, Foochow, Avoca, Hoogly, Diomed, Iraouaddy,* several Coasters, and of sundry re-exports.

EXPORTS.

TEA.—A fair amount of business has been done in *Green Teas* during the past week, chiefly for America. There is scarcely any alteration to note in values, but good and fine chops being in small supply command full rates.

Settlements for the week have been—

Fychow, Moyune, &c.	13,822 ½-chests,	at Tls.	14	*a* 34.	Stock—24,070 ½-chests.
Pingsuey	197 ,,	,,	23¼	*a* —.	3,750 ,,
Shanghai-packed	— ,,	,,	—	*a* —.	3,450 ,,
Total.....	14,019 ,,				Total... 31,270 ,,

Export to Great Britain (exclusive of lost Cargoes) is—

	1874-1875.		1873-1874.
Black	65,038,571 lbs.	against	58,683,383 lbs.
Green	11,320,041 ,,	,,	9,642,921 ,,
Total	76,358,612 ,,	,,	68,326,304 ,,

To America and Canada—

Black	1,843,937 lbs.	against	801,149 lbs.
Green	16,905,589 ,,	,,	20,096,822 ,,
	18,749,526 ,,	,,	20,897,971

SILK.—Since the issue of our report of the 11th instant the silk market has been fairly active, and settlements are estimated at 800 bales: consisting chiefly of common Tsatlees at Tls. 255 @ 275 per picul. A small parcel of "Donkey" chop 4 is reported taken at Tls. 320 per picul. A few Hangchow Tsatlees have found buyers at Tls. 245 @ 260, coarse Taysaams at Tls. 230 @ 240, and common Long reel Taysaams at Tls. 230 @ 235 per picul. Some China Trams and Organzines go forward on Chinese account.

The American mail which left two days since took 156 bales, purchased at irregular prices; the quotations for re-reeled Tsatlees ranging from Tls. 335 @ 380, and for re-reeled Hainings from Tls. 330 @ 380 per picul. Extra and best classes were not in demand.

The unsold stock is slightly reduced, and is now estimated at barely 2,000 bales.

COMMERCIAL POSTSCRIPT.

March 18, 1875.

Arrivals.—March 11th, American barque *Marmion*, from Burrard's Inlet; 12th, British barque *Charlie Palmer*, from Singapore.

Departure.—March 13th, British steamer *Diomed*, for London.

The French mail steamer *Hoogly* takes about 793 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 9d. *a* 5s. 9⅛d. First-class Credits to Bank, 5s. 9⅝d. *a* 5s. 9¾d. First-class to Private buyers, 5s. 9¾d. Private and Documentary, 5s. 9¾d. *a* 5s. 9⅞d. On Paris, Bank, Frs. 7.27½. Private, Frs. 7.35. On India—Bombay Bank, demand, Rs. 308. Calcutta Bank, Rs. 309. On Hongkong, Bank Bills, demand, 27¼ per cent. discount. Private, 15 days' sight, 27¾. Gold Bars, Tls. 171.20. Bar Silver, Sh. Tls. 111.30 Mexican dollars, Sh. Tls. 73.0125 per 100. Carolus dollars, Sh. Tls. 80.20 per 100. Copper cash, 1,580 per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

H. & S. Bank.—A fair business has been done at 15 % dis. and Ex. 72¼ for cash, and also for 31st instant. Shares are still wanted for the latter date.

S. S. N. Co.—Sales were made on 12th instant at Tls. 84 cash and Tls. 85 for 31st instant, but the demand suddenly ceased, and no business was reported till yesterday, when sales were made at Tls. 80 for 31st instant, and Tls. 84 for 30th June. A small business has since been done at Tls. 80 for 30th April.

Fire Insurance Shares.—Chinas have been settled at $133 and Ex. 73, and *Victorias* at $125 and Ex. 72¾—the market closing with buyers. *Hongkongs* have been placed at $485 and Ex. 72¾, at which there are sellers.

Marine Insurance Shares.—Yangtszes has been placed at Tls. 585, but are scarce. *China and Japans* are offered at quotations.

Shanghai & Hongkew Wharf Co.—Sales were made immediately after last report at Tls. 100 for May, and a fair business was subsequently done at Tls. 101 for 30th April. There are sellers still at the latter rate and at par for cash.

Chinese Imperial Loan.—A limited business has been done at £99 and Ex. 5s. 7d.

The Weather has been very variable—heavy thunderstorms, the first of the season, passed over the Settlement on Friday morning and evening. Rain fell again on Sunday and Monday, and again this morning. The extreme range of the thermometer has been 41 59.

MARRIAGES.

On the 21st Jan., at St. George's, Camberwell, by the Rev. Samuel Smith, FRANCIS WILLIAMS, eldest and only surviving son of F. W. Mitchell, of Hongkong, to LOTTIE, eldest daughter of P. L. Carman, of Camberwell.

At Malden, Jan. 27th, at the residence of the bride's father, on Pleasant street, by Rev. Dr. J. W. Wellman, Mr. SYLVANUS C. FARNHAM, of Shanghai, China, to Miss ELMA C. METCALF, daughter of M. A. Metcalf, Esq.

DEATHS.

At London, on the 18th January, 1875, MONTAGUE ROBERT, youngest son of the late Henry Tootal, of London and Brighton.

On the 22nd Jan., at Cefn-y-Coed, Carnarvon, DAVID JOHN, infant son of John Charles and Jane Ellen Sillar, aged twenty-six days, having survived his mother twenty-one days.

PASSENGERS.

DEPARTED.—Per P. M. str. *Costa Rica*, for Nagasaki—Messrs. A. Corner, Wm. E. Fernie; 7 Chinese in steerage. For Hiogo—7 Chinese in steerage. For Yokohama—Mr. and Mrs. E. Holdsworth, Mrs. Rice and child, Miss Erskine, Messrs. F. G. Davidson, D. C. Tata, E. N. Meta, H. Rustomjee, R. H. Percival, E. B. Maitland, D. R. Elder, T. C. Buchanan, F. D'Iffanger, N. J. Silas, A. R. Hewlett, R. H. Boyce, A. W. Glennie, E. C. Maitland, W. Morris, J. Welsh, and Col. MacBean; 12 Chinese in steerage. Per str. *Niigata Maru*, for Nagasaki—Mr. E. B. Souper; 1 Chinese. For Yokohama—Mrs. Harris and child, Rev. S. D. Harris, Messrs. R. Johnston, Keswick, J. J. Paterson, Hunter Corbett and three children, and A. Brand; 10 in steerage. For Hiogo—Mr. G. Scheeffer.

ARRIVED.—Per str. *Niigata Maru*, from Japan—Capt. Schultz, Rev. C. Rubio, Messrs. W. Powers and servant, E. W. Clark, E. Davies and servant, C. McCrae, J. H. Blair and servant, H. Blass, C. H. Nail, Jas. Merdith; 18 in steerage. Per str. *Hankow*, from Kiukiang—Mr. Hart. Per P. & O. str. *Khiva*, from Southampton—Mr. H. de Bastide. From Bombay—Mr. Goolan H. Yacoollia. From Hongkong—Messrs. M. W. Boyd and servant, W. de Rusett, W. Morris, Kong-hup and servant, Kock-lee and servant; 71 Chinese. Per str. *Patroclus*, from Liverpool—Mr. Mitchell. From Hongkong—Messrs. Harrison, Junr., Aubert, Gray, and McCulloch; 43 Chinese. Per str. *Appin*, from Tientsin—11 Chinese. Per str. *Lotus*, from Hongkong—Capt. Jurgensen. Per str. *Shanse*, from Tientsin—Rev. H. Corbett and family, Mrs. Penrose, Messrs. Dillon and Nachtrieb. Per str. *Fusiyama*, from Chinkiang—Mr. and Mrs. Colby, and Mr. Dubois. Per P. M. str. *Oregonian*, from Japan—Messrs. F. R. Wetmore and servant, A. Stuart and servant, D. W. A. Jones, J. Wisner, W. H. Ricard, B. A. Valantine, W. Y. Nambue, and Yung Wei Chune; 24 in steerage. Per str. *Glenfinlas*, from London—Mr. T. Cartwright.

LEAVING.—Per str. *Avoca*, for Southampton—Mrs. Lemarchand, 3 children and native servant. For Hongkong—His Excellency the Viceroy of Canton, and suite, Messrs. A. Goetz and Edward Davis, and servant.

THE publication of the *North-China Herald and Supreme Court & Consular Gazette* commenced at 5.00 P.M.

The North-China Herald.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, MAR. 25, 1875.

RETROSPECT OF 1874.

Japan. The chief incident in Japanese, as in Chinese, politics during the past year, has been the Formosan difficulty which so nearly plunged the two nations in war. We have already sketched the circumstances, in our review of Chinese politics, so it is unnecessary to recapitulate them here. What remains, to complete our record of the incident, is to note the condition of affairs in Japan which had influence in bringing on the quarrel.

The changes in the position of the Samurai, that ensued on the revolution effected in the Government, have been recorded in previous years. They had lost their prestige, and they were irritated by the scheme for the commutation of their incomes, which the condition of the State finances did not permit the Government to improve. To quote the words of the *Japan Mail*:—"The swords of many of them, the last relics of a waning prestige, had been pledged to afford temporary sustenance for their wives and children. The old homes had been broken up. One by one the small but cherished ornaments or necessaries of domestic life had been sold, and each fresh sacrifice renewed the bitterness caused by a revolution which was fast sweeping away privileges, all the more fondly clung to because they represented the spirit of a departing age." Their warlike instincts, too, had been aroused by the brief but sharp struggle of the civil war, and their patriotism was chafed by the insolence of Corea, and the injury done to their fellow-subjects, the Liuchiuans, in Formosa. War in either quarter afforded an opportunity for mending their condition, and an outlet for their excitement. We have, here, without doubt, an explanation of the pressure which urged the Government to follow up unsatisfactory negotiations at Peking, by the active step of an expedition to Formosa. Iwakura, who was one of the strongest advocates for peace, was assailed and narrowly escaped assassination in Yeddo. An insurrection, which occurred in February in the provinces of Hizen and Saga, went further to convince the Government that a great body of discontent existed, requiring either to be conciliated or permitted to explode elsewhere. It is not surprising that the Government, urged forward by these facts, should have given way to the general desire to avenge the murder of the ship-wrecked Liuchiuans, and entertained the project of colonising the Eastern half of Formosa. We need not recapitulate the unsatisfactory negociations at Peking, which seemed to countenance this course, nor the progress of the expedition which eventually left Nagasaki either in spite, or in an advance, of a counter-order dictated at the last moment by apprehension of the complications with China which the scheme might entail. The troops landed in Formosa, subdued the guilty tribe, and were preparing to carry out the ulterior object, when China roused

herself to the point of demanding their withdrawal. How nearly war ensued, and how war was averted by the good offices of the British Minister, is a matter of record. The Japanese bore themselves firmly throughout, and retired at length under a convention which tacitly admitted that they had been right in the enterprise they undertook. Japan agreed to evacuate Formosan territory on the payment by China of Tls. 500,000, the estimated value of works and barracks constructed in the island, and her guarantee to provide for the future security of the Formosan coast.

It is likely that the Government gained strength at home from the vigour of its action abroad. That it is gaining strength and solidity, seems at any rate to be unquestioned. Popular it is not; taxes are heavy, and the infinity of new regulations that have issued in pursuance of the new order of things, still harrass the people. To quote again from an able review of the subject in the *Japan Mail*:—"The spirit of centralization is too strong. The blood is, as it were, all demanded for the service of the brain; the other organs and the limbs have not their fair share of it, and thus they decline in strength and vigour. To give one instance: The roads in olden times were maintained by the Daimios out of their revenues; now these revenues are paid into the central treasury, and are diverted towards the general purposes of government. But roads have largely fallen into disrepair; every year they become worse; and this causes great complaint. The unpopularity of the Government is witnessed by the undoubted fact that the lower orders of people in the provinces of Saga and Hizen strongly sympathized with the insurgents in the late rebellion, and this is attributable to excessive taxation, together with a disposition on the part of the State to interfere irritatingly and unceasingly with the habits and customs of the people." But there seems no doubt that much of the disaffection which existed in the Empire at the time of the Saga outbreak, has since disappeared, and it may be hoped that the existing uneasiness will gradually subside as things gradually shake into their new places. The changes which have been effected in Japan, in so short a time, are sufficiently astounding. To expect that all these should happen without causing uneasiness and dissatisfaction, would be to expect preternatural wisdom in the rulers and preternatural resignation in the governed.

There is ample room for hope that, with patience on both sides, existing evils will be remedied, and scope given to the new institutions which have been so suddenly adopted. That the changes have been too rapid, few will question. That many of the changes have been unwise—savouring rather of imitation than emultation—admits of equally little doubt. What has surprised foreigners is, that those changes have been so tacitly acquiesced in by the people. But this very acquiescence gives assurance that a nation which had worked out a high civilisation of its own, will eventually adapt itself intelligently to the new order which it is now endeavouring to copy. Progress has been made in the construction of railways, and in extending the means of education. A desire for representative institutions seems to be gathering strength, and is likely soon to find expression. The attempts which have been previously made in this direction failed; but it was hardly likely that a model Parliamentary Government could be suddenly established in the place of a strong feudal system. It took centuries, in Europe, to effect the change; that Japan should experience difficulty in trying to make the change in a decade, is scarcely surprising.

To sum up, in the words of the *Mail* review:—"The year closes somewhat gloomily, for the commercial embarrassments among the Japanese are serious, and it may be some time before they are surmounted. But it must be said that the advance made by the country during this period is certain and indisputable. Those who fail to recognize this at some moment of special discouragement—and there are many such moments—should look back to its condition five years ago, when it was just emerging from the weakness consequent on the Revolution. It is idle to draw the two pictures. The contrast must be patent to every honest mind. But the clearing of the land prior to sowing the new crop, is hard and thankless work. Abundant hindrances are visible in all directions, and abundant errors are made both by overseers and workmen. Yet as the task progresses, the new crop springs up, and effaces the recollection of toil, and mistakes, and previous disappointments. If the Japanese are too often dilatory, capricious and uncertain, and betray inherent faults which can hardly be eradicated without a change in their whole nature, the foreign critic has his own errors, and should learn from these by how dim a light he walks in his attempts to judge truly, and with the generous consideration we all demand for our own shortcomings, the steps of a career so unexampled as that on which the people of this Empire have how entered."

Shares. In reviewing the Share Market for last year, we think it well to give a separate statement of the extreme fluctuations of each of the principal stocks.

In addition to the general depression in trade, we have had competition tending to lower the value of several stocks. Holders of shares in our local bank have suffered considerable loss, and the same may be said of holders of steamer shares. Two of our steamer companies are in liquidation, and since the close of the year Bank shares fell to 20 per cent. discount. Among Marine insurance companies, North-China and Chinese Insurance shares have risen, while Yangtsze and China and Japan shares have fallen. There is not much change to be noted in Gas or Fire insurance shares. Wharf shares, which were much depressed during the year, have since risen above par. The Shanghai and Pootung Foundry and Engineering Co. was wound up early in the year, the shareholders receiving a return of 50 per cent. on the capital.

Hongkong and Shanghai Banking Corporation.—After the New-Year holidays, business opened at 49 per cent. premium, and advanced on 14th January to 50 per cent. premium cash, and 50½ per cent. premium for 31st January. Afterwards the price gradually fell, until shares were sold at par on 5th October; after which it rose a little, and they were sold at 2 per cent. premium on 31st December.

The accounts shew $191,768.91, as the net profits for the year, which is not quite 4 per cent. on the paid up capital. This includes the profit on the Chinese Imperial Government Loan. And, in addition to these small profits, a sum of $1,115,000 was set aside to meet bad debts, made up as follows:—

Balance of profits from 1873	$ 26,290.53
From profits for 1874	188,709.47
,, Reserve Fund.....	900,000.00
	$ 1,115,000.00

This compares very unfavourably with the result of business in 1866, when, with a capital of $3,000,000, the profits were $690,975.54, or over 23 per cent; or in 1871, when $705,785.85 were earned, with an average capital of $4,250,000, or over 16 per cent.; but the Bank has of late been extraordinarily unfortunate, and when trade recovers, as it must do some day, we see no reason why it should not, with its excellent business connection, under proper management, again pay good dividends.

Shanghai Steam Navigation Company.—The market opened at 111 cash, *cum* December dividend. and the shares reached, in March, 121½ cash, and 127 for 31st August. Afterwards the price gradually fell to 80 on 31st December.

The net profits for the year were...	184,823.96
over 8 per cent. on the capital.	
Dividends amounting to 7 per cent. were paid	157,500.00
Leaving to be carried to reserve ...	27,323.96

The reserve fund now stands at 650,803.63, being nearly 29 per cent. on the capital.

Competition with the China Navigation and the China Merchants' Companies depressed this stock; but now that an arrangement has been made with the former to run amicably on the river, the prospects of the Company are again good. The Directors have been impressed with the advantages of iron steamers over wooden ones, and are gradually replacing these by those.

China Coast Steam Navigation Company.—In February, shares on which Tls. 65 had been paid up, were sold at Tls. 57, and advanced to 62½ on 7th March, but afterwards declined to 50 on 22nd September. A call of Tls. 20 per share was made in October. The closing quotation was 73.

The net profits for 1874 were (over 22% on paid up capital)	77,399.28
Dividend 10%	34,800.00
Carried to reserve	42,599.28
The reserve fund now stands at (14.7% on capital)	62,522.10

If it were not handicapped by having to contend against a Company subsidized by Government, this Company would be very successful. Even as it is, it promises much. There is a want of confidence in steamer shares, in consequence of competition, and the stock is probably depreciated on that account. The

steamers are nearly all quite new, and therefore economical. The Directors are increasing the fleet. A new steamer is expected shortly.

Union Steam Navigation Company (in Liquidation.)—These shares were sold at 70 in February, and fell to 55 in May. A return of Tls. 50 per share was made in September, and the shares were quoted 21 on 31st December. The ultimate value of these shares depends on the result of the *Ava-Rona* case, still pending in Hongkong.

North-China Steamer Company (in Liquidation.)—On 13th February shares were sold at Tls. 40, and on 15th August at Tls. 4. In December, the price was 7 to 8. The Company cannot be wound up until the *Yuentzefee* is sold. It is probable that shares, costing Tls. 100, will realize little or nothing.

Shanghai Dock Company.—Shares were done at 205 on 4th January, and a similar rate was steadily maintained throughout the year.

The net profits were (4.9% on capital)	10,785.89
Dividends (4%)	8,800.00
To reserve	1,985.89

The reserve fund now stands at Tls. 3,904.68, which is available to meet the cost of whatever Landlords' repairs the Dock may require. The Old Dock was leased for 5 years from 1st July, 1872, to 30th June, 1877, at a rental of Tls. 9,200 per annum, payable half-yearly on 30th September and 31st March. At the last meeting of the Company it was agreed to extend the lease for 10 years more, at the same rent. This Dock has been lengthened by the tenants at their own expense. The New, or Lower, Dock is leased from 1st July, 1872 to 30th June, 1887, at a yearly rental of Tls. 1,800, payable half-yearly on 30th September and 31st March. The river silted up opposite the entrance to the Dock, to remove which, and put the Dock in working order, would have cost at least Tls. 20,000. The Company was not in a position to spend such a sum, and there being no demand for the Dock at the time, the land was leased to the present tenants. They have filled up the Dock, and are bound before July of this year to erect, on the land, buildings costing at least Tls. 7,000, (exclusive of the cost of filling up the Dock,) and to keep them in tenantable repair, which buildings become the property of the Landlords at the expiry of the lease. The income of the Company is thus secured until 1887.

Pootung Dock Company.—The market opened at 95, and the price declining during the year, closed at 85. The accounts stand thus:—

Available balance from 1873	209.74
Net profits for 1874	9,708.57
Dividends 10%	9,400.00
Available balance to 1875	518.31

This Dock was originally leased to the tenants of the Old Dock, from 6th December, 1872, to 30th September, 1876, at a yearly rental of Tls. 10,000, clear of all taxes, and payable half-yearly in advance. At last meeting of the Company it was agreed to grant an extension of the lease for 10 years, on the same terms, the tenants having the option of terminating the lease on 30th September, 1881. The income of the Company is, therefore, certain until that date.

Shanghai Gas Company.—Shares were sold in February at 139, and advanced to 145 in June. They were sold in December at 144. Dividends amounting to 11 per cent. have been paid for 1874. The report has not yet been published. The shares in this Company have maintained a similar high value since 1871. They appear to to be a steady, safe, investment.

Compagnie du Gaz.—The shares were quoted 63 in January, and gradually advanced during the year, closing at 70. Dividends amounting to 11 per cent. were paid. Like Shanghai Gas shares, these have remained at a high price. The Municipality are the Company's best customers, and if they succeed in annulling their agreement with the company, which it seems the Council wishes to do, it will entail loss on the shareholders.

North China Insurance Co., 1872-74.—The price was 400 in January, and advanced to 410 in March. They were quoted 365 *ex* dividend of Tls. 60 in March) on 31st December. The latest published account is to 30th June last. At that date the

Premia collected was	2,071,950.52
Losses paid	1,022,842.32
Net profits	897,312.49

that is 299 per cent. on the paid up capital in 2½ years. Out of this had been paid

As dividend	258,038.63
Carried to reserve	221,961.37
Leaving at cr. of working account.	417,312.49

The shareholders have since received a dividend of Tls. 300, making in all Tls. 460 and 12 per cent. on contributions. When the history of our local institutions comes to be written, this Company will occupy a prominent place in it.

Yangtsze Insurance Association.—Business was done in January at 710, (*cum* Dec. dividend), and 670 (ex dividend). The price advanced to 710 in March, but afterwards declined. It was 610 in December. Dividends amounting to 15 per cent. were paid to the shareholders in 1874, and the contributors for 1872-73 received a return of 22 per cent. on premia. The reserve on 30th September, 1873, the date of the last account, stood at Tls. 200,000—33⅓ per cent. on the capital. The shares in this association will probably not rise much in value, because, after paying the Shareholders 15 per cent. interest on capital, the balance of profits is distributed among contributors of business.

China and Japan Marine Insurance Co.—The market opened at 93, advanced to 105 in April, and then gradually declined, closing in December at 78. The last balance-sheet, dated 30th June last shews:

At reserve	Tls. 52,000.00
At working account	51,663.70
	Tls. 103,663.70

Up to 15th October, there were claims paid or pending amounting to 92,000. against which Tls. 62,000 of premia had been collected. A return of 11 per cent. on premia was made to contributors during 1873. This Company has suffered much from exceptionally heavy losses, and consequently must find it difficult to compete with the other local offices in returns on contributions. To its own action, in commencing the system of paying to contributors of business a certain proportion of the profits, this state of things is however in great measure due.

Chinese Insurance Company.—Business was done in January at 187 (*cum* December dividend), and the price advanced to 203 in April. It was 190 in September, and 200 in December. Interest at 12 per cent. was paid to shareholders for 1874, and 23 per cent. to contributors for 1873. The accounts for 1874 have not yet been published. After payment of 12 per cent. interest to shareholders two-thirds of the profits of the Company will be returned to contributors of premia. This measure is necessary in order to secure business. The value of these shares, therefore, is not likely to increase much for some time.

Hongkong Fire Insurance Company.—The price of these shares was 558 to 560 in January (*cum* December dividend), and 500 in February, (ex dividend). Rates fluctuated a little during the year, and at its close the quotation was 550. The accounts shew:

At reserve	451,774.00
At working account 1874	233,784.87
	$685,558.87

over 171 per cent. on paid-up capital. A dividend for 1873, of $51.75 per share (25.875 per cent.), and a return of 23.94 per cent. on contributions, were paid to shareholders on 24th ultimo. This Company, being able to make such large returns on contributions, must continue to compete successfully with home offices, and do a large business. Its losses have hitherto been very small.

Victoria Fire Insurance Company.—Business began at 116 in January, and the price advanced to 126 in June. It reached 129 in November, and 126 on 31st December. The accounts shew:—

At reserve	$ 179,821.83
At working account, 1874	50,275.48
	$ 230,097.31

or 76.7 per cent. on paid up capital. Interest at 12 per cent. was paid to shareholders for 1874: and for 1873, dividends of 4¼ per cent. on capital, and of 15 per cent. on contributions, have since been paid.

China Fire Insurance Company.—Shares were done at 128 in January, and the rate gradually advanced to 137 in October. The closing rate was 134. The balance sheet shews:—

At reserve	$ 248,614.30
At working account, 1874	69,870.39
	$ 318,484.69

or 79.62 per cent. on paid up capital. Interest at 12 per cent. for 1874, has been paid to shareholders, and 14.87 per cent. on their contributions for 1873. The premia collected by this Company, and by the Victoria Fire Insurance Company, have been decreasing. This might be anticipated, when we note the fact that home offices take risks at similar rates, and make a return of 20 per cent. when the premium is paid.

Shanghai and Hongkew Wharf Company.—Shares were sold in January at 120 cash, and 124 for 30th April. Rates gradually declined to 81 on 10th December, but advanced to 90 by the end of the year.

Net profit for 1874 (6.71% on capital)	14,429.16
Dividend 5%	10,750.00
To reserve	2,872.98

This Wharf has not realised, of late, the good prospects with which it started,

Competition and dull business have combined to depress its earnings. If the proposed amalgamation with the Wharves under the management of Messrs. Jardine, Matheson & Co. is carried out, there is every prospect, however, of a successful future.

Summary of News.

The English mail of the 5th February arrived on the 21st inst. by the P. & O. str. *Khiva*.

The American mail of the 15th Feb. arrived yesterday by the P. M. steamer *Oregonian*.

A mail leaves to-morrow for Europe by the P. & O. str. *Avoca*.

The following telegrams have been received from Reuter's during the week.

Mitchell re-elected for Tipperary, by an overwhelming majority over Moore.

The University Boat Race has been won by *Oxford*, by 4 lengths.

The Prince of Wales will [illegible] November.

The French Assembly has adjourned till the 11th May.

Obituary.—Comte de Jarnac, French Ambassador at London.

The Consistory made six new Cardinals, including Manning; and ten Bishops.

Obituary.—Field-Marshal Sir William Gomm.

Undeffret elected President of the French Assembly.

The annual general meeting of the Shanghai Rowing Club was held on Monday. The report and accounts for the past year, which represented the affairs of the Club as flourishing, were passed unanimously.—Four of the old committee, Messrs. D. Glass, Haselwood, Fuller and Muller were re-elected to that office, and Mr. Batt was elected on the committee, and also as Captain of the Club, in the place of Mr. R. W. Little, who has gone home.—Several interesting topics were discussed, and resolutions carried, the chief of which was for the proposed removal of the upper boat-house, which has become inconvenient through the silting up of mud.

A meeting was held at the Club on Friday, to consider a proposal for the establishment of a Drag Hunt Club. Mr. A. J. How was voted to the chair; and the following were present—Messrs. Howie, J. B. Irving, J. J. Keswick, W. V. Drummond, P. Moller, A. Milsom, G. F. Goodfellow, W. Wulff, A. Hinckley, J. E. Waller, A. R. Burkill, S. Daly, G. A. Lindsay, A. McLood, T. Nelson, H. W. Daniel, E. H. Gore-Booth, F. Reid, and D. Brand. A preliminary meeting had been held on the 19th February, at which a provisional committee were elected, by whom a code of rules had been drawn up, Mr. Howie acting as hon. secretary. The Chairman, in opening the business of the present meeting said the intention was to start with forty members, who had already been obtained, and that new members would be proposed, seconded, and ballotted for in the ordinary way. A pack of sixteen couples of hounds would be got out from home, and placed at first under the care of a native huntsman, but it was thought likely, for various reasons, that the services of a foreign huntsman would be necessary. Some other details were mentioned, amongst which were the erection of suitable kennels (for which a site had been obtained on the premises of Messrs. Crofts and Sewjee), the cost of maintenance of the hounds, &c., all of which were explained satisfactorily. It was asked if the proposed new hunt would interfere with the Paper Hunt Club, to which a reply was given that no interference could result, and that the Paper Hunt would be maintained as usual.—On the motion of Mr. Daly, seconded by Mr. Burkill, the following were elected as the permanent committee of the Drag Hunt, Messrs. Drummond, Burkill, How, Howie, and Keswick.—The rules as drawn up by the provisional committee, were agreed to, and the meeting terminated with a vote of thanks to the Chairman.

A verbatim report of the speeches made at the Saint Patrick's dinner on the 17th inst., will be found on another page.

The usual fortnightly entertainment given by the Shanghai Temperance Society [illegible] numerously attended. Mr. C. P. Blethen occupied the chair. The programme was varied and pleasing, and everything passed off satisfactorily. We hear that the Committee of the Society are already considering the question of finding other suitable premises; the present building being required in the autumn, for Municipal purposes. There is some talk of erecting a hall, to afford the same kind of accomodation, and be conducted similarly to the present one. The general feeling among the members is that this would be the best course to pursue, if the somewhat difficult problem of funds could be solved—and of this there seems little doubt.

The Municipal Reports which we print to-day have more than usual interest. The questions of encroachment on the Yang-king-pang creek, and of the cost of bridges over that pellucid stream, have been occupying the attention of the two Councils. The first is to be submitted to the arbitration of Messrs. Medhurst and Godeaux. The second is at a deadlock.

The election of members to the Municipal Council will take place on the 6th and 7th proximo. Nomination papers have been circulated, and are to be returned to the Council room not later than 4 p.m. of the 29th instant.

Judgment was delivered yesterday in the U. S. Consular Court, in the case Municipal Council *v.* W. H. Fogg, in favour of the plaintiffs. A full report of the evidence and arguments will be found on another page. The text of the decision will be given in our next issue.

On Tuesday afternoon, a launch took place at Messrs. S. C. Farnham and Co.'s lower yard, of a very fine steam yacht. Her length is 78 feet, 12 feet beam and depth 11ft. 6in. She is built with Malava framing and Teak planking and decks, and is designed either for pleasure or service. The guards, which project about two feet from the side, give a clear passage all round. The cabins (three in number) viz., Saloon, Ladies' Cabin, and forward Saloon, are well ventilated and are to be handsomely fitted with teak, walnut, and white woods, relieved with mouldings of white and gold which, with red plush upholstery, will produce a pleasing effect. The mast, funnel and wheel house are so constructed that they can be lowered at any moment, thereby increasing her value for up-country service—whenever permission to run steamers up-country may be given. Her engines are 12-inch high pressure; 15 H.-P. nominal, working up to 45 H.-P. Her bunkers can contain sufficient coal for 5 to 6 days steaming, day and night. The little vessel was christened *Lillie*, by Miss Blethen, who dashed a bottle of crystal water against the bows as she started from the ways.

A match at bowls between the Senior and Junior alleys was played off on Monday and Tuesday. The Seniors won all four games on their own alleys, and the first on the Junior alleys—thus scoring the five out of eight without interruption. The usual annual challenge match between the two Clubs is likely to be played in the autumn.

We [illegible] a parade of all arms of the S. V. C. is to be held on Tuesday next. Easter Monday would have been a good day, as a general holiday, but that it is likely many men will be away up country. Even Tuesday, however, will be an off day; and if the Stores would close an hour earlier, as they have kindly done on one or two previous occasions, it would enable the parade to be called at 4 p.m., and give time for some good drill, after the marching past which is to form a leading feature in the programme.

It is satisfactory to know that recruiting for the S.V.C., both horse and foot, has been brisk of late. No. 1 Rifle Co. has been considerably reinforced, and the recruits have been drilling actively. The roll of the Rangers, too, has been raised to 27, and some 17 of these were out for drill on Saturday afternoon.—We have always said there is no reason why Shanghai should not be able to boast a Volunteer corps five hundred strong, and we would like to see the present rate of enlistment continue till that number is made up.

M. Rémusat gave another Concert in the Masonic Hall on Tuesday. The programme was a particularly interesting one, comprising a Symphony by Haydn, an Overture by Kalliwoda, a charming song for Soprano, and a variety of other good things too numerous to mention. Perhaps the most interesting number of all was Balfe's famous Rose Song from *Il Talismano*, the last composition of the gifted Irish *Maestro* whose genius extorted recognition from one of the speakers at the late St. Patrick's dinner.

Although the time for holding the first Shanghai Horticultural Show is somewhat distant, considerable interest is already felt in its success, and it is hoped that, in accordance with the announcement, there will be numerous exhibitors of flowers, fruit, shrubs, &c., "whether grown by themselves or by others, and whether grown in Shanghai, or imported from elsewhere." This is an excellent arrangement, as giving the Show a much wider scope than it would otherwise have; and, added to the rule that contributors may exhibit without competing for prizes, should go a long way towards helping to complete

the exhibition. Given fine weather, a few pleasant hours among flowers and music may be certainly anticipated.

A Reuter's telegram informs us that the tide of success in the University boat-race has at last turned. Oxford won on Saturday, by four lengths.

A mob of very good looking griffins was offered for sale at the Horse Bazaar on Saturday, and realized prices ranging from Tls. 40 to Tls. 165. Only one pony reached the top figure; the others sold ranged from Tls. 90 downwards.

It is reported, we believe on good authority, that Mr. W. Kaye, who was formerly manager of the Chartered Bank in Shanghai, has been appointed sub-manager of the Hongkong and Shanghai Bank in London.

Mr. Alabaster left on Tuesday for Hankow, to take over charge of the British Consulate from Mr. Hughes, who goes home on leave.

The French Gas Co. refuse to lower the price of gas; so the French Council purpose submitting their contract with the Company, to a lawyer at Saigon, for his interpretation.

A Peking correspondent mentions a rumour that Mr. and Mrs. Wade are to leave soon for Shanghai, and that Mrs. Wade is likely to pursue her way to England.

Announcements are made, that the British Consulate will be closed to public business on Friday and Monday next; the Municipal Council Offices on Friday and Saturday; the Supreme Court on Friday, Saturday, Monday, and Tuesday, and the Imperial Customs on Good Friday only.

A Tientsin correspondent complains of delay in delivery of the *Appin's* mails on her last voyage. 24 hours after she had been in port, he got some newspapers and letters; some time afterwards, two more newspapers and another letter. The fault is clearly understood to lie with the ship and not with the agents; and it is hoped that a hint may be given to the officers to be a little more prompt in sending ashore the letters and papers which the agents kindly allow to be carried.

A Chinese barber went into a opium shop in the Fukien road, on Friday, and after he had sat there a little while, blood was seen issuing from his mouth and neck. One of the other natives in the shop ran to the Louza Police station, and gave information that the man was sick. On assistance arriving, it was found that he had cut his throat with a knife, inflicting a shocking wound. As quickly as possible, he was removed to the Gutzlaff hospital, but died soon after his admission. No reason has been given for the suicide.

The steamer *Fusiyama* came into collision with an empty cargo-boat yesterday, while steaming up the river abreast of the Soochow creek. The boat was cut in two, but the crew, a boy and a man, were saved by the steamer's people. The accident was caused by the carelessness of the boat people, who insisted in attempting to cross the vessel's bow, although warned not to do so.

The well known yacht, *Phantom*, has been sold at auction for Tls. 176. Mr. C. P. Blethen was the purchaser.

Captain Wilson, of the ship *Champion of the Seas*, reports that in Lat. 27° 43 S. and Long. 28° 33′ W., he sighted a dismasted ship, and on nearing her discovered what remained of the name was, "*The Found—Liver.*" (? The *Foundling*, of Liverpool). The vessel was on fire, and Captain Wilson estimates that there were some 400 tons of coal in a fierce glow, still in the hold. Every particle of woodwork had been destroyed, and her sides were nearly red hot, emitting steam as she rolled in the sea-way. A bright look-out was kept for any of the crew who might be in boats or on rafts, but no sign of them was seen, and it is believed that they must have been picked up, as they and the ship were directly in the track of vessels. There can hardly be any doubt as to the name of the unfortunate vessel, and we may add that Captain Wilson knew her, she having left Liverpool a few days previous to the *Champion of the Seas*.

We are glad to hear that news has been received of the safe arrival of the str. *Calabar* at Singapore, which she appears to have reached on the 26th February. She left Suez, we believe, on the 2nd December; and the *London and China Express* of the 29th January, says she had not, up to that date, been heard of, and the premium on her at Lloyd's had risen to 60 *a* 80 guineas. It seems, however, that she was heard of, from the Indian Coast, a very few days later. A telegram was received here from London on the 7th February, announcing her arrival at Cochin; and a private letter has since arrived from Aleppey, on the Malabar coast (dated 5th February), giving news of her at that port. We quote the passage, which will interest our readers:—"I had quite a surprise a few days ago. Captain Hutchinson, formerly of the *Rona* but now in command of the *Calabar*, put in here, or rather drifted in, short of coal and provisions. * * * * Of course he came to the wrong place to buy coal, as we never use such things here, but he managed to get some from Cochin, a little up the Coast. He is expected back to-day, with the coal, and I suppose the steamer will leave as soon as it is on board." As we have said above, the *Calabar* has since reached Singapore, where, we gather from the *Hongkong Times*, she is now undergoing repairs. On the whole, Captain Hutchinson must have had rather a cheerful passage, and will have some curious experiences to relate.

Several changes are spoken of as likely to occur among the officials of this province. We hear that the brother of the late Tseng Kwo-fan, named Tseng-Kwo-tsün 曾國荃, has been appointed Viceroy of the two Kiang, 兩江總督. The present acting-Viceroy 劉坤一 is to go back to Kiangse as Futai.—The Futai of this province has appointed 松亭 Sung-ting to be the Che-hien of Shanghai. The present Che-hien, named 葉廷眷, will shortly be promoted. That a man who has distinguished himself by inflicting more torture than any other magistrate who has lately held the post, should be leaving on any terms, is a subject for congratulation.—We also hear that the late acting-Futai of Kwang-tung 郭嵩壽 is to be the Chief justice of Fokhien.

An edict in the Gazette of the 28th February reveals a curious custom, that every Emperor, on ascending the Throne incribes a tablet to be suspended in the temple of Confucius at Kueh-li.—The present representative of the Sage's family apparently comes to Peking, to carry back the token of Imperial grace.

In the Peking Gazette of the 25th Feb., a Censor attacks the system of purchase of office. There can be little doubt that the system is pregnant with abuse. If the neglect of men who have taken degrees, in favour of outsiders, meant simply a growing recognition of the inadequacy of the present examinations as a test, and an effort to introduce good men without regard to classical knowledge—we should be the first to applaud the change. But it is to be feared that only in few cases does this principle guide the selection. Too many are, as the Censor points out, cases of rank speculation, in which the purchaser relies on the profits of office to re-imburse him for his outlay in buying a post. A system of purchase of office is, in fact, certain to produce corruption.

The TIENTSIN Customs difficulty appears to be in *statu quo*. Particulars will be found on another page.

Messrs. Spencer, Wolff & Co. write from CHINKEANG, on the 22nd March:—"An active business has been transacted in Cotton Goods since the date of our last, especially in 8¼-lb. Grey Shirtings, the imports of which, though heavy, have not been in excess of the demand. An improvement is also noticeable in the demand for the finer makes of Mexican T-Cloth.—Sandalwood, quiet; Iron, dull."

The HANKOW Chamber of Commerce Circular of the 20th March, says the Import market has somewhat improved since the date of the last circular, both as regards demand and price; transactions however, have principally been confined to Grey Shirtings and T-Cloths.—25,000 pieces of Grey Shirtings have changed hands during the fortnight, of which 22,000 pieces are 8¼-lbs.; and the price of this weight has advanced fully a candareen per piece for best chops.—Messrs. Gordon Bros'. Circular says, Raw Cotton has declined to Tls. 11 per picul for Shanghai growth. Market, quiet; Stock, about 30,000 piculs.

Our NEWCHWANG correspondent writes (on the 2nd March):—"We have had no mail from Chefoo since the one which left that place on the 2nd January, and fear the messenger has either been lost in crossing the Gulf, or that the bags have been pillaged on the way. As a band of robbers is officially reported to have been on the southern road during February, the latter contingency is not unlikely. Geese are flying over, which is a good sign for spring, but the thr. still marks 10° at night, and we have occasional falls of snow. There is not any business doing to boast of, but natives are purchasing pulse and oil for shipment when the port opens, so that we may look for good freights."

Summaries of NAGASAKI and Hongkong news will be found in the usual place.

Editorial Selections.

THE TIENTSIN DEADLOCK.

It is still by no means clear what was the real origin of the late dead-lock at Tientsin;—whether the Taotai really intended to levy *li-kin* duty on foreign goods on their arrival, and retired before the storm of opposition; or whether the Chinese merchants misunderstood or misrepresented his action, in order to enlist the aid of foreigners in fighting the Native produce battle. The Taotai repudiates the intention attributed to him, but the Chinese appear to be hardly yet satisfied. Shipments of foreign goods from Shanghai are still suspended; and an apprehension is said to prevail that, although the attempted levy on the spot is abandoned, the purpose is entertained of collecting a $2\frac{1}{2}$ per cent. *li-kin* duty at the first barrier outside Tientsin. There is, however, no distinct evidence on either side, unless we take the Taotai's proclamation to be such. There certainly is not, in the version which has reached us, any mention of foreign goods, and he has since emphasized the distinction. But it is quite possible, on the other hand, that the Chinese have known how to read between the lines; and it does seem strange that so much excitement should have arisen on a simple misconception. Perhaps the very fact of this excitement may be taken as better evidence than the Taotai's language. The question is, however, as we have said before, purely one of inference; and opposite conclusions will very probably be drawn, by different readers, from such facts as we have before us.

What is clear, is the action taken in regard to native goods; and a third proclamation, which we publish on another page, states the Taotai's purpose in their regard, even more explicitly than the two former ones. When Chunghow was Superintendent of trade at Tientsin, he ordered that, after Chinese merchants had paid duty at the Foreign Custom House on Native goods imported by foreign vessels, they should go (on the same day) to the Native Custom House and pay certain other taxes; and the mode of procedure was to be this. On payment of the duty at the Foreign Customs, certificates in triplicate are prepared. One of these is retained on file for reference, one is filed in the Taotai's yamen, and the third is handed to the merchant, who is to repair with it to the Native Customs and pay duty upon the goods it represents. The Taotai has however discovered that, since he came into office, there have been issued about 1,000 certificates, of which no entry has been made at the Revenue Office. Obviously, he concludes, the duties have been evaded to this extent. What he purposes doing now, is to send round to each merchant's office a messenger, with a file of these certificates, who will require, in each case, proof that the requisite duty has been paid; and, on the 27th March, all goods upon which taxes have not been paid are to be reported for payment of arrears. If evasion is still persisted in after this notice, the delinquent will be made to feel the full rigor of the law.

We have suggested, above, that the Chinese are well able to read between the lines of official documents, and it may be that their apprehension of having to account for foreign imports as well as native, was well founded. It is possible, on the other hand, that they have imagined a vain thing.—What however they have very certainly understood, is that the Taotai is doing his utmost to scrape in all the money he can, before his term of office expires. He took over charge only in June, and he is to vacate office in favour of a new incumbent, about the end of March. Hence this energy! As much hay as possible must be made while the sun is yet shining. What appears equally clear is, that the duties levied at the Foreign Custom House are not at all regarded as a substitute for the Native Customs dues. They are simply an additional squeeze, for the benefit of the Imperial exchequer. The Chinese Custom House has to be satisfied all the same, and claims, under the name of *li-kin*, the duties it used to levy under a simpler name. Take the following paragraph in the Taotai's first proclamation, for example: "Since the opening of Foreign Commerce, native goods, coming formerly by internal routes, now arrive by sea, and the Hukwan (Native Customs) at present depends entirely on *li-kin* duties to make up the deficiency in its proper duty receipts." In other words, the revenue levied at the Foreign Custom House does not go into the provincial exchequer, and provincial Mandarins resort to *li-kin* to satisfy the void caused in their income by the transference of duties from the Inland to the Foreign Custom House. Have we not, here, one explanation of the pertinacious adherence to *li-kin*, in spite of the restoration of peace? Of the disastrous effect which these excessive exactions are having on the trade of China, we have complained often enough. But we cannot help inferring that the fragmentary attempt (made in the case of the Customs) to centralise revenue without centralising expenditure, may have something to do with the difficulty. It is quite likely that the *li-kin* taxes have been evaded at Tientsin, as the Taotai says; but the oppressive total of the duties levied on trade must be considered responsible for such evasions.

INDIAN TEA.

In a Blue Book on East Indian Products, which was published a short time back, we find a very interesting sketch of the history of tea in Assam, by Mr. Campbell, Assistant-Commissioner of Burpetta, from which we condense the following particulars. The first knowledge of the existence of the tea plant in its indigenous state, in the Assam territory, appears to have been obtained by two brothers, named Bruce, when trading in the country before its annexation. The younger of the two, Mr. C. A. Bruce, was appointed in 1824 to command a division of gunboats in Upper Assam, during the progress of hostilities with Burmah, and in 1826 he brought down certain plants and seed which were identified as belonging to the tea of commerce. No immediate advantage seems to have been taken of the discovery, but when in 1834 the Indian Government appointed a Tea Committee, to mature and carry out a plan for introducing the culture of the plant into such parts of the British possessions as might be found suited for it, the Commissioner of Assam at once brought to its notice the fact that the tea shrub had been found indigenous, through a tract of country extending from Suddyah in our territory to the Chinese frontier province of Yünnan. The Committee investigated the matter, and established nurseries, &c.; and about the same time, a supply of Chinese tea seed and young plants was imported, both being found to succeed well in the soil of Upper Assam. From various causes, chiefly owing to the difficulty of communicating with Calcutta and the total ignorance which then prevailed on all points connected with the cultivation of the plant and the manufacture of tea, the operations of the Committee proceeded but slowly. In 1837, however, tea-makers and artisans from China were introduced, and some consignments of tea which were sent home turned out so well that a company, afterwards styled the Assam Company, was formed, to which, shortly after, two-thirds of the Government establishment, gardens and nurseries, were made over. The Company carried on its operations with great vigour, and the tea sent home was all that could be desired; but, nevertheless, says Mr. Campbell, the undertaking in a few years began to be looked upon as a commercial failure, and about 1847 the shares fell nearly to zero. The causes of this unsatisfactory state of things were probably of a two-fold nature:—(1) an undue importance was attached to the localities where the indigenous plant was found growing; and (2) the establishments maintained were on a most expensive scale, and out of proportion to the resources of the Company: their affairs, however, shewed a material improvement in 1852. The first private garden of any importance in Assam was commenced in 1850 or 1851, and afterwards private enterprise began to make headway. Previous to 1853, grants of waste lands had been made on no regular system, and this probably stood in the way of the development of the country. The subject was officially investigated, and a set of rules, which came to be known subsequently as the Waste Land Rules of 1854, was promulgated. During the next five years, tea-planting continued to make steady progress, and gradually found its way into all the districts of Assam; by the end of 1859, there had sprung up no less than fifty-one tea gardens, all owned by private individuals. Meanwhile, however, the Assam Company had remained the only corporate body in the field, and by 1858 its early difficulties had been almost forgotten, its shares were at a high premium, and those of its factories which had been closed during its period of financial depression, had been again reopened. From 1859 to 1863 tea-planting continued to advance with rapid strides, and yet maintained a healthy state; several joint-stock companies were formed for the purchase of private gardens, and were managed on prudent and sound principles. The success of the earlier companies, however, and the large sums which in some instances had been paid by them for private gardens, engendered in time a dangerous spirit of speculation; and, from 1863 to about the end of 1865, a rush took place to

secure waste lands, to bring them partly under nominal cultivation, and then to dispose of them at enormous profits to newly formed companies. Much dissatisfaction having arisen in regard to the Resumption Clauses of the Waste Land Rules of 1854, eventually, about the end of 1861, a new set of rules was promulgated, by which it would appear that the sale outright of land in fee-simple was allowed. A very important feature in these rules was that no lot should be sold, unless it had been previously surveyed. Unfortunately this rule was not adhered to, and the consequences were most disastrous. As if to facilitate the operations of wild speculators, district officers were authorised to sell lots of land on a rough pen-and-ink sketch made of them by the applicants? The most reckless speculation was thus practically encouraged, into the details of which it is unnecessary to enter here; and the action of the speculators tended to produce such a scarcity of local labour as to effect prejudicially the operations of *bonâ fide* tea concerns. Next came the difficulties of the coolie trade, the cry on all sides during the tea mania being "Labour, more labour." Then, when speculation had run its course, a depression in tea, similar to that of 1846, but on a far larger scale, took place, and again the popular impression pointed to tea-planting itself as in fault; thus a depreciation in tea property of all kinds prevailed during 1866, 1867, and 1868, as unreasonable as the previous infatuation and blind belief in its extraordinary value. Matters took a more favourable turn in 1869, owing to the fact that most of the old tea gardens, under careful management, had stood the test to which they had been put during the three preceding years, and were still profitably worked; the quality of the tea, too, which had fallen off during the mania for speculation, improved greatly, and, in consequence, the tea found a ready sale in the Calcutta and home markets.

"As a commercial undertaking," observes Mr. Campbell, "tea-planting possesses features of a remarkably favourable nature. With suitable sale and good management, the average yield of an acre of tea-plant, in full bearing, may be reckoned at 400lbs., which, if carefully prepared, would in the English market fetch about £40. The cost of forming a plantation, of cultivating it when formed, and manufacturing the tea, is high; nevertheless, with proper and careful management, a very satisfactory margin of profits can be reckoned on." He goes so far as to say that, to any person with even so small capital as two or three thousand pounds, tea-planting would prove a most profitable undertaking. The revival of confidence in tea-planting has been extending slowly but steadily, and at the date of Mr. Campbell's report, the prospects of the industry were thought to be better and brighter than they had ever been before.

In conclusion, we quote the following figures to shew the advance which has been made in cultivation and out-turn since 1850. In that year, one estate, with 1,876 acres under cultivation, yielded 216,000 lbs. of tea; while in 1871, there were 295 estates, under distinct proprietors, with 31,303 acres under cultivation, which yielded 6,251,143lbs. of tea.

MISSIONARY TROUBLES.

A correspondent informs us that the wave of Missionary trouble which made itself apparent recently in popular agitations in Kiangsu and Chekiang, has travelled down the coast. Difficulties more or less serious have occurred at Chinchew, at Swatow, and in Formosa. That at the city first named, arose through the efforts of the native Christians (aided by the foreign mission at Amoy, to which they owed church allegiance), to replace a rented building which had been used as a place of worship, by the purchase of a suitable property to be adapted permanently as a chapel. No difficulty was experienced in arranging the sale, nor, it would appear, up to the time when the consent of the authorities to the transfer was required. Alarm or antipathy, however, then roused the officials. They seized the vendor and middleman, and apparently regarding the latter as the guiltier because he had negotiated the transfer, they informed the Christians that unless they abandoned their object, and within a brief space gave up the title deeds which the native preacher had already received, the indiscreet broker should forfeit his head. How such a judicial murder could be glossed over, even in China, it is difficult to understand, and the course of the affair subsequently lends support to the opinion that it was never intended it should actually be perpetrated. The native preacher fell back on his foreign patrons, and these appealed to H. M. Consul at Amoy to use his influence on behalf of the unhappy Chinchew Christians, who were being "persecuted" and "interfered" with, not by a popular faction, but by their own officials, in flagrant opposition to Art. VIII. of the Treaty of Tientsin. The case is of such a nature that the Chinese authorities can hardly maintain the action they entered on, in face of the representations addressed to them, although we are unable to say as yet what may have been the effect of these representations.

The Swatow difficulty we have no particulars of, except that it was in connection with a body of American Missionaries; it was trifling in its nature, and Swatow being a treaty port, was settled on the spot.—The Formosa case was an attack made a few weeks ago on the Rev. Wm. Campbell, at a station about forty miles north of Taiwan, and at some distance from the coast. Mr. Campbell pursued his labours among the Pepohuans, a large proportion of whom in this district are in a state of serfdom to the more powerful Chinese colonists. One of the latter class, fearing probably that foreign teaching might induce among the people who were practically his slaves, some more exalted notions of their rights as members of the human family, gathered his Chinese followers around him, and made a descent on the little chapel, in which, according to the custom of their journeyings, Mr. Campbell was passing the night. The chapel was surrounded by men, armed with knives, spears, and torches, and the foreigner was invited to come out. He appeared at the door and spoke to the mob, but was driven back. Shielded by a cotton quilt, he again went out, but was again driven back, while the quilt was gashed in several places by blows aimed at him. The mob then flung torches into the building, and Mr. Campbell's position rapidly became untenable. He must have perished in the chapel, or fallen a victim to the mob which closely guarded the only means of exit, but fortunately his bloodthirsty guard had their attention momentarily diverted by a cry that the doorway was falling. They ran to the end of the building for safety, and Mr. Campbell unhesitatingly seized the opportunity to rush out into the darkness. He found a place of concealment at no great distance, but as the waving of torches in different directions showed that his escape had been discovered, he again sought safety in flight. He travelled all night, and in the morning, destitute, exhausted, and suffering from injuries received in the attack and during his flight, he made his way to the nearest yamen. Here he was afforded protection, and was assisted to reach Taiwanfoo. The chapel destroyed was an old structure, but at the same time the materials which had been brought together for building a new one were demolished. It is not improbable that, in all the cases, the active outbursts of latent opposition have followed on some such new display of the vitality of Missionary enterprise.

THE YANG-KING-PANG.

The Municipal Reports which we print on another page relate the negotiations that have been going on about that much vexed stream, the Yang-king-pang. The two Councils have agreed to submit the question of encroachment to the arbitration of the Consul-General for France and another member of the Consular body; and Mr. Godeaux and Mr. Medhurst have consented to act. It will be remembered that the encroachment took place in 1872, when the French Council bunded out their bank of the Yang-king-pang, several feet. Objection was made from this side; and an arrangement was come to in 1873 to submit the matter to arbitration, in the following form:—"Is the construction of the new Yang-"king-pang bund, between the rue Dis-"cry and the rue Touranne, under present "circumstances, an obstacle to the naviga-"tion of the Canal; or does it really "prejudice the interests of the bordering "land-owners?" For some reason or other, probably the illness of Mr. Johnston and the consequent changes in the Municipal staff, the matter then lapsed. It has since formed the subject of fresh discussion, and the old arrangement has been revived. The English Council suggested that the question whether there had been encroachment, was also one for the arbitrators; but this point the French Council concede. They raise, on the other hand, another point which is rather surprising. They contend that the assent of the English Council to the order of an iron bridge (to be placed opposite Honan road), of dimensions which are just sufficient for the present width of the two banks, has vitiated the Council's reclamation, and justified the French Council in considering the actual alignment definitive.

We cannot but think this plea had better be disposed of out of Court, by simply asking the Council whether they had such a meaning, in agreeing to the plans in question. The English Council declined to submit this point to arbitration, holding that it is, at best, only one for argument. —So it would seem the actual terms of arbitration have not been quite agreed on; though the project has been so, the arbitrators have been chosen, and both sides have pledged themselves to be bound by their decision.

The Yang-king-pang difficulties, however, do not end here. When the English Council declined to halve, for the future, the proceedings of the wheelbarrow-tax, the French Council declined in their turn to halve the cost of the Yang-king-pang bridges. Just as the English Council held ⅓ and ⅔ to be a fair rate of division for the wheelbarrow-tax, so the French Council retired behind ⅓ and ⅔ as a fair division of the cost of bridges. The logic of this argument, however, not being very clear, the English Council declined in their turn "to entertain, further, "the project of a new bridge (between "the French and English bunds) or any "repairs to the old one, until it is agreed "that the cost shall be equally divided by "the two Municipalities." The French Council have replied to this letter also, by a proposal for arbitration. They decline to assume the responsibility of impeding, or even completely stopping some day or other, the traffic between the banks of the Yang-king-pang; and urge that inconvenience need not be caused to the community because the views of the Councils on a financial question happen to differ. They consider that the new bridge should be ordered out, and the question of sharing the cost be left to be settled hereafter; and they suggest that the Representatives of the British and French Governments, at Peking, be asked to arbitrate the question. The English Council decline the suggestion, holding that the matter is one completely within the discretion of the community to decide.—Here again the matter rests, so far as the present Minutes are concerned; and we shall look with interest for the next record.

We cannot, for our own part, see any connexion between the wheelbarrow and bridge questions. It is a fair assumption that the traffic over the Yang-king-pang bridges is nearly equal both ways. About as many people come into the English Settlement from the French, as go into the French Settlement from the English. If the efflux from hence were, to the influx, as ⅔ is to ⅓, the North side of the Yang-king-pang would very soon become a howling wilderness; and we have not yet noticed a perceptible decrease of population. The question as regards wheelbarrows is quite different; it is not how many barrows pass over the bridge—this again is probably about equal both ways, and if that were all, the French Council might fairly claim to have the fees evenly divided. The argument is, that at least twice as much wheelbarrow traffic happens over the large area of the English and Hongkew Settlements, as over the lesser area of the French; and that, as wheelbarrow traffic means wear and tear to roads, the revenues of the Northern Settlement are entitled to two thirds of the revenue as well as to bear two-thirds of this cost.

Outports.

TIENTSIN.

Some of the Shanghai tribute grain junks arrived here this forenoon, the first of the season.—On the 14th, an English sailing vessel arrived, the third sailing craft of the season.—The French gunboat *Couleuvre* left here yesterday, for Saigon.—On the 12th we had rain from noon till after dark, our first rain at Tientsin this year; and since then the air has been mild and like spring weather.—Since the 11th instant, no wild-fowl have been seen, so I suppose they have all already gone North.

Nothing is yet known with certainty as to when the Governor-General may be expected back in Tientsin. The new Customs' Taotai is expected here every day from Kwangtung, of which he is a native. The Tientsin Chinese dealers have stored a large quantity of their late importations in the premises of the foreign firms of the British Settlement; from which we judge that the owners of the goods are not yet prepared to pay the Taotai's so-called Barrier dues or taxes on their goods, the produce of China. Perhaps they are waiting the arrival of the new Customs' Taotai, in the hope that he may return to the custom of payments of former years.

In regard to the disturbances in the district of Tsze-chow, all I have heard since last writing was that the people had taken to the hills or mountains with their families; which means, I fancy, to protect the latter against the Imperial forces. I cannot learn that the rising amongst the people of Tsze-chow is deemed a serious affair by the Government officials here. The powerful force which the Governor-General has at his command would soon put down any disaffected band in this province.

16th March.

Below is a translation of a third proclamation which has been issued by the Taotai in regard to the levy of *li-kin* taxes. It will be seen that he is thoroughly determined in the matter, and his persistency seems to be causing much uneasiness among the Chinese traders. Trade is almost completely unhinged; there is next to nothing doing, and no reliable quotations can be given. The merchants say that, if they comply with the Taotai's demand for the immediate payment of their dues, they have no guarantee against a second exaction when the new Taotai comes into office.

Tientsin, March 17th, 1875.

Sun, *Customs Taotai, &c. &c., issues the following Proclamation:—*

After duty has been paid at the Foreign Custom House by Chinese merchants on their native goods imported per foreign vessels, the triplicate Certificates then given should be taken the same day to the native Revenue office for payment of the taxes there. Such is the Regulation, as established by H. E. Chung-how, ex-Superintendent of Trade, after a Memorial to the Throne on the subject, as stated in my previous Proclamation.

Of the above-mentioned stamped triplicate Certificates, *one* is handed to the merchant that he may repair with it to the Revenue office; *one* is retained on file for reference in the Foreign Custom House, and *one* in the Customs Taotai's Yamên.

Now, from the month of July last to the time when the river closed, there were filed over 1,000 Certificates, of which entry had not been made at the Revenue office. No wonder the receipts of Revenue last year were so small and the total deficit so unusually large!

Those who evaded the taxes during those 6 months are liable to punishment according to law; but, out of compassion for the merchants, this penalty is graciously remitted. But in order that any hope to continue former practices may not be encouraged, explicit rules have now been made.

On the 22nd day of March, a reliable deputy will be sent from the Revenue office provided with a file of Triplicate Certificates, and he will visit each merchant to compare these certificates. If it is found that the taxes have been paid either by the merchant or his broker, the Certificates will be cancelled and no further taxes required on them. By the 27th March, all goods upon which taxes have not been paid, must be reported for payment of such arrears. Penalties will be imposed upon those who do not report within this fixed time.

This arrangement must be regarded as an exceptional favor. Punishment incurred for past evasions of the taxes is remitted, and goods which have already paid the taxes need not pay again. The examination now to be made, and the time allowed for payment of arrears, is no small privilege.

If any merchant persists in practising evasion or concealment instead of forsaking his errors, thus making light of what pertains to the Public Revenue,—such an one will be made to feel the rigor of the law and have no clemency shown him.

And that there may be no excuse for want of forewarning, this Proclamation is now issued for the information of all merchants, who must

Tremble and obey!

&c., &c.

We are all anxious to hear what you think, in Shanghai, of the Taotai's exploit. I hear H. E. is asking double duty on rattans, declaring they are 土貨 Chinese produce. The foreign godowns in the Settlement are filled with Chinamen's goods, so it would appear they are still not satisfied with the state of things."

20th March.

FORMOSA.

Some time in the month of January, two Chinese Military Officers, who were travelling down the coast in the direction of Lang-kiaou, were waylaid and murdered by the savages in the neighbourhood of the little village of Hongkong, at a spot where the road leaves the shore and ascends the side of the mountain, which there runs down to the very edge of the sea. A regiment or portion of a regiment of soldiers from the Province of Hunan has been quartered at Hongkong since the evacuation of the island by the Japanese; and upon it devolved the duty of avenging the murder of the two officers. Accordingly, early on the morning of the 13th of Feb. two hundred of these troops, under the command of a Captain Wang, marched into the mountains to attack the village of the offenders. They met with no resistance on the way up, and on arriving at the village found that its inhabitants had almost all decamped. Warning of what was impending must have been given to the savages by some of the Chinese traders who keep on friendly terms with them, and supply them with the manufactured articles that they require. The few savages that were found in the village, chiefly old men, women, and children, were all put to the sword, and the village itself was burnt. The homeward march was then commenced. The soldiers, em-

boldened by the absence of all signs of resistance and not apprehending any danger, descended the narrow winding valley in a long straggling line, not attempting to preserve any sort of order. After they had gone some distance, suddenly a large number of savages began firing upon them on all sides from the long grass and scrub through which the path passed. The Chinese continued their march as best they could, firing back upon the savages wherever the latter exposed themselves. A body of about twenty men were in immediate attendance on Captain Wang, acting, so to speak, as his body-guard. Some of these being terrified and attempting to run, he cut down one or two of them himself, and by this means steadied the others. At one place, where the path runs through a narrow gorge, several of the Chinese were killed by stones rolled down on to them from an overhanging rock. After the fight had lasted some time, Captain Wang was struck by a bullet, but was still able to proceed, leaning on one of his men. The savages, seeing the commander wounded, made a general rush from all sides upon his party; and in the hand to hand fight that ensued he was killed, after having slain more than one of the assailants with his own hand. The attacks of the savages did not cease till the remnant of the Chinese soldiers reached the edge of the plain. The loss sustained by the Chinese was ninety odd killed. That of the savages was estimated at about thirty.—*Daily Press.*

HONGKONG.

Sir Arthur Kennedy left for England on the 10th, and Mr. Austin has been sworn in as *ad interim* Governor.—Admiral Ryder arrived on the same day, in H.M.S. *Vigilant*.—The *Daily Press* understands that Mr. F. W. Mitchell, the Postmaster-General, will formally induct his successor into office on the 31st instant, and will proceed home *viâ* San Francisco in the Pacific Mail steamer *City of Peking*.—A Rifle Match came off on the 10th, between eleven members of the Police and eleven sergeants of the 80th Regiment. The police won, 404 against 389 points.—At a sale of racing ponies, *Monitor* fetched $205 and *Tarantula* $125.—The rumour respecting the finding of the *Japan* is confirmed. The wreck was discovered, after a very long search on the part of boats engaged for the purpose, by the Captain of the schooner *Scotland*, on the 10th, in the neighbourhood of Cupchi point. The discovery was made by dredging, and was confirmed by a diver who was sent down for the purpose. The schooner is now moored over the wreck, which has also been properly buoyed.—The chief engineer of the *Glenartney* has committed suicide by shooting himself through the heart with a gun.—The U. S. S. *Hartford* has gone to Whampoa, where she will be stationed for a fortnight.—A cricket match between the men of the 80th Regt. and the Navy and Marines, was to be played on the 16th.—The annual Athletic Sports meeting has dropped through for want of entries.—On Sunday the 14th, the Right Revd. Dr. Raimondi conferred the order of deacon-ship on two Chinese, and the order of sub-deaconship on Mr. W. Cullen, of Kilkenny City, Ireland.—Chee Aking, the Chinese deliverer of newspapers at the *Hongkong Times* office, charged by Mr. H. I. Curtis with stealing eleven newspapers, has been sentenced to three months' hard labour.

NAGASAKI.

The *Rising Sun* says some very heavy snow storms have occurred in the interior. Between Shimonoseki and Hiroshima, the now accumulated to such an extent on he wires that its weight broke the line in more than 50 places, many of the poles being broken, especially at elbows.—The British str. *Ferntower*, which left Nagasaki on the 8th for Shanghai, had to put back, through bad weather encountered outside. For the first ten miles the weather was fine and sea smooth, after which the wind began to rise rapidly, blowing from N.E. About noon it freshened to a gale and continued increasing until about 1.30. The sea was heavy and like a boiling cauldron, sweeping the decks of the steamer. Several of the men were nearly washed overboard, and the chief officer had a very narrow escape. He was swept over the side of the vessel by the waves and then lifted and thrown back on the deck. The derricks and awning-booms were carried away, and one man injured very badly by the timber falling upon him. The fore-topsail was split, companion ladder carried away, and cabins completely flooded. The steamer was turned back, and when within ten miles of land the weather was quite fine and sea calm. Upon returning to port the Captain lightened the vessel by taking out a quantity of her cargo, (coal).—The British bark *Pride of the Thames* was wrecked on the Mitzues rocks during the night of the 7th March. The *Press* gives the following account of the wreck:—"On Saturday the 6th inst. about 7.30 p.m. we were towed out of the harbour bound to Yokohama with a cargo of coal. It was a fine night, with light Southerly winds. On Sunday the 7th, it came on to blow very hard from the Southward, accompanied with very thick weather, rain and a tremendous cross sea on. At 8 p.m. it was blowing a very heavy gale with thunder and lightning, and much rain; at each flash of lightning the land was distinctly seen ahead; wore ship. About 10.30 p.m. the ship struck on the Mitzues Rocks, and capsized immediately. All the boats were smashed, but we all succeeded,—with the exception of two, one European named John Hammond, Able Seaman, and a Japanese, who were drowned—in getting on shore by crawling along the main-mast which was at the time laying over the rocks. We were rescued from our precarious position about 10 a.m. the next morning, by a Nomo fishing boat, where we received much kindness from the hands of those on board." The bark is now a hopeless wreck; nothing is to been seen of her but her topmasts, her hull being completely submerged. The wreck has been sold at auction for $522.—The pilot schooner *Reindeer* drove on the Schuda rocks during the same gale, and suffered considerable damage.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Feb. 25th.—(1) A Decree announcing that, in celebration of his Majesty's accession, and in accordance with former precedent, an examination extraordinary for the bestowal of the *Kü-jên* degree is granted in all the provinces for the current year, to be followed by a similar examination extraordinary at Peking in 1876, for the bestowal of *tsin-sze* degrees.

(2) The Censor Yüan Ch'êng-yeh memorializes, urging a reform in the system of admission to the ranks of the public service. Whenever he takes up the quarterly official list, he is struck by perceiving that, of the district and department magistrates throughout the empire, 80 or 90 per cent. owe their positions to purchase, with only a fractional admixture of those who have gained degrees at the literary examinations. Moreover, in the selections to fill vacancies made by the Board of Civil Office, for which standard regulations are in force, it is nevertheless the fact that, owing to the vast number of "purchase" categories that have been created, forty or fifty purchase-candidates obtain appointments for every four or five of those that have the *tsin-sze* degree. After passing successfully at the triennial examinations at Peking, a *tsin-sze* may have to wait for ten years, and even longer, after being sent as an "expectant" to a Province, in consequence of the glut of officials to which the purchase system has contributed. The memorialist has observed in the *Gazette* representations from the governments of Sze-ch'wan, Yünnan, Fuhkien, and Chehkiang, in which either the cessation of the purchase system is advocated, or else the introduction of test examinations for purchase officers. If, as the Censor thinks probable, the present condition of the finances will not admit of an entire abolition of the system, he would at least urge the adoption of restrictive measures, among which he suggests the enforcement of ready-money payment in full for the brevets of rank subscribed for. He enumerates six advantages which may be expected to flow from such a course, among which are benefit to the exchequer, and a raising of the character of the service generally, by checking the prevailing tendency toward pecuniary aggrandizement by unworthy means.

(3) In a supplementary memorial, the same Censor urges the imposition of a rigorous check upon the system of extraordinary rewards for services performed, which has now reached such a pitch that for the discharge of the most ordinary duty commendation and promotion are looked for. He recommends that henceforward, except in the case of substantial achievements, none but honorary distinctions be granted.

Feb. 26th.—This day's *Gazette* contains only memorials on administrative details, from the Governor of Shantung.

Feb. 27th.—(Court Circular.) The Board of Ceremonies reported to-day the issue, for despatch to all the Provinces, of the Manifesto of His Majesty's accession. (N.B.—The Manifesto, being communicated to the Board of Ceremonies for publication, not to the Grand Secretariat for record, does not appear in the *Gazette*.)

Feb. 28th.—(Court Circular.) The Grand Secretariat memorialized on behalf of all the Government departments, returning thanks for the steps of honorary rank bestowed in the manifesto of accession.

(1.)—A decree in reply to a memorial by the secretary Wei Kang, presented to the Throne on his behalf by the Board of War, in which he has dilated upon the corruptions of the administrative service. The high authorities of all the Provinces are called upon to exert themselves in the work of energetic reform, to abolish the evils of intrigue and sycophancy, and to give advancement to the capable and the virtuous.

(2.)—An Edict. Whereas each of the Sacred Ones in succession, on first ascending the Throne, have reverently inscribed a tablet to be suspended in the Temple of Confucius, now We, on reverently taking up the august succession, ordain hereby, in respectful conformity to the ancient rule, that [the authorities] of the Imperial Library and the Han-lin College do reverently prepare an inscription consisting in the characters 斯文在茲 (the abode of Scholarship is here), and do deliver the same to the superintendency of the Works' Department, by whom a tablet shall be prepared and respectfully suspended in the Temple of Confucius, forming part of the Great College of Peking. On the arrival at Peking of [illegible] 孔祥坰, the Duke Continuator of the Sage, let the manuscript of [illegible] him by the Grand Council be conveyed back to [illegible] reverent carefulness, for the preparation of a tablet to be suspended

in the Temple of Confucius at K'üeh Li. The manuscript need not be returned, but may be preserved at K'üeh Li. Let facsimiles of the inscription be made by the Wu Ying Tien, and transmitted to be suspended in the Colleges of all prefectures, departments, and districts throughout the empire.

(3) The Censor Wang Yung-kwan memorializes, presenting his views on questions of the day, in pursuance of the Empresses' invitation of advice. The subjects on which he has opinions to express, are as follows. 1stly.—He advocates rectification of abuses in the Government service. Admission to the official career has been of late years so much facilitated, that the character of the service has suffered, and it is most desirable that a check be imposed to the system of favouritism, which prevails in the removal of functionaries from one jurisdiction to another, on the application of patrons in high position; as also that a restriction be placed on indiscriminate recommendations for promotion. 2ndly.—Restriction is called for in the number of degrees accessible at the literary examinations, these having been greatly augmented of late years, whereby the standard of qualification has been lowered. 3rdly.—A stop should be put to the exactions and oppression indulged in by unscrupulous underlings, on occasions when remissions of taxation are granted in times of flood or drought. 4thly.—Equitable collection of the grain revenue, in money or in kind, should be enforced. In actual practice, when collecting the grain revenue, the magistrates are accustomed to collect no more than one-third of the amount in kind, taking the remainder in money, but in doing this they exact an amount several times greater than the actual value of the rice, putting into their own pockets the difference between the sum collected and the actual cost of purchasing the requisite supplies. 5thly.—Measures for securing the unimpeded discharge of the waters of the Yellow River, by means of the new mouth in Shantung, are urgently recommended. The present channel of the Ta Ts'ing Ho is not more than one *li* in width, and the embankment of some of the older channels, for the purpose of carrying off some of the waters of the river, is advocated, as well as the dredging of the actual mouth of the river, in order to allow a free passage for its waters to the sea.

(4.)—A postscript Memorial by the Censor Wang Li-ts'ing, pointing out a source of frequent abuse in the employment of "gentry" (that is, literary or purchase graduates or retired officials), as managers of the branch-offices for the collection of the *li-kin* tax, especially that on salt, in the districts of which they are natives. Their official function in this respect brings them into such close connection with the actual authorities, as to put them in positions of undue influence—so much so that, as the Censor has heard, a popular saying is current in An-hwei and Hunan to the effect that "there are any number of incumbents to one official seal." He begs that the employment of residents of the districts in the above-mentioned capacity may forthwith be prohibited. (For rescript see *Gazette* of February 9th-10th).

Public Meetings.

THE SHANGHAI ROWING CLUB.

The annual general meeting of the Shanghai Rowing Club was held on Monday evening. Present, Messrs. E. W. Batt, in the chair; Müller, Glass, Hazelwood (members of committee); Clarke, Sharp, Glover, Caldbeck, Wainewright, Maitland, Joseph, Campbell, Burrows, Brewer, Clay, Wyatt, Shepherd, Bois, Meuser, Mackenzie, Westall, and Richards.

The minutes of the last annual meeting, as published, were taken as read, and the Chairman then called on

The Secretary to read the Report, as follows:—

REPORT.

The Committee have again the pleasure of congratulating the members upon a most successful season. The rowing members are on the increase, and the two regattas of the Club during the season were most successful. The balance in hand at the commencement of the season was Tls. 643.92, and the Honorary Treasurer is now able to show a balance at credit of the Club (including the sum of Tls. 291.06 at credit of boathouse removal fund) of Tls. 1,208.82. This balance is, after deducting all expenses for the past 12 months, most satisfactory, as the Committee have built two new outrigged fours, repaired nearly all the Club boats, and got a new bridge for the lower boathouse pontoon at considerable expense. The two boathouses of the Club and their contents are insured against fire for Tls. 4,800.

Members.—Twenty-five new members joined during the year, being three more than the previous year. The total number of subscribing members being 84 this year, against 81 of the year before. The Committee observe with pleasure that notwithstanding so many old members have departed during the past year, their places have been more than filled by new ones, and the Club remains in a flourishing condition.

Boats.—Other two light outrigged fours have been built, and have given great satisfaction. Two old Canton pairs have been repaired at little expense, and fitted as double sculling boats; one "funny" has been presented to the Club by Mr. Veitch; during the past winter all the club boats have been thoroughly cleaned, repaired and varnished, and the stock now comprizes the following boats, in good order and condition:—

	Eights.	Fours.	Pairs.	Double. Sculls	Single. Scull	Funny.
English	2	.. 2	..	2	4	..
Shanghai	2	{ old 4 / new 4	or double sculls 3	..	1	1

besides two old Canton fours and sundry relics of a former age suitable for presentation to the Museum. One old Canton four has been repaired and lent to Ningpo, they having paid for the repairs. Recognizing the efficacy of recent inventions, the Club sculling boats have been fitted with sliding seats, and the Committee have written home for slides sufficient to fit up all the other boats of the Club.

Oars.—A large stock now exists, both of new and old oars. Previous to the autumn regatta all the Club boats (except the tub fours) were supplied with new oars, reducing the reserve of new oars to 8 oars and 4 pairs of sculls; to augment this, the Secretary has written home for 10 pairs first class oars and 20 pairs first class sculls. The destruction of sculls by the members during past season was considerable. The stock of second-hand oars in good order is extensive, and your Committee would be glad to sell them could a purchaser be found.

The Regatta Account shews a loss of Tls. 144.68, which has been placed to the debit of the general account.

Boathouses.—Lower Boathouse.—A new pontoon bridge and new piles for the front of the boathouse have been fitted, at a cost of Tls. 144. Sundry other small repairs have been made, and the lower boathouse (with one slight exception) is now in good order. The Committee are glad to be able to report that the question of removing the lower boathouse has been settled for the next five years, by their having arranged a lease of the present site with Mr. Qwong-Yue-Chong, at an annual rent of Tls. 100. The members are asked to authorise the Secretary to sign the lease on their behalf.

Upper Boathouse.—The question of removal of the upper boathouse has been talked of for the last six years. In the Committee's report for 1869, they say, "The upper boathouse is still in an unsatisfactory state as regards the jetties * * * The creek, however, has filled up so much, that the only way out of the difficulty would seem to be to have the house removed to a place higher up," and the Committee strongly recommend it to the immediate consideration of their successors.

In 1870, a threatening petition was given to raise the necessary funds, but the amount raised was not sufficient. A subscription list was then circulated among the members, but for some reason or other, the amounts subscribed were not collected. Nothing has been done in the matter since, and in the meantime the state of affairs at the upper boathouse has been getting daily worse. It is now far too small for the requirements of the Club; there is no dressing room, it is inconveniently situated, difficult of access, and the mud bank in front renders it anything but pleasant getting in or out of the boats. The Committee therefore consider that the time has arrived for taking immediate action, and that the boathouse should at once be removed to, or a new one built on, the ground kindly granted, at a cheap rent, by Messrs. Miller and Batt, to the S.E. of their bungalow, where deep water on one side, a carriage road on the other, and excellent accommodation generally can be had. A plan of a new boathouse has been kindly prepared by Mr. Cory, and the members are asked to authorize the Committee to get the matter carried through, should they succeed in raising the necessary funds.

The Committee regret the resignation (on account of leaving Shanghai) of the late able Captain, R. W. Little, Esq.

Mr Hazelwood next read the statement of accounts, as follows:—

The Shanghai Rowing Club in account with the Hony. Treasurer.

Dr.

Shanghai, 17th March, 1875.

Mr. Caldbeck moved, and Mr. Glover seconded—

That the Report and Accounts, as read, be passed.

Carried unanimously.

The Secretary read a letter from Mr. R. W. Little, tendering his resignation of the offices he had held in conection with the Club, expressing the pleasure his association with them had given him, and his regret at being obliged to resign.

The CHAIRMAN said, according to Rules 9-10, it was necessary to elect a Committee, from among whom a new Captain would be appointed.

A ballot was then taken, and the following were elected as the Committee :—Messrs. Batt (in place of Mr. Little), Fuller, Glass, Haselwood, and Muller (all re-elected.)

Mr. BREWER proposed—

That Mr. Batt be elected Captain of the Club, in the room of Mr. Little.

Mr. CAMPBELL seconded the motion, and it was carried *nem. con.*

The CHAIRMAN said he could have wished their choice had fallen on some younger member of the Club than himself. He had been so long among them that perhaps some of the members might think he had deteriorated. (No, no.) However he thanked them for their preference, and hoped he would be able to find time to conduct the affairs of the Club as they ought to be.—He called the attention of the meeting to a paragraph in the report respecting the site of the lower boathouse, for which it had become necessary to sign a lease.

Mr. GLOVER moved, and Mr. CALDBECK seconded—

That the Hon. Secretary be authorised, on behalf of the Club, to sign a lease for the site of the lower boathouse.

The CHAIRMAN, before putting the motion, said this question had been a source of annoyance to the Committee since 1866, and the Club had been threatened with removal from time to time. The question was, what right the supposed owner had to the ground? But it had been admitted that the ground was his before it was taken, and it had been thought better to compromise the matter. The owner had offered, through Mr. Cowie, to give the Club a lease for five years at Tls. 100 per annum. A note had been received from Mr. Cowie, in which he reminded the Committee, that, by agreement, the Club were to turn out at the end of 1874; and therefore, it was thought better to settle the matter in the way proposed.—He then submitted the motion, and it was agreed to unanimously.

The CHAIRMAN said the most important subject with respect to the welfare of the Club, was that of the removal of the upper boathouse from its present site to one to be selected. It was now in a very bad position, but looking at the question from one point of view, it would perhaps be better to keep in that position and be solvent, than to incur debt. He called upon the Secretary to state the position of affairs.

The SECRETARY commenced by referring to a letter from Mr. Batt, making an offer of a new site at a place higher up the Creek, and more suitable in every respect. The offer was a very reasonable one, and there was no doubt the present place was too small and inconvenient altogether, while the question of removing had been talked about for many years. Mr. Cory had furnished a design for a new boathouse, with a stand for spectators on the top, which would cost Tls. 3,000, but which, in a plain but substantial style, could be erected for Tls. 2,200. To adopt that plan, however, was beyond the present means of the Club, unless they could obtain a loan from the Recreation Fund. He (the Secretary) had been in communication with Mr. Groom on the subject, who had replied that the Trustees of the Fund would be willing to further the interests of the Rowing Club, as far as they could, but that they wished to have some other details before proceeding further. To meet the smaller sum (Tls. 2,200) the Club had about Tls. 1,274. Next month, there would be Tls. 1,500 collected in subscriptions, but out of that amount, Tls. 1,400 would be required to run the Club for the ensuing twelve months, so that there would be only about Tls. 100 available to go towards the boathouse fund. There was the site of the present boathouse, which might be sold, it was true. Its cost was Tls. 350, but that was when land was valuable—it might now be worth about Tls. 20. He read some estimates for removing the present boathouse to a new site, made five years ago, and concluded by saying the question was now once more before the members, and it was hoped some final decision would be arrived at.

Mr. WESTALL considered it was somewhat premature to be talking about such an undertaking, and asked if the Committee had thought of the repairs that were necessary to be done to the lower boathouse. He had looked at the place, and found some of the piles wanted repairing, as well as the road and pontoon bridges, and other matters.

The SECRETARY replied that all those repairs had been considered by the Committee.

Mr. WESTALL said, with reference to obtaining money from the Recreation Fund, he would recommend that the land for the site of the new boathouse should be purchased, as being the more economical course. To build the house, and not buy the land, he thought would be a mistake.

The SECRETARY said the Club might buy the ground to begin with, and then get some one to remove the old boathouse, and improve it on re-erection. There were two offers, as he had said, made in 1870, to do that work—one by a Chinaman, for Tls. 700; the other, by a foreigner, for $1,200. The question then appeared to be, whether they should build a suitable boathouse, without purchasing the site, or whether they should purchase the site, and remove the present boathouse to it.

The design submitted by Mr. Cory, had by this time been inspected by all the members present; and

The CHAIRMAN said the question rather appeared to be whether the members would sanction the Committee getting into debt. He might, as one of the owners of the land, say a few words about the new site. It was leased to the Rowing Club in 1870 at Tls. 60 per annum. So that before they could do anything more, they must remember that they were indebted to the owners Tls. 300; but he might also inform them that the owners were willing not to insist upon payment of that sum, but to allow the rent to commence from the present year. (Hear, and applause.) Speaking as a member of the Rowing Club, he should say the rent was too high, and that it would be better to buy the land, if the owners could be induced to part with it at a reasonable rate. Now, he might add that he was authorised by the owners to say they were willing, for the sake of encouraging sport, to sell the land at such reasonable rate, provided it should be used for no other purpose than the erection of a boathouse, and that, if at any future time the Club should have occasion to remove the boathouse still higher up the Creek, the owners should be able to buy it back at the price paid for it. (Hear, hear.) Other persons had already spoken about purchasing the same piece of land, because they wished to keep their frontages unobstructed, but nothing had as yet been done. The question, therefore, was, would the Rowing Club authorise the Committee to enter into negociations for the purchase of the site, before they settled about the plans for a new boathouse? He might remark that Mr. Cory's plan did not provide for approaches to the new building, from the creek which would be found to be one of the most expensive parts of it.

Mr. CORY said that slopes merely would be required.

The CHAIRMAN concluded by saying that all the meeting had to do was to decide whether the Committee should incur the expense of buying the land—it was for the Committee to look after the ways and means.

Mr. WESTALL, after the Chairman's observations, would move

That the Committee be empowered to make the best arrangements possible for the Club, in the purchase of the land and site proposed for the upper boathouse.

Mr. MACKENZIE seconded the motion.

A general conversation took place, the questions raised being whether it would not be better to purchase the land and erect a new boathouse at the same time; and also whether it would not be possible to build a suitable one at less cost than that estimated.

Mr. CORY said they could build a sort of shed, something like the present one, for about Tls. 700.

Nothing further came of the conversation now, and

The CHAIRMAN submitted the motion, which was carried unanimously.

The CHAIRMAN said, in order that there might be no further mistake about the land, he thought he might say that the owners would make the price as easy as possible, the only stipulation they desired to make being what they might term, following a recent great authority, "the fundamental principle"—(laughter)—that they should be able to purchase the land again at the same price. (Hear, hear.)

Mr. CALDBECK, consequent upon the previous conversation, moved—

That the Committee be authorized to remove the old boathouse te the new site, to enlarge, and make such improvements as the Committee shall see fit, at a cost not exceeding ₹1,000.

Mr. WESTALL seconded the motion.

Mr. B. A. CLARKE thought the Trustees of the Recreation Fund might in a short time be able to advance Tls. 1,000 or Tls. 1,200, and that the rest might be raised by means of subscriptions, added to the amount now in hand. He also believed there were men in Shanghai who would advance the money, if the Recreation Fund Trustees could not. He recommended that a subscription among the members should be tried before borrowing.

Mr. CORY proposed the following amendment—

That as it is better to begin a new building altogether than waste the Funds of the Club in removing the present one, the Committee be empowered to raise the money for that purpose by borrowing from the Recreation Fund, or anywhere else that they can get it, or by raising a subscription amongst the members, in the best manner that they may see fit.

Mr. WYATT seconded the amendment.

Upon a show of hands, the numbers were, *for* the amendment, 15; *against*, 3. The amendment was therefore carried.

Mr. MULLER proposed that, in long-distance races, the outside boat should be allowed a length and a half start, or that the inside boat should carry weight, or that a slanting, instead of a straight line, should be understood at the winning post. He had heard it talked of outside that the inside course was the best, and that if such and such outside boats had been inside, they must have won. It was not an agreeable thing to win a race under such circumstances. He moved that a special committee of six members should be appointed to consider the subject.

A conversation ensued, in which some disapprobation was expressed, and, to test the question,

Mr. [illegible] seconded the motion, which, upon a show of hands, was lost by 5 to 9.

A suggestion by Mr. Wyatt, to hold the Spring Regatta in the first instead of the

third week in May, was considered to be too near the Race Meeting ; and

The meeting broke up with votes of thanks to the Chairman and Committee.

CONSEIL D'ADMINISTRATION MUNICIPALE DE LA CONCESSION FRANCAISE.

Séance du 5 Mars, sous la présidence de M. A. Voisin. Conseillers présents, M.M. A. Hennequin, F. D. Hitch, H. Maignan, E. Millot. H. Sayn, Secrétaire.

M. Ewald, absent de Shanghai, n'a pu assister à la séance.

Approbation des propositions émises par le Comité des Travaux et de la Police relatives :

A la largeur de 50 pieds à donner au quai de France en terminant le remblai du côté du fleuve, et la mise en état de ce quai par le rechargement de la chaussée, l'établissement de trottoirs de chaque côté et la construction de conduites d'eau.

A l'établissement de bordures et rigoles de trottoirs rues de Palikao et de Saigon dans la partie comprise entre la rue du Consulat et le Yang-king-pang, et au rechargement de cette dernière dans la même partie.

A l'établissement de bordures, et rigoles de trottoirs rue du Weikwé, dans la partie comprise entre la rue des Pères et la limite Ouest de la Concession.

A la prolongation des trottoirs et du garde fou en fer sur le quai du Yang-king-pang, jusqu'au pont No. 5.

Et enfin au montage de deux tombereaux, et aux soins d'entretien et de propreté de ces voitures deux fois par semaine.

L'examen du projet de transformation de la tour de l'horloge et du perron de l'Hôtel Municipal, est renvoyé à une nouvelle séance.

Le Président rend compte de l'entrevue des délégués des deux Municipalités, et informe le Conseil qu'ils ont adopté l'arbitrage pour le règlement de la réclamation du Municipal Council au sujet d'empiètement sur le Yang-king-pang, sur les bases posées dans les lettres suivantes : —

"Shanghai, le 11 Janvier, 1873.

Monsieur,—J'ai l'honneur de vous informer que le Conseil désirant faire preuve de l'esprit de conciliation qui l'a toujours animé, se déclare disposé à se soumettre à l'arbitration du Consul de France et d'un autre membre du Corps Consulaire, avec faculté pour ces Messieurs de nommer un troisième arbitre en cas de désaccord ; la question à décider étant celle-ci :

La construction du nouveau quai sur le Yang-king-pang, entre la rue Discry et la rue Touranne, dans les conditions actuelles, est elle un obstacle à la navigation du canal, ou porte-t-elle préjudice d'une façon réelle aux intérêts des propriétaires riverains ?

Veuillez agréer, Monsieur, etc.,

Le Président du Conseil,

Signé : E. Morel.

à Monsieur John Dent,
Président du Municipal Council."

"*Works No.* 41.

Shanghai, 15th Jan., 1873.

Sir,—The letter which you did this Council the honor to address to them on the 11th inst., embodying the views entertained by your Board with respect to the manner at present appearing the most expedient, for settling the question regarding the alleged encroachment in the Yang-king-pang, has received full consideration.

Before conveying to you the conclusions arrived at, I am desired to thank you for the very prompt manner in which your Council have deliberated on the suggestion advanced by the Consular Body on the 10th instant, and for the expression of the spirit of conciliation which actuates your Administration in desiring to bring the point in dispute to an amicable and mutually satisfactory settlement.

This Board specially instructs me to assure you that they entertain a similar feeling. This Council accept with pleasure, in conjunction with your own, the proposition made by the Consular Body, for arbitrating and deciding upon the question at issue, and in this connexion they desire me to say they will prepare a statement setting forth the case, based on your letter of the 11th instant, for the consideration and approval of your Board, prior to submission to the Arbitrators.

I have the honour to be, Sir, etc.,

(Signed) Alex. Johnston,
Secretary."

To Ed. Morel, Esq.,
Chairman, French Municipal Council.

Le Président ajoute qu'indépendamment des bases posées par les lettres ci-dessus, les délégués du Conseil Municipal ont déclaré à ceux du Municipal Council, qu'ils avaient l'intention de demander aux arbitres, si des faits ultérieurs, entre autres celui-ci, la commande autorisée par le Municipal Council d'un pont à une seule arche, dans les dimensions requises par l'écartement des rives du Yang-king-pang, telles quelles existent actuellement, n'avait pas déjà préjugé la question en faveur des vues maintenues par la Municipalité Française.

Le Conseil confirme l'attitude prise par ses délégués, et charge le Président de demander à M. le Consul Général de France de vouloir bien accepter d'être arbitre pour la Municipalité.

Le Conseil se propose d'examiner à nouveau les mesures à prendre pour réglementer les conditions d'existence et la circulation des brouettes et des Jin-rick-shaws.

Lecture d'une lettre du Président des Administrateurs de la Compagnie du Gaz, informant la Municipalité que la dite Compagnie regrette de ne pouvoir accéder à la demande de réduction dans le prix du Gaz, qui lui a été faite. Le Conseil décide de proposer à la Compagnie de soumettre à l'interprétation d'un magistrat à Saigon le contrat passé avec la Compagnie du Gaz, afin de lever toute équivoque et d'établir clairement les droits des deux parties intéressées.

Le Conseil accepte l'offre de M. Dreyer, directeur de la Great Northern Telegraph Company, relativement à l'entretien de la ligne télégraphique de la Municipalité, et le Sécrétaire est chargé de demander aux particuliers qui ont des lignes télégraphiques sur la Concession, s'ils consentiraient, dans le cas où la Municipalité aurait à établir des poteaux télégraphiques à ses frais, à lui payer un abonnement annuel pour l'usage des poteaux.

Examen d'une reclamation en décharge d'impôts, de M. Yates. Cette réclamation étant appuyée sur des faits déjà portés à la connaissance de l'Administration, le Conseil la recommande à l'attention immédiate du prochain Conseil.

Le Secrétaire est chargé de faire appel aux maisons qui ne paient pas la Taxe Commerciale, en sollicitant leur contribution volontaire à cette taxe.

Le Conseil prescrit aux percepteurs de se conformer au mode de recouvrement déjà adopté pour la perception des sampans.

Examen des rapports du Médecin.

Examen des rapports des Chefs de service.

Examen du rapport de l'Inspecteur des Marchés.

Séance du 12 Mars, sous la présidence de M. A. Voisin. Conseillers présents, MM. A. Hennequin, L. Ewald, H. Maignan, E. Millot. H. Sayn, Secrétaire.

M. Hitch empêché, n'a pu assister à la Séance.

Lecture d'une lettre de M. le Consul Général de France, informant l'Administration que par arrêté consulaire les sieurs Baldassarre et Sigolo ont été nommés agents de la Garde Municipale en remplacement des sieurs Mellich et Mirgaud démissionnaires.

Lecture d'une lettre du Municipal Council, en date du 6 Mars, dans laquelle il émet le désir que les travaux de mise en place du pont en fer No. 4, dont il avait demandé précédemment l'exécution immédiate, soient suspendus jusqu'à ce que les arbitres des deux Municipalités aient décidé la question d'empiétement sur le Yang-king-pang. Le Président est chargé d'informer le Municipal Council que le Conseil donne son assentiment à la suspension des travaux de mise en place du pont No. 4.

Le Président informe le Conseil que la démarche qu'il a faite auprès de M. de Consul Général de France, pour lui demander de vouloir bien être l'arbitre de la Municipalité, a été favorablement accueillie.

Lecture de la lettre suivante du Municipal Council :

"Shanghai, 8th March, 1875.

"A. Voisin, Esq.,
Chairman French Council.

"Sir,—Referring to my letter of 6th inst., I have the pleasure to inform you that Mr. W. H. Medhurst, H. B. M.'s Consul, at the request of this Council, has kindly consented to act as one of the Arbitrators in the question of the encroachment of the Yang-king-pang Creek.

"The Council understands this question to be :—

"Whether the new Bund along the South side of the Creek between the Rue Discry and the Rue Touranne is an encroachment. Whether in its present position it is an obstruction to the free navigation of the Creek. Whether it prejudices the interests of owners alongside the Creek.

"The decision of the Arbitrators to be binding on both Municipalities.

"The Council will be glad to learn that this is as your Conseil understand it, and trust that an early day can be appointed for the two Councils to place before the Arbitrators such facts as they rely on in support of their respective position.

"I avail myself of this opportunity to add that this Council will be pleased, upon the decision of the Arbitrators being made known, and in the spirit of that decision whatever it may be, to agree with your Council upon a fixed width for the entire length of the Creek so that in future no such question as the present one could arise.

(Signed) "J. G. Purdon,
Chairman."

Le Conseil décide que la réponse suivante sera adressée au Président du Municipal Council :

"Monsieur,—J'ai communiqué au Conseil la lettre que vous m'avez fait l'honneur de m'écrire le 8 Mars pour m'informer que Mr. Medhurst, Cousul de Sa Majesté Britannique, avait accepté d'être l'arbitre du Municipal Council dans la question d'empiétement sur le Yang-king-pang, et je suis heureux de vous apprendre que M. Godeaux, Consul-Général de France, a bien voulu, de son côté, accepter d'être l'arbitre de la Municipalité Française.

"Votre lettre m'informe, en outre, que la question d'arbitrage est ainsi comprise par votre Administration :

"1e.—Le nouveau Bund du côté sud du Yang-king-pang, entre les rues Discry et Touranne, est-il un empiétement ?

"2e.—Dans la position actuelle, est-il un obstacle à la navigation ?

"3e.—Cela cause-t-il un préjudice aux intérêts des propriétaires riverains ?

"4e.—La décision des arbitres sera désisive et obligatoire pour les deux Municipalités.

"Le Conseil, par l'entremise de ses délégués, vous a déjà fait connaître qu'il acceptait les bases de l'arbitrage proposées par une lettre de M. Morel, le 11 Janvier 1873, et acceptées par le Municipal Council dans sa lettre du 15 du même mois. Or, ces bases sont entièrement circonscrites aux points Nos. 2, 3, et 4, posés par votre lettre. Du point No. 1, il n'a jamais été question dans les lettres citeés plus haut.

Je suis heureux, cependant, de vous dire que le Conseil, animé d'un esprit d'équité et de conciliation, a partagé unanimement les vues personnelles que j'avais eu l'honneur de vous exprimer à la réunion des délégués, et s'est rendu compte qu'un empiétement a eu lieu en 1872. Ce point reconnu, il est donc inutile de le soumettre à l'appréciation des arbitres.

Par contre, le Conseil a l'intention de soumettre à l'examen des arbitres deux nouveaux points qui résultent de faits qui

se sont passés postérieurement au 14 Janvier 1873, date de l'acceptation de l'arbitrage par votre Municipalité, et de réclamations adressées à la Municipalité Française contre des empiétements qui auraient été faits sur la rive nord du Yang-king-pang. Cette intention vous avait déja été exprimée par les délégués du Conseil, et elle repose sur une idée trop juste, celle de rendre chaque Municipalité responsable de ses actes, pour que je n'aie pas de doute que vous et vos collégues ne l'acceptiez.

"Pour me résumer, voici les points que le Conseil entend soumettre à l'appréciation des arbitres:

"1e.—La construction du quai sur le Yang-king-pang, entre la rue Discry et la rue Touranne, dans les conditions actuelles, est-elle un obstacle à la navigation du canal?

"2e.—Porte-t-elle préjudice et'une façon réelle aux intérêts des propriétaires riverains?

"3e.—Le non envoi du mémoire annoncé par le Municipal Council dans sa lettre du 15 Janvier, 1873, et son consentement ultérieur à la commande d'un pont en fer dans des proportions qui sont juste suffisantes pour l'écartement des deux rives du Yang-king-pang, telles qu'elles existent aujourd'hui, n'a-t-il pas vicié la réclamation du Municipal Council, et autorisé le Conseil Municipal à considérer comme définitif l'alignment actuel.

"Je serai heureux d'apprendre que vous et vos collégues adoptent les mêmes points de discussion et, en terminant, je puis vous assurer que le Conseil prêtera tout son concours à une nouvelle délimitation du cours du Yang-king-pang qui, en définissant exactement les droits de chacun et en assurant la libre navigation de ce canal, empêcherait, à l'avenir, le retour de semblables malentendus

"Veuillez agréer, Monsieur, etc.,
"Le Président du Conseil,
"A. VOISIN.

"Monsieur J. G. PURDON,
"Président du Municipal Council."

Lecture de la lettre suivante adressée par le Municipal Council au sujet du pont Yang-king-pang No. 1:—

"Shanghai, 9th March, 1875.
"*Yang-king-pang Bridge No.* 1.

"H. SAYN, Esq.,
"Secretary French Council.

"SIR,—In face of the decision conveyed in your letter of March 1st, the Council are reluctantly compelled to state that it is quite out of their power to entertain further the project of a new bridge, or any repairs to the old one, until it is agreed that the cost shall be equally divided by the two Municipalities.

"The Council therefore return your plan, and regret that matters have thus come to a standstill.

(Signed) "EDWARD B. SOUPER,
"*Secretary.*"

Le Conseil approve la réponse suivante faite à cette lettre :—

"MONSIEUR,—Le 9 Mars, le Secrétaire de votre Administration a informé le Secrétaire de la Municipalité Française que, devant l'intention de celle-ci de ne supporter qu'un tiers des dépenses occasionnées par les ponts du Yang-king-pang, le Municipal Council ne croyait pas avoir le pouvoir non seulement de discuter le projet du nouveau pont en fer No. 1, mais même celui de concourir à toutes réparations que pourrait nécessiter le pont en bois qui existe actuellement.

"Le Conseil, permettez moi de vous l'exprimer, ne peut assumer la responsabilité d'entraver, et même d'arréter complètement, un jour donné, le trafic entre les deux rives du Yang-king-pang. Ce serait cependant la conséquence inévitable de la détermination prise par votre Administration si l'Administration Française s'y associait, et les deux Municipalités encourreraient, à juste titre, le blâme de l'opinion publique. D'une divergence dans leurs vues sur une question financière, il ne me semble aucunement devoir résulter un danger et même une gêne pour la communauté, et il s'est présenté tout naturellement à la pensée de mes collégues et de moi, que cette question de répartition de dépenses devait être réglée ultérieurement, mais qu'avant tout, les ponts du Yang-king-pang devaient être tenus en bon état pour l'usage du public.

"Le Conseil croit fermement qu'en donnant de nouveau son attention à cette question, votre Administration ne voudra pas assumer une responsabilité que lui pour sa part repousse, et qu'elle s'associera à ses vues. En les adoptant, le pont en fer No. 1 pourrait être commandé par le Municipal Council dans les conditions exprimées dans la lettre du 25 Janvier, 1875, émanée de la Municipalité Française, et la question de paiement sur laquelle les deux Administrations ne sont pas d'accord. serait ultérieurement réglée. A cet effet, le Conseil proposerait de prier les représentants des gouvernements Anglais et Français à Pekin, de vouloir bien décider arbitralement la question, et je suis heureux de vous exprimer, à l'avance, qu'il se soumettra avec empressement à leur décision.

"Veuillez agréer, Monsieur, etc.,
"Le Président du Conseil,
"A. VOISIN.

"Monsieur J. G. PURDON,
"Président du Municipal Council."

Le Secrétaire est chargé de s'entendre avec une imprimerie locale pour l'impression du Compte rendu de l'Exercice 1874-1875.

Transfert de licence pour débit de boissons.

L'examen des rapport des chefs de service est renvoyé à une prochaine séance.

MUNICIPAL COUNCIL.

Council Meeting of 8th March, 1875.

Present:—Messrs. John G. Purdon (Chairman), Geo. J. W. Cowie, F. E. Heyden, Wm. Kidner, F. W. Lemarchand, Robt. Mackenzie, E. Seligmann, S. D. Webb, A. G. Wood, and the Secretary.

The Cash State for the 6th instant, was laid on the table for inspection.

Land-Tax—Re W. H. Fogg.—The Meeting was informed that the hearing of this case at the United States Consular Court had been put down for Wednesday next, 10th instant, at 10 o'clock a.m.

Meeting of Delegates.—Memorandum of what passed at the unofficial meeting of delegates of the two Councils, held on the 3rd March, was laid before the Meeting.

Bridge.—Yang-king-pang No. 1.—The following reply to the French Council's letter of 1st March was agreed upon:—

March 9th, 1875.

Yang-King-Pang Bridge No. 1.

SIR,—In face of the decision conveyed in your letter of March 1st, the Council are reluctantly compelled to state that it is quite out of their power to entertain further the project of a new bridge, or any repairs to the old one, until it is agreed that the cost shall be equally divided by the two Municipalities.

The Council, therefore, return your plan, and regret that matters have thus come to a standstill.

(Signed) EDWARD B. SOUPER,
Secretary.

Encroachment at Yang-King-Pang Creek by French Municipal Council.—It was resolved to request Mr. W. H. Medhurst, H.B.M.'s Consul, to act as Arbitrator in this case, and that the *Points of Arbitration* should be:—

Whether the new Bund along the South side of the Creek between the Rue Discry and the Rue Touranne is an encroachment

Whether in its present position it is an obstruction to the free navigation of the Creek.

Whether it prejudices the interests of owners of property alongside the Creek.

The decision of the Arbitrators to be binding on both Municipalities.

Width of Creek in future.—It was decided to address the French Board stating that this Council will be pleased, upon the decision of the Arbitrators being made known, to agree with the French Council upon a fixed width for the entire length of the Creek, so that in future no such question as has occupied the attention of the two Councils so long could arise.

Reports from Heads of Departments were read and considered.

The Minutes of the last meeting were approved and passed for publication.

Council Meeting on 15th March, 1875.

Present:—Messrs. John G. Purdon (Chairman), Geo. J. W. Cowie, F. E. Heyden, Wm. Kidner, F. W. Lemarchand, E. Seligmann, S. D. Webb, A. G. Wood, and the Secretary.

The Minutes of the last meeting were read, confirmed and signed.

The Cash State for the 13th instant, was laid on the table.

Staff—Appointment.—Mr. S. S. Lew authorized to be taken on at Dues office for one month's trial.

Bund line—Yang king-pang Creek, between Bridges No. 2 and 4.—The subjoined letter from French Municipal Council was read:—

Shanghai, le 11 Mars, 1875.

MONSIEUR,—Le Conseil, ayant décidé de reconstruire la muraille en bois du Yang-king-pang qui tombait en ruines entre le pont No. 2 et le pont No. 4, pense qu'il serait dans l'intérêt de la navigation de donner plus de largeur au cours d'eau sur quelques points où les rives se ressèrent. De cette pensée est résulté un plan de rectification que j'ai l'honneur de vous soumettre.

Vous remarquerez que les intentions du Conseil comportent d'une part sur quelques points où le Yang-king-pang est fort large, des empiêtements sans importance nécessités par l'ensemble du plan, et d'autre part sur les points même où le lit du cours d'eau est plus resserré, l'abandon à la navigation d'une partie considérable de terrain.

Le Conseil désireux d'éviter tout malentendre attend une réponse approbative du Municipal Conseil avant de commencer les travaux de reconstruction, et serait heureux si vous vouliez bien lui faire connâitre son avis aussitôt qu'il vous sera loisible, afin que la circulation publique soit entravée le moins longtemps possible.

Veuillez agréer, Monsieur, l'assurance de ma haute considération.

Le Président du Conseil,
A. VOISIN.

Monsieur J. G. PURDON,
Président du Municipal Council.

[*Translation.*]

Shanghai, 11th March, 1875.

SIR,—The Conseil, having decided to reconstruct the wooden bunding of the Yang-king-pang between the Bridges Nos. 2 and 4, at present in a dilapidated condition, considers it would be advantageous to the navigation, to increase the width of the Creek at some points where the banks are narrow. I have the honour therefore to inclose a plan for a rectification of the Creek.

You will observe that the Conseil's intentions embrace on the one hand:—some few unimportant encroachments at points where the Creek is very wide, and on the other hand, a surrender of a considerable portion of land to increase the width of the Creek at some points where the course of the Creek is very narrow.

The Council, wishing to avoid any misunderstanding, will wait for a satisfactory reply before commencing work, and would feel obliged by your acquainting them with your opinion so soon as possible, in order that the public traffic of the Creek may be interrupted the shortest time possible.

(Signed) A. VOISIN.

J. G. PURDON, Esq.,
Chairman of the Municipal Council.

It was resolved to have plan on English scale drawn up by the Municipal Engineer before replying.

Yang-king-pang Creek.—Encroachment by French Municipal Council. The following letter was considered:—

[*Translation.*]

Shanghai, 13th March 1875.

SIR,—I have laid before the Council your letter of 8th March, informing me that Mr. Medhurst, H. B. M.'s Consul, had consented

to act as your Arbitrator in the question of encroachment on the Yang-king-pang, and I am happy to state that M. Godeaux, Consul-General for France, has accepted a similar position on behalf of the French Municipality.

Your letter informs me further that the points for arbitration are thus understood by your administration :

1st. —Is the new bund on the south side of the Yang-king-pang, between Rue Discry and Rue Touranne, an encroachment ?

2nd.—In its present position, is it an obstacle to navigation ?

3rd.—If so, does it prejudice the interests of property owners along the creek ?

4th.—The decision of the arbitrators to be final and binding on both Municipalities.

The Conseil, at the meeting of the delegates, has already made known to you that it had accepted the basis of arbitration, as proposed in Mr. Morel's letter of 11th January 1873, and agreed to by your Council in their letter of 15th idem.

This basis is contained in points 2, 3, and 4, referred to in your letter. Point No. 1 has never been questioned in the letters above alluded to.

I am happy, however, to tell you that the Conseil, actuated by a spirit of fairness and conciliation, has unanimously endorsed my own views that I had the honour of expressing to you at the meeting of delegates, and it admits that an encroachment took place in 1872. This point granted, it is useless then to submit it to arbitration.

On the other hand, the Conseil intends submitting to the decision of the arbitrators two new points, which result from acts done subsequently to 15th Jan. 1873—the date of agreeing to arbitration, by your Municipality, and from protests addressed to the French Conseil against encroachments, which have been made on the north bank of the Yang-king-pang.

This intention has already been brought to the notice of your Council by the Delegates, and it rests upon so just a view, that of making each Municipality responsible for its own actions, that I have no doubt you and your colleagues will accept it.

In fact, the points the Council intend submitting to the arbitrators are :

1st.—Is the Yang-king-pang bund between the Rue Discry and the Rue Touranne, in its present position an obstruction to the navigation of the creek ?

2nd.—Does it actually injure the interests of property owners along the Creek ?

3rd.—Has not the Council's action in not forwarding the memorandum mentioned by the Municipal Council in their letter of 15th January, 1873, and then later, consenting to the order being given for an iron bridge, of dimensions just sufficient to connect the two sides of the Yang-king-pang as they now exist, vitiated your Council's protest and allowed this Council to consider the present line as settled ?

I shall be happy to learn that you and your colleagues adopt these points for discussion, and, finally, I can assure you that the Council will co-operate readily in arranging a new line of bund which, by defining exactly the rights of each and ensuring free traffic in the Creek, shall prevent similar misunderstandings in future.

(Signed) A. Voisin,
Chairman.

[The French text is among the minutes of the French Municipal Council published above.]

A reply, as under, was determined upon :—

18th March, 1875.

Encroachment—Yang-king-pang Creek.

Sir,—The Council on Monday last had placed before them your letter of 13th inst., in reply to the one I had the honor to address to you on the 8th, regarding the appointment of arbitrators and the points to be submitted to them for their decision.

The Council note with pleasure that M. Godeaux, Consul-General for France, has kindly consented to act in conjunction with Mr. Medhurst.

With regard to the points to be submitted, my colleagues desire me to say that, as by your acknowledgment of the encroachment in question on the Yang-king-pang, our first point is done away with, it is not necessary therefore to include it in the question before the arbitrators.

With regard to the two new points which you state your Council intend submitting to the arbitrators, I am desired to state what I had already stated verbally to you at the meeting of the delegates, that the Council could not agree to have those points submitted as part of question. The Council regard them as partaking of the nature of arguments to be used in support of a case and not as distinct points for arbitration, and if brought forward at all should be brought forward in that way by your Council, when this Council can bring forward their arguments to combat them, and they do not doubt that on re-consideration you will agree in this view.

The questions then to be submitted to the arbitrators—the fact of the encroachment being admitted—would be simply these two two points :—

1.—Is the Bund in its present position an obstacle to navigation ?

2.—Does the encroachment prejudice the interests of property along the line of the Creek ?

If this meets your concurrence, nothing remains but to fix a day when each Council will place before the arbitrators their facts and arguments in the case, which I presume had better be in writing, so that each side may have an opportunity to answer in writing the arguments adduced by the other, and that will close the evidence to go before the arbitrators, unless they wish for further evidence or explanation.

The Council are gratified at your recognizing the desirability of agreeing to a fixed width of the Creek for the future, so soon as the result of the arbitration is made known.

(Signed) J. G. Purdon,
Chairman.

Bridge No. 4, Yang-king-pang Creek.—Read letter from French Municipal Council agreeing to stop further work until result of the Arbitration is made known.

Bridge No. 1, Yang-king-pang Creek.—Further communication from the neighbouring Municipality was submitted :—

[*Translation.*]

Shanghai, 13th March, 1875.

Sir,—On the 9th March, the Secretary of your Administration informed the Secretary of the French Municipality that, in consequence of the intention of the latter to bear only one-third of the expenses connected with bridges over the Yang-king-pang, it is out of the power of the Municipal Council, not only to discuss the project for a new iron bridge No. 1, but even with regard to repairs that may be necessary to the wooden bridges now existing.

This Council, permit me to assure you, cannot take upon itself the responsibility of interfering with or perhaps some day completely stopping the traffic between the two sides of the Yang-king-pang. This will be, however, the inevitable consequence of the decision arrived at by your Administration, if the French Council agreed to it, and the two Municipalities would very justly incur the blame of public opinion.

It does not seem to me that a difference of opinion on a question of finance should result in danger or even inconvenience to the community, and it naturally occurs to my colleagues and myself, that this question of division of expenses should be ultimately settled, but above all, that the Yang-king-pang bridges should be kept in good condition for the use of the public.

This Council, in bringing this matter again before your attention, believes firmly that you will, equally with itself, refuse this responsibility and agree with its views. In adopting these, the iron bridge No. 1 could be ordered by the Municipal Council, under the conditions set forth in the letter of 23rd January, 1875, from the French Council, and the question of payment upon which the two Administrations do not agree, could be settled later on.

To this end the Council propose that the representatives of the English and French Governments at Peking, be requested to arbitrate the question, and I am happy to inform you beforehand, that the Council will submit with pleasure to their decision.

(Signed) A. Voisin,
Chairman.

[The French text is among the minutes of the French Municipal Council published above.]

A reply thereto was agreed upon :—

March 19th, 1875.

Yang-king-pang Bridge No. 1.

Sir,—In reply to your letter of 13th inst., I beg to say that this Council have given the subject therein referred to the very careful consideration it deserves, as they are anxious to do all in their power to prevent, not only disagreements with your body, but above all the convenience of the public being in any way interfered with. They are, however, of the opinion that the question, as to what is the proper proportion of the expense of maintaining bridges over the Yang-king-pang, to be borne by each Municipality, is so entirely one in the discretion of the community, that they feel obliged to decline your proposition to leave it to the decision of the French and English Ministers at Peking. The annual meeting of Ratepayers takes place within a few weeks, and, should the question then come, up the Council will be instructed what course to pursue.

The Council wish me, however, to state that they do not consider the responsibility of interruption to traffic, should it occur, would in any degree rest upon them, as the determination not to bear as hitherto, an equal share of the cost of the Bridges, has been taken only by your Council.

In this connection, I might add that many of the bridges are rapidly approaching an unsafe condition. For obvious reasons, the Council have avoided bringing this forward in the discussion, but it is only right now to point out that in all probability the Council ere long, for their own protection, will have to give public notice that certain bridges are dangerous, particularly for heavy vehicles.

(Signed) J. G. Purdon,
Chairman.

Land-Tax.—Municipal Council v. W. H. Fogg.—The question was put to the Meeting whether, in view of the points raised in the U.S. Court on the 16th instant, by Mr. Twombly, acting for the defendant, they consider it advisable to postpone the case until after the Ratepayers' Meeting.

The Board thought not, the Land Regulations were now being revised, and any essential defects in the existing code brought to light in the case could be remedied, and it would be well therefore to ascertain clearly the position of the Municipality in the matter.

Amusements.

SAINT PATRICK'S DAY.

It is three years since the Irish residents here organised themselves after the manner of their Scottish brethren, and determined to celebrate the anniversary of their Saint in a general gathering. The day had seldom passed unacknowledged ; there were private gatherings on every 17th of March ; but it was not till 1873 that the first general dinner was held. This was voted by all who had the good fortune to be present, one of the most pleasant gatherings ever held in Shanghai, and the prestige gained at the outset has been well maintained.

The dinner held last Wednesday was perhaps a trifle more formal ; for the number of guests has increased till a move to the large dining-room of the Club became necessary ; and a smaller party is always more cozy. Still the evening was very pleasantly spent ; the dinner was good, the wines were first-rate, and the speeches eloquent.

About five-and-twenty Irishmen assembled and, with proverbial Irish hospitality, entertained an equal number of guests—among whom were Captain Buller, R.N., and several officers of the men-of-war in port ; Mr. Keswick, President, and Dr. Henderson, Vice-President, of the Saint Andrew's Society, &c., &c.

The room was tastefully decorated with evergreens and shillelaghs, and the table was spread with shamrock ; the most conspicuous feature being a group hung over

the centre of the dining table, and which has been happily described as "Two shillelaghs saltire-wise; therefrom pendant in pale three murphies; in chief, a shillelagh couchant." And all the arrangements were in keeping. The letters of invitation, headed by a shamrock, were printed in emerald green, and the menu card was crowned by a harp, with the familiar motto "Erin go bragh."

Dr. JAMIESON occupied the Chair, supported by Mr. J. I. MILLER as Vice.

The first toast was given at 10 p.m., and toast and song succeeded each other rapidly till 1 a.m., at which hour only the official list was ended.

The CHAIRMAN, on rising to propose the toast of "The Queen," said—You will need little inducement from me to lead you to drink this toast with enthusiasm. It commends itself. Most of us have, throughout our whole lives, associated with our Sovereign our highest ideas of feminine virtue and goodness. (Applause.) As Irishmen, we have one regret, that she has never shewn any special partiality—any personal affection, for the Emerald Isle. But there are perhaps good reasons for this. She was introduced to the cares of State amid the troublous times of O'Connell and the Irish Tithes and Municipal Acts, when the "Irish Question" was the rock on which Ministries split; and public and private friendships made shipwreck. We all know the effect of first impressions, and of the feelings which spread like a cloud over opinion. But we must never forget that, though for ages Ireland had had a historic past, it was only under the rule of Victoria that she obtained free institutions. With the combination of glorious reminiscences of the past and glorious possibilities in the present, the future of the country we all love is bright. Within a few years, a great revolution has taken place in Ireland, no less great that it has been so gradual as to have been almost imperceptible in its progress, and effected without violence or bloodshed. Opportunities of bettering themselves are now held out to all classes. At all events, ignorance need not clog the aspirant after distinction, and industry and capacity, mental as well as physical, have a fair field offered to them. In the light of these material blessings, he would ask them to drink the health of "The Queen." (Applause.)

The CHAIRMAN then rose to propose the health of "The Earl and Countess of Dublin and Duke of Connaught." He said—As men who look to the future as well as to the past and present, we must take an interest in the career of our coming King and Queen, only second to that which we take in the life of our actual Sovereign. It is, or lately was, the fashion to abuse the Prince of Wales; but we should ask ourselves how each of us would come out of the ordeal, were some millions of eyes concentrated on our public and private lives. But as regards the Princess of Wales, no words can be found too warm to express the affectionate feelings entertained towards her by all classes of Her Majesty's subjects. (Applause.) He (the Chairman) remembered well the first occasion on which he saw her. It was one forenoon in Hyde Park, in 1866, when he was surprised by a sudden roar of cheers which seemed to rise from the ground, there were so few people in sight. The Princess was passing; and as every hat was doffed and every voice raised, he recognised her by the many pictures he had seen, and felt that what Steele said of Lady Elizabeth Hastings was true of her—that to love her was a liberal education. Few of us perhaps know much about the Duke of Connaught, but we would toast him all the same as an Irish Duke. And in thus paying homage to the Royal Family, let us repudiate that charge of disloyalty too often brought against Irishmen. (Loud applause.) Loyalty is only a word. If it means the condition of not grumbling against the Government and all existing institutions, who could be called loyal? But if it means that virtue or feeling,—call it what we may,—which makes men abandon often far brighter prospects for the purpose of fighting to uphold the throne and dynasty, then we had only to look round that table on the many manly Irish breasts covered by the British uniform, and point to them as convincing proofs of the injustice of the charge. (Applause.)

The CHAIRMAN next proposed "The day we celebrate." St Patrick's Day vividly recalls whatever is most Irish in Ireland. In the country, the fields deserted; in the villages, everybody in his, or her, best clothes; courting, drinking, flirting, or praying—(laughter); in the cities, all the shops—except the public houses—closed, all the bells ringing—smiling plenty presiding, for this one day at least, at every board; shamrock in every hat, and everywhere the inevitable tail coat with brass buttons. And then at night, dinner parties and balls among the well-to-do; and among the labouring classes, jollification of every kind, with the consequences of broken heads, and often broken limbs. (Cheers and laughter.) This night eighteen years ago was his (the Chairman's) first night in an Irish hospital, and he did not exaggerate when he said that, on that occasion, the casualty ward was more suggestive of a desperate railway smash in the neighbourhood, than of the celebration of a festival. He had seen the same thing on many successive St. Patrick's nights, but was never so much impressed by it as on that occasion of his first introduction to student life in a hospital. All Irish associations cluster round this anniversary, and, therefore, the opportunity is a fitting one for the summing up of those changes which have taken place within the past few years and to which he had already alluded. Most of those changes are for the better. My recollection (said Dr. Jamieson) goes back to the year 1846, when famine and fever were desolating the country, when a superabundant population, rendered reckless by the plentiful supply of one food staple, was plunged into unspeakable misery by the failure of that staple. From the operation of various causes, such an experience is impossible now. Then, and for years before, lawlessness was (if you will pardon a bull) the law of the country. There was an organised system of terror crushing all chance of industrious tranquillity, striking fear into the higher classes, and intensifying the poverty and misery of the lower middle class, though never, let us say to their honour, plunging them into vice. (Applause.) Education was at the lowest ebb. Religion was smothered by bitter controversies, though, to the everlasting credit of both Catholic and Protestant clergy, these latter united heart and soul in efforts to alleviate the horrors of the famine years. Still, it is our curse in Ireland, that more intellectual activity is expended on maintaining the disastrous antagonism of sects and creeds than on any other enterprise whatsoever. Yet we may hope everything from the progress of education. Irish schools and schoolmasters are no longer what they once were, as described by Hood:—

> "And in the midst a little door there is,
> Whereon a board that doth congratulate,
> With painted letters, red as blood I wis,
> Thus written, 'Children taken in to Bate':
> And oft, indeed, the inward of that gate,
> Most ventriloque, doth utter tender squeak
> And moan of infants that bemoan their fate,
> In midst of sounds of Latin, French and Greek,
> Which, all i' the Irish tongue, he teacheth them to speak."

(Applause and laughter). One thing it is to be feared is hopelessly lost—Irish humour. (No, no.) Father Prout is as dead as St. Patrick. The tourist now-a-days might well address the proverbial car-driver as Hamlet apostrophised Yorick's skull:—"Where be your gibes now? your gambols? your songs? your flashes of merriment that were wont to set the table on a roar? Not one now to mock your own grinning? Quite chapfallen?" But so long as we maintain, as a nation, our generous sympathy with what is great and right, and our detestation of what is mean and wrong, we need hardly deplore decadence in mere wit. He (the Chairman) had been so long away from Ireland that he hardly knew how St. Patrick's Day was now celebrated. Doubtless much of the fun was gone out of it. But we do well by these annual national and social gatherings to keep up our traditions of the past. He could not, standing there, in the proud position of their Chairman, but contrast this gathering with the first Irish dinner held in Shanghai, in 186[illegible], when, between Irishmen and guests, the whole muster was thirteen, and by the 17th March of the following year, only eight of that thirteen were living, and only four were still in Shanghai. Comparing this with the last dinner, he missed many loved and familiar faces—notably the *Cadmus* men, who were welcome guests at every table. (Loud applause.) But, while regretting those old and tried friends, he was, as the spokesman of the St. Patrick's Society, eager to welcome their successors of the *Modeste* and the *Dwarf*. (Renewed cheers.) And it was an additional satisfaction to him to be able to tell his hearers, that at least two of their guests in 1874 were now happily married, proving no doubt that although

> "The world's as ugly, ay, as sin—
> 'Tis almost as delightful."

After this long speech, he did not think that they would expect or wish him to say anything about their Saint—that Saint who, like Homer, was claimed by so many cities as a native. Alas, we know very little about him, but this we do know, that an attempt has been made, with no better support than mere prosaic historical facts, to snatch him from us altogether, and add him to the already overflowing list of Caledonian worthies. This, Gentlemen, is a diabolical outrage on the part of the Scotch. (Great laughter.) We don't even know where he is buried, whether at Downpatrick, at Armagh, or along with Moses. There is a claim put in on behalf of Glastonbury, but this, Gentlemen, is a diabolical outrage on the part of the English. (Renewed laughter.) One thing we may bless his memory for — that he never wrote anything that we know of, except a Confession and one solitary letter, so that he is not to be accused of having helped to embitter the controversies of the ages which succeeded him. (Applause.)

Song—"Saint Patrick's Day."

The VICE-CHAIRMAN then proposed the "Navy, Army, and Volunteers." He said—The toast I have the pleasure of proposing is one that always, next to that of our Sovereign and the Royal Family, finds the heartiest response at our gatherings. We residents in Shanghai not only look to the Navy as our principal safeguard in all times of difficulty, but we also look to them and depend on them to share in our amusements in the piping times of peace. They always come to the front in our Paper Hunts (cheers and laughter); and in cricket matches and theatricals—whenever, in fact, they are called on, officers and men are always ready to assist. And this not only at Shanghai, but at all the open ports. And if ever troublous times come upon us, if their active services are required, we know that they will be ready to come forward and bear out the glorious traditions stamped on their history. (Cheers.) As regards the Volunteers I shall say very little ("Oh!" and laughter.) Gentlemen I don't think our Volunteers are to be laughed at. (No, no.) It must be borne in mind that, on the 4th April, 1854, they not only fought but bled on the field of

Muddy Flat—(cheers);—and later, in 1860 and 1861, though they did not come to blows with the Rebels, they did good service to the Settlement. And if called on again, they would be as ready as ever for any duty required of them. It is no easy matter to keep up a Volunteer Corps, situated as we are in Shanghai. The press of business and heat in summer are drawbacks; and no slight credit is due to men for forsaking in winter the more congenial amusements of rackets and other things, for the drier duties of drill. I will not detain you longer, Gentlemen; I have pleasure in proposing the health of "The Navy, Army and Volunteers," coupled with the name of Captain Buller, the Senior Naval Officer in port, and Captain Savage of the Shanghai Mounted Rangers. (Applause.)

Song—"Widow Machree."

Captain Buller, who was received with much cheering, said: Mr. President and Gentlemen, on behalf of the Navy, I rise to return thanks for the hearty way in which you have received the toast, and the flattering terms in which it has been proposed. On looking round the room, I am very proud to feel that, although there are only two British ships in harbour, so many of their officers are Irishmen, and one in particular is a son of the senior member of the Order of Saint Patrick. In the Navy, we have different feelings and different objects of pursuit. But in one thing we are universally agreed. We all rejoice when the signal is run up to sail for the coast of Ireland, because we know that we shall be received hospitably. All along the coast, from the Giant's Causeway to Queenstown, in every port, we always receive a hearty welcome.—When he received an invitation to be present at this banquet (continued Captain Buller), his first thought was—why had he been invited? he could not claim the privilege by birth, for he was not an Irishman, though he was next akin to it—(cheers)—for he was a Cornishman. He could only come to one conclusion—that Irishmen, whether in the Emerald Isle or in Shanghai, still extend hospitality to the Navy. Shanghai is always a favourite resort for the Navy, [illegible] always well received here; and Naval men could not forget that they fought side by side with Shanghai men in repelling the Taepings; they had fought side by side in reducing the fiery elements; and after many a sham fight they had fought side by side in reducing that formidable enemy which was kept in casks marked "Treble X." (Cheers and laughter.) He saw there were many toasts on the list, and would not detain them longer. There was one sentiment in which he would ask them all to join, and in which he was sure they would all agree—"May the sun never set on the flag of Great Britain and Ireland." (Loud applause.)

Captain Savage next rose, to reply for the Army.—I regret extremely that there is no officer wearing the Queen's scarlet uniform here to-night, to thank you for the very cordial manner in which you have received the toast of the British Army. It is, however, by no means surprising to me, knowing as I well do, how highly Irishmen esteem the profession of arms. In the present day, when all Europe stands, as it were, "on guard," it must be a matter of no small gratification to know that, whatever the quantity may be, the quality of our troops is undeniable. (Applause.) It has been latterly the fashion for alarmists to predict all sorts of disasters, should our country ever be drawn into a European war, on account of the numerical inferiority of our forces; but the "two men and a boy" who are popularly supposed to make up the full strength of the Army, have hitherto always acquitted themselves creditably; and we have good reason to hope they will help us again out of future perplexities. Our guests to-night, I hope, will pardon me if, without drawing invidious comparisons, I dwell with some pride on this anniversary, on the achievements of our Irish soldiers. Twined round the harp and the shamrock on the colours of our Irish regiments, we may see embroidered the records of hard-fought struggles, in which our countrymen, shoulder to shoulder with their Scotch and English brethren, have nobly maintained the reputation of the British Arms. (Applause.) England knows well, and acknowledges the debt of gratitude she owes to her Irish soldiers. Ireland is the nursery of her army; from that quarter of her Empire she draws the largest proportion of its defenders, and the pages of history tell us how loyally they have served her. It will not be out of place if I take this opportunity of denying the charge which has been brought against Irish soldiers, of being false to their oath of allegiance during the late Fenian troubles. (Applause.) I, as an officer quartered in Ireland during those disturbed times, can state positively that it was not soldiers who turned Fenians, but Fenians who enlisted in the hope of corrupting the minds of their comrades. (Applause.) A British soldier, whatever his nationality may be, looks upon his regiment as his home, and would as soon think of burning down his father's "shebeen" as of plotting against the corps to which he belongs at the bidding of a few hair-brained fanatics. Passing on from this subject, which suggested itself to him from a few remarks made by the Chairman, he would conclude with the wish that the *entente cordiale*, which has ever existed between the mercantile and military classes in China, built up as it has been on a basis of mutual esteem and regard, may continue until "time fades into eternity." (Applause.)

Mr. Kingsmill rose to propose the health of the "Guests." It would be out of place on his part to speak of the hospitality of Irishmen; but, looking round, he might consider that that hospitality, such as it was, was more than repaid by the kindness of the guests who had graced their annual celebration with their presence. Were it not for their presence, our enjoyment would lose more than half its zest. As members of the St. Patrick's Society, they had to thank those, of whatever nationality, who had added so much to the pleasure of the event they were now celebrating, but none more than the Sons of St. Andrew, who had afforded them an example worthy of their imitation, and whose annual banquet bore a well-earned testimony to the warmth of the national feeling. He had, therefore, much pleasure in proposing the health of their guests of the evening, and in coupling with the toast the name of the worthy and distinguished Vice-President of the St. Andrew's Society, Dr. Henderson.

Drunk with cheers and musical honours.

Song—"Come back to Erin."

Dr. Henderson (who was received with applause on rising) was sorry that he should be greeted with any signs of approbation, as by this he feared he was credited with having a speech prepared for the occasion; whereas he had come prepared for very little except to enjoy a good dinner, which indeed he had done most thoroughly. However, as he represented a large constituency, who might not be altogether satisfied with informal acknowledgments, he would at least begin in the orthodox fashion.—Mr. Chairman, Vice-Chairman, Croupiers, and Gentlemen, as the mouthpiece of your guests to-night, I beg to thank you first for your hospitality, and to assure you that we shall long look back with pleasure to this evening, spent in your good company under the patronage of Saint Patrick. Before coming here to-night, I had heard a good deal outside of the success of your Irish dinners; but now that I have actually been present at one myself, I am bound to say that these reports (good as they were) fell far short of the reality. Long may your Saint's day be celebrated in this way, and long may your kind invitations be extended to the President and Vice-President of the St. Andrew's Society. You are doubtless aware that there are some unfortunately constituted individuals in the community, who affect to despise our national celebrations—men who (I speak now in the interests both of St. Patrick and St. Andrew) ridicule our speeches—("oh"!)—call our patriotism mere sentiment, our conviviality assumed, and our enthusiasm a mere sham. (Cries of "no! no"!) Well, I only wish we had had one of those individuals here to-night, to hear what we have heard, see what we have seen (A voice—"The shillelaghs and potatoes.")—partaken of the good cheer of which we have partaken, so that in this way he might have his bosom once for all purged of that perilous stuff which weighs upon his heart (Shakespeare!), and makes him the soulless cosmopolitan which the miserable creature actually prides himself on having become. To return, however, to my point—one of these cosmopolitan gentlemen—and if there is a reporter present, it would be a personal favour if he could take a very careful note of this, as perhaps my friend may feel ashamed of his atrocious sentiments when he sees them in print—one of these cosmopolitan gentlemen, had the audacity to tell me the other night at the Club, that the only tie which bound Scotchmen to Irishmen was a mutual love, not for each other, but for a certain beverage which, under the names of "mountain dew" and "poteen" was popularly believed to be the chief sustainer and the crowning glory of their feasts. Away with such vile calumnies—for, are we not all, Irishmen, Scotchmen, and Englishmen, too, met here to-night on grounds of cordial good-fellowship and mutual esteem far more stable than have ever yet been discovered in the delusive depths of a punch bowl? What we *do* like in the Irish character is not difficult to tell, and, on the present occasion, it is a pleasure to tell it—we like you for your hospitality, of which you have given us so very notable a proof to-night. For your generosity—and we were sorry to hear the other night, from a popular comedian, one of yourselves, that the full purse does not always accompany the generous heart. For your bravery—concerning which let the battlefields of Europe and of India, and also of America, and of China too, for the matter of that—tell their bloody tales. For your cheerful good humour, which no misfortune seems able to overcome. Above all, and to-night especially, we admire in you your love of country, that pure fountain from which, whatever scoffers may say, has sprung some of the noblest deeds which the world has yet seen. (Cheers.) Gentlemen, I again thank you in the name of your guests for your kindness, and congratulate you very heartily on the thorough success of your Irish dinner. (Applause.)

Dr. Barton said the very flattering compliments which had been uttered by Dr. Henderson made him feel modest as to saying anything more about their country. Still, he had much pleasure in proposing the toast of "The Schools and Universities of Ireland." Ireland was renowned at an early age as the seat of learning, when Europe was sunk in ignorance through incessant wars. Many visited her shores in those days, to seek intercourse with her learned men. I have read of an Irish chief of those ancient times, inviting a stranger to his house and divesting himself of his only covering, a long robe or cloak—(laughter)—and conversing with the stranger in Latin. Even in modern days, the Latin language is taught in the poorest schools. Ireland, like many other countries in Europe afterwards, became the seat of wars, rebellions and conquests. And the contests between the various rival chiefs weakened

the nation, and made the people an easy prey to the invader. The schools and universities of the present day have established a high reputation. The endowed schools of Ireland have trained up many eminent men—Dungannon, Enniskillen, Londonderry, Cavan, and others might be mentioned; and the ancient University of Ireland, Trinity College, does not need any praise of mine. It was originally founded in the reign of Queen Elizabeth, and has maintained its high character. Many writers and statesmen have received their education in Ireland. I shall only mention a few—Burke, Grattan, Sheridan, Connor, and O'Connell, all names familiar to us as orators; Wellesley and Wellington as statesmen; and a late example in Lord Mayo in India, who has left a noble name, and we must regret his melancholy fate. The Queen's University has been established on the same principle as the London University—viz., the abolition of Religious Tests, and, although much opposed, has done great good in breaking down the barriers of prejudice and religious exclusion. (Applause) The number of graduates is, I believe, increasing in this university. The National Schools of Ireland were established to furnish the secular education of the masses, leaving religious instruction to their respective priests or pastors. Those schools have done much for the youth of that country, and, although not carried out in their integrity, having almost lapsed into denominational schools, they deserve much praise. I ought to say something of the Medical Schools of Ireland. Those of Dublin are now supplemented by Belfast, Cork, and Galway, as feeders of the Queen's University. The Dublin schools have long been celebrated for the study of anatomy and surgery. It will suffice to mention the names, as teachers, of Crompton, Stokes, Graves, Jacob, Carrigan, all men who have left their mark. In connection with Trinity College, I ought to name Professor Harrison, whose reputation is European. The Queen's Colleges will doubtless maintain the same standard of education and skill introduced in those schools. In the competitive examinations for the Army and Civil Service, Irish students have distinguished themselves, and hold their place with those from other portions of the Empire. I shall now conclude by proposing, "The Schools and Universities of Ireland."

Song—"The Green Trees whisper low."

Mr. STARKEY said it had fallen to his lot—a remark which he thought had been already made by two or three people—to respond for the Schools and Universities of Ireland. He should not say much, because the subject had been completely exhausted by the learned gentleman who proposed it, and he should not attempt to resuscitate the cadaver. The influence of the Schools of Ireland had been felt in this country more than most people were inclined to suspect. Mr. Wade, the present British Minister at Peking, had been educated in an Irish school, and brought up at an Irish University—(Oh!). Mr. Hart, the Inspector-General of Customs, had suffered from the same complaint. (Oh!). They might look at it how they liked; these were distinguished men, and had made themselves conspicuous in the newspapers in many ways. (Laughter.) And he thought Schools and Universities, which produced men who made themselves so remarkable, were not by any means to be despised. (Cheers and laughter). He repeated, however, that the subject had been so completely exhausted by Dr. Barton as to be extinguished altogether, and he should not attempt to resuscitate it. He would only thank them for the way in which the toast had been received.

Mr O'BRIEN, who was greeted with much cheering, rose to propose the next toast. He said—Mr Chairman and Gentlemen, "The Authors, Artists and Orators of Ireland," is a toast which could only be done full justice to by one of the Irish orators themselves. We all know the fine lines with which Denham prefaces his description of the Thames—

> "Oh! could I flow like thee, and make thy stream
> My bright example, as it is my theme"—

so, too, anybody aspiring to treat in an adequate manner the theme of the orators of Ireland, could only do so by endeavouring to emulate the great men who are the objects of his enconiums. But how few are they who could, even remotely, recall those brilliant periods—that fervent rhetoric—that glowing and impassioned oratory! For my own part, I shall only furnish one resemblance to it—the very strong resemblance of contrast. (Cheers and laughter.) My halt and feeble utterances will negatively suggest the glory and splendour of that eloquence which issued from the lips of a Burke, a Sheridan, or a Grattan—an eloquence unparalleled in the history of any nation, however great its material resources, however widely extended its conquests—and which is, of itself, sufficient to secure for the little country in which it flourished, a respectable status in every region of the globe where art is cultivated and literature held in honour. (Great applause.) If so dispassioned a critic as Lord Holland ventured the opinion that the best efforts of ancient oratory were, in comparison with Sheridan's Begum speech, as artificial illumination is to the sun, it will not be deemed too presumptuous in an Irishman to say that, even the speeches of Cicero and Demosthenes themselves, though, doubtless, more artistically elaborate, did not surpass in richness, fervour and fire, those glorious bursts of eloquence which electrified the British Senate, and which once stirred the echoes in the old house in College Green. (Cheers.) Alas! Gentlemen, that those echoes should now be woke only by the click of the coins passing through the hands of the cashier; for, as we all know, after the dissolution of the Irish Parliament, the architectural pretentions of the building in which they held their sittings, naturally led to its conversion into a Bank. Should this concern ever cease to pay, the historic old pile will probably be converted into a Custom House, and then the national degradation will be complete. (Cheers and laughter.) Eloquence, Gentlemen, is, in some sort, an appanage and inheritance of the Celtic race, and in this department of literature, our country claims, and is freely allowed a foremost place. But when we come to examine our achievements in other fields of literary activity, it behoves us to assume a much more modest attitude. The really great authors whom Ireland has produced might, perhaps, be counted on the fingers of one hand. (Oh!) I remember once, at a St. Patrick's dinner, the proposer of a toast somewhat similar to the one intrusted to me, made a long enumeration of Hibernian celebrities, many of whom, I confess, I had never heard of before. The speech did great credit to the gentleman's patriotism, and to his industry. He had raked out of mouldy libraries long-forgotten works of sons of the Emerald Isle, and so he was enabled to entertain the company for upwards of an hour with panegyrics of the learned O'Mulligan, the profound O'Donovan, the poetical MacSwiney, the brilliant Murphy, and Heaven knows how many others besides. For my own part, Gentlemen, rather than weary you with the enumeration of such very "small potatoes," I would almost rather feel inclined to make a raid on our neighbours at the other side of the Channel, and, as a return for what our Chairman very properly called the "diabolical outrage" of trying to make out St Patrick an Englishman, boldly claim some of the highest of the English worthies for our own. There is Shakspeare, for instance, Gentlemen. It is utterly impossible to fit the magnificent literary growth known as Shakspeare's works, on to the commonplace stump known historically to us as the man Shakspeare. Some propose Lord Bacon as the real author; others say that the plays were really written by Shakspeare, though not our old friend, W. Shakspeare of Stratford-on-Avon. In short, Gentlemen, the authorship of those immortal productions is, like the miss in the game of whist going a-begging; and, in the circumstances, it will not, perhaps, be considered too audacious to claim him, as I have said, for Ireland. (Cheers). It is just as good a theory, I think, as any other, to hold that Shakspeare was an Irishman—one of the O'Shaughnahassys, most likely. Then, again, take Milton. There is internal evidence in his greatest poem that he was, to say the least, of Milesian extraction, and belonged, without doubt, to the family of O'Mullaghan. The well-known line—

> "The fairest of her daughters, Eve,"

is an Irish bull of the most genuine breed, and it is not the only one to be found in the poem. However, I shall not press this point. Let us rather generously waive our claims, especially as our English guests present may not be ready with an answer to meet so unexpected an issue, and would, perhaps, accuse me of taking an unfair advantage of them. Well, then, Gentlemen, to come back to our, generally unchallenged and undoubted Irish authors and artists, I am bound to say that I consider they form rather "a beggarly array." (Cries of "Oh! oh!") Gentlemen, I mean nothing offensive by the epithet; I simply wished to imply that they were fewer than I could wish them to be, and likewise, for the most part, impecunious. (Cheers and laughter.) Compare our literary history with that of Scotland—a country only half the size, and with only half the population of Ireland. For one Irish author of eminence, she can show two. Take the representative poets of both countries. Burns' inspiration is of a far higher order than Moore's. (Cries of Oh!) Gentlemen, I think so. Then, in metaphysics, we have [illegible] great, name of Berkley to put into the scales against those of Hume, Reid, Stewart, Brown and Hamilton. What Irish novelist, I would ask, can hold a candle to Scott? Swift's genius, indeed, stands supreme in unapproached and solitary grandeur, but then the question arises, was Swift an Irishman? Was Goldsmith an Irishman? Was Berkley an Irishman? Was Sterne an Irishman? Why, Gentlemen, their very names sufficiently answer the question. Hardly one of our great literary celebrities is Irish, in the full and true sense of the word. They were, indeed, born in Ireland, but as Archbishop Whately, tellingly, though sophistically, argued, a man born in a stable isn't a horse. (Roars of laughter.) The Duke of Wellington is claimed as an Irishman, for, I believe, no better reason than that he had the misfortune to be born on board a ship somewhere in the Irish seas. (Renewed laughter.) Let us not indulge in the jubilations of a fond but foolish patriotism; let us not parade ourselves in borrowed feathers; let us frankly and cheerfully admit that the greatest names in our literature are those of men of English descent, and, in some cases even, of English parentage. How, indeed, could it be otherwise? For centuries it was impossible for an Irishman—Irish, that is to say, in lineage and creed—to get a decent education—to get any education at all, in fact. "Chill penury repressed the noble rage" of some, but the existence of incapacitating religious tests in our only University was the most serious barrier to the education of the better class of Irish Catholics. Trinity College, gentlemen—I apologise beforehand, in case I may offend the feelings of any *alumnus*

possibly present—is an institution of which Irishmen generally have no reason to feel proud. It has turned out only two really great men—Burke and Goldsmith; and it turned them out in the most complete manner—it expelled them, both one and the other. (Cheers and laughter.) As an educational institution, it has been what an American would call a "one-horse" concern from beginning to end. Its most respectable feature is its revenues, and the sooner these are utilised for the good of the Irish people at large, the better for the future of the country. Had our country been properly governed, had the avenues to a liberal education been open to the great body of our countrymen, I venture to affirm that the list of distinguished Irishmen would have been immeasurably greater than it is. In saying this, I do not wish to cast the least reproach on the existing generation of Englishmen, who have done their best to redress the wrongs of the past, and who, as far as my experience extends—entertain a high regard and the friendliest feelings for us. (Applause.) It is to be regretted that we have not achieved an equally favourable estimation of ourselves among the great Anglo-Saxon community at the other side of the Atlantic, amongst whom so many of our countrymen have found a home. But we cannot close our eyes to the fact that, for one reason or other, we have failed to obtain the goodwill or respect of the original colonists of that great country. It is unfortunate that the flagrant misgovernment of New York, and the notorious Tammany frauds, for both of which the Irish element in the community is made responsible, should have done much to justify the existing antipathy. For myself, however, I detect a certain element of hope in these latter achievements of our compatriots, which in a slight measure relieves the sense of disgrace. We have been often, and justly, reproached for our recklessness, our carelessness in money matters, our general improvidence. Now, however, that I see our brethren in America going in so thoroughly for self-aggrandisement and the worship of the almighty dollar, I begin to think with Mark Twain (slightly altered) that "them Hibernians is improvin." (Great laughter and cheering.) Dispassionate, gentlemen—not to say, disparaging—as some of my remarks may sound to Irish ears, I yield to no one here in admiration of the splendid attributes of the Celtic race, and no one forms brighter expectations or more fervent wishes for its future. The present is full of consolation and hope. The fine arts have until recently been a closed book to us. But no sooner were facilities for artistic studies given to Ireland, than she produced a Foley, a Hogan, a Maclise. The love of music forms a refined and graceful feature in the national character, and the exquisite melodies of "Maritana" and the "Bohemian Girl" derive, perhaps, an added charm in our ears from the fact that both Balfe and Wallace were Irishmen. (Applause.) The great modern profession of journalism owes much of its brilliancy and lustre to the large number of Irishmen who have adopted this career. (Cheers.) It was only the other day that I saw, in *Vanity Fair*, a clever likeness of a countryman, Dr. Russell, the Father, as I may call him, of the "special correspondent," one of the best known men in Europe, and everywhere liked and respected. I am, indeed, rather surprised to find that our local press, so "ably conducted" as it is, does not number any Irishman on its staff; for there are very few papers in the Colonies, or in the East, which have not an Irish editor, sub editor or reporter. I could quote living Irishmen, like Lord Cairns and Dr. Magee the Bishop of Peterborough, who worthily sustain the traditions of Irish Oratory. I could quote the names of Irishmen who adorn at this moment almost every field of letters, who are achieving distinction in almost every walk of life—and the preceding speaker has instanced Irishmen who are filling with honour posts of the highest dignity and responsibility. But, gentlemen, the night is not very young, and the toast-list is very long. I shall, therefore, conclude with the hope, that as the opportunities of education are extended and brought within reach of the pure and unmixed Celtic portion of the population, we shall gradually arrive at the glorious position which we held in Europe when, as in the fifth and sixth centuries, we spread civilisation—then synonymous with Christianity—from one end of benighted Europe to the other. We shall, perhaps, never again become the Island of Saints—for I fear that order of men is now extinct, and not likely to be revived in these times—(laughter)—but we should, at all events, aspire to become, in a conspicuous and exemplary manner, an Island of "Authors, Artists, and Orators." (Prolonged applause.)

The Chairman said that it was now his pleasant duty to propose "The health of the the President and Members of the St. Andrew's Society." In taking part in these Irish gatherings, he always felt that he was more or less of an impostor, for in point of fact he was, he believed, but for the accident of having been born in Ireland, as Scotch as any of the gentlemen, (not excluding their president) whose health he now proposed. Anyhow, this enhanced the pleasure he felt in doing what he was now doing. The toast was, in Shanghai, essentially and necessarily a popular one, for the Settlement would, so far as foreigners are concerned, be turned into a howling wilderness were Scotch numbers, Scotch energy, and Scotch capital suddenly withdrawn from it. We talked of "the English Settlement." It is really a Scotch Settlement, and this perhaps was what is implied in the term "so-called English Settlement," which the Secretary to the Municipal Council now never fails to use on every convenient opportunity. (Laughter) We should go about groaning under the pressure of Scotch tyranny, if by ill-luck our overwhelming Scottish majority had brought with them the "Sabbath" side of their character—if they were morose, stolid, stern and joyless, as we must allow very many of their countrymen are, at least once a week, at home. (Laughter.) But instead of this, they are hospitable, liberal, genial and humourous, and have thus endeared themselves where they might have crushed their competitors. And further, *we* owe them a double debt of gratitude, for not only is the touching emblem of our nationality suspended there (pointing to a most formidable shillelagh) the gift of the Scottish Saint or of his local representative, but the very existence of this organised society of Irishmen is in a great measure due to a generous emulation excited by the success attained by the Corporation of the Sons of St. Andrew. The toast was drunk with great cheering, and was acknowledged by

Mr. Keswick, who said: I rise with great diffidence to reply to the toast which the Chairman has so kindly proposed, and to which you, gentlemen, have so warmly responded; for I feel how unequal I am to the task of adequately thanking you. I greatly appreciate the honor you have done St. Andrew's Society, and I am sure all its members highly value the compliment you have paid them. The meetings which our respective societies hold on the anniversaries of their Saint's day, are calculated to keep warm that love of country and those early associations which are perhaps the most-to-be cherished feelings that recur to us of our youth and home; and there is no more pleasant way in a distant country of reviving enthusiasm, and keeping green recollections that never should be forgotten, than socially meeting together to show respect for those special days which are dedicated to honor both by the Irish and Scotch. It has been often said, by cynics I think, that these meetings are more or less for the purpose of expressing mutual admiration. But I view them differently, and think they have a more elevating influence and answer a higher purpose. Few things are more calculated to make men form resolutions, and adhere to them, than the appeals which on these occasions stir patriotic feelings and bring back to memory kindly reminiscences of home. I can only say for one, and I have now been a good many years in China, that some of my most pleasant recollections are associated with these meetings, and in no case more pleasantly than to night. I thank you again gentlemen, in the name of the Sons of St. Andrew, for the way in which the toast has been proposed and responded to.

Mr. Lemarchand next rose to propose "Prosperity to Shanghai." I have, he said, the honor to propose a toast which touches us more closely than perhaps any that we have been called upon to receive this evening. I can only regret that it has not been confided to abler hands. Not being an Irishman, I cannot say certainly, but I do not think that St. Patrick permits of "shop" being introduced at this festive board. If we wish to do his memory honour, we will take a happy view of things, and start with the assertion that there are bright days in store for Shanghai. But this is not the place for me to go into statistics, and endeavor to prove that the silver lining is already visible. It seems to me that past prosperity and present adversity are well calculated to bring about future good; and in that case, the recent experience will not be thrown away. There is, I think, a well-founded admission that the Shanghai of to-day has many advantages over the past; socially it has vastly improved, and it is in many respects a much nicer place to reside in than it used to be. Now, gentlemen, if we admit this, it is a good deal; and if we can divest our minds of the idea that in the almighty dollar alone prosperity is to be found (hear, hear), we shall go far to arrive at the meaning of my toast. Retrenchment is the order of the day, and certainly it is a necessity; and, if we look upon it in a contented spirit, we shall be meeting our day of adversity like honorable men, who are determined to make Shanghai a prosperous place. (Applause.) I have no doubt that there is a great future for North-China. It is not like a worn-out bush, that has been pruned and worked to death. The fact is, that the knife has never been applied, and when the useless unbearing branches have been cut off, then we shall see new wood and fruit in abundance, and prosperity will be the better appreciated, inasmuch as we shall have known what adversity is. A good deal lies in our power to help ourselves. We should not let John Chinaman prosper at our expense. We should not let him turn us out of our Settlement, in more ways than one. We should hold together and pull together more than we do, and cut our coats according to our cloth. (Applause.)

Mr. A. J. Little (Commodore S. Y. C.), who was called on to acknowledge the toast, said:—"'Tis pity that a generous heart is not always accompanied by a well-filled purse." This sentiment was enounced on Tuesday evening last, at the Lyceum theatre, by a gentleman who will doubtless rise in his profession. And very certainly, if a generous heart always implied a well-filled purse, every son of Saint Patrick would have plenty of money. The proposer of the toast to which he was called on to respond—he did not know why, unless because the Yacht Club was one of our junior institutions, and its mem-

bers were therefore called on to do duty—had said there was a prospect of a turn in affairs. He (Mr. L.) thought much too gloomy a view was taken of our position, and of Shanghai generally (cheers). What was called stagnation was merely rest. It was simply a case of *reculer pour mieux sauter*. We could not be always buying tea and silk. There was a time for action and a time for rest. We must wait and collect our forces for new efforts, and endeavour meanwhile to spend our leisure as pleasantly as possible. He did not know whether any present had been in China so long as he had. He remembered 15 years ago, when, to quote a recent theatrical utterance, "our merchants were not auctioneers and our paths not strewn with thorns;" and he thought all would agree that we had, since then, made enormous progress. There were then no roads, no jetties, and there was a very small society, comprising only a dozen ladies. People said they made more money in those days, but he doubted whether they were really more prosperous. He did not think there were any signs of our prosperity waning. People who were anxious to see new ports continually opened up, were of course disappointed; but let us look back and see what progress had been made. In 1860, China was the Ultima Thule. There was no North, no Japan, no Yangtsze—Shanghai was an outport, and we had only the P. & O. steamer once a fortnight. How great had been the change, anyone would see; we had now all the elements of a great metropolis, and a glance at the map was sufficient to show that our position was directly analogous to that of New York, the chief city on the Eastern Coast of America. We could not yet equal New York, but we were making rapid strides towards doing so, and although we should not see the time ourselves, yet he had a full faith that it would one day come. He did not know what was the proportion of our present trade to that of fifteen years ago, but the increase must be enormous. The thin end of the wedge had been driven into China. The Chinese were asking how they could get the benefits of foreign civilization without its drawbacks. They were fast beginning to see the many advantages which our connection brings them, and it was a mistake to suppose they were endeavouring to hold us at a distance farther than was necessary to avoid being overwhelmed by too many and sudden changes. They needed us, and we should find fresh profits in serving them. He had been glad to hear lately from his friend Mr. Major, that the sale of the *Shunpao* now reached 5,000 copies a day. 5,000 articles written more or less from a modern standpoint, read every day by 5,000 groups of people, must eventually open the eyes of the thinking classes among the natives. We all knew the Chinese were a reading people; it was only necessary to lay the subject before them in a manner adapted to their modes of thought, to make them appreciate it. A better knowledge was arising on both sides, and it was merely a question of time and patience to bring about the full mutual interchange of all that was most valuable in both civilizations. The proposer of the toast alluded to the improved social condition of the Settlement. Now what element most contributed to this improvement; decidedly the Irish element, by their known liveliness and generosity; if there is one element which is not prospering, it is trade, and that was probably because there are comparatively so few Irishmen engaged in it. He would remind them of a little anecdote, which explained capitally the characteristics of the several races. We all know the distinctive answers given by the Englishman, the Scotchman, and the Irishman to the question: What would you do if you had to drive along the brink of a precipice? The Englishman replied the first, "I should keep three inches from the edge, and thus try and avoid the danger." The Scotchman came next, and said "I'll tell you in the morn." The Irishman, "By jabers, and I'll jist avoid it entirely." This (said Mr. Little) is what I would do, if I could, with my speech now (no, no,); but being an Englishman I must keep on, though I scrape the precipice. I am sorry the duty of returning thanks did not fall to an Irishman, for if anyone has contributed more than another to our progress it was Irishmen. If we look around at the material signs of prosperity that line our roads, we see everywhere the work of Irish architects. Where can you find a more picturesque rural drive than the Bubbling Well road—the St. John's wood I might call it of Shanghai? (Oh, and laughter.) Well, many of the buildings on the Bubbling Well road were erected by an Irish architect; and I hope (said Mr. Little) he will have plenty more work, because that will be a proof that Shanghai is prospering. Our best jockeys are Irishmen. Our leading brokers are Irishmen; and no one can complain of want of energy on their part. (Laughter.) Many people in England deal in coals; and the trade is looked upon as needing only a low order of intellect, but in Shanghai we have a man of high talents specially devoted to the business; gentlemen, we have an Irish coal-taster (cheers and laughter). The solidity of the Englishman, and the caution of the Scotchman, are nothing without the fire of the Irish. Without the Irish we should stagnate. What we want for complete success is a combination of the three. If our Minister at Peking showed a little more Irish fire, we should not be dissatisfied (prolonged cheering). We acknowledge his scholarship, we respect the position he holds, but a little more push and fire would be welcomed by all (renewed cheering). Gentlemen, I will not detain you longer, but will thank you for drinking prosperity to Shanghai.

Captain SAVAGE next rose to propose "The Ladies." Although (he said) I am deeply sensible of the compliment paid me in being selected for the duty which I am now about to perform, I feel, nevertheless, at this advanced hour of the evening, after such a feast of reason and flow of whiskey, that I should be much more competent to propose myself to some individual lady—(laughter and cries of "name," "name")—than in polished periods to propose the toast of the sex in general. However, as there does not happen to be one of the female persuasion here present to-night, that alternative is not open to me; so that I, a modest Irishman, guiltless of ever before having rounded the feeblest tribute of homage to the sex, find myself committed to a task which has ere now called forth from the most brilliant speakers the choicest treasures of their imagination. It has been said that the true way to write a love-letter is to sit down without knowing what you are going to say, and to get up without knowing what you have said. *Mutatis mutandis* (Horace) Hem! I am going to pursue the same system to-night—(laughter)—feeling sure that whatever may be my oratorical shortcomings in an assembly of Irishmen, with whom admiration of women is one of the first articles of their belief, and to whom Tom Moore is an inspired writer—("Oh" and cheers),—I shall meet with an indulgent hearing. In the hebdomadal glass, which we drain every Saturday night, — some of us to the wives that are, some to the sweethearts that will be, sharers of our lives, does not each of us conjure up some sweet face around which a thousand pleasant memories linger, investing it, perhaps with charms which it never possessed, and pledging it silently as that of our true maiden ever? (Cheers and laughter.) Sometimes these phantom faces prove irresistible. The "blue black Irish hair and Irish eyes have drawn us home." *Il faut se ranger*; and we return to China as married men, to Cupid and cold mutton it may be, in these hard times—but the cold mutton at all events is glorified with the smiles of her we love best—"Lives there a man with soul so dead," whose pulse does not throb quicker, when, after weary sojournings in strange lands, he hears again the tuneful brogue of his country, whether it be from the lips of a coronetted countess or a barefooted Bridget, whose home lies in the wilds of Connemara. (Great laughter.) In all classes of society the influence of women—be it for good or be it for evil—("oh" and laughter)—reigns supreme; strong to bring out the lights and shades of men's natures, and strong to stimulate the healthy ambition of the men with whom they are connected. I daresay it has occurred to others besides myself, that the degraded condition which women occupy in China may be looked upon as one of the causes which have kept the country in its present backward condition with regard to arts, literature, and manly virtues. Progress requires incentives. Religion and patriotism may be strong motive powers, but I think more noble works have been executed, more deeds of heroism performed, for the fair faces of women, than have ever been achieved for the sake of creed or country. (Cheers.) It may be that some future day a Chinese Dido will arise, who will rebuild the walls of her cities, dredge the Woosung Bar, forswear pyjamas in favour of petticoats, marry an Irishman, and live happy ever afterwards. (Roars of laughter.) Indeed, it occurs to me that at this present moment an enterprising Irishman might find employment for his silver tongue in wooing one of the late Emperor's wives or mothers. (Renewed laughter.) Surely he might put the "comether" on one of them up there at the capital. I commend the notion to you all, and if any successful suitor here is destined to share the Imperial throne, I hope that he will use the vermilion pencil liberally in writing something handsome to the credit of the author of the idea. (Hear.) However, I fear that I am travelling out of my brief; but you know if [illegible] the lips that we love, we must only make love to the lips that are near (an Empress's of course for choice.) Still, it is only our own dear countrywomen who can exercise any real influence, to make or mar our lives. Poets weave their brightest fancies when woman is their theme; the painter lingers fondly over his canvas, loth to leave the ideal woman's face which his brain and brush have created. Is it not old Isaac D'Israeli, that great master of language, who says, "It is at the foot of woman we would lay the laurels that, but for her smile would never have been won; it is her image that strings the lyre of the poet, that animates the voice in the eloquent blaze of faction, that guides the brain in the august toils of stately councils." Gentlemen, without further preface, I will ask you to drink in brimming glasses to "the ladies,"—the widows, wives, and maids at home and abroad. (Great applause.)

Song—"Here's a health to all good lasses."

Dr. KELLY had the very pleasant, but difficult task of responding to the toast which had been so warmly drunk—difficult more especially in his case, because the national characteristic of an Irishman was, in him, strongly developed. Secondly he found a want of moral support from a few fair friends around him. (No, no.) If there were any present, they might respond in better style than he could do. And this would not be without precedent. Tradition says that when ladies were called on to respond on behalf of their sex, a rule was made that the youngest present should undertake the task; but the arrangement was futile; for when the response was called for they all unanimously rose.

(Laughter.) No one would confess who was the oldest; and they unanimously selected the junior bachelor to perform the task. And so the rule had stood since. Whether it were a good one, he would not say. He thanked them on behalf of the Ladies for drinking their health, and Captain Savage for the terms in which he had proposed it.

Song—"Tom Bowline."

Mr. Dillon next rose to propose the toast of the Press. He said—Mr. Chairman, Vice-Chairman and Gentlemen—The toast of the Press is one that I am sure will require no words of mine to commend it to you, the more especially, after observing the very arduous evening's work that our worthy friend Mr. Gundry has had, in order to give us a full report in his valuable journal. It is very much to be regretted that there were no newspapers at the time of St. Patrick, though Editors would try to make you believe they were in existence at the time of the flood; probably Noah issued a *Celestial Empire* when the Ark was resting on the top of Mount Ararat. (Laughter.) However, had they existed during St. Patrick's time, we should most probably have at least some critiques of the Chamber Music Concerts or A. D. C. performances of those days; and as none of these have been handed down to us, I think we may feel certain that the worthy Saint was never bothered by receiving his *N.-C. Herald* just at the last moment on mail night. Without trespassing further on your time, Gentlemen, I shall ask you to join me in drinking a bumper to "The Press," coupling with it the name of our worthy friend, Mr. R. S. Gundry.—(Drunk with Cheers and musical honours.)

Song—"The wearing of the Green.'

Mr. Gundry, who was warmly received on rising, said—I can hardly plead the stereotyped excuse, for it has happened to me, once or twice in my life, to propose or respond to an after-dinner toast. But I can conscientiously say that I never feel so utterly puzzled as when called on to respond for the Press; and the warm reception you have very kindly given me, does not lessen my difficulty. I remember once asking a silk merchant to write a review of the previous year's silk trade; but he refused because, he said, he knew too much about it—meaning I presume, that he was so thoroughly imbued with his subject, that he would be tempted to elaborate beyond all reason and never get to an end. I don't know that that is exactly my difficulty. I feel rather that everything which can be said about the Press has been said before, and said so very much better than I can say it, that I had better confine myself to a simple "thank you." I will, however, venture one step farther. I will say that the toast of the Press is one that occurs very fitly at a Saint Patrick's dinner, for Ireland has contributed to the Press many distinguished members. I might claim some of the great names which Mr. O'Brien could have enumerated, if his national modesty had not led him to depreciate the history of Irish literature (Shame! and laughter). Charles Lever, for instance, enriched the columns of newspapers and periodicals almost as much as he contributed to fill the most cherished corners of our libraries (Applause.) But I will content myself with mentioning Mr. Mowbray Morris, the late manager, and Mr. Delane, the present editor, of the *Times*—both Irishmen; and all the world acknowledges the consummate ability with which that great journal is conducted. It is true that there are, unfortunately, no Irishmen on the staff of the Shanghai Press, or it would doubtless be far more brilliant and successful than it is. (Of course, and laughter.) But I use the expression "staff" advisedly, for I do see present, to-night, more than one gentleman to whose critical and scientific attainments I have been often indebted, and whose sparkling effusions must appear to the community like angel's visits, amid the prevailing monotony of the *Daily News*. (No, no.)—I was glad to hear Mr. Little acknowledge the success which has attended Mr. Major's effort to establish a Chinese newspaper in Shanghai. Great credit is, I think, due to him for the energy which he has shown in that enterprise; and I hope his success foreshadows a time when the Native Press may become a power in China—when it will help, as effectually as it has done in the West, to expose the corruption of officials and reform the administration of Government. (Applause.) I thank you, gentlemen, on behalf of the Press, for the courteous way in which you have received the toast.

Song—"A Jug of Punch."

This was the last toast on the official list, but several others were proposed.

Mr. Skelly first proposed "The Committee," to whom the Irishmen present were greatly indebted for their arrangement of the banquet, and coupled the toast with the name of Mr. White.

Song—"The Shan van Voght."

Mr. White acknowledged the toast, which was warmly received.

The health of the Chairman was next proposed by Captain Buller, and acknowledged by Dr. Jamieson.

And so things went merrily on; song succeeding song, and the punch (brewed under the careful superintendence of Mr. Boyce) going round, until the celebration became really one of "Saint Patrick's day in the morning."

SHANGHAI RIFLE CLUB.

A sweepstakes was shot for at the range yesterday morning, between members of the above Club, with the result shown in the appended score. Shooting began at half-past seven, at which time the light was not all that could be wished, and to this must be added the further drawback resulting from the dirty state of the target. As the competition went on, however, the light improved, and the shooting became more brisk. The description of rifle used follows each competitor's name, and it will be seen, that, as at the first meeting of the resuscitated Club, held last December, the best shooting was made with a "Metford," the second best with a "Whitworth," while the third honour was scored with a "match Martini-Henry;" the "S.V.C.'s," with one exception, being altogether in the cold. The sweepstakes was, we are informed, arranged in the hope of inducing other members of the S.V.C., and especially new comers and recruits, to take greater interest in rifle competition, not only by becoming members of the Club, but also by availing themselves of the opportunities that will be afforded by the new prizes to be shot for next month.

Law Reports.

U. S. CONSULATE-GENERAL.

Shanghai, 16th March.

Before Geo. F. Seward, Esq., *Consul-General.*

W. S. Wetmore,
F. D. Hitch,
J. C. Allen, } *Associates.*

The Municipal Council *v.* W. H. Fogg.

Claim for Tls. 350.70, *Arrears of Land-Tax.*

Mr. Drummond appeared for the plaintiffs.

Mr. Twombly (of Messrs. Fogg & Co.) defended.

The Petition set forth that the defendant (who is absent from Shanghai), owned certain land registered in the British Consulate, measuring 14 *mow*. Fogg & Co. are defendant's agents in Shanghai, and had up to the present time paid assessed rates on the property. At the meeting of Ratepayers in May, 1873, the Council were empowered to collect taxes at the rate of 3/10ths of 1 per cent on the value of land. A subsequent provision was made for the re-assessment of land and houses, and provisions were made for appeal. The assessment was made; defendant's property was valued at Tls. 77,859, and notice was given to him of the fact. Fogg & Co. (as his agents) appealed to the Appeal Committee, but the valuation was upheld. The Council therefore notified the defendant that the assessment was made, and demanded ½-year's tax under the terms of the resolution, viz., Tls. 116.90, which Fogg & Co. refused to pay.

At the annual meeting in May, 1874, the Ratepayers again authorised a similar tax, and demand notes were presented to Messrs. Fogg & Co. for Tls. 116.90 for the half-year ended 30th September, and again for the half-year to 31st March, and again refused. Judgment was therefore asked for these three sums and costs of the suit.

The Answer set out by questioning the legal existence of the Municipal Council, (on grounds which are fully set forth below). It denies that Fogg & Co. have regularly and constantly paid the assessed rates on the land in question. On the contrary, the justice of the abatement now claimed was admitted and allowed for a considerable time by former Councils; and if such abatement had been allowed now, there would have been no cause for the present action. Defendant has always been willing to pay on an equitable assessment. The legal status of the Council being denied, that body could not cause a legal and binding assessment to be made. But even if the status of the Council is granted, the procedure of the Assessment Commmittee is impugned.

"On the contrary, the Assessment Committee, appointed by such body proceeded no further than to value a *mow* of land in every separate lot, or, if in the opinion of such Committee, there was a difference of value in different parts of a lot proper to be noted, the value of as many *mow* as corresponded to such several parts. But such Committee did not value nor did not propose to value any lot or holding; so far from this, the Committee formally and distinctly ignored any knowledge of or regard to the quantity of land in any lot or lots. They simply evolved and announced one factor necessary to the product—the value of the land, and ignored all knowledge of the other factor, the quantity of land absolutely necessary to the product, the value of the land. The assessment of the land, the only record the Committee kept, shows this, and the minutes do or should show it. To supply this radical defect, the (so-called) Municipal Council or the (so-called) Secretary thereof, applied or caused to be applied to the above factor, a perfectly arbitrary and indefinite quantity, or factor, viz., to each lot the quantity mentioned in the Title Deed thereof; and this they call an assessment, within the meaning of the Resolution of the Ratepayers referred to in paragraph 6th of the petition; and thus was produced the large sum of Tls. 77,859 S.S., mentioned in paragraph 7th, and to this applying the factor 3/10ths, the several tax notes thereinafter mentioned in the petition. But had this been otherwise a legal and valid assessment, it would have been a most inequitable, and therefore, it is contended, an illegal one for the defendant, as clearly appears in letter referred to at the end of the 3rd paragraph of the petition, viz., that nearly one-half of the land which was the subject of the (so-called) assessment lies without the compound walls of the defendant, and largely exclusively in the use of the plaintiffs as roads, water courses, and partially as foreshore, and the ownership of the defendant to which, or any part of which, the plaintiffs have repeatedly refused to admit, though constrained in the second paragraph of their petition to affirm for the purpose of the action therein instituted."

The Answer goes on to question the action of the Appeal Committee, as they refused to entertain the subject of complaint as set forth in the above paragraph, alleging that

the whole matter was beyond their province. Defendant therefore denies both his indebtedness and the completion of the assessment; and explains the objection to the status of the Council.

"It is denied that there are any legal, valid and binding Land Regulations and Bye-laws of 1870 for the Foreign Settlement of Shanghai North of the Yang-king-pang as therein premised or intimated or assumed, and for the simple reason for the purpose of such Regulations the sanction of the Chinese Government is necessary, and that such sanction has never been obtained is evident from the (so-called) Land Regulations themselves; and that as an American citizen, they are not valid and binding upon the Defendant for the further reason that they have never received the Legal sanction of the Government of the United States, but simply the informal concurrence for the time being of the Acting Minister of the United States, and not as provided by the Acts of the Congress of the said Government making operative the Treaty of the same with the Emperor of China, and it may be even doubted whether an additional specific act of the Government itself sanctioning any such Regulation or specially authorizing the Minister thereto, may not be essential to their validity; that is, whether any such state of things as a Municipality in Shanghai of the nature set forth in the petition of the plaintiffs was ever contemplated in, or provided for, by the said treaty or the said Acts of Congress, rendering the same operative."

Waiving all legal objections, however, Defendant alleges the value set upon the land as absurd, and challenges confirmation.

"He is now and always has been, ready and willing to bear his just portion of all needful taxation for the purpose of the peace, order, and good government of the Foreign Community of Shanghai. That he has sought by all peaceable means and all legitimate means the avoidance of litigation with such Foreign Community, as herein fully appears; and that, finally, waiving the fact of the exclusive use of so large a part of his land by the public as herein appears, if such public or Foreign Community of Shanghai are prepared to and will admit his right of ownership, possession and enjoyment, of such part of his land lying without his compound walls as is not used, and never has been used, either as roadways or water courses, but simply lies, and has always lain waste, as fully and completely to all intents and purposes as that within his compound walls, then he is, as he always has been, prepared to pay the several sums demanded of him in the said petition."

Mr. DRUMMOND said the petition and answer would place the Court in possession of the facts of the case, by which a variety of issues were raised beyond the simple tax. The answer went to the root of the Constitution of the Court, and the power of the Council. Probably the simplest and speediest plan would be for him to call Mr. Souper to prove the facts, and then state the grounds on which the Council asked for judgment.

Mr. TWOMBLY said the answer seemed to reverse the positions. There was scarcely any necessity to call Mr. Souper. It seemed to him that the preliminary enquiry should be in regard to the validity of the Land Regulations. It was however a matter for the Court to determine.

The COURT assented to Mr. Drummond's proposal, and he proceeded to call

E. B. SOUPER, who said—I am Secretary to the Municipal Council for the Foreign Community of Shanghai, North of the Yang-king-pang. I produce a copy of the Land Regulations. I appear as plaintiff in this suit, under Art. 27 of those Regulations. Defendants have paid taxes upon a valuation of similar amount from 1870 to 1873. They paid in 1870 on a valuation Tls. 77,859. Defendant continued to pay half-yearly on that valuation up to 1873. The amount of present valuation is Tls. 77,936. No objections were made, to my knowledge, to payments of the amount levied under the old assessment. There is a pencil mark in one of the books, "paid under protest;" but no objection was ever lodged, to my knowledge. It is a fact that a large portion of the land on which taxes are asked, is not in the occupation of defendant, but is in occupation of the public in the shape of roads. The owners of all lots which are bounded by roads pay on property which is surrendered to the public, unless the land surrendered to the public has been marked off from the title-deed. There is only one case, to my knowledge, in which this has been done. In that case, a new title-deed has been taken out, in which the land surrendered is deducted from the total area. Upon the land so deducted, no taxes are paid, and the land is in the possession and occupation of the public. There are several cases in which a large part of the area is in the occupation of the public; for instance, Russell & Co., Dent & Co., Jardine, Matheson & Co., the British Government, and the Trustees of Trinity Church. None of the proprietors of these lots have objected to pay taxes upon the portion of their property occupied by the public. Defendant's is the only case of refusal. I was present at a meeting of Ratepayers on the 12th and 13th May, 1873. The report which I produce is a correct report of what took place. Mr. Twombly was present at the meeting. The resolutions mentioned in the 5th and 6th paragraphs of the petition were passed at the meeting—*i.e.*, Res. VI, VIII and XVIII. There is no record of Mr. Twombly having voted against either of those resolutions, so it is to be presumed he voted in favour. I mean that, if a resolution were not passed unanimously, there would be a record of the poll.

To COURT—I do not know whether Mr. Twombly voted either way.

Examination continued.—A re-assessment was made in accordance with Resolution 18. I have the assessment schedule, which shows the new valuation; namely 10 *mow* at Tls. 6,000, and 3 and 1 *mow* at Tls. 4,000. The assessment was communicated to Mr. Twombly, and returned by him, with a note upon it protesting against the valuation as excessive. Mr. Twombly was a member of the Assessment Committee, who made the new assessment. I have the British Consular Land-List showing the area of property. That list shows the total area of the properties to be 14 *mow*. It is in accordance, as regards area, with the area assessed. That list is the basis of calculation in all cases. Mr. Twombly appealed against this assessment to the Appeal Committee. I hand in the printed form of appeal, with memo. by Defendant written across. The appeal was considered, and the valuation was upheld. That decision was communicated to Mr. Twombly. I have also the minutes of the proceedings of the Appeal Court on 9th Dec. 1873. The Court was constituted as follows—Bell, J. Ashton, W. Kidner, G. J. W. Cowie, M. S. Gubbay, and J. K. Thorndike. The Assessment Committee were also represented by two members. It is noted in the minutes that Mr. Twombly objected to the area on which the assessment was based, and that the assessment was sustained. Upon that, a notice was sent to Mr. Twombly that the assessment was upheld. Payment was then demanded of the tax on that valulation, for the ½ years ended 31st March 1874, 30th Sept. 1874, and 31st March 1875. I produce the tax notes which were presented. The first relies upon the resolution passed in 1873. I have also a report of the Ratepayers meeting held in May 1874. Mr. Twombly was not present at that meeting as a Ratepayer. He was present, but took no part in the proceedings. Resolution No. 7 was passed as set out in the Report. That resolution does not vary the rate of the land-tax from the resolution of 1873. The two last tax notes rely upon that resolution. None of the amounts in those tax notes have been paid. The assessments are within the limits fixed by Art. IX. of the Land Regulations. I produce the correspondence in this case between myself, Mr. Twombly and Mr. Seward.

To Mr. TWOMBLY—As Secretary to the Municipal Council, I was present at the first meeting of the Land Assessment Committee held under the resolution (18) passed in May 1873. I remember the question was raised whether the assessment would be made on the area mentioned in the title-deed or only on the area in occupation. The minutes show that, before proceeding to business, you raised the question whether the valuation should be on the area of land in the Municipal plan or the area per title deed, and the Committee decided that it was out of their province to deal with the question. Their duty was to place a valuation on the land, and they had nothing to do with the area. At the same time they wished it to be recorded that was a matter of fairness to the Ratepayers, in their opinion, taxes should only be demanded by and paid to the Municipality on the measurement of the available land per Municipal plan.

By "Municipal plan," I understood property in private occupation—within compound walls. I have stated that I am aware in this instance taxation extends to land without the walls. The decision to take the area in the title deeds rests on the vote of the Ratepayers (Resolutions Nos. 6 of 73, and 7 of 1874). The language with reference to the quantity of land to be assessed is the same in both. There are some of lots of land within the limits North of Yang-king-pang which are not registered in any Consulate—they belong to original Chinese owners. I know of none such belonging to any foreign owner. There is a considerably body of land still in the names of native proprietors—more especially in the Hongkew Settlement. I interpret the resolutions, which have been quoted, to mean that the Council are to deal with the areas laid down in the Consular register. The resolution says "land" as registered in the Consular register; there is no distinct mention of "area." I know of no other reason than the resolution of the Ratepayers, why the area in the Consular register should be selected. I know of no special authority, under which the Assessment Committee decided the point as they did. In your case 10 *mow* were assessed at Tls. 6,000, and the balance at Tls. 4,000. I believe about 6 *mow* of the land in question is outside the walls of your compound. I have a tolerable knowledge of the value of land. I should say that within your walls is under-assessed. I should think the total valuation, if applied to the land within the walls alone, is not excessive. As much as Tls. 10,000 per *mow* has been given for property on the Bund. I was not present at the meeting of the Appeal Committee on the 9th December, when this matter was brought up. Mr. Hart was acting as Secretary to the Appeal Committee. I believe the person to whom I have referred as having re-measured, had it done for the purpose of avoiding the tax on land outside his walls which had been surrendered to the public. The act was a spontaneous one of the owner of the property. It was not suggested by the Council. The Council took no action in the matter that I am aware of. I believe the remedy has been recommended by the Council, in cases where adverse to the instance under discussion. I am not aware of any reason why the remedy would in this instance be worse than the disease. The land in question was on the Bund. My knowledge of your refusal is derived from the tax collectors' report, and from your letter.

In answer to Mr. Drummond, Mr. Twombly admitted the receipt of the tax notes.

The correspondence between Mr. Twombly and the Council was here handed in.

Cross-Examination continued—I am not aware that there was a complaint of excessive taxation prior to this, and that it was allowed. The Municipal books would show it. The prior assessment was Tls. 50,000. I do not know why it was fixed at that sum.

Mr. TWOMBLY would have to ask Mr. Souper to produce his books, as evidence on this point.

Re-examined by Mr. DRUMMOND—It has been the custom to take the area named in the title-deeds, as the basis of taxation. So far as my knowledge goes, it has been always the custom. No other system has ever, to my knowledge, been adopted. In the absence of the words in the resolution, there is no other guide I could fix upon, as to how the area should be judged. The only alternative would be to leave the determination of areas to the discretion of the Assessment Committee. That would involve an enormous amount of time and trouble, and would require a separate land-office, and cause also a proportionate additional trouble to the Assessment Committee. If the area of land taxed were reduced to that in private occupation, the revenue would of course suffer largely. There are 25 miles of streets within the Settlement; on which no tax would then be paid. It would necessitate an increase in the rate of taxation, if the expenditure remained as it is. Nearly all proprietors in the Settlement pay in the same way for land not in their occu-

occupation. The work of valuing property of this sort is done by the Assessment Committee. There was a professional gentleman on each committee in the case of the present assessment.

The Court now adjourned.

The hearing was resumed in the afternoon, when

Mr. Souper was recalled, and further examined by Mr. Drummond—There are 25 miles of roads in Shanghai, upon the greater part of which taxes are paid by the proprietors of the land abutting upon them. It is not part of my duty to value and assess property for the purposes of taxation. I have no special knowledge whether any properties are over or under assessed. The Council offered to assess the land in question according to the actual area enclosed, if the defendant would have his title-deed made out in accordance therewith. He declined that proposal, and has not altered his title-deed. The reason he gave, was, I believe, that it would involve the abandonment of claims as to foreshore rights—that it would have involved the abandonment by him of all property outside the boundary line which he claimed, but which the Council disputed.

By Mr. Twombly—I do not understand that the decision as to the taxation of the land being based upon the area contained in the title deeds, was the decision of the Assessment and Appeal Committees, or either of them. It was the decision of the Council, as instructed by the ratepayers. There is a Municipal Map, drawn by a competent authority. A very large sum was spent in getting the surveys and drafting that map. It is a correct map, as to the time the survey was made, in 1864—1866. It was drawn from a scale. It is possible to compute areas of lots from it, as they existed at that time. The Council's engineer is competent to compute those areas, but he would require extra assistance to enable him to perform that work. I think it would be a more equitable mode of paying taxes, to raise them upon the quantity of land enclosed, and so release the amount of land used as roads. I do not think there is any correspondence as to the point that the alteration of deed would lead to the abandonment of rights of foreshore. It was a general opinion, gathered in conversation with you, that it would do so. (The original map of the Land Assessment Committee was here put in.) The map contains the only record of the assessments as

Mr. Drummond said there was no further evidence in support of the Council's case; but he would submit, as there were a number of gentlemen present to give evidence for the defendant, and it would be courteous to take their evidence now, and defer argument to the end of the case.

Mr. Twombly acquiesced, saying such a course would be both convenient and desirable. There were three gentlemen present, whom he wished to testify as to what took place at the meetings of the Assessment and Appeal Committees on the questions raised, and he would call—

Mr. F. H. Bell, who said—I was a member of the Appeal Committee for the assessment of 1873. I was present in such committee at a meeting before which you appeared, to demur to the assessment of W. H Fogg's property. I remember what then took place. You objected to the gross sum charged, on the ground that the area of measurement was excessive; and the Appeal Committee decided that they had no authority to enter into the question of areas. I have read the reply of the Committee, contained in paragraphs 6 and 7 of your answer to this case, and I agree with their contents. The Appeal Committee decided upon the value per *mow*, not upon the area. The question of measurement of area we could not decide upon. It could not be brought before us. We accepted the areas as given in the schedules of the Council. All that came before us in the appeals, was based upon the assessment per *mow*, and the number of *mow*, —but nothing as to measurement. I do not consider the land within your boundary is worth Tls. 10,000 a *mow*. I should think that Tls. 6,000 would be a fair value for the land inside the walls of your compound.

By Mr. Drummond—I am aware this property has a double frontage. That would certainly increase its value. Adamson, Bell & Co. have a quantity of land outside their walls. It is a small proportion of the quantity they occupy. I have never made any objection to pay the taxes for the portion occupied by the public.

Mr. W. Kidner was next called, and stated —I was a member of the Appeal Committee, sitting on the re-assessment voted for on the 13th May, 1873. I was present at the meeting on the 9th December, at which you objected to your assessment. As Mr. Bell has said, you objected to the area, and the Committee decided at once that they could not go into the question of area—it was out of their province altogether. I considered that you would have to pay upon the area of your title deed, as everybody else did. My opinion was, that that was the end of the case. The Committee did not enter upon the case. Your land was put at the highest rate, and it certainly is some of the most valuable land in the Settlement. The Committee started with a datum of Tls. 6,000. I do not think any alteration was made in the Bund lots; what alteration was made, was in the back parts of the Settlement. I think the value then placed upon your land was its proper value. It was Tls. 6,000 for the inside, and Tls. 4,000 for that outside, the walls. It is impossible to form any idea of the actual value of land here, as there is no settled market for it. As a rule, I think the present general assessment is rather high, but that remark does not apply so much to the Bund as to the back parts of the Settlement.

By Mr. Drummond—The property sold for Tls. 10,000 per *mow* belonged to Messrs. Turner & Co. It included all available land. There are roads, &c., upon it. It has only one frontage. Messrs. Fogg's property has two frontages, and the fact of its having a water frontage increases its value. I do not think it is so valuable as the Bank property, but it is hard to make a guess at figures like that. I think the assessment put upon all the Bund property was too low, but it all depends upon quantity and position. Messrs. Fogg's property is no exception to that statement, but rather the contrary.

By Mr. Twombly—My opinion is that no man ought to pay upon the roads, as they can never be got back. I should like to see the money raised by a higher rate upon the land actually occupied. Probably the Yang-king-pang does not add to the value of property, but still it is an advantage, because you can build to the very edge of your rights, and still have light and air. I would value the value of your eight *mow*, if it was clear of buildings, would be Tls. 6,000 per *mow*. Clean lands will always fetch more per *mow* than land encumbered with buildings. I think your assessment, if it includes the roads, is a fair one. If you took away the roads, the assessment of the inside land would have to be increased.

Mr. Robert Francis was next examined, and deposed—I was a member of the Land Assessment Committee for 1873. I was at the first meeting of that Committee. I remember that you, as a preliminary, objected to the Committee going forward with the work, until the mode of ascertaining areas was decided. We had before us the old schedule. The Committee decided that they had nothing to do with the settlement of the areas, one member of the Committee remarking that anybody who felt aggrieved could have his lot remeasured, if he chose. The Committee took the quantity of land as entered in the schedule, and valued it at per *mow*. The map produced was used by Mr. Kingsmill, as chairman of that Committee. There was a larger (skeleton) plan before each member of the Committee. The manner of procedure was that we should take a lot; a value was then put upon it, which, if agreed to, was passed; if not, it was discussed. We put everything down at Tls. 400 per *mow*, or Tls. 4,000 per *mow*, as the case might be, without reference to the quantity of land, either in or outside the walls. We left that to be decided afterwards. I do not think the point as to the value of land inside and outside the compound walls was raised. I think if it had been raised, it would have made a difference —it would have done so in my mind at least, and probably in that of others of the Committee.

Mr. Drummond then read the following extract of minutes of a meeting of the Land Assessment Committee, on 28th August. *Present*, T. W. Kingsmill, chairman; A. A. Krauss, W. A. Turnbull, J. F. Twombly.—*Absent*, R. Francis and F. E. Heyden.

"Before proceeding to business, Mr. Twombly raised the question whether the valuations should be on the area of land on the Municipal plan or the area per Title Deed. Considerable discussion ensued. Members present finally concluding that it was out of their province to deal with the question. Their duty was to place a valuation on a *mow* of land according to its situation in the Settlement, they had nothing whatever to do with the area of the lot to which it belonged. It appeared to the Committee that the Ratepayers were the only authority competent to deal with the point raised; at the same time they wished it to be recorded that, as a matter of fairness to the Ratepayers, in their opinion taxes should only be demanded by and paid to the Municipality on the measurement of the available land per Municipal plan. The schedules made up on the basis of valuation fixed by the Committee were laid on the table and examined. It was moved by Mr. Kingsmill, and seconded by Mr. Krauss, "that the schedules drawn up in accordance with the assessments placed on the map used by the Committee, be adopted." (Signed) Thos. W. Kingsmill, Chairman."

Witness, examined by Mr. Drummond, said —I agree with that minute. I consider the proper course for a person who objects to a basis of taxation is to bring forward the question at a meeting of ratepayers. I was present at a meeting of the Land Assessment Appeal Committee, on the 9th December, 1873, at which a large number of appeals were settled. I was present only as a member of the Assessment Committee, to watch proceedings.

Mr. G. Hart was next called, and said—I acted as Secretary of the Appeal Committee that has been spoken of. I was present when the question of your assessment came up. I asked the Chairman if he wished me to take a minute of the arguments, and he said no. I cannot remember what more took place than appears in the minutes. I remember that Mr. Maitland, the Chairman, asked you if you objected to the sum per *mow*, and you said no,—that you objected to the area upon which the assessment was based, and as shown in the title-deed.

Mr. Twombly said he had a witness as to the question of area, if it was considered necessary to call him.

Mr. Drummond said he was quite prepared to admit that the land was divided in the proportion of eight to six—that is, eight *mow* in occupation of Fogg & Co., and six *mow* used as roads.

Some desultory conversation here ensued as to the former amount of the assessment, Tls. 50,000, and upon this point

Mr. Souper was recalled, and said—Taking the list produced, whereby the assessment is reduced to Tls. 50,000, I cannot say if it was done by an Assessment Committee, or by the Council. I have not had time to trace the matter yet.

Mr. Drummond suggested that as Mr. Twombly himself probably knew something about it, he might perhaps take the stand, and state what he knew.

The Court had no objection. It was, however, now getting late, and as the case would have to be adjourned, it might be well to adjourn now. By the time the Court sat again, Mr. Souper would probably have been able to trace the point.

This course was agreed to, and, the Court adjourned till the 16th.

The Court—Before the hearing of this matter is continued, I wish to submit to the parties concerned whether it is not desirable to postpone the further hearing until after the holding of the Ratepayers' meeting. I do not mean to suggest that the Municipal Council's case is not a good one, as far as legal and technical points are included, but it seems to me that it is not a good case in equity. It has been shown in the hearing of this case that lots are assessed not separately or individually, but according to locality. In certain streets or localities, the valuation is put upon the number of *mow* as contained in the title-deeds, and it happens that in one lot the title-deed mentions land only within the boundary of the compound, as being assessed; but in this case the assessment is for the land within the walls, for the bund or water frontage, for land in the use of the public as a street along the Yang-king-pang, and for half the width of the creek also. Both are bund lots.

Mr. Drummond—Might I ask the name of the one within the wall?

The Court—The name has not been stated, but the fact has been stated during the hearing of the case.

Mr. Drummond—But the owner of that land has given it up to the public, and so escapes payment of the land-tax. The same offer was made to the defendant, but he refused it.

The Court—There might have been very good reasons why Mr. Twombly should not desire to have his title-deed altered. The point was brought to my notice, and I advised that it should not be. The best opinion is that land lying outside the Bund cannot be used by the Municipality without the consent of the Landrenter, or by the Landrenter without the consent of the Municipality. There is no doubt the land outside is as much in the occupation of the public as it would be if in possession of the Municipality; and if Mr. Twombly desired to use his ownership in an aggressive manner, he would be prevented by the Council. That is the state of the case, and in view of it, it seems to me it would bedesirable for all the parties to consent to a postponement until after the Landrenters' meeting. If the case goes on, I shall have to decide it upon the legal points only, and have to throw over the very strong point of equity which the case presents in favour of the defendant. I do not think the Council would wish to place me in that position.

Mr. Drummond—Perhaps Mr. Twombly will state his views on the suggestion.

Mr. Twombly—The other side should state theirs.

The Court (to Mr. Twombly)—Would you object to do so?

Mr. Twombly—As far as I know of the Landrenters' meeting, the Landrenters are men of business, and do not wish their time taken up with fresh matters; but if the Council will take the matter up they would not mind, especially if they thought there were other matters depending on the settlement of this case. In the position I have taken I do not think I can be assailed.

The Court—You mean as to the legality of the Land Regulations.

Mr. Twombly—Yes; if the Council will consent to have the case settled on the broad principle of equity, I will consent to a postponement until after the Landrenters' meeting, but if they brought up any legal or techincal points, I should claim the same privilege.

The Court—The simple proposition is to submit the case to the Landrenters at their meeting. They will have seen the proceedings in this Court, and if they think proper they can take up the case and consider it. If they decline doing so, I could again go on with the case.

Mr. Twombly—Would their decision be final, if they decide to have nothing to do with it, or would the case go on if they said I must pay the tax?

The Court—It would be competent for them to give an opinion as to whether you should pay the tax, or whether there should be a reduction. If a reduction be made, I do not know that the case would come into Court again. If no reduction be made, it would come on again.

Mr. Twombly—Well, if they will consent to bring it on as an equity matter, I will consent to the postponement.

The Court—But you have not the Municipal Council here to say whether they will or not.

Mr. Twombly—I do not know who would bring it on at the meeting.

Mr. Drummond—It appears to me from what has fallen from Mr. Twombly, that he does not intend to bring forward a resolution himself at the Landrenters' meeting. He had the opportunity at a former meeting, but did not do so, and he now seems to think it is a matter for the Council to take up; but, from my instructions, I apprehend they will not take it up. If Mr. Twombly would bring forward a resolution on the subject, it might be carried, and the matter ended. But, as he says that he would probably dispute the decision of the Landrenters, I do not see that a postponement of the case would be of any use.

The Court—I think there is little or no reason to object to a postponment. There is only an interval of six weeks to the Landrenters' meeting; and after the case has lain in obeyance for a year and a half. I do not see what objection the Council could have to another delay of six weeks. The public will have a very clear idea of the case from these proceedings.

Mr. Drummond (after consulting with Mr. Purdon, the chairman of the Municipal Council)—My instructions are to request that the case shall be continued, and that the Court shall give a decision upon it. The defendant will not give a promise to bring forward a resolution at the Landrenters' meeting. The Council will not do so; so, if it is postponed, it is not likely the question will be brought forward at all. I do not think the Council consider this case an unequitable one, and if the subject was brought on at the meeting, and it was decided that defendant must pay his tax, we should have to come to this Court again. That is the position of affairs.

The Court—There is a possibility, if it is only a bare possibility, that the matter will be brought on by some one at the meeting. The Landrenters can settle any matter that is not equitable, and I am sure the Council cannot consider this case equitable.

Mr. Drummond—Mr. Twombly is the sole individual who makes complaint of the present system.

Mr. Twombly—I am the only one aggrieved to so great an extent.

The Court—It will be easier to redress his grievance, it being the only one.

Mr. Drummond—If the rest of the Landrenters felt aggrieved by the present system, they would have considered it before now.

The Court—I do not know another case in which the want of equity is great.

Mr. Drummond—A large number of persons are in the same case—they pay upon land that is in the occupation of the public.

The Court—What is the proportion in this case?

Mr. Drummond—Six *mow* out of fourteen.

The Court—Is there any other case in which there is so much disparity?

Mr. Drummond—Mr. Kidner's evidence is essentially valuable upon that point. He says, "I think your assessment, if it includes the roads, is a fair one." If it were altered, and the roads excluded, Mr. Twombly would pay the same tax as now. It might be that Mr. Twombly's case is somewhat harder than the rest, but he gets some consideration for it. He has some other claims relating to the foreshore and other property, which he keeps in force by holding on to these roads. If it is worth his while to keep the land now occupied as roads [illegible] his while to pay taxes upon it for the value he receives in some indirect way. Mr. Twombly should have brought forward a motion at a Landrenters' meeting, and not have been brought into this Court. He had the opportunity of doing so in 1874, and he might have given an undertaking to do so in 1875, but he has done neither, and does not appear willing to do so now If he had given an undertaking to introduce the matter at the next meeting, the Council would have suspended these proceedings.

Mr. Twombly—I strongly protest against the assertion that I have not brought it forward at the Landrenters' meeting. So far from that being the case, the minutes of the meetings for years past will show that I have brought it forward time after time, but never could get a seconder. Mr. King at one time spoke about the same thing. What I object to is not so much to paying for land outside the walls, as that we are paying enormously out of proportion; and we at one time suggested the taking off of one-fourth of the amount. (Letter produced.) That shows we have always been prepared to bear our just proportion of the public burdens. Mr. Kidner's evidence has been referred to, but the prices he mentioned were fancy prices, and cannot he regarded as a rule.

Mr. Drummond—I must protest against the continuance of this. It is going into the whole equity of the matter.

The Court—It certainly is; but there were certain points raised by you, and I did not think proper to check Mr. Twombly. As the proposal to postpone is declined, the case will now be continued.

Mr. Souper, recalled, produced minutes of meeting held at the British Consulate on Nov. 30th, 1863, and a copy of the old Land Regulations of 1854.

By Mr. Twombly (who first read the minute of the Assessment Appeal Committee produced at the former hearing)—The schedules are made out by the Secretary, Mr. Hart, as an officer of that Committee. I believe the Chairman of the Assessment Committee (Mr. Kingsmill) assisted him in this.

By the Court—The tax-notes did not pass though my hands. The Council had nothing to do with the matter. The Committee is appointed by the Council, but they appoint their own secretary and officers. They appointed Mr. Hart. The assessment-of-land schedules emanates from them. The tax-notes are made out afterwards. They are based upon the schedules made out by the Assessment Committee. It is the fact that the schedules were made out in accordance with the minutes of the Assessment Committee.

Mr Twombly—Can you confirm this paper that has been brought in? It is a document with reference to the reduction of my assessment to Tls. 50,000. I want to know if Mr Souper knows when the reduction was made, and by whom?

Mr Souper—The reduction made in this sheet was made with the sanction of the Council. The assessment went on from December 31st, 1864, to April 1st, 1870, when there was a new assessment. It was an abatement after the assessment was made.

Mr. Drummond—The present assessment was at once objected to,—defendant has never paid on it yet.

Mr. Souper (in answer to the defendant)—There was an assessment made in 1867, and the abatement remained the same.

By the Court—The abatement was made by the Council in 1865. There are no minutes to show for what reasons. There are only the reports passed by the Council, and a very short report of a Ratepayers' meeting. The Ratepayers considered the valuation of land was too high,—it was a general reduction on the value of property, and not a special abatement in Messrs. Fogg's case. There were abatements in other cases. I do not remember those cases. They were made upon special application. I am not prepared to say whether there were 20 or 50 cases. There was a general reduction, on a recommendation in the report. The report was passed. I have not brought that report here.

Mr. Kingsmill, examined by Mr. Twombly, deposed—I was a member of the Assessment Committee of 1873 and was chairman of the Committee. The general business is included in the minutes produced. You put questions at a meeting as to whether, the [illegible] could not. You instanced your own case, your own land, as having been previously assessed at an area much greater than was available. To the best of my recollection, the minute seems substantially correct. It did not take the form of a resolution. The committee had discussion as to their powers. They came to the conclusion that they had no power to deal with the question of areas—that they were simply acting upon instructions. This occurred at the very first meeting, and shows the conclusion come to by the Committee. Each member had a map, with the lots marked on it, before him, and each made his own memoranda upon it, as the business went on, of the value per *mow* of the several lots, irrespective of areas. The Committee only took the *mow* value into consideration. The figures I made were sufficiently accurate to be used afterwards, and were used, to draw up the schedules upon. The areas were furnished to us by the Council from the title deeds. We did consider them in this way. Mr. Twombly's own lot was 14 *mow*, and we took one part to be of more value than the other, and so placed different values upon it. We did not consider how "monstrous or absurd" the result might be. This method of calculation might give an absurd value to a given lot. I know something of the value of land in the Settlement. The schedules which we prepared, showing the areas and value per *mow*, were severally approved. They were based upon the map of which I have spoken.

By Mr. Drummond—I mean by the word "absurd" that the absurdity would lie on the fact that the actual area was different—the title-deed might be so much incorrect as to produce the absurdity. An absurdity might arise in this way, if the owner could not make use of the outside land. I know of an instance where the whole block was occupied as a road, from which the owner derived no benefit at all. The Council, when it was

discovered that the owner could make no use of this particular lot, did not assess it. That was in 1867, and the land has since been in the possession of the public, and the tax remitted. The Assessment Committee carefully examined each property. They placed different values upon different parts of the same property, having respect to its local and general circumstances, and irrespective of its being outside or inside the walls.

Mr. Drummond put in minutes of meetings of the 28th August, 1873, and of the 9th December, 1873—the first meeting being that at which Mr. Twombly's case was first mentioned. There was another meeting, held on the 23rd September, 1873, at which this matter did not appear to have been discussed.

Mr. Twombly said it would be better to put in the entire minute-book, for there were 12 or 15 meetings held.

Mr. Drummond said there were also minutes in another book, which did not bear upon the case at all. The book, however, had been sent for, as it seemed desirable to put in all documents possible.

The Court asked the defendant if he could give any evidence on the point?

Mr. Twombly said he had no wish to give evidence unless it was considered necessary that he should do so; if it was considered necessary, he had no objection, as there seemed to be several points that wanted clearing up.

The Court—Perhaps it would be as well if Mr. Twombly took the stand.

Mr. Twombly accordingly deposed—Being invited, I served as a member of the Assessment Committee for 1873, and attended the meetings of which notice was given. Was present at the first meeting, when some conversation ensued as to the manner of our proceeding, generally. I brought up the matter of the areas, as a preliminary thing, to see if anything could be done upon it, and if so, what? It was an absolute necessity as regarded the duties of the Committee, as to making a valuation of lots, it being understood that we were to assess the value so much per *mow*. It was suggested by Mr. Kingsmill that I should draw up a resolution, based on it. I was proceeding to do so, when one member of the Committee, and then several others, suggested that it was quite unnecessary, as we had no power to go into the question of area at all. No reasons were given for that Landrenters' meeting, was that I had no invitation [illegible] Municipal Council or anyone else to do so. It is within the knowledge of the Secretary that I have three or four times brought it up—that I have brought in a resolution—but it has not been entertained by the meeting, for the reason that people have no time to devote to it, and look upon it only as a little thing. But if it was brought forward by the Municipal Council, it would be listened to; but there might be some who would regard it as coming from me less favourably—though some would regard it more favourably. There is doubtless some little prejudice with respect to Bund rights, and perhaps some other matters, which might make it objectionable if I introduced it—there is a good deal of wire pulling and other things, of which I am the victim, and I can imagine there has been a good deal of it in times past. I would have gladly brought forward a resolution at the former meeting, if I could have seen it would have been listened to; but from remarks I heard made, I saw it would be useless for me to do so, and therefore refrained. I would otherwise have done it without hesitation. I do not know whether it was because it was considered desirable to have my advice and assistance, that I was elected on the Assessment Committee.

Mr. Drummond said he had now received the report of first meeting, held on 31st July, 1873, which he read, and then handed to the Court. He then proceeded to address the Court in support of the plaintiff's case, commencing by stating why judgment was asked on behalf the Council. They contended, on three grounds, that they were entitled to payment of the sum claimed. The denial by the defendants, of the Council's authority—the assertion that it had no legal status—went to the root of the whole question, and to test the jurisdiction of the Court, upon the question whether it was competent to the Court to review the assessment and the decision of the Appeal Court. He should however, contend that persons who had acquiesced in the work done by the Council, and in the operation of the Land Regulations, and who had paid on the assessment by the Council for years previously, were precluded from bringing forward such a contention. In this case, he (Mr. Drummond) would regard the different facts upon which that opinion was based. The defendant was present at the meetings of the Assessment Committee, he acquiesced in what was done, and paid rates and taxes for a long series of years to the Municipal Council; he has taken an active part, in fact, as appeared from the minutes and reports produced, in the government of Shanghai in various forms; he has received the same benefits that any other member of the community has received; and if, therefore, he now brought forward the argument that the Council, from its very inception, was an illegal body, and that it had no right to levy taxes he (Mr. Drummond) said there had been unreasonable delay on defendant's part, and the Council contended that he was not now, after the lapse of so many years, in a position to bring forward such an argument.

The Court—But he might have thought differently down to 1870, and there having been an abatement made—

Mr. Drummond went on to say that the abatement had nothing to do with the matter, because if defendant paid sixpence as rates, he admitted the Council's right to levy them—he admitted the whole principle, and accepted the Council of Shanghai as a legal governing body. How far they might have acceded to his application for a reduction, did not touch the question at all. He accepted the whole position by paying rates and taxes, and by taking part in the government,—otherwise he had placed himself in the position of saying, "I have assisted an illegal body for many years, and can on any day turn round and sue them for the money I have paid"—and that would be a course that any other member of the community could adopt, if the defendant's contention was sustained. The position of the community of Shanghai was unique—another place so circumstanced was not to be found in the whole world. It was unnecessary for him to enlarge upon that fact, but the Settlement could not be compared with any other in the world, and therefore there was no precedent to fall back upon; and it was only upon principle that anything could be adduced with regard to the position of parties. He should, therefore, urge on behalf of the Council, that defendant was legally estopped from any such contention in the matter. If that contention was supported, it would be unnecessary for the Court to consider any question as to the legality of the Land Regulations or of the action of the Assessment Committee. Of course, if that contention was held not to be good, and the Court supported defendant, then any member of the community could come forward and say, "There is no Authority or Council here, and I am not bound to pay any taxes at all." The Council, therefore, contend, 1st, that the defendant is estopped denial of their authority; 2nd, that defendant is bound by the decision of the Appeal Court as an award, and has no appeal from that award; and 3rd, that the defendant is indebted under the Land Regulations. As to the first point, he (Mr. Drummond) referred the Court to an American work on the question of what was called "equitable estoppel" (2 vol., Justice Story's *Equitable Jurisprudence*; page 754, under the head of "Estoppels in Equity.") The book gave a number of sections, from 1539 to 1550—about four pages of notes on different cases, each of them supporting the doctrine he had advanced in the present case. He would not trouble the Court by reading those statements, but would leave the book for reference. Mr. Drummond also quoted other authorities on the points he had raised, including Spence's *Equitable Jurisprudence* vol. 1, p. 550; Smith's *Leading Cases*, vol. 2, p.p. 693, 694, and 777; and Broom's *Legal Maxims*, p.p. 169, 173, 275, 286, and 290. Those were very high authorities in support of his argument. That a man should not be permitted to blow hot and cold on the same allegation, was an old fashioned but pertinent maxim—that a man is precluded, having accepted, as his interest pointed out at one time, a given state of things, to make such a statement as that of the defendant, and have the statement received in Court. In Broom, at page 275, there was also another maxim, that no man should take advantage of his own wrong; and again, Story, in the same

volume, at pages 301 and 320, on the question of election, was the authority which showed that election must be exercised in the first instance—and that the defendant's course of action should not have been left so long. Those were all the authorities he should cite in support of that contention, and upon them he would submit that it was a well-known rule of law that a man was estopped from denying what he had previously admitted. Therefore the case of a member of the Shanghai Council, taking part as Mr. Twombly had, in the government of the place, was not the case of a stranger, and he could not succeed in contesting the legality of the Council in the case. If he (Mr. Drummond) succeeded in his contention, it would be a very valuable authority for the Council, and give them support and assistance in the future. With regard to the second ground upon which the Council contended that judgment should be given in their favour, —that the decision of the Assessment Appeal Court was final,—he contended that there was no appeal from their award. It left the question as to the Land Regulations behind altogether, and the Council would ask for a decision in their favour on the ground that they were bringing a simple action to recover a debt, upon an award which was final and binding upon the defendant, and which he had no means of re-opening. The basis of their contention was, that Mr. Twombly was present at the meeting of the 12th and 13th July, 1873, one of the resolutions passed at which was for the formation of the Appeal Court, whose decisions should be final. That resolution was passed unanimously, Mr. Twombly being present and not dissenting. After that meeting he appealed to the Appeal Court. To all intent, the Appeal Court was appointed as arbitrator, and he, having consented to their being appointed, followed out his own original intention, and appealed to the Court on the very point he now sought to re-open. The assessment was confirmed; for the Appeal Court, to whom he had submitted, and to whom he appealed, received and confirmed the report of the Committee. Referring to what had been done at the meetings mentioned, he said Mr. Twombly would no doubt contend that he had been denied relief,—but the two principal facts were that the Assessment Committee could not enter into the question of areas at all, and that the Appeal Court decided that the assessment must be upheld, as being based upon the areas registered in the British Consulate. The same question had arisen in another case, and he thought it was the proper course to name it—it was the case of the Oriental Bank, which Sir Edmund Hornby decided in favour of the Council, and which decision would be found recorded in the *North-China Herald* of February 12th, 1874. It was very important that the decisions of the two chief authorities in the Settlement should be in accordance upon so important a subject. The objection taken inthe case of Oriental Bank was that the decision of the Assessment Committee was not final. It was a case brought upon the alleged excessive assessment of a house, and the question of importance raised was whether the decision of the Committee was binding upon the Bank, or was it possible for them to appeal. Of course, the present course of action taken by Mr. Twombly was to re-open the question of the finality of the Appeal Court. Sir Edmund Hornby decided that the decision was binding upon the Oriental Bank and could not be re-opened at all. It was open to a Ratepayer to alter the whole thing once a year, by bringing forward a resolution at the annual meeting which he thought would relieve him. The decision of the Court, therefore, did not inflict a very great hardship upon a Ratepayer for that reason. It only said he must pay his taxes for that year—and it was even capable of being set aside at a special meeting, provided it was the general feeling of the community that it should be. Mr. Drummond would also refer to the Act of Congress, of 1st July, 1860, section 19, which laid down the principle that it was essential with Consuls to encourage the maintenance of peace, applying that principle to cases like the present, that where a defendant had chosen his Appeal Court, and received their decision, he was bound by that decision. In addition to the Act he had quoted, there were a number of authorities. In "Russell on Arbitration," p.p. 22, 23, 42, 49, 124, 477, 505, 642 and 643 which was the best known general work on the subject of arbitration, it would be found that the main point to be looked at in the submission to arbitration was the intention of the parties. A simple submission was sufficient, and documents were not necessary. In the present case an award had been given, which the defendant had disregarded, and was endeavouring to set aside. The question arose what was the proper course for the Council to pursue? There was no other course than to sue for the recovery of the debt, and that was the course adopted by the Council—they had brought a Civil action to recover a debt under an award. The defendant, as he had said, was trying to set aside that award in a Court of law, but then came the question of time within which he could try to do so. The time was very strictly defined in English law within which an award could be set aside—in Courts of Equity, it must be within the last day of the next following term. In the present case the award had existed for a very long time, and no attempt had been made to set it aside, except by the act of non-payment of the amount. If the judgment of the Court, therefore, was against the Council on the point of estoppel, then the Council asked that judgment should be given in their favour upon the award as stated. Now, upon the 3rd point, that the defendant was indebted to the Council under the Land Regulations. As the defendant had denied the legality of these Regulations, it would be well for him (Mr. D.) to read the Articles as to the appointment and jurisdiction of American Ministers and Consuls in China over citizens of the U.S. of America. Article X. of the Treaty of June 18th, 1858, gave the right to appoint Consuls at such places as should be agreed to be opened, and Article XIV. fixed Shanghai as one of those places. He would next refer the Court to Article XXVII. which defined jurisdiction; and the same point was touched upon in the Act of Congress of July 1st, 1860, the preamble of which set forth that Ministers and Consuls were both invested with judicial authority, while Sec. 3 included the decision of claims with regard to civil rights; Secs. 4, 5, and 13 authorised the Minister to make decrees and regulations, to have force of law, to supply defects, &c. Those Regulations were signed with the signature of the Minister, and that was the only thing required to give them validity, his signature giving the Regulations the effect of law. It was quite unnecessary that they should receive their validity from Congress, for under the Minister's signature they became law at once. That was the fair inference to be drawn from the Articles. It was very important that the Land Regulations of the Settlement should be upheld; the power to make them was sufficiently given in that Treaty, and he should ask the Court to assume that they had been published in accordance with the Act of Congress. He (Mr. D.) was not in a position to prove or disprove whether the preliminaries or the proper requirements of the Act had been carried out—he could only put in the Land Regulations, with the signature of the Minister appended.

The COURT knew that they have not been declared, and had set forth the fact in correspondence with the Legation.

Mr. DRUMMOND said that was probably a fact only in the knowledge of the Court, but even if the preliminaries might not have been carried out, it was utterly insufficient to make them null and void.

The COURT did not mean to say the omission would make the Land Regulations fall.

Mr. DRUMMOND resumed by continuing to quote as to the powers of Ministers and Consuls in such cases, and then refering to the question of appeal from the Consular Court. (Sec. 11.) If the amount was under $500 there was no appeal from this Court, and its decision would be final. It appeared, therefore, that under Sec. 11, the Consul-General and Associates would concur in the opinion that, in this case, the amount of debt and costs being under $500, there was no appeal from their decision? The Act of Congress of July 1st, 1870, was the most recent, and the 4th and 5th Sections referred to appeals, and decided the important point that there was no appeal in the present case. Mr. Drummond next referred to the defendant's point that the Land Regulations required the sanction of the Chinese to make them valid and binding, and said if that contention should be pressed, and the case of the Municipal Council fall, he apprehended that the Council would fall back on the old Land Regulations of 1854, which were confirmed in that year by the Tautai Woo. He thought that was sufficient to show that the Land Regulations had received the sanction of the Chinese authorities. He merely referred to that incidentally, and because it might be contended that the Land Regulations must receive the authority of the Chinese Government. The next reference was to the Articles in the Land Regulations giving the Council power to sue for the recovery of arrears of rates in the name of the Secretary, and Mr. Drummond said he would only add to what he had before said with regard to the Land Regulations requiring the sanction of the Chinese Government, that it was not necessary now to go into that question. The Court might like to hear what Mr. Twombly had to say; but he (Mr. D.) might ask if the Court considered itself competent to go into the question of the whole assessment and to consider its validity?

The COURT did not propose to do that, and thought it had nothing to do with the action of the Assessment and Appeal Committee. If it had considered itself authorised to review the action of that Committee, it would not have advised parties to take the matter before the Landrenters.

Mr. DRUMMOND did not like to conclude without making one remark. That he thought the proper course for Mr. Twombly, was to have brought his objection forward by resolution at a meeting of the Landrenters, and that he should not have been a party to drive the matter into a Court of law. He thought it appeared from the evidence given in the case, that there was a general opinion apparent that it would be better to charge rates on land in the occupation of the owner only, and not on land in the occupation of the public. But there was also a general opinion that the Landrenters in meeting assembled were the proper parties to decide that question. It was competent to Mr. Twombly, and to any ratepayer, to bring forward a resolution to that effect. It must be taken for granted that a large body of men—several hundreds in number—would deal with it fairly and honestly, and on its merits, whether brought forward by Mr. Twombly or any other ratepayer. That was the proper course for him to have pursued, and it could not be allowed that a whole community had such a personal feeling against him, as to prevent the exercise of calm judgment. He would not detain the Court longer, but leave the case in their hands.

Mr TWOMBLY commenced his argument. He said he had no authorities to quote, and he considered there was no necessity for his quoting any. From those quoted by Mr. Drummond, it would seem that they had not the remotest application to a case of this kind. They had no bearing upon Municipal matters, but had regard to matters between individuals—at least that was his (Mr. T.'s) opinion of them, and that the argument was very far-fetched, and could not by any possibility be held to bear upon the present case. With regard to his being debarred from proceedings by estoppel, he thought firstly, it had been shown in evidence, and by the various memoranda, that from the very beginning of this assessment, the defendants did begin to object—and that they refused to pay because they held the assessment to be unreasonable and unjust. It was, further, thought to be so by competent authorities. Secondly, he contended that the Secretary could not act without the direct authority of the Municipal Council. Mr. Souper had stated that the tax was paid by the defendants in 1870, under protest, and it was so entered in the books. He (defendant) said the tax was then paid because they did not wish to have any controversy with the Municipal Council—they therefore paid, and paid under protest. They were not, however, satisfied, and he (Mr. T.) served on the Assessment Committee for the express purpose of bringing the matter forward—they considered the basis on which the assessment was made as being very unreliable, unreasonable, and unjust, and it had been shown to amount to an absurdity. Under the new Regulations, the defendants still went on paying, under protest, until such time, as the minutes produced would show, it

was found to be idle to bring forward any resolution on the subject at the Landrenters' meeting. By the remarks made at those meetings, it was clear that they (defendants) were not to be assessed on any other basis than they had been heretofore. As to the final character of the Assessment Committee, he referred the Court to Resolution 18, which seemed to instruct the Council to have another assessment made, and it appeared to bring the Council in as though they were really the parties making the assessment. In the present case, it would seem as though they really made the assessment complete. Whether such a Committee was necessary, or whether it was competent to the Council itself to make the assessment, seemed somewhat in doubt. If it should prove that the Council were the proper parties to make the assessment, then it seemed strange that they should employ a Committee to do it. As to the final decision of the Appeal Court,—whether it would be competent for the Landrenters to solemnly pass such a resolution, or whether citizens of the United States were not at all times entitled to a decision by their own Consul in matters affecting them,—the Land Regulations resting upon no other authority than that of the Minister—it was possible they had no power of otherwise determining. If the contention was that the decision of the Landrenters took away the jurisdiction of Ministers and Consuls, it seemed to him that such a principle would have no limit. But it occurred to him that the Landrenters would not be so presumptuous;—and if they were, they knew it was no law of the Medes and Persians, that could not be altered. The attempt to show that the case was one of arbitration, and that the decision of the Appeal Court was final and could not be disturbed, because it was one of arbitration, was certainly a novel view of the case. He could not discover anything in the light of an arbitration in it. In the case referred to, that of the Oriental Bank, he thought it rested distinctly on a different issue. It referred to a house, and there had been an increase of the valuation put upon the house—the raising it from Tls. 6,000 to Tls. 7,000 was said to be unjust, and that was the whole gist of the case. It was something the Committee could do, and could and did act upon. In this case it was simply a question of whether the assessment of value per *mow* was correct or not, and this brought him to the question of area. It had been contended for one purpose that the old Land Regulations of 1854, in which it was determined that the assessment should be based upon the areas registered in the British Consulate, were still in force. Now, he contended that if the new Regulations were in force, they certainly took the place of the old ones. The argument that the old ones could be fallen back upon was, he considered, a very singular one. In every position, he thought the plaintiffs' argument was tied hand and foot. It was simply to the effect that before you suffer a wrong you must protest—that you must bring your own suit—that you must swiftly pursue—

Mr. Drummond—Not to bring a suit—but that you must refuse to pay the first time.

Mr. Twombly resumed by saying that he understood the plaintiffs' argument to be as he had just said; and with respect to all the authorities quoted, he repeated they had not the remotest application to a case of the present kind. It really seemed as if the plaintiffs were trying to transfer the case into something else, in order to make the authorities applicable. As regarded the final contention, he did not know that he understood the Court with reference to the point that the defendants should have brought the matter before the Ratepayers. He thought, as he had said before, that it had been thoroughly brought to the notice of the Ratepayers, and that they knew all about it. But it seemed to be persisted in that the defendants had no other course—that they were precluded from applying to their own laws, and that there was no Court to try such a case.

The Court—There is the Court of Treaty Consuls. There certainly never has been such a case brought before them yet, and to take it into that Court, defendant would have to pay the taxes demanded, and then sue to recover what he considered an overcharge. It might possibly be brought on in that way.

Mr. Twombly resumed by saying that he did not propose to follow the opinions expressed on the case any further, but proceed at once to the question of the validity of the Land Regulations.

The Court said they were approved by the United States Government.

Mr. Twombly did not know that before.

The Court—They were approved when referred to the Government by the Secretary of State.

Mr. Twombly—But not by Act of Congress.

The Court—No; not by Act of Congress.

Mr. Twombly, went on to read some portions of the Act of Congress that he thought bore upon his case, saying that his reasons, whether good, bad or indifferent, could be noted. The confirmation of the Regulations by the Secretary of State seemed to him to hardly remove the difficulty. In this case, it would seem that the Minister had not followed the course prescribed—that he had departed from the provisions of the Act. It might be urged, with reference to the necessity of the approval of the Land Regulations by the Chinese Government, that whether they had been approved or not was not to the point; but what he now wished to say was that the Minister of the United States had not followed the form set down, and that the form was an essential principle. The Minister's position was a peculiar one, and his power was great, as great as that of any despotic power, but the Act of Congress guarded against any undue exercise of it, by directing him to bring into his Court all the Consuls of the country who could conveniently be got together. The Act being of such extraordinary power, it must be construed clearly, and what he had stated was of the essence of the Act. The Land Regulations had been put forward as having received a certain sanction. If that was sufficient, then, it must be taken as a sanction; if not, it was no sanction, and they could not be regarded as having been confirmed with due regard to forms—and forms were essential thereto. Those who were acquainted with the co-operative policy inaugurated by Mr. Burlingame at Peking, knew that one of its fruits was against the exclusive giving up of territory to any foreigners—that it should be treated as a common thing, and that no foreign power should obtain jurisdiction over any territory in China to the exclusion of others. That was brought to bear to prevent the acquisition of territory by any one country, which was evidence of the success of the co-operative policy sanctioned at Peking, and in it was involved a very important principle. Of course, the confirmation of the Land Regulations he contended extended over the whole of the territory occupied by foreigners, and did not alone refer to that North of the Yang-king-pang. The extent of the Act of Congress was limited by the Treaty; and with reference to the extension of the law over citizens of the United States, only two points were concerned—crimes and misdemeanours, and causes of action arising out of disputes between two citizens of the United States. With reference to the subjects of other countries having treaties with the United States, such matters were to be settled in accordance with those treaties, and the same with the Chinese. The only thing pointed out in the Treaty was simply a provision for the punishment of crimes and misdemeanours committed by citizens of the United States. In all those Acts, &c., which had been quoted, there seemed to be no reference to the present case, and it was perfectly clear that the Treaty never contemplated any such a thing as a Municipality. There was no such provision in the Treaty, and therefore, there could be no reason for the exercise of authority by the Minister. The question was—would the Emperor of China permit a community of another country, having its own laws and carrying out those laws, to carry them out without reference to him? That was the point. The deduction would seem to be that the Government of the United States could not sanction those Land Regulations, and that to do so would require a supplementary Act. That not having been done, it was clear that the Regulations could not be said to have received the sanction of the United States, and what he contended was that it was for Congress to provide a remedy for the complications that were so likely to arise in these matters. With regard to the assessment, he should contend that, on reading the resolution quoted, there had never been an assessment.

The Court said it understood Mr. Twombly's views on this point quite clearly.

Mr. Twombly said the next point, then, was that there had never been any authority given for the adoption of the present area, under the new Regulations, and therefore the acts of the Municipal Council were illegal, and the system of taxation pursued monstrous,—a point, he considered, that was fully borne out by the evidence. They knew the Government of China taxed all the land in the country, and there was really no reason to suppose that that Government would give up the taxable value of this part of their country unless the Municipal Council would take it up, and pay the amount. Such a course as that would involve new title-deeds, to which he objected, because they would have no reference to the parties who originally granted them.

Mr. Drummond—A memorandum on the old title-deed would satisfy the Council, stating that such and such land was surrendered. It would not necessitate a new title-deed.

Mr. Twombly said that the Municipal Council offered as a condition that defendants should surrender the whole of their land outside, and then they would sanction what was wanted. That looked very much like buying justice, which could be refused unless the condition was acceded to. It was like bartering the value of land in Shanghai, for the Council got nothing by the surrendering of a road, and where did they get their authority to do such a thing? He must now refer to the equity of the case. The letter of the 16th of May showed that defendants were willing to meet the matter, for they proposed that one-fourth of their assessment should be taken off, and so end the dispute, but said that they would not pay for the full extent of the roads. They had no desire to bring the question to the present pass, but the Council would not meet them. Such a result as they (defendants) desired, was bound to come sooner or later, for the assessment must be put upon a more secure basis. He felt that the ground he had now taken was to be sustained, and there was no doubt the influence of this trial would reach further than might be expected, for if the Municipal Council waited a little longer, they would receive more notices. In fact, the whole thing wanted revision, and, as he had said, placing upon a more secure and equitable foundation, in obtaining which the Court could probably help. He had not been able to present his case so shortly and so clearly as he could have wished, but the evidence clearly showed that from which the defendants were suffering, and would continue to suffer, by the present position of affairs. Whether that position was to be altered on equitable on other grounds was not for him to determine. He had no more to say in the matter.

Judgment was reserved, and the Court immediately adjourned.

CIVIL SUMMARY COURT.

Shanghai, March 22nd.

Before R. A. Mowat, Esq.

G. H. Thompson *v.* W. Peck.

This was an action to recover $82.60 for wages and money supplied. Defendant denied his indebtedness, stating that he and the plaintiff were partners in a butcher's business—plaintiff being the managing partner. The profits were to be equally divided. Plaintiff kept the books, and made out the accounts; and had collected debts from various persons, but had produced no receipts.

Plaintiff said that he was going to start in the same kind of business with a Chinese, but was afterwards induced to join the defendant, and abandon the Chinaman. He and the defendant commenced business on the 1st December last, in the Kiangse road, upon terms of partnership agreed to verbally between them, and they had traded together until a short time ago. Defendant had some porkers and sucking-pigs, which he was to put into the business; and the books would show that close on 4,000 lbs. of meat had been sold. Plaintiff provided the "machinery," the fitting up of the hooks, signboard, &c. The profits of the trade were to be divided between them.

His HONOUR—It is quite evident, then, that you, being a partner, cannot sue for wages.

Plaintiff—But he turned round upon me, said I was only a servant of his, and ordered me away from the premises several times. I went away on Saturday evening week. If I am a partner, I want the books produced, as I know there must have been profits made. We did not strike a balance at the end of the first month, because defendant said "let it run on for two or three months." There were no profits at the end of the first month, but in the second month we began to open up a trade. I never could get a chance to look over the profits, as defendant said I was only a servant, that the premises were his, and that I had nothing to do with him in any other way. Several times he has kicked open the lid of my chest, took out money and bills due and made away with them.

Defendant denied these assertions, and accused the plaintiff of nearly similar conduct. There was only only a verbal agreement between them. He (plaintiff) told him he had $200 in cash, and the books would show there were 2000lbs. and not 4000 lbs. of meat, which he (defendant) had put into the business, sold. Plaintiff was indebted to several persons. To one West he owed $70. West became a customer, and stopped half the amount of his bill for the plaintiff's debt. Several others of his bills were also paid in the same way. Plaintiff had never before asked for wages. On Saturday evening week, while he (defendant) was a "little drunk and asleep," plaintiff left the premises, taking with him one of the books, all the unpaid bills he could find, and the money he had collected. He found him in French Town, knocked him down, and with assistance got the book and $15 from him; but, thinking he would be "hard up," gave him $3 of the money back again. He had trusted the plaintiff to the fullest extent, and in return was treated by him very badly; and, instead of making profits, had been run by him over head and ears in debt, for which he (defendant) was expecting to be sued.

Plaintiff said all the money he collected he handed over to the defendant, and did not know what he had done with it.

His HONOUR did not think he could make anything of the case. The claim for wages could not be sustained, because plaintiff was a partner, and it appeared from the defendant's statement that no profits had been made out of the business.

Plaintiff said he knew there must have been profits made; and he would have the books "arbitrated," as there were more than $400 due.

His HONOUR asked what books had been kept.

Plaintiff replied a ledger, bill-book, and expenditure-book.

His HONOUR adjourned the case till the afternoon, for the production of these books; but on their being examined, they were found not to be understandable. It was, however, apparent that the defendant had put the 2,000 lbs. of pork into the business, at 12 cents per lb., and it did not appear that money enough had been got in to pay for that even, independently of the outside bills that defendant had to meet.

Judgment for defendant.

F. MAWHOOD *v.* H. NETHERSOLE, jun., and C. EDBROOK.

This was an application for the discharge of Nethersole from the receivership of debts due to the late firm of Edbrook and Mawhood.

It was stated that Nethersole was ill in hospital, unable to perform his duties; and, after some conversation, it was arranged that the remaining debts, amounting to about Tls. 900 (some of which were, however, believed to be bad), should be collected by Mr. Edbrook, on joint account, at the same commission as that charged by Nethersole.

Costs to come out of the estate.

March 23rd.

Action to Recover Professional Fees.

H. BROUGHAM MILLER *v.* E. BELBIN.

Plaintiff sued to recover Tls. 50, as fees for professional services.

Defendant said he did not owe the plaintiff a *cash.*

Plaintiff, who had stepped into the witness box, asked that witnesses on both sides should be sent out of Court.

His HONOUR—Presently. I see from the summons that the claim is in respect of "professional services"—is that as a lawyer?

Plaintiff—Yes.

His HONOUR—How do you get over the difficulty of a barrister not being able to bring an action for his fees?

Plaintiff—I am an attorney; Sir Edmund Hornby described me as such, in an order applied for the day before yesterday by Mr. Wainewright; and I am practising as an attorney.

His HONOUR—And you wish me to take it that you are an attorney?

Plaintiff—Yes, of course; and if you will swear me, I will swear that I am.

Plaintiff was sworn accordingly.

His HONOUR—Are you a barrister-at-law?

Plaintiff—Yes, in England.

His HONOUR—Well, you cannot be barrister-at-law and attorney as well, can you?

Plaintiff—Are you Counsel for the defendant, or are you not? Why not let me make my statement?

His HONOUR—It will save time if I tell you my impression is ————.

Plaintiff—I do not want to know anything about your impression. *We* want the law of the case.

His HONOUR—My impression is that as a barrister is, in England, unable to bring an action to recover his fees, so you here are equally unable.

Plaintiff—It is filed in this Court that I am an attorney—and practising as an attorney. As being so, I can sue.

His HONOUR—Are you alluding to the matter that you have already mentioned as occurring the other day?

Plaintiff—I am alluding to the order which Sir Edmund Hornby made upon me, on the application of Mr. Wainewright. The order, I say, describes me as an attorney, so I must be one.

His HONOUR—That was subsequent to the time when you rendered the services for which you sue; moreover, it cannot bind the present defendant. Were you ever admitted an attorney?

Plaintiff—No, I was not. I have, however, been treated here as an attorney, and have practised in these Courts as an attorney. The thing would be different in Hongkong, where barristers are barristers and attorneys are attorneys,—but here they are barristers and attorneys too. It was originally so in Hongkong, but subsequently altered, and now a barrister there cannot do an attorney's work, nor an attorney a barrister's. Before they could do both, same as here now.

His HONOUR—That has nothing to do with the case here. I do not know what they can or cannot do in Hongkong. I must ————

Plaintiff—It does matter, Sir; whether you know it or not. If you will not hear me, of course there is an end of the case; but I would ask, how is it that an attorney can plead here in an equity court, before the Judge, when he sits in equity? The practice here makes a man a barrister and an attorney at the same time.

His HONOUR—The difficulty is not as to the practising—it is, whether being a barrister, though acting as a general practitioner, you can sue for your fees.

Plaintiff—That is the difficulty, and I know it. And if this is passed, the next thing they will do will be to cheat the attorneys. If the attorneys—

His HONOUR — If that point arises, then will be the time to deal with it.

Plaintiff — But if an attorney can act as a barrister here, why not a barrister as an attorney? I think I am admitted here as an attorney in the rules of the Court. Sir Edmund Hornby has power to do that, under a certain rule,—I cannot remember which rule it is.

His HONOUR—But his or your mere description of yourself as an attorney, will not alter the fact of your being a barrister. The question is, can you, being a barrister, recover your fees? In England you cannot, as you yourself must admit, do so. There is no doubt you can practise here as an attorney, but that of itself does not give a right to recover fees. I must say I think it is a very hard case, and moreover an anomalous state of affairs that a solicitor can act as a barrister, and recover his fees in both capacities, while a barrister is not able to recover. But I cannot see any way to helping that.

Plaintiff—I do not agree with your points of law, but I suppose I must abide by them.

His HONOUR—Unless you can show me some authority or some precedent.

Plaintiff—I cannot show you any precedent.

His HONOUR—I will adjourn the summons if you like, to give you time to look.

Plaintiff—I do not want that at all; but I would like to have the judge's order produced, in which I am described as an attorney. I mean the order taken out by Mr. Wainewright. There I am described, rightly or wrongly, as an attorney, and I say I am an attorney.

His HONOUR—Oh, no.

Plaintiff—Then the order was wrong?

His HONOUR—It does not follow that, because it is there stated so, it is so. I am sorry that I must decide as I do, for it is very hard, if a man does work, that he should not be paid for it. You can take the Judge's opinion on the matter if you choose, by way of re-hearing.

Plaintiff—No, I do not want that. I should have been saved a great deal of trouble if I had only known this before.

His HONOUR—This is the first time it has been before me. I could not entertain the question until it was brought here. I have taken some trouble in looking over the authorities, to see if I could find one applicable to your case, but I could not. I will only add that if you did work for the defendant, it is most discreditable in him to refuse to pay you.

Plaintiff—If you decide you cannot hear me, I cannot go on; but your decision will be without costs?

His HONOUR—Except cost of summons, which you have paid.—I may remind you that, even if you could sue as an attorney, you would fail at present, as the month that must elapse between delivery of the bill and the action has not elapsed—the summons stating the service to have been rendered on the 2nd March.

Judgment for defendant.

POLICE COURT.

Shanghai, March 18th.

Before R. A. Mowie, Esq.

R. *v.* PETER POWERS and JOHN HILL.

Drunk and Disorderly.

Defendants who were charged with being drunk and creating a disturbance in Hongkew last evening, admitted the charge.

Powers was fined $0.50 and Hill being the most violent was fined $5.00, and ordered to pay 25 cents for the repair of door that he had damaged.

March 24th.

Reg. (R. TURNER) *v.* W. ROBERTS.

Complainant stated—I am employed by the proprietor of the Astor House. I reside at No. 9, Hongkew Bund. On Friday, at 7 a.m., defendant and some others were passing, and I heard a great noise with dogs. I looked out and saw defendant poking with a stick under the platform of my verandah, at a small black dog belonging to me, and endeavouring to set a bull-dog upon it. I called out, and asked what he meant. He replied that the dog did not belong to me, and when I assured him that it did, he called me a ——— liar. He then called his dog and went away.

Defendant denied the charge, and said that he was walking past complainant's house, when a number of dogs rushed out, barking, which attracted the dogs that were with him and his friend. There was a bull-dog with them, but it did not belong to him. The bull-dog, not liking the reception given him by the black dog, took hold of him. He (defendant) separated the animals, not with a stick, but by throwing a stone at them.

Complainant wished to call two Chinese as witnesses, but as an interpreter was not available at the moment, they were not examined.

Defendant called Mr Holmes, who stated that there were words on both sides, but that he did not stop to hear the end.

His WORSHIP expressed himself satisfied that there had been improper language used by both parties, and, therefore, dismissed the summons.

COMMERCIAL INTELLIGENCE.

SHANGHAI, MARCH 24th, 1875.

Arrivals from Europe, since this day-week, are the s.s. *Patroclus, Lotus,* and *Khiva,* the last named bringing the London mails of 5th ultimo.

Telegrams.—By Reuter's last—*Lead,* W.B., had declined to £22, 10s. and *Iron* to £10. *Mid. Or. Cotton* and 8¼-lbs. *Eagle Grey Shirtings* were quoted 8⅛d. per lb., and 9s. 9d. per piece.

PIECE GOODS.—The natives affirm that the Tientsin *Li-kin* trouble is not yet removed, but foreigners at that port advise a good demand for most kinds of Grey Cotton Goods, and report sales of *Jeans, T-Cloths,* &c., at better prices. Moreover, the Northern men stationed here have been enquiring after such articles within the last day or two, and heavy transactions in *Jeans* and *Drills,* (of T-Cloths there are few of the desired qualities in stock) have been booked. The natural inference from this rather anomalous state of matters is, either that the native dealers have been making the most of the occasion, or that they, specially, are the objects of Taotai Sun's persecution. Indeed both these conclusions are borne out—the first by the business going on at Tientsin and on this market, and the second by Sun's proclamation, No. 3, which, for the sake of continuity, we reproduce here.

Tientsin, March 17th, 1875.

Sun, *Customs Taotai, &c., &c., issued the following Proclamation:—*

After duty has been paid at the Foreign Custom House by Chinese merchants on their native goods imported per foreign vessels, the triplicate Certificates then given should be taken the same day to the native Revenue office for payment of the taxes there. Such is the Regulation, as established by H. E. Chung-how, ex Superintendent of Trade, after a Memorial to the Throne on the subject, as stated in my previous Proclamation.

Of the above-mentioned stamped triplicate Certificates, *one* is handed to the merchant, that he may repair with it to the Revenue office; *one* is retained on file for reference in the Foreign Custom House, and *one* in the Customs Taotai's Yamên.

Now, from the month of July last to the time when the river closed, there were filed over 1,000 Certificates, of which entry had not been made at the Revenue office. No wonder the receipts of Revenue last year were so small and the total deficit so unusually large!

Those who evaded the taxes during those 6 months are liable to punishment according to law; but, out of compassion for the merchants, this penalty is graciously remitted. But in order that any hope to continue former practices may not be encouraged, explicit rules have now been made.

On the 22nd day of March, a reliable deputy will be sent from the Revenue office, provided with a file of Triplicate Certificates, and he will visit each merchant to compare these certificates. If it is found that the taxes have been paid either by the merchant or his broker, the Certificates will be cancelled and no further taxes required on them. By the 27th March, all goods upon which taxes have not been paid, must be reported for payment of such arrears. Penalties will be imposed upon those who do not report within this fixed time. This arrangement must be regarded as [illegible] favour. Punishment incurred for past evasions of the taxes is remitted, and goods which have already paid the taxes need not pay again. The examination now to be made, and the time allowed for payment of arrears, is no small privilege.

If any merchant persists in practising evasion or concealment instead of forsaking his errors, thus making light of what pertains to Public Revenue,—such an one will be made to feel the rigor of the law and have no clemency shown him.

And that there may be no excuse for want of forewarning, this Proclamation is now issued for the information of all merchants, who must

Tremble and obey! &c. &c.

Better news also has come from the river ports. The Hankow market reports last received say that "the demand has run almost "exclusively on *Grey Shirtings* during the last fortnight, and large sales have been made at former quotations for the commoner makes. "Heavy Shirtings are scarce, and have advanced in value. Other imports are dull of sale." With reference to the latter sentence, the foreigner is again late. There have been buyers on this market for some days past of 15-lbs. *Drills,* and ordinary Mexican 7 and 8-lbs. *T-Cloths* from the upper Yangtsze districts, and the trade demand from thence has somewhat stiffened the rates for common to good medium 8¼-lbs. *Grey Shirtings.* At Chinkiang the importations during the past week had been large, but not in excess of requirements; and from Chefoo, I am advised that the prospects for Cotton manufactures are improving. But in Japan there was scarcely any business in imports going on when last steamer left, and prices were altogether nominal.

On the Shanghai market.

Grey Shirtings of all weights have been in steady request, and holders of common to medium qualities of 6, 7 and 8¼-lbs. have succeeded in most instances in establishing higher rates, and quotations for the better to best descriptions have been maintained. A further rise in the value of the more ordinary makes of *heavy goods* has taken place, and the tendency of the market for all grades is still upwards; sales to arrive of cargo close at hand being practicable at comparatively high rates. The business of the week embraces—6-lbs. common at Tls. 1.30 *a* 1.32; Medium, to arrive and in stock, at Tls. 1.33 *a* 1.34, the latter rate for Dewhurst's *Red Pheasant.* Sales—26,000 pieces; 7-lbs. Collies' *Lion* and *Eagle* with all faults at Tls. 1.46; Dewhurst's *Red Pheasant* at the same figure, and more ordinary cloth at Tls. 1.40 *a* 1.43 per piece; 8¼-lbs. Common, at Tls. 1.62 *a* 1.63; *Lie Eagle,* at Tls. 1.63½ *a* 1.64; *Green Globes,* at Tls. 1.64 *a* 1.65; *Dog* chop, double *Peacock* and others, at Tls. 1.70 with all faults; Jinkee *stag head,* at Tls. 1.75, and Collies' *Lion* on bale at same rate. Dewhurst's Eagles, at Tls. 1.90 *a* 1.95 per piece. *Tun Sin* Eagles J. A. were yesterday disposed of at Tls. 1.95, and that figure was refused for unlettered goods, same hong stamp. Sales, 55,000 *a* 60,000 pieces; 8¾-lbs. *a* 9¼-lbs. at Tls. 2.15 *a* 2.40 per piece, and 9¾ *a* 10-lbs., principally to arrive, at Tls 2.65 *a* 2.70 for common to good, and Tls. 2.75 per piece for Dewhurst's *Eagles.* Sales estimated at 12,000 pieces. The market for all closes firmly at quotations.

White Shirtings.—64 and 66 Reeds were neglected until 22nd instant, when a faint enquiry sprang up, and a few trifling parcels were booked, at prices that do not compare unfavourably with those previously ruling.

T-Cloths.—The recent arrivals brought supplies of the Common counts of 6 and 7-lbs., most of which, however, were sold for arrival, and these are now being resold at a profit. The sales from first hands of Mexican descriptions likewise show an advance, and that the position of 8-lb., 36 inch Cloth is strong, may be inferred from the fact that there are buyers of floating cargo (which cannot be here in less than three weeks) at present currencies. Stock 8-lbs. command a candareen per piece more than they did on this day-week. Total sales from first hands computed at 42,000 pieces.

Drills.—Enquiry for *Drills* continued slack until Monday last. On that day, however, the river news—native—started buyers, and settlements at prices previously unattainable were effected. Yesterday, further sales took place, and 14-lbs. were also taken in heavy quantity at full former quotations. The total business in 14 and 15-lb.—chiefly *English Drills,* amounts as reported to 26,000 pieces, at Tls. 2.37 *a* 2.39 for Common 15-lbs., and Tls. 2.27 for Dutch and Tls. 2.30 *a* 2.32½ for 14-lbs. English. Resales of Dutch—*Cock* chop—at Tls. 2.29, less brokerage, have been made by natives to natives.

Jeans.—The business reported on the market is very trifling in extent, but it has been large nevertheless, and it embraces both hard and floating cargo, at figures that compare well with those of former sales. Moreover, I am told by other holders that they have been offered from 1 *a* 2 candareens per piece higher than they could have got last week, but that—in the expectation of a further advance—they declined to sell. Current rates are Tl. 1.85 per piece for a fair to good cloth, and Tl. 1.86 *a* 1.87 for rather better. The best qualities have not yet been asked for.

Sheetings.—One sale of 1,500 pieces 15-lb. English, at Tls. 2.90 per piece.

Fancy Cottons.—Very little life in this market, and the business of the week is hardly worth particularising. The only sales reported are 500 pieces *Gentian Shirtings*, at Tls. 2.50 per piece; 400 pieces 50 yards *Printed Cashmeres*, at Tls. 4.90 per piece; 1,000 pieces *Chintz Muslins*, at Tls. 0.74 per piece; 1,300 pieces common red *Chintzes*, at Tls. 1.30 *a* 1.31 per piece; 240 pieces *Mohamedan Cloths*, at Tls. 0.13½ per yard, and a few 18-in. *Velveteens*, at Tls. 0.14 per yard; and blue printed *T-Cloths*, at Tls. 3.27½ per piece.

Woollens.—Neither is there much to be said in reference to these, saving, perhaps, that there has been rather more demand for *Spanish Stripes* and ordinary quality of *Medium Cloths*. The former article, too—or rather special chops of it—is rather higher in value; assortments of C.P.H. having realised Tls. 0.59 per yard. *Long Ells* are again lower in price, and the enquiry for *Camlets* seems to have closed at the beginning of this week. In *Lastings*—black—there has been a little business at Tls. 11.65 per piece for best, and Tls. 10.30 *a* 10.40 per piece for inferior; and some low qualities of assorted *Figured Orleans* have changed hands with very unsatisfactory results to the sellers.

METALS.—*Nailrod Iron.*—The position of the market is unchanged, and no further sales are reported, notwithstanding considerable anxiety on the part of importers to reduce their stocks of common and ordinary brands, which continue in over supply. *Lead*—Demand from the native trade continue slack, and sales are on a very small scale. Holders, however, are firm, and have maintained Tls. 6.1.0 as the rate for hard stock of L.B. The recent shipments to HANKOW have overstocked that market, and brought about lower prices, and fears are entertained for the results of the unsold portion of the late re-exports to FOOCHOW. Most other *Metals* show a quiet market and lower prices.

COTTON.—Quotations have been steady throughout, but at the close they are rather weak, owing to the lower rates that are advised from Hankow. The business of the past week is comparatively light.

EXCHANGE.—A fair amount of Bank paper has been placed for the mail at 5s. 9¼d., at which figure the rate closes. Credits have been sold to Banks at 5s. 9½d. *a* 5s. 9¾d., and Documentary, at 5s. 9¾d. *a* 5s. 9⅞d. On India, rates are weaker—Rs. 307 on Bombay, and Rs. 308 on Calcutta, being the closing quotations. On Hongkong, the Banks still quote 27¾ per cent.

EXPORTS.

TEA.—Export to date, as compared with that of last season, is:—

To Great Britain—Black	Excess	6,405,452 lbs.
,, ,, —Green	Excess	2,008,787 ,,
To United States—Black	Excess	1,042,788 ,,
,, —Green	Deficiency	3,191,233 ,,

Shipments to date have gone forward as under:—

To Great Britain (per Steamer)	52,371,911 lbs.
,, ,, (per Sailing Vessel)	24,368,632 ,,
To America (per Steamer)	11,506,690 ,,
,, (per Sailing Vessel)	7,242,836 ,,

Black.—The season is closed.

Green.—The enquiry mentioned in last report has continued, and settlements have been considerable during the fortnight. Prices for good and fine chops have again ruled firm, and in some instances a distinct advance has been perceptible. Low classes have been taken here and there at very low prices, but there is not any great desire to operate in these kinds. The few Pingsueys now left are rather firmly held, and buyers do not seem willing to pay the prices asked.

Our stock is now small as the figures subjoined will show.

		Stock,	Against 1874.
Settlements—Fychows, Moyunes etc.	23,585 ½-chests.	14,300 ½-chests.	1,380 ½chests.

	158,185,754 lbs.	139,455,184 lbs.	144,558,872 lbs.

SILK.—The last public telegrams from London report the silk market quiet with but little enquiry, and quote common No. 5 Tsatlee at 12/3 per lb.

The settlements for the French mail of the 19th inst. were about 800 bales, which however included no well-known chops, and consisted principally of common Tsatlees at Tls. 255 @ 275 per picul, coarse Taysaams at Tls. 230 @ 240, and common Long reel Taysaams at Tls. 230 @ 235 per picul.

Purchases during the past week have reached about 900 bales, giving a total of 1,700 for the fortnight. "Cock and Worm" chop No. 3 is reported taken on joint account at Tls. 390 per picul; "Gold Lion" Nos. 3 and 4 at Tls. 330 and 310; "Grasshopper" at Tls. 332½; "Blue Elephant" at Tls. 320; "Beautiful Woman" No. 2 at Tls. 315; Fatmow's "Che ling" Haining at Tls. 302½, and market Tsatlees at Tls. 270 @ 280 per picul.

The unsold stock is estimated at 1,300 bales, half of which nearly is composed of re-reels.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods for the week ending 22nd March, 1875, compiled from the "Customs Daily Returns," Nos. 58 @ 63, both numbers inclusive.

* Exclusive of import cargoes ex *Glenartney, Foochow, Avoca, Diomed, Iraouaddy, Khiva, Lotus, Patroclus,* several Coasters, and of sundry re-exports.

COMMERCIAL POSTSCRIPT.

March 25, 1875.

Arrivals.—March 20th, British ship *Champion of the Seas*, from Cardiff; 24th, British steamer *Glenfinlas*, from London.

Departure.—March 18th, British ship *Omba*, for London.

The English mail steamer *Avoca* takes about 600 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 9d. *a* 5s. 9⅛d. First-class Credits to Bank, 5s. 9¾d. First-class to Private buyers, 5s. 9⅛d. Private and Documentary, 5s. 9⅞d. On Paris, Bank, Frs. 7.27½. Private, Frs. 7.35. On India—Bombay Bank, demand, Rs. 307, noml. Calcutta Bank, Rs. 308, noml. On Hongkong, Bank Bills, demand, 27¼ per cent. discount. Private, 15 days' sight, 27⅜. Gold Bars, Tls. 171.25. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 73.25 per 100. Carolus dollars, Sh. Tls. 80.40 per 100. Copper cash, 1,580 per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

H. & S. Bank.—A limited business has been done during the week at 15 % *dis.* and Exch. 72¼ for cash and 31st instant—chiefly to cover previous short sales. At the close, shares are scarce.

S. S. N. Co.—A forced sale on the 18th instant caused a drop in prices to Tls. 76 cash, but a recovery soon took place, resulting in a considerable business at Tls. 78 *a* 79 cash, Tls. 79½ *a* 80½ for April, and Tls. 81 *a* 82 for June. The market closes with no shares offering under Tls. 80 *cash.*

Fire Insurance Shares.—A fair business has been done in *Chinas* at $133. *Victorias* and *Hongkongs* are obtainable at $126 and $485 respectively.

Marine Insurance Shares.—A few *Yangtszes* have changed hands at Tls. 585, and are still obtainable. *China and Japans* have been placed at Tls. 83 for June.

Shanghai & Hongkew Wharf Co.—Sales have been made at Tls. 100 cash, and latterly at Tls. 101 for July.

Chinese Imperial Loan, closes at £99 firm.

The Weather has been fine during the week; the wind has been blowing strongly from the South, with a bright blue sky. The thermometer has ranged from 38 to 67, and has been rising gradually the last few days.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, APRIL 1, 1875.

IT is a good maxim to learn to walk before we venture on running, but, unfortunately, it is a maxim which has too frequently been set at nought in our operations in China. We have been too apt to introduce, all at once and in their entirety, the arts and appliances to which we have been accustomed in Europe, and too often find, after we have exhausted our own pockets and the patience of our friends, that, at the moment when success was possible, we have been forced to give way, to the loss not only of ourselves and those connected with us, but to the lasting hurt of the cause of real progress. If we look over our undertakings, we may readily recognise the fact. Many persons in Shanghai will remember under what favourable auspices the scheme known as the Shanghai Wharf started, and a good many more will remember how it collapsed, having exhausted its capital and being obliged to go begging for loans. More fortunate than some of its rival schemes, it was eventually able to wind up, having discharged its whole liabilities, and actually returned some 22 taels on each thousand tael share. The Shanghai Wharf was, however, founded on sound principles, as the success of the wharves since started has shewn. Only, it was a little before its time. Had the shipment of cotton to Europe, which was the great feature of the years 1862-64, continued, the shareholders would, doubtless, notwithstanding the inconvenient position of the wharf, have been earning large dividends. Cotton was not, however, to continue as a staple of export, and Shanghai fell on evil times, so the Wharf had to follow the example of many other equally well-founded schemes, and collapse. We have the same remarks, in nearly the same words, to make about the attempts to start silk filature and bean crushing with machinery. It is somewhat difficult to understand why the filature did not prove an industrial success. Difficulties, doubtless, existed in the distance from the silk-producing districts, and in the foolish prejudices of the Chinese producers, worked on by those who conceived that a too close and early contact with the foreign buyer would injure their trade. Both these difficulties, it was generally believed, had been in a great measure surmounted, and more recently, we learn that discoveries in silk culture have enabled cocoons to be kept an almost unlimited time before reeling. The latter is a most important element in calculating the success of such an undertaking, for the great difficulty in the original filature was that, for a short time, when skilled labour was scarce, a large number of hands had to be taken on, to be thrown idle again as soon as the supply of cocoons was exhausted. The filature thus interfered to a considerable extent with the ordinary division of Chinese labour, whereas, could a method have been adopted of keeping over the cocoon safely till labour was slack, it would have acted rather as a regulation, and supplemented instead of interfering with the native processes. The bean crushing machinery set up at Newchwang, seems to have erred mainly on the score of being too extensive for the first initiation of a profitable industry. The means of carriage are so very limited that, although beans can be grown in Manchuria in excess of any practicable demand, their delivery is strictly limited by the means of carriage at demand. It is needless to say that, of all things in the world, a good road is most inimical to the tendencies and policy of the present Government of China, which has, as a settled policy, undertaken to repress the intercommunication of the people. So long as they were kept

apart, the task of Government seemed easy. *Divide et impera* was its established motto, and hence, with a perverse ingenuity, everything, even to the least detail, was made to fit in with this principle. Those who cannot see the drift of the present Government of China, wonder at the persistence with which exactions on trade are kept up so long, after their economic failure has been proved to demonstration. But, more even than national bankruptcy, the State traditions fear the intercommunication of classes. All through Chinese policy, the same influence is manifest. A magistrate cannot hold rank in his own district, in order that he may be cut off from private ties. He should not remain more than three years at his post, lest he should form local connections. Union amongst officials is not encouraged, in order that one may be used as a set-off against the other. Every district is autonomous, and has only to obey the orders of its immediate chief; no general law or recognised universal custom exists, whereby each may work in harmony with its neighbour. Such is the principle of Peking Government; and following it up, it need excite no wonder that, while no new roads are made, those that do exist are allowed to lapse into ruin. Imitative as are the Chinese, it is only natural that this policy on the part of their Government should have more or less penetrated amongst the people. No scheme excites more opposition than that which seems to interfere with the vested interests of those who are concerned with the present state of affairs. Villages exist on the Yangtsze, whose means of living are derived from the plunder of wrecked junks, and their vested interests are held sufficient to prevent the most simple appliances for the assistance of vessels being used. It is only within the last few years, and with a half-heartedness difficult to comprehend on any other supposition, that steps have been taken to put down piracy on the coast. Here, however, the memory of Cheng Ching Kung and his fleet of war junks, remained to point out the danger of permitting piracy to flourish without impediment. Did only the trader suffer, piracy might continue unmolested; but there was danger of piracy leading to revolt, and that was an event to be deprecated.

It was this great difficulty which stood in the way at Newchwang. Had it been possible to make arrangements with the growers of pulse in the country, the oil machine would probably have turned out a success. Without adequate means of communication, such an arrangement was not practicable, and the native dealers in oil and beancakes at Newchwang held the trump card in their hands. However profitable, eventually, the improvement in the manufacture would have turned out for themselves, there was an immediate possibility of the loss of a profitable monopoly; and as the promoters of the mills were not in a position to take this monopoly in the flank, they eventually succumbed before it. We do not certainly affirm that, had the enterprise been undertaken on a less scale, it would have proved more successful, but there is every probability that it would. The first beginnings of success would have had a tendency to attract to its side the native element, and this once gained, the road to eventual profit would have been the easier.

Summary of News.

The French mail of the 12th Feb. arrived on the 30th, by the M. M. str. *Peiho*.

A mail left for America on the 30th, by the P. M. str. *Oregonian*.

A mail leaves to-morrow for Europe by the M. M. str. *Iraouaddy*.

The following Reuter's telegrams have been received during the week:—

It is now announced that the Prince of Wales will not visit India in November.

A strike at Dewsbury has been settled.

The French Assembly has adjourned, the question of dissolution being unsettled.

Bishop Munster imprisoned.

The Prussian Chamber has disendowed Bishops.

Pathfinder won the Great National.

Obituary—Mr. Mitchell, the Tipperary member.

The annual general meeting of the Shanghai Cricket Club was held on the 24th ult. The statement of accounts showed that the Club was not so flourishing pecuniarily, as it might be; and it was resolved to authorise the incoming Committee to ask the Recreation Fund Trustees for a gift of Tls. 500 towards the general improvement of the ground. Some other subjects were also discussed, in connection with the ensuing season's campaign; and the following were elected as the Committee for the year, Messrs. Tate, St. Croix, Souper, Scott, Caldbeck, Anderson and Hamilton.

The annual meeting of shareholders in the Chinese Insurance Co. was held in Hongkong on the 25th March. The Report shows that the net premia taken during the year (after a return of 33⅓ per cent.) amount to $237,541. The losses sustained, however, have been so severe that no dividend is to be declared. It is hoped that the eventual out-turn will show a small profit on the year's working.

The weather has not been fortunate for the Easter holidays; and men who went up-country Thursday night, relying on the fine weather then prevailing, were badly disappointed. The wind worked round to the South East on Friday, and rain began to fall on Saturday morning, continuing in heavy showers throughout the day and night. Sunday was still disagreeable, though less wet. The wind had worked round to the North-east, and blew strong and cold, with an occasional drizzle.

A prospectus has been issued of a Water Works Company which proposes to take up the very necessary project of supplying the Settlement with pure water. The projectors purpose taking water from the Hwangpoo, at a point below Dow's Wharf. The proposed capital is Tls. 30,000, to be raised in 300 shares of Tls. 100 each.

It is said that M. Godeaux is likely to go home very shortly, and is to be succeeded by M. Lemaire.

The elections for the Municipal Council for the ensuing year come off on the 6th and 7th April. Thirteen candidates have been nominated, and have declared their willingness to serve if elected. We are very glad to see that there is to be again a lively contest. "Contest" is perhaps not the right word to apply to an election in Shanghai, because the gentlemen nominated do not canvas for suffrages, and consent, rather than seek, to enter upon office. But it is desirable, for the satisfaction even of these gentlemen themselves, as well as for the satisfaction of the community and the honour and glory of our Municipal institutions, that there should be more than the necessary nine names placed before the Electors. The latter can certainly not complain if there are no more, because the remedy is in their own hands; it is in the power of any two electors to nominate a qualified candidate. But it is far more gratifying to the Councillors themselves, to feel that they hold office by popular choice, rather than as a matter of course because no choice existed. In fact, we believe several of the gentlemen who have come forward on the present occasion, did so on condition that there should be enough nominations to ensure a contest. And it certainly tends to make the office more honourable, that it should be the result of real election, instead of going a-begging, as it has sometimes done. We would like to see, always, a score of nominations; and the more there are, the more ready will men be to stand. It is quite clear that no more than nine men can be elected, so some must be left out; and the more companions there are likely to be in defeat, the less hesitation will there be to incur the chance.

Advantage has been taken of the Easter holidays, to move the books and furniture of the Hongkong Bank to the new building where, we understand, business will be carried on directly.

Telegraphic communication between Shanghai and Amoy, which had been interrupted for a week, was re-established on Thursday.

The Volunteers had a very successful parade on Tuesday. An account of the proceedings will be found on another page.

On Tuesday, a strong party of seamen and marines, with band, pioneers, and a field gun, were landed from H. M. S. *Modeste*, and marched to the Race Course; where, under the command of Captain Buller, they were put through some field movements, which were performed with great precision.

We are informed that the members of the Nagasaki Rowing Club have invited the members of the Yokohama, Kobé and Shanghai Clubs to join in a friendly competition at a Regatta in Nagasaki, during the first week in May. The race to be rowed in

Canton fours, without sliding seats. We hear that the invitation is to be accepted by the S. R. C., and that the selection of a crew is going on. As the date fixed for the race is "Race week" in Shanghai, there should, we think, be no difficulty about the gentlemen chosen getting away.

Another seizure of opium, alleged to be smuggled, was made on Monday night. The attention of some *lekin* runners was attracted to a jinriksha, in which a foreigner, who said his name was Walker, and a coolie were riding; and, according to Walker's statement, they forcibly dragged both him and the coolie out of the vehicle. The coolie had several balls of opium concealed in different parts of his clothing, which Walker claimed as his. All concerned went to the Central Police Station, where a charge of assault against the runners was made by Walker, and he was permitted to take the opium away with him on the understanding that all were to appear next morning at the Mixed Court. On Tuesday, the case was called on before Chên and Dr. Yates, the U. S. Assessor; but, Walker claiming to be a British subject, the hearing was postponed till next morning, when the charge was dismissed.

The talk of the garrulous frequenters of the city teashops has turned, of late, almost exclusively on the tonsorial institution. A portion of the Imperial mourning order, twenty-four days of abstinence from the razor, yet remain, before barbers can legally resume their occupation. Cases are imagined and reported daily, of this or that person incurring the penalty. A proclamation makes this one thousand blows as regards unprivileged persons, and degradation or fine as regards persons of literary or official rank. No case of severe beating is reported, and some cases are said to have been dismissed by the magistrate with a reprimand. Field-labourers are commiserated, for they more than others complain of the aching from which they suffer when unshorn, until the hair attains considerable length. As natives living in the foreign Settlement are generally found shorn, the mandarin runners in the City are often perplexed when they see a well-dressed fellow, whose head is clean shaved, whether to seize him or not. When they are sure that it is a City man who has thus offended—and multitudes do offend, encouraged by the immunity that is extended to our native fellow-residents—they easily mulct him on the spot, offenders always preferring summary street justice to an interview with the magistrate.

We are sorry to hear that the steamer *Yuen-tze-fei* has been lost near Amoy.

The *Singapore Times* brought by the French Mail gives some intelligence concerning the loss of the steamer *Hongkong*. "The disaster occured in the Red Sea, about 1½ days' sail past Aden, when at 5 o'clock in the morning, the steamer suddenly struck on an unknown reef within five miles of Abdel Kiab, and sank within five minutes afterwards. The boats were lowered, and every effort was made to save the passengers and crew, but we regret to learn that a Mrs. Walton, with five children, passengers for Yokohama, who had got into a boat, were carried down with the ship while the boat was still hanging to the tackles, and never seen more. The first officer and seven men went down in the same boat, and the captain, who was also in this boat, saved himself by swimming. All the boats that got away from the ship arrived safely at Aden; but we regret to learn that some of the crew are still unaccounted for, and must have gone down with the ill-fated ship."

In our shipping reports will be found the particulars of an unknown reef, discovered by Captain Bryant of the American barquantine *Samos*, from Newcastle, New South Wales. From observations taken, the reef is situated in Lat. 10.37° N. and Long. 141.50° E., in the vicinity of the Caroline Islands.

The *Kanagawa Maru* met with an accident during her passage from Nagasaki to this port. Off the Amherst Rocks, she broke her shaft, of course rendering the engines useless. Sail was made, and the steamer reached port Saturday, and was towed to Tung-ka-doo Dock the next morning, for the necessary repairs. These will of course occupy some time, and throw her out of her turn on the line. The *Takasago Maru*, which is due here on the 1st April, will therefore be turned round and despatched on Saturday the 3rd.

The steamer *Glenfintas*, having damaged some of the blades of her propeller in the Suez Canal during the passage out, has, to avoid the expense of docking, been canted at the Hongkew wharf sufficiently for the necessary repairs to be made.

In the present year there will be two eclipses of the sun. The first, on April 6, a *total* eclipse, invisible at Greenwich, begins at 3h 38m Greenwich mean time, in long. 35° 14′ E. of Greenwich, and lat. 33° 4′ S. and ends at 9h 16m a.m. in long. 134° 19′ E., and lat. 25° 27′ N. Visible in South Africa, India and China. At the Cape of Good Hope the sun will rise partially eclipsed, and at the most Northern parts of Australia, simple contact only will take place shortly before sunset. The second, an annular eclipse will take place on the 29th September, and will be visible in North America, South of Europe, and Africa; invisible in Australia.

The "Translation of the Peking Gazette for 1874," just issued from this office, is, as usual, a reprint of the translations published from week to week in the *N.-C. Herald*. This is the third volume of the series, and has the advantage over its predecessors of an elaborate index, which will inmeasurably increase its value for reference. The index is divided into six chief heads—such as Court Affairs, Judicial and Revenue, External Relations, &c., &c.; and these again are sub-divided under minor heads, such as Audiences, Appeals, Corea, &c.; so that any important edict or memorial can be easily traced. An article on the status of the Gazette, published last autumn in the *China Review*, forms an appropriate preface.

The Peking Gazette of the 4th March contains a memorial from Shen Pao-cheng and the Authorities of Foh-kien, asking that certain restrictions on emigration to, and trade with, Formosa be removed. An edict granting the request was published on the 15th February. The memorial is sensible and interesting.

The Peking Gazette of the 6th March contains a sensible protest by the late Viceroy of Nanking, against a proposal by the Censor Hu Ting-kwei to raise funds for repairing the banks of the Yellow River, by issuing 200 extra salt licenses. The Viceroy pithily suggests that, if there were an opening for the sale of the salt, the idea would be a useful one; but the secret lies rather in quickening consumption than in increasing supplies. There is already such an accumulation of salt in the hands of licensees that they have to take it in yearly turns to sell their stock; and to add more, would be to risk a deadlock. If the Viceroy had added that the abolition of the monopoly and the imposition of a light duty would be a means both of increasing revenue and quickening consumption, he would have told a useful truth.

Our correspondent Philo-Coreanus sends us another interesting letter about COREA. According to his information, the Chinese Government advised the King to make treaties with foreigners, if he were pressed to do so; and Philo-Coreanus suggests that England should try to open negociations.

By the steamer *Leeyuen* we have positive advices from TIENTSIN that the Customs difficulty has terminated. The Territorial Taotai issued a proclamation virtually promising that the new rule should be abandoned, and the merchants began opening their shops and taking delivery of their cargo; they stopped again however at 11 a.m. on the 24th, under advice that this proclamation would not actually protect them against the Customs Taotai's demand, and that they had better wait for the arrival of the Viceroy, who was expected that evening. His Excellency did arrive in the afternoon, and was at once petitioned by the merchants, in the sense of their previous remonstrance. Our latest news, dated 1 a.m. on the 26th, says that the Viceroy has given positive instructions to the Customs' Taotai, to abandon his proposed changes and revert to the old order of things.

Messrs. Spencer and Wolff write from CHINKIANG, on the 29th March, 1875: "A marked improvement has taken place in the value of Cotton goods; but it has in no way checked the demand, which still continues good. Sandalwood depressed by large supplies. Demand for iron very small."

The *Daily Press* is informed that the Attorney-General of MACAO arrived in Hongkong on the 15th instant, to contract a local government loan of $150,000 with the Hongkong and Shanghai Banking Corporation, for the purpose of reconstructing the public buildings and roads of Macao, destroyed by the late typhoon.

The *China Mail's* SAIGON correspondent writes, under date of 16th March, to the effect that Tonquin will be opened on the 1st of June, provided the Annamites do not even yet find means to postpone it. The man-of-war *Indre* was expected shortly from Tonquin. It is said that Mr. Rheinart has been designated Consul at Hue, and Mr. de Champeaux at Hanoi.

Summaries of FOOCHOW, FORMOSA, JAPAN, and HONGKONG news will be found on another page.

Editorial Selections.

THE TIENTSIN DEADLOCK.

When first mentioning the occurrence of the deadlock at Tientsin, we surmised that it could not last long, as Chinese officials usually give way when they have irritated their subjects to the point of combined resistance. The event justifies our surmise as to the facts, though perhaps not quite as to their incidence—that is to say, the obnoxious order has been virtually withdrawn, though not by the official who issued it. The first proclamation ordering the collection, in Tientsin, of the *likin* barrier dues, was issued on the 6th March, and a proclamation virtually annulling it was posted on the 23rd. The Customs Taotai seems, however, to have held out till the last possible moment—even if he has not been over-ruled, rather than given way, in the end. It was not till the Chinese traders had unanimously closed their hongs, and the Banks and Pawnshops were on the point of following their example, that the Territorial Taotai issued a re-assuring notice which seems to have restored confidence. —And the retreat seems to have been effected none too soon. A general meeting of the Guilds was called on the appearance of the Customs Taotai's third proclamation (published in our last issue), and so much alarm and dissatisfaction were expressed, that it was resolved to suspend all business till a satisfactory settlement could be arrived at. The dealers in foreign goods and Chinese southern produce accordingly closed their hongs on the 21st, and the Banks and Pawnshops had resolved to follow the example when (on the 23rd) the Territorial Taotai, Wu, stepped in to the rescue. The merchants had, it is said, petitioned this official and other high local mandarins, all of whom advised their colleague to retreat. The latter however was obstinate, and the public feeling against him grew so bitter that it is believed he could not have shown himself abroad without risk of insult, or worse treatment, from the populace. For his Order had affected not only the merchants but every coolie whose employment hinged on the commerce of the port. Every porter, lighterman and street-carrier was shut out of work by the refusal of the merchants to take delivery of their cargo, and by the general stoppage of trade. Our correspondent points out that these men are dependent, in the Spring, on their daily labour for their daily food. They have exhausted their Summer savings, during the winter; and if the Pawnshops had also closed they would have been without the last resource of the Chinese labourer. No wonder then that the feeling of irritation was great, and that riots were apprehended in case this last step had been taken. Either the Customs Taotai became at last alarmed at the trouble he had created, or the local Authorities felt obliged to step in between him and the people. The proclamation which we print on another page shows the course taken. We might almost infer from its tone that it was resolved on in general official conclave, against the will of the offender. For the language is by no means conciliatory or complimentary to that official, while all possible capital is made by the Proclaimant. "As," says H.E. Wu, "The functions of the Customs "Taotai pertain to the collection of "revenue, his aim is to make the "receipts as full as possible. But as the "functions of my own office relate to "the supervision of affairs, *my* concern "is for the welfare of the people. * * * When the deputation of mer- "chants and tradesmen came to my "yamên to solicit my services, I at once "addressed the Customs Taotai, pro- "posing that he should refrain from "enforcing the rule, and I also reported "to the Viceroy upon the extenuating "difficulties of the merchants, &c., &c." "Therefore, this proclamation is issued "to inform all merchants and tradesmen "that they must at once open their shops, "and resume business as usual. By no "means must individual doubts and "fears cause the obstruction of trade. "If, in future, Yamên subordinates or "local vagabonds should attempt any im- "position under the guise of inspecting "merchandise, you are free to come to "my Yamên and make complaint, when "the matter will be at once attended to." The proclamation was issued only just before the last steamer left, and the opinion seemed to be that it would satisfy merchants and lead to a resumption of trade. Whether or not the impression is correct, that the obnoxious order was issued with Li Hung-chang's approval, will probably appear bye-and-bye. But even if it were, it is hardly likely that he will venture to re-enforce it, in face of the strong dissatisfaction it has excited.

COREA.

Over his favourite signature of "Philo-Coreanus," our Newchwang correspondent sends us another interesting letter about the position of affairs in Corea. Our readers will remember the amusing account he gave in January last, of the warning sent by the Chinese Government, that France, America and Japan had united to attack the little country, and of the vigorous measures of defence that were immediately concerted. Some time in July, a messenger bearing a flag in one hand and a letter in the other, rode furiously to the Capital, screaming "War, War!" as he passed through the country. The warning proved to come from Peking, and was to the effect that Europe, finding it difficult to fight Corea alone, had coalesced with Japan, and the three powers named had united for the purpose of invasion. Corea was warned, therefore, to prepare, and see whether she could make sufficient resistance; if not, to make a treaty of alliance and commerce; and all would be well. The message was so remarkable, that it required all our confidence in our correspondent's sources of information, to give it credibility. That China should try to irritate Corea against Japan, at a time when she was on the point of war with the latter, was not surprising; but that even Chinese statesmen should suggest the necessity of America and France combining with Japan to crush Corea, was almost too ridiculous. However, Chinese statesmen do such extraordinary things, that one almost ceases to wonder at their eccentricities; and there certainly was some report of a joint expedition having been talked of, in Yokohama. So we set down the despatch as an ingenious effort to enlist an ally, by clothing a vague rumour in terms likely to flatter the self-conceit of the Court addressed. The effect seems, at any rate, to have been to awaken a lively feeling of alarm throughout Corea. Every man who could hold a gun was enrolled, and soldiers were posted wherever it was thought ships could come. The principal points of the coast were fortified; ditches, sown with lances, were dug across the chief lines of route; sentries were posted on every eminence along the coast; cultivation was hindered, and trade was at a standstill.

Our correspondent's present letter carries us a step further. Having made what preparation they could for defence, the Coreans appear to have sent an Embassy to Peking, to enquire into the circumstances of the threatened invasion; and the Chinese Emperor, or his advisers, are reported to have addressed the Embassy as follows:—"It is quite true that these three powers want to fight you; but if you make a treaty with France and America, Japan could not by herself declare war. It would, therefore, be a good thing for you to do; for those two countries are respectable, and I have made treaties with them myself, without suffering harm therefrom* * *. The only two stipulations they require are—commercial liberty and permision to build churches. If you can agree to that, you have nothing to fear." Marvel upon marvel! Here we have the Emperor of China holding a brief for foreigners, and advising Corea to enter into the very treaties which are generally believed to be the most aggravating thorn in the side of Chinese statesmen. Still, the advice was good, and seems to have impressed the young King of Corea; though his Ambassador uttered an indignant protest against the possibility of so civilised a State treating with outer barbarians. Our correspondent does not pretend to quote the exact words of the conversation, but believes he is well informed as to its drift; and events seem to confirm him. After the return of the Embassy from Peking, in September, the King began to withdraw the extra soldiery, and avow an intention of accepting the Chinese advice if the warning were fulfilled. If foreigners did come, none could say where they would land, and the scattered bands of soldiers would be useless. Besides, although he did not wish to treat, negociation would be preferable to war, in which a number of his people would be killed. The Peking Government advised him that he need not fear any damage on the part of Europeans; and if it were possible to preserve life while keeping Corean institution uninjured, why should not treaties of alliance and friendship be made? The conclusion does credit to the King's good sense, and if the British Minister can see his way to verify our correspondent's information, it will be thoroughly worth while to act upon his hint. It is unlikely that Corea could become a place of great trade. What information we have about the country leads us to set it down as fairly productive, but not rich. Père Regis wrote,

in the seventeenth century: "Though Corea be mountainous, it is fertile, especially the provinces of Ching-tsing, Kingshang and Tswenlo. The chief commodities of the kingdom are cotton-paper, which is strong and lasting and of a higher price than any in China; the famous plant ginseng, gold, silver, iron, the gum of a tree resembling a palm tree, with which whatever is varnished seems to be gilt; hens with tails three foot long, little horses three foot high, mineral salt, with sable and castor skins." The catalogue is not imposing, though some of the items are interesting; and the catalogue given in the *Annales de la Propagation*, of articles which the Chinese furnish in exchange for these products, at the annual fair, is scarcely more so. "Dogs, cats, pipes, leather, stags'-horns, copper, horses, mules and asses" do not form an important list. We know, however, that there has existed in recent times an active demand for cotton goods, whenever the Government has permitted their importation; and we may infer that a trade which can even exist under present difficulties, would be capable of much greater development if merchandise could be laid down by sea, instead of having to incur the expense and exactions incidental to an overland journey through the Corean Gate.

TURKESTAN.

The journey of Mr. Margary, who succeeded in penetrating alone across the Burman frontier from Yunnan, is in itself a proof of how easily China might initiate a profitable trade along her Western frontier. Chambers of Commerce at home are probably mistaken in their estimate of the importance to British trade, of having a well defined route opened from Burmah to the South-Western provinces of China. If, however, the successful opening of this route be a matter of not much moment to home interests, the same cannot be said of its effect on China. To the South-Western provinces, the possibility of an additional exit for their natural trade would be an inestimable boon. At present, they are practically shut out from the rest of the world. Chinese exclusiveness seals their Western frontier, and Chinese impositions put as practical a stop on commerce with the rest of the Empire. Geographically, they are not easily got at; many physical difficulties exist on the way, but the gigantic repressive system of China broods over all, like the Sphinx over the doomed city. What is true of Yunnan, we notice also in Sze-chuen and Kansuh. It was not without reason that the Baron von Richthoven, when at Honanfoo, felt that he stood at the gate of Central Asia. East of him lay the Yellow river, still unemployed for purposes of commerce; while to the west stretched the loess of North-China, finally to merge into the deserts of High Asia; and beyond those the fertile and interesting districts of Kashgar, Yarkand, Khoten and the other less known districts of Eastern Turkestan. Here, no impracticable passes, such as that of Karakorum, interfere to render communication impossible. The intervening district can be traversed in all directions, with no greater inconvenience than the presence of the sandy patches of Gobi; across which, at all previous periods of the world's history, it has been found practicable to establish caravan roads. Practically, these roads are no more useful for the purposes of commerce than if they had to cross inaccessible mountain chains. It is in fact easier to make one's way from India across the Himalayas, than from Sunchow to Eastern Turkestan. In the one case, nature opposes its greatest obstacles; the traveller has to journey for weeks over the snow line, through districts utterly uninhabitable for man. In the other, the restraints are mainly the artificial ones of strife and misgovernment.

For nearly a hundred years, the Chinese held nominal control over Turkestan. That is to say, they kept a Resident and a garrison at each of the chief towns; but it was well understood that the Resident should not interfere too much with the existing state of affairs. A small tribute was sent from the various districts to Peking, in return for which costly presents were distributed, while the expenses of the Provinces had to be met out of Imperial funds. Occasionally, the hot blood of the inhabitants got excited, and a general row was the result. In such cases, the usual practice of the Chinese garrison was to retire within their fortifications, and remain still till all was quiet outside. Sometimes they themselves were the objects of attack, when their chief measures seemed to have been somewhat similar. They retired within their fortresses, generally impregnable to the poorly armed insurgent troops, and waited till their opponents became reduced by internal dissensions, or had got tired of the attack. Then they issued forth, and took vengeance on all whom they could catch, innocent or guilty. Sometimes these arts were not successful, and the garrisons prepared to sacrifice, by their own act, the lives they saw were doomed. More than once or twice, whole garrisons have blown themselves up bodily, finding that otherwise they inevitably had to succumb. This was the sort of government exercised by China over Eastern Turkestan. It was neither profitable nor very honourable. Such as it was, some little trade was possible. In ordinary times, the post roads were kept open for the passage of Government couriers, and this led to opening roads generally. The Turkish tribes from the North were not, however, always very regardful of the *status quo*. A rich caravan was a rare temptation, and Chinese garrisons would not leave their forts to look after such small deer. So matters were not very prosperous, and it needed little, when the spark of rebellion was lighted, to make it flare up from one end of the land to the other. It would scarcely be conceived that, now that Turkestan is settled under an able ruler, the Chinese would care to re-establish such a state of affairs. China, however, is not the only power which holds *non possumus* as a matter of faith. There are still Ambans for the cities of Turkestan, and doubtless these Ambans have a direct interest in getting to their posts, could they only succeed in doing so. There may be Ambans, of course, as well as bishops, *in partibus;* but we would scarcely imagine that a power could be foolish enough to really injure itself in the attempt to restore them to offices, at the very best time, little more than nominal. The Ameer of Kashgar has shown himself willing to open mercantile transactions with his neighbours. It is unlikely that he regards China with any special feeling of dislike. Actually, he has never come in contact with a Chinese army. Still, the Government of Peking thinks that in some manner it is aggrieved by the presence of the Ameer in territory which it supposed was its own; and for the purpose of asserting its claim keeps an enormously expensive army at Hami, which has to draw all its supplies from Kansuh, through the Kiayu Mên. On his side, the Ameer has succeeded in pretty well establishing his power over the whole of Eastern Turkestan, to the frontiers of Kansuh. He has succeeded in getting the Tunganees—always a source of terror to the Chinese—into order, and is only anxious to develope the country which he has thus wrenched from the hands of anarchy. The way is open towards the coast. There is no practical reason why Honanfoo should not become the gateway of Central Asia, and certainly no power would gain so much from the operation as China herself. The Chinese themselves, in ancient times, advanced along the same route. Indragiri, or Indra's mountain, exists still in the corrupted forms of the Tengri Tagh and the Tien Shan, the Mount K'i of the Book of Poetry. T'an-foo, like his Grecian analogue, Danaus, watered his steeds at the streams which issued at their feet. It is certainly selfish that they should now seek to close behind them the gates through which they originally advanced to empire.

THE MUNICIPAL COUNCIL v. W. H. FOGG

The case decided last week in the United States Consular Court, is one of the most interesting that has arisen here for some years—interesting both intrinsically and because it is the first deliberate attempt that has been made to assail, in any Court, the status of our Municipal Government. It is to be regretted that the matter should have been forced to this extreme, and we sympathise with the anxiety shown by the Court that the case should be referred to another tribunal. We do not see, however, that the Municipal Council could avoid pressing it to an issue, in face of the Defendant's refusal to bring his complaint before the next Ratepayers' meeting. All the formalities necessary to the assessment of his land were observed, and ample time had been allowed for payment of the tax. Obviously, the Council would have failed in their duty, had they not pressed for payment; and we do not see that it was in their power to accept the Defendant's proposal of a compromise. With the individual hardship of the case they had nothing to do; they had simply to collect a tax which had been imposed and assessed under a Regulation and a custom of thirty years standing. And we cannot but regret that the Defendant did not think it better to appeal for relief to his co-Ratepayers, rather than assail institutions which it is the general

interest to uphold. It may be answered that the action originated with the Council, but we are sure that action would not have been taken had Mr. Twombly intimated his intention of laying the matter before a general meeting of Ratepayers. As it is, it will be a matter of general congratulation that the Court has seen its way to uphold our local constitution.

We have said that we sympathise with the Court in its anxiety to avoid deciding a case which placed it in a painful dilemma. For, as a matter of fact, the loser must in either case be aggrieved. If research convinced the Court that the Land Regulations were not legally binding, the necessity would ensue of upsetting—*quâ* American citizens—the basis of our self-government. If it found itself able, on the other hand, to uphold these Regulations, the alternative was to inflict an undoubted hardship on the Defendant. The points at issue are so well-known that it is hardly necessary to recapitulate them. Almost every land-owner in Shanghai has given up a portion of his property to form Municipal roads. The original title-deeds, however, have not been altered, and continue to exhibit the full area of the original plot. The custom has always been to assess the land tax on the area shown in the title deeds, with the evident result that land-owners pay, to the Municipality, taxes on land which has been surrendered to Municipal use. The hardship is in most cases so trifling that it is probably worth the while of few only to contest it, and of those few none have apparently cared to do so. Mr. Twombly's, however, is an extreme case The property which he represents is a corner lot, and has therefore suffered the deduction of two roads—with the result that, out of 14 mow inscribed on the title-deed, he is really in possession of only 8. It is not surprising that he should chafe at paying for nearly double the area of land he really enjoys, and we fully recognise the fact that he has always been willing to pay such a tax as appeared to him to be just. What is regrettable is, that he did not bring the whole question before a meeting of Ratepayers, and invite them to direct that assessments shall be made, in future, on the reduced and real area of properties. Such a change would not be without inconvenience. It would probably involve raising the rate of taxation, and it would unquestionably entail much additional labour in the Municipal offices—with the certain result, however, of more equable taxation. Whether the Ratepayers would think the gain sufficiently great to overpower the inconvenience, we will not venture to predict. But we are quite clear that it would have been preferable to exhaust this, and every other mode of appeal, rather than attack a system of Municipal Government which has been carefully built up, and which does its work economically and well.

It must not be forgotten, moreover, that the alternative is already open, to Ratepayers, of rectifying their title deeds and reducing the titular to the actual area. As the assessment is made on the area shown in the title-deed, the desired relief is thus at once attainable. But Ratepayers have not generally cared to do this; they prefer retaining the larger area, in view of eventualities; and Mr. Twombly especially declines to circumscribe within his compound walls a right which, he contends, reaches over the foreshore to low water mark. One cannot blow hot and cold with one breath. One can hardly claim ownership of land and yet refuse to pay for it. If one elects, for any reason. to retain a nominal ownership of land practically surrendered, one can hardly refuse logically to pay taxes upon the land so claimed. Otherwise, the remedy it is at hand—get the title-deed amended. This is one alternative. An appeal to the Ratepayers to alter the custom of assessment, is another.

Outports.

TIENTSIN.

During the evening of the 17th inst., H. E. Sun Sze-ta, the acting Customs Taotai, issued another (his third) proclamation regarding the levying of "Barrier dues" on Chinese produce 土貨 (published in the *N.-C. Herald* of March 25th). He, on the present occasion, calls upon the owners of Chinese produce stored in the warehouses of this place, and imported during the last six months of last year, to pay, within five (5) days from the 22nd March, the "Barrier dues" leviable on it; or, failing this, they will be called upon after that date to pay double the amount of dues leviable. The Taotai's second proclamation was dated the 9th inst., making a period of eight days between the issuing of the two proclamations. As a despatch can go from Tientsin to Paouting in 24 hours, and a reply to it can be received here in Tientsin within 48 hours, the length of time between the issuing of the second and third proclamations tends to prove that the Taotai is acting under the inspiration of his superiors, and is not carrying out the new system of his own accord. Indeed, we may be sure that he would not have dared to make the innovation without Li's approval. Had a proclamation been issued at the end of last season, announcing the intention to collect the Barrier dues at the time of receiving the import duties, Chinese importers would, ere the opening of this season, have made their arrangements to meet the new order of things. As it is, the new system came upon them quite unexpectedly.

Rumour says that the Governor-General will leave Paouting for Tientsin on the 22nd inst, and may thus be looked for on the 25th inst. Rumour also says that our new Customs Taotai, Le Chaou-tang, who was gazetted last 27th Nov. as Taotai for Tientsin, would leave Canton or Hongkong on the 19th inst, for the North. The new Customs Taotai for Newchwang is here at present, on his way to his port, and will leave on the 21st inst., in the steamer *Formosa*, for Newchwang.

Training began on the race-course yesterday morning. The coffee tent had been erected the day before, to meet the event. I fancy our prospects are very good for having a first-class spring meeting.

We have had a return to colder weather This morning, there was a hoar frost, and the thermometer stood at 29° Fahrenheit.

19th March.

I mentioned in my last letter, that his Excellency Sun, the Customs Taoutai, had issued another—his third—proclamation on the afternoon of the 17th instant; and that in this one he had demanded the payment of Barrier dues on goods imported during the second half of last year. Subsequently, the Chinese traders held meetings at which it was finally decided to close their shops and hongs on the 21st instant, (one day before the Taoutai's new system would come into operation) and to cease doing business till they could arrange matters on a satisfactory basis. On the 21st instant, it was impossible for any one to buy a foot of cotton manufactures, a catty of sugar, a pair of Chinese shoes or in fact almost anything Last night I was told that the owners of the money shops and the banks would also immediately close their establishments; and that it was feared the owners of the pawnshops would to-morrow or next day follow their example—after which we might speedily expect to see anarchy rampant in Tientsin. The out-of-door laboring classes depend, in the spring, upon each day's labor to supply each day's food for themselves and their families; as the savings of the previous year have been exhausted during the past winter season. Immediately that the mercantile traffic of the port is brought to a standstill, porters, wheelbarrow men, and the lighter or cargoboat men cease having employment, cease receiving pay, and consequently are in want of the necessaries of l fe.

Yesterday afternoon, the Chefoo (prefect) and the Chiheen (the district magistrate) issued proclamations ordering the trading population to open their places of business, and carry on their usual mercantile occupations; and to meet the occasion these documents were drawn up in the customary cajoling mandarinegal style. The trading people, however, being perfectly alive to the preservation of their sycee, are not to be blarneyed on the present occasion, into breaking their strike,—as we may call their action—till they have reliable assurances that the Taoutai cannot carry out the system he has announced in his proclamations. I have just heard (6 p.m.) that the district magistrate's proclamation states that the Customs Taoutai has been acting, in demanding the Barrier dues as stated in his proclamation, "in accordance with the instructions of his superior," who is, as we all know, the Governor-General of the province of Chihli. The proclamations are posted up in the city, and not near the British settlement, so I have not seen them.

Yesterday, I was informed by an expectant Taoutai, one of the Governor-General's attachés, that his Excellency would reach here from Paouting on Friday next the 26th instant. As there exists at this moment a complete stoppage of all the mercantile traffic of the port, and as this has already caused suffering amongst the out-of-door classes, which will increase every twenty-four hours; and as his Excellency will, when on the spot, have ocular demonstration of the unsatisfactory state of affairs generally, it is to be hoped that he will, directly after his arrival, delay not a moment in adopting measures to place the traffic of the port upon a satisfactory basis; so that the people may pursue their usual mercantile occupations without delay.

The whole of the cargoes, consigned to Chinese, of the two large steamers *Shantung* and *Taku* which arrived here from Shanghai the day before yesterday, have been landed and stored in the warehouses of the foreign agents of the steamers; not a single bill of lading having been presented by the consignees, to take delivery of their cargo.

I feel it impossible to avoid mentioning here, that I have been told by respectable Chinese of this city that there exists amongst the Chinese thinking and well-to-do people of this place, considerable apprehension that the public tranquillity is seriously jeopardized by the present situation of affairs, owing to the needy portion

of the population being unable to employment. Should their wants incite them to commence pillaging, they will, judging from their antecedent life, be speedily joined by some of the bad hats belonging to the Southern Legion. And I also, further, cannot avoid mentioning that on calling on a foreign resident here to-day to hear his views, he said he had come to the conclusion that the present interruption to trade arose from political causes, and was not due to the collection of the Barrier dues; but that these were employed to create the trouble. Last night, while cogitating over the events of the last few days, I, very strange to say, had come to the same opinion. We can have communication with either Paouting or Peking, in 24 hours, and the unsettled state of this place, I have not the smallest doubt, has been accurately known at both places, from first to last; yet we have no evidence that orders have come from either place to re-establish the customary traffic, abolish the new Custom House system of collecting Barrier dues, or in fact do anything to establish order.

23rd March.

---

9 p.m.

Since writing the above, I hear that the Customs difficulty has ended in the virtual abandonment of the obnoxious regulations. The Chinese traders held a meeting on the 20th instant, at which they resolved to close their shops on the following day. They did so, and the Bankers and Pawnshops had resolved to follow their example, when the Territorial Taotai stepped in and gave people to understand that the obnoxious order would be withdrawn. I append a copy of his proclamation:—

"Wu, of the 2nd rank, a Brevet Provincial Treasurer, and by Imperial Decree Intendant of the Circuits of Tientsin Fu and Ho-chien Fu, &c., &c., makes the following proclamation:—

"On my return to Tientsin yesterday, from my visit of inspection to the Grand Canal, I found that on all sides merchants had suspended business and closed their shops; and upon inquiry it appeared that this had been done in consequence of H. E. the Customs Taotai having revived an old rule, by which the payment of arrears in the Revenue taxes was to be enforced according to instructions given to the District Magistrate. The merchants and shopkeepers had, consequently, been worked upon by their dread of the infliction.

Now, as to this matter, since the functions of H. E. the Customs Taotai pertain to the collection of Revenue, his aim is to make the receipts as full as possible; and as the functions of my own office relate to the supervision of affairs, *my* concern is for the welfare of the people. I know full well that the successive years of floods in this district have retarded its prosperity, and that you—merchants and tradesmen—have suffered from the decline of business, from reduced capital and small profits; circumstances which make it hard for you to comply with the change proposed.

When the deputation of merchants and tradesmen came to my Yamên to solicit my services, I at once addressed H. E. the Customs Taotai, proposing that he should refrain for the present from enforcing this rule, and adhere to the existing regulations; and I also reported to H. E. the Viceroy upon the extenuating difficulties of the merchants, and requested him to extend his favor by setting aside the proposed rule. His Excellency is uniformly influenced by feelings of tender compassion, and cannot refuse his favor in compliance with the request. You should all consider this, and not waste time in doubtful hesitation.

Therefore, this proclamation is issued to inform all merchants and tradesmen that they must at once open their shops, and resume business as usual. By no means must individual doubts and fears cause the obstruction of trade.

If, in future, Yamên subordinates or local vagabonds should attempt any imposition under the guise of inspecting merchandise, you are free to come to my Yamên and make complaint, when the matter will be at once attended to.

Let all render obedience, and evade not this special proclamation."

23rd March.

Some of the shops were opened yesterday, on the assurance of the Territorial Taotai's proclamation that trade should be carried on as before; and that any other arrangements would be made after arrival of the Governor-General. To day, the shops generally have opened. The Customs Taotai's proclamations have thus been set at nought. Affairs had such a serious aspect, that the Territorial authorities found themselves compelled to change the policy of their colleague, who is not a Territorial official, and is not accountable for disturbances amongst the people. Hence Wu Taotai's paper.

5 p.m.

This is my second letter of to-day. I wrote to you about two hours ago, saying that the shops opened this forenoon; the Territorial Taotai having issued, late yesterday afternoon, a proclamation that the traders might set their minds at rest, and for the present resume their business. On the strength of this proclamation, the Tientsin traders began taking delivery of their cargoes this forenoon, *early*, but at eleven o'clock they knocked off, as the assurances of the Territorial Taotai could not protect them from the Custom House Taotai's demands. So that at this moment, we are exactly in the same position as before—namely, the shipping traffic is at a stand still.

24th March.

In continuation of my letter of 23rd instant, relative to the stoppage of trade at this port, through measures undertaken by the Customs Taotai, touching the payment of Barrier dues, immediately after the payment of the foreign Custom House duties, I have now to report that, after dispatching my letter to you to the steamer office, at 6 p.m. on the 23rd instant, I received a note from a merchant in the Settlement, telling me that he had just been informed that the shops in the city had been, since 3 p.m. that day, opened to business, and asking me if I had heard of such. About an hour later, I was told by a Chinese who had just come down from town, that if any were opened they must be few indeed, as all he had seen were closed. At about 9 p.m., I was favored with a few minutes' perusal of a copy of a proclamation, which appeared, from its tenor (it had no heading), to have been issued by the Territorial Taotai of Tientsin; and was to the effect that, on the arrival of the Governor-General, the existing difficulty of the merchants with the Custom House would be arranged; and ordering the merchants and traders, in the meantime, to open their shops and go on with their usual occupations. On the following morning, accordingly, many of the shops opened for business; and some of the Tientsin traders came to the Settlement and began taking delivery of the cargoes which had come for them by the last arrived steamers. A couple of hours later, about 11 o'clock, however, they stopped work; owing, it was said, to their having received intelligence from the city, that it had been considered, on the whole, the best course to desist lightering goods from the Settlement to town till the Governor-General, who was expected that evening, had arrived. We learned, yesterday evening, that His Excellency had reached his yamên late in the afternoon. This forenoon, we heard in the Settlement that the Chinese mercantile people had presented a petition to him regarding their grievances with the Customs Taotai. Rumour says that the names of the merchants appended to it were written "round-robin" fashion, to avoid making any particular man appear as a leader in the movement. The result of petitioning the Governor-General, I do not yet know.

This steamer will leave to-morrow morning. The gale of to-day detained her 24 hours in port, as she was to have left this morning.

6 p.m.

I have just learned, on very good authority, that His Excellency, Sun, the Customs Taotai, has handed in his resignation to the Governor-General. I am also given to understand that the old order of things will be restored at the Customs, as regards the collection of interior dues—namely, they will be gathered on the goods going into the interior from Tientsin, as formerly. I also understand that the Tsung-li-yamên have written to Canton, to Le Chaou-tang, the mandarin appointed last November as Customs Taotai at Tientsin, to ascertain whether he can take office or not. It has hitherto been rumoured that he was detained in Canton through ill health, and might not be able to take office here.

PURITAN.

25th March.

The Viceroy has given positive instructions for the Customs Taotai to abandon his proposed changes.

26th March, 1 a.m.

COREA.

When the Emperor of China's message, received 6th moon, 1874, as per my letter of December last, had been well digested by the Government of Corea, an Ambassador was despatched to Peking, in order to glean every information from the fountain head. The Emperor of China is supposed to have addressed the Embassy thus: * * * * "It is quite true that these three Powers want to fight you; but, I think, if you make a treaty with France and America, Japan would not, by herself declare war. It would, therefore, be a good thing for you to do so; for those two Governments (France and America) are respectable, and I have made treaties with them myself—without suffering any harm therefrom. Do as you think fit, although I am of opinion that it would be beneficial to you, as they don't want to take your country. The only two stipulations they require are:—1st, Commercial liberty. 2nd, Permission to build churches. If you can agree to that, you have nothing to fear."

The Corean Ambassador replied: "How can we, who have so many rites which must be carefully followed, ally ourselves with States that have none at all—*i.e.*, Coreans are noted for politeness and good manners, with all virtues, and could not possibly treat with European people, or such like barbarians."

Whether the above is exactly what occurred, it is too much to declare; but it is so rumoured throughout the country, and it is certain that, after the return of the Embassy from Peking, about 8th moon, 1874, the King of Corea withdrew the extra soldiers who had been encamped at Kang-hoa, notwithstanding the ex-Regent's (his father's) earnest protestations.

To justify the measure, the King is reported to have said: "Even if men from other countries came to us, we don't know where they would land, and all these forces would be like a small stone thrown into the sea. Although, I don't wish particularly to treat with them, it seems to me that a great number of my people would be killed in a war, and to prevent that, it would be right to have peace and make a Treaty. Moreover, I am led to believe that we need

not fear any damage on the part of Europeans. If, then, it be possible to preserve lives, and our institutions are not to be injured, what can prevent our making treaties of alliance and friendship?" Thereupon the King's orders to withdraw all extra soldiery were at once carried out, and there are now at Kang-hoa, and at the other posts, none but the ordinary troops.

My object has been generally to state what passes in a country so shut out from all communication; but it may not be out of place now to suggest that Corea is getting ripe for entering the family of nations, in which China and Japan are prominent members. Your readers are more likely to doubt the correctness of the Emperor of China's address to the Corean Embassy, than the reply of the latter, especially as it would serve China's purpose at the time, to give full employment to the Japanese, while the Formosa difficulty was pending; yet it must be borne in mind that, by inducing the Corean Government to make peace with France and America, independently of Japan, the latter's jealous fears might operate to the advantage of the Celestial Empire, by causing unfriendliness between her then enemy (Japan) and France and America. It must be considered also, that Corea pays tribute to China, and it may be very necessary to assist her at some future period (not far distant, judging from the encroachments at the Amoor), when Russia will feel strong enough to claim another slice of the East. Anyhow, Corea is not a difficult country to penetrate, and the people, we know from the kindness shewn to shipwrecked crews on many occasions, are nearer to the Japanese in character than to the Chinese. The only question is as to the King's mind, and there is every reason to believe that, if overtures were made by any great Power like England, France, America, or Germany, a treaty could be made without any risk. It would be a great honour for England to introduce Corea into the "family" without a struggle; and I think England would more likely succeed, as she has not attempted any coercion like the other Powers. The Emperor of China's death will not affect the conduct of the Corean Government, unless there be some [illegible] in Peking. At any rate, it would be easy enough to send the new Admiral's letter to the King of Corea; and I believe a meeting could be easily managed now.

Philo-Coreanus.

Newchwang, 20th Feb.

FOOCHOW.

The *Foochow Herald* is informed that despatches have been sent from the Tsung-li Yamên to the high officials of the Maritime Provinces, instructing them to take due measures for the protection of the Great Northern Telegraph Company's Sea Cables. This has been done in compliance with the request of the foreign diplomatic body at Peking and will set at rest all doubt as to the legality of the Company's position, in so far as their sea lines are concerned.—It is also said that the Local Government are about to engage the services of a first class Civil Engineer to report on the condition of the river between the Bridge and Pagoda Anchorage, as well as to devise the best practical means of deepening the channel abreast of the Arsenal. Steam-dredges will be ordered so soon as these preliminaries are settled.—Foreigners at Shanghai were told to engage a Civil Engineer for themselves, to survey the Woosung bar, and the idea of dredging has been simply ignored.—M. Giquel will be accompanied on his homeward trip by a few Chinese students. He will arrange for the instruction of these youths, in modern arts and sciences, at the best public schools in France and England. During his absence in Europe, M. de Segonzac will take charge of the Arsenal.—A Chinese newspaper has been started in Foochow under foreign auspices.—The weather has been unusually warm for the time of the year.—Several of the native inhabitants have been severely beaten and cangued for refusing to comply with the mourning ordinances consequent upon the death of the late Emperor.

FORMOSA.

We are informed that active measures are in course of completion to open up Formosa to Chinese enterprise, in a way calculated to properly develop the resources of that island. The recent memorial to the Throne upon the subject has evidently had good effect, as orders have been issued to the mandarins of Formosa to afford every aid and protection to immigrants, a number of whom are stated to be setting out from the ports of Swatow, Amoy, and Foochow, for the purpose of settling there. Chinese reports place the number of families thus seeking fresh fields and pastures new, at two thousand, which would give a probable average of 8,000 individuals, who would carry with them at least the habits of a far higher civilization than that of the aborigines. We do not learn what specific measures are to be taken for the protection of the immigrants, but understand that troops are to be sent over to "pacify" the natives in the first instance No doubt the end in view will be somehow achieved, the Chinese having a good reputation as successful colonists. The impulse which such a movement might give to the Sugar and Camphor trades is not to be despised, and if, as reported, the Coffee plant will also thrive in Formosa, the Chinese agriculturalist is just the man to make its cultivation pay. Doubtless the Pe-paw-hwans will scarcely view the new movement with that unqualified approval which it is the prerogative of civilized people to extend to all that comes under the head of progress. But that will merely be "human nature," and if they too strongly oppose the "improvement" of trade and agriculture, they will probably find the process extended to themselves. On the whole, we fancy that the Chinaman is a less bloodthirsty immigrant than the Anglo-Saxon, being content to dwell in peace with uncivilized neighbours if not too strongly provoked. But in any case, the inevitable law will, we suppose, obtain; and it is quite possible that, if some future Chinese Cooper tells the story of the "Last of the Pe-paw-hwans," the date of the incidents will be "*circa* 1880."—*China Mail.*

HONGKONG.

The ordinary yearly meeting of the Hongkong Chamber of Comm rce was held on the 22nd March. Among the chief subjects mentioned in the report were those of protection to wrecked vessels on the coast of China; the re-survey of the coast; and the probable opening to trade of the ports of Annam, in the Gulf of Tonquin. A discussion of the latter subject turned on the advisability of sending a delegate to that country for the purpose of obtaining information regarding its commercial capabilities, as suggested in the report. Ultimately, Mr. Pyke moved, "That in the opinion of this meeting the whole matter be left to the committee, with the understanding that the expenses should not exceed $1,000" The motion was seconded by Mr. Greig, and carried unanimously.—The *Press* says it is stated that Russia is endeavouring to procure a revision of her commercial treaties with China, with a view of obtaining more favourable concessions.—In the case Fabregas *v.* Espantoso, a rule has been granted, calling on the Plaintiff to show cause why the damages should not be reduced to $12,000, or why there should not be a new trial.—The British brig *Britain's Pride*, bound to Ningpo, has put into Hongkong, leaking, she having been ashore in coming out of Manila harbour.—The *Diario de Manila* of the 18th March, states that a fire broke out on board the British steamer *Yuen-tze-fee* on the morning of the 17th, but the crew were able, without any other assistance, to extinguish it in a few minutes.—The *China Mail* gives a translation of an article in a native local paper, the *Chung Ngoi San Po*, which deals with a re-organization of the army proposed by Li Hung Chang. He suggests that each province should have on an average a standing army of 10,000 men, and the different provinces be divided into five divisions, each under the command of a generalissimo. The soldiers to be trained and disciplined under foreigners. The native journal also says that, for the protection of the coast, China ought to have at least four ironclads, and recommends the Government to send more students to Western countries to study law, military and naval tactics, and navigation.—H. M.'s Transport ship *Adventure* arrived on the 13th March from Yokohama, with the officers and 276 non-commissioned officers and men of H. M. Royal Marines. The *Adventure* left again on the 17th for Natal, calling at Singapore.—Admiral Ryder has visited the Aberdeen Docks, to see if they could take in the *Audacious*.—A Chinaman who was summoned for having dirty premises, pleaded that it was Sunday, and he could not think of making anyone work on a day that foreigners so much respect! He was fined $10.—Garrison sports were to be held on the 29th and 30th March.

NAGASAKI.

There is a certain amount of gossip in Nagasaki papers, but of news in the ordinary sense of the word, none.—The *Rising Sun* relates that a Japanese died lately from a fish-bite, with symptoms of poisoning.—A jin-rick-sha man found $3.000, took it to the Police Station and refused to accept any reward!—The steamer *Luzon*, which has been under repair for some time, came out of dock on the 12th, and made a successful trial trip.—A ceremonial in memory of the men who died in the Formosa expedition was to be performed on the 22nd March, and Government offices were to be closed on the occasion.

HIOGO.

The Hiogo papers are, if possible, more devoid of news than the Nagasaki. An exhibition of relics is being held at a great temple in Kioto.—Here also a man has picked $100 and taken it to the Police Station, but he condescended to accept half.—A native flower show is to be held at Osaka on stated days during this and the next month.—The Kobe A. D. C. are going to give an entertainment.—Naval athletic sports are to be held for the amusement of the men of H. M. S. *Sylvia* and *Mosquito*.—The Osaka correspondent of the *News* says, "Considerable progress has been made towards getting the Adjikawa branch line into working order, and, if no fresh delay occurs, we may expect to see it opened within the next three weeks. This done, and the new landing pier at the Kobe terminus finished, the goods traffic which is now so trivial should figure to a respectable amount in the weekly returns of our little railway.

YOKOHAMA.

The *Mail* says the amount set aside for the present half-year in aid of primary schools is about 262,000 *Yen*, and is distributed over 62 *Ken*.—At eleven o'clock on the night of the 12th, a fire broke out at Kanda, in Yedo, and before it could be stopped twenty-seven houses were

destroyed. A fire which broke out at Sawabe, in the province of Mutsu, on the morning of the 6th inst., destroyed over a hundred houses.—It is said that a large body of troops has been despatched into Jôshiu, to repress an outbreak in that district.—The *Herald* says the editor of the *Tokei Journal* has disappeared, and that the paper itself has ceased to exist.—Captain Rice, of the *Vasco de Gama*, has written to the *Herald* to disprove the assertion that the long passage of his vessel was due to parsimony on the part of the P. M. S. S Company in stinting him of coal.—Roses have become the rage in the capital; and, as with tulips in Holland in by-gone times, absurd prices are being paid for them.—The case of Davison *v.* Beato has been settled in H.M.'s Provincial Court, by a verdict for the plaintiff for the gross sum of $8 302.65, which disposes of the set-off claimed by the defendant.—*L'Echo du Japon* says:—"It is not only on the coast of China that pirates are met with, the coasts of Japan have been for some days their favouite haunt; above all, the sea between Gheichan and Bizen. Already several junks have been seized and pillaged by them in that sea. Orders have been given by the officers of the prefectures of these provinces, offering a large reward to anyone who is able to seize any of the pirates."—The *Gazette* copies from a native paper the intelligence that the convention of *Kazoku*, respecting the practicability of constructing a railway to Awomori, has come to a decision in the affirmative.—Tagagi Hojo, a *Shizoku* of Saga-ken, now studying in St. Petersburg, has married a fair Russian, named Elizabeth Nicolairo, an *accoucheuse* of some repute.—Tobacco is to be taxed on and after 1st January next.—The body of a boy aged about seventeen, and a girl of about fifteen, were found in the water near Honjo, Tokio, on the 13th inst. They are supposed to have committed suicide together.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

March 1st.—(1) Yang Shao-ho, an assistant Expositor of the Hanlin, memorializes submitting his views With regard to the augmentation in the number of degrees obtainable at the different provincial examinations, he represents the harm that is wrought to the cause of devotion to the ancient fountains of learning by the enlargement of the area of admission, whereby genuine application is discouraged. The additional degrees that have been granted during the last twenty years, in reward for contributions to the exchequer in a time of warfare, should now, in his opinion, be withdrawn, the provinces having already enjoyed to a sufficient extent the advantages of the Imperial bounty. On the subject of the military service, he expatiates on the inefficiency into which the regular army has fallen, its duties being discharged wherever troops are required by irregulars ("braves"), whom it is necessary to enlist for the purpose. Whilst the regular army, unpaid, undrilled, and with its ranks only nominally filled, has become next door to useless, the forces of irregulars who have been retained in the different provinces since the restoration of peace have also, it is insinuated, fallen into a condition of no slight inefficiency. The remedy that the memorialist proposes is to fill up the ranks of the regular army by drafts from the irregular forces. With reference to the skill in the use of the lance and bow, in which the soldiery of the three Manchurian provinces were heretofore preëminent, the memorialist, who served at one time as Adjutant-General in Shantung, where he had an opportunity of personally observing this fact, now hears that a falling off in efficiency is noticeable among the soldiery from that region, who have been sent to join in the Western campaign. He solicits that the proper authorities be called upon to institute regulations for amending this state of affairs.

(2).—The Censor Yeo Peh-ch'wan memorializes adding his protest to those which have already appeared in the *Gazette*, against the continuance in official employ of the late Taotai at Tientsin, after being placed in mourning by the death of his father.

March 2nd.—(1.) A Decree, in reply to a memorial by Hwang Yü, a Vice-president of the Board of Punishments, who has reported respecting an additional number of the women of An-hwei, who perished during the recent rebellion, and for whom no sacrificial offerings have as yet been provided. With regard to the 586 persons, of whose names a list has been presented, it is ordered that the proper Board take measures for providing marks of Imperial distinction, with the exception of such among them as have already been thus honoured, and that their relations be allowed to erect memorial temples or mural tablets at their own expense.

(2.) The Governor-General of Chihli reports the trial and sentence of a woman named Lin Chang-she, for the offence of presenting a supplication to the (late) Emperor by the roadside. The suppliant, having been persuaded by a female relative, a widow, who had a grievance with regard to the ownership of some land, to present a complaint to his Majesty when passing along a public thoroughfare, is condemned, under the statute in such cases made and provided, to the penalty of eighty blows, with privilege of commutation.

March 3rd.—(Court Circular.) The Prefect of Shun-t'ien Fu reports a fall of snow of upwards of 3 inches, at Peking, on the 28th Feb.

(1 and 2.) The Manchu General, Governor-General, and Governor of Fuhkein, and Shên Pao-chêng, Commissioner for Maritime Defence and Foreign Affairs in Formosa, jointly memorialize on the following subjects:—

(*A*).—The application of the late Acting-Magistrate of the Kia-l district is forwarded, in which he declares that the guardian deity of that city has long been conspicuously accessible to the prayers offered up, on occasion, for either rain or fine weather, and that a most noteworthy instance of his supernatural interposition occurred in 1862, when the city was besieged by the insurgent leader Tai. At this juncture a severe earthquake occurred, which threw down some of the battlements, but left the walls of the city undisturbed In answer to the prayers that were offered at the temple, when the rebels endeavoured to storm the town, an oracle was granted assuring a safe result, and the people took heart therefrom, so that a desperate defence was made, and the city was preserved from capture. It is now prayed that an additional title of honour be conferred upon the god in question.

(*B*).—The attention of His Majesty is solicited to an application presented by certain of the literati of T'ai-wan Fu, embodying a panegyric upon the heroic Chêng Ch'êng-kung, entitled Prince of Yen-p'ing 延平郡王 and honoured by the bestowal of the surname Chu, under the Ming dynasty. Devoted to scholarship in his youth, he became involved, on reaching the age of manhood, in the troubles which befel the State; and, imbued with the prevailing sentiments of heroic devotion, he postponed the obligations of filial mourning to the duties of patriotism. He found in the midst of the waste of waters a dominion which he transmitted to his descendants, and which was by them surrendered to the Imperial sway. His former opposition being condoned, his name was admitted to a place in the record of the loyal servants of the dynasty; and in the ensuing ages his supernatural intervention has been granted when cries of distress have arisen in times of natural calamity. The common people have offered sacrifices to him in humble shrines without official authorization, and it is now requested that the erection of a temple and the bestowal of a canonical designation on the departed hero may be Imperially sanctioned. In support of this petition, the Imperial Commissioner Shên, inditer of the memorial, together with his colleagues, after observing that although Chêng Ch'êng-kung in his lifetime necessitated the employment of the sword of the State, in the palmy days of the dynasty, to effect his subjugation, yet his character was of a kind to serve as a healing example to the turbulent and lawlessly disposed; and it is on record that in the 39th year of K'ang Hi (A.D. 1700) His Majesty declared in an edict that the deceased had been one of the supporters of the Ming dynasty, not a revolted rebel against His Majesty's own rule, and sent officials in charge of the coffins of both Chêng Ch'êng-kung and his son King 經 to be conveyed for interment at Nan-ngan, where a tumulus was to be raised over their remains and a memorial temple to be erected. As this temple, however, is on the mainland, it is of no avail so far as the people of Formosa are concerned; and it is now besought that a canonical designation be conferred on the spirit of Chêng Ch'êng-Kung, and the erection of a temple in his honour at T'ai-wan Fu be sanctioned. (For rescript see [illegible]

March 4th.—(Court Circular.) Li-jui had audience of leave on proceeding to Corea to promulgate the Imperial manifesto. (See *Gazette* of January 30th).

(1)—The authorities of Fuhkien, and Shên Pao-chêng, Commissioner for Maritime Defence and Foreign Affairs in Formosa, memorialize soliciting the removal of the restriction on colonization in Formosa. Referring to a memorial dated January 18th, in which they had already reported the opening of access into the mountains at both the north and the south of the island, and the arrangements they had in contemplation for establishing posts at Lang-k'iao and K'i-how, they have now to observe that with the exception of the lands occupied by the aboriginal tribes, the whole interior of Formosa is entirely uninhabited. Lands which might be cultivated lie waste, overgrown with forest and sending forth pestilential miasma, a refuge for the savage aborigines who lie in wait there for victims of their murderous designs. Though pathways may be cut across the hills they are nevertheless shunned as unsafe, and soon become obstructed by the undergrowth. The response that has been made to the late invitations to cultivators to take up new lands has been limited in the extreme, the fact being that the population of the settled part of the island is by no means abundant in proportion to the extent of its area. A prohibition has long been maintained against the emigration of Chinese from the mainland to Formosa; and although it has not been enforced to the letter, yet, so long as the interdict is not removed, the local authorities have always been fearful of committing an infringement of the law if they were to encourage the influx of settlers. The enterprise of opening up the mountain region, however, renders the introduction of cultivators absolutely necessary; and to obviate hesitation on the part of the people, the removal of the interdict is indispensable. The ancient enactment is found to be to the following effect:—"The surreptitious crossing over to Formosa by the people of the mainland is forbidden. On any vessel making the surreptitious voyage being captured, the master and crew shall be punished in different degrees, penalties shall be inflicted on the civil and military authorities, and the soldiers and police shall be criminally dealt with."

A further enactment provides that "in the the case of persons acting as crimps to decoy the inhabitants of the seaboard into surreptitiously crossing to Formosa, offenders in the first degree shall be transported into military servitude, and accessories shall be punished with 100 blows and banishment for three years. The penalty of 100 blows and one month in the cangue shall be inflicted on the remaining junk masters, who are bound as security for the offending person. The persons emigrating shall receive 100 blows and be sent back to their native places. The civil and military authorities found guilty of negligence shall be subjected to penalties as may be due." Other enactments are quoted to the same effect. In addition to these, it is further provided that for the offence of entering the territory of the aborigines, 100 blows shall be inflicted; and the same penalty, with 3 years banishment added, for engaging in such occupations as gathering rattans, snaring deer, felling timber, and collecting coya-fibre in proximity to the savages. Stone monuments were moreover erected at the entrance to the mountains at the northern and southern extremities (?) of Taiwan, (the term cautiously used here is 勢, signifying *condition* or *appearance*), beyond which were the limits of the savages. Penalties were prescribed for the officials guilty of negligence in the case of any persons surreptitiously going beyond these bounds with ventures of merchandize. Penalties were also [illegible] with the savages. The withdrawal of all these ancient restrictions is now solicited. It is furthermore stated that, according to a longstanding rule, no person was allowed to engage in the business of iron founding in Formosa, for the manufacture of domestic hardware or agricultural implements, without a license from the Treasurer of Fuhkien, obtained through the government of the island. Only 27 persons were thus licensed for the entire island, and the iron they employed was to be brought from Changchow on the mainland, under penalties for unauthorized extraction or sale of the ore or metal. Of late years, however, the ports of the island have been opened to trade, and pig-iron is included in the tariff of imports, so that what was formerly forbidden to be produced in China is now imported from the countries of Europe. Whilst the conditions are thus wholly altered, it frequently happens that ill-disposed soldiers or police trump up pretexts for levying extortions from the people at large, whilst the licensed iron-founders seek to enforce a monopoly in virtue of their recognized position, greatly to the public injury. Another prohibition on the statute book is that against the exportation of bamboos, the object being to prevent the supply of materials for sails and stagings to piratical junks. In virtue of this prohibition, bamboos transported from point to point in the neighbourhood of the ports are subject to inspection, although the fact is that sea-going craft make use of matting or canvas for their sails, and are in no wise dependent on the use of bamboo. The inferdict, consequently, serves only as an additional vehicle for extortion on the part of the soldiery and police. The removal of all the abovementioned longstanding prohibitions is solicited, in the interest of the colonization of Formosa. (For rescript, see *Gazette* of Feb. 15-16).

March 5th.—The Governor-General and Governor of Fohkien memorialize reporting the arrival of sundry shipwrecked Liu-Chiuan barbarians at Foochow. On the 18th December last, the commandant at Min-an received a communication from the district Magistrate of Ts'ung-ming in Kiang-su, forwarding a Liu-chiuan junk with eleven natives on board, together with their effects. On being examined, it was found from the statements taken that the junk had sailed on the 16th July last, on a trading voyage from Napa, and had been dismasted in a gale on the following day. She drifted in the course of the next seven days to the coast of China, and was taken by Chinese who came to the rescue, to the magistracy of Tsung-ming (estuary of the Yangtsze). Clothing and food were supplied by the Magistrate, and the junk was repaired, after which steersmen were put on board, and the junk was towed by a steam gunboat to the frontier of Fuhkien and Chêhkiang, where she arrived on the Dec. 4th. After being provisioned by the Magistrate of Yü-hwan T'ing she continued her voyage to Foochow. From the day of their arrival at the Liu-chiuan lodginghouse, the authorities have issued the daily ration, as provided by regulation, of 1 *shêng* (about 1 pint English measure) of rice, and 6 *cash* for salt and vegetables. On departure, the shipwrecked mariners will further be supplied with provisions for one month.

March 6th.—(1) The acting Governor-General of the Grain Transport reports that the apprehensions entertained towards the close of last year, for the safety of the banks of the Grand Canal in its Southern portion, owing to the strong pressure of the waters flowing in from the Yellow River, had passed away in the early part of January, as the volume of water decreased.

(2) The (late) Governor-General of the two Kiang, Li Tsung-hi, memorializes with reference to a decree received by him on the 2nd January, in which the tenor of a memorial by the Censor Hü T'ing-kwei, proposing a scheme for the raising of a large amount of revenue for the expenses of the Yellow River service, was forwarded. Upon this the Governor-General has to remark that, under the new regulations for the Hwai nan Salt Division (including Kiangsi, part of Kiangsu, Anhwei, and Hu Kwang), 500 *yin* 引 (each about 364 catties) of salt are allotted to one *p'iao* 票 or license, and that, consequently, the issue of 200 extra licenses would be an addition of 100,000 *yin* of salt placed on the market. If for each license the payment of Tls. 6,000 were received, an addition to the revenue would be made of Tls. 1,200,000. Supposing that there were an opening for the sale of the salt in question, this would certainly afford an auxiliary source of income on behalf of the river-works; but he has to submit that the secret of the gabelle revenue does not lie in augmentation of the supplies available for distribution, so much as in the quickening of sale for consumption. In earlier times, the salt brought to the distributing centres by the licensees, was got rid of as fast as it arrived; but increasing competition has led to a gradual accumulation of stock. The licensees, who began by finding themselves able only to make one delivery a quarter, have at length reached such a point that their turn for disposing of their importations comes only once a year. It is found that the salt accumulated at the distributing centres of the Two Hu, Kiangsi, and Anhwei, amounts to upwards of 360,000 *yin*, which the dealers are altogether nonplussed how to get rid of, and this does not include the salt *in transitu* or in the intermediate storehouses. Owing to the long delay that must elapse before that salt can be put on the market, it is exposed to various forms of deterioration. The only salvation for the traders lies in their adherence to the rule of successive rotation in the disposal of their ventures. These facts, with others to the same effect, are urged as a sufficient objection to the proposed addition to the number of licenses issued.—Rescript: Let the Board of Revenue take note.

March 7th.—(1) A decree, remitting certain portions of the land-tax in some of the Southern districts of Chihli, on a representation by the Governor-General of the extent to which the lands in question have suffered from inundation.

(2) The Censor Sun Fêng-siang memorializes, protesting against arrangements proposed by the Board of Ceremonies for limiting the number of candidates to be allowed to come forward at the provincial literary examinations, on the motion of the assistant Civil Governor of Fêng-t'ien, Chang Sü-kiai, who memorialized on the subject in 1873. The Censor now urges, taking Shantung as a province of the middle order in this respect, that in the province in question the number of degrees of *Kü-jên* conferred, including those newly added to the list, is seventy-one, with 13 of the *fu-pang* or subsidiary class. The number of cells in the examination hall has been increased to upwards of 12,000, and for the 1873 competition more than 14,000 scholars came forward. The number who actually entered for the examination, after rejection of a certain proportion at the preliminary test, was upwards of 12,000. If, however, the standard regulation were complied with, which allows only the following proportion to come forward in a Province of the middle order—viz., 60 for each degree as *Kü-jen*, and 30 for each degree of the *fu-pang* class, the number of candidates sent forward from the districts could not exceed some 4,600 all told. The increase in the number of candidates is attributable to the relaxation of the rules granted from time to time in reward for local contributions during the rebellion, and the Censor deprecates a withdrawal of privileges which have been highly prized by the literary class.

March 8th.—(1) K'ung Siang-k'o, the hereditary representative of Confucius, invested with the title of Duke, memorializes, expressing his lamentations on the decease of his late Majesty, the intelligence of which reached him at his home on the 24th January. After a panegyric on the virtues of the deceased sovereign, he requests permission to visit Peking to present himself before the Throne, as he did in 1865.—Rescript granting the request.

(2) The Governor of Hupeh memorializes, denouncing the acting Magistrate of the District of Hien-fêng for sundry acts of corrupt conduct and perversion of justice into a means of extortion. A rescript, stripping the offender of his rank, has already appeared.

March 9th.—No documents of importance.

March 10th.—(1) A Decree in reply to a memorial by the Assistant Hanlin reader Pao-t'ing, who has admonished their Majesties the Empresses with his views respecting the control of the eunuchs of the palace and economy in the expenses of the household. In reply it is observed that the memorialist's warning is dictated by a praiseworthy desire to prevent the possible growth of evils, and that as regards the eunuchs, it has been fully recognized by succe-sive sovereigns that not the smallest approach to freedom can be allowed to this class of persons. On the subject of household expenditure, the Comptrollers will be enjoined to adjust their outlay to the regulated income of the Privy Purse, and not to make unjustifiable applications for extra subsidies from the general revenue.

(2) The Governor of Cheh-kiang memorializes requesting that the name of Yang En-shu, Magistrate of the Shan-yin District, may be removed from the official list under that heading, owing to prolonged absence from his post. The Magistrate, having been recommended for nomination to this office, was required by the Board to proceed to Peking for presentation to the Emperor, after which he was to return to his post on probation only. Having left Cheh-kiang in July 1871 for the purpose of proceeding to Peking, he has never returned; and it has

been ascertained on enquiry that he has purchased a certificate of rank as Taotai from a sale-of-titles office in Hunan. Having failed, however, to pay up the extra amount required from him to make good his want of a recommendation for promotion from his actual superiors, the Board has refused to confirm his new rank, and likewise to discharge him from dirty in Chêhkiang. It is now requested that, he has absented himself for such a length of time from duty, his office may be declared vacant, in order that another appointment be made.—Granted by rescript.

(3) In a supplementary memorial, the same Governor reports the appointment of the late Magistrate of Chu-ki to act as Magistrate of T'ien-t'ai, vice Ting Shu-liang, removed from office—(probably in consequence of the late rising in that district).

March 11th.—(1) A Decree. A memorial has been received from Tso Tsung-t'ang, Governor-General of Shensi and Kansuh, &c., who requests that a Taotai be stripped of his rank and excluded for ever from the public service, as well as that a penalty be inflicted upon himself. Ho Yüan-tsin 何元普, Intendant of the An-suh circuit, was an official who had already been denounced for misconduct, when Tso Tsung-t'ang memorialized in his favour, soliciting restoration of his original rank and his appointment as acting Taotai of the above-named circuit. Notwithstanding this, the official in question, so far from shewing repentance and a desire to atone for the past, has thrown obstacles in the way of public business, manifesting conduct the most unworthy, deceitful, and devoid of principle. Let him be stripped of his rank, and excluded for ever from re-employment. In summoning to his headquarters, without due cause, an official of bad character, already stripped of his rank, Tso Tsung-t'ang himself has committed a fault not easily excusable. Let his name be handed to the Board for decision as to a penalty.

(2) The assistant Reader of the Grand Secretariat, Kwang-an, memorializes submitting his views with respect to the recently declared succession to the Throne. He submits that, whereas it is true that the servants of the State are not called upon to meddle with the Sovereign's prerogative in the adoption of an heir, yet it appears to him that, where some trifling modification suggests itself as desirable, after the satisfactory conclusion of an arrangement of the kind, it behoves a Minister not to remain silent. After referring to the lamented decease of his late Majesty, and extolling the wisdom and foresight with which the two Empresses have caused an heir to the Throne to be adopted, with the proviso that his Majesty's future son shall become adoptive heir to the deceased Emperor, the memorialist thinks it his duty to refer to an analogous case which has struck him, in the history of the Sung dynasty. T'ai Tsu, the founder of that line (A.D. 960-975), transmitted the succession to his younger brother, in obedience to the command of his mother, instead of making his son his heir (the arrangement being that T'ai Tsu's son should succeed on the death of T'ai Tsung, the second sovereign.) Subsequently, however, by the solitary advice of Chao Tsin, T'ai Tsung named his own son as his successor, in lieu of his nephew (the rightful claimant of the Throne.) Objections innumerable were the result of this departure from the rule prescribed by the Empress mother of T'ai Tsu. If, at the time, her Majesty had commanded her decree to be inscribed on a tablet of iron 鈇券, thus constituting a patent immovable as the Nine Tripods of Yü or as the T'ai Shan itself, the counsel of Chao Tsin would have been powerless to interfere with it. The memorialist now recommends that, to guard against any possible departure from the declared will of their Majesties in the course of future years, the great assembly of Princes, Nobles, Ministers, and heads of departments be convened to decide on the preparation of a tablet of iron to record for ever their Majesties' decree. (For rescript severely reprimanding Kwang-an for his presumptuous intermeddling, see *Gazette* of Feb. 21st.)

March 12th.—This day's *Gazette* is wholly occupied with the memorial by the Censor Wang Chao lan, urging financial, civil service, and army reform, a full abstract of which has already been given, with the rescript, in the *Gazette* of Feb. 23rd.

March 13th.—(Court Circular). Kwei-ts'ing, Vice-President of the Board of Works at Moukden, had audience on his arrival at Peking. (N.B.—This is the official lauded by the Censor Li Hung-mu, in his memorial published on the 23rd February, for his uprightness while acting as Comptroller of the Household, in contradistinction to Kwei-pao and Wên-si, the officials whose degradation was granted by rescript to the memorial in question).

(1) The Governor of Chêhkiang memorializes applying for a memorial structure in honour of an aged lady of the province, who has seen seven generations living and who has, herself included, five generations of her family living at present day. The lady in question, now 95 years of age, has three sons, thirteen grandsons, seven great-grandsons, and two great-great-grandsons. The application, accompanied by a copy of the genealogical register, is referred to the Board of Ceremonies.

(2) The same Governor applies for sanction to the resumption of a payment of eight taels per annum out of the public funds for the maintenance of Spring and Autumn sacrifices in honour of a President of the Board of War under the Ming dynasty, named Hu She-ning, who aided in suppressing the formidable revolt of Prince Chên Hao (in A.D. 1519). A temple in his honour was erected at the district city of Jên-ho, but during the rebellion, when the records were lost and affairs fell into confusion, the accustomed sacrifices were suspended.

(3) The same Governor reports an engagement which took place in August last, on the coast of Chêhkiang, close to the border of Fuhkien, with some piratical junks which had been chased up from the South. The Imperial war-junks, under the command of the Acting-Brigadier of Wên-chow, aided by a steam-gunboat, fell in with the pirates near Koh-sien Ao, and having obtained the weather-gage during the prevalence of a furious gale of wind, bore down upon them and opened fire with their heavy guns. Two of the pirate-junks were sunk, as well as one of their boats, a great number of the piratical crews being thus sent to the bottom, and the crew of the remaining three-master, finding the odds against them, put their helm about and ran the junk ashore. The pirates, having taken to the hills, were hotly pursued by a landing party from the Imperial squadron, and a great number perished by falling over precipices in their flight. Thirteen prisoners were taken, and twenty-four heads were brought in from the scene of action. On board the piratical junk five imprisoned persons were found and liberated. Honours are solicited on behalf of the officers and soldiers who achieved this exploit.

March 14th.—(1) A Decree, appointing a commission of high officials, with the Grand Secretary Pao-yün as President, to supervise the drawing up of the history (實錄 Veritable Record) of the late Emperor's reign.

(2) A Decree. Let Kwei-ts'ing 桂清 be transferred to the post of second Vice-President of the Board of Works, with charge of the Coinage department. Let Na-jên 訥仁 be transferred to fill the post of Vice-President of the Board of Works at Moukden. (*N.B.*—With reference to Kwei-ts'ing, see *Gazette* of 13th inst.)

(3) A memorial, by Liang Sêng-pao, Sub-Director of the Court of Literary Record, urging certain modifications in the system at present pursued in the revision of examination essays.

March 15th.—(1) A Decree, ordering that the jail-warden of the Wei district, in Chihli, be stripped of his rank, and made a prisoner for trial, in consequence of the escape of certain prisoners under his charge.

(2) The Presidents of the Board of War memorialize, forwarding a memorial lodged in their hands for presentation by the titular Secretary of the Board, Wei Kang, which they have duly examined and found free from objectionable expressions. The memorialists, referring to the Empresses' decree inviting counsel, has to request that the Governments of all the Provinces be called upon to institute measures of reform of the civil administration. He begins his homily with the following chain of argument: It is [proverbially] the people who are the foundation of the State. If the foundation be secure, the prevalence of good government may be looked for. The means of sustenance are [proverbially] [illegible] Heaven. If Heaven be in harmonious accord 和 [with the remaining constituents of the universe], then years of plenty may be counted on. But let grasping and heartless officials hold the reins of power, and outcries of complaining be heard on high, then Heaven will not be in harmonious accord. Let the State be wanting in upright and virtuous servants, then calamity and woe will again and again be experienced, and the foundation will in consequence be disturbed. To dissipate the visitations of Heaven, mankind must be in harmonious accord; and whoso would protect the interests of the people, must make the civil administration pure. Thus it was in the days of old, and a survey of the existing condition of affairs shews the same to be more than ever an urgent necessity. In the memorialists' humble opinion, the corruption of the civil service throughout the Empire has reached in recent years its extreme development. The causes of this may be classed under eight heads. Here follows a categorical enumeration of the evils the memorialists would expose, which are as follows:—1. Laxity in the system of admission into the public service. 2. Extravagance in dress, entertainments, and establishments. 3. The facility with which acting-appointments and temporary incumbencies are conferred on expectants of office, without regard to their character or fitness, and often as a means of extricating the nominee from debt. 4. The system of "indemnifying" 調濟 officials, who have held for some time unproductive appointments, by transferring them to more lucrative posts. 5. The suppression of the regulation system of advancement in the public service (viz., through the literary examinations), by the lavish employment of patronage. 6. The wide extension of the purchase system as an avenue to substantive rank; its original and harmless intention being the bestowal of mere titles. 7. The abuse of the recommendation system, by which means many worthless persons obtain advancement. 8. Neglect on the part of the higher authorities to scrutinize with sufficient care the competency of expectant officials, before conferring positions of trust upon them.—The above constitutes the list of accusations which the memorialists have to bring against the civil service. The only proposal, with a view to reform, is that a fresh hortatory decree be issued to the Provincial Governments, who are accordingly called upon to reform existing abuses.

Public Meetings.

THE CRICKET CLUB.

The annual general meeting of members of the Shanghai Cricket Club was held on the 24th March. Present, Mr. Tate, in the chair; Messrs. Jaffray, G. de St. Croix, Moore, Boomer, Hawes, Manson, Tobin, Mowat, W. de St. Croix, Caldbeck, J. L. Scott, Hamilton, Walker, Waller, Hearn, D. Brand, and S. Reynell.

The Chairman proposed that the minutes of the last meeting, as printed in the *North-China Daily News*, should be taken as read. Agreed to.

The statement of accounts, which was circulated in the room, was also taken as read. The following is an abstract :—

Statement of Accounts.

Season, 1874-75.

Expenditure :—

Advertising, Printing and Stationery	Tls.	49.60
Entertainment account		49.45
Rent, one year		300.00
A'kew's contract for maintenance of ground		480.00
Tiffin account		75.46
Gear		119.08
Sundry expenses		2.06
Ground expenses, &c.		186.68
Exchange		3.27
Pavilion account		444.62
Shroff		7.42
Suspense account		5.63
	Tls.	1,723.27

Receipts :—

Balance	Tls.	147.69
Subscriptions		1,100.00
Entrance fees		200.00
Iron Roller, half-share of proceeds of sale		162.50
Interest account		4.06
Balance		109.02
	Tls.	1,723.27

Debit Dependency :—

Rent, one and a half year	Tls.	450.00

Mr. Tobin proposed, and Mr. Mowat seconded, that the accounts be passed.—Carried unanimously.

The Chairman asked the attention of members to the estimate of income, &c., for the ensuing season, and called on the Hon. Secretary to read it.

The Hon. Secretary said the list was then in the hands of members, but he might mention that the chief item in the expenditure was the amount for rent, Tls. 750, which would be due on the 31st of Dec. If that were paid, they would commence the next season with a debit balance of Tls. 370. The next principal item was the gear account. It was absolutely necessary that the goods should be ordered, and they were, in fact, on their way out. Under the head of Income, the estimated revenue from Subscriptions and Entrance fees had been based upon the experience of the past few years, and might safely be depended upon.

Mr Manson thought the incoming committee might ask the Recreation Fund Trustees for a rebate of the rent due. The ground was in very bad order, and the amount of rent owing would help to put it right. He thought if the Trustees were asked, they would agree to it. The ground was not open only to members of the Club, but also to outsiders, who paid no charges. It would want relaying next season, and the Club would not be able to do it without assistance.

The Hon. Secretary said that, even supposing they paid the Tls. 750 rent, they would probably next season be as much to the good as they were now to the bad. He, however, had no doubt that, if the Trustees of the Recreation Fund were written to, they would give the Club some assistance, as they had done before. But the amount of rent to be provided for was obliged to be included in the estimate, as the Trustees could, under the lease, force the Club to pay it.

Mr. Manson said, of course they could; but he did not see why they should not be asked to help the Cricket Club, as they had done the Rowing Club and Race Meeting.

The Hon. Secretary said they had also helped the Cricket Club. He thought Mr. Manson's suggestion might be left for the consideration of the new Committee.

The Chairman thought the Committee should receive some positive instruction from the members on the subject.

A general conversation ensued, after which

The Chairman said it seemed they were all agreed that the incoming Committee should be instructed to write to the Recreation Fund. It might be taken as simply instructing the Committee, or if the members chose, it could be put in the shape of a formal resolution.

It was considered better to pass a resolution on the subject, and

Mr. Manson accordingly proposed :—

That the incoming Committee be instructed to apply to the Recreation Fund Trustees for a sum not exceeding Tls. 500, for the general improvement of the Cricket Ground.

He also thought it should be pointed out to the Trustees, that the Club permitted anybody to come on the Ground, and did not charge anything for admission, which they were entitled to do.

The Chairman thought that was a question, as were all details, for the consideration of the incoming committee.

Mr. Jaffray seconded the motion, and it was carried unanimously.

The Hon. Secretary next called attention to an estimate of Tls. 42, for repairing and painting the Pavilion, and asked that the committee should be instructed to have the work done.

Mr. Mowat said there was a large bill paid for repairs to the Pavilion last year, and asked whether the present outlay was necessary?

The Hon. Secretary said the expenditure last year was for a new roof and other matters. The suggested repairs and painting were much required. There was another question he wished to have settled, as to the charge to the members of rent for the use of lockers.

The subject was talked over, and it was finally determined that the charge should be continued.

The next business was the election of a committee for the ensuing year, the Hon. Secretary announcing that, with the exception of Mr. Hearn, all the old members were willing to accept office again. Some conversation ensued as to the desirability of throwing open the election to a ballot, but, as being in accordance with rule, and as a saving of time, the names were written on the same ticket, and

Mr. Tobin proposed, and Mr. Manson seconded, that Messrs. Tate, St. Croix, Souper, Scott, Caldbeck, and Anderson, with Hamilton (in the place of Hearn) should be the committee for the year.

Carried unanimously.

A vote of thanks to the Chairman and Committee brought the meeting to a close.

MUNICIPAL COUNCIL.

Council Meeting on 22nd March, 1875.

Present :—Messrs. John G. Purdon (Chairman), Geo. J. W. Cowie, F. E. Heyden, Wm. Kidner, F. W. Lemarchand, Robt. Mackenzie, E. Seligmann, S. D. Webb, A. G. Wood, and the Secretary.

The Cash State for the 20th inst. was laid on the table.

Roads.—Keecheong Road: Rectification of line on west side between the Broadway and the River.—Plan submitted and approved.—*Szechuen Road: Widening between Foochow and Hankow Roads.*—Decided to offer the owners compensation at the assessed rate per *mow* for portion measuring 0m. 0f. 9l. 1h. of Lot 1009 T. D. 1002, required for the widening Szechuen Road on west side.

Hankow Road.—Widening on South side between Szechuen and Keangse Roads.—As the carrying out of this improvement would necessitate the moving back of the old Quong Loong Junior Mess—the expense of which would be considerable—the Council decided that while the widening of the road is desirable, it would be too costly to carry out at present.

Lighting arrangement with the Gas Co., for changing the hours of lighting the public lamps, so that they could be lighted earlier during the winter months, was approved.

Easter Holidays.—Decided to close the Municipal offices on Good Friday and Saturday, the 26th and 27th instant.

Election of New Council.—It was decided to suggest to the Consular Body the 6th and 7th Days of April, as convenient for the Election.

Leave.—The Secretary was granted a few days' leave of absence. Mr. Pond to officiate as Secretary in the meanwhile.

HONGKONG CHAMBER OF COMMERCE.—REPORT.

The Committee have the pleasure of placing before the Chamber a report of their proceedings for the year ending December 31st, 1874. Many of the subjects which have been under consideration, and the action of the Committee in respect thereto, are doubtless already familiar to the Members, especially that relating to the "Blockade of the Port by Customs' Cruisers," the correspondence and discussion regarding which have, from time to time, appeared in the public press. It has, however, been thought advisable as a matter of record, to here recapitulate the action of the Committee, and the results which have up to the present been obtained. Beyond this subject, the past year has presented no features of more than ordinary interest to the trade of this port, and furthermore has been uneventful politically, with the exception of the Formosan difficulty, which was brought to a peaceful termination through the agency of the British Minister at Peking.

The Commission appointed by the Government to inquire into the subject (of the Blockade of the Port of Hongkong by Chinese Customs Cruisers) having completed its labours, the Committee in June last made application for a copy of the Report. This, however, was declined by the Executive, and the necessary steps were accordingly taken to address the Home Authorities. A memorial embodying the views of the Chamber was drawn up and forwarded to the Right Honorable the Earl of Carnarvon, Her Majesty's Principal Secretary of State for the Colonies: copies were also sent to the various Chambers of Commerce in the United Kingdom, as well as to several prominent Members of Parliament, requesting their co-operation in pressing the subject upon the attention of the Imperial Government.

The Committee regret that up to the present time they are unable to report any tangible results having been obtained; but they have satisfaction in stating that they are aware that the Home Government has now taken the subject in hand, and that a final decision of this vexed question may shortly be expected. Prominent among those who came forward in reply to the appeal of the Committee for co-operation, was the Manchester Chamber of Commerce, whose Committee at once addressed the Secretary of State for the Colonies, and Sir Richard Graves MacDonnell, whose letter to the Chairman is an able and especially interesting paper upon this subject.

In addition to the efforts put forward by the Chamber in this behalf, a very important and influential meeting of the community was held in the month of August, the result of which has been the publication of a pamphlet containing a complete resumé of the whole subject, together with all public documents connected therewith, which has been extensively circulated in England among Members of Parliament, and those who would be likely to take an interest in the subject.

In the month of July last, a telegram was received from the Chamber of Commerce, Bombay, urging this Chamber to co-operate with it in obtaining an acceleration of the Indian and China Mails, a revision of the terms of the subsidy by which the Company was to be allowed to run its steamers through the Suez Canal, being then under consideration by the Postmaster-General.

The question was brought before the Chamber at a Special Meeting held in August, when, after discussion, it was determined to postpone further consideration of the subject until written advices could be received from the Bombay

Chamber. Before, however, these arrived, the question of the revised terms of the subsidy had been definitely settled in London, and received the approval of the House of Commons, and it was accordingly deemed undesirable to take any further action in the matter. A very strong memorial had been forwarded by the Bombay Community, who were much more intimately interested in the proposed changes than the foreign residents in China and Japan.

The number of vessels wrecked upon the Coast within the last few years, and the unvaried and certain pilfering and looting of the cargo which always goes on, at times accompanied by loss of life, but more especially the wreck of the steamer *Canton*, which occurred just outside the port of Foochow in August last, has drawn attention to this subject. An important and interesting correspondence between the Foochow Chamber and Her Britannic Majesty's Consul at that port with reference to the neglect of the Chinese Authorities, when called upon, to afford the necessary assistance and protection in this particular case, has been carried on, but it is to be regretted that no results whatever have been obtained. Another instance is thus afforded of the impunity with which the Chinese Authorities disregard their Treaty obligations, and of the feeble attempts made by Her Majesty's Representatives to obtain redress when applied to. The question is one of no small importance to those who are largely interested in shipping, and it is hoped that some further action will shortly be taken which will be productive of more satisfactory results.

The occurrences which followed the terrible typhoon which passed over this Colony in September last, afford further proof of what is complained of above. Cargo boats, lighters and other property belonging to this Colony, which had broken away from their anchors or moorings and drifted out of the harbour, were afterwards found in adjacent waters in the possession of villagers, who had either stripped them of all that was valuable, or broken them to pieces. Claims were made for the value of this stolen property through H. B. Majesty's Consul at Canton, and although some portion has with difficulty been recovered, several claims are still unsettled.

Since the last General Meeting of the Chamber, a reply to the memorial sent to the Navy Department of the United States, has been received from the Secretary of the Navy, in which he states "that as soon as his Department is enabled to equip and employ the necessary force, in addition to its operations in the North Pacific, it will be gratified to co-operate in the Re-survey of the Coast of China, with whatever surveying forces of Great Britain or other powers may be then employed upon that work." This will, no doubt, be satisfactory to the Chamber.

The Committee have heard that it is probable that the ports of Annam, on the Gulf of Tonquin, will shortly be thrown open to foreign trade generally, and would, therefore, submit for the consideration of the Members, that in such an event, it would be desirable for the Chamber to send a delegate to that country for the purpose of obtaining information regarding its commercial capabilities. The reports that have already appeared in print have contained only scientific information.

The Committee have much pleasure in noting the establishment, within the past few months, of a Chamber of Commerce at Amoy, and its deliberations and influence will, doubtless, materially assist and benefit the common interests of foreign trade with China.

4th November, 1874.

To the Honorable P. RYRIE,
Chairman of the Hongkong Chamber of Commerce.

SIR,—I have perused with extreme interest the documents forwarded to me in yours of the 21st August last.

I am gratified to find the general Community at Hongkong is at last adequately alive to the injurious results, both to Native and British interests, arising from the vexatious conduct of Chinese cruisers to Junks visiting and leaving Hongkong.

I do not, however, see that any new principles are involved in the discussion. I have, moreover, already very fully placed on record my convictions as to the policy which should be followed. Therefore, and also because I gather from your communication that my successor has already gone into all details of the question, and has doubtless ere this placed his opinion very fully before the Secretary of State, when forwarding the Report of which you speak, I felt it would be scarcely opportune in me at present to urge my personal views on Her Majesty's Government. I am consequently precluded from, at this moment, giving the Chamber the particular assistance which you seem to ask.

At the same time, I doubt if I could urge now any arguments more forcible than those which I urged four years ago, at a time when it was my duty to press them on Her Majesty's Government.

I sincerely hope, however, that the present crisis may eventuate in some satisfactorily guaranteed undertaking by the Chinese Government, to conduct their Revenue business in a manner more in accordance with the usages of civilized nations, and not involving, as at present, an abnormal, unprecedented, and offensive breach of international courtesy—leading up frequently, as might be anticipated, to actual violation of international rights, supported no doubt by as much painfully contradictory evidence and perjury, as certainly prevailed and was proved to prevail during my tenure of office, and which such a system must always engender.

It is, therefore, on every account desirable that such an unfortunate state of things should be terminated, because such a practical Blockade as is now maintained, of a British Port in time of peace, is unquestionably most detrimental to British prestige and influence, and is consequently no less injurious to native progress than to British commerce; for I am convinced the two things are intimately connected.

I have the honor to be, Sir,
Your most obedient humble servant,
(Signed) RICHARD GRAVES MACDONNELL.

Amusements.

M. REMUSAT'S CONCERT.

Notwithstanding the lamentable demise of the Philharmonic Society at the very beginning of the present season, there has been no lack of musical entertainments in Shanghai this winter. Not to include the Amateur Negro Minstrel Performance, the festive evenings at the Club Concordia which, being of a semi-private nature, cannot hardly be counted, and the Saturday réunions at the Temperance Hall, in which vocal music largely figured, we are, in addition, able already to chronicle five exclusively musical entertainments of the most legitimate character. The concert of Tuesday evening was fairly attended, and the various numbers of the programme were, for the most part, creditably executed. We have never heard M. Rémusat himself play better than in the two difficult pieces which he contributed — one a transcription for the flute of the Solo part in Spohr's 8th Violin Concerto (the slow movement), and the brilliant Fantaisie on one of Donizetti's Operas. It is so rare to hear Orchestral music correctly played that we have much pleasure in thanking M. Rémusat for his successful effort to bring one of Haydn's beautiful symphonies to a hearing. Though all the available force of our instrumental amateurs was not mustered on the occasion, the symphony went off very well, and we have, again, specially to notice the efficient manner in which it was led. As we have now no amateur flutist, M. Rémusat himself had to give the more important portions of the flute score, and this probably accounts for a certain want of precision occasionally noticeable.

The singing was uniformly excellent, the *soprano* air meeting with special favour; which was indeed only due to the great art and finish with which it was given. The same artist performed on the pianoforte, with less success, Beethoven's Sonate Pathétique, as people will call it, though the composer never gave it any such title. A piece of such artistic importance, so well known, and, we may add, of such length, should not be attempted at a public concert, unless the executant entrusted with its exposition possesses very exceptional powers as a player—which was hardly the case in this instance. Some graceful trifle by Heller or Leduc, would, in the circumstances, have probably taken better with the audience. The Bass song from the *Africaine*, is, like all Meyerbeer's music, slenderly provided with melody, and though full of dramatic power, it suffers—partly, perhaps, for this very reason—when given in a detached form. To say that it was admirably sung, is only to repeat our usual estimate of its singer's performances. Curiosity to hear the celebrated Rose Song, from Balfe's posthumous Opera, *Il Talismano*, was, we believe, the chief motive power that led many—ourselves among the number—to the concert, and we are happy to say that the expectations created by the tone of musical criticism in London (where competent critics are to be found) were not disappointed. Balfe's melodic inspiration never deserted him, and the song under notice shows him at an advanced period of his life in full possession of the gift which won for his early production, the *Bohemian Girl*, a place in the *répertoire* of every Lyric Theatre in Europe. The song is by no means an easy one to sing. It demands a voice of very high register, the modulations of key towards the end require a very accurate ear to follow them, and the complicated, if ingenious, accompaniment adds its *quota* to the difficulties of the vocalist. The first of these difficulties might have been shirked by the easy expedient of transposition, but our Amateur Tenor decided with creditable courage to sing the song in its original key as the composer wrote it, and as Signor Campanini sang it at the first production of *Il Talismano* in Drury Lane. No Tenor, probably, except a Duprez or a Wachtel, could reach B flat in Alt with absolute ease, and it is not discreditable to an amateur that some traces of effort should have been perceptible in the attainment of so singularly high a pitch. Nevertheless, the height was well reached, and quite faultlessly as regards intonation, nor did the slight perceptible forcing of the voice much impair the general effect produced by this beautiful composition. At its conclusion, there was a general and enthusiastic redemand, but a repetition of so trying a work would have been too much to expect from an amateur, and another of less pretension was wisely substituted. This, as we must not forget to notice, was not the only occasion on which Balfe's music was heard at the concert. The lady whose artistic singing was so warmly appreciated, gave, in reply to an *encore*, the familar "I dreamt that I dwelt in marble halls." We must say, however, it was taken in so fast a tempo as to make the pleasing, if somewhat hackneyed, ballad. The other vocal items in the scheme were Mr. Wells' finished rendering of a Romance from a forgotten Opera of Donizetti's, and a duo for Soprano and Bass, by Maillart. This last concluded a concert which reflects great credit on the conductor, for the arduous efforts which its preparation must have cost him; and on the amateurs who assisted him, for the careful study which they must have bestowed on the works that they so effectively interpreted.

THE S. V. C. PARADE.

The Volunteer parade on Tuesday afternoon was a decided success. About 150 men of all arms turned out, and went through the various manœuvres with most creditable precision. The march past, and the final advance in line with the band, were especially well done, and were deservedly commended by Major Hart, at the close.

The Force mustered in front of the Custom House, Rangers on the right, Artillery second in line, and Nos. 1, 2 and 3 Rifle Companies and the Miholoongs in the order named. After the usual preliminary movements, the order was given "fours right," and the Force marched off by way of the Foochow and Honan roads and the Maloo, for the Race Course. It is needless to say that the streets were, as usual, thronged with Chinese on-lookers. A number of foreigners also had gathered in the interior of the Course, to watch the proceedings.

On reaching the Recreation Ground, column was formed on No. 1, and the whole Force was then wheeled into line in front of the Cricket Pavilion,

where the Chairman and Members of the Municipal Council were standing. A general salute was given, and the Members of Council, accompanied by Major Hart, walked down the ranks, front and rear, on a tour of inspection. They then again took upon their position in front of the pavilion, and the Volunteers were faced about and reformed into column. The whole Force then marched past in the usual order of precedence, going through the movement with steadiness and regularity. Square was then formed on No. 1 Co., the Rangers and Artillery occupying the rear and left sides. Advancing into the centre, the Civil Commandant called out the prize-winners, and handed them their certificates with a few complimentary remarks :—

Private Glass (Miholoong)—National Rifle Association Silver Medal (1st), and as member of the Winning Company Team.

Private Carnie (No. 1 Co.)—Municipal Challenge Cup for the year.

Private Milsom (No. 1 Co.)—The Ladies' Purse—which he acknowledged as follows: —I have great pleasure in receiving from you the Ladies' Prize. I only regret that one of the Shanghai Ladies has not come herself, as has been done on many previous occasions, to deliver it with her own fair hands. That was one great charm and value of the prize. However, we Volun- [illegible] interest in us they have shown, in again contributing a prize; and I, personally, for the handsome purse they have given on this occasion. I will ask you to express to them our hearty thanks, and an assurance that we will continue to look for their support.

Private Wyatt (M. H. L.)—National Rifle Association Silver Medal, (2nd) Municipal Challenge Cup (2nd), Ladies' Purse (2nd), a prize as member of the Winning Company team, and a certificate for the Gold Cross as Champion of the Meeting (which has been sent for to England).

Captain Tucker (No. 3)—The Officers' Cup.

Private Starkey (No. 3)—The first Con- [illegible] Bisley" (No. 1)—The second Consolation

Sergeant Dunman, Private Housman, Private Andrew—As members of the Winning Company Team.

Column was then again formed, and various manœuvres were gone through, ending with a general advance in line, which is a difficult movement even for regular troops, and which was performed with most creditable steadiness by the Volunteers. The order was then given to "shoulder arms," and Mr. Purdon advanced and spoke a few complimentary words. He said:—"Volunteers,—It is not often that, in performing a public duty, I have the satisfaction of feeling that *all* parties are pleased, but this is an exception. You, I trust, are pleased at the distribution of prizes, and the very creditable turn-out this afternoon. I know the community are, and the Council are pleased at being the means of expressing this appreciation. The Volunteer Corps is an organization of which Shanghai is justly proud, and which it is willing and anxious to maintain. There is no reason why it should not be 500 strong, if others who could, would do as you have done, fall in, and swell the ranks of a force of which we have reason to be proud and which would always be our protection."—Major Hart, on behalf the Volunteers, acknowledged the compliment, and said he was sure if ever the Volunteers were called on for duty, they would be found ready to perform it.

This closed the review, and the Force marched back to the Bund in the order in which it had come out, Lieutenant Groom carrying the S. V. C. colours in the centre of the line. Before dismissing the men, Major Hart complimented them on the efficient way in which they had gone through the manœuvres, especially noting the precision of the advance in line, which he characterized as perfect.

Correspondences.

THE ECLIPSE OF THE SUN.

To the Editor of the
NORTH-CHINA HERALD.

DEAR SIR,—A recent paragraph in your paper called attention to the eclipse of the sun, which is to take place on Tuesday of next week, April 6th. As it will be visible here as a partial eclipse, the following particulars of time of beginning, magnitude, &c., calculated for Shanghai, may be of interest :—

Partial Eclipse of the Sun at Shanghai, April 6th, 1875.

Beginning,	3h. 13m. 1s.	Mean Time at Shanghai.
Greatest Phase,	4h. 18m. 33s.	
End,	5h. 17m. 24s.	
Duration,	2h. 4m. 23s.	

Magnitude, 0.675 (sun's diameter being 1), or 8.1 digits, on sun's southern limb.

First Contact,	143° to left	W. of sun's N. point ,, vertex	for direct image.
Last Contact,	80° to E. 20° to left	,, N. point ,, vertex	

[illegible] two-thirds of the sun's diameter will be covered at the time of greatest obscuration. It must be borne in mind also that the predicted times of the various phases are exact, only upon the supposition that the Ephemeris of the Moon is correct; but owing to the imperfection of the Lunar Tables, the calculated times are subject to an uncertainty amounting to a considerable fraction of a minute.

By projecting the path of the total eclipse on a chart, from the data given in the Nautical Almanac, it will be found that we in Shanghai are about 600 miles north of the northern limit of total eclipse. The line of this limit, after crossing Siam, just cuts off the S.-E. corner of 40 miles south of the southern extremity of Formosa. The line of central eclipse runs a few miles south of Bankok, passes almost exactly through Hué, the capital of Annam, and runs directly through one of the largest of the Bashee Islands, south of Formosa, as it enters the Pacific.

The best *possible* place for observing the eclipse would be at a point in the Indian Ocean almost on the Equator, and S.E. of Ceylon. Here the total phase will last more than 4½ minutes. The best *available* places will be in the Nicobar Islands, the coast of Tenasserim, and in the vicinity of Bankok, Siam, at which points the totality will last from 4½ to a little less than 4 minutes. Your readers will doubtless have noticed that Her Majesty's Government have made a grant of £1,000 to aid in securing observations of the eclipse, which Mr. Hind states will take place under more favourable circumstances as to duration, track, &c., than any other one before that of April, 1893. Interesting particulars regarding the additions to our present knowledge of the sun's corona, which it is hoped will be furnished by this eclipse, will be found in the *Spectator* of January 16th.

Yours very truly,

E. C. T.

Shanghai, 29th March.

To the Editor of the
NORTH-CHINA HERALD.

DEAR SIR,—Will you kindly allow me, through the medium of your valuable paper, to draw the attention of the public residents at the Treaty ports to the following, which may be fairly termed a serious breach of propriety, and great carelessness of the value of human life on the part of the commander, or officers in charge of H. C. I. M.'s training ship *Kienwei*.

The facts of the case are as follows:—Standing on the evening of the 29th of January at my door steps, in conversation with a gentleman, we were surprised to hear a shot fired from the *Kienwei*, in a direct line for us, and still more was our astonishment when a rifle bullet passed over our heads within a few feet. On going on board ship and making complaints to the Captain, our observations, in place of being taken with gravity, were treated with an amount of levity not at all pleasing.

Let us hope that in future more care will be taken in the use of firearms on the part of those entrusted with them on board Chinese vessels, or more serious results may occur, which may lead to stricter investigation from those in high authority.

Respectfully yours,

NOT BULLET PROOF.

Keelung, 10th March.

Miscellaneous.

EASTER-DAY IN OUR CHURCHES.

Sunday last, being Easter-day, was observed in the Churches of the Settlements with special services set apart for that day; and, carrying out the now customary practice both at home and abroad, the sacred buildings were more or less decorated for the occasion. Trinity Church, however, went least out of its ordinary course in this respect, the altar only being ornamented, on it being erected a floral cross. The Anthem sang was "Why seek ye the living amongst the dead?" by Dr Hopkins, organist of the Temple Church, London; with Boyce's *Te Deum*, the Psalms being chanted both morning and evening. In the morning, the Rev. Canon Butcher preached from Mark xvi., verse 2; and in the evening from Matthew vi., verse 13.

The Church of Our Saviour, Hongkew, was more elaborately adorned, the ladies of the congregation having displayed much industry and taste in the arrangement of the decorations. Over the altar was the sentence, in coloured letters, "The Lord is risen indeed;" and over the pulpit, another sentence, "Blessed are they that have not seen, yet have believed;" crosses composed of white camelias were placed on the pulpit and font, the altar-cloth being further ornamented with white camelias, having a cross of red ones in the centre, while on the altar itself stood another cross of white camelias. There were other decorations of a similar kind, and altogether a very pleasing effect was produced. An appropriate Easter Anthem was sung, and the pastor, the Rev. G. B. D. Miller, preached from John xx., verse 29.

At St. Joseph's Roman Catholic Cathedral the services were of a profusely ornate character. The altar was as usual decorated with flowers, and around the building were hung a number of bannerets of various colours; while the ordinary choir, strong in itself, was supplemented by the band of the French ironclad *Montcalm*. Vice-Admiral Kranz, with his staff, the Captains and Officers of the *Montcalm*, *Couleuvre*, and *Volta*, and upwards of two hundred seamen and marines, were present, in full uniform; as were also the officials of the French Consulate-General. Somewhat in imitation of the gorgeous ceremonial at St. Peter's, the seamen and marines were drawn up in line down the middle of the Cathedral, while near the altar was stationed an armed guard composed of about half-a-dozen marines. The Mass was what is termed "plain chant," with the exception of the part following the consecration, when, with a full burst of music,—organ, band, and choir—was sung a magnificent "O Salutaris Hostis," with thrilling effect, the service concluding in the ordinary manner.

Both on the entrance and departure of the Vice-Admiral and his Staff, with the officers of the squadron, the band played in subdued tones. There was a crowded congregation of foreigners and Chinese, but principally of the latter, and they seemed to be deeply impressed with the brilliancy and solemnity of the unwonted scene before them.

Law Reports.

U. S. CONSULATE-GENERAL.

Shanghai, 25th March.

Before GEO. F. SEWARD, Esq., *Consul-General.*
W. S. WETMORE, F. D. HITCH, J. C. ALLEN, } *Associates.*

The MUNICIPAL COUNCIL *v.* W. H. FOGG.

Claim for Tls. 350.70, *Arrears of Land-Tax.*

This morning, the Court delivered the following judgment, which had received the unanimous assent of the associates :—

The leading question which has been raised in the case is the one whether the Land Regulations are of binding effect upon citizens of the United States.

A conclusion upon this point may be most readily reached by a review of the Treaty stipulations which affect it, and a statement of the nature of the Regulations and of the manner in which they have been issued.

The British Treaty of 1842 contains the first stipulations, under which the port of Shanghai was opened to foreign trade. They are as follows :—

Article II.—"His Majesty the Emperor of China agrees that British subjects, with their families and establishments, shall be allowed to reside, for the purpose of carrying on their mercantile pursuits, without molestation or restraint, at the cities and towns of Canton, Amoy, Foochowfoo, Ningpo, and Shanghai; and Her Majesty the Queen of Great Britain &c., will appoint Superintendents, or Consular officers, to reside at each of the above-named cities or towns, to be the medium of communication between the Chinese authorities and the said merchants, and to see that the just duties and other dues of the Chinese Government, as hereafter provided for, are duly discharged by Her Britannic Majesty's subjects."

The next stipulations are contained in the British Supplementary Treaty of 1843 and are as follows :—

Article VII.—"The Treaty of perpetual peace and friendship provides for British subjects and their families residing at the cities and towns of Canton, Fuchau, Amoy, Ningpo and Shanghai without molestation or restraint. It is accordingly determined that ground and houses, the rent or price of which is to be fairly and equitably arranged for according to the rates prevailing amongst the people, without exaction on either side, shall be set apart by the local officers in communication with the Consul, and the number of houses built, or rented will be reported annually to the said local officers by the Consul for the information of their respective Viceroys and Governors, but the number cannot be limited seeing that it will be greater or less according to the resort of merchants."

The next are those of the United States Treaty of 1844, as follows :—

Article XVII.—"Citizens of the United States residing or sojourning in any of the five ports open to foreign trade shall enjoy all desirable facilities to obtain houses and lands suitable for their purpose, or to lease of the people lands on which to build houses and warehouses or shops, also hospitals, churches and cemeteries. The local authorities of the two Governments will select in concert the sites, having due regard to the feelings of the people. The parties interested will arrange between themselves the rates of rents, the proprietors on the one side not demanding exorbitant prices, the purchasers on the other not insisting in an unreasonable manner on certain points, but each conducting with justice and moderation."

The French Treaty, made at a later date in the same year, contains stipulations which I translate as follows :—

Article XXII.—"Every Frenchman who, in conformity with Article II of this Treaty, shall arrive at one of the ports open to foreign trade, may, whatever the length of his stay, rent houses and storehouses for the disposal of his merchandize, or rent land and built houses and storehouses himself. Frenchmen may in the same way establish churches, hospitals, almshouses, schools, and cemeteries. To this end, the local authorities, after having arranged with the Consul, will designate the quarters most suitable for the residence of Frenchmen and the sites where they may place the buildings mentioned. The terms shall be freely discussed between the parties interested, and regulated so far as may be by the average of local prices. The Chinese authorities shall prevent their people from overcharging or requiring exorbitant rates, and the Consul on the other side will take care that Frenchmen use no violence to procure the consent of the proprietors. It is moreover well understood that the number of houses and extent of ground, to be set apart for Frenchmen in the ports opened to trade, shall not be restricted, and shall be fixed according to the need and convenience of those having rights. If the Chinese desecrate or destroy the French churches or cemeteries, the guilty shall be punished with all the rigor of the laws of the country."

These are the provisions of the first Treaties, and they are not varied essentially by later ones.

It cannot be held, I think, that there is anything in these Articles which gives in specific terms to the Foreign Powers concerned, the right to set up at this port Municipal Regulations, that is to say Regulations for the establishment and control of a police force, and the administration of roads, sewers, public wharves, &c.

The several Treaties, however, provide that citizens of the several Foreign Powers shall be amenable only to the authorities of their respective countries, or to those authorities acting in conjunction with the native authorities. The appropriate Articles of the United States Treaty of 1844 may be taken to indicate the spirit and scope of the provisions of all the Treaties in this respect. They are as follows :—

Article IV.—"For the superintendence and regulation of the concerns of the citizens of the United States doing business at the said five ports, the Government of the United States may appoint Consuls, or other officers at the same, who shall be duly recognized as such by the officers of the Chinese Government, and shall hold official intercourse and correspondence with the latter, either personal or in writing, as occasion may require, on terms of equality and reciprocal respect."

Article XXI. * * * *

"Citizens of the United States, who may commit any crime in China, shall be subject to be tried and punished only by the Consul, or other public functionary of the United States thereto authorized according to the laws of the United States."

* * * * * *

Article XXIV. * * * *

"And if controversies arise between citizens of the United States and subjects of China, which cannot be amicably settled otherwise, the same shall be examined and decided conformably to justice and equity by the public officers of the two nations acting in conjunction."

Article XXV.—"All questions in regard to rights, whether of property or person, arising between citizens of the United States in China, shall be subject to the jurisdiction, and regulated by the authorities of their own Government. And all controversies occurring in China between citizens of the United States and the subjects of any other Government shall be regulated by the Treaties existing between the United States and such Governments respectively, without interference on the part of China."

These Articles, more or less, perfectly exempt all citizens of the United States from the control of the Government of China.

It would be possible at this point to indicate the difficulties which, in the course of the development of foreign intercourse with China and in view of these peculiar provisions of the Treaties, might be expected to arise in the administration of Municipal affairs, at this and other ports of the Empire. I am not, however, so much concerned now with these difficulties as with the means which have been taken to meet them.

The first code of Land Regulations was prepared by Captain Balfour, H. B. M.'s Consul and Kung Mookew Intendant of Circuit, at Shanghai, in 1845. They were promulgated by the Intendant in a Proclamation, which has been translated as follows :

Proclamation.

"Kung Mookew, Imperially appointed Intendant of Circuit of Soochow-foo, Sungkeang-foo, and Taitsang-chow, and Superintendent of Customs in the province of Keangnan, again issues a Proclamation in accordance with the Treaty.

"In the year 1842, the Imperial commands were received in reply to a Memorial permitting commercial intercourse being carried on at the five Ports of Kwangchow, Fuhchow, Heamun, Ningpo and Shanghai, allowing merchants and others of all nations to bring their families to reside there, and providing that the renting of ground for the building of houses, must be deliberated upon and determined by the local authorities in communication with the Consul, both acting in conformity with the feelings of the local inhabitants, so that mutual and perpetual harmony might be attained.

"Hence it has been determined, in conformity with the feelings of the inhabitants and the circumstances of the locality of Shanghai, that the ground North of the Yang-king-pang and South of Le-kea-chang should be rented to English merchants, for erecting their buildings and residing upon, and some Regulations which have been agreed upon in reference thereto, and to which obedience is necessary, are hereinafter specified."

This Proclamation and the Regulations mentioned in it were sent by the Intendant to Captain Balfour with a letter of which the following is a translation :—

"I now take all the Regulations first and last agreed upon by us in communication together, in accordance with the Treaty, which have already been separately published by me, the Tautai, and hung up at the Custom house, and specially forward a copy thereof, requesting the Honorable Consul will examine into, translate, and publish them generally for the information of all renters of property North of the Yang-king-pang, that they may act in obedience thereto. Wherefore I write this, wishing the Consul daily happiness."

The code of Regulations thus framed and promulgated, was enlarged and extended in 1854. It was declared in a notice issued by the Consuls for Great Britain, the United States and France, that these amended Regulations had received the approval of their respective Ministers, and of "His Excellency Woo, the chief local authority representing the Chinese Government at Shanghai."

Another code of Regulations was prepared at Shanghai, in 1866, by the community in public meetings assembled, with the advice of the Consular body, and the Judge of the British Supreme Court, and proclaimed in 1869 by the Ministers of Great Britain, Germany, France, Russia and the United States. They have more lately received the approval of the representatives of other Governments, and at different times that of all the foreign Governments concerned.

The Land Regulations of 1845 and 1854, were then the joint issue of the local representatives of the Chinese Government, and of the foreign officials concerned. The acts thus performed by the Chinese officials have remained unquestioned by the Chinese Government for a very long period, and being within the immediate view of the Government may be held to have been accepted by it.

The acts thus performed by the representatives of the United States, and approved by the Government, by its Secretary of State, may be remarked upon as follows :—

The Minister and Consuls for the time being of the United States in China are authorized by an Act of Congress to make Decrees and Regulations for certain purposes. I long since pointed out the limited scope of this authority, and my view was approved by the Government. Without entering here upon the argument that was involved, I may say simply that it cannot be held to cover the case now in question. It is moreover true that the procedure taken by United States Officials in this case has not been conformed to the Act, and the Regulations would fall if based upon supposed procedure of the kind.

It may, however, be held that the Regulations should be regarded as the issue of the Chinese authorities, and that our action indicates only our approval of them.

Instances of analogous action may be found in the Harbour and Pilotage Regulations. These were published by the territorial authorities. Our approval was first procured, and is taken to mean that we admit the right of the Government to make the given Regulations, and will support them as Regulations, which are, and of right ought to be, of binding effect.

We come now to a logical position. What is there in the Treaties which may be construed to mean that China has yielded jurisdiction over her territory? What are all Municipal Regulations but an assumption of a certain jurisdiction of the sort? If we hold such jurisdiction, we do it then by delegation from China, which delegation is outside of Treaty stipulations, although it may be held to be a normal result from them.

It will be at once said that we are treading upon delicate ground, for, if we hold our municipal functions by delegation from China, she may at any time withdraw her consent to our exercise of them, and the whole municipal system falls.

To this I answer that, while foreign Courts can enforce the Regulations as the right and proper issue of the territorial sovereignty which the foreign governments have approved as such, foreign officials may in their political capacity defend the Regulations and claim that they shall be held intact, as being part of an agreement or contract entered into between the sovereignties involved. They have been solemnly framed and promulgated. Properties have been bought, and moneys have been invested under them. The comfort, convenience, health and good order of a vast population are at stake. Under these circumstances, many cogent considerations can be adduced in defence of the Regulations and against the right of the Chinese to abrogate or change them without our consent.

We are moreover so situated in virtue of the exterritorializing provisions of the Treaties, that it would not be easy to enforce any Regulations without our consent, and we are thus able to exert a certain pressure upon the authorities to uphold such Regulations as we deem right. The authorities have uniformly shown a disposition to give us all reasonable support and aid in Municipal matters and, if we act reasonably, may be expected to continue to do so. The situation then is not one which need excite apprehensions.

It will not be overlooked that the systems of municipal control existing at Shanghai and at other places in China are not uniform. The Chinese have united with us here in framing and proclaiming Regulations. At other ports they have leased lands outright, and in this and other ways agreed to leave Municipal matters to the sole control of the foreign authorities and residents. But the fact that Municipal powers have been delegated elsewhere in some other way than has been done here, is not material, so long as we recognize the principle that such powers are to be considered as coming to us by delegation outside of the Treaties, and take due notice of the terms of the given delegation.

I have no special knowledge of the method or methods under which Municipal matters are managed at the different foreign settlements of Japan. As the Treaties of Western states with that Empire are similar to those with China, we would expect that questions of Municipal Government would be met there in much the same way as in China. But being of later date, they ought to be more perfect, and should indicate to us the result of matured study in this connection. Perhaps, then, the fact that Municipal matters there have been left more or less perfectly to the territorial authorities, will illustrate the principle which I have advanced.

It was remarked in the course of the hearing of this case, that the Land Regulations of 1869, have not received the formal sanction of the native authorities. Upon this point I have to say that those Regulations are essentially the same as the code of 1854. Moreover, they were communicated to the local authorities in 1869, and have never been objected to by them. They have on the contrary been consistently sustained and enforced. I see no reason therefore why the same legal effect should not attach to them as to those of earlier date.

So far as I am able to judge, the taxes now sued for were regularly assessed under the Regulations.

I believe also that I have no authority to review or correct the assessment. I am nevertheless of the opinion that assessments should not be based upon the title-deeds without reference to or consideration of the areas actually occupied by the individual and the public. Six fourteenths of the land of the defendant is in the occupation of the public, and he is taxed for the whole area at the same rate per mow as another bund lot holder, whose title-deed calls only for the area within fences, the real value per mow of the respective lots being admitted to be the same. This is not just, and I trust that the Council will find it convenient to compromise with the defendant upon some equitable basis, as many preceding Councils have done, or to bring the question before the Ratepayers for instructions. In such case it will be appropriate for the Council to assume the costs of this suit, the Defendant having continuously and consistently offered to settle the matter in an equitable way. As a matter of law, however, I have no recourse, but to give the case with costs against the defendant.

March 24th.

Before Geo. F. Seward, Esq., *Consul-General.*

Charge against a Seaman.

A seaman of the *Marmion*, named Carnagie, was charged with drunken and disorderly conduct, and with having gone to a stateroom of the ship, which was used as a larder, and with another person causing two hams to disappear.

The master of the ship deposed that the prisoner had given him much trouble, and fomented a feeling of dissatisfaction among the others of the crew.

Prisoner admitted that he was drunk at the time specified in the charge, and did not know what he was about.

The case was dismissed, the master being authorised to charge against the prisoner's account the price of the two missing hams.

March 26th.

Before Geo. F. Seward, Esq., *Consul-General.*

Unlawfully cutting and wounding.

Charles Mills, keeper of a grog-shop in Hongkew, and who has been before the Court on previous occasions, charged with offences of violence, was brought up to-day charged with unlawfully cutting and wounding Michael Regan and James Hayes, firemen of the *Lotus* and *Bengal* respectively. It appeared that several firemen of the *Lotus* went ashore early in the day, and found their way into the prisoner's place. The men were noisy and he ordered them out, taunting one of them with having stolen something from a shipmate fifteen months ago. The men left the house, and seem to have remained on shore all day, as they went back to the house in the evening the worse for liquor. Mills had also been out drinking, and returned home about the same time. A disturbance commenced, and soon assumed a serious aspect. Bottles and other missiles were thrown in all directions, inflicting more or less injury upon several of the combatants. It is said that three of the *Lotus* men were not so drunk as the others, and tried to quell the tumult, but could not do so. Mills is stated to have armed himself at first with a sort of life-preserver, with which he struck right and left, and he was afterwards seen using at different times a slung-shot and a small sword. With these weapons he inflicted some severe wounds on two or three of the *Lotus* men, who, however, defended themselves vigorously, and mauled Mills rather seriously about the head. Hayes, the *Bengal* man, was said to have been lying on the floor of the bar, in a state of intoxication, having taken no part in the melée, when Mills, having succeeded in driving the others into the street, made a cut at him with some weapon, inflicting a serious wound on his head. This man was seen crawling out of the bar into the street, on his hands and knees, bleeding profusely, and he lay in the gutter for some time longer while the affray was continued around him. It is not clear how this disgraceful scene terminated, but eventually Mills was taken into custody, and charged as above stated. He was found to have received a severe beating; one of the *Lotus* men had received two or three cuts on the wrist, and another's eye was injured. Dr. Macgowan was called to attend Hayes, and he found that, in addition to the cut on the head, the man had also received a punctured wound under the left eye. Neither of the wounds were, however, of a dangerous character, but it was thought advisable to keep Hayes at the Hongkew Police Station all night.

Prisoner's defence was that the men became quarrelsome among themselves, and used obscene language. He endeavoured to turn them out, but was immediately attacked with soda water and other bottles. He defended himself as well as he could, and at last succeeded in turning them out, when there was a free fight in the street, and he was himself knocked down and kicked about the head. He denied using any of the weapons alleged.

The Court, however, considered the evidence was against the defendant, and sentenced him to fifteen days' imprisonment for each offence.

MIXED COURT.

Shanghai, March 25th.

Before the Chinese Magistrate Chen, and Dr. Yates, U. S. Assessor.

Robbery from the Person.

A well-known Chinese thief was charged with stealing a gold watch, chain, locket, finger-ring and miniature compass, the property of a foreigner. About two o'clock on Tuesday morning, the foreigner was riding in a jinriksha along the Bund, and was accosted by the prisoner, who offered to conduct him to a house of entertainment. The offer was accepted, and the prisoner was invited to take a seat in the 'riksha, which he did, and the pair rode together to the Kiangse road, where the prisoner got out and went away, making some excuse. Almost immediately, the foreigner discovered that his watch and trinkets, which he valued at $270, were also gone. Pursuit was useless, but information given at the Central Police Station led to the discovery and capture of the thief. It was ascertained that a man (who turned out to be the prisoner) had been offering a gold watch in pawn, and he was brought to the Station. He of course denied that the watch he had was the one in question, and as the foreigner could not remember either name or number of his, the case seemed difficult. Inspector Fowler, however, made the prisoner strip, and under the hollow of his foot was found the chain and other trinkets. How he managed to walk, was a mystery, but the discovery proved the case against him. The articles were shown to the foreigner, who was then on board a steamer bound to Japan, and he identified them as his.—Upon this testimony, and without requiring the attendance of the prosecutor, Chen was satisfied of the guilt of the accused, and sentenced him to a month's cangue, and 200 blows with the bamboo.

Jinricksha obstruction at the Club Concordia.

Two jinriksha coolies were charged with obstructing the entrance to the Club Concordia with their vehicles. Sentenced to 30 blows each. Inspector Wilson asked that they should also be cangued at the place, but Chen refused.

March 31st.

Before the Chinese Magistrate Chen, and A. Daverport, Esq., British Assessor.

Charge of Highway Robbery and Assault against Li-kin Runners.

Two *Li-kin* runners were charged by John William Walker with the above offence.

Prosecutor deposed that on Monday night, about eight o'clock, he was going along the Kiangse road with his coolie. They were in a jinriksha. The accused came up to the vehicle, and in the presence of a foreign constable and other persons, pulled prosecutor and the coolie out of it. Prosecutor asked the foreign constable to protect him, and he said he could not do so. One of the *li-kin* runners took hold of the coolie by the *queue*, and after beating him, dragged him to the Central Police Station. Prosecutor also went there. The coolie was so badly beaten that he (prosecutor) was obliged to call in Dr. Little to attend him, and he had given a certificate to that effect. Prosecutor was also knocked down and beaten in the road, but not so badly as the coolie. They all went to the Central Police Station, prosecutor going by another

route to that taken by the runners and the coolie. They were pulled out of the jinriksha because he (prosecutor) had some property in it. The foreign constable stood by and saw it done. The property was opium. It was in the jinriksha. It was not exposed to view. It was on the person of his coolie. At the Central Police Station, he asked Inspector Fowler to detain the opium till the following morning, but he refused to do so.

Mr. DAVENPORT—Where were you beaten?

Prosecutor raised his left arm, and pointed to his hand and wrist, and also to his side. The coolie was beaten much worse; and, if the Court wished it, he (prosecutor) could produce Dr. Little's certificate as to his condition.

Mr. DAVENPORT—The Court wish you to produce it.

Prosecutor said he had not got the certificate in his pocket, but would fetch it. He left the Court, but in a few minutes returned, and asked—Will you permit me to go home for it?

Mr. DAVENPORT—It is not worth while.

Prosecutor—But I have got it. Next morning I told Mr. Fowler so, and he said he did not care a —— for Dr. Little's certificate.

Mr. STRIPLING said he did not believe Mr. Fowler would utter such an expression.

P. C. Wright (13), the foreign constable alluded to, deposed that he saw the coolie pulled out of the jinriksha. The prosecutor was not pulled out—no one touched him in his (witness's) presence. He did not see the coolie beaten.

By Prosecutor—You did not ask me to protect you. You asked me to take you to the Police Station, and I told you that you could go there if you liked.

Mr. DAVENPORT (to Prosecutor)—Why have you not brought your coolie here?

Prosecutor—Because he is sick; I could not bring a sick man here.

Mr. DAVENPORT—Then why did you not bring Dr. Little's certificate, saying so?

Prosecutor—I did not imagine Dr. Little's certificate would be required.

Mr. DAVENPORT—It is required, because you bring a charge of highway robbery with violence against the defendants, and you say your coolie was so badly injured that he cannot appear here, while your own witness has gone against you.

Prosecutor—What witness?

Mr. DAVENPORT—The policeman, Wright.

Prosecutor—Oh, yes; of course. I want to see the bail-book, as I suppose entries are made at the Police Stations when persons accused are released? I suppose this was entered. I should like to see the book here.

Mr. STRIPLING said it was not customary to show the bail-book at any person's request.

Prosecutor—Well, then, the refused charge-book; I want to see if my charge is entered.

Mr. STRIPLING—The police do not take every charge you may choose to make.

NE SING SHA, one of the accused, deposed—I heard privately that seven balls of smuggled opium were being brought along the Kiangse road in a jinriksha. I called police, when it came up, and ordered the jinriksha coolie to stop. I told the coolie inside to get out of the vehicle, and come with me to the Police Station. On my saying that, the prosecutor, who was also inside, began to beat me with his hands. After that, the coolie came out of the jinriksha, and we took him to the Police Station. Prosecutor went there with P. C. Wright, but by another direction. Two balls of opium were concealed in each of the coolie's sleeves, and three others under his outer clothing. The coolie was not struck at all. I only took hold of him by the arm.

Prosecutor—Dr. Little can prove whether that is true.

Inspector FOWLER stated that it would appear that the coolie could not have been pulled about much, as none of the opium had fallen from his clothing. The coolie's clothes were dusty, but he did not seem to be hurt when brought to the Police Station. He said he had been assaulted. He walked away from the station, carrying the seven balls of opium, as though there was nothing the matter with him. If the Court wished, he (Mr. Fowler) would explain why he did not detain the opium at the prosecutor's request.

The COURT did not ask for the explanation.

Prosecutor muttered something several times about Dr. Little and the certificate, and Mr. DAVENPORT told him not to interrupt the Court. Dr. Little was not present, or the Court would be glad to hear what he could say in the matter. But he was not there, neither had the prosecutor thought proper to bring the certificate. The Court must be guided by the evidence before it

The evidence having been interpreted to Chên,

Mr. DAVENPORT said to Prosecutor—Your case has broken down as you have proved nothing. The prisoners are discharged.

Prosecutor—I did not come here to prove it; I'll go before Mr. Medhurst. I only came here to make a statement.

Mr. DAVENPORT—Why did you come here taking up the time of the Court? Go away.

Prosecutor left the Court, expressing his intention to take the case before H.B.M.'s Consul.

POLICE COURT.

Shanghai, 31st March.

Before R. A. MOWAT, Esq.

R. *v.* GEORGE WHITE.

Defendant is a fireman, at present living at the Sailors' Home. He was charged with assaulting a native police sergeant and a constable, in the employ of the Municipality, at half-past twelve on Monday night.

Acting-Superintendent STRIPLING, in stating the case, said there were five or six men together in the Broadway road at the time named, and the defendant interfered with a barrow coolie. The native constable tried to prevent him, when the defendant struck him, and on the sergeant coming up, defendant kicked him on the leg. A tree had also been broken, and defendant had a branch of it in his hand.

Defendant said there were six men in company, and it was one of the others, and not him, who committed the assault. The Police took him (defendant) because they could not take any of the others. He had had a little drink, but was not drunk.

Mr. STRIPLING said that defendant's statement with respect to none of the other men being taken, was false. Three of the others went to the Police Station, but defendant was identified as the man who committed the assault.

The native sergeant gave evidence against the defendant, identifying him as the man who assaulted him.

A foreign Constable deposed that he did not see the assault committed, but saw the Chinese constable trying to take the defendant into custody. He (witness) went to the defendant, and told him he had better go to the Police Station, and he went there with three others.

Defendant, in answer to a question by the Court as to whether he could pay a fine, said he did not know, he was paid off from his ship a fortnight ago, with $71.

His WORSHIP ordered the case to stand over for a little while, in order to ascertain from Mr. Bowen, Superintendent of the Sailors' Home, what the defendant's means were.

Ultimately, the defendant was fined $4; in default, a week's hard labour. The fine was paid.

Clippings.

The steamer *Fu-yew*, Captain Croad, left Hongkong on the 26th ulto. at 11.30 a.m. Arrived at Shanghai on the 31st. Had thick foggy weather from Hongkong to the White Dogs; thence to Namki, strong N.E. and N.W. winds, with much rain, thunder and lightning. Then had strong N.W. winds and cloudy weather to arrival. Passed a Chinese Frigate, bound same way, off Namki, on the 29th.

The s.s. *Yunching*. Captain Gibbon, left Tientsin on the 27th ult., passed the steamers *Shanse* in the river, and *Taku* inside the bar bound up. Passed H.M.S. *Dwarf* bound westward. Rounded Shantung Promontory at 11.30 p.m. Passed Shaweishan on the 30th at 4 p.m. Anchored at the Lightship at 7.10 p.m. same day. Arrived at Shanghai at 7.30 a.m. Had a heavy N.W. gale from the Promontory to Shaweishan, remainder of passage moderate breeze and squally weather.

The American Barquantine *Samos*, Captain Bryant, left Newcastle, New South Wales on Jan. 28th, and arrived at Shanghai on the 25th inst. At 10 a.m. on the 10th inst., passed an unknown reef, which appeared to be about three quarters of a mile in length North and South, and about half a mile wide East and West; the sea breaking heavily on it. Capt. Bryant considers the reef to be just awash, and from reliable observations taken the same day and for several days previously and subsequently, places the danger in Lat. 10.37 N. and Long °114.50 E.

On Monday morning, at about half-past two o'clock, a burglary was committed at the house of a foreigner, residing in the French Settlement. The house was entered through the back door, and a clock, two table-cloths, a hearthrug, and other property carried off. The affair was reported at the French and English Police Stations, and in the forenoon, two Chinese were captured in the English Settlement, with the property in their possession. They were taken next morning before the French Mixed Court, and remanded.

We have received a number of books from Messrs. Kelly & Co., for review.

"Remains of Lost Empires," by P. V. N. Myers.—Harper & Brothers, New York.

"The Vatican Decrees." by W. E. Gladstone.—Harper & Brothers.

"The Island of Fire," by Rev. P. C. Headley.—Lee & Shepard, New York.

"Lost for Love," by Miss Braddon—Harper & Brothers.

"In Honor Bound," by Charles Gibbon—Harper & Brothers.

"Jessie Trim," by B. L. Farjeon,—Harper & Brothers.

"Hagarene," by George A. Lawrence—the American News Company, New York.

"The Life and Habits of Wild Animals, illustrated from designs by Joseph Wolf, with descriptive letter-press by Daniel Giraud Elliot"—Harper & Brothers.

A Japanese lady has invented means of reconciliation between quarrelsome partners, which should not be confined in practice to that part of the world. Having quarrelled with her husband, she decided upon dying. Not content with relinquishing this dreary world, she endeavoured to do it at the greatest possible sacrifice. She bit out her tongue and awaited death. Fortunately for all parties, death did not arrive as soon as her husband. She was therefore saved. And now Nakamura has a model wife. When he complains of the toughness of his steak, she can merely look at him. Turning his eyes in another direction, he can make the most satirical comments upon feminine economy; can wonder why women never do learn how to keep down the grocer's bill to save a portion of their husband's salary; can assure her that a little variety of delicacies for breakfast is something that any women of sense could find; can grumble at the milliner's bill, and growl about the coal being all out, without receiving a word of remonstrance. He can tell her why the baby cries without being challenged to remedy the evil, and can generally enjoy himself without danger of a squall. Why should Japan monopolize such a boon?—*Am. paper*

We have seen a great deal of nonsense written about China in London papers, but nothing to beat the following extract from the *Daily Telegraph*. "His poor little Majesty, Toai-shun Aisin Kioh-lo Tung-chi, Emperor of China, has departed this life. If we could hear this event with Chinese ears, it would be perfectly simple to comprehend and explain why the weather has of late been so gloomy and unpleasant. His Majesty was Tientsye, or Son of Heaven, and, as even foreign devils must be aware, First Cousin of the Moon and Brother to the Sun. It would not be unnatural, therefore, for pigtailed people to ascribe the absence of the solar orb day after day, and the frantic conduct of the elements, to deep concern at the demise of one who

stood in such close relation to the powers of the universe. The subjects of his late Majesty will indubitably think that the cyclones which devastated the China coast towards the close of the year 1874 were symbols of the coming disaster—signs that Ai-sin Kioh-lo Tung-chi, eighth in descent from Shun-che, first of the Ming dynasty, was about to join his great relations in the realms above."—A more complete tissue of twaddle and blunders could hardly be penned.

The working of the Foreign Jurisdiction Act of 1843 is again apparent. For a considerable time British shipowners resident in North China and Japan have been subjected to great inconvenience and uncertainty in the matter of registering their title, and by parity the nationality of the ships they became possessed of. This blot has at last been removed by the approval of Shanghai as a foreign port of registry for British ships, and we are glad to find by the *London Gazette* of the 19th inst. that the Queen has been graciously pleased to appoint William Handyside Tapp, Esq. (with whom we are informed the project originated), Her Majesty's Registrar of Shipping at Shanghai. Mr. Tapp, who is well-known and deservedly appreciated, both at home and in the sphere of his past duty, has been over ten years in the Consular service at Shanghai, and is thoroughly conversant with the procedure of registry and merchant shipping law, and further has, as may be expected, an intimate knowledge of the local requirements. We are informed that the appointment is most popular. It must be, however, borne in mind that the Registrar elect will not, under the terms of the Order in Council, be enabled to exercise his functions until a month after his appointment has been duly posted in the Consular offices at Shanghai.—*Civilian*, 23rd January.

The steamer *Glenfinlas*, Captain H. G. Wilcox, R. N. R., left the Downs Jan. 30th. Experienced light Easterly winds to Cape Ushant, and fresh Southerly winds with N.W. swell to Gibraltar, arriving there at 5 a m. on the 4th Feb. From thence to Cape Casine had strong N.W. winds and heavy swell, ship rolling heavily. Arrived at Malta on Feb. 8th, and left the same day. Arrived at Port Said on the 12th. On Feb. 14th, during the passage through the Canal, struck something and damaged propeller. Anchored in the Lake Ismalia. Arrived at Suez at noon on the 15th. Left same day, and experienced thick hazy weather in the Red Sea. Passed Perim Island on the 20th. Had strong head winds and sea to Cape Guardafui, and light N.E. winds to Point de Galle. Arrived at Singapore, March 9th. Left on the 11th, and had moderate N.E. winds during the first and strong head winds during the latter part of passage to Hongkong. Arrived on March 17th, left on the 20th, and arrived at Shanghai on the 24th, at 3 p.m. Had strong head winds and sea throughout. Vessels spoken during the passage :—February 26th, s.s. *Sarpedon*, bound West, Lat. 9.38 N., Long. 66' 9 E.; Feb. 28th, s.s. *Mandalay*, bound Rangoon, Lat. 8.13 N., Long. 73.35 E.; March 3rd, ship *Canterbury*, bound West, Lat. 5.45 N., Long. 84.45 E.; March 4th, s.s. *Glenroy*, bound West, Lat. 5.47 N., Long. 88.30 E.; March 22nd, s.s. *China*, bound South-west, off Tongying Island.

The British ship, *Champion of the Seas*, Captain Wilson, reports : Left Cardiff on Nov. 7th. Crossed the Equator on Dec. 2nd, in Long 31° W. Passed the Meridian of Greenwich Dec. 22nd, and South Cape of Tasmania on 24th Jan. Came through the Great Eastern Passages, experiencing strong squally weather in the vicinity of the New Hebrides, during which lost considerable canvas. From thence to port fine weather, making the passage in 128 days. In Lat. 27° 43' S. and Long. 28.33' W., about 3 p.m., sighted a dismasted ship to leeward; kept away, and on nearing her found her to be the iron ship *The Foundling*, of Liverpool, on fire. Every particle of woodwork had been destroyed, and her sides were red hot, at every roll emitting steam. It was the intention of Capt. Wilson to scuttle her if possible, as she had still apparently four or five hundred tons of coal in the hold in a fierce glow. But the weather being threatening the idea was abandoned, and the *Champion of the Seas* proceeded upon her course; that night it was very squally, and fore topgallant sail was split. Although a good look out was kept, no signs of the crew were to be seen, and Captain Wilson believes that they had been picked up, as the vessel was directly in the track of outward and homeward bound vessels.

COMMERCIAL INTELLIGENCE.

SHANGHAI, MARCH 31st, 1875.

Arrivals—On 24th and 25th instant, the s.s. *Glenfinlas* and *Bengal* from London, and yesterday, the M. M. steamer *Peiho*, with the English mails of 12th ultimo. Also, the sailing ship *Titan*, from New York.

Telegrams.—Nothing new under this heading.

Piece Goods.—Advices from Tientsin extend to 24th instant. At that date, confidence with regard to the *Li-kin* trouble had not been restored. On the 27th, the S. S. *Shantung* brought down news that the Territorial Taotai, Wu, had issued a proclamation, enjoining tradesmen and others to re-open their shops (which had been closed) and to resume business, intimating at the same time that he had *proposed* to Sun—Customs' Taotai—the abandonment, for the present, of his recent obnoxious imposition, and the adherence to "existing regulations." But his proposition apparently fell short of the requirements of the case; and, although Wu has assured the people that H. E. Li—the Viceroy—"is uniformly influenced by feelings of tender compassion, and cannot refuse his favor in compliance with the request"—to repeal the edict in question—the dealers still "waste time in doubtful hesitation;" nor will they be satisfied with anything short of its annulment under Li's own seal—so say the Northern agents stationed here.

Hankow, 27th March.—"A considerable business in imports" is reported, but prices there have still to advance, ere they are on a level with those current here. In *Grey Shirtings*, the heavy makes alone seem to have improved, and the best chop of them is not yet over Tls. 2.80 per piece, while at date, the foreigners' market had little more than begun to be affected by the demand for *T-Cloths* and *Drills*, noticed last week. Of *Lead*, sales had been made at Tls. 6.40 per picul, but the enquiry was weak.

Chinkiang, 27th March.—Recent supplies of Plain Cottons—and these have been large—have all been cleared, and a good demand still prevails.

Japan.—No news. Commercially, the last letters to hand were as discouraging almost as it is possible to conceive.

The market at this port has been in an excited state since this day week, and a very large business in Plain Cottons has been put through. The following is a *precis* of what has been reported, but, it is believed, that although it be large, it is under the mark:—

6-lbs.	*Grey Shirtings*	13,500 pieces.
7-lbs.	*Do.*	25,000 ,,
8¼-lbs.	*Do.*	160,000 @ 170,000 pieces.
9 & 10-lbs.	*Do.*	7,000 pieces.
6-lbs.	*T-Cloths* from first hands	6,000 ,,
7-lbs.	*Do.*	62,000 ,,
8-lbs.	*Do.* about	30,000 ,,
	White Shirtings, all reeds	35,000 ,,
	Drills, 14 and 15-lbs., nearly	60,000 ,,
	Jeans	33,500 ,,

And, with one or two exceptions, prices have materially improved. The nature of the business—*i.e.* whether it be the result of a real trade demand or speculative—is not easily determinable, but even if speculation has played an important part in it—and the large settlements "to arrive" do, to some extent, support this surmise—the natives alone are concerned in it. This argues a strong confidence in the future on their part, more especially as the buyers—to a man almost—are either the Agents of the inland traders, or the traders themselves.

Grey Shirtings.—6-lbs.—Sales ex *Forward Ho*,—viâ the Cape, sailed 16th January from London,—have been made, which is rather a novel and very strong feature in the market for this article. "On the spot" Dewhurst's *Red Pheasant* chop has realized Tls. 1.39 per piece. 7-lbs.—Scarcely anything to be met with now under Tls. 1.45 per piece, and very ordinary chops selling freely at Tls. 1.48 *a* 1.50 per piece. Dewhurst's *Eagles* are nominally worth Tls. 1.60 per piece. 8¼-lbs.—An advance of 3 *a* 5 cents per piece, all round nearly, has been established. Butterworth's *Green Globe* has been sold at Tls. 1.69 per piece. Collie's *Lion-on-Bale* at Tls. 1.79. Dewhurst's *Eagle* and Mendel's *Hand* and *Branch* have been done at Tls. 2.00 per piece and *E-Wo Green Dragon* to-day has touched Tls. 2.05 per piece. For *Jinkee Stag Head* Tls. 1.80 per piece has been declined, and sundry chops that were barely marketable at Tls. 1.70 when last mail left, have been placed at Tls. 1.75 per piece. *Heavy Shirtings.*—Of these it is unnecessary to say more than that the value of hard cargo is still on the rise. *Tunsin* Dewhurst's *Eagle* is now said to be retailing at Tls. 3.10 per piece.

White Shirtings.—The market is not very steady, some holders, being actuated by the fears of heavy floating supplies, have accepted lower prices, while others have obtained some slight advantage in their operations since last mail day. 72 Reed, and finer, have been wanted, and, owing to their scarcity they are dearer. 56 *a* 60 Reeds have also been in more demand, but as yet they are unchanged in value. Dewhurst's 56 and 64 Reeds have found buyers at Tls. 1.87½ and Tls. 2.20 per piece respectively, while the commoner chops of 56 and 60 Reeds rule about Tls. 1.68 *a* 1.80 per piece. Of 64 Reeds the sales have been principally of chops obtainable at Tls. 1.86 *a* 2 00 per piece.

T-Cloths.—The market seems to be cleared of all saving the best kinds of Mexicans 7-lbs., and until yesterday—when matters quieted down a little—it looked as if even these would not last long either, but rates have risen to a point which whispers a little more caution to buyers; and it remains to be seen whether a little deliberation will start them afresh. Holders appear confident in their position. Heavy transactions in both 7 and 8-lbs. ordinary Mexican counts have been entered into, to arrive, and prices have gone against buyers in almost every parcel booked. The improvement in the value of 7-lbs. during the week cannot be less than 6 c. per piece, while that of 8-lbs. is better by 2 *a* 3 c. per piece. Ordinary Mexicans, 7-lbs., are still wanted.

Drills.—The demand for this article has, as it were, taken holders by storm, and a large proportion of the stocks on hand have changed ownership this week. Very full prices have been paid for fine 15-lbs. English *Dragon* chop, of which settlements have been made under orders from the Japanese Government, it is said; and the Chinese buyers have likewise paid extreme rates for their purchases. Both the Hankow and Tientsin merchants have bought extensively, and the latter have also operated largely in *Jeans* at prices which compare very favourably with those offered last week.

In **Sheetings** there has not been any business, and that in

Fancy Cottons scarcely deserves mention to-day. A similar remark is applicable to

Woollens.—Indeed attention has been almost exclusively centred in *Plain Cottons* since last mail day, the value realised by all the other sales put together being under Tls. 25,000. In that estimate the Auction sales of last Thursday are not taken into account. C.P.H. *Scarlet Long Ells* have been sold at Tls. 7.10 per piece and sales of Camlets—good assortment, at Tls. 13.35, are reported. *Spanish Stripes* are firmer and C.P.H. Scarlet is worth Tls. 0.61 per yard.

METALS.—*Nail-Rod Iron.*—Fair sales of Nail-Rods are recorded this week, but all brands—ordinary assortments—saving the very best, show a weakening market. *Dawe's* import maintains former value; and for special sizes—suitable for the NEWCHWANG trade—an advance on former rates has been established. Of the smallest sizes there is none in stock, and these being wanted for JAPAN are also rather firmer. *Lead.*—The natives have been enquiring more after L.B., and some reports state that business to an extent of nearly 1,200 tons at Tls. 6.10 per picul has been done, but it has not been possible to trace the rumours to any trustworthy source. The majority of holders are firm, and "Euthoven" Lead is held for Tls. 6.00 per picul, free of brokerage, but floating cargo is being offered on the market on much easier terms. *Tin Plates.*—Importations from Hongkong for a time weakened the position of this article, and a few hundred boxes changed hands at Tls. 6.10 per box for I.C. The market is hardening again, however, and sellers now demand Tls. 6.20 free of brokerage. *Tin.*—Prices shew a further decline, and still there is no disposition amongst the native buyers to do business, beyond actual requirements. *Copper.*—*Slab* is once more quotable at Tls. 18 *a* 18½ per picul, but there is little on hand and rates are nominal.

SILK.—By last public telegrams the London silk market is reported "scarcely opened, but tendency is firm," with deliveries to the 26th inst. of 2,400 bales Chinas. Since the departure of the English mail on the 26th inst. (with 425 bales for London, 237 bales for the Continent, 46 bales for the Coast, and 17 bales for Singapore), the amount of business transacted is estimated at 400 bales, making total settlements to date 68,900 bales against 56,000 at same date last year. The following are the prices reported to have been paid :—

	Per picul.	Per lb.	Per kilo.
Yakee Chop Nos. 3 and 3½	Tls. 390 & 365	19s. 3d. & 18s. 1d.	Frs. 54.09 and 50.69 on [joint account.
Kukee's "Chin Jan" and "Kin Hock"	Tls. 327½ & 300	16s. 3d. & 14s. 11d.	Frs. 45.55 and 41.84
Blue Elephant	Tls. 312½	15s. 6d.	Frs. 43.54
S S.S. Dollar chop	Tls. 277½	13s. 10d.	Frs. 38 74
Common Tsatlees	Tls. 255 *a* 270	12s. 8d. & 13s. 5d.	Frs. 35.71 *a* 37.75

The P. M. s.s. *Oregonian* left yesterday with 61 bales for New York which were taken at quotations showing a decline on previous rates. The unsold stock is further reduced and is now estimated at 1,100 @ 1,200 bales.

COMMERCIAL POSTSCRIPT.

April 1, 1875.

Arrivals.—March 24th, Am. sh. *Titan*, from New York ; 25th, Br. str. *Dragon*, from London ; Am sch. *Samos*, from Newcastle, N.S.W.

Departures.—None other than Coasters.

The French mail steamer *Iraouaddy* takes 474 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 9d. First-class Credits to Bank, 5s. 9½d. First-class to Private buyers, 5s. 9¼d. Private and Documentary, 5s. 9⅝d. On Paris, Bank, Frs. 7.27½. Private, Frs. 7.35. On India—Bombay Bank, demand, Rs. 304 *a* 305, noml. Calcutta Bank, Rs. 305 *a* 306, noml. On Hongkong, Bank Bills, demand, 27⅛ per cent. discount. Private, 15 days' sight, 27⅜. Gold Bars, Tls. 171.50. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 73.15 per 100. Carolus dollars, Sh. Tls. 80.60 per 100. Copper cash, 1,590 per tael.

Shares.—Messrs. J. P. Bisset & Co. report :—There has been but little business done since 24th ultimo, owing to the Easter holidays.

H. & S. Bank.—Some transactions have again taken place at 15 % *dis.* and Exch. 72¼, and a few shares are still wanted at same rate.

S. S. N. Co.—The market opened with business at Tls. 80, but a few shares have since been sold at Tls. 79. Shares are now obtainable at Tls. 78.

Docks.—*Shanghai Docks* have been placed at Tls. 220, and *Pootungs* at Tls. 88.

Gas.—A small business has been done in Shanghai Gas Shares at Tls. 141, at which there are sellers.

Fire Insurance.—*Hongkongs* have been placed at $480 ; *Victorias* at $126, and *Chinas* at $133. Shares are obtainable at same rates.

Marine Insurance.—*Yangtszes* are on offer at Tls. 585. *China and Japans* have been placed at Tls. 81 for 30th April, and there are sellers on same terms.

Shanghai & Hongkew Wharf Co—A small business has been done at Tls. 101 for 31st July, and also for 31st August, and at Tls. 98 for cash. Shares can still be placed at same rates.

Chinese Imperial Loan.—A small business has again been done at £99.

The Weather has again become cold. The thermometer on Friday reached 74, but the wind worked round to the Eastward during the night, and heavy rain fell on Saturday. Sunday was less wet, but cold and raw. It has since been dry, but cloudy and unsettled. The extreme range of the thermometer has been from 74 to 41, which was last night's minimum.

THE publication of the *North-China Herald and Supreme Court & Consular Gazette* commenced at 4.30 P.M.

The North-China Herald.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, APRIL 8, 1875.

WE have had more than once to thank the *Pall Mall Gazette* for an intelligent interest in Chinese affairs, contrasting favourably with that of the greater portion of the Press in Great Britain. Since the time of the Burlingame Mission, the *Gazette* has been rather apt to colour its facts with the roseate hue of expectation, and has seldom been content to register what is, without an allusion to what is to be. The plain facts were, that the Chinese had built several arsenals; the inferences which our contemporary desired to put forward on these facts, were that China was on the road to progress. The utter collapse of the arsenals—even in the petty difficulty with Japan—coinciding as it did with our own expressions of opinion as to the extension of those institutions, has not failed to have its effect on the opinions of our contemporary. Still desirous, however, of showing how rapidly affairs are advancing, it takes up three more recent institutions as its evidence of the more wholesome condition of affairs. Of the three, one at least is unfortunate. When the Chinese Government was in the last stage of funk, at the apparently imminent breach with Japan, it was ready to seize on any suggestion which seemed to afford a ray of hope towards extricating itself from its helpless condition. The conduct of affairs fell at first very much on the shoulders of the authorities at Foochow; while Amoy, from its harbour and situation, was the natural base of operations. M. Giquel advised the Provincial Government to lose no time in having a line of telegraph set up between the two. Negotiations were at once entered into with the Great Northern Telegraph Company, and the early completion of the line urged.

> "The devil was ill,
> The devil a saint would be;
> The devil was well,
> The devil a saint was he."

The difficulty with Japan seemed likely to be tided over, and doubts were thrown on the authority under which the line was undertaken. Peace between the two countries was patched up, with the result that the telegraph has been put a stop to altogether. So much for progress in this direction.

We have lately had occasion to speak our opinion with regard to the so-called China Merchants' Steam Navigation Co. We do not lay much stress on the fact that that Company was mainly formed with the hope of fighting foreigners with their own weapons, and forcing them, by competition, out of China. Out of evil often good arises, and anything that would lead to real progress, we would gladly welcome, whatever the motives of its origin. We have shown that the

native company, so far from being an institution to benefit trade, was in reality only kept afloat by a most serious interference with it; how its seemingly cheap freights were only met by increased taxation, and how this taxation was applied in keeping up a staff of useless officials, who grew fat out of transporting from the provinces to the Capital, a quantity of rice which, when it got there, was not needed for its supposed purpose of feeding the garrison, and became simply a drug on the market. To collect the tax in kind, has been shown to be a grievous burden on the provinces, affording opportunities eagerly availed of, for peculation and oppression. To forward the rice to Peking, contrary to the natural course of trade, has been shown to require some Taels 300,000, annually, to be raised by additional taxation from the already aggrieved provinces, or an amount nearly equal to that needed for payment of the interest of the debts recently incurred. It is a small matter possibly, but one worthy of record, when speaking of the pretended progress of China, that the tonnage dues raised from the Company's steamers do not contribute one *cash* towards the maintenance of lights or the conservation of harbours.

The third sign of the future progress of China noted, is the advent of Mr. Henderson, with instructions to make preparations for opening the coal and iron mines of Chihli. Now, we quite agree with the *Pall Mall*, that here are the elements of progress, but we have our misgivings as to the actual result. It needed some ingenuity to convert the China Merchants' Co. into an increased burden on the resources of the Empire, and an additional stumbling-block in the developement of healthy trade. Chinese ingenuity has, however, been equal to the occasion; and the same perverseness which has resulted in the failure of the arsenals has not been ineffectual in the other instance. When we see the mine at actual work, and have the opportunity of enquiring into its practical results, we only hope we may have the opportunity of being able to endorse the views of our contemporary. With regard to the *Pall Mall Gazette* itself, we are glad to acknowledge that it has distinguished itself amongst its contemporaries by an intelligent interest in Eastern affairs. Its information has, on the whole, been trustworthy, and in many cases bears evidence of having been drawn from really well-informed quarters. The *couleur de rose* which has undoubtedly marked its speculations with respect to China may, however, have been mainly the result of those sources to which it applied. Foreigners in the employ of the Chinese Government have naturally had, without discredit to themselves, a sufficient amount of *esprit de corps*, and a sufficient personal interest in the *statu quo*, to lead them to lend a roseate hue to their communications. On the other hand, those who were interested with the carrying out of British policy in China, are as naturally averse from stating bare facts which would go far to prove their own want of success. The British Minister whose culminating labour was the composition of the Peking Convention—fortunately never ratified—has, to a certain extent, an interest in painting in glowing terms the intended progress of China, which would have taken place were it not for the rude rejection of his Convention; and, following in the path of the late British Minister, are many who, from an imperfect consideration of the subject or from other motives, were ready to follow the lead set. In seeking its information from such sources, the *Pall Mall* has found, at the same time, elements of strength and weakness. It has avoided the absurdities of its home contemporaries with respect to matters of fact, but, in the bright tinges with which it has overlaid those matters of fact, it is in reality doing an injustice to our permanent interests.

THE MURDER OF MR. MARGARY.

The sad news brought by the mail, of the murder of Mr Margary, in Yunnan, will be read with the deepest regret. Few men who have lately passed through the Shanghai Consulate have been better known than Mr Margary, and every one who knew him esteemed him. We can say with all sincerity that the Service has sustained a great loss by his death, and that very many people in Shanghai have lost a valued friend.

News of Mr. Margary's death appears to have reached Peking quite ten days ago, although we were ignorant of it in Shanghai. They evidently assumed however, in the North, that we should be sure to have had the first information, for a few details of the occurrence are only mentioned casually in a private letter received on Monday by Mr. Medhurst. These go to make the outrage appear of the most brutal and painful character. It is said that Mr. Margary was enticed into one of the yamêns at Manwyne, with three of his Chinese servants, and was there killed, while the rest of the party were attacked but escaped with the loss of all their effects, three Europeans of their number being wounded. It is further stated that Mr. Margary's head was placed on the city wall. Apprehension was also entertained about Mr. Ney Elias, who seems to have separated from the main body of the expedition; but we are glad to hear that private advices have been received, saying he is safe. He had started on a more southerly route, and was turned back by the Chinese officials.

Manwyne, is a town in Yunnan at the foot of the Kakyen passes, and clearly within Chinese territory. It is remarkable that, in a letter to Mr. Medhurst of the 28th January, recording his safe arrival at Bhamo, Mr. Margary mentions this very town where he is said to have been murdered, as a locality where he had spent a week in comparative quiet and enjoyment, while his man Liu went in advance to communicate with Colonel Brown, at Bhamo. It is odd that the inhabitants should have proved so daring and bloodthirsty on the return journey, when he was supported by other Europeans and a considerable band of followers. The inference is clear, from this and from the details, that the murder was done at official instigation. And now that the sad event itself appears beyond doubt, we can almost hope that this part of the information will prove true. For the difficulty of identifying the criminals will then be removed. In any case, such a brutal outrage, on a British official protected by Imperial passport, will surely lead to a demand for stern reparation, and convince the Home Government what sort of civilisation is that possessed by the Country which they have elected to treat as an equal.

It is remarkable that information of the disaster should have failed to reach Shanghai earlier. Mr. Medhurst has hitherto been kept punctually acquainted with the movements of the Mission, by the Commissioner of Rangoon, and received a telegram from him on the 26th March, saying that Mr. Allen was to leave that place on the 28th March, for Shanghai viâ Singapore. This telegram makes no allusion whatever to the catastrophe, so it is to be inferred that an intermediate one has been somehow lost. Mr. Allen, it will be remembered, was also with the Mission, having accompanied it from Rangoon; and his sudden return only corroborates the sad intelligence. Judging from the date of his departure, he will be here by the next English mail, and from him we shall learn particulars of the event.

No official news has been yet received from Peking, of the action which Mr. Wade purposes taking in regard to the murder of Mr. Margary. It is understood, however, that he has taken the case strongly up, threatening even to haul down his flag unless a powerful commission of British and Chinese officers is forthwith delegated to look into the whole case and punish the perpetrators. We cannot hear that anything is yet known as to the result of the negociations; but as there had been time for telegraphic instructions to reach Peking from London, it may perhaps be assumed that Mr. Wade is acting under instructions from home.

It is worthy of note that Calcutta telegrams of the 7th March say orders have been received from England to hold several regiments in India ready for active service. The purpose is not stated, but it was thought likely the attack on Colonel Brown's party had something to do with the preparations. If the Chinese fail to make full reparation, the march of a few thousand men into Yunnan from British Burmah will be easy.

Summary of News.

The English mail of the 19th February arrived on the 5th instant, by the P. & O. str. *Pera*.

The American mail of the 13th March arrived yesterday, by the P. M. str. *Nevada*.

A mail leaves to-morrow for Europe by the P. & O. str. *Pera*.

The following telegrams have been received during the week :—

An immense Tichborne demonstration took place in Hyde Park yesterday, Dr. Kenealy presiding.

The Spanish Government has refused to allow the Duc de Montpensier to return.

The Biscayan Provinces have refused contributions to Don Carlos.

The Pope has exhorted the Prussian Bishops to continue resistance to Bismark's vote.

Belgium complains of offensive language used by the Clerical Press.

Obituary—Mr. John Martin, M.P. for Meath.

A meeting of shareholders in the China and Japan Marine Insurance Company was held on the 5th April. The accounts shewed a profit on the year's working of Tls. 4,000. This was insufficient to permit the declaration of a dividend. Messrs. Drysdale, Little, Behn, Bade, and Sutherland are directors for the current year.

The annual general meeting of the Shanghai Yacht Club was held on the 31st March. The minutes of the last meeting, and statement of accounts for the season 1874-75, were passed after some discussion, and the meeting then proceeded to the election of officers, Mr. A. J. Little being re-elected Commodore ; Mr. S. B. Hill, Vice-Commodore ; Mr. J. Wilson, treasurer ; Mr. Dillon, prize-bearer ; Messrs. Coryell and R. Mackenzie, auditors ; Mr. Hewett, treasurer ; Mr. Tucker and Mr. Lambert, hon. treasurers ; and Messrs. Ashley, C. P. Blethen, J. P. Croal, and Viguier (in addition to the ex-officio members), committee of management. The date of the race for the Challenge Cup was left to the decision of the committee ; and with respect to the regulations as to crews for Corinthian races, notices of motion were given by the Commodore and Vice-Commodore, to be brought on at a meeting to be called a fortnight hence, in accordance with rule. A full report will be found on another page.

We print, on another page, a report of proceedings at the annual meeting of the Hongkong Chamber of Commerce.

It will be seen from the minutes which we print elsewhere, that the Chinese Polytechnic Institution is making good progress. The Committee have sufficient funds in hand to justify them in buying ground and erecting a building, and gratifying promises of support have been received from many quarters.

The Minutes of the French Council meeting of the 23rd March, carry us a step further in the negociations about the Yang-king-pang. It will be remembered that the last letter of the French Council suggested the following points for submission to the Arbitrators :—

1st.—Is the Bund in its present position an obstacle to navigation ?

2nd.—Does the encroachment prejudice the interests of property along the line of the creek ?

3rd.—Does not the acceptance by the English Council of a plan of a bridge adapted only for the present (narrowed) width of the creek, vitiate their reclamation ?

The English Council objected to the latter clause, as being not one for submission to arbitration, but at most only an argument. The French Council have consequently agreed to withdraw it ; but wish to substitute another which was accidentally omitted from their first letter :—

"Have encroachments been made by the English Municipal Council on the left bank of the Yang-king-pang ? If so, are these encroachments an obstacle to navigation, and do they prejudice the interests of the bordering land owners ?"

The reply of the Council to this proposal, is awaited.

Further correspondence has also taken place, about the share to be borne by the respective Councils in building or repairing bridges over the Yang-king-pang. The French Council protest again the apparent willingness of the English Council to let the bridges collapse. The question, they urge, is one easily susceptible of adjustment, and if they won't have the French and English Ministers for arbitrators, arbitration in some other way is still the best way of settling it. In the meantime, the French Council are willing to pay half the cost of getting out a new bridge for the Bund end of the creek, on the understanding that they shall be repaid the difference if the point be decided in their favour. The reply of the English Council to this proposal, also, is awaited.—Both Councils equally repudiate the charge of being responsible for any possible interruption of traffic.—A slight give-and-take alteration in the bund line of the Creek, on the French side, between the Rues Petite and Montauban, is mutually agreed to.

The French Gas Co. decline to submit their contract with the Municipality to interpretration at Saigon, because they hold that there is no doubt as to its meaning. The Council think otherwise, and purpose forcing the Company into arbitration.—Messrs. Butterfield & Swire purpose building a shed on the wharf which they have erected in front of the French Bund. —The question of the roads alongside the Ningpo Joss House is to be left in the hands of M. de Rochechouart.

The annual election of a Municipal Council for the English Settlement was held on the 6th and 7th inst. It resulted in the election of Messrs. Cowie, Hart, Heyden, Kidner, Krauss, Lemarchand, Mackenzie, Purdon and Webb. Seven of these gentlemen are members of the old Council. Two—Messrs. Hart and Krauss —are new nominations.

Elections to four vacancies on the French Municipal Council will be held on the 20th April. Two vacancies are caused among the French members, by the resignation of M. Lemonnier and the expiry of Mr. Maignan's term of office ; and two among the Foreign members, by the resignation of M. Lang, and the expiry of Mr. Ewald's term.

It would have been interesting to know something more than is stated in the last Municipal Minutes, about the chance of widening the Hankow road, between the Szechuen and Kiangse roads. We are told that it would be too costly, because it would involve moving back the old Kwongloong junior mess. Of course the Council cannot afford to pay for re-building, and will have to wait until the proprietors think of doing so, before negociating for a few feet of frontage on that particular spot. But we notice that building is going on at the Szechuen road corner. Could not a little widening be done there, to prevent a new building being erected quite on the present line of road ?

The programme has been issued, of the S. V. C. Rifle Meeting, to be held on the 11th, 12th and 13th May. A very good idea is the introduction of two prizes to encourage recruits, which will be shot for on the 27th instant. Practice is going on actively, and some good scoring is being made, notwithstanding the windy weather prevailing.

Telegraphic communication between Shanghai and Amoy is again interrupted.

These few days, ended on the 5th inst., Tsing-ming flowers have been in great demand among the Chinese. It appears that flowers may be plucked anywhere, by anybody, with impunity. Communism in flowers at this season is an established fact. All who have been to ancestral tombs, and there performed the customary rites, on returning, pluck flowers wherever they find them. Lest flowers belonging to foreigners should attract those who know no better than to pluck them, as well as to caution the knowing ones, Chên has issued an admonition in verse, stating that the police will surely apprehend persons found trespassing against the floral rights of foreigners, in which event offenders will be sorry when it is too late.—On and after the 5th, flowers will be found exposed to no special danger. In his admonitory notice, Chên uses the uncomplimentary character "I" to designate foreigners. Perhaps it was to avoid tautology, but quite likely from habit, as officials of every rank persist in its use, when writing of us among themselves.

The French ironclad *Montcalm* left the anchorage Tuesday, and proceeds to Ningpo. The French corvette *Volta* will follow for Ningpo on Friday. Both vessels will then go to Nagasaki, and a French man-of-war will come over to take the place of the *Volta*.

As the M. M. steamer *Iraouaddy* was steaming down the river Friday morning, she fouled the swinging boom of the hulk *Water Witch*, carrying it away and taking the mast out of a houseboat moored to the boom ; passing onwards, before she could swing to the tide she fouled the hulk *Berwick Walls*, and slightly damaged a houseboat moored alongside. Neither did this end her misadventures, for, on crossing the Woosung Bar, she took the ground just outside that obstruction. A telegram despatched to Shanghai stated that she was very slightly aground, and M. Hennequin at once despatched a tug down to assist her, and she was got off on the evening tide. The accidents may be attributed to the strength of the flood tide

We hear that the well-known coasting

steamer *Nanzing* has been purchased by the China Merchants S. S. Co., and that the price was Tls. 20,000.

The remains of two men drowned in the Whangpoo so long ago as December last, have been found by the river police floating during this week. One of the poor fellows was Edward Carpenter, a marine of very good character, belonging to H.M.S. *Ringdove*. On the 19th December he went to visit an acquaintance on board H.M.S. *Modeste*, and returning at night, and quite sober (being, in fact, a teetotaller) he accidentally fell into the river from a sampan and was drowned. His remains were discovered floating among the junks off the native city, and were identified by his uniform and some private marks on his under clothing. The other unfortunate was a seaman of the *Achilles*, who on Christmas Day fell from a sampan while going from Hunt's Wharf to that steamer. His remains were picked up yesterday morning, close to the Naval Yard. Both have been buried.

A collision has occurred between the C. C. S. N. str. *Ocean* and the C. M. S. N. str. *Fusing*, on the voyage between Shanghai and Tientsin. The latter sank immediately, and fifty-five of those on board were drowned. The following particulars of the accident are given by the *Ocean*. The *Ocean* reports having encountered thick weather immediately after leaving Chefoo. On the morning of the collision, she was going at reduced speed, with the whistle sounding when, at 10.40 a.m., the whistle was answered by another steamer on the port bow. The Captain and second officer were on the bridge. Orders were at once given to port the helm, stop the engines, and reverse full speed, which orders were instantly obeyed. The look-outs then reported something right ahead, and in less than one minute she came into collision with the *Fusing*, striking her on the starboard bow close to the fore-rigging. A large hole was knocked in the *Ocean's* port bow, above and below the water line, about 10 feet by 5 feet. The steamer *Fusing* was settling down by the head, and as soon the ships got clear they lost sight of one another. The *Ocean's* boats were all lowered, and proceeded to the assistance of the sinking steamer, being guided by the cries of the Chinese passengers. The *Fusing* foundered almost instantly, and the passengers were clinging to the wreckage. The first boat, in charge of the 2nd officer, picked up the chief officer of the *Fusing* and eleven Chinese, who were floating on a ladder. The second boat, in charge of the 1st officer, picked up eleven more Chinese; and a boat in charge of the second and third officers, rescued 13 others; and a 4th boat was despatched in charge of the 3rd engineer. Only one boat belonging to the *Fusing* got clear of the wreck, with the European portion of the crew, (except of Mr. Stewart, the third engineer, who was drowned) and some Chinese—23 in all. After putting the rescued men on board the *Ocean*, the boats returned and searched for over two hours amongst the wreckage for any other survivors. The compradore was found floating, quite dead. Many of the Chinese saved had sustained severe bruises, and had an arm or a leg broken; their wants were attended to as soon as possible. All attention was then given to the condition of the *Ocean*; the hole in the bow was blocked up with planks and bags of rice, and all hands—crew and passengers, were set to work to jettison the cargo (which consisted mostly of bean-cake) out of the fore compartment. By midnight, the ship was sufficiently lightened to enable her to proceed for the nearest port. Two Chinese died on board the *Ocean*, and their bodies, with that of the compradore, were brought to Shanghai. The C. M. steamer *Nanzing* was despatched to the scene of the disaster yesterday, in the hope that some of the bodies may be recovered.

H.M. gunvessel *Frolic*, which left Shanghai on the 6th of December, as was then stated, for the East Indies, on arriving at Hongkong received orders to proceed instead to the Sulu Seas and cruise off the coasts of Labuan and Borneo. One evening in January she ran on an unknown rock, and remained fast for about four hours, when she fortunately got off without material damage. Having performed her mission, she returned to Hongkong and was there docked and repaired, afterwards resuming her voyage to Shanghai, where she arrived on Tuesday. She encountered rough weather on the passage up, and was obliged to anchor on more than one occasion. The Sulu Seas were surveyed by H.M.S. *Sylvia*, but the rock on which the *Frolic* struck is not marked in the Admiralty charts.

Our readers will be amused by a paragraph which we reprint from the *London & China Express*. The little "self-glorification" in which we often indulge at St. Andrew's and St. Patrick's dinners, is taken extremely *au serieux*, and we are put coldly down into our proper place. But what is most notable, is the test by which we are tried. We habitually neglect to attend meetings of the N.-C. Branch of the Asiatic Society! That is the standard, and by it we are condemned.

The *China Mail* notes the following movements in the Consular service:—Mr. Hewlett, who was to have succeeded Sir Brooke Robertson, as Consul at Canton, has been struck down with fever, so that in all probability Sir Brooke's departure will be delayed for a considerable period. Mr. T. Watters, who has arrived in Hongkong from the North, is on his way to relieve Mr. Frater at Swatow, the latter gentleman proceeding to Amoy to take the place of Mr. Phillips, who will act as Consul in room of Mr. Pedder transferred to Foochow. Mr. Sinclair, the present Consul at that port, will proceed home by the second mail in April.

A correspondent sends us an account of a race meeting held at Newchwang on the 20th March. It appears to have been wedged in between a rainfall and a snowstorm, but to have been thoroughly successful in spite of difficulties.—There were five steamers in port on the 26th—four loading for the South and one for Nagasaki.—Messrs. Bush Bros.' Circular says:—Manufactures have arrived in considerable lots, and the natives are not very anxious to come forward with offers, for fear that further supplies may overstock the market. Malwa—last sales, Tls. 460 per chest. Produce quotations are:—Beancake, Tls. 2.98 per 10 ps.; Peas, Tls. 2.20 per 300 c.; Oil, Tls. 2.20 per picul.

Our Tientsin correspondent gives a connected history of the late troubles at that port, which will be read with interest. Of course, a good deal of the ground has been gone over before, but a good deal of new matter is introduced, and the letter forms a lucid and complete exposition of the affair. The Viceroy has replied in very vague terms, to a petition from the merchants against the new mode of levying barrier dues, but it seems to be understood at Tientsin that the project will be abandoned. The Customs Taotai will retain his post until the arrival of the Cantonese, Li Chaou-lang, who was gazetted to the appointment in November last, but has been prevented from taking it up. The retention of the Taotai in office seems confirmatory evidence that he was acting with Li's knowledge. A reconciliation seems to have been arrived at between him and the Territorial Taotai, for we hear they both dined with Li Hung-chang on the 30th.

Messrs. Spencer & Wolff of Chinkiang, write on the 5th April:—Extensive sales of piece goods have been made during the week, at advancing rates, but advices received from Shanghai this morning have tended to check any further rise; the market, however, closes steady at quotations.

The only late news from Nagasaki is that the steamer *Courier* arrived from Newchang on the 1st April, and that the weather has been as changeable as it has been in Shanghai. On Tuesday it hailed, and blew very strongly. Wednesday was rainy, with thunder and lightning; Thursday, though fine, was very cold.

From Yunnan we have, viâ Rangoon, telegraphic information that the Exploring Expedition from Burmah was attacked at Manwyne, and compelled to return; and that Mr. Margary and three of his Chinese servants were murdered. It is believed that Mr. Wade demands the despatch of a joint Commission of British and Chinese Officials, to investigate the outrage on the spot.

The *Foochow Herald* says severe fighting is reported from Formosa. The aborigines are said to be well armed—better in fact than the Chinese troops. The Footai will leave for Tai-wan-foo in a few days, and will assume entire control in Formosa.

The American ship *Bunker Hill*, which caught fire and was sunk in Manila harbour on the 3rd ulto., is again afloat, and efforts are being made to get the cargo, consisting of hemp, sugar and molasses, removed as speedily as possible, in order to fully ascertain the amount of damage done, which appears to have been very considerable. The contract for raising the vessel was taken by Messrs. Wilke and Earnshaw, at $9,000, and the time occupied 29 days. The damaged cargo is being sold by auction.

Summaries of Foochow, Hongkong, and Japan news will be found on another page.

Editorial Selections.

FORMOSA.

A DECIDED advantage has ensued from the quarrel between China and Japan, in the attention which it has drawn to Formosa. Shên Pao-chen, the Special Commissioner who has been appointed to regulate Formosan affairs, appears to be going about his work sensibly, and the Peking Government seem willing to be guided by his advice. His last move has been to abolish the extraordinary restrictions on emigration, and on certain branches of trade in Formosa. It is decidedly curious that, at a time when China was sustaining, at the risk of war, her claim to Formosa as an integral part of Chinese territory, there should have been in force a law making emigration thither from the mainland a penal offence. Shên Pao-chen has discovered an old enactment, as follows:—"The surreptitious crossing over to For-"mosa by people of the mainland, is "forbidden. On any vessel making the "surreptitious voyage being captured, "the master and crew shall be punished, "penalties shall be inflicted on the "civil and military authorities, and the "soldiers and police shall be criminally "dealt with." Persons emigrating were to receive 100 blows, and persons decoying others to emigrate were to be banished. Penalties were also enjoined for crossing into the territory of the savages, which was carefully marked off. Penalties were enjoined on officials who let traders pass these limits, and intermarriage with the aborigines was equally forbidden. The Japanese might have founded no mean argument on all this, to sustain their claim that the Eastern half of Formosa was not Chinese territory. A district so carefully fenced off, so perfectly isolated, could be hardly claimed under the law that a State must be fulfilling the duties of Government, in any given country, in order to have a valid claim to sovereignty. However, that is all passed, and Shên Pao-chen has now procured the removal of the restrictions which hindered the population and improvement of the island. The Peking *Gazette* of the 15th February contains an edict removing the prohibition upon emigration, and removing also an extraordinary prohibition which formerly existed upon trade in iron and bamboos. According to a long-standing rule, no person was allowed to engage in the business of iron-founding, for the manufacture of domestic or agricultural implements, without a license from the Treasurer of Fuhkien; and the iron used was to be brought from Changchow, under penalties for the unauthorized extraction of native ore. Another prohibition was against the exportation of bamboos, the object being to prevent the supply of materials for sails and stagings to piratical junks. And the Commissioner explains that, in virtue of this prohibition, bamboos transported from point to point in the neighborhood of the ports were subject to inspection, and were subjected to frequent extortion on the part of the soldiery and police. These restrictions, as we have said, are removed by the same edict, which goes on to approve the Commissioner's design for bringing the waste lands of the interior under cultivation. Thanks to the prohibition against emigration, the Chinese have not penetrated beyond a fringe of coast. "With the exception," writes Shên Pao-chen, "of the lands "occupied by the aboriginal tribes, the "whole interior of Formosa is unin-"habited. Lands which might be culti-"vated, lie waste, overgrown with forest, "and sending forth pestilential miasma; "a refuge for the savage aborigines, who "lie in wait there for victims of their "murderous designs." The picture is highly coloured, but not far from true; and the Commissioner deserves every credit for the steps he is taking to develope the resources of the island. Now that he is encouraged instead of hindered, the persevering Chinaman will steadily press backward the barbarian line, and the naturally fertile soil will be gradually recovered to better uses. That Formosa should have flourished at all under the treatment it hitherto experienced at the hands of the Government, says volumes for its natural capability. The only fear, now, is that the process of organisation it is about to undergo may involve the introduction of a locust-flight of officials who will impede, by squeezing, harrassing, and generally obstructing trade, all the good Shên Pao-chen is trying to do by legislation. We have heard enough of official taxation in Formosa—the camphor monopoly, and more recent impositions on tea and coal, for instance; and Shên will find ample room for extending free trade principles beyond the two local industries he has named, besides taking care that these principles are not neutralised in other directions. Under wise government, Formosa may become a very valuable province; and the measures which have been recently taken to develope its resources tend, so far, in the right direction. Already we are told that two thousand families are setting out from the ports of Foochow, Amoy and Swatow, for the purpose of settling in the new district opened up to them. That the movement will involve collision with the aborigines, can hardly be doubted; there have been already severe encounters between these and the Imperial troops, since the Japanese withdrew. And one blot on the prospect held out, is the treatment which the natives are likely to suffer at the hands of a brutal soldiery. It is hardly likely that they will amalgamate with the new settlers; nor is it likely that they will allow themselves to be quietly driven back; yet the colonists must be supported; and it is to be feared the Mandarins will not restrain their men in the future, more than they have in the past. Still the aborigines seem, from what we have heard, good for better things than extinction.

THE TIENTSIN DEADLOCK.

THE recent dispute in Tientsin is at the same time one of the most curious and instructing events which have occurred in China within recent years. Division of labour is usually considered a mark of increasing civilisation, and the manner in which the Chinese continue to mix together, in the same office, judicial, military, and financial affairs, has often excited the surprise of Foreigners. It is, however, very curious to observe how completely the attempt to separate the departments broke down at Tientsin. In China, so far is the custom of isolation carried, that officials of corresponding station have little intercommunication. Each mandarin is supposed to look after his subordinates, and obey his immediate superior. Practically speaking, he is untrammelled, except by the possible secondary results of his actions. He is a judge, but, as a judge, he makes law for himself. He is officer of the troops, and drills, or has them drilled, as seems best in his eyes. He collects revenue; and, provided he hands to his superiors the customary amounts, excites no outrageous complaints, and manages to get through his term of office without a public riot or demonstration, no questions are asked as to the means by which he has raised it. His office is supposed to be autonomous; he is given all power, and takes all responsibility. The one great object he is to set before him, is to avoid any popular commotion. In this last, practically speaking, lies—now that the Government of China has become a cumbrous old machine, out of gear, and only carrying on by the *vis inertiæ* of its former activity—the only assurance that officialdom shall not degenerate into pure tyranny. In the case of Tientsin, the division of labour seemed in a great measure to take away that responsibility. Taotai Sun was entrusted with getting in the money; Taotai Wu, with soothing the payers. The former knew that, for any reasonable amount of discontent, Wu, and not he, would in the ordinary course of events be held liable, while he would have all the advantages to be derived from an increase in the revenue collected. Sun would, in all probability, get away before any serious disturbance took place, with the fruits of his cleverness, while Wu would be left to bear the responsibility of discontent within his jurisdiction. Such, in ordinary cases, would have been the result. But Sun had excited the fears of a powerful body, and fear will often impel men to more desperate measures than courage. The obnoxious rules for levying taxes on trade, evidently were but part of a machinery which could be made use of for raising still further exactions. The Foreign Customs were able to give an accurate report of the goods which came under their observation, and, unlike the Native offices, the books were regularly made up, and kept open for inspection. To turn this machinery beyond the purpose for which it was intended—of raising a Maritime Revenue—was the happy idea which suggested itself to Sun Taotai's mind. As the Customs Returns would be there to tell tales of every man's business, and the Taotai was in the mood for collecting as much money as he could before quitting his post—the merchants engaged in the foreign trade of the port not unnaturally took alarm. Overt action on their part they knew was usless, so they took the only course which, to their peculiarly Chinese minds, seemed open—namely, rigid abstention from business. They knew that Taotai Sun would by such means be hurt in his most tender point—his pocket; and they likewise knew that, however desirous he might be of forcing them to trade, he had scarcely the means at his command which should

convert a man into a merchant against his will. True, they lost, themselves, heavily by such a course. They were forced to hold over goods, and lose markets and interest on investments; but another force would, by this very means, be called into the field. Not only they, but a large portion of the population of Tientsin had come to be dependent on the trade by Foreign vessels. Boatmen, barrowmen, muleteers, and small dealers had all their own personal interests at stake. As they lived but from day to day on their earnings, they would soon get uneasy; and as they had nothing to lose, but possibly some plunder to gain from a disturbance, they would be ready to engage in any desperate undertaking at a moment's notice. Though to Taotai Sun, who only had charge of the financial department, this might seem a light matter, Taotai Wu, who was responsible for the peace of his district, looked upon it as decidedly serious. Still, as each was supreme in his own way, and neither was desirous of consulting the other, affairs became so serious that a *deus ex machinâ* in the person of the Viceroy had to be invoked. Though it is scarcely possible that Taotai Sun would have attempted to enforce his new system without an understanding with his superior, it has been apparently found advisable to rescind the objectionable rules. In the interests of trade, both Native and Foreign, we are well pleased at the issue. The determination of the merchants has won the day, while they remain free from any overt charge. We have seen a curious book, where *vis inertiæ* was attempted to be raised to the status of an independent force. Had the author only lived in China, he might possibly have found ampler illustrations of his theory than the laws of nature elsewhere afforded him.

INDIAN TEA.

In continuation of our recent sketch of the history of tea planting in Assam, it may not be uninteresting to add a general remarks—quoting the same authority as before—upon tea cultivation in the Bengal Presidency. Tea, it appears, is cultivated to a greater or less extent in five divisions in Bengal, viz., Assam, Dacca, Kuch Behar, Chittagong, and Chota Nagpur, which rank in importance in the order named; Chota Nagpur, however, is perhaps hardly worth mentioning, as less than 900 acres are said to be under cultivation, and even Chittagong is not much more important.

It is considered that on the whole tea is in a better position, and that its prospects are more hopeful in Cachar (Dacca Division) than in any of the other districts. This district has three disadvantages:—(1) many of the Gardens are planted on the sides of steep hills, the soil of which is liable to be washed away by the heavy rains; (2) the soil is in many cases inferior; and (3) the class of plant is, as a rule, not good, there being some 70 per cent. of the China variety, 20 per cent. of hybrid, and 10 per cent. of indigenous. The first two drawbacks are probably exaggerated and admit of easy remedy, but the third is more serious, for the hard leaf of the China shrub costs more in manufacturing than the soft leaf of the other kinds, and is less valuable. Against this, however, must be set the fact that the China plant is very hardy and yields leaf when the other more delicate species would be worth nothing; besides, with higher cultivation and changed conditions of existence, it is thought that it may improve. Against these drawbacks Cachar has many advantages; the climate is particularly well suited for tea, more so indeed than that of Assam or the Darjiling Terai; the labour question does not seem likely to cause any difficulty; and the planters there have made more progress than those of any other district in substituting scientific methods in cultivation and manufacture for the crude experiments which caused much loss in earlier times.

In Assam the two most important districts are Seebsagar and Durrung, and it is generally supposed that the soil and climate of the former are preeminently suited for tea, but some give the preference to the latter. Seebsagar, however, has an immense advantage over both Cachar and Darjiling in the superiority of its plant, which is chiefly hybrid. The Durrung teas, too, are stated to be of the finest quality consistent with a large outturn, but the district is unfortunately peculiarly unsuitable to imported labourers; there are also, it seems, some complaints in Seebsagar—though only in minor districts—of an inadequacy in the supply of labour. Notwithstanding this, a strong desire is evinced to extend cultivation largely in the latter district, a fact which may be the cause of much future difficulty.

In the Darjiling district (Kuch Behar division) there are two distinct tea-growing tracts, in which the industry is carried on under totally different conditions. In the high hills, where the levels of the cultivated land range from 2,500 to 5,500 feet of altitude, the soil is in many respects the best of any tea district, but this great advantage is more than counterbalanced by the steepness of the hills, and the comparative unsuitability of the climate; the greater proportion of the plants, too, are of the China species and below the average in quality. The labour difficulty, however, does not at present exist to any appreciable extent, and moreover machinery has been employed with much success. The climate of the Terai, again, is not so well suited to tea as that of Assam or Cachar, the soil is not nearly so good as that of the hill-districts, and the labour question is a very serious difficulty, so serious indeed that for many reasons it would appear to be almost insuperable.

Before proceeding to sum up briefly the conclusions arrived at in the Report, it may not be out of place to mention here the outturn of tea in the various divisions in the year 1872. Assam with its five districts produced 6,150,764 lbs., of which 1,500,000 lbs. were grown by the Assam Company. The outturns of the Dacca and Kuch Behar divisions were 5,296,169 lbs. and 2,955,926 lbs. The unimportant divisions of Chittagong and Chota Nagpur only raised 204,112 lbs. and 53,200 lbs. respectively.

After stating his opinion that no encouragement given by Government can help to the development of the tea industry in Bengal beyond certain limits imposed by the conditions of labour, food supply, &c., Mr. J. W. Edgar concludes his elaborate report in the following terms:—In dealing with land, I think that the question of labour should not be left out of sight. . . I think, too, that speculation and land-jobbing should be discouraged, and that no land should be alienated without most careful previous survey and demarcation. In dealing with the labour question, no opportunity should be lost of encouraging free labour. . . . For the rest, roads and other means of communication towards and within the tea districts should be pushed forward as rapidly as the resources of the Empire may allow, and no means should be left untried to encourage the increase of the local population and of the cultivation of food-staples in these districts.

THE TRADE OF SAN FRANCISCO.

Shanghai has scarcely the same interest in the trade of San Francisco, as have the Southern ports of China and those of Japan. Indeed, so far from increasing our connection with that port, statistics go to prove that the value of our trade has for the last few years been diminishing rather than otherwise. Still, placed *en rapport* as we are with the Golden State, we are disposed to offer her our congratulations on the very successful year she has passed through. We can do this with all the more sincerity that our own experience of the year has been different; and that although, in such circumstances, we might be credited with the possession of envy, hatred, malice, and uncharitableness, we are the more prepared to look with hope for the future, and from the success of our neighbour (shall we call it?) across the Pacific, to draw a good augury for our own eventual success. The *Commercial Herald and Market Review* of 14th of January, with praiseworthy diligence, gives a full and lucid review of the trade of the past year. San Francisco has so magnificent a territory behind it, and is so admirably situated, that it is no wonder the commerce of the port is increasing at such a rate that it bids fair ere long to rival the great sea-ports of the Atlantic. At present, as a producing district, California is making rapid strides. Its wheat market has long been celebrated, and annually increases, as the means of communication with the interior are perfected. Unlike China, the Government of the State fully appreciates the condition of affairs, so that, if the concessions made to railways seem magnificent, they are in reality more than repaying the State in the flood of prosperity on which it seems to have entered. Wool is likewise an important staple; the value of the year's export amounting to no less than eight million dollars. Wine is becoming an article of importance in the export trade; Californian wines to the value of $400,000 having been exported by sea during the year, exclusive of large amounts sent overland. The only fear seems to be that the Californians, in their anxiety to make their State yield every necessary or

luxury of life, may endeavour to develope the number rather than the amount of its staples.

It is of course to its yield of the precious metals, that California more immediately owes its present position. Money is not only the sinews of war, but also of trade, and when the available capital of the State is increased by the production, during twelve months, of 85 millions of dollars' worth of gold and silver, all exchangeable for the products of industry, we have a clue to its present condition. California so far has made a wise use of its producing power, and has laid the foundation of a permanent prosperity. Compared with Shanghai, we may notice some curious contrasts. San Francisco imported in 1874 some thirty-one-and-a-half million dollars worth of foreign goods, and exported about twenty-eight-and-a-half. Shanghai imported of foreign goods as nearly as possible double the amount, in addition to a coasting import of over fifty millions of dollars. It exported goods to the value of some eighty-six millions of dollars, or as nearly as possible three times the export of San Francisco. Yet San Francisco thrives on its trade, and can afford to build marble palaces, while Shanghai sits down in mud and plaster. In one case the trade is of a progressive nature; in the other it seems to stagnate, and brings no profit to any one engaged. More than four thousand ships, with a burden of a million-and-a-half tons entered San Francisco during the year. Upwards of eighteen hundred, with a burden of eleven hundred thousand tons, entered Shanghai in the year 1873—so that San Francisco, while more than doubling the number of ships, reckoned only an extra tonnage of four hundred thousand. Comparisons are odious, but there is certainly some reason why, with such statistics, the recent prosperity of the two sea-ports should be so different. The figures quoted for Shanghai, again, refer only to foreign trade, or trade in foreign ships—the large native trade is left out of account. The population of San Francisco is now some 240,000,—living in one of the finest cities in the world. That of Shanghai, natives and foreigners, is about 300,000, of whom the greater number live in dwellings—that are not palaces.

Outports.

TIENTSIN.

By the *Leeyuen*, which left this morning for Shanghai, I despatched the intelligence to you that His Excellency Li Hung-chang, the Governor-General, had returned to this, late in the afternoon of the 24th instant, from Paouting; and that it was reported that His Excellency Sun, the Customs Taotai, had sent in his resignation to the Governor-General.

As far as I can accertain this evening, it is not known what steps the Governor-General will take relative to the collection of the Barrier taxes or dues; but it is supposed, from the report of the Customs Taotai having resigned, that his new system has not been deemed satisfactory. Taking it for certain that the Customs Taotai will vacate his post, the person who will fill it will require some time, say two or three days, to take over the accounts, monies, and seal; so, should it be intended that a proclamation shall be issued to cancel the system which had been contemplated by Sun Szeta, we cannot look for this document till the new acting Customs Taotai shall be in charge. In the meantime, the stoppage of trade still exists to a large extent. I am not yet aware that the Tientsin dealers have resolved to take their goods from the foreign godowns in the settlement, and from the Bund, which is covered at this moment with merchandize, and carry them to their warehouses in town. I also hear that the principal hongs still remain closed.

I have just learned that there is a report in town this afternoon, that a Censor has memorialized the Imperial Regents in relation to the stoppage of trade at Tientsin; and that the blame is thrown upon the Governor-General, the superior of the Customs Taotai, Sun Szeta. Rumour says that the Governor-General has to-day memorialized the Regents on the tenor of the Censor's observations, and on the situation of affairs generally at Tientsin at this moment. I should think that the Governor-General will have no difficulty in replying satisfactorily to the attack; the Barrier dues were levied before, and it is the new manner only of the Taotai's levying them now, which is objected to by the merchants.

In the *Peking Gazette* of the 22nd March, there is a Decree appointing Tseng-kwo-tseuen (brother of the celebrated Tseng-kwo-fan) Governor of the province of Shense.

25th March.

In my letter of the evening of the 25th inst., I mentioned that I had heard that H. E. Sun-sze-ta had, that day, handed to the Viceroy his resignation as acting Customs Taotai. From this act, the public might be imagined to infer that the policy which he had been lately pursuing, relative to the manner of levying the Barrier taxes, had been deemed a mistake by his Superior.

Since Sun-sze-ta has, through his late action in endeavouring to establish a new system for the collection of the Barrier taxes, obtained a notoriety which will make him an historical character, it has occurred to me that it will be not inappropriate to cast a glance over his career, from the time when he first made his appearance at Tientsin, as a protégé of H. E. Li Hung-chang, the Governor-General of Chihli, and Imperial High Commissioner for Foreign Affairs.

On the 4th June last, soon after Sun-sze-ta's arrival at Tientsin, from Shanghai, he first came into contact with foreign officials at this port, as one of Li's attachés, in connection with negotiating the Peruvian Treaty, in concert with Chiu Kiu, the then Customs Taotai; and during the many consultations and discussions which took place, in relation to the arranging of that international event, we are aware that Sun-sze-ta took a very active and prominent part. After the signing of the Peruvian Treaty, and on the former Customs Taotai, Chiu Kiu, suddenly, on the 28th July last, ceasing to hold office, Li Hung-chang appointed Sun-sze-ta to fill the vacant post—a very lucrative one—of Customs Taotai, till the arrival of an official who might be appointed permanently by the Central Government; and which, as we subsequently learnt from the *Peking Gazette* of the 29th Nov. last, appointed Le-chaou-tang, an officer then holding the post of Customs Taotai in Formosa. Sun-sze-ta is by profession an official lawyer, one of a class of official men employed, and in general handsomely paid, by the territorial authorities as private advisers in regard to judicial cases and official (territorial) business generally. They are almost always natives of the prefecture of Shaou-hing in Chehkeang province, of which Sun-sze-ta is a native.

On the 5th March, Sun-sze-ta, as acting Customs Taoutai, issued a proclamation informing the Chinese traders engaged in the Tientsin import traffic that he would hereafter levy the Barrier taxe 卡稅 on all native merchandize 土貨 imported in steamers or sailing vessels, immediately after the payment of the sea or Custom House foreign tariff duties, in order, as he affirmed, to prevent in future the evasion of the payment of the Barrier taxes; the records of the Custom House shewing, he further stated, that the evasion of the payment of the Barrier taxes, under the old system of collecting them, had, when the goods were about going into the interior, hitherto been constant. Up to the present time, the Chinese *inland* traders had paid, or were supposed to have paid all the Barrier taxes when on the point of taking their import merchandize from Tientsin into the interior; and the *importing* traders into Tientsin had had nothing whatever to do with such payments. The new system was impracticable, as a moment's consideration shews. The importing traders were not likely to sell a parcel of goods to one inland trader to convey in one direction; but would in all probability sell portions of a parcel of goods to several inland traders; one of whom would go North, another South, another West, and so on; and as the pass, received on the payment of the Barrier taxes, could only accompany one of the portions, the other portions of the original parcel ran the risk of being called upon to pay Barrier taxes again. And the importing traders, being besides led to understand, from information acquired from the Customs officials (and which information was later corroborated by that received at the Customs by Mr. Sheppard, the Consul for the U. S. of America at this port), that all their imported merchandize, no matter whether native or foreign, would be called upon to pay the Barrier taxes immediately after the payment of the import tariff duties—they came to the resolution to refuse to take delivery of their goods from the steamers, and to leave them under the charge of the agents of the steamers, to be landed on the British Settlement Bund, or to be stored in their warehouses till they could come to an arrangement, on a satisfactory basis, with the Customs.

As the new system of the Customs Taotai for levying the Barrier taxes had likewise a detrimental effect upon the steamer traffic, and on the foreign import traffic generally, the British, American, and German merchants of the port, on the 8th instant, addressed their respective Consuls on the situation. Mr. Mongan, H.B.M.'s Consul, during the afternoon of the 9th instant, sent a message to the Customs Taotai, through the Acting Commissioner of Customs, Mr. Twinem, telling him that if he levied Barrier taxes on foreign merchandize, he, the Consul, would deem it his duty to protest against such a proceeding. After receiving a message in reply, Mr. Mongan sent a despatch to H.B.M.'s Minister at Peking on the subject, and on the state of affairs generally. Mr. Bismark, Consul for the Emperor of Germany, and Mr. Sheppard, Consul for the U. S. of America, during the afternoon of the 9th instant, had a personal interview with the Taotai at his yamên, respecting the state of affairs. About 9 o'clock in the evening of the same day, the Customs Taotai issued a second proclamation, which was posted near the gates of the different foreign hongs in the British Settlement, distinctly stating that the Barrier taxes would only be levied at the Custom house upon native merchandize, and not upon foreign merchandize. On the 10th instant, the importing traders commenced taking delivery of their goods from the Bund, and from the S. S. N. Co.'s steamer *Chihli* to convey them to town to their warehouses there. On the 11th March, the import traffic had again apparently begun to go on as formerly.

During the afternoon of the 17th inst., however, Sun-sze-ta issued another

proclamation (his third one) calling upon the Tientsin importing traders to pay up all the Barrier taxes remaining unpaid upon all native goods which had been imported during the last half of the past year; and at the same time ordering them to make the payments before the 22nd March, or failing to do this they would be punished by fines.

This proclamation, as a matter of course, created a great sensation amongst the Chinese mercantile classes of Tientsin. Meetings were subsequently held to discuss, and consult about, the latest action of the Customs Taotai; and to decide, finally, upon what steps they should take to meet the exigency of their situation. On the 21st instant, one day before the new system of the Customs Taotai would come into operation, the owners of the shops and hongs in Tientsin closed their places of business and rigorously refused to sell anything; and we later learnt that they had resolved, at their final meeting, to stop doing all business till they could have their grievances redressed satisfactorily by an authority superior to the Customs Taotai.

Late on the day of the 22nd instant, we heard that the Chehien (district Magistrate) and the Chefoo (the prefect) had that day called together on the Customs Taotai, to advise him to cancel his new plan for collecting the Barrier taxes, and to fall back on the old system, as the public peace of the city was seriously menaced by his action. It was rumoured afterwards, that Sun-sze-ta told them that it was his duty as Customs Taotai to adopt efficient measures for the collection of the Customs revenue; and that it was, at the same time, their duty, as territorial authorities, to preserve order and tranquility at Tientsin. On the following day, the Chehien and the Chefoo issued proclamations, advising the mercantile classes to open their shops and hongs and resume business. The Territorial Taotai, on that day, called on the Customs Taotai to remonstrate with him on the new measure he had adopted for the collection of the Barrier taxes; and we were told later that the Customs Taotai informed him that he was resolved to adhere to the rule he had promulgated in his proclamations, the collection of the Imperial revenue demanding him to do so. The Territorial Taotai returned to his yamên, and shortly afterwards issued a proclamation calling upon the people to open their places of business; and telling them he would for the present stand by them. Late in the afternoon, some few shops opened, apparently for business; and, on the following morning, some of the import traders came to the Settlement to take delivery of cargo; but at 11 a.m. they stopped work, for they had, they said, received intelligence from town that the resumption of business at present would be injurious to their interests, as the matters in dispute had not been definitively settled.

Late in the afternoon of the 24th inst., H. E. Li Hung-chang, the Governor-General, arrived here from Paouting. On the evening of the 25th instant, it was stated in the Settlement that the Customs Taotai Sun-sze-ta had sent in his resignation to the Governor-General.

Paouting city lies 350 *li* or 117 miles English; and Peking 240 *li* or 80 miles English, from Tientsin. While Li Hung-chang resides for the winter season at Paouting, it is perfectly easy for the Chinese authorities at Tientsin, by the Government horse couriers, to send a dispatch to Paouting in twenty (20) hours; a dispatch would of course take the same time to come from Paouting to Tientsin. If we then give the Governor-General a period of eight hours to read a dispatch and to write a reply to it, we see that written communication can be kept up between the two cities in forty-eight hours. The Customs Taotai's first proclamation was issued on the 5th March, and his third on the 17th March. H. E. Li Hung-chang would, I am sure, have learnt of the last one on the 18th March. We must bear in mind that there are, at Tientsin, besides the Customs Taotai, several other officials—territorial and military—namely, the Chehien, the Chefoo, the territorial Taotai, the military Chintai, the Southern Legion Tetuh, the Salt Taotai, the superintendent of the Arsenal, &c.; and as it may be reasonably supposed that the Customs Taotai, like the rest of mankind, has his unfriends, I consider it quite impossible that some of those officials did not give H. E. Li Hung-chang frequent news of passing events—even if Sun-sze-ta himself had not done so, which I feel sure he would constantly do in his own interest. Hence, if Sun-sze-ta had not been acting in accordance with the approval of H. E. Li Hung-chang, the latter could have easily stayed proceedings and cancelled any obnoxious regulation. Li Hung-chang arrived here on the afternoon of the 24th instant, six days ago; yet, up to the present hour, *no public proclamation* has appeared, cancelling the Customs Taotai's new system, as promulgated in his three proclamations of the 5th, 9th and 17th March. I wish it to be understood that the public ought not to hold the Customs Taotai entirely responsible for the new system he wished to establish for the collection of the Barrier taxes; but that he was clearly acting by the approval of his Superior. He was not exacting new taxes, but was only levying the usual Barrier taxes in a different manner from that pursued formerly. We have seen that the new system could not be carried into practice, because it was established on erroneous ideas as to the working of the Tientsin inland traffic. There was—on the part of their Excellencies Li Hung-chang and Sun-sze-ta—simply an error of judgment in trying to establish a system which was unfitted for the Tientsin trade. It cannot be shewn that there was any intention to add new duties to those already in existence. There is no doubt, however, that the attempt to establish a new system of levying Barrier taxes has caused a great deal of injury to the Tientsin trade. News of the late events will have gone inland to the traders, and will have caused them to go to other markets, Chinkiang and Hankow, rather than come here.

Rumour says that Sun-sze-ta has been calling on the Governor-General at least once, if not twice, daily since the latter's return to Tientsin. The Censors at Peking—the China Press—could not avoid taking notice of the Tientsin stoppage of trade; and it will require considerable display of ability on the part of the Governor-General's six private secretaries (she yē), and Sun-sze-ta, to word the Report for the Government to foil the prying investigations of the Censors. The Censors' memorials to the Throne, and the Governor-General's replies will be well worth the study of students of Chinese, as able writing for the occasion.

In the Peking *Gazette* of the 27th March, the death of the Empress Kea-shun, wife of the late Emperor Tung-che, is announced as having taken place that morning between 3 and 4 o'clock. We had heard here for some days back that the Empress was seriously ill and expected to die. The Chinese here say that she was leading a miserable, unhappy life, and that she must have welcomed death, although only 17 years of age. For a Manchow lady, she was considered very accomplished, being able both to read and write Chinese easily.

PURITAN.

30th March.

Subjoined is a translation of the answer given by Li Hung-chang to the Tientsin merchants' petition, which appears to be as vague as possible. It seems to be understood, however, at Tientsin, that the Viceroy has really overruled the Customs Taotai's action, and that business will go on as before.

"In regard to the Fookien and Canton Merchants' Petition—according to trading regulations, originally instituted, native merchandise arriving at Tientsin by steamers or sailing ships, after paying half duty at the Foreign Customs has to pay (full) duty at the (native) Customs, and by what reason should merchants expect to have this lessened? Since the opening of the Foreign Customs, old regulations as to payment of duties at the Native Customs have continued to be in force. Recently, the Territorial Taotai and others, after deliberation with the Hai-Kwan Taotai, already issued a proclamation, and there is no occasion for you merchants to make more ado about the matter. As to the statement that a rebate was formerly allowed on duties paid, and stated terms fixed for payment, probably this has been merely a temporary measure of expedience without being recognised in the rules laid down in writing.—At the same time, taking into consideration the fact that trade has not yet recovered from the effects of floods and scarcity; therefore, the Customs Taotai will, in the matter of weights, as well as everything else, expeditiously take action in a satisfactory manner, as expediency requires, and send in his report, that consideration may thus be shown. Nor must you merchants think of making clandestine profit by smuggling, and then trump up excuses for opposing the authorities. Copies of the petition under consideration, and its enclosure are sent (to the Taotai). As to the Petition from the Ginger and Chow-chow Cargo Dealers of Tientsin, the reply to the Canton and Fookien petition also applies to this. In regard to the Petition from the medicine and other shops, as far as their statements coincide to some extent with the Canton and Fookien Petitions, the Customs Taotai will examine old regulations and take effective action as expedience requires.

23rd of 2nd moon.

FOOCHOW.

The *Foochow Herald* says Mr Sinclair, for many years Her Majesty's representative at Foochow, was to leave for home on the 27th. The best wishes of the community go with him. It is uncertain whether he will return.—The same paper says: An early tea-picking is anticipated, owing to the mildness of the weather. First crop Congous are expected to arrive a fortnight sooner than last year.—The *Man Chien Lieu* contain an account of disturbances at Shukong, in connection with an alleged desecration of graves. The people of the place appear to be in a state of great excitement, and troops have been called out.—The *Herald* says: The Min Magistrate went down toward the lower part of his district some days ago, with a a force of a thousand soldiers. A report was abroad that he had gone to arrest and punish the people who destroyed the telegraph. There is not probably the slightest truth in the report, as the depredations were mainly committed in the Fuh-tsing district, where the Min Magistrate has no jurisdiction. It is more likely that he has gone to stop some of the clan fighting, which is so prevalent in the southern part of the district.

NAGASAKI.

The *Rising Sun*, of the 26th ult., says a notification has been issued by the Japanese Minister for Foreign Affairs, relative to certain changes in the weight

and designation of silver yen. The name has been altered from silver yen to that of Trade dollar, the latter being four grains heavier than the former.—According to a notification issued by the Governor of Nagasaki, a festival in commemoration of the soldiers whose lives were sacrificed during the Formosan war, was celebrated on the 22nd instant. The festival did not wind up until late on the Wednesday night, when it was officially brought to a conclusion. The proceedings are described as having been of a comical character, and were, in one sense, appropriately terminated by a free fight between some Japanese soldiers and Chinese. Both natives and celestials were captured by the police, and taken to the Police Station.—The mosquito plague is described as having already set in at Hiroshima with such fierceness as to excite public notice; and in another paragraph, a plague of dogs is complained of, as being almost intolerable in some of the cities. At Shimonoseki, for instance, "nearly every house has its dog, and upon witnessing a stranger they band together and attack him with the fury of wolves."—The business of the Japanese Telegraph will, in April, be conducted in the new building connected with the Post Office at Nagasaki. A branch line is to be constructed between Nagasaki and Higo Ken. One thing that strikes the tourist in the interior of Japan as exceedingly singular, is the fact that the telegraph line actually passes through many large towns, containing from 10,000 to 20,000 inhabitants, and yet the people are prohibited from participating in its benefits from the want of local offices.—The *Cosmopolitan Press* says the formation of Volunteer Corps is advocated. The exhibition is recorded of a Japanese female who possesses the extraordinary power of stretching her neck fully twelve inches or more. "The sight was a most hideous one to behold, and as there seems to be no deception practised, it is certainly a very dangerous method of obtaining a livelihood."

HIOGO.

There has been another fire at Osaka, by which sixteen houses were burned. There was a strong breeze blowing at the time, so considerable damage was done before it could be got under.—Great complaint is made of mismanagement at the Yokohama Post-Office. The *Hiogo News* has received eight weeks' English papers by one steamer.—The Kobé A. D. C. have performed "Milky White" and "The Turkish Bath." To judge from the following verses of a local song introduced into the latter performance, Hiogo is not much better satisfied with the course of trade than Shanghai:

Raw Silk, that noble article, the merchant well abuses,
At Home they find that half-a-crown per pound it always loses.
Tobacco never now comes out, and Copper's always falling,
Whilst Wax and Camphor losses show which really are appalling.
Ri fol de rol.

Tea, for a wonder, showed a chance of paying once this season,
When merchants thought that Congress would, for some financial reason,
The Import Duty re-impose. Alas! their hopes were shaken:
In Congress, and in thinking Tea would pay, they were mistaken.
Ri fol de rol.

I think there's not a merchant here just now who'd mind confessing
That if there were no Imports it would rather be a blessing.
They don't fetch cost, and sales are few, so charges and commission
Will not pay rent of premises and living in addition.
Ri fol de rol.

Some Athletic Sports were held on the 18th March, under the auspices of H.M.S. *Sylvia*, and seem to have afforded much pleasure.—The following (native) carriage tax has been imposed:—Carriages drawn by two or more horses, 3 yen per annum; by one horse, 2 yen; goods carts, 1 yen. Jinrikshas carrying two men, 2 yen yearly, and carrying one man only, 1 yen. Carts drawn by bullocks, etc., 1 yen; or 50 sen according to size.—A Japanese who has just seen foreigners for the first time, at Kobé, writes to the *Minato Shimbun*, that "they are really noble beings, and that when Japanese meet them it is as the meeting of a rat with a cat. In view of this inferiority all should strive to gain knowledge."

YOKOHAMA.

The *Mail*, of March 20th, publishes a remarkable instance in illustration of the rapid way in which Japan is following Western customs, even in fiscal matters. It says, "A most important reform has been made this week in the taxation of the country. It consists in an abolition of the taxes on some two hundred and fifty articles, and the substitution for them of a tax on tobacco and saké. The annual revenue abandoned is about $1,200,000; while the revenue which the new taxes may be expected to yield is about $2,000,000."—Another very important step taken, is the revocation of the prohibition on the export of rice, forced on the Government while the late dispute with China was pending.—A party, consisting of about fifty Loochooans, arrived during the week from the South, having been summoned to the capital by the Government. It is believed that the head men of the islands have recently exhibited some remissness in obeying instructions, and that the deputation will be called upon to offer some pledge for their more perfect obedience in future.—In the Ohno bankruptcy case, it is now stated that the total liability of the bank amounts to 7,000,000 yen, and it is estimated that the assets will allow a dividend of 55 per cent.—The *Nichi-Nichi Shimbun* states that the price of rice at Osaka rose on account of the late assemblage there of high officials. Two attempts at incendiarism were made in one night at the taverns known respectively as the "Pacific" and "Far East." In each case a rag, steeped in kerosine, had been employed for the purpose. The danger was averted by the promptitude of the occupants.—The *Echo du Japon* states that the proposed railway between Tokio and Awomori is to be shortly commenced. The same authority also says that the plans of a short line between Tsuruga and Simatsu, in the province of Echizen, have been approved by the Railway Department. This line is to be 7 *ri* in length, and is estimated to cost 770 000 yen, and will join the line between Kioto and Otsu.—The *Herald* says the torpedo boat, designed by Mr. E. S. Boynton, which has for some time been under construction for the Japanese Government at the yard of Messrs. Whitfield & Dowson, was launched on the 22nd ult. It is expected that she will be in readiness to be used for making experiments in about a month.—A bowling match between eight members of the Yokohama United, and eight of the German Club was played on the 19th and 20th ult., when the latter Club scored another easy victory. Mr. Becker made the best score for the Germans, and also the best of the match, his total being 1,507, whilst Mr. Milne headed the Y. U. side with 1,473, being the second highest score. The total score of the German Club was 11,565, whilst the Y. U. Club scored 10,702, the former thus winning the match by 863 points.—The *Gazette* calls attention to the fact that there are many natives who labour for the public weal, and Government does not fail to recognise their exertions. A native residing at Naniwa-cho, Tokio, planted trees at his own expense inside Yorozuyo-bashi, which with the labour of planting them cost 85 yen and 68 sen, and Tokio-fu has rewarded this public benefactor by presenting him with three silver cups.—Telegraphic communication has been completed between Saga, in Hizen, and Kumamoto, in Higo, both important military centres. In Yezo, communication has just been established between Fukuyama (Matsumai) and Otaru, *viâ* Hakodate and Satspore.—A meeting of the Asiatic Society was held on the 17th ult., at which Mr. Goodwin read a paper entitled "On Japanese Legends," in which he showed, by several illustrations, that a marked similarity existed between some of these, and stories which, in various forms, may be found among the peasantry in Europe.—The body of another huge cuttle fish has been found by a fisherman, floating in the water. The fish is said to have measured 12 feet long, and one of its arms was a foot in circumference.—Recently, an Englishman, who resides at Kawaguchi, Osaka, while out shooting near Sakai, accidently shot a child. The *Nichi-nichi Shinbun*, speaking of this unfortunate occurrence, says a correspondence on the subject has taken place between *Gaimusho* and the British Consul, and that it was finally agreed that the sum of 5,000 yen (?) should be paid by the person who caused the accident,—the real fact being that the child was only slightly hurt, and eleven yen was all the compensation demanded.—The Mikado has been unwell, but is now better.

HONGKONG.

The *China Mail* notes the arrival of the Viceroy of Canton and his suite by the *Avoca* from Shanghai. The *Avoca* on her arrival went alongside the Company's wharf, where she was immediately boarded by several steam launches and gigs, and numbers of mandarins of various grades of rank, many of the latter bearing big bundles of highly-coloured complimentary cards and addresses under their arms. Owing to the national mourning, H. E.'s reception was of a quiet nature. He did not land, but proceeded to Canton in the evening, in the steamer *Powan*, which he chartered for the occasion. He has fixed the morning of the 31st as the time for taking over the Viceregal seal.—Anent the loss of the *Yuen-tzefei*, the *Press* says, a telegram from Amoy on the 29th states that she had gone on shore off Dodd Island. All lives are saved. The steamer *Douglas* was sent to her assistance in the hope of getting her off, as she had sustained damage to only one compartment.—The Hongkong Rifle Association had their meeting on Friday last at the Kowloon Ranges. There was a large assembly of spectators, and the meeting was very successful, the shooting being good and the weather favourable for the occasion.—The Garrison Sports were commenced on the 30th, and seem to have gone off successfully, notwithstanding heavy showers. Just as they were concluding, rain began to fall heavily, and from the immense and continuous down-pour throughout the night, it is inferred that the rainy season has at length set in. The weather continued so bad that the second day's sport was put off.—The *Times* says H. M. S. *Vigilant* was to leave on the 4th for Tientsin.—The British bark *Onward* has been sold at auction for $6,000.—The proposed farewell banquet to Mr. Mitchell was to take place at the City Hall on the 31st.—At the Peak the maximum temperature recorded in the *Gazette* of Saturday during the past week was 70, the minimum 53.5; at the Harbour Master's Office, Praya West, the maximum was 76, and the minimum 61.5.—A Chinaman has been killed at the Kowloon Naval Rifle Range. Disregarding

the red flag warnings, he persisted in picking up the bullets fired, and was at length struck by one and fell. He was conveyed without loss of time to the Civil Hospital, but died in about half-an-hour after his admittance.—The *Mail* understands the first prize of the last Manila lottery fell to Hongkong. It was won by a Parsee gentleman and a Chinese compradore, each owning half a ticket. The lucky Chinaman is employed in the Great Northern Telegraph Company.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

March 16th.—(1) A Decree, granting the request of P'an Wei, the Financial Commissioner of Fuhkien, for permission to retire from the service on the score of ill health. He is succeeded by the Judicial Commissioner, Pao-hêng, whose place is taken by Kwoh Sung-tao, now at Peking.

(2) A Decree, stating that, in the present year, military inspections are due in the provinces of Chihli, Shansi, Shensi, Szech'wan, and Kansuh. The Governors-General, or Governors of these provinces, including Li Hung-chang and Tso Tsung-t'ang, are severally commanded to hold these inspections in person.

(3 and 4) Memorials by the Court of Censorate, forwarding two appeals in murder cases, from natives of the province of Chihli—one with reference to the assassination of a peasant in a village squabble, the other the complaint of the widow of a petty military officer, who denounces her brother-in-law for the alleged murder of her husband and son, and for indirectly causing the suicide of her son's wife. The authorities, she implies, are in league to deny her justice, and she especially charges the district Magistrate of Tientsin with endeavours to hush up the case. Referred in the usual manner.

March 17th.—(1) A Decree. The Censor Wang Chao-lan memorializes, representing that an excessive mortality takes place among the prisoners in the Board of Punishments, and requesting that pending arrears be disposed of. Inasmuch as the system of incarceration is a question affecting the lives of the people, injunctions have been repeatedly been laid upon the Board to dispose of pending cases with due diligence; and it is scandalous, indeed, that no less than ten deaths from exhaustion should have taken place in one month, during the period when the Censor was acting, the month before last, as visitor of the prison. Let the chief authorities of the Board at once prescribe a limit of time within which all cases before them, whether already adjudicated or still undetermined, shall be definitely disposed of, in order that there may be no further delay. Compassionate regard should likewise at all times be extended to the prisoners in custody, and the jailers be stringently prohibited against shewing them ill-treatment. It is imperative that all abuses be done away with, in furtherance of the sovereign's determination that wisdom and sedulous care shall direct the administration of justice.

Public Meetings.

THE CHINA AND JAPAN MARINE INSURANCE COMPANY.

The ordinary half-yearly meeting of shareholders was held on the 5th April. Present—Messrs Drysdale (in the chair), A. J. Little, O. C. Behn, Hugh Sutherland, C. E. Bade, Directors; J. Jaques, M. Hawtrey, R. C. B own, F. G. White, John Forster, Overbeck, Wainewright, Pollock, Banyard, Cance, White, Groom, Thurburn, Wilson, and John Dunn (Secretary)—representing 1411 votes.

The notice convening the meeting having been read,

The Chairman said—The first resolution to bring before the meeting is to pass the minutes of the last meeting. To read them will occupy a considerable time, and there being only one point therein requiring any comment, I will propose that the minutes be taken as read. At the last meeting, a resolution was passed regarding the reduction of the capital of the company. You are all aware of the steps taken with the Shanghai shareholders. A circular letter was sent to each shareholder, to obtain their consent or disapproval, and the result showed that far from unanimous sanction could be obtained, which made the Directors decide not to take further steps in the matter. We have heard from London, that any reduction in the capital of the company would be looked upon in an unfavourable light. The question may, therefore, be considered as set at rest. Without further remarks, I now propose—

That the Minutes be taken as read.

Seconded by Mr Pollock, and carried.

The Chairman then called attention to the report and accounts. The report had been in the hands of the Shareholders for several days, and he had but few remarks to add to what was there stated. It was not a satisfactory duty for the Directors to lay before the Shareholders such a report, but if the season, which had been so disastrous to underwriters, be considered, we must congratulate ourselves that we have a balance, although small, to the good. He (the Chairman) had seen several reports on Home Companies, which showed a considerable balance on the wrong side. This has been causing a stir amongst the underwriters, and there is at present a strong feeling that rates should be raised; if not, we shall have to bide our time, and do a steady, and as safe a business as possible, as a change must come. The Directors would have liked to pay a dividend, but the amount being so small, it was agreed that the whole should be carried forward. If the next term is a fortunate one, an effort will be made to give a liberal dividend to the Shareholders, which in a measure will compensate them for the past year. However, in doing so, the Shareholders will not forget the interest of contributors, who will receive, as far as it can be granted, a fair bonus for their support to the Company. The business of the Company compares favorably with last season, and so far in 1875 there is a decided increase. Last year, Tls. 30,000 was earned during the first three months; for this, it is estimated, Tls 40,000. The losses by the report are put down at Tls. 4,000; but, since it was printed, the loss of the *Yuen-tsze-fei* increases that by about Tls. 7,000—in all, say Tls. 11,000. The Directors decided to open a branch in London on the 1st January, 1876, under the management of Mr. Schmidt, and have every confidence in an increase of business. Mr. Schmidt will employ his time, after taking a holiday, in working up and making himself thorough acquainted with the Company's business. A Committee will be appointed to assist him. The London Agents, Messrs. Robt. Benson & Co., have given complete satisfaction. The chief reason the change has been decided upon, is that supporters prefer an independent agent to a firm which is in business. From information received to-day, Messrs. Benson & Co. will assist in the selection of a Committee, for which they deserve the thanks of the Shareholders. The head office charges have had the attention of the Directors, and they are glad to report that a reduction of about Tls. 3,000 has been effected. The risks for 1874 are well run off, and there are no full lines outstanding; none, he believed, exceeding Tls. 10,000 or Tls. 12,000 If any shareholder had any remarks to make, he would be glad to hear them.—(No remarks offering). He would now propose—

That the report and accounts as printed be passed.

Second by Mr. Little, and carried *nem. con.*

Report.

The Directors beg to place before the Shareholders a Statement of the Company's Accounts for the six months ending 31st December, 1874, shewing at that date a Balance in hand of Tls. 15,087.89, which sum they propose to carry forward to new account.

It is estimated that after all claims for 1874 have been settled, and allowing for re-insurances, there will be a surplus of about Tls. 4,000 in favor of Working Account of the current year. In the event of any salvage being recovered from the wreck of the S.S. *Japan*, it will go to increase the foregoing amount.

The losses for the year have been unusually heavy, and under the circumstances the Directors regret that they cannot recommend the payment of a Dividend to the Shareholders. The income of the Company continues satisfactory, but owing to the practice of returning 33⅓ per cent. on local risks, the Net Premia shew a deficiency; this heavy cash discount absorbs the return that would otherwise have remained for distribution to the Contributors.

The Premia earned from 1st January to 31st March of the current year are estimated at Tls. 40,000, while the losses reported to date amount only to Tls. 4,000.

Mr. R. W. Little resigned his seat at the Board on his departure for Europe, and Mr. A. J. Little has been appointed to fill the vacancy. This appointment is now submitted to the Shareholders for confirmation.

In compliance with the Deed of Settlement, Mr. Thos. M. Drysdale and Mr. C. Emil Bade now retire from the Board, but offer themselves for re-election.

The Accounts have been audited by Mr. Geo. R. Corner and Mr. O. Brandt, whom the Directors recommend for re-election as Auditors for the current year.

Balance Sheet, 31st December, 1874.

Mr. Sutherland next proposed, and Mr. Behn seconded—

That the appointment of Mr. A. J. Little as a director of the Company be confirmed.—Carried.

Mr. Little proposed, and Mr. Behn seconded—

That Messrs. T. M. Drysdale and C. E. Bade be re-elected Directors of the Company.—Carried.

Mr. GROOM asked whether Mr. Carmichael were still a Director of the Company?

The CHAIRMAN said no formal resignation had been received from him.

Mr. GROOM asked, because his name was still on the list of Directors. It was pretty well known he was not coming back. Would he remain on the Board in London?

The CHAIRMAN could not yet say.

Mr. BADE next proposed, and Mr. SUTHERLAND seconded—

That Messrs. Corner and Brandt be re-elected auditors for the current year.—Carried.

This closed the business of the ordinary meeting.

The meeting then resolved itself into an extraordinary one, to consider a proposed amendment in the Deed of Settlement.

The CHAIRMAN said the proposed alteration of the Deed of Settlement was to increase the Directors' powers to invest the funds of the Company when good opportunity offered. The Banks now offered very small interest on deposits, as compared with former years; only 5 per cent. was now obtainable, as against 6 and 7 per cent. which used to be obtainable. Whereas there was no doubt money could be loaned at a more favourable rate with every security to the Company. The Clause in question (Clause 90) now stood as follows:—

The Capital for the time being, and all other monies in the possession of the Company (except such sums as the Court shall consider necessary for the disbursements of the Company), shall be invested *in the Public Stocks, Funds, or Government Securities of Great Britain or India, or in the Colony of Hongkong, or placed in deposit on Loan in Local Banks, or in any first class London Banks*; and from time to time converted, realized or drawn out as occasion may require, or as the Court shall consider expedient; and all cheques or orders for the conversion, realization or withdrawal of such Capital, Monies, Stocks, Funds, Government Securities, Loans, or Deposits shall be signed by two of the Directors, and the Secretary for the time being, in case of transactions at Shanghai; and in the cases of Branches or Agencies having a Local Committee, or a Board of Directors, by two members of such Committee or Board of Directors, and the Manager, Secretary or Agent, for the time being.

It was proposed to alter it to read as follows:—

The Capital for the time being, and all other monies in the possession of the Company (except such sums as the Court shall consider necessary for the disbursements of the Company), shall be invested *in the Public Stocks, Bonds, Funds or Securities of the Government of Great Britain or of India, or of any Colony or Dependency of the United Kingdom, or of any Foreign Country or State, or in Shanghai Municipal Debentures or Securities, or upon Mortgage of Real or Leasehold property in Hongkong, China, Japan or elsewhere, or in or upon deposits or Loans at interest in or to any Bank or Banks established at Shanghai or elsewhere*: and from time to time converted, realised, or drawn out, as occasion may require, or as the Court shall consider expedient; and all cheques or orders for the conversion, realization, or withdrawal of such Capital, Monies, Stocks, Funds, Government Securities, Loans, or Deposits, shall be signed by two of the Directors, and the Secretary for the time being, in case of transactions at Shanghai; and in the cases of Branches or Agencies having a Local Committee, or a Board of Directors, by two members of such Committee or Board of Directors, and the Manager, Secretary or Agent, for the time being.

He would propose that the Clause as altered be adopted.

Seconded by Mr. SUTHERLAND and carried *nem. con.*

This closed the business of the meeting, which separated with a vote of thanks to the Chairman.

SHANGHAI YACHT CLUB.

The annual general meeting of the Shanghai Yacht Club was held on the 31st March, the attendance being more than usually numerous. The chair was taken by Mr. A. J. Little, Commodore; and there were also present—Messrs. G. B. Hill, Vice-Commodore; C. P. Blethen, J. H. Vail, C. V. Housman, H. E. Amoore, H. B. Miller, A. Thurburn, W. White, B. Palamountain, J. Crofts, E. A. Oliver, C. J. Ashley, W. H. Richard, J. E. Waller, J. J. Tucker, J. Brown, and W. H. Hewett, Secretary.

The minutes of the last meeting were read, confirmed, and signed; and the statement of accounts for the season 1874-75 was taken as read, as follows:—

The CHAIRMAN proposed and Mr. BLETHEN seconded that the accounts, as printed, be passed.

Mr. WHITE drew attention to a small item of $29, subscriptions to the *Field* and other papers, which papers were supposed to lie on the table of the Club room for the convenience of members. He was not aware that the room was open for that purpose, or he might have availed himself of the privilege, and he did not know that the papers alluded to were ever seen by the members. The amount was not a very large one, but considering the position of the Club's finances, he thought curtailment was necessary; and, as the papers in question seemed of little use to the Club, he questioned the propriety of continuing them. He thought *Hunt's Nautical Magazine* was sufficient for the purposes of the Club.

The SECRETARY said among the papers subscribed for were the *Field*, *Wilkes Spirit of the Times*, and *Hunt's Nautical Magazine*. They were all of interest to yachting men, and it ought not to be forgotten that the *Field* had noticed yachting at Shanghai, and had given a lengthy report of one of the races.

Mr. MILLER said it was not his fault that the papers mentioned did not lie on the table, for they were never brought to the Club-house. He asked what had become of them?

The SECRETARY replied that the numbers were sent to be bound.

Mr. MILLER said even if the papers had been brought to the Club-house, they would have been of no use, for nobody ever came there to ask for them.

Mr. WHITE moved, and Mr. G. B. Hill seconded—

That the magazines and papers, with the exception of *Hunt's Nautical Magazine*, be discontinued as soon as possible.

Several members disagreed with the proposition, and

The CHAIRMAN said they had at least got the nucleus of a good Club in Shanghai, and should do all they could to keep it together. One of the best means of maintaining interest in it, was to spread information respecting yachting here and elsewhere, among the members.

A vote was then taken, but only five hands being held up in favour of the motion, it was lost by a large majority.

It was understood that for the future, the Club-room would be open to members as a reading room, and that all the papers and magazines subscribed for would be found on the table.

The CHAIRMAN said the next business was the election of officers for the ensuing year.

The ballot resulted as follows:—Mr. A. J. Little was elected Commodore; Mr. G. B. Hill, Vice-Commodore; Mr. J. Wilson, treasurer; Mr. Dillon, prize-bearer; Messrs. Coryell and R. Mackenzie (in place of Mr. R. F. Eastlack), auditors; Mr. Hewett, hon. secretary; Messrs. Tucker and Mr. Lambert, hon. measurers; and Messrs. Ashley, C. P. Blethen, J. P. Croal, and Viguier (in addition to the ex-officio members), committee of management.

For the election of auditors, there were no fewer than five ties between Messrs. Mackenzie and J. E. Waller, the latter being at last permitted to withdraw at his own repeated request.

Mr. VAIL proposed—

That the Committee be asked to exercise greater care than heretofore with regard to the position of Stakeboats, and Course to be run over, so that no dispute can possibly arise after the race is over.

Mr. WHITE seconded the motion, and it was carried.

The CHAIRMAN said the next business demanding their attention was the arrangements for the Spring Regatta. The Committee suggested that the Challenge Cup should be raced for on the 17th inst.; and that the Club should give another Cup, to be raced for on the 24th inst. He (the Chairman) should propose that one of them should be a Corinthian race. About Tls. 200 had already been subscribed up to the present date, toward the cost of the Challenge Cup, but it was hoped that amount would be increased by further subscriptions before the date of the race. As to the course to be selected, the Committee were in favour of the Woosung course, as being more suitable, and presenting greater variety.

The HON. SECRETARY said he thought the Club were in a position to give a good challenge cup. They had been promised Tls. 200 towards its cost, and he suggested that the Club should make up the amount to Tls. 500, especially when they remembered it would have to be won two years in succession to become the property of the winner.

Mr. MILLER suggested that the winner should have the option of selecting his own Cup, at whatever store he chose, as being likely to lead to competition among the various firms to supply a cup of the most artistic work.

This was objected to, and the subject was not pressed.

Mr. WALLER having seconded the Chairman's proposition as to the dates of the Spring Regatta,

A conversation ensued, and, it appearing there was a difficulty about tides on the days named by the Chairman, it was agreed, without a division, to leave the fixture and selection of course to the decision of the Committee, the value of the cup to be advertised as not being less than Tls. 200. It was also resolved that Tls. 75 should be given from the Club funds, for a Cup for the Corinthian Race.

Mr. Tucker asked if there was any restriction as to the kind of sail to be hoisted in the race for the Challenge Cup?

The Hon. Secretary read the rule bearing on the question, and it appeared there was no restriction.

The Chairman said he had to propose an alteration in Rule 13, in the margin of which was printed, "Candidates elected at meetings and by Commodore." The election by the Commodore was not mentioned in the body of the rule. He thought it was a very good rule indeed, especially with reference to Corinthian races. They would remember that at the last Autumn Regatta there was much difficulty in obtaining Corinthian crews, and to obviate such difficulty for the future, he would propose that it should be allowed to put a man on board to make up a crew for a race, and ballot for him afterwards. It was done in the Rowing Club, and there was no reason why it should not be in the Yacht Club.

Mr. Ashley strongly objected to such an alteration. Who would guarantee that the man so put on board could be received by the Club? He might, also, be blackballed, and even if he were not, a boat winning in that way would, under the rule, be disqualified, the man not being a member when she won. He preferred the rule remaining as it was.

The Chairman said he thought it would be unlikely the man would be blackballed, unless he was a regular sailor; and of course it would be understood that seamen were not to be so put on board.

Mr. Blethen suggested that the president of the race should have the power to accept the man.

The conversation was prolonged, until

The Hon. Secretary pointed out that before any rule could be altered, it was necessary to give fourteen days' notice of such intention, and that the proposed alteration must then be brought before a general meeting of members.

The Chairman then gave notice of motion, as follows:—

That the Commodore or in his absence the Vice-Commodore, or in their absence the President of the match for the time being, shall have power to elect a member to sail for a Corinthian Cup on the morning of the race, subject to a ballot if demanded by ten members.

Mr. G. B. Hill also gave notice that he would move—

That should the member elected by the President of a match be blackballed on being balloted for, the owner of the boat in which he sailed shall forfeit the entrance fee of a member; but the boat, if a winner, shall not be disqualified.

There being no other business, the meeting broke up with a vote of thanks to the Chairman.

THE CHINESE POLYTECHNIC INSTITUTION AND READING-ROOM.

Minutes of a meeting of the Committee of the Chinese Polytechnic Institution and Reading-Room, held at the C. M. S. N. Company's Head office, on Friday, April 2nd, 1875.

Present—Messrs. Hsü-Chung-hu, Tong King-sing, A. Wylie, T. W. Kingsmill and J. Fryer.

On the motion of Mr. Wylie, Mr. Fryer took the Chair.

Mr. Fryer stated that the meeting had been called at the suggestion of Mr. Medhurst, principally with the view of coming to a final determination respecting the purchase of land and the erection of a building, as well as to report upon the progress that was being made by the Institution generally.

Mr. Kingsmill explained, by reference to a plan of the Settlement, the position and advantages of a piece of land on the Hankow Road, for which he had been for some time negotiating. As, however, he could not positively guarantee that a road would be opened hereafter by the Municipal Council, giving proper access and frontage to this land, it was agreed that some other place must be found.

Mr. Hsü-Chung-hu stated that both he and his father had spent much time, and had taken a great deal of trouble in endeavouring to purchase some land on the Canton Road; but that, owing to several difficulties that had arisen, they had not up to the present time been successful. He, however, believed that, if the Committee were willing to wait a little longer, he might be able to conclude the purchase on advantageous terms.

Mr. Fryer mentioned that he had received an offer of about 6 mow of ground at a more reasonable price than either of the former, and that this land appeared both to Mr. Medhurst and himself to be in a suitable locality and to possess some special advantages. After considerable discussion, however, it was decided that its distance from the most frequented parts of the Settlement was too great to make it a desirable position.

Mr. Tong-King-sing proposed a plot of vacant ground on the Hankow Road, which he thought could be purchased at the same price as the piece mentioned by Mr. Kingsmill, and which, moreover, possessed the great additional advantage of having a South frontage on the main road.

Mr. Wylie suggested that the Committee should go and examine the land in question at the close of the meeting, and come to a decision respecting it on the spot. This suggestion was afterwards carried out, and it was determined to offer to purchase 5 mow at the rate the owner had specified—viz., Taels 500 per mow.

Mr. Hsü-Chung-hu suggested that, as soon as the ground was purchased, a building should be erected in the Chinese style of architecture, but with modifications in the interior, so as to fit it for the different purposes of the Institution, and yet at the same time not to offend the tastes of such high native officials as would be certain to become visitors. The buildings for the Exhibition of machinery, appparatus, &c., could be of a rougher description and connected with this main building. The expense would not be very heavy, especially as he was ready to supply the plan himself, and to arrange for the work with a native contractor who had erected most of the buildings at the Arsenal.

Mr. Fryer supported Mr. Hsü's proposition.

Mr. Kingsmill said that he had already prepared a plan which embraced all Mr. Hsü's ideas, and was prepared to undertake the whole matter of building if duly authorized by the Committee.

Mr. Hsü-Chung-hu thought that the funds left for building purposes, after purchase of land, would be so small that the strictest economy would be necessary. He was able and willing to manage the work himself, gratuitously, and did not see the necessity of paying for the services of a Foreign Architect. He, moreover, objected to belong to a Committee of which any member was to be allowed to charge for his services.

Mr. Wylie thought it would perhaps be better on the whole to employ a Foreign Architect, because of the necessity for continual care and supervision during the erection, as well as the importance of the work being done by some one who could be made responsible.

Mr. Tong King-sing considered that the commission of 2½ per cent. on purchase of land and of 4 per cent. on Chinese building, would not after all amount to much in the present case; and that a considerable amount of work had to be done for it which would fall heavily on any one not living on the spot. In deference, however, to Mr. Hsü's objection, it was agreed to wait till Mr. Medhurst's return to Shanghai, in order to have his opinion before coming to a definite conclusion on this point.

Mr. Fryer suggested that a report of the progress and future prospects of the Institution, embodying the list of donations and annual subscriptions up to 31st of March should be drawn up at an early date and translated into Chinese. It might be printed both in English and Chinese, and circulated gratuitously. This was agreed to; and Mr. Tong-king-sing promised to obtain the Chinese Subscription book with the names of annual subscribers from Mr. Wang-yung-ho, who had been asked to collect native subscriptions.

Mr. Fryer then gave a few statements about matters connected with the Institution, that had arisen since the last meeting. He said that Mr. Wade had sent from Peking a subscription of 100 Taels, and expressed his approval of the scheme. Fêng, the Taotai of Shanghai, had promised through Mr. Hsü to give a liberal donation. Several officials of high rank, in passing through Shanghai, had promised their support. The Honourable Mr. Lawrence had kindly consented to act as Honorary Secretary of the Home Committee which, by last advices, was to hold its first meeting as soon as the prospectus and regulations of the Institution, finally determined upon by the Shanghai Committee at their last meeting, should come to hand. Messrs. John Bourne & Co., the agents for the Institution, had received an offer from a firm in Halifax, to subscribe the sum of ten guineas; they had also forwarded several packages of articles for exhibition, collected from various manufacturers. Messrs. Llewellyn & Co., of Shanghai, had offered a collection of pure drugs and chemicals; other local firms had promised to send articles when there was accommodation for them. Messrs. Mackenzie & Co. had kindly consented to take delivery of packages that were arriving, and to give them temporary godown room until the building be got ready for them; and lastly, H. E. the Taotai had promised to allow packages of apparatus for the Institution to pass the Imperial Maritime Customs duty free.

John Fryer,
Hony. Secretary.

CONSEIL D'ADMINISTRATION MUNICIPALE DE LA CONCESSION FRANCAISE.

Résumé des délibérations du Conseil.

Séance du 23 Mars, sous la présidence de M. A. Voisin. Conseillers présents, M.M. A. Hennequin, L. Ewald, F. D. Hitch, H. Maignan, E. Millot. H. Sayn, Secrétaire.

Communication d'une lettre de M. le Comte de Rochechouart, Chargé d'Affaires de France à Pékin, répondant à celle que le Conseil lui a adressée relativement à l'affaire de la Pagode de Ningpo. Le Conseil émet l'opinion que, conformément au désir exprimé par M. de Rochechouart, le réglement de cette question doit être laissé entre ses mains.

Lecture est donnée de la lettre suivante du Municipal Council.

Encroachment—Yang-king-pang Creek.

Shanghai, 18th March, 1875.

Sir,—The Council, on Monday last, had placed before them your letter of the 13th inst., in reply to the one I had the honour to address to you on the 8th, regarding the appointment of Arbitrators, and the points to be submitted to them for their decision

The Council note with pleasure that M. Godeaux, Consul-General for France, has kindly consented to act in conjunction with Mr. Medhurst.

With regard to the points to be submitted, my colleagues desire me to say that, as by your acknowledgement of the encroachment in question on the Yang-king-pang, our first point is done away with, it is not necessary therefore to include it in the question before the Arbitrators.

With regard to the two new points, which you state your Council intend submitting to the Arbitrators, I am desired to state what I had already stated verbally to you at the meeting of the delegates, that the Council could not agree to have those points submitted as part of the question. The Council regard them as partaking of the nature of arguments to be used in support of a case, and not as distinct points for arbitration; and if brought forward at all, should be brought forward in that way by your Council, when this Council can bring forward their arguments to combat them; and they do not doubt that, on reconsideration, you will agree in this view.

The question then to be submitted to the Arbitrators—the fact of the encroachment being admitted—would be simply these two points :—

1. Is the Bund in its present position an obstacle to navigation?

2. Does the encroachment prejudice the interests of property along the line of the creek?

If this meets your concurrence, nothing remains but to fix a day when each Council will place before the Arbitrators their facts and arguments in the case, which, I presume, had better be in writing, so that each side may have an opportunity to answer, in writing, the arguments adduced by the other, and that will close the evidence to go before the Arbitrators, unless they wish for further evidence or explanation.

The Council are much gratified at your recognising the desirability of agreeing to a fixed width of the creek for the future, so soon as the result of the arbitration is made known.

I have the honour to be, Sir,
Your obedient servant,
J. G. PURDON,
Chairman.

A. VOISIN, Esq.,
Chairman French Municipal Council.

Cette lettre répond à celle qui a été adressée le 13 Mars au Président du Municipal Council, pour lui faire connaître qu'indépendamment des bases sur lesquelles les deux Administrations ont accepté en 1873 de faire porter l'arbitrage de la question d'empiètement sur le Yang-king-pang, le Conseil avait l'intention de soumettre à l'examen des arbitres deux nouveaux points qui résultent, l'un, de faits qui se sont passés postérieurement à la date de cette acceptation, et l'autre, d'empiètements commis par le Municipal Council.

A ce propos, le Président informe ses collégues que, par une omission regrettable et contrairement à l'esprit et au sens de la lettre même adressée au Président du Municipal Council, un seul de ces deux points y a été mentionné, et que le plus important, celui qui résulte d'empiètements commis par le Municipal Council, a été omis.

Le Président est chargé d'exprimer au Président du Municipal Council tous les regrets du Conseil pour l'erreur matérielle qui a été commise, et d'énumérer à nouveau les points que la Municipalité Française declare vouloir soumettre à l'appréciation des arbitres. Le Conseil approuve, à cet effet, la rédaction de la lettre suivante :

MONSIEUR,—Dans la lettre que j'ai eu l'honneur de vous écrire le 13 Mars, pour vous faire connaitre les points que le Conseil désirait soumettre aux Arbitres chargés de juger la question d'empiètement sur le Yang-king-pang, une regrettable omission a été commise en ne mentionnant que l'un des nouveaux points et oubliant entièrement le plus important.

Voici les points sur lesquels le Conseil désirait faire porter l'arbitrage :—

1e.—La construction du quai du Yang-king-pang, entre la rue Discry et la rue Touranne, dans les conditions actuelles, est elle un obstacle à la navigation?

2e.—Porte-t-elle préjudice d'une façon réelle aux intérêts des propriétaires riverains?

3e.—Le non envoi du mémoire annoncé par le Municipal Council dans sa lettre du 15 Janvier, 1873, et son consentement ultérieur à la commande d'un pont en fer dans des proportions qui sont justes suffisantes pour l'écartement des deux rives du Yang-king-pang, telles qu'elles existent aujourd'hui, n'a-t-il pas vicié la réclamation du Municipal Council, et autorisé le Conseil Municipal à considérer comme définitif l'alignement actuel?

4e.—Des empiètements ont-ils été commis par le Municipal Council sur la rive gauche du Yang-king-pang. Dans d'affirmative, ces empiètements sont ils un obstacle à la navigation du canal, et portent-ils préjudice d'une façon réelle aux intérêts des propriétaires riverains?

C'est ce dernier point qui malheureusement n'a pas été transcrit dans la lettre signée par moi.

Aprés vous avoir témoigné mes vifs regrets pour l'omission qui a fait placer devant vous et vos collègues une expression tronquée de la délibération du Conseil dans sa séance du 12 Mars, je suis heureux, en réponse à la lettre que vous m'avez fait l'honneur de m'écrire le 18 Mars, de vous informer que le Conseil ne désire pas insister, comme point d'arbitrage, sur la conclusion qui pourrait être tirée du silence du Municipal Council pendant deux ans, sur la réclamation à laquelle il avait annoncé cependant, à l'origine, devoir donner la forme la plus pressante.

Afin d'obvier à tout malentendu, je vous prie, donc, de me permettre presque une redite en énumérant ici les points que le Conseil entend soumettre à la décision des arbitres.

1e.—La construction du quai du Yang-king-pang, entre la rue Discry et la rue Touranne, dans les conditions actuelles, est elle un obstacle à la navigation du canal?

2e.—Porte-t-elle préjudice d'une façon réelle aux intérêts des propriétaires riverains?

3e.—Des empiètements ont-ils été commis par le Municipal Council sur la rive gauche du Yang-king-pang. Dans l'affirmative, ces empiètements sont-ils un obstacle à la navigation du canal, et portent-ils préjudice d'une façon réelle aux intérêts des propriétaires riverains?

Espérant que les deux Administrations se trouveront d'accord pour faire régler, d'un seul coup, par la décision des arbitres, toute controverse relative à des empiètements sur le Yang-king-pang, je vous prie, Monsieur, d'agreér l'assurance de ma considération trés-distinguée.

Le Président du Conseil,
A. VOISIN.

Monsieur J. G. PURDON,
Président du Municipal Council.

Lecture est donnée de la lettre suivante du Municipal Council.

Yang-king-pang Bridge No. 1.
Shanghai, March 19th, 1875.

SIR,—In reply to your letter of 13th instant, I beg to say that this Council have given the subject therein referred to, the very careful consideration it deserves, as they are anxious to do all in their power to prevent, not only disagreements with your body, but above all the convenience of the public being in any way interfered with. They are, however, of the opinion that the question, as to what is the proper proportion of the expense of maintaining bridges over the Yang-king-pang to be borne by each Municipality, is so entirely one in the discretion of the Community that they feel obliged to decline your proposition to leave it to the decision of the French and English Ministers at Peking. The annual meeting of Ratepayers takes place within a few weeks, and should the question then come up, the Council will be instructed what course to pursue.

The Council wish me, however, to state that they do not consider the responsibility of interruption to the traffic, should it occur, would in any degree rest upon them, as the determination not to bear, as hitherto, an equal share of the cost of the Bridges has been taken only by your Council.

In this connection, I might add that many of the bridges are rapidly approaching an unsafe condition. For obvious reasons, the Council have avoided bringing this forward in the discussion, but it is only right now to point out, that in all probability the Council ere long for their own protection will have to give public notice that certain bridges are dangerous, particularly for heavy vehicles.

I am, Sir,
Your obedient servant,
J. G. PURDON,
Chairman.

A. VOISIN Esq.,
Chairman French Municipal Council.

Le Conseil décide que la réponse suivante sera faite à cette lettre :—

MONSIEUR,—D'après le désir du Conseil, je viens répondre à la lettre que vous m'avez fait l'honneur de m'écire le 19 de ce mois, relativement au pont du Yang-king-pang No. 1, pour m'informer que la proposition de décision par arbitrage à Pekin de la proposition dans laquelle chaque Municipalité doit supporter les dépenses d'entretien des ponts du Yang-king-pang, faite par ma lettre du 13 Mars, n'a pas rencontré l'approbation de votre administration.

Le Conseil a remarqué, avec regret, que tout en rejetant le mode d'abitrage à Pékin, le Municipal Council n'en propose lui-même aucun autre, et que du désir de la Municipalité Française de ne supporter, que dans ce qu'elle croit être une juste proportion, les dépenses d'entretien des ponts, il tire la conclusion que ces ponts ne doivent être ni remplacés ni même réparés.

Quant à l'interruption probable de la circulation, vous en repoussez toute responsabilité pour votre administration; mais vous me permettrez de vous faire remarquer que l'administration Française est encore bien moins responsable de ce que, d'une divergence d'appréciation de la qualité des dépenses incombant à chaque Municipalité pour l'entretien des ponts, votre Administration veut faire une condition même d'existence de ces ponts. C'est faire dériver des actes du Conseil une conséquence qui n'en peut ressortir; en effet, de ce que le mode de réglement à Pékin de la partie purement financière de la question ne parait pas au Municipal Council devoir être adopté, il ne semble en aucune façon qu'une autre solution ne puisse être trouvée et, surtout, il n'en découle pas que la circulation doive être interrompue sur les ponts du Yang-king-pang, ainsi que votre lettre cependant le donne à entendre. La question même d'existence des ponts n'aurait jamais dû, parait il, être soulevée, car leur existence est une nécessité indiscutable; ce qui est discutable, c'est le montant de la part contributive dans les dépenses que doit supporter chaque Municipalité pour maintenir cette existence.

C'est, donc, un point purement financier et nullement vital qui constitue la difficulté pendante. Aussi, le Conseil, étant d'avis que les ponts doivent être remplacés et entretenus sans délai, au fur et à mesure qu'il est nécessaire de le faire, désire vous rappeler sa lettre du 13 Mars par laquelle il a donné son consentement à la commande, par les soins du Municipal Council, d'un pont en fer destiné à remplacer le pont actuel en bois No. 1. Il croit qu'il est indispensable de faire sans retard cette commande, et que la part contributive de chaque Municipalité dans la dépense qu'elle entrainerait, pourrait être déterminée ultérieurement, si votre Administration y consent, par un arbitrage portant sur des faits et des chiffres, et statuant d'une manière générale dans quelles proportions les dépenses d'entretien des ponts du Yang-king-pand doivent, en bonne équité, grèver le budget de chaque Municipalité, de façon à ce que les finances de l'une ne puissent paraître être protégées aux dépens de celles de l'autre. C'est, je n'en puis douter, cette fin que peut désirer le Municipal Council, et c'est simplement celle que veut le Conseil Français. L'entente parait, donc, devoir être facile; j'oserais même dire qu'elle est inévitable, si j'étais certain que le Municipal Council voulût admettre ce principe d'arbitrage.

Dans cette hypothèse, et dans le cas d'une commande faite avec son consentement par votre Administration, le Conseil est tout disposé á payer, provisoirement, soit un tiers, soit moitié des dépenses, sous la condition qu'un versement sera fait par l'une des deux Municipalités á celle qui, d'aprés les conclusions des arbitres, se trouverait avoir payé plus que sa part des dépenses d'entretien des ponts du Yang-king-pang.

Espérant que les efforts du Conseil, pour dégager de ce débat toute pensée autre que celle d'une solution équitable pour les intérêts du public en général et plus spécialement de ceux qui possèdent des deux côtés du Yang-king-pang et concourent au soutien des deux Municipalités, seront appréciés et secondés par votre Administration, je vous prie, Monsieur, d'agréer l'assurance de ma considération très-distinguée.

Le Président du Conseil,

A. Voisin.

Monsieur J. G. Purdon,

Président du Municipal Council.

Lecture est donnée de la lettre suivante du Président du Municipal Council, en réponse à celle qui lui a été adressée le 11 Mars, pour soumettre à son approbation un projet de rectification d'alignement du quai du Yang-king-pang.

Shanghai, March 19th.

Sir,—Your letter of 11th inst., enclosing plan, shewing where you propose making certain alterations in the Bund line of the Yang-king-pang Creek, on your side, between the Bridges Nos. 2 and 3, has been laid before the Council.

In order that there may be no misunderstanding, the Council have drawn up a plan on an English scale, and if, as they understand, the width of the Creek will be narrowed in at the points colored blue on the plan from 1ft. 6in. to 2ft., and increased in width at point marked red by 11 feet, the Council desire me to state that they have no objection to your adopting such line.

I have been requested to take this opportunity of suggesting that the two Councils should arrange on a common scale for plans, say 50 feet to an inch, as it would very materially assist in a thorough understanding of the plans submitted by one Council to another.

I am, Sir,
Your obedient servant,

J. G. Purdon,
Chairman.

A. Voisin, Esq.,
Chairman French Municipal Council.

L'Agent-Voyer a reçu l'ordre de procéder immédiatement à l'exécution des travaux, en se conformant strictement à l'alignement adopté par le Conseil et approuvé par le Municipal Council.

Le Secrétaire est chargé de remercier M.M. les Agents de la Compagnie du Gaz, pour les renseignements qu'ils ont obligeamment fournis sur l'état des lanternes à gaz.

Communication d'une lettre du Président des Administrateurs de la Compagnie du Gaz, informant le Conseil que la dite Compagnie ne peut adhérer à la proposition qui lui a été faite de soumettre le contrat passé entre elle et la Municipalité à l'interprétation d'un magistrat à Saigon. Le refus de faire droit à la demande de réduction dans le prix du gaz formulée par la Municipalité est basée sur ce qu'il n'y a pas, suivant les Administrateurs du gaz, une divergence d'opinion sur l'interprétation d'aucun article du contrat.

Le Conseil ne partageant pas cet avis, décide de mettre la Compagnie du Gaz en demeure de soumettre à une décision arbitrale l'interprétation à donner aux termes du contrat.

Lecture d'une lettre de M.M. Lacroix, Cousins & Cie. exposant les raisons pour lesquelles ils ne prennent pas part à la contribution volontaire dite taxe commerciale. Ces Messieurs ayant, toutefois, demandé quelques renseignements, sur la part qu'ils auraient à prendre à cette taxe, dans le cas où elle serait assimilée à une taxe obligatoire, le Conseil espère que les explications fournies par l'Administration amèneront un changement dans la résolution de M.M. Lacroix. Cousins & Cie.

Communication des lettres par lesquelles les propriétaires de lignes télégraphiques sur la Concession consentent à payer à l'Administration un abonnement annuel pour l'usage des poteaux télégraphiques qu'elle pourrait être amenée à établir à ses frais pour assurer le service télégraphique.

Offre de M. Bishop de fournir gratuitement à la Municipalité l'usage d'une ligne télégraphique qu'il établirait et entretiendrait à ses propres frais.

Des arrangements antérieurs avec la Compagnie du Great Northern Telegraph, et la nécessité de ne pas perdre tout droit de contrôle de l'entretien des lignes télégraphiques empêchent le Conseil de pouvoir accepter l'offre de M. Bishop.

Examen d'une demande en décharge d'impôt locatif Chinois. Le Conseil ne peut voir aucune raison pour faire droit à la réclamation du pétitionnaire.

Le Comité des Travaux est chargé de prendre connaissance d'une pétition de divers habitants du quartier de la Concession, réclamant une modification à l'état des rues de ce quartier et un supplément d'éclairage.

Communication d'une lettre de M.M. Butterfield et Swire, informant le Conseil qu'ils se proposent d'ériger un hangar en fer sur le wharf qu'ils ont construit en avant du quai du Wampoo.

Le Conseil, sur le rapport du chef de la Garde, décide de ne pas effectuer le transfert de licence pour débit de boissons qu'il avait autorisé conditionnellement à la dernière séance.

Examen des rapports des chefs de service.

Tirage au sort des Conseillers sortants : M. Maignan, Membre Français et M. Ewald, Membre Etranger, sont désignés par le sort.

La séance est levée.

THE CHINESE INSURANCE COMPANY.

The fourth ordinary meeting of shareholders in the above Company was held at Hongkong, on the 25th. Present : Messrs. André, (chairman), Belilios, Geary, Kerr, Burrows, McIver, Seaman, Baker, Wheeler, Nicaise, Hall, Grant, Jameson, Capt. Cairns, Fung Tang and Pow Achow.

The Chairman, having read the notice calling the meeting, said the report and balance sheet had been in the hands of the shareholders for some days, and if they had no objection it would be taken as read. The last year had been a very disastrous one for Marine Insurance offices, and this Company had suffered along with the rest. The latter months in the year had been especially disastrous, with the losses of the *Japan* and the *Mongol*, and if it had not been for these the directors would have had a much better report to present. Still he thought the shareholders would be satisfied with the result of the year's working, considering the many catastrophes that had happened, besides the typhoon. On the basis of the previous year's working, there was an actual increase of about $25,000. The prospects of the Company for the ensuing year were very favourable, and the business was constantly increasing. Up to now, he was glad to say, they had experienced no material losses. Before he proposed the adoption of the report, he should be glad to answer any questions.—No questions were asked, so he then proposed that the report and balance sheet be adopted.

Report.

The Directors have now to submit to the Shareholders their Report upon the Company's business for the year ending 31st Dec., 1874.

As will be seen from the accompanying statement of Working Account, the net premia taken have amounted to $237,541.18, against $259,529.63 in 1873, showing an apparent falling off in the business of the Company of some $22,000. It is to be remembered, however, that the premia upon all local risks have been subject during the year to a gross return to the assured, of 33⅓ per cent., against 10 per cent. during the previous year; and, when allowance is made for the difference, an actual increase in the Company's business appears.

The losses sustained have been severe, and render inadvisable at present any appropriation of the balance standing at credit of Working Account, which is carried forward pending adjustment of outstanding claims. The amount due upon these will, however, in all probability, be materially reduced by sums recovered in salvage which cannot yet be accurately ascertained, and it is hoped that on settlement of all outstandings a small profit upon the year's working will be the result.

The current year has opened auspiciously. An average business has been done, whilst no material losses have as yet been reported.

In accordance with the Articles of Association, two members of the Board, Mr. E. R. Belilios and Mr. Adolf André, retire in rotation, but being eligible, offer themselves for re-election.

Captains Cairns seconded, and it was carried unanimously.

Mr. Geary proposed the re-election of Messrs. André and Belilios as directors.

Mr. McIver seconded, and it was agreed to.

Mr. Burrows proposed the re-election of the auditors, Mr. McIver and Mr. Nicaise.

Mr. Belilios seconded, and it was carried.

Mr. Nicaise having moved a vote of thanks to the directors and General Managers for the efficient way in which they had looked after the interests of the Company, the meeting terminated.—*Daily Press.*

HONGKONG CHAMBER OF COMMERCE.

The ordinary yearly meeting of the members of the Hongkong Chamber of Commerce was held at the City Hall, on the 22nd ultimo. Present :—Hon. P. Ryrie (Chairman), Messrs. J. Greig (Vice-chairman), Nelson, André, Belilios, J. S. Lapraik, Karberg, Pyke, G. Sharp, Kahn, Dalrymple, F. D. Sassoon, and Vaucher.

The minutes of the previous meeting having been adopted,

The Chairman said the next thing would be the passing of the report. Before moving that it be adopted by the meeting, he had very little to say. The great question of the blockade of this port was still under the consideration of the Government at home. He had had no official communication about the Chamber's memorial on the subject, but he had heard from more than one source privately that the matter was engaging the very serious attention of the home government, and they might expect to hear something of it shortly. That part of the report referring to the protection of wrecked vessels on the coast of China, was one that had been taken up very strongly by the Foochow Chamber, and he thought they would all agree that it was a subject which it was the duty of this Chamber to take notice of. It was almost invariably the case when a wreck took place, that plunder followed. There had been cases where the mandarins had protected the property, and shown solicitation for the lives of the shipwrecked people, in forwarding them to some of the ports ; but as a rule no officials of the Chinese Government were near, and consequently unfortunate vessels which might be wrecked were plundered of everything. With respect to the re-survey of the Coast, members would see that a reply had been received from the United States Naval department to the memorial upon the subject. As far as the interests of the British Government were concerned, he believed it was their intention, as communicated by Admiral Shadwell, to undertake the matter as soon as they were in a position to do so. The present Admiral, Vice-Admiral Ryder, he (the Chairman) had reason to know was just as keenly interested in the matter of the survey of the Coast of China as was Sir Charles Shadwell, and he (the Chair-

man) had not the slightest doubt that when the time arrived, he would afford every assistance in his power to carry it out. There was just one question in the report which he thought might create a little discussion, and that was the suggestion that had been made in connection with the opening of Tonquin. Some members might think that the Chamber was not in a position to send down a delegate. He thought, however, that Tonquin was so very close to Hongkong, that if a steamer or gunboat were going down, the expense of sending a delegate from the Chamber would be very inconsiderable. He thought it important that they should know something about that country, and there would be very little expense about it. He did not think there was anything else in the report to remark upon. He proposed that it and the statement of accounts be passed.

Mr. Belilios seconded.

Mr. Pyke said he supposed the clause about sending down a representative to Tonquin was not binding if the report was passed.

The Chairman said the matter had merely been put in to invite discussion. They only submitted it for that purpose; and if after the report was passed it was the opinion of the meeting that nothing should be done, nothing would be done.

The report was then put to the meeting and passed.

The Chairman then asked if any member had anything to say about the sugestion of the Committee with reference to the delegate.

Mr. Pyke said no doubt it would be very advisable to obtain information with regard to Tonquin, but he had a lively recollection of the Chamber, partly at his own suggestion, sending Mr. Moss to explore a district in that neighbourhood. The result of that expedition was certainly not so successful as members anticipated. It would be a very doubtful proceeding to send a man to Tonquin, partly from the difficulty of getting a suitable one. There would be no use in sending one like Mr. Moss. He was no doubt very energetic, and clever to a degree on certain points, but the information that he elicited at the cost of some $2,500 was certainly not remunerative to the Chamber. He thought before the committee decided on sending anyone to Tonquin, the greatest care should be taken in his selection. He asked if they had anyone in view.

The Chairman said a young gentleman here had offered himself. He did not know much about his qualifications.

Mr. Pyke said there was no doubt that as far as Mr. Moss's expedition was concerned it was a miserable failure. The Chamber, as he had already said, spent $2,500 on it, and for all the good that it resulted in, the money might as well have been thrown into the sea. Therefore, he thought they ought to pause before they spent a similar sum. The Chinese would no doubt soon find out the most suitable description of goods for Tonquin; and, as far as he was personally concerned, he was of opinion that it would be better to leave the trade to develope itself instead of sending a delegate.

The Chairman said the idea of the committee was not to equip a man as Mr. Moss was equipped. But if a gunboat was going down they might probably offer to take a man. It had occurred in the case of the ports in the Upper Yangtsze, and might occur again. In that case the expenses would be reduced to a very small sum.

Mr. Pyke said the Chinese had been trading with Tonquin for a long time. His firm had sold goods for it, and he had no doubt the Chairman had also. He did not think there was anything particular to elicit. There was a large demand for manufactured goods; but the result hitherto of foreigners opening up new places had been to add to their own expenses and to make way for the natives to make all the profits.

The Chairman said the committee had only intended to spend a few hundred dollars.

Mr. Pyke said just so; but he thought it would be as well to leave it to the resources of those who were connected with the trade. A number of native firms in Macao had been trading with Tonquin for years past. At present the goods were sold on the spot here without incurring any expenses. If they sold them at Tonquin they would get no more for them than they did now.

The Chairman said if they sent a delegate they might get some valuable information without entertaining the idea of sending the goods down there.

Mr. Pyke said that if the Chamber sent a delegate it would be more or less in an official form, and he thought a stranger going to Tonquin might be rather liable to mislead.

The Chairman said they were only proposing to do what had been done formerly. Two or three gentlemen from the Shanghai Chamber went up the Yangtsze, and there was no doubt that the trade there had increased.

Mr. Pyke said no doubt it had, but had it been increased more than it would have been if it had been confined to Shanghai?

The Chairman said he thought they had better take the sense of the meeting on the point, and asked if any of the members wished to say anything on the subject. The committee had only mentioned that probably, on the opening of the port, a similar offer might be made to what he knew was made on a former occasion. If so, the committee merely wished to know if they would be authorised to send a delegate down. Some expenses would necessarily be entailed, but it would be nothing like the amount they spent on the Moss expedition.

Mr. Belilios said when Mr. Moss was appointed, there was a discussion as to his capability. He thought they might adjourn the matter now till a man was found, and then they could meet and discuss his capabilities also. The Chamber could then vote any sum they might think necessary.

The Chairman said it required ten days' notice to call a special meeting, and in the meantime the opportunity might be lost.

Mr. Andre was of opinion that it should be left to the committee to settle.

Some conversation ensued, and ultimately it was agreed to leave the matter to the Committee, it being understood that the expense was not to exceed $1,000.

A Committee was then ballotted for, and resulted in the election of the following:—Messrs. Ryrie (Chairman), Greig (Vice-Chairman), Nelson, André, Dalrymple, Kahn, Karberg, Belilios, and Keswick.

The Chairman said he had now a resolution to propose. The members had all no doubt read the able letter attached to the report which had just been laid before the Chamber. He thought that that letter very clearly showed the interest which the writer of it took in the welfare of the Colony, and he need hardly say here the way in which he laboured for its benefit, and won the admiration of a very large majority of the community here. There was no doubt that when he was Governor of Hongkong, some of them perhaps thought differently to him on certain points; but at the same time, in any matter affecting the Colony generally, and with respect to any injury coming from anyone outside, they had in Sir Richard Graves MacDonnell the best champion the Colony had ever seen. (Applause.) He (the Chairman) had read several despatches, for the protection of the Colony, to those who were inimical to it, and in writing them and defending the interests of Hongkong, Sir Richard MacDonnell incurred the blame of the Imperial Government. He (the Chairman) thought such a man as that deserved the recognition of the Chamber. When here, he always had great respect to any opinions expressed by its members. Many important matters he referred to the Chamber, and was guided in a great measure by the results of its deliberations. Recently, the Chamber forwarded him a copy of the memorial, and they had to-day his reply to it. He (the Chairman) also knew that Sir Richard's exertions for the welfare of the Colony had not yet ceased, for he was still advocating the interests of the Chamber in the matter of the blockade with the Government at home. With these things in view, the least thing the Chamber could do would be to pass a vote of thanks to him. The Chairman then moved,

That the thanks of this Chamber be voted to Sir Richard Graves MacDonnell, for the interest he continues to take in the commercial prosperity of this Colony, as indicated by his letter to the Chamber, dated 4th November last.

Mr. Kahn seconded the resolution, which was put and carried unanimously.

Mr. Sharp said it might be interesting to some of the members to know that the pamphlet which they and others had printed had been very widely circulated. He had heard by the last mail that no less than 744 copies had been placed in the hands of all the Chambers of Commerce, and all the members of Parliament. A number of copies had also been sent to the leading journals, and although he had heard at present nothing of it, he hoped to do so in a mail or two. The map had been very well executed, and the gunboats marked very prominently, and anyone who looked at it could at once see that there was no possibility of getting to or from Hongkong without the chance of being overhauled. If one in every ten of the total number printed was read, he thought the money that had been spent upon them would not have been thrown away.

The Chairman said he had intended to refer to that pamphlet, and state that very great credit was due to Mr. Sharp for compiling it; not only was that the opinion of people in this Colony, but it had been written out to him from home. He thought both that Chamber and the community of Hongkong were very much indebted to Mr. Sharp for the trouble he had taken in the matter (applause.)

Mr. Pyke said before the meeting separated, he wished to call the attention of the Chamber to certain clauses in the Stamp Act, one of the clauses of which pressed heavily on those who had transactions with Swatow or Amoy, whose merchants banked their money here. Bills drawn in this Colony bore a very small stamp, and it seemed invidious to merchants at Swatow and Amoy that their cheques should not be placed on the same footing. There was a way of getting over the difficulty, by the correspondents there advising that they had written to place a certain amount at the credit of those here. But this was not a desirable mode of doing business. He thought the Chamber ought to call the attention of the Government to this, and also to a clause which had occupied the attention of bankers, and that was with regard to the duty charged on notes for circulation. With reference to the cheques of Swatow or Amoy, he mentioned that if a bill for $3,000 were sent from those ports here, the duty would be $1.50, but if the same cheque were drawn here the duty would be only 2 cents. The Government, he supposed, would not give up this source of revenue without seeking for an equivalent, but he thought the Chamber ought to memorialise it on the subject. He moved—

That the Chamber do memorialise the Government for the revision of the Stamp Act of this Colony.

Mr. Nelson seconded the resolution. The Stamp Act as it stood required revision, and if it were revised, the Colony would be benefitted by it.

The Chairman said the Act had been revised once, and before that revision took place, a meeting of the Chamber was held to consider what alterations were necessary. He regretted to say that not many practical suggestions came out of it. He hoped when the revision came on again, that they should make more suggestions than they did last time. He asked whether, in the excessive duty complained of, Mr. Pyke intended to say that that this Colony suffered.

Mr. Pyke said those here suffered.

The Chairman said, in reference to the duty on bank notes, he himself had brought it forward in the Council on two occasions.

The resolution was then put, and carried unanimously.

The Chairman said there was one more subject which he had to lay before them. He did not know whether all the members of the Chamber were aware, but some of them might know, that Dr. Eitel was now engaged in the revision with a view to the republication of Williams' Tonic Dictionary. There could be no doubt that this dictionary was a work of great value, and that if it was allowed to go out of print it would be a great loss to those who were acquiring the Canton dialect of the Chinese language. Every day there were some young men growing up and learning to speak this dialect, and he thought it a matter of the greatest importance that the book should be republished and revised. In fact, gentlemen who knew the Canton dialect and spoke it very well, had told him that without their tonic dictionary they could not get on at all. It was absolutely necessary for every student in this district, and under these circumstances he thought it would not be very creditable to the Colony if Dr. Eitel was to engage in this very laborious work without being pretty well assured that he would not be a loser himself by it. He had already received a grant from the local Government, but that grant would not be sufficient to cover the expenses. He had, therefore, appealed to the Chamber to assist him. The funds of the Chamber were certainly at present not so very prosperous as they could desire; in fact the receipts had just barely covered their expenditure. He regretted on Dr. Eitel's account that the Chamber could not afford him a very large sum, but it could spare a small amount, and no doubt he would be very thankful for it. He was not prepared to say the amount, but he thought $100 or $200 would be as much as they could spare. He moved that the matter be left in the hands of the Committee.

Mr. Sharp seconded. He thought the more that was known of Chinese the better it would be for them, the better it would be for all here, and the better it would be for China, and for the world. If it was thought by Dr. Eitel that the dictionary was important in facilitating the acquisition of that which was very difficult, as they all knew—in fact which had been too much for most of them there—he thought they ought to give him all the help they could.

The motion was put and carried.

The Chairman said that concluded the business.

Mr. Belilios: I propose a vote of thanks to those gentlemen who for the past year have managed the affairs of the Bank,—I mean the Chamber (loud laughter).

The meeting then terminated.—*Daily Press.*

Amusement.

YINGTZE RACES.

20th March, 1875.

Our Race Meeting came off yesterday, after having been postponed twice on account of the rain, which had spoilt the Course. Fortunately, the advice of our weather-wise residents, who were earnest in their prognostications, was taken, and the Meeting was not delayed further, for the storm which was predicted burst upon us this morning with such force as only can be experienced in these northern latitudes. The wind (N.W.) is so strong that it is difficult to walk against it, even if it were not painful to face the snow, or more properly speaking, the icicles which almost blind one. We had had comparatively mild weather of late, and some had come to the conclusion that the winter was really gone and that stoves could be dispensed with, but if such a conclusion has been acted upon, it will be necessary to get under the blankets in order to keep warm. Two sailing vessels and a steamer were observed near the Bar, and it is to be trusted they are securely anchored.

But *revenons à nos moutons*, as my intention is to chronicle the result of the Races, just now. It is right, however, to tell you that we had a Grand Stand, which was graced by nearly all the beauty and fashion of Yingtze. The first Race was

The Manchurian Cup.—Value, immaterial in a pecuniary point of view. Catch weights. ¾ mile. And was contested by:—

Mr. Warwick's white pony *Sultan* 1
,, Druggist's grey pony *Rajah*..... 2
,, Carr's grey pony *Shamrock* 3
,, Yazzeah's grey pony *Viceroy* 4

Sultan won easily, hands down, *Rajah* and *Shamrock* being fairly up, and *Viceroy* nowhere.

The Ladies' Purse. Catch-weights. ½ mile.

Dr. Watson's iron grey pony *Iron Duke*..... 1
Mr. Druggist's dun pony *Pharisee* 2
,, Yazzeah's black pony *Bullet*..... 3
,, Bush's grey pony *Dobbin* 4
,, Wells' grey pony *Bob* 5

The favorite *Bob* refused to start at his rider's request, and so lost any chance he might otherwise have had, the struggle being between *Iron Duke* and *Pharisee*, the first named of these, however, winning, with some lengths to spare, although "*Pharisee*" (who, as one of our local wits gravely remarked, looked "sad you see"? Sadducee!) was very gamely ridden, and had no doubt received the best medicines from his master's shop. Chemicals, however, will not remove a chronic lameness, and poor *Pharisee* has doubtless run his first and last race. The fortunate rider of *Iron Duke* (Captain Man) received the Purse from Mrs. Adkins, who congratulated him in a neat little speech to which a very suitable reply was made.

We then adjourned to the Tent set apart for tiffin, which was of the very choicest and best kind—after which there was a 100 yards Foot-race—between Natives. Prize, $5. Then came the third Race.

The Newchwang Derby.—Catch-weights. 1 mile.

Dr. Watson's iron grey pony *Iron Duke*..... 1
Mr. Warwick's white pony *Sultan* 2
,, Yazzeah's black pony *Bullet*..... 3
,, Wells's grey pony *Bob* 4
,, Bush's grey pony *Dobbin* 5

This race was well contested. It looked very much like a dead heat between *Sultan* and *Iron Duke*, but the Judge's fiat was in favor of the latter, who thus carried off the two best prizes, and whose performances entirely upset the books of the knowing ones. Then came the last Race, for

The Consolation Stakes.—½ mile, catch-weights, which, after one false start, during which *Rajah*, *Bullet* and *Viceroy* raced the whole distance, leaving *Shamrock* waiting for them to come back, was decided, after another run between the four, as follows—viz.:—

Rajah..... 1
Bullet..... 2
Viceroy 3
Shamrock 4

There was considerable argument as to whether the Starter was right or wrong; but it all ended amicably in a "Second Spin," and gave some consolation to a third stable, which is satisfactory in so far that it is more likely to induce a continuance of the Races, than if the winnings had all been confined to the other two owners.

The natives attended in full force, and, from what one could overhear, were as eager to make bets as the foreigners.

Newchwang, 21st March.

Miscellaneous.

FATAL COLLISION AT SEA BETWEEN THE "OCEAN" AND "FUSING."

We have to record another of those terrible disasters at sea, a collision between two steamers, involving much loss of life, this time on our own coast and between vessels well-known in this port. The catastrophe, the particulars of which we are about to narrate, happened on Sunday morning last, at about half-past ten o'clock, when the British steamer *Ocean*, of 970 tons burden, and commanded by Captain Brown, collided with the C. M. S. S. *Fusing*, commanded by Captain Andrews, the damage being so great that the last named steamer sunk in a very few minutes after the occurrence. The weather was calm at the time, but a dense fog prevailed, and the sea was rising in a heavy though unbroken swell. The *Fusing* was, we are informed, going almost dead slow, when suddenly the sound of a steam-whistle was heard, and almost as suddenly was seen the form of a large vessel bearing dead on to her. The order was given to back astern at full speed, but before the effect of the engines could be well felt, the stranger vessel struck the *Fusing* just about the fore-rigging, and such was the force of the blow that the whole of her fore compartment was cut completely asunder. The scene that then ensued was dreadful. The *Fusing* had about 125 people, including passengers, on board, and almost before a boat could be launched, she went down head foremost. Many of the people were in the forecastle, some asleep, and as she dived into the sea, some of the poor wretches were seen running along her decks to avoid the waters that were rushing after them. Fortunately, at least in this instance, she had some deck cargo, consisting of spars of wood, and these floating as she sank were the means of salvation to a goodly number of the people on board. Captain Andrews managed to get one boat afloat, and into this were soon crammed about 26 of the passengers and crew; and to the honour of those on board the *Ocean* be it said, that vessel stopped her engines, stood by, and lowering her boats, saved about thirty more of the unfortunates, who by this time were either floating in the water or on the spars washed from the deck of the *Fusing*. Still there were many whom it was impossible to save. Some were either killed in the forecastle by being crushed by the bows of the *Ocean*, or were so dreadfully injured as to be incapable of doing anything to save themselves, and in this manner some 50 or more found a watery grave. The *Ocean's* boats were lowered, and proved the means of saving many from the floating spars, and for some time pulled round

the spot where the ill-fated steamer disappeared, in the vain hope of saving more. The *Ocean* herself received such severe injury that, had the weather been in any degree rough, it is more than probable she would not have lived to reach port. As it was, a large hole was knocked in her bows, and her fore compartment was filled with water, but luckily the bulkhead stood firm, and so another catastrophe was prevented. By stowing this compartment with bags of rice, the water was in a measure got rid of, and seeing there was no more hope of saving life, the *Ocean's* head was turned towards the Yangtsze. It should have been stated that the sad affair happened about 120 miles North of Shaweishan Island. Favoured with continued calm weather, the *Ocean* reached Woosung yesterday, when Captain Andrews and the rescued portion of the crew and passengers of the *Fusing* came up to Shanghai in another steamer, and the catastrophe became known. Among the passengers of the *Fusing* were several of the native officials known as rice-Mandarins, only one of whom, we believe, was saved by clinging to a spar. All the Europeans on board, except the third officer, were saved either by the boats or by means of the spars, being afterwards taken off either by Capt. Andrews' boat or the boats of the *Ocean*. It is said that one reason why the boats of the *Fusing* could not be got afloat was that the Chinese on her decks crowded into them and so prevented the falls working. Some of the unfortunates taken on board the *Ocean* were either so injured by being crushed, or exhausted by their immersion in the water, that they died after they were received on board the *Ocean*. Luckily the *Ocean* reached Woosung before the gale of Monday night came on, or it is believed by those on board that she must have sunk ; and therefore the tale of disaster could not have been told. The foregoing particulars were obtained at a late hour last night, but we have every reason to believe they are substantially correct.

THE "CITY OF PEKING."

Familiarised as people have been of late years with large steamers, in the vessels belonging to the Pacific, P. & O., and Messageries Maritimes lines, the appearance of the *City of Peking* in Eastern waters has excited special interest, not only because of her imposing dimensions, but because her construction marks a new epoch in ship-building in the States. A correspondent at Hongkong sends a few notes of a visit he paid the steamer there, which bear out, from an English point of view, the glowing descriptions already given by what might have been deemed the too partial Press of America.

"Successive reports of mail guns, within less than an hour, announced to the good folks of Hongkong, on Thursday morning, that the Old World and the New had met in their harbour—the *Peiho* with the French mail representing the former, and the *City of Peking* the other section of the globe. The *Peiho* is a fine large steamer, but it was not she that attracted the gaze of those who turned their eyes seaward, to watch the cautious coming in of the mails ; the much-heralded pioneer of the P. M. S. screw propellers loomed on the restricted horizon, and eclipsed every thing in the harbour. Not that her length of 427 feet over all looks leviathan, duly proportioned as it is with the modest beam of 48 feet—(there are no canals to be wriggled through between California and China)—the effect is greatly heightened by the four tall masts which form her rig, and which carry heavy yards. Lovers of the graceful in marine architecture consider their appearance almost a defect in the vessel, but people who have to make the long ocean voyage will be well pleased to find that the *City* carries her spars for use and not for show. Under favorable conditions, the ponderous steamer can ease her engines and economise fuel by displaying her canvas ; and under unfavourable conditions, such as a breakdown in her machinery, she can hold her own, or make a few knots, under sail. There is always a danger of a screw blade dropping away in a vessel putting such a strain on her propulsive agent, the more so as it is difficult to get blades, of the size necessary, welded so thoroughly as smaller ones. The danger, however, is but partial—in crossing from San Francisco on this her first trip the steamer lost but one, and she carries spare blades. The engines of the *City of Peking* consist of two high and two low pressure, the former cylinders being 51 inches in diameter and the latter 88 inches, with 4½ feet stroke. Steam is supplied from ten cylindrical return tubular boilers, each 10½ feet in length, 13 feet in diameter, and working up to 65 lbs. This steam is produced by 32 furnaces,—including that for two donkey engines ; and the consumption of coal is about 50 tons per diem. On this the vessel can make 300 miles—stated to have been her average run on the voyage to China, at by no means the best season of the year, and without full power being employed. The effective horse-power of her engines is 4,600. There are nearly 200 people on board in the various departments, of whom 6 are officers, 9 cadets, 6 engineers, with 60 men under them, 30 sailors, the others being connected with the mails, passengers, freight, and general business of the ship. Ten life-boats and four life-rafts are carried. It is unnecessary to say more about the deck arrangements, the steering gear, &c., than that they are characterised by all the ingenuity and system which distinguish first-class steamers in these times. The draught of the steamer is marked up to 25 feet, and she ordinarily draws 23, while her screw is just immersed at 21. As she is 38 feet in depth, she has therefore plenty of freeboard. Her capacity is set down at 5,500 tons, of which 1,500 is required for coal, and 4,000 is available for freight. She can also, however, take 1,500 steerage and 150 saloon passengers. What most strikes the visitor below is the immensity of the cargo space. At the moment, the most wonderful activity prevails, there being barely a week in which to discharge and re-load. Coolies are "tumbling up" from numerous hatchways, with the little pillow-slip sacks of Californian flour, recalling very much the activity of an egg-bearing colony of ants. The saloon is of course the place where one's interest in the accommodation of the vessel culminates. In its arrangement, there is a notable improvement on the old practice, a section of about one-third from the companion way (amidship end) being wholly devoted to the dining hall, which thus extends from ports to ports,—the full breadth of this fine broad steamer. The tables are suited each for eight or ten people, and instead of the long awkward forms, which require people to take their places at table in regular rotation to avoid imaginary feats in gymnastics or the disturbance of their neighbours, there are very convenient and comfortable dining chairs, fixed but working easily on a pivot. The cabins occupy the rest of the space under the quarter—the inner end is really the saloon proper—and are arranged in a double row on either side with a spacious corridor between. They are very roomy, well lighted, well ventilated, and splendidly fitted up. The style and finish of the passenger accommodation is altogether gorgeous. The heating apparatus should be noticed ; like everything else, it is designed not only to be practical, but æsthetic. Over the companion way there is a superb social hall, with a grand piano, library and other provision for recreation and amusement. There is also an excellent smoking room forward of the engines, and a barber's shop, got up as Americans know how to do it. With such steamers and good management, the P. M. S. Co. ought to succeed against any rival on the broad Pacific."

DESULTORY DOLES FROM THE SOUTH.

The weather is hot enough to produce prickly heat, and the transition from that mild disease to the more virulent one of Cacoethes Scribendi—is as simple as falling off a log.

His Excellency the Governor has taken his departure, and the reins have been taken up by another elderly gentleman, who, in mercantile phraseology, so distasteful to the official mind—will for a time sign the firm.

The labours of Government have for some time been directed towards the concoction of a marriage ordinance, which is now nearly completed. The fees have been arranged on the basis of bezique scoring—two dollars for a common, and seven for a royal marriage. The Hon. P. Ryrie considers these excessive, but some people are of opinion that matrimony is dear at any price. The Chief Justice asked if parties should be allowed to marry "*in forma pauperis.*" Jokes always fall gracefully from the lips of a Judge ; but at the moment when the limits of the poor-house are being enlarged, with the view of accommodating a daily increasing crowd, composed of the victims of impecuniosity—many of the inhabitants of Hongkong would rather have lost the Latin, and had their feelings spared. My Lord Bishop is on strike ; the result, it is believed, of some difference of opinion between His Lordship and the inferior clergy. The merits or demerits of the dispute are unknown to the uninitiated, but it is supposed that, while the higher authority considers spiritual food should consist of fish, soup, and a joint, the smaller fry contend for the addition of several entrées and much table decoration.

Macao has negotiated a loan, trifling in amount, but not altogether insignificant when contrasted with the security, two white elephants, and a worn-out Portuguese law suit.

Further Chinese loans are spoken of, offering every inducement to investors—high rate of interest, and, for security, a lien over the Woosung Bar, the only permanent thing left in China. Some people might prefer a lean over the Club Bar

The Mandarins in Canton continue intermittingly to decapitate real, or supposed, participators in the *Spark* tragedy. These petty sacrifices to justice please the officials, and don't materially diminish the population of China. Poor Mr. Mundy's plaintive appeal to a paternal government proved futile, as he himself probably expected. His case is unquestionably a very hard one, but had his career as a tea-taster in China—for which he informs the public he was destined from his birth—remained uninterrupted, he would, probably, have made the discovery that the path of a chazee is not altogether strewn with flowery pekoe—*Sic transit gloria* Mundy.

There is some likelihood of Hongkong being purchased by Bismarck, as a coaling station. The Chinese might be induced to re-claim it, were it not that, in the hands of its present possessors, it forms an admirable harbour of refuge and basis of operations for their Revenue Squeezers, to which our liberal Government accord all the privileges and immunities attaching to full-blown men-of-war.

In your Saint Patrick's dinner, a slight inaccuracy must have crept into your contemporary's report of same, where he says—"In chief, a Shillelagh *Couchant.*" *Rampant*, galore ! or bedad that self-same "sprig" has become unworthy of the hand that gently severed it from the parent trunk.—Pessimist.

Law Reports.

CIVIL SUMMARY COURT.

Shanghai, April 1st.

Before R. A. Mowat, Esq.

W. Lent *v.* F. Gilman.

Claim $41.75.

This was a claim for the value of certain property (window and door hooks, gas globes, &c.,) missing from a house on the Bubbling Well Road, leased by plaintiff to defendant.

Defendant denied his liability.

Wm. Lent, sworn, stated—On the 10th of March last, I leased my house on the Bubbling Well Road, to defendant, for 12 months. I produce the lease. Defendant gave notice on the 7th Nov. that he proposed to quit. Under the terms of the lease, he was responsible for the house and fittings until the expiry of the lease. From information I received, I visited the house in the middle of December, and found that the place was quite deserted, the gate open, the hall door and all the bedrooms, with the exception of two, unlocked. I went all over the house and found no one in charge. I visited defendant, and told him the state of affairs, and he promised to send some one to take charge at once. On the 31st of Dec., I again received information that the doors were all open, and no one in charge, and also that several globes had been taken off the gas-burners. I then wrote to defendant (letter read) concerning it, to which he replied, and confirmed the fact that four globes were missing from the drawing-room. He also mentioned that he wished to give up the house at once, in consideration of his paying the rent up to the 10th March 1875. I did not accede to the proposition, but informed him that I held him responsible until the lease expired. Matters so went on until the end of February, when I told defendant that I was willing to take over the house, if he was agreeable. He agreed, and I therefore was twelve days in the house before the lease expired. It did not occur to me then to ascertain if anything was missing. I afterwards found that all the window and door hooks in the downstairs rooms, and one bedroom were gone, and eleven globes from the gas burners. I had the articles replaced, and sent the bills to defendant, who returned them to me. I purchased the globes from the Gas Company, and the hooks, &c., from Messrs. Lane, Crawford & Co. ($31.75). I also claim $3.00 for a window in the stable, and $7.00 for five hard-wood stable bars. I did not make any claim until the 10th of March last.

Defendant objected to the claim, on the ground that Plaintiff had asked to come into the house before the lease had expired, to which he consented; therefore he considered that, as no claim was made at that time, plaintiff had waived it. He admitted the matter of the globes, but if it had been pointed out to him by plaintiff then, so that he could have seen for himself, and had the opportunity of replacing the articles, there could have been no doubt as to his liability. But as plaintiff had not done so, to say the least, it was open to doubt.

His Honor expressed his opinion that there could be no resonable doubt that the articles missed had been taken from the house when it was unprotected; therefore he would give judgment for plaintiff, for the amount claimed, but without costs, inasmuch as had plaintiff had given notice to defendant of the missing articles when he resumed possession of the house, the defendant would never have disputed his liability, and thus there would have been no action.

April 2nd.

George Murray *v.* John Snowden.

Plaintiff is Captain of the steamtug *Rocket*, and he sued the defendant, a pilot, to recover $99, for services rendered to the steamer *Glenfinlas*, at his request, in August, 1874.

The defendant did not appear, but service of the summons was proved by the Court Usher.

Plaintiff said—I am Captain of the tug *Rocket*. I claim $99, for services rendered to the steamer *Glenfinlas* about the 25th August. The services were towing her off the mud at the Woosung Bar. The *Rocket* was under my charge then. I was engaged by the pilot on board the steamer, with, as I supposed, the sanction of the Captain. The Captain was not on board then. I refused to take hold of her until the very last of the flood tide, in order that the Captain might be on board. He came while the vessel was coming off. I had made fast to her before he came. He got on board while she was coming off. I at first refused to take hold of her, because the terms the pilot offered, which he stated were offered by the Captain's direction, were Tls. 50 if she did not come off, and Tls. 100 if she did. Our usual charge is Tls. 100 per tide or part of a tide. I accepted the pilot's offer at the last, rather than come back without doing anything. An action was brought in this Court on the 14th September last. I failed in that action on the ground that the Captain had distinctly declined the tug's services, and that a telegram had been sent from him saying that the tug was not wanted. Under those circumstances, I now sue the pilot. At that time I expected the Captain to pay the charge, but as it stands now, I look for payment from the pilot. I took some cargo-boats down to the steamer to lighten her. The pilot asked me if I had seen the Captain, as he had an engagement for me to tow her off. I said I had not seen the Captain. He came aboard the tug, and we went to the telegraph office and telegraphed to the Captain, asking whether he would engage me at Tls. 100 a tide. I received an answer from Messrs. Gilman & Co., the agents: "Captain Wilcox has gone down the river; cannot engage a tug-boat," Upon this I told the pilot that if the Captain did not come down at the very last of the flood, I would take his offer. If he did come, I would not accept it. I should, in that case, have gone to the Captain and asked him if he would engage the tug at Tls. 100 a tide, whether the steamer was got off or not. The pilot gave me a memorandum that the Captain had authorised him to engage a tugboat at the terms he had named.

Captain Wilcox, sworn, stated—I was the master of the *Glenfinlas* on the occasion named. She got ashore abreast of the bar, on a Thursday. I came up to Shanghai on the Monday morning. I left the pilot, Snowden, and the chief officer in charge. I gave no instructions to the pilot to engage a tugboat. I said nothing to him about it that morning. I told him I should be on board before high water that night, but if I was not there, he was to back the engines and try to get her off. The ship was then lightened 400 or 500 tons, and I knew the tide would be higher on the Monday night. I had gone up to Shanghai to ask about the future employment of the ship. I got down to the ship a few minutes past nine, and found the ship fast to the tug. I asked who engaged her, and the chief officer said the pilot had done it on his own responsibility. I asked the pilot why he had engaged the tug, and he said he did not think the ship would come off without. The tug remained fast to her about a quarter of an hour after I was on board, keeping the ship in her place. There were two kedge anchors out astern, and there was difficulty in getting them up, as the ship might have gone ashore again. I could not order the tug to cast off, because the ship was afloat, and was, in consequence, under the pilot's charge. It is not true that I told the pilot to engage a tug on the terms stated. The anchors, when I got on board, were not holding—they were just touching the ground, up and down, and we had nothing to hold on to except the tug. Her engines were moving ahead to keep the ship in position, and to prevent her drifting up the river. The pilot said to me on the Sunday—why did I not make a bargain with the Captain of the tug to pay him Tls. 100 if she got off, and nothing if she did not. The Captain of the tug had asked me several times to engage him, but I told him I did not want him. I received the telegram from the Captain of the tug as I was starting to return to Woosung, and told the agents to reply that a tug was not wanted. The ship was so much lightened, that I knew she would come off that night on the higher tide.

His Honour said the evidence given confirmed him in the view he took of the case heard in September last, when the plaintiff was unfortunately not present. He did not see how the Captain could be made responsible, as he told the plaintiff his services were not required. The Captain went up to town, saw the telegram sent by the plaintiff, and instructed the agents to telegraph back that the tug was not wanted, and he had repeated that statement now in Court. The only reason why plaintiff had taken the pilot's offer appeared to be that he felt he had better take the chance of the pilot's authority, rather than lose a tide.

Plaintiff produced the written guarantee he had received from the pilot, saying he thought it was quite sufficient to show the engagement of the tug. The Captain had also acknowledged his indebtedness to him (plaintiff) personally on two or three occasions, and said the money would be all right, and that he would leave it with the agents, or something to that effect.

Captain Wilcox again repeated that he never authorised the pilot to engage a tug. The ship's money was not his own, and he could not pay such a charge without sanction. What he told the plaintiff was that the agents of the ship, Messrs. Gilman & Co., had written on the subject, to Messrs. Macgregor, Gow and Co., the owners, in London, and if they sanctioned the payment, the agents would pay it. He (the Captain) acknowledged that services were rendered by the tug to the steamer, but he contended that they were unauthorised, and that the plaintiff forced his services on the ship.

His Honour asked if the owners had answered Messrs. Gilman & Co.'s letter?

Captain Wilcox replied that he did not know. The ship was consigned this voyage to Messrs. Jardine, Matheson & Co., and he had no business transactions with Messrs. Gilman & Co. He had, however, enquired if an answer had been received, but could not ascertain.

His Honour said the case as against the Captain must fail, the pilot having engaged the tug against the Captain's instructions.

Plaintiff—But there is the pilot's guarantee. Suppose I had come upon the Captain for salvage—for Tls. 3,000 or Tls. 4,000?

His Honour—Could the steamer have been got off in the first place without the assistance of a tug? and could she have been prevented going ashore again without such assistance?

Captain Wilcox was not prepared to say; but he knew she would come off, under her own steam, with the higher tide of the Monday night, and through being lightened. That was the reason he permitted her to remain on the mud so long. The plaintiff several times asked to be engaged, but his services were always declined. The ship's bows only were on the mud—her stern was afloat.

His Honour, addressing the plaintiff, said that, as the defendant was not present, the case must be adjourned for his attendance. He thought, however, it was a case in which the steamer ought to pay, as it was she who had benefited by the tug's services.

Captain Wilcox said it would be hard to make the steamer pay for services that were forced upon her.

His Honour—If the services were not required, what induced the pilot to engage a tugboat? I cannot decide the case now, but must hear what the pilot has to say in the matter. The plaintiff will let the Court know when the pilot can attend.

April 5th.

John Meehan Walker *v.* Alexander Malcolm.

Alleged Detention of Opium.

Mr. H. Brougham Miller appeared for the plaintiff.

Mr. W. V. Drummond, instructed by the Municipal Council, for the defendant, who is a sergeant of police.

Mr. Miller, in introducing the case, said what pretence there was for detaining the plaintiff's opium he did not know, but the defendant simply refused to give it up. There were four balls of opium, valued at Tls. 50, and the facts were that on the evening of the 18th March, two of plaintiff's servants were set upon by some ruffians, and pillaged of the four balls. The drug was taken to the Hongkew Police Station, and the defendant, who was on duty at the time, refused to give it up. The action was therefore brought to compel him to give it up, or, if he had parted with it in a way he had no business to, to make him pay its value.

Mr. Drummond said he was instructed by the Municipal Council to appear for the defendant, who denied that he had detained the opium.

Plaintiff was then called, and deposed—I am a merchant. I believe I am registered as a merchant. I recollect the night of the 18th March. Between six and seven in the evening, I was taking four balls of opium for sale to Hongkew. I had two servants with me, carrying the opium. I walked faster than they did. I missed them, and went home to my house to see if they were there. They were not there, and I waited a little time, when they came, and said the opium had been taken from them and to the Hongkew Police Station. I went there, and asked the man on duty to return to me my property—the opium. He said the opium was not there. Next morning I went to Mr. Stripling, and asked him the name of the officer who detained the opium. He told me it was Sergeant Malcolm. I have not got back the opium. It is my property. I value it at Tls. 50.

By Mr. Drummond—I had two servants in charge of the opium. I believe they were seized at the Hongkew bridge. I believe the defendant is the man I applied to for the return of the opium. I asked him for my property, and he said it was gone. I do not recollect the exact words I used. I stated that the property was four balls of opium. Nothing more passed. Next morning, I asked Mr. Stripling for the name of the officer who had detained my property. He said it was Sergeant Malcolm. He looked in the charge-book for the name.

Mr. Miller thought he need not carry the case any further, and that the evidence given was sufficient.

His Honour—I think not. You must trace the opium to the defendant's possession, and the evidence of the plaintiff's servants will probably be necessary.

One of the coolies was then called, and through Heding, the interpreter, deposed—I am the plaintiff's coolie. I remember the evening of the 18th of March. I and another coolie were ordered to carry four balls of opium to Hongkew. The purchaser went in front, and my master followed behind. My master's chop was on the balls of opium. At the foot of the bridge, on the other side, there were about ten men in wait for us. Those men took us to the Police Station. They were runners, and they tried to snatch away the opium. The purchaser ran away. The opium was taken with us to the Police Station. A policeman was sent with us and the runners to the Mixed Court. They were ordered to leave the opium, and go away. We went back to the plaintiff, and reported the matter. When at the Hongkew Police Station, the "head of the police," took the opium, looked at it, and then sent a foreign policeman with us to the Mixed Court. The runners did not seize the opium at the foot of the bridge. There was a struggle, and a native policeman came up, and took us and two of the runners to the station. The other runners dispersed. The opium was inspected at the Hongkew Police Station, and then handed to the runners, who carried it to the Mixed Court. The opium was fastened round our waists, and of our own accord we unloosed it. The police told the runners to take the opium to the Mixed Court, and a foreign constable was sent with them. Our tails were tied together. The runners' tails were not tied. Our tails were tied at the foot of the bridge, by the native policeman. I had done nothing more than carrying the opium. My master's name was on the paper that was round the balls.

By Mr. Drummond—My master was not in sight when we were seized at the bridge. He left us at the Garden bridge. I am sure my master was not in front of us at the time, I reported the matter to him immediately after we left the Mixed Court, at my master's hong. I do not know the exact number of runners—they were about ten. They seized us, and in the struggle a native policeman came up. None of the opium was taken from us in the struggle. It was round our waists when we got to the Police Station. We were not told to take it out—we took it out of our own accord. I can't be sure it was the defendant I saw at the Police Station. Boysen went with us to the Mixed Court; our tails were untied before we went into the Police Station by the runners. Boysen told the runners to tie our tails again, inside the Station. He made signs with his hands that we were to be tied. We did not see the Magistrate at the Mixed Court. We were placed inside the Court, and one of the officers came. We were not taken before Chên. It was then past seven o'clock.

By Mr. Miller — There was no charge made against us at the Police Station or at the Mixed Court. We were told at the Mixed Court, to leave the opium and go away.

The second coolie was not examined, it being stated that his evidence would be merely a repetition of that given by the last witness.

Mr. Miller wished to know whether the police intended to produce the charge-book?

Mr. Drummond said it could be produced if wanted.

His Honour asked if an entry of the case had been made?

Mr. Stripling said there was no charge made, but an entry had been made in the occurrence book.

His Honour said Mr. Miller should have given notice for the book to be produced.

Mr. Miller said he merely wanted to see what had been entered, and then intimated that his case for the plaintiff was closed.

Mr. Drummond said he would simply put the defendant into the witness box, to state what occurred at the Hongkew Police Station.

Alexander Malcolm then deposed—I am a sergeant of police, and defendant in this case. About 6.20 on the evening of the 18th March, the native constable at the Station gate informed me that two *likin* runners had brought four balls of opium to the Station. I immediately went into the office. I saw the runners and the other two Chinamen there. Four balls of opium were lying on the floor. I did not examine them. I told Boysen to get ready to go to the Mixed Court. They all left at 6.29—in a very few minutes. The runners carried the opium. I examined the runners' cards. They bore the seal of the Municipal Council, a number, and the signature of the Acting Superintendent, Mr. Stripling. When I saw the coolies in the Station, their tails were not tied. They were standing six feet apart at that time. They were tied by the runners when they left the Station; by the runners, without any direction from the Police. I did not see any motion made by Boysen with his hands. I did not interfere with the opium at all. The runners lifted the opium from the floor, and put it into their dress. The plaintiff came to the Police Station about 8.45 the same night. He said some opium of his had been stolen from two men in his employ, somewhere in the Hongkew Settlement. He did not ask me to return it to him. He said his business was worth Tls. 600 per month, that money was no object to him, and that he would give Tls. 10 reward for its recovery.

Mr. Miller objected to this evidence without a written statement to support it. That was why he wished to see what was written in the charge book.

Witness, examined by Mr. Miller, said—I was in sole charge of the station on that night. I knew the men were *li-kin* runners by the card. If I had chosen to have forbidden the opium being taken from the Police Station, it might not have been taken away, but it was not in my power to detain it.

His Honour said that the defendant was first sued for having detained the opium, and it appeared that fault was found with him for not having detained it.

Mr. Miller said his contention was that the opium should have been kept at the Station until it was claimed by the rightful owner. Now, that the defendant had allowed it to be taken away, he was sued for its value.

Examination resumed—My instructions are that when these people come to the Police Station, and show their card of authority, to send the opium on to the Mixed Court. That is what is done in all these cases. If I had seen that this opium bore the plaintiff's chop, I should not have detained it. It was not my province to do so, and I know no more about it.

P. C. Boysen deposed—I was instructed by Sergeant Malcolm to see the coolies and runners to the Mixed Court. The coolies' tails were tied together, but they were not in my custody. The Municipal Police had nothing to do with the matter.

By Mr. Miller—I believe I was sent to see that they were not molested on their way to the Mixed Court. My instructions were to see them to the Mixed Court, and I had no more to do with them.

This closed the case, and

Mr. Drummond said he should ask the Court to dismiss the plaint. It was formerly the practice that opium seized in this manner was taken into the City to the Chinese Court there, but now these cases are taken to the Mixed Court within the Settlement, and brought before the Chinese Magistrate and Foreign Assessors, and the assistance of the Municipal Police is given to the Chinese runners, as Revenue Officers, just as assistance is given to the Officers of any Consular Court here. That was the simple fact of the case. The defendant had nothing more to do with it than that. The opium had never been in his possession, and it was impossible for him to have detained it.

Mr. Miller said he did not know what the case was, if it was not as the plaintiff had stated it. His servants were molested, taken into custody and then to the Police Station, where their master's property was taken from them. Next, their tails were tied together, and with the runners, they were taken by Boysen to the Mixed Court. If that was not being in custody, what was? At the Police Station the defendant did not take the trouble to look into the matter at all, although the opium bore the chop of the owner, the plaintiff, and it had been detained so long now that the owner could not get it back again. If there was any quibble in the case, it was a quibble to say this was not a detention. If, on the way to the Mixed Court, the coolies had tried to run away, Boysen would have stopped them, and yet he said they were not in his custody. What power the Chinese police had in this Settlement, he (Mr. Miller) could not see. They might as well come and seize a man's watch and chain while he was walking in the Settlement, for money said to be owing to the Chinese Government. Then there was an allusion to this class of cases. What class of cases? This was a case in which the plaintiff had been pillaged, and his property taken away from him. Mr. Stripling's telling the sergeant to send the opium to the Mixed Court constituted no authority, nor did it establish the fact that the property was in the possession of the runners; for the defendant had put it out of the owner's power to recover his property at all.

His Honour—It is in the Mixed Court, is it not?

Mr. Miller—The owner does not know where it is.

His Honour—I was informed this morning that the Taotai and Mr. Medhurst would sit to decide as to who was the real owner.

Mr. Miller—That is more singular still. Why should they sit to decide upon the ownership in such a case? We do not say that Malcolm has done wrong, but that he has behaved carelessly and negligently, and so put it out of the plaintiff's way to obtain possession of his property. What he should have done, was to have detained the opium in such a way that the owner might have got it again. That he did not do.

His Honour—It seems he did not detain it at all, but got rid of it as soon as he possibly could.

Mr. Drummond said the plaintiff went to the Mixed Court, on the following day, and made application for the opium, so there was no excuse for saying he did not know where it was. He (Mr. Drummond) called to the recollection of the Court, the case of Mr. Loureiro, to which this was precisely similar.

His Honour commenced by reading his judgment in that case as reported in the *Herald* of September 26th, 1974, and then went on to say that he did not see that he could decide differently in this case. All the evidence showed that the runners and not the Police, had treated this man's servants as though they were criminals, but that did not amount to anything as affecting the case itself. The Police Sergeant said he did not know whose property the opium was, and so sent it to the Mixed Court.

Mr. Miller—But you will remember that this opium bore the owner's mark.

His Honour—Any hong name might be stamped on anything. Then, why did he not carry it openly? Why should it have been concealed, and carried around the coolies' girdles? Why not have carried it in an open and *bonâ fide* manner? I must decide in this case as in the former one. It is the second case of

the kind, and I would recommend that the question should be decided once for all by an appeal to the Chief Judge. If my decision is not right, you can have it put right, and then there will be an end to these actions. If the police are right, there will be no more of these harrassing actions brought against them, and they will know their duty clearly. The present is a case for costs, because the same point has already been decided, but I will give you the option of bringing it before the Supreme Court.

Mr. Drummond asked for costs.

His Honour—I will not make an order for costs, if Mr Miller will take the case further; but if he does not take the case further, then I shall consider that he acquiesces in my decision, which he must have known beforehand (the facts being the same as in the earlier case)—and that consequently he ought not to have brought the action. In that event I shall give costs for the defendant.

Mr Drummond—Will your Honour mention the amount of costs? There is, too, a limit of time for bringing an appeal.

His Honour—The time is fourteen days; and if the case does not go any further, I shall fix the costs at $25. Meanwhile Judgment will be for defendant.

Clippings.

Several new buildings are in progress in the Foreign Settlement. The new house which Mr. Masfen is erecting, and which is leased to the U. S. Consul, M. M. De Lano, Esq., for a term of years, is going up rapidly. The building in course of erection for the Great Northern Telegraph Company is also making fair progress, and will soon be completed. Messrs. John Forster & Co. are commencing the erection of a new hong, compradore's office, &c., on their premises, below Messrs. Birley & Co.'s. The American M. E. Mission are just completing a new building adjoining their church, to be used as a Printing Office and Theological Seminary. It is three stories in height, with a half basement; and has a fine position, overlooking the river.—*Foochow Herald.*

The telegram which we subjoin, from the *Times of India*, brought the first information of Mr. Margary's death:—

Rangoon, March 7th.

When the Expedition was near Manwyne, four marches from Bhamo, a hostile demonstration was made. This was on the 22nd February.

Mr. Margary went ahead, reconnoitring, and entered the town, when he was treacherously murdered.

The remainder of the party were attacked by one hundred Chinese hillmen, when it fell back, and arrived without further loss at Sekkaw, Bhamo.

Mr. Elias started for the southern route, but the Chinese authorities stopped him from going further than Mynemow.

The annual report of the Postmaster-General, again, owing to the dulness of trade, shows diminished receipts. The decrease in the gross revenue as compared with 1873 amounts to $5,688.91, of which $869.68 is apportioned to the Imperial Post-office and $4,819.29 to the Colonial Government. The average number of days occupied by the mail steamers in making the passage between here and Europe was less last year than in 1873, by both English and French packets. The quickest outward passage was made by the English packet, which accomplished it on one occasion in 35 days. One mail, sent from Hongkong by French packet *vid* Marsilles, was delivered in London in 35 days; the quickest homeward passage achieved by the English mail was 38 days.—*Daily Press.*

Intelligence of the wreck of the celebrated tea clipper *Maitland* on a coral reef, near Huon Island, has been received from Sydney. A passing vessel noticed the wreck, and on proceeding to the island a bottle was found containing documents which leave little doubt that the crew of thirty hands have all been lost in the South Pacific. The *Maitland*, sailing a point off the wind, was considered to be about the fastest clipper afloat. She made the fastest voyage on record from Sunderland to Hongkong, in eighty-four days, and competed several times in the great races from China with the new season teas. She left London at the beginning of last year, and was wrecked on May 25, while on a voyage from Brisbane to China for tea.—*Overland Mail*, 19 Feb., 1875.

News has been received by the Calcutta Foreign Office of an attack having been made by the Chinese upon the Burmo-Chinese Exploring Expedition. The party, under command of Colonel Horace Brown, left Rangoon some weeks since for the purpose of exploring the Western Bhamo route to China. They were attacked by the Chinese near Momein, on the upper route from Bhamo. Mr. Margary, the Interpreter, was murdered, together with five Chinese servants, and their heads exposed on the walls of Momein. Mr. Ney Elias, who was also attached to the party, but was proceeding by another route, has been recalled. As the expedition was provided with passports from the Chinese Government this attack is inexplicable. From Calcutta, we hear also that orders have been received from England to hold regiments in India ready for immediate service. It seems probable that the attack upon Colonel Brown's party has something to do with these preparations.—*Times of India.*

Our Shanghai friends recently made the gathering of St. Andrew the occasion of a little self-glorification, and have been telling one another that they are now "a mighty and increasing city, instead of a petty settlement." It affords us much pleasure to learn that they are so well satisfied with their own rate of progress, even in this progressive age; but still they must not be surprised if the outer world shows just a little unwillingness to accept, without any demur, their own estimate of themselves, for they have their shortcomings. This mighty and increasing city possesses a most useful institution, one that has done, and is still doing, good service in advancing our knowledge of matters relating to China and the Chinese, styled the North-China Branch of the Royal Asiatic Society, which, when it assembled the other day to hear a learned paper read, was not able to muster the bare *quorum* of members necessary for the transaction of the most ordinary routine business. From this melancholy fact we are afraid that the love of knowledge in "the mighty and increasing city" has not kept pace with its more material development, and that there is still something lacking there to enable it to compare itself with Liverpool or Leeds. Apart from this, the sparseness of attendance at the meeting alluded to was certainly not complimentary to the author of the paper—Mr. T. Watters—when we consider that the essay in question cost him much time and labour. The paper we refer to was on the Buddhist Sutra, *Miao-fa-Lien-hua ching* (in Sanskrit *Saddharma pundarika*), which is commonly translated "The Lotus of the Good Law," and, as far as we can gather from the brief summaries in the Shanghai papers, must have been—to quote one of them—"well "calculated to throw light upon the mysteries "of the Buddhist system, especially in some of its later phases."—*L. & C. Express.*

The steamer *Ocean*, Capt. Brown, reports—Left Newchwang on the 31st ult., at 1.15 p.m. Arrived at Chefoo on the 1st instant at 6 a.m., left same day at 4 p.m., bound for Swatow. Had exceedingly thick weather immediately after leaving port; on the 4th instant, for the first four hours had strong head wind and sea; from 4 a.m. to 8 a.m. dense fog, the ship going at reduced speed, and the steam whistle kept sounding at intervals of one minute. At 10.40 a.m., the whistle was answered by another steamer on the port bow. The Captain and second officer were on the bridge. Orders were at once given to port the helm, stop the engine, and reverse full speed, which orders were instantly obeyed. The look-outs then reported something right a-head, and in less than one minute came into collision with the steamer *Fusing*, striking her on the starboard bow, close to the fore-rigging. A large hole was knocked in the *Ocean's* port bow, above and below the water line, about 10 feet by 5 feet. The steamer *Fusing* was settling down by the head, and as soon the ships got clear, they lost sight of one another. The *Ocean's* boats were all lowered, and proceeded to the assistance of the sinking steamer, being guided by the cries of the Chinese passengers. The *Fusing* foundered almost instantly, and the passengers were clinging to the wreckage. The first boat in charge of the 2nd officer, picked up the chief officer of the *Fusing* and eleven Chinese who were floating on a ladder. The second boat, in charge of the 1st officer, picked up eleven more Chinese; and a third boat in charge of the 2nd and 3rd officers, rescued thirteen others, and a fourth boat was dispatched in charge of 3rd engineer. Only one boat belonging to the *Fusing* got clear of the wreck, with the European portion of the crew, with the exception of Mr. Stewart, the 3rd engineer, who was drowned, and some Chinese—23 in all. After putting them on board the *Ocean*, the boats returned, and searched for over two hours amongst the wreckage for any other survivors. The compradore was found floating, quite dead. Many of the Chinese saved had sustained severe bruises, and had an arm or a leg broken; their wants were attended to as soon as possible. All attention was then given to the condition of the *Ocean*; the hole in the bow was blocked up with planks and bags of rice, and all hands—crews and passengers, were set to work to jettison the cargo (which consisted mostly of beancake) out of the fore compartment. By midnight, the ship was sufficiently lightened as to enable her to proceed for the nearest port. Two Chinese died on board the *Ocean*, and their bodies with that of the compradore were brought to Shanghai. Passed Shawieshan at 11 a.m. on the 5th, and received a pilot on board at 3 p.m. Blowing hard from the N.N.E. at 9 a.m. on the 6th. The Captain and officers of the *Fusing* proceeded to Shanghai in a Chinese boat. Arrived at Shanghai on the 9th instant.

COMMERCIAL INTELLIGENCE.

SHANGHAI, APRIL 7TH, 1875.

Arrivals.—The steamship *Conquest*, and the London mails of 19th February, per P. and O. steamer *Pera*.

Telegrams.—London, 2nd April.—*Mid. Or. Cotton*, 8⅛d. per lb.; 8¼-lbs. *Grey Shirtings*—*Eagle*—9s. 10½d. per piece, strong; W. B. *Lead*, £22, and *Iron*, £10.

PIECE GOODS.—Business has been almost entirely suspended here during the past week. The Tientsin dealers have done nothing either by way of purchase or of clearance. They have been waiting for Li's decision in regard to Sun's recent proclamations. The Viceroy has spoken, and a copy of his Chop was received here yesterday per steamship *Shanse*. The document is exceedingly vague, and for all that it contains, H. E. might just as well have held his peace. The merchants, however, appear mollified, if not satisfied, and now consider themselves safe in shipping cargo. They commenced clearing yesterday afternoon, and will probably begin buying again when they receive the heavy portion of their mails, which they say is coming in the steamship *Appin*—overdue. Foreigners advise a fair demand for most of the staple imports. Nor have the Upper-Yangtsze agents, resident amongst us, been doing anything either. But foreign advices from Hankow, under date 3rd instant, state that "during the past three days the news of the rise of the Shanghai "market has caused some excitement amongst dealers here, and a good business has been done in *Grey Shirtings* at 2 *a* 3 cents advance, "and there has also been a good demand for 7-lbs. *T-Cloths*, but the supply has not been large, and only 1,000 pieces 7-lbs. Collie's "*Green Lion* on bale have been sold at Tls. 1.45. In Drills there has likewise been more doing;" the sales—amounting to about 5,000 pieces, Tls. 2.42 *a* 2.46 per piece. Chinkiang.—An extensive business at advancing rates for the week ending 5th instant—market closing firmly, but quietly owing to the inactivity prevailing here. No improvement, nor any appearance thereof from Japan as yet.

Shanghai.—One sale of 5,000 pieces *American Sheetings*, ex *Titan*, at Tls. 3.72½ is recorded, and that is the most important transaction booked since this day-week. Small parcels of 14-lbs. *Drills* English—*Pillar* &c., have changed hands, and Tls. 2.37 *a* 2.38 per piece is their established value. The quotations for most other fabrics, however, are nominal, and, although holders generally profess firmness, it remains to be seen how they will act when their firmness is tested by actual offers.

The following comprises the sales reported since 31st ultimo :—

6-lbs. Grey Shirtings	1,800 pieces	at Tls. 1.34	@ 1.39½	per piece.
7-lbs. Do.	2,500 ,,	,, 1.43	,, 1.46	,,
8¼-lbs. Do.	15,000 ,,	,, 1.70	,, 1.96	,,
7-lbs. T-Cloths—Mexican	4,500 ,,	,, 1.42	,, 1.45	,,
14-lbs. Drills	4,100 ,,	,, 2.37	,, 2.38	,,

Turkey Reds—2¾-lbs. fine	500 ,,	,, 2.25	,, —	,,
Camlets,	700 ,,	,, 13.30	,, 13.50	,,
Figured Orleans	900 ,,	,, 3.10	,, —	,,
Lastings Black best	500 *a* 600 ,,	,, 12.00	,, —	,,
Russian Cloths, No. 2	100 ,,	,, 30.00	,, —	,,
Medium Cloths, inferior	200 ,,	,, 0.80	,, —	,,

The scarcity of supplies of 7-lbs. *Grey Shirtings*, 7-lbs. Ordinary Mexican *T-Cloths*, common assorted *Chintzes*, at Tls. 1.30 per piece or so, and *Spanish Stripes* has restricted business a little; and the enquiry for these even has not been of a very lively character. To-day there is some demand for 18 in. *Velveteens*, plain black *Lustres*, cotton *Lastings*, and common 2¼-lbs. *Turkey Reds*, but the offered prices are rather too low for business.

Erratum.—In last week's report, by a printer's mistake, *E-wo Green Dragon*, 8¼-lbs. *Grey Shirtings*, was quoted Tls. 2.05 per piece. The rate should have been Tls. 2.00½ per piece.

METALS.—*Nail-Rod Iron.*—A fair business in ordinary and common brands is again recorded, and dealers report an improving trade, but prices remain depressed owing to excessive supplies of all but best quality. The latter continues firm, and the smaller sizes are again dearer. *Lead.*—The natives have been doing scarcely anything, and prices are nominal. *Tin.*—This article shows a further decline, and still enquiry languishes. *Quicksilver.*—Sales of English at Tls. 120 are reported, which establishes a fall of about Tls. 40. *Copper.*—Unchanged. The small trade requirements are supplied from stocks at quotations.

QUOTATIONS—Duty Paid.

COTTON.—The position of this export is unaltered. The business doing is trifling, but the hongs maintain their former demands.

EXCHANGE.—A fair amount of Bank paper has again been settled at 5s. 9d., at which, however, only two Banks have been willing sellers. Credits have been saleable to private buyers at 5s. 9¼d., and to Banks at 5s. 9½d. Documentary paper is quoted 5s. 9⅝d. per Tael. India.—After the departure of last mail, sales took place at Rs. 304 a 304½, but quotations are now Rs. 305½ on Bombay, and Rs. 306½ on Calcutta. A large business on Hongkong has been done at 27⅛ per cent., which is the closing rate for Bank Bills on demand.

* Exclusive of import cargoes ex *Khiva, Lotus, Patroclus, Glenfinlas, Titan, Peiho, Pera, Conquest,* several Coasters, and of sundry re-exports.

COMMERCIAL POSTSCRIPT.

April 8, 1875.

Arrivals.—April 2nd, British steamer *Conquest,* from London.

Departures.—April 3rd, Br. sh. *Silver Eagle,* for New York, and Br. str. *Patroclus,* for London; 5th, Br. bq. *Dilpussund,* for New York.

The English mail steamer *Pera* takes 400 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 9d. First-class Credits to Bank, 5s. 9½d. First-class to Private buyers, 5s. 9¼d. Private and Documentary, 5s. 9⅝d. On Paris, Bank, Frs. 7.27½. Private, Frs. 7.35. On India—Bombay Bank, demand, Rs. 305 *a* 305½. Calcutta Bank, Rs. 306 *a* 306½. On Hongkong, Bank Bills, demand, 27⅛ per cent. discount. Private, 15 days' sight, 27¼. Gold Bars, Tls. 172.20. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 72.95 per 100. Carolus dollars, Sh. Tls. 80.50 per 100. Copper cash, 1,585 per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

H. & S. Bank.—A small business has been done at 15 % *dis.* and Exch. 72¼, at which the market closes firm, with no sellers.

S. S. N. Co.—A fair business has been done at Tls. 77 cash, and Tls. 80 for June, at which shares are still obtainable.

Fire Insurance.—*Victorias* have changed hands at $126, and *Chinas* at $133 each, and $133½ for 30th instant. The market closes with sellers of *Victorias* at $126, and of *Hongkongs* at $480.

Marine Insurance.—A few *Yangtszes* have been placed at Tls. 585. Buyers of *China and Japans* don't offer better than Tls. 80 for 30th June.

Shanghai & Hongkew Wharf Co.—Shares are now obtainable at Tls. 98 for 30th instant.

The Weather has again been very variable. With a strong Southerly wind, the Thermometer rose on Friday and Saturday to nearly 80; but the wind hauled round to the North again on Sunday, and it has since been quite cold, the Therm. on Monday marking only 55 max. The extreme fluctuation has been from 78 to 46.

Land.—At a land auction on the 2nd instant, the following prices were realised:—A lot of land situated near the Ningpo Joss House, measuring as per Title Deed 2 *mow* 5 *fun,* and registered in the U. S. Consulate as Lot No. 175. (This lot by recent survey contains 4 *mow* of land.)—Tls. 121. A lot of land adjoining St. Catherine's Bridge, and near "Overweg's" Bungalow, measuring in area as per Title Deed 10 *mow,* 3 *fun,* 8 *li,* and registered in the U. S. Consulate as Lot No. 174.—Tls. 14 per *mow.* A lot of land situated on the Pootung side, adjoining Muirhead's Dock, with frontage on the River Whangpoo of over 2,000 feet, containing as per Title Deeds 118 *mow* 3 *fun* 3 *li* 8 *haou,* and registered at the U. S. Consulate as Lots Nos. 127, 186, and 187.—Tls. 480 for lot. A property situated at Woosung, immediately West of the Imperial Maritime Customs Harbour Master's Station, and adjoining the Station of the Woosung Road Company. Lot. 1.—A plot of land immediately West of the Woosung Road, containing about 28 *mow.* Tls. 10 per *mow.* Lot 2. A plot of land North of the last-named property, and immediately West of the Woosung Road, containing about 28 *mow.*—Tls. 10 per *mow.* A lot of land situated on the Pootung side, containing as per Title Deed 5 *mow* 9 *fun* 2 *li* 1 *haou,* and registered at H. B. M. Consulate as Lot 726, Title Deed 719.—Tls. 4 per *mow.*

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, APRIL 15, 1875

WITHOUT desiring to draw an undue contrast between the countries, it is well occasionally to mark the difference which exists between the courses adopted by the two neighbouring states of China and Japan. It may seem ungracious to be continually holding up the one as a pattern for imitation to the other; and Japan, while doing much, has done it in such a way as very often to excite rather satire than admiration. There are, however, many acts left which seem to have been dictated by a true knowledge of the state of affairs, and which, ushered in without pressure from without, are all the more worthy of record. The different feelings with which China and Japan regard the important question of the trade in rice, is one of those matters which show how very much further on the road to civilization is the smaller and more lately opened country; and how much more thoroughly Japan has learned those true principles of policy, without which no nation can attain to a prosperous condition. While China burdens the trade in rice with unwholesome dues and, in the matter of the supply to the North, nurses it with still more damaging effect, as well as diminishes the growth of the staple by shutting it out from the markets of the world; the Japanese, more wise in their generation, have learned that the best incentive to an increased production is to allow free export. Last year, from political motives and, as it seemed to them, with the result of injuring China, at that time unfriendly, they did forbid the export. That this prohibition was a mistake, even from their own point of view, the advisers of the Japanese Government will probably now themselves allow; but, such as the reasons were, they were considered to be exceptional, and not to denote any settled change of policy. The Japanese Government has, accordingly, now that matters are settling down after the apparently imminent breach with China, taken an early opportunity of removing the embargo on the staple.

Now it is worth while looking a little into the circumstances of the two countries, as regards the export of rice. Japan is a much smaller country than China, and moreover contains within its limits a smaller proportion of land suitable for growing cereals. If the system which leads to the prohibition of the export of rice, as taking away food from the people, were a wise one, we should hear some day that the people in Japan were suddenly starving for want of that very article which they had sent out of their own country into the markets of the world. China, as we said, is very large as compared with Japan, and therefore, an amount of rice which exported from the former would be inappreciable in its effect, if sent away from the latter might absorb the whole crop. Strange to say, we do not hear of this result. On the contrary, year after year, Japan comes to the assistance of China, sending over large quantities of rice, and her own people never seem to feel the want of food. In fact they grow rich, because the permission to export gives them a direct interest in growing as much rice as they possibly can—the result being that, in seasons of scarcity, there is still enough for their own consumption; and, in seasons when the yield has been good, the excess can be turned

into other commodities, more useful and tangible than so much grain stored up in public granaries. In fact, storing grain, as is attempted to be done in China, is like hiding one's money in the ground. It is of no profitable use either to the owner or any one else. We can see, on the other hand, daily, what the prohibition of free trade in rice is doing in China. So far from increasing the amount of food produced, it has directly the contrary effect; for what interest can a man have in toiling to grow two piculs of rice when, after using one, the other is only useless drug on his hands? He has no means of exchanging it for money or for other commodities, and so cannot, from time to time, change his seed and improve the produce. Again, he has learnt improvident habits, so that when a year of scarcity comes he does not know what to do or where to turn. Only the rich can afford to buy foreign imported rice. The ordinary dweller on the soil has not the means of amassing money to pay for food in such a case; he has been kept poor by the artificial restraints placed on the cultivation of those products which he could have supplied to the world, but was not allowed. This state of affairs is so very common in China, that we are almost safe in predicting its occurrence in one or other province of the empire every twelve months. The best remedy is the simplest; and five lines of a Japanese notification have done more to increase the comfort of the people, than volumes of laws and memorials.

Summary of News.

The French mail of the 26th February, arrived yesterday by the M. M. steamer *Meikong*.

A mail leaves to-morrow for Europe, by the M. M. steamer *Peiho*.

The Shanghai-Amoy cable has been repaired, and telegraphic communication re-established.

The following Reuter's telegrams have been received during the week:—

Reactionary educational decrees of the King of Spain have elicited protests from the professors.

The Prince of Wales has returned from a Royal Meeting at Venice, where he was entertained with splendid fêtes, and received with much cordiality and enthusiasm.

Revenue for the year—£74,500,000.

A warlike article in a Berlin Paper is causing uneasiness.

No action is taken by the British Government with reference to the murder of Mr. Margary, pending the receipt of Mr. Wade's report.

The Bishop of Breslau, having refused to resign when called upon, will be prosecuted.

In the House of Commons, Mr. Bourke confirmed the exchange of notes between Belgium and Germany, which had been confidentially communicated to England, but neither party appealed to England.

The Berlin Ministerial journal produced a warlike article.

Captain Boynton, with his life apparatus, floated fifty miles across the Channel; nightfall prevented his reaching Boulogne. The result was telegraphed to the Queen.

The sixth half-yearly meeting of shareholders in the North-China Insurance Co. (1872-4) was held on Friday. The accounts showed a profit on the half year of Tls. 141,844. This is the last ordinary meeting of the Company of 1872-4, and the Directors were empowered to wind up its affairs. A special meeting will be called bye-and-bye, to pass final accounts.—The new Company (1875-7) has been started, and is working satisfactorily.

The annual meeting of the Trustees and Subscribers to the Chinese Hospital was held on Tuesday. The accounts show that the new building is clear of debt, and there were Tls. 509 at credit of general account at the close of the year. The report showed that the hospital is more and more resorted to, and by better classes of Chinese. The question of inducing the Chinese to support the institution was much discussed. A full report will be found on another page.

The annual meeting of the North-China Branch of the Royal Asiatic Society was held on Monday evening. The Reports of the outgoing Council, of the Librarian, and of the Curator were read, showing that much useful work had been accomplished during the past year.—The following officers were then elected to serve for the present year:—President, Mr. Medhurst; Vice-Presidents, Messrs. Wylie and Seward; Hon. Secretary, Mr. T. G. Smith; Librarian, Mr. Cordier; Curator, Mr. Pryer; Treasurer, Mr. Reding. Messrs. Kingsmill, Little, Johnson, Taintor, Rev. J. Thomas and Dr. Macgowan, Members of Council.—Mr. Wylie then read a continuation of the notes of the Archimandrite Palladius, with reference to the travels of Marco Polo. The present portion was mainly occupied with the districts lying North-West and West of the capital. The palace of the Yuen dynasty at Shang-du; the city of Cambalu and the palace there, the paper money of the Yuens and the religion of Empire, with many more topics of interest formed the basis of the paper. Its reading was unfortunately rather prolonged, so that little time was left for discussion, or for the reading of the second paper of the evening, by Mr. Kingsmill.—Mr. Kingsmill identified the Yuèti with the Ephthalites of the later Greek writers, and the Kiangs with the Kuru tribes of Indian tradition. The latter enabled him to offer a reasonable explanation of the myth of the Emperor Shên-ming, which he felt disposed to assign to the early part of the Han dynasty, when intercourse with India was constant.

We learn from the Minutes of the French Council meeting of the 31st March, that terms of arbitration about the Yang-king-pang encroachment have been at last definitely agreed on. The English Council are not conscious of having made any encroachment, but are willing that the question whether they have done so should be included among the points to be submitted to the arbitrators. These points are, then, to be as follows:—

1.—Is the Yang-king-pang bund between the Rue Discry and the Rue Touranne, in its present position, an obstruction to the navigation of the Creek?

2.—Does it really prejudice the interests of property owners along the line of the Creek?

3.—Have the (English) Municipal Council made encroachments on the North Bank of the Yang-king-pang? If so, are these encroachments an obstruction to the navigation of the Creek? and do they really prejudice the interests of property owners?

The English Council suggested the 5th April for submitting the question to the arbitrators, but the French Council protest that the excess of office work incidental to the close of the year prevents them from agreeing to that date.—The Consul-General has suggested certain modifications (which are not related) in the electoral proceedings. The Council think changes should not be made on the eve of the election, and cannot give an opinion on the merits of those proposed, without further consideration.

The Municipal Minutes which we publish below, of a meeting held on the 29th March, consist chiefly of correspondence that has been already published among the reports of the French Municipal Council, and which has, therefore, no present interest.

Mr. Medhurst has received a despatch from Mr. Wade, confirming the news of Mr. Margary's death, and stating that passports have been obtained to enable two English officers, accompanied by a Chinese official, to proceed to Yunnan to investigate the affair. Prince Kung has given a positive assurance that no one accused of participation in the outrage shall be sentenced, until the officers sent by Mr. Wade shall have had an opportunity of hearing the evidence against them.—This at least ensures that a strict enquiry will be made on the spot, by persons interested in arriving at, instead of disguising, the truth. We presume that the two officials in question will be members of the Consular or Diplomatic Service. The attack is stated to have happened near Momein, in the Chinese jurisdiction of Teng-yueh-chow. Teng-yueh-chow, or rather Teng-yueh-ting 騰越廳, is a town duly registered in the "Tsin-shen," or Chinese Civil List, as a residence of a "Ting" Magistrate, under the Prefecture of Yung-chang-foo, 永昌府 in the Province of Yunnan.

The *Rangoon Gazette* inclines to think the King of Burmah instigated the attack on Colonel Brown's party in Yunnan, and relies on the opposition shewn by the King to Major Sladen's expedition, and on the fact that a Burmese embassy was travelling a few days ahead of our own, by the same route. It is quite likely that the King may have been opposed to the Mission; he is opposed to anything that tends to encourage free-trade, and so lessen the profit he now derives from monopolising Burmese commerce in his own person. But, however much the King may be implicated, this will not lessen the responsibility of the Chinese Government for the acts of its own officers, nor will it lessen the criminality of the official by whom Margary was murdered, and who instigated the attack on Colonel Brown's party.

Reuter informs us that the British Government waits to hear from Mr. Wade, before taking action in the matter. This means, we presume, that a question has been asked in Parliament, and has received that answer; and the inference is, that the Government will be guided very much by Mr. Wade's view, at the outset. We sincerely hope, therefore, that he will counsel such prompt and vigorous measures as will make a lasting impression on the Chinese mind. In these days of telegraphy, matters can be very quickly arranged between Shanghai, Calcutta, and London.

A Naval Court of Enquiry was opened Monday at the British Consulate, under the presidency of Captain Buller, of H.M.S. *Modeste*, to investigate the circumstances attending the fatal collision between the steamers *Ocean* and *Fusing*. The proceedings occupied three entire days. The finding was to the effect that the instructions of the Board of Trade as to speed, &c., had been complied with by the master of the *Ocean*; though, considering the locality and thick fog that prevailed at the time, the Court were of opinion that the speed of the *Ocean* might have been still more moderated. The efforts of the master, officers and crew of the *Ocean* to save the drowning crew and passengers of the *Fusing*, and their care of the survivors, merited praise, and the certificates of the master and officers were returned to them. The non-entry of the occurrence in the official log was censured, and will, together with the slovenly manner in which the engineers' and ship's logs were kept, be brought pointedly to the notice of the Board of Trade. The voluminous evidence and the finding of the Court is to be transcribed and translated for the satisfaction of the Chinese authorities, who took the greatest interest in the proceedings, the Court being numerously attended during the investigation, by native officials of various grades.

We are credibly informed that one reason why the Chinese authorities took such interest in the proceedings before the recent Naval Court, was that the wives of two of the rice-mandarins drowned on board the *Fusing*, committed suicide on the receipt of the news of their husbands' deaths. They were resident at Soochow.

Dr. Williams, Secretary of the U.S. Legation, and his family have come down from Peking *en route* for America.

His Excellency T. F. Wade, C.B., British Minister at Peking, Mrs. Wade, and family have also arrived. Mrs. Wade and family proceed to England, and Mr. Wade returns to Peking.

The French men-of-war *Montcalm* and *Volta* have passed out to sea.

H.M.S. *Vigilant*, with Admiral Ryder on board, came up the river Monday morning.

The S. S. N. steamer *Chihli*, which left Shanghai on Wednesday last for Tientsin, when about 120 miles North of Shaweishan, and close to the scene of the recent disastrous collision between the steamers *Ocean* and *Fusing*, came across a mass of wreckage, evidently the remains and part of the cargo of the last-named vessel. Captain Paterson lowered his boats, searched the spot, and was successful in finding Captain Andrews' desk, floating, and containing a barometer, sextant, some books and other property. Twenty logs of timber and two boat's breakers were also salved. The *Chihli* saw no bodies. As accounting for this wreckage remaining so long close to the spot where the collision happened, it is said there is very little current or tidal way thereabouts. The *Palos* U. S. gunboat, which arrived here on Saturday, reported having seen the *Chihli* lower her boats and search the wreckage. The *Nanzing*, which had been sent out with a number of coffins, in the hope of recovering some of the bodies, has returned from her cruise, having been unsuccessful, although every part of the locality was well traversed and look-outs were kept at the mast-head and deck, from daylight to dark, for two days.

From the *Hongkong Times* of the 6th April, we extract a fuller account than has yet appeared, of the wreck of the steamer *Hongkong*.

From the *China Mail* we also give particulars of the wreck of the *Yuentzefei*.

We hear of a serious row between some opium-smugglers and *li-kin* tax collectors, in the city. Three of the former undertook to convey nine balls of opium into the city, evading the *li-kin* collectors. They were armed with stout bludgeons and an iron bar, and when, about noon, they were confronted by the *li-kin* men, a determined fight ensued. The smugglers, who were reinforced by two others of their number, had at first the best of the fight, some of the *li-kin* men getting a severe thrashing and, in two cases we are told, broken limbs. Later on, however, some thirty more of the *li-kin* collectors having turned out, the smugglers were overpowered, their opium seized, and themselves lodged in prison, where they await enquiry and punishment.

The Subscriptions for the Races this spring meeting amount, we hear, to Tls. 3,005. This sum, we believe, compares favourably with the amount subscribed last year for the comparative event. The entries for the various races closed on Saturday afternoon at four o'clock, with the following result:—*First Day:* Chu-ka-za Cup, 13; the Criterion Stakes, 17; Griffins' Plate, 42; the Jockey Cup, 15; the Visitors' Cup, 20; the German Cup, 20; the Members' Plate, 13.—*Second Day:* The Shanghai Cup, 14; the Shanghai Derby, 33; the Merchants' Cup, 26; the Engineers' Challenge Cup, 19; the Race Club Cup, 19; the Tsatlee Cup, 22; the Hurdle Race, 6.—*Third Day:* The Great Northern Handicap, 17; the Taotai's Cup, 19; the Ladies' Purse, 24; the Brokers' Cup, 19; the Consolation Cup, 45; the Champion Sweepstakes, —; the Steeplechase Cup, 14. Numbers like these should bring some good fields to the starting-post; and, judging from the animated scene presented in the neighbourhood of the Grand Stand during the morning *pows*, considerable interest centres in the forthcoming meeting which promises, under the favour of fine weather, to be a very good one.

We reprint an amusing description of Shanghai, from a letter in the *Alta California*, written apparently by a member of the "Transit of Venus" party. What the writer is particularly struck with, is the "grand style in which everything is done here." Then the establishments of the leading merchants are remarkable! "consisting as they do of several distinct stores—book stores, stationery, hardware, shipchandlering, dry goods, fancy goods and tailoring." Shanghai prices seem also to have rather astonished the writer.

Our PEKING correspondent writes that the young Empress, widow of his late Majesty, died on the 27th March. It is reported that the unhappy lady refused all food and gradually sank from exhaustion.

A special meeting of Land Renters at CHINKIANG is called for the 24th instant, to consider the question of repairing and strengthening the Bund.—Messrs. Spencer and Wolff write on the 12th April:—"During the week under review, the market for 8½-lbs. Grey Shirtings and 7-lbs. T-Cloths has been rather quiet, and we can only account for this depression by the fact that our dealers, having no confidence in the stability of the late improvement in prices, are consequently refraining from purchasing."

The annual meeting of Land Renters at KIUKIANG was held on the 2nd April.—The accounts showed an income of Tls. 1,252.19 and an expenditure of Tls. 1,080.42, leaving a balance in hand of Tls. 171.77.—Messrs. Anderson, Kopsch and Shaw were re-elected as Municipal Councillors for the current year.—It was resolved to lower the rate of land-tax to Tls. 15 per lot.—A proposal to lower the rental of bund frontage was negatived.—Several matters were discussed, as reported in the minutes which we print elsewhere.

The Customs officer on duty at NINGPO, on the arrival of the steamer *Hupeh* there, on the 5th instant, in the course of his duty, in examining the baggage of the Chinese passengers, found two baskets containing about $3,000 worth of native jewellery. The man that owned them disappeared, and the Customs' authorities, in conjunction with the Police, still have the articles in their possession, in the hope of obtaining some clue. The story goes that a murder has been committed in Soochow, and that the articles found are a portion of the stolen property. We cannot however vouch in any way for the truth of the tale, which we give as it has reached us.

The FOOCHOW *Herald* says Monsieur de Segonzac, acting Director of the Arsenal, has left for Tai-wan-foo, to assist in operations against the Formosan tribes.—The same paper learns, from a credible source, that the Peking authorities have so far acknowledged the Great Northern Telegraph Company's claims, in agreeing to discuss them, and that Shên Pao-chên, Imperial Commissioner at the Arsenal, has been appointed to act on behalf of his Government, while Lieutenant Schültz—at present in Foochow—the Secretary to the Danish Legation, will act for General Raasloff.

Summaries of HONGKONG and JAPAN news will be found in the usual place.

Editorial Selections.

THE PROPOSED MISSION TO YUNNAN.

Whatever reparation may be eventually demanded for the insult and outrage lately offered to the British Mission in Yunnan, punishment of the chief actors must be a leading feature. And, as the detection of the real culprit is a chief difficulty among people who regard evasion, falsehood, and fraud as harmless and often necessary alternatives, it was eminently desirable that Foreign officials should take a leading part in the necessary investigations. This we presume to be the understanding come to with the Chinese Government. A joint Commission, in which a British officer shall take the leading part, should undoubtedly be our first demand. Even so, it may not be easy to arrive at a satisfactory conclusion; but otherwise, we may be quite sure there would be no daylight reached at all. The explanations which will be offered can be discounted beforehand—savage tribes, antipathy to foreigners, officials powerless, extreme regret, and the usual string of excuses for inaction. But we have had enough experience of the Chinese Government and its officials, to know the value of such protests; and the presence of foreigners on the spot will be a check on the tale of falsehood that would otherwise be certainly compiled.

A great deal will depend on the constitution of the Mission, and the circumstances under which it appears on the scene. We have yet no information as to the intention of the British Government in this respect; but one thing is clear: it is essential the Mission should be invested with all possible importance, in order to convince the Chinese that we intend laying that stress on the case which its gravity demands. To send two junior officers across China to Yunnan, would be to invite for them risk and contumely. Two men coming from nowhere, and with none of the attendant circumstances of power, would command no respect in a place elate with what is no doubt considered a victory over barbarian intruders. And it would be madness indeed to trust any more lives to Chinese "faith," after the experience we have had, in the cases of Mr. Cooper and Mr. Margary, of the value attaching to an Imperial passport when the whim of the officials is adverse. The British Commission should comprise a Consul (or a Secretary of Legation) with two or three interpreters on the staff, and should arrive on the scene escorted by a large and well appointed body of soldiers, both horse and foot—by the same route along which Colonel Browne's Mission travelled. A representative of the Indian Government should certainly join the Mission at Rangoon; and the whole expedition should visit the capital of Yunnan, and talk there with the Governor of the province, after the enquiry has been completed on the scene of the outrage. It is of high importance to our prospects in China that the measures taken to redress this last crime should be effective and complete, even should the perpetrator prove to be the highest official in the province. The impunity with which Mr. Cooper's imprisonment at Wei-sei was allowed to pass, was probably not without effect in encouraging this new outrage. But our prestige on the frontiers is now more gravely assailed, and a marked demonstration of strength will be necessary, to guarantee security in future for the trade routes which India is trying to open up.

Apart, however, from the punishment of the crime, and beyond the necessity to re-establish our prestige on the frontier, arises the broad question of our position and policy in China—and the opportunity should be taken to re-assert both, with a firm hand. It cannot be disguised that the influence gained by the last war has been gradually slipping from us; the respect which our victories ensured for the Foreign name has been dying out, and the traditional insolence of the Chinese Mandarin is again obnoxiously evident. It is high time to remedy this, and the present opportunity is a favorable one to teach the Chinese a new lesson. We do not want proclamations informing the *people* that foreigners are human beings and entitled to be let live in the Flowery Land; it is the officials who want teaching that their insolence is intolerable, that we see through the riots they are so fond of instigating, and that their sins will be visited upon their own heads. Let the opportunity be taken of re-establishing our prestige, of regaining the ground which has been slipping from under our feet, and of removing the official cobwebs which have been allowed to strangle our intercourse with the people and the country. The opportunity is clear. No diplomatic forms need embarrass those upon whom will fall the duty of avenging this last outrage. There was little regard shown for treaties or civilization by the men who entrapped and murdered Margary; and it will be pitiful if we allow the Chinese to embarrass, with fine-spun argument, our demands for reparation. The Peking Government cannot decline responsiblilty for an act committed on Chinese territory, within a recognised official district, nay even, so far as our present information goes, within an official Yamên. If they do plead powerlessness, in the hope of evading responsibility, our alternative is clear; Momein is very near to Rangoon, and it will be for the Government of India to take the law into its own hands. It will cost little to throw troops into Yunnan, and it will be well that China should feel the pressure of British India on the West, as she has already felt that of Russia on the North.—To conclude, however, as we began, we maintain that both policy and wisdom require us to send into Yunnan, at the outset, a Commission invested with diplomatic importance, and escorted by such a force as shall inspire respect.

THE OUTRAGE IN YUNNAN.

Until we have further particulars of the murder of Mr. Margary, it would be premature to saddle the Chinese Government with the immediate responsibility of that act,—an act which, executed in cold blood and without the excuse of political complications, really excels in brutality the murder of Schlagenweit by Wallee Khan, at Kashgar. But even if the Government can clear itself of participation in the outrage, it is not in a position to deny that its own misconduct is really at the bottom of the motives that have led to a crime with which even the rudest and most barbarous of nations would blush to have their name connected. If it had not been for Chinese conceit, backed up by Chinese exclusiveness, no such condition of affairs as we see to-day would be in existence on its Western frontier. The Chinese Government has affected to hold itself out to its neighbours, as the one civilised Power to be respected and obeyed. Instead of using the opportunity thus granted it, to some useful purpose, it has, to gain its own ends, turned it into a means of spreading a policy of isolation. It did not seek to civilise the natives of Central Asia with whom it came in contact; it did not endeavour to restrain their internal disputes and to encourage the arts of peace and industry. This, its position gave it the means to do. It did, however, assiduously cultivate one art—that of dissimulation and exclusiveness. Jealous, itself, of every nation which exhibited the living power of a civilisation gradually dying out in its own body politic, it used its influence to still further incite the naturally rude and jealous tribes of its Western frontiers, to an ignorant and almost inhuman exclusiveness. There was a time when, to the tribes of Asia, overrun with Turkish hordes, China, with reason, appeared the one bright spot on the political horizon. Europe itself was trembling in the balance of fate, and could hold out no helping hand; and the peoples of Central Asia naturally turned to China. In some measure, China did answer to the call; but, even at the time of the Mohammedan inroads into Central Asia, the innate selfishness of her rulers was too strong to induce her to take really active steps to turn aside that conquest, under which the greater part of the continent has since almost relapsed to barbarism. At intervals, Chinese influence was again revived in Central Asia, but only to result in the inculcation of the very worst features of Chinese polity on nations whose own dark and suspicious natures rendered them peculiarly

susceptible to such influences. We, therefore, even supposing that the Chinese Government can be acquitted of direct participation in the present outrage, can by no means separate that crime from our condemnation of the unjust and barbarous policy pursued by China towards those countries over whom she has exercised an influence. Morally, the crime of Mr. Margary's murder must be laid at Peking; for it is as logically the result of the policy dictated from thence, as if carried out under actual commands from head-quarters. The mere punishment of the immediately guilty parties can, in such a case, be no complete penalty for the crime. The removal of the causes which have led to its perpetration, is the only effectual offering which the Chinese Government can make in satisfaction of an outrage against all the laws of humanity. That, in the interests of China itself, such a course is advisable, we pointed out a few weeks since; we have now the additional proof that, in the interests of common humanity, the time has come to insist on a modification of the relations existing between China and ourselves along her Western frontier. Why should she be allowed to bar ingress and egress, not to her own people alone, but to the inhabitants of nearly half of Asia? Yet this is practically the position occupied by her just now. The result has been, the bloody wars in Yunnan and Turkestan, and its latest developement—the murder in cold blood of Mr. Margary.

THE CHINESE HOSPITAL.

The position of the Chinese Hospital as disclosed at the annual meeting on the 13th instant, is highly satisfactory. There are two sets of accounts—a building and a working account, and we are glad to see that both stand well. The new hospital building has cost Tls. 5,882 which has been provided for chiefly by subscription, but partly by Tls. 1,284 transferred from the general account. The receipts under the latter head have been exceptionally large, including the handsome donations of Tls. 1,000 from Mr. Hanbury, Tls. 1,977 from the Municipal Council (transferred from the Lock Hospital), and $300 from the Taotai. Altogether Tls. 3,497 have been received in donations, and Tls. 1,747 in subscriptions—the total general income having been Tls. 5,254. The expenditure, however, has been also unusually large, including the sum already named as transferred to Building account, and a considerable outlay for new furniture and other charges incidental to the occupation of the new building. The gross result is that the New Hospital building stands clear, and the Working account has Tls. 509 at credit, whereas it began the year Tls. 215 in arrear. The total receipts from all sources and on all accounts appear thus to have been about Tls. 10,000; and it is to the credit of Shanghai that so large a sum has been obtained, during a depressed season, on account of a charity devoted purely to the benefit of Chinese. We are glad to see that the natives themselves have shown appreciation of its merits—some Tls. 1,800 of the building fund having been subscribed by the Taotai, the Tea, Silk, and Piece Goods Guilds, and one or two private gentlemen.

We are indebted to Dr. Johnston's report for a description of the new hospital building:—The new hospital was built to contain 60 beds, and at present there are 53. The building is plainly and substantially constructed in the Foreign style. Its foundations are raised 2½ feet above the level of the ground. It is 122 feet long, and 42 feet wide. The lower storey is 15 feet 6 inches high, and the upper storey 14 feet 6 inches. It faces the south, and has a wide verandah in front, which opens into nearly all the wards on both floors. The wards are lofty and well ventilated. On the ground floor are the waiting room, capable of seating 160 to 180 patients, the dispensary, ophthalmoscopic room, and one large general ward, with 15 beds. On the upper floor are one large general ward, with 16 beds; an eye ward, with 8 beds; 7 private wards, with a single bed in each; a female ward, with 8 beds; and the operating room. The fittings of the hospital, bedsteads, blankets, &c., were all procured from England, and an attempt has been made to approximate the general arrangements, as nearly as possible, to what exists in the hospitals at home. The wards are remarkably cool in the summer, and during winter they can easily be warmed to a temperature of 50° to 60°. Over-crowding is carefully avoided. According to the present arrangements, at least 1,200 cubic feet of air are allowed for each bed.

The question of raising money among the Chinese towards the support of the institution was discussed at some length by the meeting, but without arriving at any very definite conclusion. There was an evident feeling that the well-to-do Chinese who avail themselves of medical advice should contribute to the funds; but there was an apprehension the Chinese servants might take advantage of any measure for collecting fees, to solicit for themselves, and a further reluctance to alter the character of the institution as a foreign charity. The matter was eventually left to the Trustees, with a recommendation to take measures to give publicity to the purpose of the institution, in Chinese newspapers, and to intimate that subscriptions towards its support would be received.

REVIEWS.

THE CHINA REVIEW—January and February, 1875. Hongkong.

The number before us contains one or two good papers, but hardly comes up to the usual standard, and has less than the usual variety. "San Kuo-Chih" is a sort of historical novel, taken from the times just previous to the division of China into the three states—Shu, Wu, and Wei, and introduces us to the early career of Liu Pei, who founded the first-named of these kingdoms. The present paper is, apparently, based on a historical romance of unknown authorship, annotated by one Chin Sheng-tan, and gives a curious picture of the weakness of Government, and the consequent lawlessness and intrigue prevailing during the latter years of the Eastern Han dynasty. The destined founder of the Shu Kingdom was earning a living by making straw shoes and matting, when he made acquaintance with two men named Chang Fei and Kuan-Yu, and concluded to join them in getting up a force to put down certain insurgents, known as Yellow Turbans. Their success brought them into notice, but they are soon eclipsed, in the paper before us, by other characters, with whom and whose career we leave our readers to make acquaintance from the pages of the magazine. We will only note here, as a piece of abstract information, before passing to the next paper, what were the three kingdoms to the formation of which the tale is supposed to lead. Every one knows of the three States by name; but some may not be aware that the kingdom of Shu comprised Szechuan and part of Shensi and Kansuh; the kingdom of Wei, the half of the Empire north of the Yangtze, from Shu eastward; and the kingdom of Wu, the half south of the Great River.

Mr Allen continues his translations of fairy tales from the "Liao Chai Chih-Yi," and they have the usual quaint interest. One called "The Country of the Sea Demons," describing the adventures of a man named Chü, who was blown out to sea and thrown among savages, is especially curious, as it is probably founded on fact, distorted to suit the Chinese idea of barbarian countries and peoples.

The most interesting and valuable paper in the volume is one by Mr Mayers, on "Chinese Explorations of the Indian Ocean during the Fifteenth Century." It is only the first of a series, which promises apparently to extend over many numbers; Mr Mayers having undertaken the task of translating a book entitled "Records of the Tribute sent to the Court of China by the Countries of the Western Ocean"—compiled by one Hwan Sing-tseng during the early part of the 16th century. "This work," to quote Mr Mayers' own words, "relates to one of the most stirring and eventful periods of modern Chinese history, when the ambitious sovereign who had usurped the throne of his weak and helpless nephew, the ill-fated Kien Wên, proceeded to extend the reputation of his power, by land and sea, to the farthest extremities of Asia. Whilst on the one hand his generals overran and subjugated Tonquin and Cochin China, and on the other his emissaries invited once more the allegiance of the Mongol tribes, and introduced the foundations of Imperial sway over the Buddhist population of Tibet, he at the same time despatched gigantic expeditions to the ports of the Indian Ocean, and obtained by this means the nominal allegiance of Kings and Sultans whose dominions extended from the shores of the China Sea to the Arabian Gulf."

A curious feature is that the Emperor seems to have always chosen eunuchs for his emissaries. It was a eunuch named Cheng Ho who conducted the mission to the Western Ocean, with which we are now interested; and we are tempted again to quote from the Ming chronicle, as to the alleged motive of the Expedition. It will be remembered that Hungwu, the founder of the Ming dynasty, was succeeded

by his son Kien-wên, who lacked all the qualities that had raised his father to power, and who was speedily overthrown by his uncle, Yunglo, who had been made Governor of the North. No traces of the young Emperor were however found, when Nanking was captured by Yunglo's soldiery, and the Chinese have still a tradition that he survived his overthrow and finished his life as a bonze. To return now to the Ming chronicle of the outset of the Western Mission.

"His Majesty, under the suspicion that the Emperor Kien Wên might have fled to countries beyond the sea, commissioned Chêng Ho, Wang King-ho, and others, to pursue his traces. Bearing vast amounts of gold and other valuables, and with a force of more than 37,000 soldiers under their command, they built great ships—sixty-two in number—and set sail from Liu Kia Kiang, in the department of Soochow, whence they proceeded by way of Fukien to Chen-ch'êng, and thence on voyages throughout the western seas. Here they made known the manifestoes of the Son of Heaven, and spread abroad the knowledge of his majesty and goodness. They bestowed gifts upon the kings and rulers, and those who refused submission they overawed by force. Every country became obedient to the Imperial commands; and when Chêng Ho turned homewards, they sent envoys in his train to offer tribute. The Emperor was highly gladdened, and after no long time commanded Ho to go once more and scatter largesse among the different States. On this, the number of those who presented themselves before the throne grew ever greater. Chêng Ho was commissioned on no less than seven embassies, and thrice he made prisoner of foreign chiefs. His exploits were such as no eunuch before him, from the days of old, had equalled. At the same time, the different peoples, attracted by the profit of Chinese merchandize, enlarged their mutual intercourse for purposes of trade, and there was uninterrupted going to and fro."

One of the sovereigns whom he made prisoner was the King of Ceylon, though for what motive we are not yet told. It is curious to note that the expedition was formed in this district, and passed out to sea by the creek still familiar to us as the Liu-ho, which was constituted the thirty-mile boundary during the time of the Taeping rebellion. Like most usurpers, Yunglo seems to have been a man of rare energy and enterprise. Among his earliest acts was deepening the Woosung river, now familiar to us as the Soochow creek. The passage which is devoted in the chronicles to the work which was executed in consequence of this order, shews that the waters of the T'ai Hu were given an outlet by means of the Liu Ho, and those of the three lesser lakes, called the San Mao Hu 三泖湖 near Sung-kiang Fu, were conducted into the Hwang-p'u, thus enlarging the port of Shanghai. There would evidently have been hope even for the Woosung Bar, in the days of the Emperor Yunglo.

There seems to have been no authentic narrative preserved of Cheng Ho's expedition, and Mr. Mayers suggests that the reports which he, as a eunuch, drew up, were reserved for the eye of his Imperial Master alone. However, contemporaneous accounts do exist, and it is upon these works that the compilation was based, of which a translation is commenced in the present number.

We have left ourselves little space to review the remaining papers. A long article on Dr. Williams' dictionary opens up a discussion on Chinese lexicography, and will be read with interest by sinologues.—A narrative of a three weeks' journey into the interior from Foochow, is pleasantly written, but calls for no special notice. With strange carelessness, the writer omits to name a city which he visits, about 60 miles from Foochow, and to which about half the present instalment of his paper applies.—Dr. Carstairs Douglas combats a paper lately written by Mr. Lister, deprecating the importance attached to "tones." He agrees, however, that the difficulty of the tones has been very much exaggerated.

Notices of a few new books, and sundry notes and queries, complete the volume. Among the latter is an account of tooth-pulling by the aid of a white powder (supposed to be corrosive sublimate), which we commend to foreign practitioners:—"The operator rubbed the powder on the gum as described, but then directed the patient to wait a little. After perhaps ten minutes' interval, he again rubbed the gum, and then introducing his thumb into the mouth pressed heavily against the tooth (which was a large molar). The man winced for a second as I heard the "click" of the separation, but almost before he could cry out, the dentist gripped the tooth with his forefinger and thumb and with very little violence pulled it out. The gum bled considerably, and I examined the tooth so as to satisfy myself that there was no deception. It had an abscess at the root of the fang, and was undoubtedly what it professed to be. When the operation was over, the patient washed his mouth out with *cold* water, paid fifteen cash and departed."

Report of the Medical Missionary Society in China for the year 1874.—Canton.

We have a report of the Medical Missionary Society in China for the year 1874. The thirty-sixth annual meeting of this society was held at Canton on the 21st January, when the usual statement of its position was read. The receipts during 1874 had been $2,163, and the expenditure $1,761, leaving in hand a balance of $402. The medical report is, as usual, a record of valuable work done. Nothing has occurred to interfere with the work of the hospital in Canton, where a great number of patients have been treated. The dispensary at Sai-nam has also continued its work without intermission. The signs were once or twice torn down, but it is thought this was done more from mischief than from actual enmity. The dispensary at Tung-kun, which has been twice destroyed by the mob, has been re-opened under better auspices. The Rev. E. Faber writes:—"Tung-kun city is the most populous of all district cities in the Canton Province. It is also surrounded by extended suburbs. The fierce character of the Tung-kun people is sufficiently known. The Chapel and Dispensary there have been twice destroyed by the mob. But the aspects are now pretty favourable, and there is less opposition in Tung-kun at present, than in many other places. The inhabitants appear to me even more interesting than in the surrounding districts. Several trips have been made in the country from Tung-kun city. Shik-lung has also been visited four times during the year. There, the former Dispensary is in ruins yet, only for want of funds and reliable assistants. The Tsang-shing, Lung-mun, Shun-tek and Heung-shan districts have also been traversed, and the principal cities and market towns visited. Preaching the Gospel did not meet with any opposition worth mentioning. Only very few Chinese are, indeed, real enemies to the foreigner; commonly from ignorance, the great mass is indifferent, others take an interest from curiosity, and a few become friends. But a very great task remains to be done yet, till long rooted prejudices are fully eradicated. That the benevolent work of the Medical Missionary Society serves to this end, there can be no doubt." Fuk-wing has been a mission station for some years, and a dispensary has been lately opened there, and has afforded much relief. The Committee pay a warm tribute to the zeal and care with which Dr. Kerr works the hospital at Canton.

Annual Report of the Presbyterian Mission Press for the year ended December 1874.—Shanghai.

We have before us the annual report of the Presbyterian Mission Press at Shanghai, for the year ended in December last. The Superintendent tells us that the year just closed has been a quiet, but prosperous one. "Having given himself "wholly and heartily to this work, not "because it is, humanly viewed, an im-"portant work; not because it is a great "work; nor yet because it is a benevolent "enterprise of a missionary society; but "because it is the Lord's work; and striv-"ing to control and direct so that every-"thing pertaining to it may be done in "accordance with the will of the Master, "and in the Master's way," he "feels "specially grateful for, and encouraged by, "the measure of success which has at-"tended his administration of the affairs "of the Press." More work has been done than in any previous year; and, partly with the help of a new cylinder machine, and partly because a larger proportion of the books printed has been Chinese—we are surprised at the omission to recognise the aid of Providence—this greater amount has been done without any increase in the staff.

A difficulty occurred at the opening of the year, through the resignation of Mr. Chang, who had for eight years held the post of general foreman. "He was a consistent Christian man, and proved himself always faithful, although not a man of very great ability." The only man who could be found to take his place was Mr. Tu, who had been his assistant. But though Mr. Tu is much more energetic and efficient, he is not a Christian. "His religion is that "of a moralist (Confucianist). He had "always been upright and honorable, but, "because of his value in other depart-"ments," Mr. Mateer "hesitated to put the "money into his hands, lest lacking "Christian principle, he should be led "astray. There was no alternative, how-"ever, and it was done." It is satisfactory—though of course surprising—to know that he has thus far discharged his duties efficiently and, so far as is known, with entire fidelity.

Another interesting fact is, that "since January 1st, 1872, when the present Superintendent, young and inexperienced, took charge, the foreman of each department has been changed, and all are now young

men. The general foreman is 37 years of age; the foreman of the press room, 28; of the foundry, 26; of the Chinese composing room, 24; and the assistant general foreman, 26." Mr. Mateer explains, however, in a foot-note, that their being young is entirely accidental. He "believes in the wisdom and calm judgment of age; at the same time, being young ourselves (? himself) it is easier for us to manage young men."

The detailed reports of the work done are of course less interesting to the general public, though having value for those under whose auspices the Press is worked. On the whole, we do not remember to have been more pleased with any report of the kind, since one issued by the Hudson Taylor Mission, which we reviewed some years ago.

Outports.

TIENTSIN.

The mercantile traffic of the port is now going on as tranquilly (and it is to be hoped also pecuniarily satisfactorily), as previous to the attempt on the part of the Customs Taotai to establish a new system for the collection of the Barrier taxes. As to Sun-sze-ta himself, he continues, as before, to fill the post of acting Customs Taotai. There is a rumour to-day, however, that the Central Government have appointed in his stead an official named Jin, who was formerly Prefect here, *vice* Le Chaou-tang who was appointed last November but who has been compelled, it is said, to resign on account of ill health. Jin, is said to be at present at Paouting. I have received the Peking *Gazettes* to 31st ultimo, but no mention is made in them of the appointment of Jin as Customs Taotai here.

For some few days back, it has been the talk of the people here that the Governor-General has been moving the troops of the Southern Legion in this neighbourhood. During the last three days, knots of men have been seen crossing over the ferry at the south part of the Settlement, either dressed in long red cotton gowns, or in short red cotton jackets—who, I was told, were the men of the Southern Legion stationed at the Arsenal, which lies a couple of miles off, on the east side of the river opposite the Settlement. The men in long red gowns, I fancy, are sergeants, and those in short red jackets are rank and file. A great many of the men of the Southern Legion have also been seen going down the river in boats, or marching down the Taku road; and are said to be proceeding to the fort called Sin-chung, lying above Taku. From the brilliant color of their gowns and jackets, it is evident they are quite new; it is, therefore, to be hoped that red shirtings have, this spring, been yielding a handsome profit in the Tientsin market.

In the Peking *Gazette* of the 28th ult., there is an announcement that Tsêng Kwo-tseuen has presented his thanks to the Throne for his appointment as Governor of the Yellow river.

The training of the ponies for our spring race meeting goes on regularly every morning at the new race course—a stretch of ground situated outside the Ramparts, two miles south of the British settlement, which has been rented for one year from the owners in the adjoining village. Messrs. Bismark, Cordes, Jackson, Twinem and Meadows were elected, at a meeting of the sporting members of the community on the 10th ultimo, as stewards for the current year. Thus everything, as far as we can see, is going on favorably for a successful meeting in the early part of May. We have only one drawback in racing matters, and that is a paucity of light-weight jockeys. This arises, it is imagined, chiefly from the climate and alimentary productions of Tientsin being so extremely favourable to the development of the physical frames of the human race; in consequence of which our sportsmen become rapidly placed beyond the scale-weights required by the weigher. Under these circumstances, it will be supposed then that we naturally welcomed the appearance of a light-weight, as an addition to our community, last autumn; and who, after being here only a very short time, shewed marked proclivities for donning racing colours. The gods ruling mercantile events, however, decided otherwise; and, when spring came, our friend was relegated to a Shanghai office tripod, to the extreme regret of every one here.

On the 31st ult., the Tientsin spring shooting commenced; and if we may judge from the presents of snipe which our crack Tientsin shot bestowed that evening on the community, the sport must have been remarkably successful, and deserved to be recorded in *The Field*.

Weather much warmer. Thermometer stood at daylight 45° Fahrenheit.

3rd April.

His Excellency Mr. Wade, H. M.'s Minister, and family arrived at the Consulate here, yesterday, from Peking, and will proceed to-morrow by the S. S. N. Co.'s steamer *Paouting*, on to Shanghai.

Everything here is quiet in regard to political affairs. The Customs troubles are at an end; and business goes on in the former unruffled manner. The permanent Customs Taotai, whoever he may be, has not yet made his appearance. No notice has yet been given to the Consulates, of the demise of the late Empress, the wife of the Emperor Tung-che; and visits can, as in ordinary times, be made to the territorial and Customs officials by the Consuls of the port.

Amongst the foreign residents, the chief topic of conversation is the murder of Mr. Margary in Yunnan. As you will, however, be better informed on that matter than we can be here, it is unnecessary for me to say anything further on the subject, beyond expressing the general regret felt at the sad event, and the sincere hope that all concerned in the murder will be punished. I am told that H. M.'s Minister has taken the necessary steps for a strict investigation into the affair, and I have no doubt he will insist upon the Central Government doing full justice in the matter, by punishing all concerned in Mr. Margary's death.

We are enjoying fine weather. Yesterday, swallows were seen here for the first time this year, which event tells of warm weather; yet this morning we had one-tenth of an inch of ice, the production of the past night.

6th April.

In the Peking *Gazette* of the 6th April, the following news of interest to foreigners is found. An Edict of the 6th April announces that Li Hung-chang, Governor-General of Chihli, had addressed the Throne, requesting the Imperial Regents to issue urgent commands that the newly appointed Customs Taotai for Tientsin immediately repair to his post, &c., &c. The Imperial Regents thereupon command that the Governor-General of the Two Kwang, and the Governor of Kwangtung, order Le Chaou-tang, the said Tientsin Customs Taotai, who is at present in Kwangtung, to repair forthwith by sea to Tientsin, otherwise he will incur the heavy penalty of dismissal.

PURITAN.

9th April.

HIOGO.

The Athletic Club purpose holding their annual sports on the 24th instant, and a scratch Regatta on the 24th May.—Some Chinese gave an amateur theatrical performance on the 27th, which is said to have been successful. The only drawback was with the orchestra, which either got tired or fell under the influence of samshu before the commencement of the last piece.—With reference to a rumour which we quoted last week from a Yokohama paper, the Osaka correspondent of the *News* says:—The rumours born of the recent shooting accident at Sakai afford an apt illustration of that tendency to exaggerate of which the famous tale of the "Three black crows" is typical. The account given of the affair by one of the native papers in Yedo, a translation of which went the rounds of your Yokohama contemporaries, was that a foreigner at Osaka had accidentally shot and killed a boy at Sakai, and that, on the *Gaimusho* representing the case to the British Consul, the latter had fined the foreigner 5,000 yen! This yarn must have gone by sea, but the one which doubtless ere this has reached the Capital overland must be dreadful, seeing that before it had traversed the whole of the neighbouring province of Kishiu, a foreigner living there was assured that two or three Japanese had been killed by some foreigners and that the latter were all tied up in Sakai! Well, the truth is that the poor boy who was wounded was only slightly injured, and all that the Governor of Osaka asks for is the reimbursement to the lad's father of eleven yen, to defray the expenses which the latter has been put to.

YOKOHAMA.

The *Mail* corrects itself with regard to the number of articles from which fiscal duties had been removed. Instead of 250 articles, the actual list comprises 1,564, "which," adds the *Mail*, "though far too long for publication, is interesting as exemplifying the extreme minuteness to which the system of taxation in this country has been carried." The edict announcing the change is signed by Sanjo Saneyoshi, and also contains an intimation to the renters of land that there will be no change in the amount payable to the Government, either in rice or money, for the rent of land.—A gale of some violence passed over this section of Japan, on the 25th ultimo, during which the sky was unclouded. The ship *Evelyn* which sailed from Yokohama bound for Kobé on the 24th, returned on the 25th, one of her crew being disabled with a broken leg. Several of her sails were split in a squall she met with outside Cape Sagami.—In view of his shortly intended departure from this country, M. Berthemy, Minister for France, was entertained at Hamagoten on the evening of the 25th ultimo, by the Prime Minister and the other members of the Cabinet.—A native newspaper states that the Loochooans have been summoned to Yedo to answer for the offence of having paid tribute to China.—According to the *Choya Shimbun* which the *Advertiser* describes as being "usually a well-informed native journal," Japan is going in for more reforms. H. I. Majesty has appointed Commissioners to investigate and report upon the present system of administration, and it is hoped that the country will benefit by the reforms which may be expected to result from their labours.—Ten persons have already announced their intention to contribute a display of Japanese specimens of porcelain, bronzes, lacquer-work, ivory, &c., of the value of $184,000, to the forthcoming centennary Exposition at Philadelphia.—A fire broke out on the 26th ult., near Tokio, and destroyed fifty houses.—The

Gazette says the case of the collision between a Japanese junk and the P.M.S.S. *Oregonian*, was resumed before the U. S. Consular-General Court with Assessors, on the 23rd ult., and was again adjourned, subject to five days' notice from either party.—The honesty of some of the Japanese lower classes appears to be becoming proverbial. Another finding case in reported in the *Gazette*, in which Mr. W. J. White, a teacher in the Eigo-Gakko, lost a pocket book, containing 140 yen and several important documents. Some three weeks afterwards, he received a notification from the British Consul, requesting his attendance at the Central Police Station. On repairing thither, he discovered that his pocket-book had been picked up by a jinriksha coolie. Mr. White found everything as he had left it, not a coin being missing. He rewarded the finder with 50 yen. As if to counteract the good impression thus created, the next paragraphs describe seven burglaries in Yokohama, between Friday the 26th ult., and Monday the 29th, besides several petty larcenies in private houses.—The *Herald* reports the following occurrence, of importance to shippers:—The German barque *Mathilde*, which arrived here on the 16th ult., with a general cargo from Hamburg, consigned to Messrs. Simon, Evers & Co., brought, amongst other articles, some casks of chloride of lime. By some means or other, probably the motion of the vessel is heavy weather, the chlorine gas escaped from the casks, to the serious damage of a part of the cargo. Up to the present, about 18 bales of cloths have been landed from the vessel, the colour of which has more or less been discharged by the gas, It is expected that other goods will be found in a damaged condition from the same cause.—The telegraph line to Hakodate is now open to the public. The *Herald* bewails the closing of the Deutsche Bank at Shanghai, and understands that a similar course will be followed by the branch at Yokohama, and then goes on to say:—"The unsatisfactory state of trade in the East during the last two years, connected with declining exchanges, has undoubtedly disappointed the sanguine expectations of the directors in Berlin, who were led to believe, from the results obtained by the Banks in the East a few years ago, a more favourable business than has been actually realized. The Deutsche Bank in Yokohama as well as in Shanghai has been very carefully, and it may even be said, successfully managed, in so far as no actual loss has been sustained. If these branches could only hitherto earn a small dividend, it was no more than could be expected in the present dull times, and we regret very much that the experience of the two last years alone should have been taken solely into account at Berlin."—An attempt is being made to organize a Canoe Club. A meeting of the Committee of the Yokohama Annual Regatta was held on the 30th ultimo, when the usual routine business was transacted.—A man and woman have been sentenced to 60 and 50 days' hard labour respectively by the Shihosho, for stealing rose bushes from the garden of Mr. J. J. Jarmain. The prisoners have been in gaol since the 12th January last, but were only tried and sentenced a few days ago.—Burglaries are still the order of the night in Yokohama, and among the last places visited in the Hotel du Lonore, the billiard-room of which was seriously despoiled.—The *Gazette* says the three Lew Chew officials, whose arrival in the Capital has already been spoken of, were presented to the Mikado at the Imperial Palace on 28th ultimo.

HONGKONG.

The *Daily Press* of the 1st April contains a report of a banquet given to Mr. Mitchell on the previous evening. There was a large attendance. The chair was taken by Mr. Ryrie, with Messrs. Tonnochy and Cohen in the vice-chairs.—Regarding the loss of the *Yuen-tsze-fei*, the same paper says:—The *Yesso* reports that the steamer *Yuen-tze-fei*, bound from Amoy to Shanghai, had gone on shore on Dods Island in a thick fog on Sunday morning. The Company's steamer *Douglas* proceeded to the scene on Monday morning, to render what assistance she could, and, on returning at 5 p.m., Captain Burnie reported the *Yuen-tze-fei* a total wreck. All hands were saved, and returned in the *Douglas*. The wreck was on the top of the rock and under water. The wreck of the steamer *Yuen-tze-fei*, which was sold by auction on the 30th ultimo, brought $1,510. The cargo fetched only $10. The ship is a total wreck.—The *China Mail* learns that Mr. Kleinwachter, Commissioner of Customs at Canton, has been transferred to Amoy on promotion, and that Mr. Hannen will replace him at Canton.—The Garrison sports were concluded on the 1st.—Both papers speak warmly of Mr. Margary, and the *Mail* suggests that, if the Indian Government see fit to read the Chinese a lesson, they have before them a field in which much credit can be acquired at a minimum of danger. The Chinese of Yunnan, like their countrymen elsewhere, simply require a lesson, and this lesson might be more easily taught them than some people would imagine. It is extremely probable that a threat of foreign interference would again rouse the whole Mahomedan population against the Government, which in view of such a danger might deem it prudent to enter into negociations.—In the case of the *Ava* and *Rona*, a motion was made in the Vice Admiralty Court, on the 3rd instant, to determine which party should bear the costs of the appeal from the Report of the Registrar and Merchants. At the suggestion of the Chief Justice, the motion was adjourned *sine die* to enable the parties to come to an agreement.—The Hongkong A. D. C. gave a successful performance on the 5th inst. The piece selected was "the Ticket of Leave man." The band of H. M.'s 80th Regt. formed the orchestra.—The officers of the *Audacious* were to give a theatrical performance on the 12th, in aid of the proposed Sailors' Rest House.—The Champion Cup was to be shot for by the Rifle Association, on the 8th.

ACHEEN.

Since the capture of Longbatta, which no doubt was a very severe blow to the Achinese, the Dutch have been gradually extending the range of their fortified posts, encountering much less resistance than formerly. Yet disease has made sad havoc in the Dutch camp, and although a couple of days previous to the date of our latest advices, the mortality had considerably decreased, still the state of health continued unfavourable. It is not so much cholera, as fever and dysentery that prevail at present, more especially in the Kraton. We are informed, however, that barracks are in course of construction upon a healthy plain situated outside the Kraton, and this will no doubt have a beneficial effect upon the sanitary condition of the troops. In the majority of the various posts surrounding the Kraton, the troops enjoy good health, which is probably partly owing to the presence of good well-water.

The relations between the Dutch and the States on the North and East Coast, are gradually becoming more satisfactory, and in many of the chief places where the Dutch flag is hoisted, trade is flourishing and the inhabitants seem to reconcile themselves with the supremacy of the Netherlands. The works at Pulo Brass [where the Lighthouse is in course of erection] are progressing rapidly, and a portion of the iron pier in Acheen Roads is already constructed.—*Penang Gazette.*

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

March 18th.—(1)—A decree, expressing the Imperial regrets on receipt of intelligence of the decease of Tu-hing-·h, Military Governor of Shêngking. A trusty and devoted public servant, he distinguished himself in former years by his military achievements in the operations against the rebels in the central and North-western provinces; and having lately asked for leave of absence owing to the state of his health, it was hoped that he might be restored to strength and long continue one of the supports of the State. Posthumous distinctions are decreed in his favour, all penalties recorded against his name during life are remitted, a grant of Tls. 1,000 for his funeral expenses is ordained, and his son and grandson are to be presented to the Throne in due time.

(2)—A Decree. Let Ts'ung-shih (President of the Board of Punishments) become acting Military Governor of Shêng-King. On his arrival at Moukden, let Chih-ho hand over charge to him.

March 19th.—The whole of to-day's *Gazette* is occupied with a memorial from the Governor of Kwangtung, on the proceedings in a murder case. Three individuals of the family name of Siao had murdered six of their relatives in a most ruthless manner, in consequence of disputes about some land. The ringleader had escaped and was alleged to have committed suicide, and it was stated that his body had been devoured by wild beasts. One of the two remaining delinquents has been executed, and the second is kept in prison to serve as a witness in case the efforts made to apprehend the missing ringleader should prove successful.

March 20th. — The Governor-General of Chihli reports the issue of proceedings in a case of appeal by inhabitants of the department of Tsun-hwa, on the ground of irregularities in the exaction of feudal service. The facts of the case are as follows:—The Imperial mausolea lie within the department in question, and as two Government posting stations are included within its limits. the service requirements are of an onerous nature. The grass required (for fodder) is supplied by the population of the district, the amount being 1,364,300 catties in ordinary years, and 1,470,420 catties in intercalary years, for which payment is made at the rate of one standard *cash* per catty. The actual grass is delivered by the villages which lie within a convenient distance from the mausolea; whilst in the case of those more remotely situated, a commutation is paid in at the rate of 4 *cash* for each catty deliverable, inclusive of the one *cash* payable by Government on account of the grass. The payment for each 100 catties at the above rate is estimated as equivalent to two *tiao* (490 *cash* of local currency.) A sum of Taels 264 is, moreover, raised periodically, by assessment, among the inhabitants, to meet certain charges in connection with the examinations. The villagers are bound, in addition, to furnish 39 large carts, whenever required, for the transport of materials for the public works at the mausolea. Complaints lodged at Peking, accusing the local authorities of oppressive action in the collection of these assessments, have led to the present enquiry. The prime mover in the affair is declared guilty of misrepresentation and falsehood, and sentenced to the mitigated penalty of 100 blows and deportation for three years. At the same time, after making all allowances for the necessities of the position of the authorities, whose revenue from land-tax is extremely small, whilst their liabilities for Government service are heavy, so that the fodder

assessment is their principal resource, it is nevertheless improper that additions should be made to the amount levied. The Governor-General decided that 390 *cash* shall henceforward be struck off the amount payable per 100 catties as above mentioned, and some other slight reductions made in the public burdens.

March 21st.—The Governor-General of Chihli, Li Hung-chang, memorializes, supporting the request of the Taotai Ting Show-ch'ang for leave to return to his home, to complete his three years' period of mourning. On returning from Peking to Paouting Fu, on the 6th February, the Governor-General found an application from Ting Show-ch'ang awaiting him, in which this request was preferred, in fulfilment of the duties of filial mourning. The Governor-General states that, since the year 1862, the ex-Taotai has served under his orders, as a leader of braves, in various campaigns against the rebels; and having been appointed acting Taotai of Tientsin in 1870, just as disturbances had occurred between the people and the [Roman Catholic] converts, his action in soothing the troubled state of the public mind and in enforcing order was equally marked by firmness and benevolence. After being confirmed in the post he held, his exertions, during years of distress from inundations, earned for him grateful acknowledgments on every side. His father's death having occurred in November last, he firmly withstood the Governor-General's proposal that, after escorting the remains to his native place for interment, he should return to Chihli to hold an unattached appointment; and the Governor-General, consequently, unwilling to run counter to his filial sentiments, negatived, in due official form, the solicitation presented to him by a large body of the notables and elders of Tientsin, who petitioned for his retention there. Subsequently, however, a special decree was received, sanctioning the employment of Ting Show-ch'ang on unattached duty in Chihli, after the expiry of the 100 days' deep mourning, with the proviso that this should not be construed as a precedent in future cases of the kind; and at the Governor-General's audience of leave on the 2nd February last, their Majesties the Empresses condescended to enquire respecting the favourable reports which had reached them concerning Ting Show-ch'ang, as a public servant. The Governor-General, in reply, stated the actual facts of the case. Having now received his application for leave to retire to his native place with his father's remains, and to fulfil the three years' period of mourning, the Governor-General feels bound to lay it before the Throne.—Rescript: We have already sanctioned the application of the Board of Civil Office, requesting that he be not required to remain on duty in Chihli. (Note.—This terminates the curious contest between the desire of the Governor-General to retain by his side a trusted assistant, and the imperative rule entailing retirement from office on the death of a parent, which has given rise to a spirited contest between different members of the Censorate. See *Gazettes* of Feb. 21st and 23rd, and March 1st. Orthodoxy has satisfactorily triumphed over innovation in the present instance).

March 22nd.—(1) A Decree. Let Shao Hêng-yü be permitted, in accordance with his request, to retire from his office as Governor of Shensi, on the ground of ill health. Let Tsêng Kwoh-ts'üan 曾國荃 (brother of the late Tsêng Kwoh-fan) succeed to the vacant post.

(2)—A memorial by the Governor-General and Governor of Fuhkien recommending, for appointment to the vacant post of Prefect of Ts'üan-chow Fu, the present Prefect of Yen-p'ing Fu, named Sü Chên-yao 徐震耀, aged 39, a native of Peking, who is selected as combining all the requirements which are called for in the laborious and difficult post in question. Having the port of Amoy within his jurisdiction, with its foreign commercial relations, the Prefect's duties in the way of enforcing order and at the same time maintaining a soothing sway are especially important.—Rescript: Referred for the consideration of the Board of Civil Office.

(3) The Governor of Chehkiang memorializes, reporting the result of commissions appointed to survey the works of restoration required for the government postroad and bridges in the Province, which have fallen into dilapidation in consequence of the rebellion. Detailed particulars are given with respect to different sections of the work declared as necessary, the importance of which to the trading community is at the same time referred to. The estimates for repairs to roadways and bridges are given as in "foreign money" (an unusual feature), and the total statement amounts to Mexican dollars 66,970, beside *cash* 34,160 thousands, exclusive of cost of piles and the purchase of land for the excavation of soil for filling-in, which it is difficult to estimate in advance. There being no funds available from other sources, it is proposed that the necessary amounts be disbursed in the first instance from the *li-kin* revenue, to be made good hereafter from any surplus funds that may accrue, and it is requested that the Provincial Government may be exempted from the requirement of sending in detailed accounts for audit at Peking.—Rescript: Let the Board of Revenue take note.

Public Meetings.

NORTH-CHINA INSURANCE COMPANY.

The sixth ordinary meeting of shareholders in the above Company was held on the 9th April. Present—Messrs. E H. Lavers, (chairman), F. H. Bell, A. G. Wood, and J. Hart, directors; Messrs. C. Thorne, Tate, Gubbay, Francis, Hanssen, Lucas, Mackintosh, Schroers, Allum, McGregor, Tucker, Forster, D. Brand, Overbeck, Seligmann, Lindsay, Maclean, A. Little, E. Cameron, J. A. Taylor, J. F. Seaman, Dalgleish, Howie, and H. S. Morris, Secretary—representing 450 votes.

The CHAIRMAN opened the business by calling upon

The SECRETARY to read the notice convening the meeting, and afterwards the minutes of the last meeting, the latter being confirmed and signed.

The CHAIRMAN then said the report of the Directors and statement of accounts which had been put before the shareholders, they had endeavoured to make as clear and explicit as possible, and he did not know that there were many explanations or remarks to be made by him with reference to them. He might say that the result of the half-year's business had been very satisfactory, although it must be borne in mind that the losses and claims during that period were very heavy, amounting to Tls. 311,058; and, so far as was known, the subsequent settlements and dependencies would require Tls. 102,000. But owing to the support given to the office during the same period, premia, interest, commissions and transfer fees, amounted to Tls. 508,616, leaving a balance to the good of Tls. 141,844. The risks outstanding amounted to about Tls. 2,000,000. They knew by telegram from London, what the risks amounted to there; and they of course knew what they were in Shanghai; the total being as he had just said about Tls. 2,000,000. He thought he must congratulate the Company on the statement of its affairs at the termination of the term 1872-1874, which he considered must be regarded as having been a most successful one throughout. In the first year, 1872, the total premia was Tls. 969,000; in 1873, Tls. 738,000; and in 1874, Tls. 857,000. As the shareholders knew, the Directors had declared very liberal dividends, and they hoped at the end of the present month to make a further payment. Before putting the report and statement of accounts to the meeting, he would be glad to reply to any questions which the shareholders might wish to make regarding them.

A general conversation ensued, but no questions were asked.

The CHAIRMAN said, if there were no questions, he would put this resolution to the meeting—

That the report of the Directors and statement of accounts for the half-year ending 31st December, 1874, as printed and presented to this meeting, be passed.

Mr. F. H. BELL seconded the motion, and it was carried without dissent.

REPORT.

The Directors have now to present to the Shareholders the Sixth Half-yearly Report, shewing the position of the Company on the Thirty-first December last, at which date the business of the term 1872-74 was concluded.

From the annexed Statement of Accounts, it will be observed that the Company had then a Credit balance in hand of Tls. 559,156.49, after carrying forward the sum of Tls. 141,844.00 from the present Working Account, in addition to the Capital (Tls. 300,000), and also the amount reserved out of the profits of the years 1872 and 1873 (Tls. 221,961.37.)

With reference to the receipts of Premia during the six months under review, it is satisfactory to note a considerable increase as compared with similar periods of the two preceding years.

The payments on Account of Losses and Claims, amounting to Tls. 311,058.33, include the several heavy losses alluded to in the last report; so far as at present known, further settlements and claims in course of adjustment will absorb about Tls. 102,000.

Some salvage it is anticipated will accrue to the Company from the appeal to Privy Council in the *Rona* and *Ava* case.

The item of Tls. 12,308.60 difference in Exchange, it should be explained is only an apparent loss, and is accounted for by the fact that remittances to London have been made at lower rates than that adopted by the Directors for keeping the Company's Books.

Since the 31st December, 1874, Tls. 300 per share, the equivalent of the paid-up Capital, has been returned to the Shareholders, and the Directors are awaiting advice of the termination of the principal current risks to enable them to declare a Dividend for the year 1874.

Mr. James T. Brand resigned his seat at the Board, owing to his departure for England.

Mr. C. THORNE said, from the manner in which the meeting had received the statement of accounts just passed, it was very clear the shareholders possessed confidence in the Directors, and he felt sure they could not do better than leave the entire management of the closing of the business of 1872-1874 in their hands. He, therefore, moved—

That the Directors be empowered to wind up the affairs of the Company for the term 1872-1874 as speedily as possible, and distribute the funds in accordance with the Deed of Settlement, without further reference to a meeting of shareholders.

Mr. J. P. TATE seconded the motion.

The CHAIRMAN, in submitting the motion, said with reference to it, he might mention that the Directors would call a final meeting to pass the accounts which would be rendered. He then put the resolution, which was carried *nem. diss.*

There being no other business, the meeting was breaking up, when

The CHAIRMAN said, before they dispersed, he might say that the new Company was well launched. The capital was all paid up, and business was progressing satisfactorily.

Mr. FRANCIS moved, and Mr. MACLEAN seconded, a vote of thanks to the Chairman, which was carried as the meeting broke up.

THE CHINESE HOSPITAL.

A meeting of Subscribers to the Chinese Hospital was held on the 13th April. Present, G. F. Seward Esq., U. S. Consul-General, in the chair; R. I. Fearon, Esq., Hony. Treasurer; Dr. Johnston, Revs. W. Muirhead, J. Thomas, Dr. Yates, Dr. S. Wells Williams, Messrs. Purdon, Glover, Wylie and Francis.

Dr. JOHNSTON read his report of the working of the hospital for the past year.

The new hospital was completed and ready for occupation in June, and the patients were transferred to it on the 7th of that month. The attendance of patients during the year was good; as a rule, the majority belonged to the middle and lower classes, but many of the educated classes were seen as well. Indeed, there is a noticeable improvement in the class of people who come for advice year by year; 538 patients were treated in the wards, and 12,339 new cases prescribed for in the dispensary practice during the year; 3,364 children were vaccinated in the native city, and it is satisfactory to notice that vaccination is making great progress among the Chinese generally. In Shanghai, it has to a large extent taken the place of inoculation, and constant demands are made at the hospital for supplies of lymph for distant parts of the province; 26 cases of opium poisoning were treated during the year, and sub-cutaneous injection of atropine has been found a most efficacious remedy. Judging from Dr. Johnston's experience, the loss of life from opium poisoning in China must be appalling. 500 cases of attempted suicide by this means, have come under his own notice during the last ten years. Many cases of severe accidents were treated during the year, among others 4 severe cases of burn from the Loong-hwa powder mill, 12 cases of carriage accident, 12 cases of gunshot wounds inflicted during the riot in the French Settlement, &c., &c. 340 opium smokers were prescribed for, but experience of these cases is not encouraging. Many abandon the habit for a time only, to return to it again at the first favourable opportunity. Poverty and bad health are the usual reasons given for wanting to break it off; but sometimes the moral degradation and apathy caused is also pleaded. In conclusion, the report acknowledges the assistance of Drs. Henderson and Little, the former of whom was present at nearly all the surgical operations. The native house surgeon, Chungfoo, is highly spoken of.

The CHAIRMAN asked to what Dr. Johnston attributed the improvement in the class of patients.

Dr. JOHNSTON assumed it was partly owing to the increasing prosperity of the place. During the rebellion, there was a great deal of poverty. But it was, no doubt, partly owing also to the hospital being more known and more largely availed of. The Chinese saw the advantages of Foreign treatment, they had nothing to pay, and they were glad to come. Formerly a great crowd of beggars used to come, in many cases merely to get food. Such cases were refused, unless in case of real sickness, as to receive them would be to convert the institution into a poor-house, for which it was not intended.

Mr. MUIRHEAD agreed as to the causes assigned by Dr. Johnston; he was very frequently in the waiting room, and noticed a number of respectable people pass through into the surgery to be treated.

In reply to Dr. Williams, Dr. Johnston said the Chinese did not often offer to pay; they were not fond of giving. There was one case, however; some friends of Mr. Overbeck's compradore were treated, and the latter collected and handed in a donation of $250.

Mr. FEARON said the question of asking money from the Chinese had been discussed at several previous meetings, and the feeling seemed to be adverse.

Dr. WILLIAMS suggested that they probably did not attempt to give, because they were told by the servants that they were not expected to pay.

Mr. MUIRHEAD said the case was just like that of bookselling, which had been lately commenced. The Chinese had been accustomed for a long time to have books given them, and had got to look on medical attendance in the same light. The effect of charging would no doubt be to decrease the attendance for a time.

Dr. WILLIAMS said one fear was that it would be a temptation to servants. When they knew that the managers of the hospital would be glad to have the benefits received by patients, acknowledged, they would try to get fees for themselves. A case in point had occurred at Dr. Parker's hospital at Canton. Everything was done there to encourage free access by all classes of Chinese. But six months after the hospital was opened, Dr. Parker got to know that the servants were in the habit of exacting 10 *cash* from every man, woman or child who passed the door.

The CHAIRMAN said the difficulty would be more easily met here than in Canton, with the assistance of police detectives.

Dr. JOHNSTON said it was hardly necessary yet to commence asking fees; but the question was one which would probably come up in a few years. At home, the habit of giving gratuitous advice at hospitals was found to be so much abused that the profession had to take the matter up and bring it before the Medical Council. It had now been recommended to establish dispensaries, where poor people would pay a little for medicine, which would defray expenses and give junior medical officers some salary. It was found to be a growing evil that people who could afford to pay availed themselves of gratuitous advice. In the case of this hospital, no doubt half of the Chinese prescribed for could afford to pay; the other half looked poor and probably could not afford. It was an important matter, but there was no need to make the innovation at present, unless funds proved deficient, and this method of supplementing them were adopted. Again, it must be remembered that Chinese merchants subscribed now, because it was a charity; if the patients were asked to pay, the merchants would probably withdraw.

Mr. THOMAS said the Committee were not yet able to say what the Guilds would give annually, but it would be a great pity to think of charging patients, or to take steps in that direction, till they saw what the Chinese merchants would do.

Mr. FEARON remarked that the Chinese had given handsome donations to the new building.

The CHAIRMAN asked whether it would not be possible to put forth some notice that the hospital was supported purely by charity, and was willing to receive subscriptions.

Mr. THOMAS suggested translating an abridgment of the report and publishing it in the native newspapers, with an intimation that they would be glad to receive contributions.

Dr. WILLIAMS said there was a foundation for thinking the Chinese would subscribe largely, from the idea they had that donations on such an account went to their credit with God. That was the Buddhistic idea.

Mr. THOMAS feared that would be making a profit out of their superstition.

Dr. WILLIAMS dissented.

A great deal of conversation ensued on the subject, in the course of which Mr. PURDON suggested the insertion of a permanent notice in one of the Chinese newspapers, inviting subscriptions; as well as the abridged report, which Mr. MUIRHEAD expressed himself willing to translate.

Dr. YATES said the Chinese had a way of raising subscriptions which would be very probably effective. That was to hang a large board, say 6 feet by 4 feet at the entrance to the hospital, on which they would post up the names of each subscriber. The Chinese liked to see their names in print, and when some one saw that another had given 500 *cash*, he would determine that he was as good as the donor, and would given 500 too. This would get up competion; all would do it because one man did it. That plan located the subscription; the Chinese would see it was for a hospital. If they saw reference to it in the paper, they would not know where it was, except those who had been in the hospital. Many too would put up their names for a thank-offering.

Dr. WILLIAMS remarked that this practice prevailed at the Chinese temples, but it was sometimes abused there. Certain

well-known names were put down with "not paid yet" opposite to them, whereas the man never knew his name was down.

Dr. JOHNSTON said it was to be remembered that the hospital had hitherto been a Foreign charity, and he presumed it was intended that it should remain so. If measures were taken to beg widely among natives, it would lose that character. Still, it was desirable to get subscriptions from Chinese who came for advice, and so lessen the cost of maintenance.

Mr. FEARON suggested the matter should be left to the Committee to consider and decide.

The CHAIRMAN understood that Mr. Muirhead's proposal to translate an abstract of the report was agreeable to the meeting, and also that a permanent notice should be inserted in one of the Chinese papers, mentioning the hospital and inviting subscriptions.

This appeared to be the general feeling, and after some further discussion the matter was left to the Committee.

Mr. GLOVER had only heard of the meeting yesterday, and had not been able since to see Tong King-sing, to learn how much he had collected. He had however seen his head-man, who said he believed some subscriptions had been obtained. When he (Mr. Glover) gave Tong King-sing the book, he had seemed willing and glad to do what he could.

Mr. FEARON presented the accounts, which had been audited by Mr. Miller and distributed to every subscriber.

BUILDING ACCOUNT.

	Tls.
Paid Chang Yuen Fong, contractor, for building	5,080.00
„ H. Lester Esq., architect, commission, 7% on Tls. 5,950,	416.50
„ Advertisement, acknowledging Chinese donation	1 13
„ Sung Shing Cheung, for Lodge, gates, dead house, and railing	208.00
„ Committee's order for building kitchen and wall to native doctor's house, drain &c.,	50.53
„ For carpenters' and bricklayers' work, and for guttering and down pipes	107.40
„ H. Lester, Esq. commission on payments for extra work done	14.00
„ Municipal Council, for permit to make drain	5.00
Taels	5,882.56

Provided for as follows:—

Bequest from the late Wm. Cameron, Esq.	1,500.00

Balance of interest	130.10
Cash transferred from General Account	899.38
Charged in General Account, the amounts per contra, Tls. 208, 50.53, 107.40, 14 and 5	384.93
Tls.	5,882.56

[The details of the General account are uninteresting and, with the subscription list, occupy too much room for our columns. The total income for 1874 was Tls. 5,254.74, and the outlay Tls. 4,745.39, leaving a balance of Tls. 509.35.]

Mr. FRANCIS asked how much of the expenditure shown was permanent, and how much might be considered special, and whether the outlay of Tls. 559 for drugs was for one year's consumption.

Mr. FEARON explained that Tls. 2,862 was expenditure connected with the new building, leaving Tls. 1,700 as the current expenditure for the year. They had sufficient drugs in hand to last till the end of the year, so the outlay on that account would be small. They might estimate the current expenses as between Tls. 1,700 and Tls. 1,800, and the current income as between Tls. 1,800 and Tls. 2,000; so there were funds enough accruing to meet current expenses. At present they had Tls. 270 in hand and had paid three months' expenses.

Mr. FRANCIS said the general result appeared to be that the new building was paid for, and that Tls. 215 of debt with which the year began, had been changed into a surplus. This was very satisfactory. He had much pleasure in proposing—

That the accounts as presented by the Hon. Treasurer be received and passed.

Seconded by Mr. PURDON and carried.

On the motion of Dr. WILLIAMS, seconded by Dr. YATES, the report of the medical officer was accepted; Mr. FEARON expressing the thanks of the subscribers to Dr. Johnston for his able conduct of the hospital, and also to Drs. Henderson and Little for their assistance.

The CHAIRMAN asked whether a number of cases did not come in from the Arsenal, and noted the absence of any subscription from it towards the amount of expenditure. He was willing to send the subscription book thither, if it were thought desirable.

Dr. JOHNSTON said a great many cases had always come from the Arsenal.

Mr. GLOVER believed that Tong King-sing had applied to the Arsenal. That was one of the sources he had suggested, when giving him the subscription book.

This concluded the business before the meeting, which broke up with the usual compliment to the Chairman.

MEETING OF LANDRENTERS AT KIUKIANG.

ANNUAL MEETING of the Lotholders of the British Concession at Kiukiang, held at the Vice-Consulate 2nd April 1875, by H. M. Vice-Consul, Walter E. King, Esq. Present:—Messrs. Portes, Hall, Anderson, Shaw, Cunningham.

The Minutes of the last annual meeting were read and confirmed.

The Treasurer of the Municipal Council presented the accounts of the past year, shewing a balance of Tls. 471.77.

THE LAND-RENTERS of KIUKIANG in account current with the MUNICIPAL COUNCIL.

1874-1875.	*Dr.*	Taels.

	„ Balance carried down	471.77
	Taels	1,252.19

Proposed by Mr. CUNNINGHAM, and seconded by Mr. HALL—

That the Accounts be accepted and passed.

The meeting then proceeded to elect a new Council, but an amendment was first proposed by H. M. VICE-CONSUL—

That the election should for this one time be for nine months, instead as hitherto for one year, in order to alter the time of the annual meeting to January.

Seconded by Mr. ANDERSON, and passed.

Before proceeding to the election, however, it was proposed by Mr. ANDERSON and seconded by Mr. SHAW—

That the meeting be adjourned till 4 P.M., as the report is not ready for presentation.

Adjourned meeting. Present, as before and H. Kopsch, Esq.

Report handed in by the Secretary of the Municipal Council, read and accepted.

Report of the Municipal Council of Kiukiang for the year ending 31st March, 1875.

Expenditure.—The receipts amounted to Tls. 1,252.19 including Tls. 69.29 balance from last year, of which sum Tls. 532.92 have been derived from Wharfage Dues. The Expenditure amounted to Tls. 780.42 including Tls. 208.18 paid on account of stone facing the bund, leaving a balance of Tls. 171.77, after deducting Tls. 300, yet due to the contractors of stone embankment to bund.

Bund.—During the high water of last summer, about 110 feet of the W. corner of the bund facing fell in, and as the safety of that end of the bund and the adjoining property depends upon the strength of the embankment, it was decided to substitute stone for the decayed wooden piling, and at the same time to repair the lower stone terrace at a total cost of Tls. 306, the work to be guaranteed for a year. The necessity of making a stone embankment to the West corner of the bund will be apparent to all, as were it to give way during a flood, the damage to property might be very great. The wooden pilings and stone jetty opposite H. M. Consulate having given way to the extent of 80 feet, it was deemed expedient to repair it thoroughly with stone, in lieu of patching the wood work, which is decaying, and sure to give way. The cost of the repairs is Tls. 150. The other parts of the upper and lower facing are in fair repair, and the spaces between the piles have been cemented and bricked to keep out water. The general repairs to the bund came to Tls. 43.77. The Council consider it inadvisable to expend much over repairs to the woodwork of the bund, as it is hoped the whole will be stone faced in due course. Trees have been planted where any have died or been destroyed.

Roads.—The bund roads have been re-metalled, and put into thorough repair for a sum of Tls. 73.06. The back (Concession) road has been planted with willows on either side, which were courteously presented to the Council by Père Portes and Mr. Anderson, to whom the thanks of the landrenters are due.

The Barrier at the East end of the bund appears to have been inadvertently erected on Messrs. Russell & Co.'s ground, but it has now been moved to within the Concession limits.

Wharfage Dues.—The Council have pleasure in reporting that the suggestions of the Special Committee on Taxation, whose report was read at the last meeting, have been brought into operation with satisfactory results. It was found that the most feasible means of collecting these dues from the River Steamer Companies using the bund was to charge so much per steamer on each entry, and to accept a commutation from merchants not connected with the river steamer business. This method has saved trouble to all parties, and appears to give satisfaction. The receipts under this heading are shewn in the accounts, and there is every reason to believe that they will be larger during the current year.

Police.—The Staff consists of four native and one European. The expenditure under this heading is a trifle more than last year, as the services of the Consular Constable were withdrawn, and another man was engaged as a higher rate of pay. The staff under sergeant Eagan, formerly in the employ of the Council, continues efficient, and as it is desirable to have a Foreign Constable at the head of the force, it is recommended that Mr. Eagan's services be retained.

J. H. ANDERSON, *Chairman.*
W. HY. SHAW, *Treasurer.*
H. KOPSCH, *Hon. Secy.*

The outgoing Council offered itself for re-election, and Messrs. Anderson, Kopsch, and Shaw were re-elected.

Proposed by Mr. KOPSCH, seconded by Mr. ANDERSON—

That in case H.M. Government resells the three confiscated lots, it will repay to the Municipal Council the arrears of taxes due thereon.

H. M. VICE-CONSUL stated that it was his intention, whenever the lots were re-sold, to recommend H.M. Government to repay the Municipal Council the amount of taxes due before confiscation. He could not however promise to recommend the re-payment of taxes from the time when the confiscation was made, as in the

first place H.M. Government only held the lots for future settlers—as had been expressly stated at the meeting of 3rd May, 1873—and did not exercise the right of voting for them; and secondly, because if the lots remained unsold for a number of years, the taxes might amount to more than the purchase money.

Mr. Anderson drew attention to the high rate of assessed taxes levied on the lots, to the present flourishing condition of the yearly income, and to the probability of still greater improvement, and he concluded by proposing—

That the assessment be reduced to Tls. 15 on each lot.

Seconded by Mr. Shaw. After some discussion and demur on the score that the reduction was premature, the motion was carried.

Mr. Kopsch advocated raising a loan to repair the bund as quickly as possible, instead of doing so piecemeal, to the amount of the yearly revenue.

The question was discussed and referred to a future meeting in the early autumn, when the effect of the flood had been seen.

Mr. Shaw proposed—

That the determination of the last meeting, viz., that Tls. 800 rental be charged for a frontage, be reconsidered, and the amount reduced to Tls. 500.

Seconded by Mr. Hall.

Amended by Mr. Anderson, seconded by Mr. Kopsch—

That the original decision of last year, that Tls. 800 be an upset piece for 500 feet frontage, be adhered to.

For the amendment 11—against it 14. Amendment lost.

Mr. Anderson then moved a second amendment, also seconded by Mr. Kopsch—

That this question be adjourned to a special meeting on the 3rd May, to allow time for due notice thereof to be given to all lotholders.

For the amendment 13—against it 12. Amendment carried, and the original motion thrown out.

Mr. Anderson adverted to the fact of there being a pontoon lying against the bund, and to the report that another would be introduced, and he was of opinion that no pontoons should be allowed without special permission from the Municipal Council. He proposed, therefore—

That no pontoons be placed before, or be attached to the bund without permission of the Municipal Council, and paying for the privilege.

Seconded by Mr. Kopsch.

Amended by Mr. Shaw—

That the question be adjourned to the meeting of the 3rd May.

Seconded by Mr. Portes. Amendment carried.

Proposed by Mr. Kopsch, seconded by Mr. Anderson—

That cargo boats belonging to non-payers of wharfage dues be taxed for the use of the bund when landing and shipping cargo from it.

Amendment by Mr. Shaw, seconded by Mr. Hall—

That this question be also adjourned to the 3rd May.

Amendment carried.

Proposed by Mr. Anderson, seconded by Mr. Kopsch—

That the Municipal Council be directed to notify to all lotholders the various questions to be brought forward at the meeting of the 3rd May, and to advertise them in the Shanghai papers. Carried.

Proposed by Mr. Anderson, seconded by Mr. Shaw—

That all merchants be requested to communicate to the Municipal Council the amounts which they are prepared to pay in commutation of wharfage dues for the ensuing year. Carried.

Proposed by Mr. Anderson, seconded by Mr. Kopsch—

That all representatives of absentee lotholders be required to hold and produce legal authority for their votes, the same to be registered at the Vice-Consulate one week before each meeting.

Amendment by Mr. Portes—

That, while admitting the future advisability of the measure, the meeting of 3rd May be excepted from its action.

Seconded by Mr. Shaw. Amendment lost. The original motion was then carried.

The usual vote of thanks to the Chairman concluded the proceedings.

(Sd.) Walter Ed. King,
Vice-Consul.

Kiukiang, 2nd April, 1875.

CONSEIL D'ADMINISTRATION MUNICIPALE DE LA CONCESSION FRANCAISE.

Séance du 31 Mars, 1875, sous la présidence de M. A. Voisin. Conseillers présents—M.M. L. Ewald, H. Maignan, E. Millot; H. Sayn, Secrétaire.

M.M. Hennequin et Hitch, empêchés, n'ont pu assister à la séance.

Communication d'une lettre de M. le Consul-Général de France, exprimant le désir de connaître les observations que suggèrerait au Conseil une série de questions qu'il se propose de soumettre à l'assemblée générale des Electeurs, avant les prochaines élections.

Ces questions portant sur diverses modifications à introduire dans les usages électoraux suivis jusqu'a ce jour, le Conseil est d'avis que des modifications de cette nature ne doivent pas être faites pour ainsi dire à la veille des Elections, et il regrette d'être consulté si tard, car il ne peut trouver, dans la dernière séance qui clot son mandat, le temps nécessaire à l'examen des questions posées par M. le Consul-Général. Le Conseil n'est pas, toutefois, opposé en principe à l'examin de changements qui tenderaient à perfectionner la constitution de l'administration municipale tout en maintenant les bases du réglement sous l'empire duquel la Concession a grandi et prospéré, et il souhaite que toutes les modifications dont le réglement d'organisation Municipale est susceptible puissent être étudiés en commun par le Consulat et la Municipalité.

Le mandat du Conseil actuel étant expiré au 31 Mars, le Président est chargé de faire connaître à M. le Consul-Général, son desir de voir procéder sans retard aux Elections Municipales.

Le Conseil décide d'attendre l'arrivée de la prochaine malle Française, avant de considérer comme ne faisant plus partie du personnel de l'administration M. Renucoli, dont le congé est expiré le 20 Mars 1875.

Discussion et adoption du Budget pour l'exercice 1875-1876.

Lecture est donnée de la lettre suivante du Municipal Council, acceptant les bases de l'arbitrage posées par la Municipalité Française relativement à la question d'empiêtement sur le Yang-king-pang:

"*Yang-king-pang Encroachment.*

"Shanghai, 29th March, 1875.

"Sir,—I have the honor to acknowledge receipt of your letter of the 24th instant, which was laid before the Board at their meeting this morning.

"The Council, while of the opinion that there are no grounds whatever for supposing that they have made an encroachment on the Creek on this side, but on the contrary they have voluntarily given up ground to widen it, as explained in my letter of 16th February last, yet, feeling as they do their position in this respect so strong, they do not object to its being made part of the question, if your Council desire it. They, therefore, agree with your Council in understanding the question to be as follows:—

"1—Is the Yang-king-pang Bund between the Rue Discry and the Rue Touranne, in its present position, an obstruction to the navigation of the Creek?

"2—Does it really prejudice the interests of property owners along the line of the Creek?

"3—Have the Municipal Council made encroachments on the North bank of the Yang-king-pang? If so, are these encroachments an obstruction to the navigation of the Creek? and do they really prejudice the interests of property owners?

"The Council suggest that Monday, the 5th April proximo, be the day appointed to submit the question to the Arbitrators, and trust that this date will be convenient to your Council."

(Sd.) "J. G. Purdon,
Chairman.

L'Administration ne se trouvant pas à même de mettre les documents relatifs à cette affaire entre les mains des arbitres pour la date désignée par le Municipal Council, le Président est chargée de l'en informer par la lettre suivante:

"Monsieur,—"J'ai soumis la lettre que vous m'avez fait l'honneur de m'écrire le 29 Mars, au Conseil, qui voit avec plaisir qui les deux Municipalités acceptent les mêmes bases de discussion pour l'arbitrage dans la question d'empiètements sur le Yang-king-pang.

"J'aurai l'honneur de vous écrire ultérieurement et de vous prévenir lorsque le mémoire de la Municipalité Française pourra être remis aux arbitres, mais, en tout cas, le surcroit de travail dans les bureaux occasionné par la clôture de l'exercice ne permet pas au Conseil d'accepter la date du 5 courant que vous proposez."

"Veuillez agréer, Monsieur, l'assurance de ma considération très distinguée,

"Le Président du Conseil,—

A. Voisin."

MINUTES OF COUNCIL MEETING ON 29TH MARCH, 1875.

Present:—Messrs. J. G. Purdon (chairman), A. G. Wood, G. J. W. Cowie, F. E. Heyden, W. Kidner, R. Mackenzie, E. Seligmann, S. D. Webb, and the Secretary.

Drill Instructor.—Letter from Sergeant J. Allen, 80th Regiment, Hongkong, asking for information about the post of Drill Instructor to the Shanghai Volunteers, read and referred to the Defence Committee.

The Cash State for the 25th March was laid on the table for inspection.

"*Sinking Fund*" *Deposit.*—It was resolved to renew the deposit of Tls. 2,000—due 31st instant, with interest accrued thereon, and to lodge a further sum of Tls. 2,000 provided for in the Budget, in the Hongkong and Shanghai Bank for a year at 5 per cent.

Encroachment—Yang-king-pang Creek.—The following letter from the French Municipal Council was read:—

[*Translation.*]

24th March, 1875.

Sir,—In the letter that I had the honor to write to you on 13th March, making known to you the points that the Conseil wished submitted to the arbitrators on the question of the Yang-king-pang encroachment, a regrettable omission has occurred in mentioning only one of the two new points—and that the most important.

The following are the points which the Conseil desire to submit to arbitration:—

1.—Is the Yang-king-pang Bund between the Rue Discry and the Rue Touranne, in its present position, an obstruction to the navigation of the Creek?

2.—Does it really prejudice the interests of property owners on the banks of the Creek?

3.—Not forwarding the memorandum mentioned by the Municipal Council in their letter of 15th January 1873, and then, later, consenting to the order being given for an iron bridge of dimensions just sufficient to connect the two sides of the Yang-king-pang as they now exist—has it not vitiated your Council's protest and allowed this Council to consider the present line as settled?

4.—Have the Municipal Council made an encroachment on the left side of the Yang-king-pang? If so, is it an obstruction to the navigation of the Creek, and does it really prejudice the interests of property owners?

It is this last point which was unfortunately omitted in the letter signed by me.

Expressing my great regret for the omission, which gave yourself and your colleagues a wrong impression of the deliberations of the

Conseil at its meeting on 12th March, I am happy, in reply to your letter of 18th March, to inform you that the Conseil do not wish to insist, as a point for arbitration, on the conclusion to be adduced from the silence of the Municipal Council, for two years, regarding the claim which they had announced in the beginning should be insisted upon.

In order to preclude all misunderstanding I beg to be permitted to repeat once again the points that the Conseil intend submitting to the decision of the arbitrators :—

1.—Is the Yang-king-pang Bund between the Rue Discry and the Rue Touranne, in its present position, an obstruction to the navigation of the Creek ?

2.—Does it really prejudice the interests of property owners along the line of the Creek ?

3.—Have the Municipal Council made encroachments on the left side of the Yang-king-pang ? If so, are these encroachments an obstruction to the navigation of the Creek, and do they really prejudice the interests of property owners ?

Hoping that the two Administrations will find themselves in a position to settle once for all, by the decision of the arbitrators, all controversy relative to encroachments on the Yang-king-pang, I beg you, Sir, to accept the assurance of my highest consideration.

(Signed) A. VOISIN,
Chairman.

[The French text has been already published among Minutes of Meeting of French Municipal Council].

And reply as under approved :—

29th March, 1875.

Yang-king-pang Encroachment.

SIR,—I have the honour to acknowledge receipt of your letter of the 24th instant, which was laid before the Board at their Meeting this morning.

The Council, while of the opinion that there are no grounds whatever for supposing that they have made an encroachment on the Creek on this side, but on the contrary, they have voluntarily given up ground to widen it, as explained in my letter of 16th February last, yet, feeling as they do their position in this respect so strong, they do not object to its being made part of the question, if your Council desire it. They, therefore, agree with your Council in understanding the question to be as follows :—

1.—Is the Yang-king-pang Bund between the Rue Discry and the Rue Touranne, in its present position, an obstruction to the navigation of the Creek ?

2.—Does it really prejudice the interests of property owners along the line of the Creek ?

3.—Have the Municipal Council made encroachments on the North bank of the Yang-king-pang ? If so, are these encroachments an obstruction to the navigation of the Creek ? and do they really prejudice the interests of property owners ?

The Council suggest that Monday, the 5th April proximo, be the day appointed to submit the question to the arbitrators, and trust that this date will be convenient to your Council.

(Sd.) JOHN G. PURDON,
Chairman.

A. VOISIN, Esq.,
Chairman, French Municipal Council.

Bund Line—Yang-king pang.—Further correspondence is passed.

March 19th, 1875.

SIR,—Your letter of 11th inst., enclosing plan shewing where you propose making certain alterations in the Bund line of the Yang-king-pang Creek on your side between the Bridges Nos. 2 and 4, has been laid before the Council.

In order that there may be no misunderstanding, the Council have drawn up a plan on an English scale, and if, as they understand, the width of the Creek will be narrowed in at the points coloured blue on the plan from 1ft. 6in. to 2ft., and increased in width at point marked red by 11 feet, the Council desire me to state that they have no objection to your adopting such line.

I have been requested to take this opportunity of suggesting that the two Councils should arrange on a common scale for plans, say 50ft. to an inch, as it would very materially assist in a thorough understanding of the plans submitted by one Council to another.

(Sd.) JOHN G. PURDON,
Chairman.

A. VOISIN, Esq.,
Chairman, French Municipal Council.

29th March, 1857.

SIR,—As there has been an evident error made in your letter of 11th March naming the bridges Nos. 2 and 4 as the points between which it is proposed to make alterations in the line of bunding, instead of bridges Nos. 2 and 3, and the same was repeated in this Council's answer (*Works* 230) of 19th instant, I have to ask that you will correct it in your letter returned herewith for that purpose, and also return this Council's letter for same correction.

(Sd.) JOHN G. PURDON,
Chairman.

A. VOISIN, Esq.,
Chairman, French Municipal Council.

Election of Councillors for 1875-76.—Messrs. A. G. Wood and E. Seligmann expressed their willingness to act as scrutineers on the closing of the Poll on the 7th April.

Correspondence.

THE YUNNAN OUTRAGE.

To the Editor of the
NORTH-CHINA DAILY NEWS.

SIR,—To the suggestions in your admirable article of this morning, with regard to the Yunnan outrage, I would venture to add another. You say nothing of the Chinese *personnel* of the Commission. The expedition, I would suggest, should be accompanied, by sea, to Burmah, with at least one high Chinese official, as a pledge of good faith. He could then travel overland with the other members of the expedition, and meet, on the spot, the officials sent direct from Peking.

AN OLD RESIDENT.

Shanghai, 10th April.

THE KIUKIANG LANDRENTERS' MEETING.

To the Editor of the
NORTH-CHINA DAILY NEWS.

SIR, —As a cursory glance at the Minutes of the Landrenters' Meeting held at Kiukiang, and published in your paper of the 10th instant, is scarcely sufficient to enable absent landowners to gain a comprehensive idea of the state of Municipal matters at that port, a few remarks on the subject may not be uninteresting to lotholders.

The accounts show the total income derived from calls to have been Tls. 729.27 (excluding wharfage dues), and the current expenditure (including stone face to front of bund, general repairs to same, and amount yet due) to have been Tls. 529.47, thus leaving a balance of only Tls. 199.80, from the sum derived from calls. Notwithstanding this, it was proposed, and the measure carried, that the Tls. 25 calls be reduced to Tls. 15 per lot, thereby reducing the income available for general expenses to Tls. 390 or Tls. 15 on 26 lots. This measure will doubtless be gratifying to holders of vacant lots, but it must be characterised as rather short-sighted. The motion appears to have been carried in view of the fact that receipts had increased from the collection of Wharfage Dues (which were imposed with the special objects of raising fund to embank the bund with stone) ; but the landrenters seem to have overlooked the fact that the repairs for one year, extending over less than 200 feet, come to Tls. 551.95, or more than the sum derived from Wharfage Dues. At this rate it would take about nine years to complete the repairs so urgently needed.

But the reduction of the calls being a *fait accompli*, at least for a year, landrenters must now look to other sources to obtain funds to defray expenses and other outlays. They are strangely divided in opinion as to the advisability of taking down the old bunding ; that is to say, some are in favour of letting it fall away ; but there can hardly be a doubt that the latter plan would be fraught with danger if adopted, as were the rotten piling to give way as the water was rising, there would be nothing to prevent the whole promenade, which is only 15 paces wide, with its fine avenue of trees, from being swept away by the Yangtse. Such a disaster would be certain to cause a great fall in the already depreciated value of property.

It is possible that the wooden piling, rotten as it is, may stand some time longer ; but to trust to it is like trusting to a broken reed ; and with the evidence of the damage done last year, and that too when there was no flood, it seems premature to have reduced the income when every available cash is needed to put the frontage in a secure state. When that is once accomplished, reduce taxation by all means, but until then it seems impolitic to have done so. Let the stone facing to the bund be hurried on as funds admit, and when that is finished taxes and dues may be lowered ; but if that work is neglected, and the present bunding were to fall in, the land owners would probably find themselves called upon to pay a heavy call to save their property from disappearing into the river.

The next thing which strikes one as being injudicious, is the proposal to reduce the amount fixed as the upset price for use of a portion of the frontage, to Tls. 500 for as many feet. It would, in fact, be surrendering a quarter of the length of the narrow bund, for exactly a quarter of the sum obtained at Hankow for a fractional portion of the enormous frontage available at that port.

The small bund at Kiukiang is of greater value to the residents, as promenade, &c., than that of Hankow, where the space is comparatively unlimited, and where the damage would be insignificant to the solid masonry of the Hankow frontage, as compared with the wear and tear to which the decayed wooden piling would be subjected at Kiukiang, from the crowd of boats and coolies that would throng the frontage let out to any steamer company.

Unless, therefore, the upset price can be obtained, landrenters would do better not to incur the risk of serious damage being done to the very weak frontage, for a sum barely sufficient to cover expense of repairs to such a length of bund.

The proposal to call on all lotholders to register their votes, appears to be a good one ; it will induce them to take more interest in the meetings, and to see that votes are used to support measures adapted for the benefit of the municipality in general.

Yours faithfully,
LANDRENTER.

OPIUM SMUGGLING.

To the Editor of the
NORTH-CHINA HERALD.

SIR,—In your report last week of the case of "Walker *v.* Malcolm," Mr Mowat is reported as recommending that an appeal should be made to the Chief Judge, to have these cases decided once for all. It seems to me that they could not in this way be decided once for all. This Municipality is not the creation of any one Foreign Government ; nearly all nationalities are interested, and have a voice. Whether the Chief Judge upheld Mr Mowat's decision, which is most likely—or, we will suppose, upset it, on the ground that the Council were not empowered by the Land Regulations to do so and so, and, therefore, anyone acting

under their orders was personally responsible; that would only be a decision in a case where the policeman concerned happened to be an Englishman; the next case might be of a German, or an American, whose judges might entertain very different views.

The object of these men engaged in this sort of Opium business for Chinese, is to get a decision that the Chinese are *infringing the Treaty;* and it appears as if that was Mr. Mowat's meaning—*i. e.* the Judge would decide whether the Treaty allowed Chinese to interfere with any Opium while in the Settlement; but even if the Judge could decide in that manner upon the interpretation of the Treaty, that, too, would only affect British subjects. The proper course would seem to be—either to bring a suit against the Council before the Consular Body, when the question could be ventilated, and perhaps a decision given; or a representation made to the Ministers at Peking. It is well known what Sir Fred. Bruce's opinion was.

It may be a very bad principle, and it is much to be regretted, that these runners are allowed in the Settlement. It is more to be regretted that Foreigners can be found to lend themselves to assist the Chinese in smuggling, and try to get Foreign Courts to support them; but until the Foreign representatives officially declare that the Taotai has no rights within these limits, the Council are bound to give his officers the same assistance they give to those of every other Power, and are bound to prevent disturbances in the street, which is all they do; and it is an injustice that their policemen should be harrassed for doing their duty. *If* there is any fault in the matter, it is not the policeman's, and it is surely the duty of our national representatives to point out with whom such fault lies.

Yours truly,

Order.

6th April.

Miscellaneous.

THE OUTRAGE IN YUNNAN.

(China Mail.)

The English-reading world are familiar with the celebrated saying about smashing up a railway director by way of obtaining reform in railway matters; and it seems as if the principle it involves is likely to be applied in the case of the unfortunate Mr. Margary's murder. Despatches have been received from H.B.M. Minister at Peking, requesting Vice Admiral Ryder's presence in the North to aid in exacting the complete satisfaction which it is Mr. Wade's intention to demand from the Chinese Government for the treacherous act of the Governor of Momein. Hence the Vice Admiral's departure on Sunday next, for an object which will command the sympathies of every countryman of the murdered man. Happily for the end to which Mr. Margary has sacrificed his life, he was not a missionary or an independent traveller, whose making away with could be explained in the ordinary way as a mere mistake of the local mob. He was travelling with the safe conduct of the Chinese Government in his pocket, and his unprovoked execution by the ruffian who chanced to be in power at Momein will have to be heavily atoned for. It is to be hoped that no excuses will be allowed to prevail in this respect. The time has come when the Chinese Government must be plainly told that it is impossible to recognize it as a sovereign power, if its own passports are refused recognition by the responsible officials of the inner provinces, and the form which any atonement should take must obviously be one that would make an impression throughout the Empire. It is of no use to content ourselves with the "recall" or "degradation" of the peccant official and the payment of a money indemnity. We had enough of that after the Tientsin massacre, when one of the scoundrels chiefly responsible was "degraded" at Tientsin, and within two years after promoted to a much higher position than that he had forfeited elsewhere. As a matter of justice to humanity, we must sternly insist upon the trial of the Governor of Momein in presence of properly deputed foreign officials, and if proved guilty see that he himself suffers the fate he inflicted upon an inoffensive and able man in defiance of the orders of his Government. But something more is necessary than this. Mr. Wade must with equal vigour insist upon the issue of an Imperial edict in the *Peking Gazette*, setting forth the crime and the infliction of its penalty in full detail, and furthermore take steps to satisfy himself that it is circulated throughout the Empire. We attach particular importance to this last point, the more so as, though of the utmost importance in Chinese eyes, it is the one regarding which Mr. Wade has in past years shewn himself least careful. And old residents will recollect the practical joke played upon him at the time of the signing of the Treaty, when not only were the copies *not* forwarded to the provinces as agreed upon, but an emasculated edition of the *Peking Gazette*, omitting all reference to the Treaty, was actually prepared for provincial circulation, while special copies containing all that was asked were forwarded to the Legations. We cannot afford to be again fooled in this way; and we believe that an insistance upon this point would do more to alter the temper of the people, and to ensure the safety of future travellers, than the infliction of the most terrible punishment on the perpetrator or perpetrators. We cannot of course ignore the *Lex talionis*. The outrage is too gross to be passed over as a mere accident of travel, and for once a provincial official has given us fair cause of provocation without the slightest chance, if we are firm, of evading its proper penalty.

From all we hear, we are led to believe that Mr. Wade is really in earnest this time, and has no intention of allowing an overtender consideration for Chinese weaknesses to interfere with a vigorous course of action. He may rest assured that the voice of the entire foreign public in China will be with him in any demands he may make. If we could rightfully demand the satisfaction accorded to our Consul in Venezuela, when the offender was sentenced by his own countrymen to suffer death by flogging for the infamous outrage he was guilty of, we are surely justified in demanding for a Chinese official, whose acts are sympathised with by his superiors and dependants, the less barbarous punishment of decapitation for a worse crime than that committed on Mr. Magee. We most sincerely trust that no namby-pamby sentimentalism will interfere to prevent Mr. Wade and Admiral Ryder from carrying out to the full the course which they deem advisable, not merely in the spirit of just vengeance, but as a matter of safety to future travellers and, indirectly, of benefit to the semi-savage regions in which Mr. Margary breathed his last. It may be that the sudden and cowardly act which deprived him of life may do more to "open up" China, than he could possibly have done had his life been spared. In tendering to his friends and relatives our sincere sympathy for the loss of an able man, we may express a hope that they will find some consolation in the fact that his sad fate will probably conduce to the establishment of totally new conditions as regards travel, in the vast empire which has proved his tomb.

(Rangoon Gazette.)

We were in error in stating that the expedition of Colonel Brown had started finally from Sawaddy. It appears that for various reasons, the route has been changed and the Manwyne road decided upon. The same in fact as that partially traversed by Major Sladen, by which, in 1869, he succeeded in getting as far as Momein. The course lies North-east of Bhamo, proceeding past Ponsee, at which place the last expedition was detained some time, and where Major Sladen discovered that he did not agree with Sir Samuel Baker in the pleasure felt by the latter at being in a downright difficulty. Leaving the hills of Ponsee behind, the road lies through Manwyne, Sanda, and Myne-la to Momein, the furthest point reached in 1869. Matters must have considerably changed since then, the Panthays having been exterminated. The Chinese are unlikely to make difficulties, and as the country, from all we can learn, is tranquil, there is no room to doubt but that the expedition will reach Talifoo and China in due course.—23rd Feb.

The disastrous news received by telegraph from Mandalay, of the treacherous murder of Mr. Margary, and the retreat of the expedition under Colonel Brown, has created a most painful effect. The Mission had given up the idea of proceeding by the Sawaddy roûte, as we announced a few days ago, and adopting the old roûte traversed by Major Sladen, and by which the late Mr. Margary reached Bhamo, had advanced some four marches beyond Bhamo, when some difficulty occurred at the front, which induced Mr. Margary to ride on alone to Manwyne where, on his advance, he had been received with friendly and respectful demonstrations. Here he was fallen upon and killed; and then followed an attack on the expedition, which appears to have been plundered of nearly everything and driven back, fortunately without loss of life, to a village near Bhamo. Simultaneously with this, we learn that Mr. Elias is stopped at Myne-Mow, and has no alternative but to return to Bhamo. We look in vain at present for any information as to the cause of this calamity. Poor Mr. Margary came through, not only without difficulty but with unexpected facility, meeting on all sides with every mark of friendliness and consideration—the people kowtowing to the Chinese *literatus* who accompanied him, and astounded to find that Margary was greater than he. On the return trip, the expedition is barely clear of Burmah, and presumably of the influence of its king, when fate smites the enterprise with a heavy and disastrous hand. Can the cause be found in a local *emeute?* We hardly think so. There is the contemporaneous stop put to the journey of Mr. Elias at Myne-Mow. Some signs of plan and deliberation are apparent, which do not harmonize with the theory which assigns some purely local excitement or irritation as the cause. It is an odd coincidence that the Burmese Embassy preceded our own by only a few days and by the same route, and it is more than possible to our mind that Golden Foot has had something to do with the catastrophe. We hope above all things, that a searching investigation will be made. The Court of Pekin cannot be sensible of any other feeling than that of indignant regret at the outrage, and will, we should imagine, be ready to furnish every assistance to punish its authors and abettors. Should inquiries eventually point to the King of Burmah, as having instigated this murder, it will probably go hard with that worthy. A British resident and an armed force will, we hope, deprive him of the power of future mischief, or, what would be still more desirable, improve him off the face of Burmah at all events altogether.

The untimely death in the service of his country, of Mr. Margary, under such painful circumstances, will awaken a wide and deep feeling of sympathy. Cut down in the moment of success, after having accomplished an unparellelled feat and without having had a foretaste even of the acknowledgments of his countrymen, his fate has been a sad one, and we trust that it will be amply avenged.—9th March.

Mr. Elias, we are glad to hear, has returned safely to Bhamo, and Colonel Brown, who was at a village some twelve miles from thence according to the last advices, is probably safely there also. We are looking forward with great anxiety to fuller news of the late catastrophe. It seems that Mr Margary's escort, five in number, were also all murdered, and the attacking party must have made a rich haul by looting all the treasure and presents in charge of the expedition. We believe an express boat is on its way down from Bhamo, and may arrive at any moment, and which will probably bear full despatches from Colonel Brown, conveying all information that has been obtainable as to the attack and violation of the safe conduct. It is simply inconceivable that, without supposing some considerable pressure to have been exerted, the expedition should have been driven back in the ignominious manner it has been. We trust that a searching investigation will be made—of that, presumably there is little doubt—and that an adequate measure of punishment may be meeted out to the offenders. The murder of Mr. Margary is not only a crime, but assuming it to have sprung from political motives, a blunder of the

gravest description on the part of those who instigated it. The murder of a British envoy is no light matter, and although Exeter Hall is strong, we imagine that a peace-at-any-price policy could hardly find advocates even there, by the light of such an event. Fortunately, we have an administration in power pledged to a vigorous policy, and a more fitting opportunity for its exercise could hardly be found.—12th March.

THE WRECK OF THE S. S. "HONGKONG."

By the S. S. *Fyen*, three of the passengers of the late steamer *Hongkong* arrived, from whom we gather the following particulars of the recent sad disaster. Passed Aden on Saturday morning, 20th February, at 4 o'clock, and at 5.5 a.m. of the 22nd, struck on an unknown reef, about 4 or 5 miles from Abdalkure. As soon as the vessel struck, three boats were lowered; in one boat was the first engineer and two of the crew; in the other boats the second officer and some of the crew. Pulled away from the sinking vessel. Captain Comley placed the lady passenger and two of the children in the port boat, but from its being undetached from the davits, it went down with the wreck, the Captain springing from the boat, the lady and two children being drowned; and finding the vessel going down, the third officer with one of the passengers, Mr. Sonne, jumped into the water and were picked up by one of the boats. One of the other passengers, Mr. Petersen, jumped from the deck into one of the boats where the crew were. Mr. Colding, another passenger, was standing on the deck and went down with the vessel. After having gone down three times, he caught hold of a part of the wreck, and after remaining on it for a short time was picked up by one of the boats. The other three children belonging to a lady passenger (Mrs. Walton) were down in the cabin and sunk with the wreck. The Captain was eventually picked up, and looked round to see if there were any more to be saved, but, not seeing any, pulled to some rocks and remained there a short time. Some sea-gulls were obtained, there not being any provision in the boats, and but six gallons of water for the boats. The Captain then counted who were saved, and found the Chief Officer, Fourth Engineer, Cook, Butcher, and two stewards were missing, making with Mrs. Walton and five children, 12 in all lost. The two boats then steered for Aden (the third being too small was left on the rocks). The boat in which were the 2nd and 3rd officers and Mr. Colding pulled away and kept in company with the Captain's boat until the middle of the night, but did not see the boat in which the Captain was, afterwards. The boat then pulled all the night and the next day, when the occupants sighted a Malay junk, but it was going so fast as not to be hailed. The third day, about noon, saw the smoke of a steamer, and steered for it. As soon as the steamer was close, handed a flag up and the steamer bore down for the boat. She proved to be the British steamer *Siara*, Captain Bettheik, from Bombay, bound to Singapore, who took all the hands, nineteen in number, on board; they were treated most kindly by the Captain, fed and clothed, and taken to Aden, arriving there on Thursday, 25th February. The other boat arrived at Aden on Saturday, 27th, at 2 p.m., after having landed two days previous at an Arab village, where they procured some dates, the head of a shark, and some brackish water.—*Hongkong Times.*

THE WRECK OF THE "YUEN-TZE-FEE."

(China Mail.)

The *Yuen-tze-fee* left Amoy for Shanghai on Saturday evening, the 27th March last, but anchored afterwards outside the harbour, until the fog cleared up at 2.30 a.m. when she got underweigh again. She went on all right until 10 minutes past 5 o'clock on the 28th inst., when she ran on Dodd's Island. Immediately after, the passengers and their luggage were landed, and meantime every effort was made to get the steamer off. Repeated attempts were made to extricate her until about 5 a.m. on the 29th. At that time the fire was put out by the water, which came in very fast. She gradually heeled over to the starboard side, and sank at 5.40 a.m. By this time every one had left the ship, so that no life was lost. Before this all the boats were destroyed, excepting one, which had been sent to Amoy immediately after the disaster to give information, but all hands managed to land on Dodd's Island by jumping over the bow. The steamer had been abandoned twice before she sank, all expecting her to go down every moment. When it was found that dread was premature, all hands went on board again and did their best to pump the ship out, and to try to get her off. The *Douglas* appeared on the afternoon of the 29th and took away the passengers, and from her it was learnt that H.M.S. *Growler* would come next day to render assistance. She did not, however, come, and instead of her the *Ling Feng* (Chinese revenue cruiser) appeared on the afternoon of the 30th. She did not then take the crew off the island, (having anchored in the Looloo Bay) but sent a boat off with provisions and water to those on the island. The next morning, (the 31st), she took all the crew away to *Amoy*. Captain Cocker and the officers of the *Ling Feng* treated the shipwrecked men with great kindness. A Naval Court of enquiry, presided over by Mr. Vice-Consul Phillips, assisted by Captain Cocker and Lieut. Pelly of H.M.S. *Growler*, was subsequently held, and Captain Moalle's certificate was suspended for three months for an error of judgment. His conduct subsequent to the wreck received, however, great praise from the Court. The crew were detained at Amoy awaiting a steamer, but the engineers, sailors, firemen and others, except the officers who are still in Amoy, came down in the *Douglas*, arriving here to-day. When the *Yuentzefee* struck, she seemed to have jumped on the rock, and about 30 feet of her bow became fixed on it. The engines were immediately put astern to draw her off, but to no avail. During the time she was on the rock the engines were constantly worked with a view of getting her off and for pumping her. A short time before she struck, the engines were eased. After the striking, perfect order reigned on board; there was nothing like a panic even among the Chinese passengers. As regards the ship's crew, every one was at his post. There were on board 20 Chinese passengers, 1 European first class, besides a crew of over 40 all told. The steamer was going up to Shanghai to be delivered back to her owners, the charter having just expired. The cargo was rather a valuable one and consisted chiefly of sugar, sapan wood, and a quantity of gunny bags. After she struck, the passengers and their luggage were landed, and by 12 o'clock all of them were out of the vessel. It was not necessary to use the boats, as land was so close that a plank laid from the bow sufficed to land them. During the night a north-east wind accompanied by heavy rains, sprang up and caused the ship to bump a great deal so that she heeled over on the starboard side on the morning of the 29th. Those on the island didn't suffer much from want of food or water, but they received a thorough drenching, it having rained hard during the night, and there was a strong wind. They had to shelter themselves in the best way they could.

Law Reports.

NAVAL COURT OF ENQUIRY.

Shanghai, April 12th.

Capt. A. BULLER, H.M.S. *Modeste*, President.
W. H. MEDHURST, Esq., H. B. M. Consul.
Lieut. J. P. PIPON, H.M.S. *Modeste.*
C. G. PERRINS, Esq., Master, P. & O. str. *Khiva.*
R. H. BERGMAN, Esq., Master, str. *Tunsin.*
W. C. GILLIES, Assist.-Paymaster, H. M. S. *Modeste, Clerk of the Court.*

The Court was held at the request of Captain Brown, of the British steamer *Ocean*, to enquire into the circumstances attending the collision between that vessel and the C. M. S. S. *Fusing*, Captain Andrews, which happened on the morning of the 4th instant, when the last named vessel was sunk with much loss of life.

The 'Hsien of Shanghai; Chên, Mixed Court magistrate; Mr. Campbell and Wang Yung-ho, interpreters, were specially deputed by the Taotai to watch proceedings and report to him. Several other Chinese officials were present, as were also Captain Bolton, Tong King-sing, and others connected with the C. M. S. S. Company.

In reply to a question, Captain Brown said he wished to call as witnesses, the officer who had charge of the deck of the *Fusing* at the time of the collision, as well as the engineers and quartermasters of that ship.

Mr. MEDHURST said that Mr. Tong-king-sing, the manager of the C. M. S. S. Company, was willing to give all the witnesses required, if Captain Brown would name them.

By permission of the Court,

Mr. WAINEWRIGHT appeared for Captain Brown; and Mr. DRUMMOND on behalf of the China Merchants' Company, the owners of the *Fusing*.

Captain BROWN put in the ship's log of the *Ocean*, containing his narrative of the disaster, being in precisely similar terms to those already published in *North-China Herald*, the principal incidents of which will be found described in the appended evidence.

The PRESIDENT asked why the narrative was not signed?

Captain BROWN said it was not usual to sign the ship's log, only the official log.

The PRESIDENT asked where was the official log?

Captain BROWN replied that it was on board the ship. He had not entered the occurrence in the official log.

Mr. MEDHURST said he ought to have at once entered an event of this kind in the official log.

The Court directed the official log to be sent for, as Captain Brown would be required to explain why he had not entered the particulars of the collision.

In the meantime, the Court proceeded with the investigation, and

Captain BROWN, sworn, deposed—The latitude and longitude giving the position of the ship, as given in the ship's deck log, is correct. I have not entered the latitude and longitude in my official log. I have not entered any of the circumstances affecting the collision in my official log. At about 10.40 a.m., on the 4th April, our whistle was sounded, and immediately replied to by a vessel, which I took be on our port-bow. Our helm was at once ported and the engines stopped, and reversed full-speed astern. I think in about a minute-and-a-half, or two minutes at most, when our ship's head had fallen off to S.W. by W., I saw the sails of a vessel a little on our port bow. Immediately afterwards, the collision took place; our engines were then stopped, and boats cleared away. Finding that our vessel was not in any immediate danger, our boats were sent to the assistance of the second steamer's crew. I have nothing more to say. I might add that our course previously had been S. ½W.

By Captain PERRINS—I saw the sails of the other vessel. I had no sail set.

By the PRESIDENT—The fog commenced between three and four in the morning. The fog whistle was sounded about every minute to two minutes at most. When we ported, our helm was put hard-a-port. We were going from 6½ to 7 knots. The speed is entered in the deck log. We use a patent log, which is hauled in every four hours, and the distance taken from it. I cannot say how many revolutions the engines were making. I think about two minutes had elapsed between my first hearing the whistle and the collision. The first things I saw were the *Fusing's* mainsail and foretrysail. We struck her about twenty feet abaft the stem on the starboard side, with our bow, hitting her at right-angles, as near as I could judge. I was on the bridge. The second officer was also on the bridge, in charge of the deck. I doubled the look-outs about four o'clock in the morning, when the fog came on. They were stationed, one close to the stem, and another about fifteen feet abaft him. The speed of the engines was never reduced—it was the heavy head sea which reduced the speed of the ship.

By Mr. MEDHURST—I took the *Fusing* to be on our port bow when I first heard her whistle. She was not going on a parallel line with us—she was going at right angles. I am not sure whether I sounded my whistle again, after I heard her's. I did not enter these circumstances in the official log, because I did not think it was necessary to do so for this enquiry. I thought when we got home would be time enough. The official log contains instructions to enter every remarkable incident. The whistle is about eight or ten feet from the deck of the *Ocean*.

By Lieut Pipon—I did not hear the other vessel's whistle more than once. I had no idea which way she was steering. The engines were backed astern before the collision. We got a back turn before the collision. I did not see the other vessel before we got the back turn. I think we must have been going about three knots when we struck, as far as I could judge.

By Captain Perrins—My ship goes, in calm water, from nine to nine-and-a-half knots. There was a good deal of sea on ; none of our boats were swamped. They took a good deal of water in them. There were from eleven to thirteen persons in our largest boat, including the crew. I lowered all my boats.

By Captain Bergman—I am sure it was a minute after my seeing the *Fusing*, before we came into collision. Our engines had been reversed, I think, about two minutes previously—as soon as it could be done after stopping. I never tried, but I should think the *Ocean* would require five minutes to gather stern way, after going at the speed we were proceeding at. I first heard the whistle on the port bow, and saw the *Fusing* on my port bow, but not more than half-a-point—nearly right a-head. She was not many yards' distance ; the fog was so very dense, I could not see many yards.

By the President—I think I had been on the bridge about a quarter of an hour or twenty minutes before the collision took place. I had previously been on deck some time. I first saw the sails, and then the whole length of her broadside.

By Mr. Medhurst—I remained at the spot from eleven o'clock till six ; the boats were out two hours of that time, trying to pick up the people. I picked up fifty-eight altogether, and every attention was paid to them. I brought them to Shanghai. There were five Europeans, and fifty-three Chinese. I picked up one dead body—all we saw at the time. Two died after they came on board.

By Captain Perrins—The engines were reversed as quickly as possible. When a ship has got headway, they do not as a general rule reverse quickly. I found the engines of the *Ocean* reversed as quickly as those of any other steamer I have been accustomed to. I cannot say how long it was after the order to reverse was given, that the engines moved.

[The *Ocean's* official log, and the Captain's certificate of competency, were here handed to the Court.]

By the President—I do not know how long it was before the *Fusing* sank. I did not see her go down.

By Captain Bergman—The *Fusing* was coming ahead at the time of the collision, but I cannot say how fast. I think from her appearance, she was heading about N.W., as near as I could judge. I was heading about S.W. by W. at the time of the collision.

By Mr. Medhurst—I have been a master twenty years. I was not aware it was necessary to enter the collision in the official log for this enquiry. I have had so much to do since, that it has escaped my memory that it was necessary, I suppose.

Mr. Medhurst—It might have escaped your memory, but after all those years as a master, you must have known it was necessary to enter it.

By Mr. Wainewright—If I had written up the official log, the account of the collision would not have been entered differently, or any addition made to that in the ship's log. In the eighteen hours up to noon on the 3rd, the ship had made 140 knots ; and in the four hours ending at eight o'clock on the morning of the collision, the log showed the vessel had gone 25¼ miles.

Mr. Wainewright then put in a sketch made by Captain Brown, of the position of the vessel just before and at the time of collision.

By Mr. Drummond—The wind was about S.S.W.; it appeared a fresh breeze with us, going against it. The variations during the previous twenty-four hours had been from S.E. to S.S.W. The wind was fresher when the fog came on, and was about S. then. There is no current, that I am aware of, where the collision took place. My impression, from what I have stated, is that the *Fusing* must have changed her course just prior to the collision. I do not know what course she was steering, and would not like to think what she di

By the President—I do not know what she di

By Mr. Drummond—I have said there was a good deal of sea on. It was said that one of the *Fusing's* boats carried twenty-six persons in that sea. I did not count them.

By the Court—One of the *Fusing's* boats assisted in saving life. I cannot say how many she saved, but she brought some people on board the *Ocean*.

By Mr. Drummond—The answer I have given with regard to speed, applies to the time when I first heard the whistle of the *Fusing*. I considered myself outside the track of the vessels going North.

The Court then adjourned till 1.15. Upon resuming, the Court called—

John McKeckney, who deposed—I am second officer of the steamer *Ocean*. I have a second officer's certificate. I was officer of the watch at the time of the collision. I was on the bridge then. The wind was from S.S.W. to S. I cannot say at what speed the ship was going. We did not haul the log in during my watch. I think she was going about seven knots. As officer of the watch, the precaution I took during the fog, was to keep the steam whistle going. The steam whistle was sounded at regular intervals of four or five minutes. Not two seconds elapsed between sounding our whistle and hearing the *Fusing* reply. The ship was heading S. ¾ W., by the pole compass on the bridge. Heard the *Fusing* whistle a little on the port bow, about two points. The captain ordered me to put the helm hard-a-port. He then stopped the engines, and reversed full speed. At the same time I kept the steam whistle blowing until the collision. The helm was put immediately a-port. I first saw a vessel's starboard bow and her foremast. The engines were reversed immediately after the order. In my opinion the *Ocean* was not going more than five knots when she struck the *Fusing*, but I cannot be positive. The engines were going astern at the moment of the collision. The *Ocean* struck the *Fusing* about 18 or 20 feet from the starboard bow. I do not think it could have been more than four minutes before she sank. I did not see her go down. Two hands, an A.B. and a boy, were on the look out, one right in the stem, and the other about 10 feet further aft.

By Mr. Medhurst—I was sounding the whistle at the time the collision took place. I had the string in my hand. The Captain only was on the bridge with me. Immediately the vessels struck, I heard the Captain order the boats to be manned. All our boats were out, and I saw one of the *Fusing's* boats assisting to save the sinking people. There was a nasty cross sea for the boats, on at the time. We were helping the *Fusing's* people for two hours. The ship stayed there about six or eight hours. I am sure every one was picked up that possibly could be.

By Lieut. Pipon—I only heard the *Fusing's* whistle once before we came into collision. We got clear of the *Fusing*, because we had stern way on. We kept on backing until we were clear.

By Captain Bergman—I judged by the time that we got on the water to save the people, that the *Fusing* sank in about four minutes. I do not suppose we were more than four minutes from the time the vessels struck until the first boat was lowered. I was in the first boat, and when I rowed to the spot I saw nothing of the *Fusing*, only cargo, and people clinging to the wreckage. Although I could not see the *Fusing*, I believed she was sinking, as we heard the screams of her people. The captain took charge of the deck at the time of the collision. He gave me my orders.

By the President—I cannot say whether the *Fusing* altered her course.

By Captain Perrins—Previous to stopping the ship, the engine room telegraph was at full speed ahead. I made no suggestions to the Captain as to increasing or decreasing speed.

By the President—I consider we were warranted going seven knots in such a fog. I consider it a moderate rate of speed. The sea was sufficient to check the ship's way about a mile and a half or two miles an hour.

By Captain Bergman—The fog commenced at about half past three or a quarter to four in the morning.

By Mr. Medhurst—We could just see about the ship's length at the time of the collision.

Hector M'Kinnon, deposed—I am a quartermaster of the *Ocean*. I was at the wheel at the time of the collision. The first order I received was to starboard, and then, in about two or three seconds afterwards, to hard-a-port, from the bridge. The order to starboard was given to me by the quartermaster on the deck. I could not hear what they said on the bridge. The quartermaster's name was Neil M'Neil. Previous to the collision, I was steering S. ¾-W. When I put the helm a-starboard, the ship did not move her head. She had no time. I did not let go the spokes at all, because the order to hard-a-port came so quickly upon it. The wheel is right aft. I heard the *Fusing's* whistle. The order to starboard the helm was given in a minute or so—a very short time afterwards.

By Lieut. Pipon—I had the helm hard over to port before striking, and the ship altered her course three points.

By Captain Bergman—I think the ship's head when we struck was S.W. I heard our whistle blow three minutes before the collision, and also the *Fusing's* whistle.

By Captain Perrins—I could not see from where I was standing further than a ship's length. I am sure you could not see a quarter of a mile.

By the President—The order to starboard was given after I heard the *Fusing's* whistle. The other quartermaster was not stationed on deck when he gave the order ; he merely happened to be there at the time.

Neil McNiel deposed—I am a quartermaster of the *Ocean*. I was on duty at the time of the collision, and was abaft the engine-room skylight. I heard the *Ocean's* whistle sounded—every five minutes as far as I know. My duty was passing the word from the bridge to the man at the wheel. I heard the *Fusing's* whistle. I heard it only once—before I received an order from the bridge. I received an order immediately, to put the helm a-starboard. I ordered the man at the wheel to do so. I could see the helm from where I was standing. I did not notice the man put the helm a-starboard. I cannot say if the ship's head moved to port. I next received an order from the bridge—"Port—hard-a-port." That came in less than half-a-minute—immediately after starboard, port was given. The helm was put hard-a-port—about a minute before the collision, as far as my knowledge goes. I cannot tell how many points the ship had paid off to starboard before the collision. She answered the helm immediately.

By Lieut. Pipon—I did not notice the helm being put to starboard, but did notice its being put to port. I saw it a-port. I was looking aft then, but not previously. I got such "a start" when I saw the other ship on our port bow, that I did not notice about the helm being put a-starboard. I did not actually see the ship when I got the first order. I only heard the whistle, when I gave the first order.

By the President—I cannot say who gave me the order to starboard. The second officer gave me the order to port.

By Captain Bergman—I am sure that I heard the order given to starboard. I cannot say if it came from the bridge.

By Mr. Wainewright—I did not see the *Fusing* when I gave the order to "port—hard-a-port," but I saw her immediately after. I turned to give the order to the man at the wheel, and when I turned my face round again I saw her. She could not have been very far off then, as I could hardly see the man on the look out forward, the fog was so thick.

By the President—The *Fusing's* whistle was on the port side when I heard it.

By Captain Bergman—I am quite sure I heard the second officer give the order to port, and our Captain was singing out to port. I also heard someone on board the *Fusing* sing out to port.

William Stevens deposed—I am an able seaman on board the *Ocean*. At the time of the collision I was on the lookout—as far forward as I could get. The weather was rather foggy. I could see about the length of the ship. I only heard the *Fusing's* whistle once. The sound bore somewhere about a-head. I reported a vessel's whistle ahead somewhere. I was not certain at the time. I first sighted the *Fusing* about a point-and-a-quarter on the port bow. She was about the length of the ship distant. I first saw her starboard bow. That was in less than a minute after I heard the whistle. She did not alter her bearings until she struck, that I saw.

By Mr. Medhurst—I saw her starboard

side as far aft as the bridge. She seemed to be crossing our bows. We struck her a little before the fore-rigging. I heard the order to starboard given when I reported the whistle, and then to port from both captains. That was before she struck. The orders followed each other quickly. I heard the other ship also give the order to port. I cannot say whether they were hailing us, or intended for their own people. I cannot say who gave the orders to starboard and port on our ship. They both came from the bridge.

By Captain Bergman—When I reported the whistle, the captain put up his one hand and put the other to the telegraph, so I took it that he was answering me. I reported the vessel when I saw her. I reported her on the port bow. She had headway, and was approaching us. After the vessels struck, the *Fusing* appeared to be slewing round to our broadside.

By Mr. Wainewright—The *Fusing* had her fore and main-trysail set.

By Captain Bergman—There was a pretty heavy swell on, but no broken water. Water had been coming over the bow, and I had to put my oilskins on. I went on the lookout at ten o'clock.

Thomas Rooney deposed—I am a boy on board the *Ocean*. I was on the lookout previous to the collision, for about half-an-hour. I was stationed abaft the forecastle skylight. The weather was very foggy, and there was a little swell on. (The remainder of this witness's evidence was nearly a repetition of that of the preceding witness.) He heard the *Fusing's* whistle twice before he saw her. There was scarcely a minute between. He did not hear it on the starboard bow. He did not hear any orders given in the other ship.

Charles Wylie deposed — I am fourth engineer of the *Ocean*. I was in charge of the engines on the forenoon of the 4th April. At 10 o'clock we were making 48 revolutions. In calm weather that would give 7½ to 8 knots,—the most I ever knew her to go with no canvas. Steaming full speed, the greatest number of revolutions I ever knew her to make was 52. By my calculation, at ten o'clock, I cannot exactly say what speed she was going. Previous to the collision, I received the order to "stop," from the deck, and then immediately after, "full speed astern." In about a minute the engines were going astern. The engines had been reversed about two minutes before I felt the collision. The engines were making 44 revolutions astern. The levers were moved by a Chinaman along with me.

By Mr. Medhurst—I logged the engines on a slate, and the chief engineer copied it. The engines were going astern full speed when she struck. After she struck, they were stopped by order of the Captain. I logged all this on the slate.

By Captain Bergman—The engines were stopped in three minutes after the collision. We were backing astern about four minutes altogether.

William Craig, deposed — I am chief engineer of the *Ocean*. I was not in the engine room at the time of the collision. I wrote up the engine room log produced. From the entry, the Court is to understand that the engines were stopped when the ship struck.

By Mr. Medhurst—It is my understanding that the engines were not going when the collision took place. I got that information from the fourth engineer verbally, not on the log slate. The words on the log slate I do not exactly remember. I do not think there was anything on the log slate at all. I was in my room at the time of the collision. I went to the engine room at once. The engines were then stopped. I did not look at the clock just then. I told the fourth engineer to mark the time. I asked him how long the engines had been stopped, and he said, they had just stopped. Not more than two minutes elapsed before I got into the engine room. My cabin is right aft. I heard no orders given. I do not think I could have heard the telegraph if it had been sounded. What took me down into the engine room was the shock.

By the President—When I was in my cabin, I did not know that the engines had been stopped. I was aware of no change of the engines until I got into the engine room.

By Captain Bergman—I can feel the vibration of the screw in my cabin at night when all is quiet about the decks, but on this occasion I did not notice any change.

By Lieut. Pipon—It is not requisite in our engines to take extra precautions for stopping them in foggy weather.

By Mr. Wainewright — I believe as a matter of fact that the engines were stopped before the actual collision. My grounds of belief are having been told so by the fourth engineer. My engines, at full speed in calm, make from 48 to 51 revolutions, if the vessel is deep. If she is light, 56. I do not know the draft at the time of the collision.

By the President—I have been informed the ship's greatest speed is from 8½ to 9½ knots. I do not know how long it would take to give the ship stern way when going full speed. The engines are easily reversed when going 48 revolutions. It takes less than half-a-minute to reverse them.

By Captain Bergman—I do not know wheher the swell we had at that time would decrease the revolutions,—it might, a revolution or two.

Charles Wylie, recalled, said—The chief engineer came down into the engine room in about five or six minutes after the collision. When he came, the engines were standing. I am positive that the engines were going astern at the actual period of the collision.

By Mr. Medhurst—The chief engineer told me to ease the safety valve, examine the pump, to open the fire and tube doors, and to come on deck. I made the entry on the log-slate immediately after,—when I stopped the engines. I did not tell the chief engineer anything,—only about the firemen running out of the stoke-hole. I entered on the log-slate that the engines were stopped, and then put full speed astern. (After reading the entry in the engine room log-book, he said it differed from his entry on the slate, as to the engines stopping. The engines did not stop for two minutes after the vessels struck. The entry in the book made it appear that they were stopped before the collision.) I can swear that the times in the log-book, 10.40 and 10.43 are correct. I made the two entries,—one just before and one just after the collision. I looked at the clock in the engine room to get the time. It might have been a mistake of mine entering on the slate.

By Mr. Drummond—I did not see the chief engineer copying from the slate into the log-book.

By the President—I gave him no assistance by word of mouth to write up the log.

William Craig, recalled, said—I gain my information for writing up the engine-room log from the entries on the slate—the time being marked there. I wrote it up from the slate on the 4th April.

The Court recalled to the witness that he had previously said the fourth engineer had told him verbally, and that he (the witness) had said he did not think there were any words on the slate; and he was also informed of what the fourth engineer had just stated. How did he reconcile his statement with that?

Witness said he did not reconcile it at all—he did not take it in. He spoke the truth. When he first went down into the engine room, after the collision, there was no entry on the slate. He told the fourth engineer to write it on the slate and mind the time; and he (witness) entered it up afterwards in the book from the slate.

Captain Brown, recalled, said—I gave no order to starboard the helm. I did not hear it given. I was not aware until now that anybody had given the order. I cannot account for the lookout men, quartermaster and man at the wheel, having heard the order. I am quite positive the ship never answered a starboard helm. The ship's draft was about 15ft. 8in. aft, and 15ft. 2in. forward. She loads up to 18 ft. when full, but was in light trim. I am not aware if the draft is entered in the log book. I am aware it ought to be.

By Captain Bergman— I am not sure whether the chief officer was on deck at the time of the collision, but he was in a moment or two after, as he went into one of the boats.

By Mr. Drummond—Under the circumstances of weather, &c., on the 4th April, the ship I think would travel less than half a mile before getting stern way after the engines were reversed.

McKeckney, recalled, said—When I first heard the whistle on the port-bow, there was no order given to starboard the helm. I was not aware that the quartermaster gave that order to the man at the wheel. The ship did not answer a starboard helm to my knowledge.

By Captain Perrins—As officer of the watch, if I thought the ship was going into danger, I would have had the telegraph at "stand by."

By Captain Bergman — I understood we were not in the usual track of steamers; we kept on the outside passage, as we were going to Swatow. I did not think, therefore, that going at full speed in a thick fog was running the ship into danger.

McNeil, recalled, said — I cannot tell who gave me the order to starboard the helm. I take my orders direct from the bridge, but I am not sure whether the order came from the bridge at all. I have no idea how far it was from the bridge to the after part of the engine room skylight. I would not repeat an order to the man at the helm, not knowing who gave it. I cannot tell who gave this order. I heard a voice call out. I cannot tell if it was the same voice that gave the order to port. I cannot say if it was the second officer's voice.

April 13th.

The Court resumed at two o'clock to-day.

Captain Brown, in reply to Mr. Medhurst, said that the fourth engineer had been promoted to that rank from the grade of fireman, because the former fourth engineer was discharged. It was not logged. He had been fourth engineer only this voyage.

The Court said the promotion ought to have been logged, especially in the engine room log.

The case for the *Fusing* was then proceeded with, the first witness called being

Hugh Brooke Rose, who deposed—I was second officer of the *Fusing*. My certificate of competency was lost with the ship. Its No. was 10,080, I believe. I was officer of the watch at the time of the collision. I was steering N. ¼-E. by the wheelhouse compass. The ship was going about six knots per hour. I am not aware how many revolutions the engines were making. We had only the main and foretrysail set. The weather was thick and foggy. There was little or no wind,—nearly dead calm. What little wind there was, was from the S.S.W. It was a light air, not of any use to the sails. The sails were not drawing, they were just flapping. It is customary to keep sails set in a steamer when they are not drawing, when the wind is expected to shift. What light airs there were, were gradually veering round to the S.S.W. before the accident. We expected the wind from that quarter. We do not as a rule keep fore-and-aft sails set when running before the wind or the wind is two points on the quarter. It depends on the wind we expect. If it does the sails no damage, we do so. We could see about a ship's length and a half at ten o'clock. At that time the wind was S.S.W. I had taken the precaution to have a man on the lookout with myself. The steam-whistle was kept going at intervals of two minutes, and the ship was going at a reduced rate of speed. The speed was reduced before I relieved the watch. I was aware of that by being informed so by the chief mate at eight o'clock. I am not aware at what rate the ship was going previously. I am not aware how many revolutions the engines had been reduced. The usual speed of the ship in fine weather, during the short time I have been in her, was from 8½ to 9 knots. At the time of the collision, I was standing before the forward skylight on the starboard side. The officer of the watch in the *Fusing* usually stood between the wheelhouse and the bows. There was no bridge. The wheelhouse was on the deck. At the time of the collision, there was no one near me, but immediately before it happened the captain was standing by my side. I first ascertained there was a ship near us, from two to three minutes before the collision took place. I heard her whistle, from three to four points on our starboard bow — it was over three points. We sighted her about 20 seconds before the collision took place. I first saw her port bow. When I heard the whistle, I gave the order to slow the engines. I worked the telegraph myself to dead slow. The telegraph might be about ten feet or a little more from where I was standing. I felt the vibration of the ship ease almost directly the order was given. I consider the *Fusing* had stopped when she was struck. I do not think she was going through the water. I do not consider that the *Fusing*, going at six knots, would lose her way, the engines being still at dead slow, in two

minutes. I was under the impression that she had lost her way from something else that had occurred, which I did not know at the time, but have learnt since. I was not under the belief that the engines were going dead slow at the time of the collision. They were not going dead slow. From what I heard the Captain call out, I felt they were reversing full speed. About two minutes elapsed between my striking the gong to go dead slow, and my hearing the captain call out. I gave no order to the quartermaster at the helm. One order was given to him at the time of the collision—previously none. The helm was not altered, to the best of my belief. I was in a position to see at that time,—the helm was not altered—I cannot say for certain; it all happened so quickly that there was not time to notice anything. The *Ocean* struck the *Fusing* about half-way between the fish-davit on the starboard side and the foremost swifter of the starboard rigging. The *Ocean* was heading at right angles, or nearly so, across our bows.

By Mr. Medhurst—I gave no order myself about the helm. I heard the Captain tell him to put the helm hard-a-starboard. It was immediately before the collision took place. I went aft, after the collision. There was great confusion, and the ship was sinking rapidly by the head. The *Ocean* lowered her boats, and made every exertion to save life. We tried to get our boats clear, but, with the exception of one, could not succeed. The ship went down before we had time. I believe that one boat saved twenty-six lives. Our boats were all swung inboard; the crew were nearly all in the forceastle, and were killed at the time of the collision, and only the passengers with one or two of the crew could get to the boats. I knew the crew were down below, and never appeared after the collision. In the boat saved, were the captain and chief engineer, the rest being Chinese. I was picked up by her. Five of the foreign crew were saved. The third engineer was drowned. The boat that was saved floated out from the davits. I was capsized out of another when the ship sunk. This boat was cleared by the Chinese boatswain and another man. The head of the davits capsized her. I went down with the ship. There were only two lifebuoys on board. I saw the chief officer trying to clear another of the boats. About four minutes elapsed from the time of the collision to the *Fusing* sinking. I was in the water twenty minutes to half-an-hour. I am pretty sure the ship went down in four minutes.

By Lieut. Pipon—Previous to the collision, I heard the *Ocean's* whistle more than once. The bearing of the sound seemed to alter; the sound seemed to be travelling along our beam, towards our stern. After hearing the *Ocean's* whistle, the engine room gong was not struck except by me. At the time of the collision, the engines were not at dead slow. The last order I gave was for dead slow. It is not an ordinary telegraph. It is merely a gong and bell, which do not register. We only know the order is obeyed by the alteration in the speed. I could hear the sound of the gong in the engine room, from the skylight. When we struck, the man at the wheel had not moved his position—at least just before we struck. At the time we struck, I was not standing there at all. If I had been, I should have been killed.

By Captain Perrins—The captain shouted to them to reverse full speed. The ships were in collision in thirty seconds afterwards. Up to the time of the captain giving that order, I cannot state what speed she was going. She was slowed by me, and stopped and reversed by the captain. I believe the ship had no headway when she came in collision.

By Captain Bergman—The captain gave no order in my presence to stop the engines. I only heard the order to reverse. We were on the port tack. I heard the *Ocean's* whistle twice before she struck. I do believe the ship's way could be stopped in thirty seconds by reversing the engines, after going dead slow for two minutes.

By the Court—I believe, from what I have since heard stated, that the captain stopped the engines after I had slowed them. I have every reason to believe that, as I rang the bell to slow, the captain, coming forward, gave the order to stop—it therefore happened almost simultaneously.

By Captain Bergman—Admitting that the captain stopped the engines, I consider that the ship's way could be stopped, if the engines had been thirty seconds going astern after being two minutes slowed.

By Mr. Medhurst—The vessel was well supplied with boats. There were four, but they were swung inboard, as is the usual custom.

By Mr. Wainewright—Five minutes before the collision, the lookout man was standing on the port side of the forecastle scuttle. This man lost his life. I did not see him afterwards. I was keeping a strict lookout myself, trying to hear the *Ocean's* whistle, and did not pay any attention to him. I should say I heard the first whistle of the *Ocean* about 2½ minutes before the collision. The handle of the gong was in the wheelhouse. Three men were on deck at the time of the collision—myself, the man at the wheel, and the look-out man; there were others standing round the galley. I did not see that the helm was altered after the order was given to starboard it. I did not see the vessel's head move to a starboard helm, between the whistle and the collision. It is not true that, after the collision, I told the first mate of the *Ocean* that before the collison the helm had starboarded, and that the *Fusing* had moved a point off her course, or anything to that effect. It is quite false.

By Mr. Drummond—The helm was not altered at all between the time of hearing the whistle and seeing the bow of the *Ocean*. I did not alter the course because, from the direction I heard her whistle proceed, I believed we were passing ships, and not meeting any. I do believe the *Ocean* altered her course after I heard her whistle, and answered it. I believe she ported her helm. I believed the ships would have passed each other about a quarter of a mile, if there had been no change of course by the *Ocean*. When I turned, I saw the *Ocean* after the collision; she was the backing out, so I cannot say how far she cut in. Previously to her striking, I saw a small feather of water being cast from her bow, so she was undoubtedly moving, though slowly. That was the only guide I had as to her speed. When she had backed out, I saw the whole of the *Fusing's* bows were immersed, and the water running on to the decks in small waves. She was under water as far as the wheelhouse. I should suppose the *Ocean* went in right into the midships part of the ship—about fifteen feet, I should think, but I cannot say positively.

By Captain Bergman—The captain, I presume gave the order to stop the engines as he came forward to me. Five minutes before the collision, he was walking the deck aft. Just before that, he had been right forward to me. The look-out man was a Chinaman.

By the President—The look-out man made no report to me that he heard the whistle or saw the vessel.

By Captain Bergman—The captain and I went aft as soon as we saw a collision was inevitable. From the pilot-house to the engine room skylight, would be about 100 feet, or under. The signals from the pilot-house to the engine room for slowing and stopping are made by a gong in the engine room connected by a wire to the deck:—One stroke, to slow; once again, to stop; and for going astern, slow, two gongs in quick succession. There is no speaking tube from the pilot-house to the engine room.

By Mr. Medhurst—I should say our steam whistle was over 10 feet from the deck.

Robert Morton Andrews deposed—I was captain of the *Fusing*. I have my certificate of competency (handed in). I have no official log, or engine room register. The weather was thick fog on the morning of the 4th inst., at ten a.m. The direction of the wind S.S.W. We were steering N. ¼-E. by steering compass, N. ½ E. by standard. The ship was making from five-and-a-half to six knots. We heave no log; we have a patent log. It was hauled in at 8 o'clock. She had 99 knots from 8 the previous evening. Cannot say how many revolutions the engines were making. We reduced speed at six o'clock in the morning. Do not know the number of revolutions of the engines reduced. I gave the order to reduce speed. I ordered the chief engineer to reduce speed to five-and-a-half or six knots, at six o'clock. I placed an extra hand to look-out. It was at about 20 minutes to eleven when I first knew there was a ship near us. I ascertained it by hearing a whistle on the starboard bow. I was on the port side of the quarter-deck, and cannot say how many points on the bow. It would be from 160 to 180 feet from there to the wheel-house. When I heard the whistle I immediately went forward. On going forward, I heard the gong go, and put my head down the engine room skylight, and told them to stop her. I then went forward and asked the second mate where she was. He answered, "Broad on the starboard bow." I heard another whistle nearly abeam, and thought the vessel had gone clear, but immediately after saw the bow of the ship coming stem on. I immediately sung out hard a starboard and to back astern. The ship ran into us about 20 or 30 feet abaft the cat-head. I ordered our boats to be lowered, and, seeing the ship was sinking, called out to the other ship to help us, as we were sinking. She sunk in four or five minutes; about three minutes elapsed between my first bearing the whistle and the collision. The ship was steady on her course at the time I heard the whistle. We did not feel the wind at all. We were going as fast as the wind. We had the fore and main trysails set. We carried these all the night. It is not usual to carry sail when there is no wind. There was a strong breeze during the night from the E.S.E. to S.S.E. It was dropping from twelve o'clock to five.

By Mr. Medhurst—I gave the order to hard-a-starboard and full speed astern. That was the only order given. There was not time for it it to be obeyed. The *Fusing* did not sink under the bows of the *Ocean*. She had drawn off, and was out of sight. Assistance was immediately rendered, and every effort was made to save life.

By Lieut. Pipon—At the moment of actual collision, we were going about a knot, hardly that.

By Captain Bergman—The second mate told me the wheel had not been altered, that is how I knew she was steady on her course, when the collision occurred. I had not seen the compass.

By Captain Perrins—It is the custom in our ships to have an extra look-out in foggy weather and at night. It is not the practice to carry sail in calm foggy weather. At this time they were kept set to steady the ship. It did not occur to me as being possible that sails set in fog would divert the sound of my steam-whistle.

By the President—I do not know the thickness of the ironplates of the ship. I think it was ½-inch and ⅝, as near as I can judge. The *Ocean* was nearly at right angles when she struck us. She was injured on both bows. Our fog whistle was sounded every two minutes, by the man at the wheel. It was sounded twice after the *Ocean's* whistle.

By Mr. Medhurst—There were 45 crew, and seven of compradore's staff. There were 6 European crew including myself, and 39 Chinese. I do not know how many passengers there were, I think there were about 60. It is the compradore's place to know that. We had four boats. I think they were enough for 112 people. We had two life-buoys. The boats were all on deck, in their usual places, turned inboards. One of the largest boats was saved. The smallest boat was the jolly-boat; another was a gig. There were two others of equal size. After we were on board the other ship, they behaved very kindly indeed to us. Our cargo was general,—rice chiefly.

By Captain Bergman—Our draft when we left Shanghai was 11ft. 6 in. forward, and 12ft. 10 in. aft. It was not a deep draft. We had a deck cargo,—of wood and a few baskets of oranges. The wood consisted of small rafters. I do not know how many piculs it weighed. Our hold cargo weighed from 11,000 to 12,000 piculs. We have loaded to 13-ft. 4 in. and 12-ft. 9 in. The deck cargo did not interfere with the lowering of the boats. There was none near them.

By Mr. Wainewright—When the engines of a vessel are reversed, the action of the screw tends to throw her head sometimes to port and sometimes to starboard. There was only one gong signal for slow,—none for dead slow. We had to go to the engine-room skylight for that. Two gongs were the signal for going astern. The *Fusing* was not a very strongly built ship. She had light upper works, and hurricane deck. Her plates were not unusually thin for a ship of her size.

By Mr. Drummond—The ships were passing, in my opinion. I think that what caused the

Ocean to run into us, was by porting her helm. If the *Ocean* had not changed her course, I think we should have passed each other about a quarter of a mile. After going at reduced speed for six hours, the result of the gong signal to go slow would be to go slower. The *Fusing* was passed by the local surveyors at Shanghai.

By Mr. MEDHURST — I believe she would have passed us a quarter of a mile by hearing the whistle so far to starboard. The fact would not indicate to me the course she was steering. It is quite difficult to estimate distances in a fog.

By Captain BERGMAN—Hearing another vessel on my starboard bow, it is not my duty to starboard the helm ; it is my duty to take steps to steer clear of her. I did take precautions.

By Mr. MEDHURST—I was in the track of steamers from the North. The *Ocean* was bound South.

By Mr. DRUMMOND—There was no port to which any vessel could be going near the place of collision, which would take her across my track.

April 14th.

The Court resumed at 9.45 this morning, the first witness called being

JAMES SHEARER, who deposed—I was the engineer in charge of the engines of the *Fusing* on the morning of the 4th of April. At ten o'clock the engines were going 47 or 48 revolutions. At full speed they would make 61 or 62, at the trim she was in at the time. I had the watch from 8 to 12 p.m. on the 3rd. She was making about 61 or 62 at that time. I received orders from the chief engineer to keep her going as the was, with about 55-lbs. of steam, ¾-turn back of the link, and the throttle-valve about ½-open, which would give her about 48 revolutions. After 10 o'clock, I was told from the deck to go slow. I had not time to log the slow, when the Captain called down the skylight to stop her. I marked slow and stop on the log at the same time ; the orders were within 10 seconds of each other. In a minute or so afterwards, I received the order to go full speed astern. Those were all the orders I received. She was about a minute going astern when she struck, or something struck her. I left the engine room, and the engines were still going astern. They were not going astern when the ship went down, the chief engineer went down and stopped them. When the gong sounded, the chief engineer was not in the engine-room ; I stopped in the engine-room until the engines had been going astern about half a minute. I then went on deck and had been there about three quarters of a minute when the Captain gave orders to stop her. The chief engineer was standing near the engine-room skylights, and he went down and stopped them, and I followed him. I left the engine-room when I was in charge, because she was so far down by the head that I thought it was time to get on deck. I felt justified in leaving the engine-room with no one in charge, with the engines going full speed astern, after waiting there half-a-minute, and receiving no other orders.

By Captain BERGMAN—I opened one tube door, and three furnace doors before I went on deck. I did not ease the safety-valve, the chief engineer did that. I saw him do it. It was after I went on deck, and came down again with him.

By Captain PERRINS—I left the engine-room the first time because I considered my life was in danger.

By Mr. WAINEWRIGHT—I took charge of the engines at 8 o'clock a.m. They were then going 47 or 48 revolutions.

By Captain BERGMAN—I have been an engineer taking charge of engines, about two years and two months. I had a certificate, but lost it in the ship.

JAMES FERRIER next deposed—I was chief engineer of the *Fusing*. The greatest number of revolutions the engines made on that passage was 62. We left Shanghai on the 3rd April. I was in my room at about ten o'clock. My room is opposite the engine-room door on the upper deck. I heard a gong sound, and started to come out of my room. Just as I was coming out I felt a shock. I stepped over the passage and looked down the engine-room, and then forward. I remarked to the second engineer that the ship was sinking. When I saw that, I looked to the boats, as I had heard the Captain say "Clear away the boats, the ship is sinking." I then went down into the engine room, as the Captain said to me, "You might stop her, in order to keep the ship together." After going below, I stopped the engine, and opened the safety-valve. I then came on deck, and walked across the deck, aft of the the engine room sky-light. I said to the second engineer, "Come aft to the stern, it is our only chance." After standing there for about twenty seconds, the ship went from under us head first, and left us both in the water. I was in my cabin when the collision actually took place. In about two or three minutes after I heard the gong, I felt the shock. I did not leave my cabin immediately I heard the gong, because I was partly undressed. I was last in the engine room at eight in the morning. She was then averaging 48 revolutions by my watch.

By Lieut. PIPON—The speed up to 6 o'clock that morning was full speed, afterwards 48 revolutions. The engines were going astern after the collision.

By Captain BERGMAN—When I looked down the skylight of the engine-room, the engines were going astern. I heard no more than one gong strike, nor any orders given to the engineer. The gong I heard was, to slow. If an order had been given down the engine-room skylight on the side I lived on, I might have heard it.

By the PRESIDENT—When I felt the collision, I cannot say what the engines were doing, because I did not see them until I looked down. As chief engineer, I think I could tell by the vibration in my cabin what the engines were doing, provided there was no confusion on deck. There was confusion on deck. The Captain's gig was right over my room, and there were a great many passengers trying to get into it, preventing me from hearing any noise from the engine-room. They were not trying to get into the gig until the ship struck. The movements of the passengers about the deck before the collision prevented my hearing anything. After the gong struck, in about ten seconds she stopped.

By Captain PERRINS—With a following sea, 48 revolutions would put the ship through the water about five and a half to six ; by previous experience, I think that would be the speed. In fine weather, with 62, she would go about nine knots. About twenty minutes before the collision I came on deck, and the speed was about five and a half, I should judge by the water over the side. I did not hear a steamer's whistle.

By Mr. WAINEWRIGHT—When I gave over charge to the second engineer, at eight o'clock that morning, I told him to keep the engines as they were then, and not to let the steam get over 55 lbs. I counted the revolutions then by my watch, and they were 48. When I went down to stop the engines, nobody went with me, but I believe the second engineer was on the first platform from the upper deck. He had not preceded me there. My cabin is on the starboard side of the upper deck. When I came on deck about twenty minutes before the collision, I noticed that the fore and main-trysail, as I think they call them, were set. They did not appear to be drawing.

By Mr. DRUMMOND—When I went below to stop the engines, the fore part of the ship was under the water as far as the foremast, but I thought I should have time to stop her before she sank. The Captain gave me orders at 6 o'clock to slow down from full speed to 48 revolutions.

The QUARTERMASTER of the *Fusing*, a Cantonese, deposed (Mr. Tong-king-sing, by request of the Court, interpreted this witness's evidence.)—I was quarter master at the wheel, on the 4th April, and went there at 8 o'clock. The course was N. ¼ E. I did not change that course. I blew the whistle about every minute and a half. I heard the other ship whistle twice on our starboard side—both in the same place. I had no orders to alter the course at any time that morning. I was at the wheel when the ships actually struck. The helm was amidships. I received an order from the Captain, just before the collision, to put the helm hard-a-starboard. I obeyed the order, but there was no time for the ship to answer the helm.

By Mr. WAINEWRIGHT.—When I got the order to hard-a-starboard, I did not see the other vessel. When I saw her, she was striking.

By Mr. MEDHURST—The look-out man was drowned. He was on the look-out. He was one of the quarter-masters, E-Sing. When I heard the *Ocean's* whistle, she was close on the starboard bow.

By the PRESIDENT—I was at the helm alone.

The PRESIDENT said the Court thanked Mr. Tong King-sing for his services.

Mr. WAINEWRIGHT asked, before the Court proceeded to deliberate, that he should be permitted to ask the first officer of the *Ocean* a few questions with respect to a statement made to him by the second officer of the *Fusing*, in the course of conversation.

The COURT having granted permission—

ALEXANDER MCFARLANE, sworn, deposed—I have had a conversation with the second officer of the *Fusing*. At ten o'clock on the morning of the 4th April I was in my room on board the *Ocean*. I left it because I heard a steam whistle on the ship's port bow. I could not say where. I sighted the other ship just as I had run forward, and had got to the fore part of our bridge. I saw two sails and a funnel,—one of the sails was a little on the port bow, the funnel a little further on the port bow, and the other sail further still on the port bow. The two ships had then collided. I did not see her until the collision took place.

By Mr. MEDHURST—As I ran forward, I did not hear any order given as to the helm. I gave no order myself.

By Mr. WAINEWRIGHT—After the collision I had a conversation with the second officer of the *Fusing*. He told me he starboarded the helm, and that the ship had fallen a point off her course. I am quite sure of that. No one overhead the conversation. It took place in my room. He came there for tobacco.

Mr. DRUMMOND—If the Court attaches any importance to the question, I shall ask that the second officer of the *Fusing* be recalled and questioned upon it. If the Court does not attach any importance to it, I will not press it.

The COURT said the second officer of the *Fusing* had denied upon oath that any such conversation had taken place. It was only one man's statement against another, and no good would be gained by recalling the witness. The Court would attach what importance they felt the statements deserved.

By Mr. DRUMMOND—The cabin I was in at the time of the collision was below, and the ports were closed. I heard the sound of the *Fusing's* whistle through the ship's side. It struck my ear. My cabin door was shut. With the ports closed and door shut, I think it was possible to detect from what direction the sound of the whistle came.

Mr. WAINEWRIGHT having addressed the Court on the chief points in the evidence, as affecting the *Ocean*,

The CLERK of the COURT read the subjoined

Finding :—

"The Court, in pursuance of an order from Alexander Buller, Esq., Captain of H.M.S. *Modeste*, Senior Naval Officer present, proceeded to investigate the circumstances attending the collision between the British steamer *Ocean* (official number 68,090) and the Chinese steamer *Fusing*, which took place on the 4th day of April, 1875 ; and having deliberated, weighed, and considered the evidence brought before it, they have to record their finding, which is as follows :—

"1.—That the instructions of the Board of Trade were complied with by the *Ocean*, in proceeding at a moderate rate of speed, keeping a good lookout, and the whistle sounded ; but that, considering the locality and the thick fog prevailing, the speed of the vessel should have been moderated to a still greater degree.

"2.—That the Master of the *Ocean* displayed proper judgment in the orders given by him, both as regards helm and engines, after hearing a whistle on the port bow ; and that in the opinion of the Court, it was quite possible that the fact of the *Fusing's* fore and aft sails being set, might have diverted the sound of her whistle, so as to mislead the other ship.

"3.—That the Master, officers, and crew of the *Ocean* merit praise for the promptitude which was displayed in lowering boats and proceeding to the rescue of the sinking crew, and also for remaining by the wreck until all that could possibly be done for the survivors had been accomplished.

"4.—That the Court, on the other hand, deem it right to reflect strongly on the fact that the official log was entirely without any entry on the subject of the collision, and that the ship and engine logs were kept in a slovenly manner ; and that it will consequently

be necessary to call the attention of the Board of Trade pointedly to this neglect.

"5.—That the certificates of the master and officers of the *Ocean* shall be returned to them.

"6.—That the costs of the Court shall be borne by the master of the *Ocean*.

"Given at the British Consulate at Shanghai, the 14th of day of April, 1875."

Mr. Drummond applied for permission to make copies of the depositions, to supply to the Chinese officials, to satisfy them as to the facts of the case.

The Court granted the application, and the proceedings terminated.

CIVIL SUMMARY COURT

Shanghai, April 7th.

Before R. A. Mowat, Esq.

George Murray *v.* John Snowden.

This case had been adjourned from the 2nd instant, for the attendance of the defendant, a pilot, who was sued by the plaintiff, who is captain of the steamtug *Rocket*, to recover $99 for services rendered to the steamer *Glenfinlas*, at defendant's request, in August, 1874.

In reply to questions by his Honour, as to why he did not appear to the summons on the former occasion,

Defendant said he had a steamer to pilot down the river on the Friday morning he was to have appeared, and in consequence did not receive the summons until his return home on the ensuing Monday. He then found it on the table.

His Honour—But the Usher left the summons with your servant at your house, at five o'clock on the preceding Thursday, and gave him instructions to give it you the same evening. You went back home on that evening, did you not?

Defendant—Yes; but I did not get the summons.

The Usher—I called next morning, and your boy told me that you came home the same evening, that he gave you the summons, and you took it up to your bedroom.

Defendant still denied that he received it on the Thursday evening.

His Honour—I suppose you knew quite well that this summons was taken out against you?

Defendant—No, I did not, until my boy gave it me on the Monday.

His Honour—I did not decide the case on the previous occasion, because I was informed you had gone away before the time fixed for the hearing. I kept the case open to give you an opportunity of giving me your version of the matter. Do you deny your liability to pay the claim?

Defendant—Yes.

His Honour—Then I had better read the evidence taken on the former occasion. Having done so, his Honour directed the defendant to be sworn.

Defendant, sworn, deposed—I did not receive the summons on the Thursday evening. I found it on my table in my bedroom on the next Monday morning. I enquired of my boy who put it there, and he could not give me any explanation—at least, any that I could understand. I did not ask him when it came. I read it, and saw it cited me to appear here on the Friday. My boy speaks very bad English, hardly understandable.

His Honour asked the Usher what time he served the summons?

The Usher—At five on the Thursday afternoon, I left it at the house. The boy speaks very good English, and when I went there next morning, he told me that his master came home at seven o'clock the same evening, that he gave him the summons, that he took it up to his bedroom, and that he went out again about ten o'clock.

His Honour—When did you first go to the defendant's house?

The Usher—On Wednesday, but he was not at home.

Defendant—I returned at six on the Thursday, and the boy did not give me the summons then. I did not take it in my hand, and go upstairs with it. I left the house again before nine o'clock the same night.

His Honour — The boy appears to have spoken sufficient English to tell the Usher that you came home at six o'clock, took the summons in your hand, went to your bedroom with it, and left the house again about ten.

Defendant—I am certain I left the house again before nine o'clock.

His Honour ordered that the boy should be fetched to Court.

On his arrival, he replied to the questions put to him in English by his Honour, in perfectly intelligible pidgin, and corroborated the Usher's statement in each particular. He added that when his master returned home on the Monday morning, he did not speak to him at all about the summons.

His Honour (to defendant)—Perhaps that is the reason you could not understand him—that you did not ask him? The boy does not seem so very stupid.

During the absence of the messenger who went to fetch the boy, the case had been proceeded with, as follows:—

His Honour asked the defendant to make his statement on the matter of the *Glenfinlas*.

Defendant said—I employed the tug on the strength of what Captain Wilcox said to me on the evening before she was got off. That was on a Sunday, and I said to the Captain, if we had a towboat alongside we might get her off. He said, "Well, if there was a towboat here, I would give Tls. 50 if she did not come off, and Tls. 100 if she did." On the next day, the Captain went up to town. Captain Murray came alongside on that day, and asked me if I wanted a towboat. I told him I could not engage one, but would go ashore and telegraph to the Captain at Shanghai. We went ashore together, and telegraphed to Messrs. Gilman and Co.'s. We remained ashore till we got an answer. They telegraphed back, "Captain has left town; cannot engage tug." At the last moment, I engaged the tug.

His Honour—Where was your authority?

Defendant—From what the Captain said the night before.

His Honour—But when Captain Murray came alongside, you told him you could not engage a tug. Then you telegraphed to the Captain, and did not get any authority from him. If you had the authority of the Captain before, there was no necessity for you to telegraph, was there?

Defendant—The tugboat was then lashed alongside,—when the answer came back.

Plaintiff—Oh, no; she was at anchor on the other side of the river at that time. Mr. Snowden must be forgetting.

Defendant—The Captain did not get the telegram.

His Honour—Yes, he did; he got it as he was stepping into a houseboat, to return to the ship.

Plaintiff—We waited ashore at Woosung for an answer to our telegram, and when it came, I steamed across the river with Mr. Snowden, got on board the tug, and then went across to the *Glenfinlas*.

His Honour—Your telegram was sent at three o'clock, and you must have waited until nine before you were lashed to the steamer.

Plaintiff—Yes; Mr. Snowden is forgetting.

Defendant—We did wait; I remember now.

His Honour—Where, then, was your authority? The Captain's evidence shows that by that time 500 tons of cargo had been got out of the steamer, and that he did not want a tug, as he knew she would come off with her own steam-power.

Defendant—He did hint to me to engage a tug, and on the strength of what he said, I engaged one.

His Honour again referred to Captain Wilcox's evidence, to that portion of it in which he mentioned the instructions he had given to the defendant to carry out if he was not back at the ship by the last of the flood tide on the Monday night—viz., that he was to back the *Glenfinlas* astern, and try to get her off with her own steam-power.

Defendant—The Captain did not give me any instructions at all. I advised him to go up to town.

His Honour—What for?

Defendant—To hire lighters.

His Honour—But by that time the ship had been lightened enough; and the Captain says he went to ask about the future employment of the ship.

Plaintiff—The Captain must have gone to get lighters, because it was on that day I towed some lighters down to the ship. Before that time they had been dropped down with the tide. If the getting-off of the ship had been left to lightering, she would have remained on the mud about four days longer. The reason why I went to telegraph was to ascertain if I could get my Tls. 100, whether she came off or not—and not to ascertain if I was to be engaged. I telegraphed myself, but Snowden was with me. I would not take the Tls. 50 at first, because it was less than my charge.

Defendant—Who said it was offered?

Plaintiff—You did.

Defendant—No, I did not; I never said it was offered. I told Captain Murray what Captain Wilcox had said to me, and no more. It was about four o'clock when we received the answer, and I then told him I could not engage a tug.

His Honour—Then why did you do it afterwards? It seems to me that you should have remained in that position.

Plaintiff—It was six o'clock when I received this chit from Snowden:—

"Woosung, 23rd Aug., 1874.

"Herewith the telegram. I cannot do anything in the matter, neither can the Chief Mate. If you think it worth your while to take the offer that the Captain said to me, would be a sufficient guarantee. Yours truly,

"John Snowden.

"Captain Wilcox is not on board yet; and can't tell what time he will be on board.

"Yours, J. S."

His Honour—Now, could the steamer have come off the mud without the tug's assistance?

Defendant—Not that tide.

His Honour—You did it probably for the best, but to engage the tug was in defiance of the instructions you had received from Captain Wilcox.

Defendant—I did not receive any definite instructions; and what I did, I did in good faith from what Captain Wilcox said to me on the Sunday night.

His Honour said that the defendant was in this position. If he had engaged the tug with the authority of the Captain, as his agent, then the ship would have been liable; but if in the absence of such authority, and in opposition to the Captain's wish, he engaged the tug, then he was himself liable. The plaintiff had done the work, and must be paid by somebody for doing it. The Captain was not liable (since he had not employed the tug), and if the defendant also were not liable, then there would be services rendered for which no payment would be made. Defendant had admitted that he could not engage the tug, and went with the plaintiff to telegraph, and got a negative answer; then, after waiting for some hours, without anything else occurring in the meanwhile, he nevertheless engaged the tug. If it was, as defendant said, that the steamer could not have been got off that tide without the tug's assistance, then it was very hard for him to be obliged to pay the claim; as it appeared that the steamer must either have remained on the mud or engaged the tug. Captain Wilcox said he was positive she would have got off with her own steam-power that tide. Probably he was wrong in his idea, and defendant was right, but that could not affect the defendant's liability. Captain Wilcox did not engage the services of the tug, and the defendant did,—therefore, the defendant must be held liable to pay the claim.

Judgment for plaintiff, for full amount, with costs, $5.

Defendant said he should sue the ship.

His Honour told him if he was not satisfied with the decision he could appeal to the Chief Judge.

POLICE COURT.

Shanghai, 3rd April.

Before R. A. Mowat, Esq.

R. *v.* Charley Ketche, str. *Conquest*.

Drunk and resisting the Police.

P. C. Boysen, sworn, deposed—Last evening, the prisoner was causing a disturbance in an eating-house, in Hongkew. I told him to go on board his ship, and then put him out of the shop. Prisoner then drew a clasp knife from his pocket, and struck at me, at the same time using threatening language. I caught hold of his arm, and he bit me on my arm and wrist, while I was struggling with him. Some bystanders assisted me to take the knife from him. I did not strike the prisoner, nor did any other person. He was very drunk.

His Worship remanded the case until Monday, for the production of an European witness.

R. *v.* WILLIAM HARRIS.

Drunkenness and Assault.

Prisoner, a coloured man, is cook of the ship *Champion of the Seas*, and he was charged with committing the above offences on board, at about six p.m., on the 2nd inst. On being questioned, prisoner admitted that he was drunk, and also that he had assaulted the steward.

The Chief Officer deposed that the prisoner was very violent on the occasion, and challenged the Captain and his wife, and all the officers to fight him.

Prisoner said he did not remember offering so general a challenge.

GEORGE WHITE steward, deposed—Yesterday, at 6 p.m., I went to the galley for the tea, and found prisoner fighting there with another man. I could not get the tea in consequence, and reported the matter to the Captain. The Captain went to the galley, to see what was the matter, and I followed him. Prisoner then struck me. I went aft, but later on I had to go forward again, on that occasion, he seized hold of me, tore my coat, and threatened to murder me. The third officer and the carpenter came to my assistance and released me, and prisoner was given into custody.

Prisoner said the steward was as drunk as he was, and that he had been drunk for the last five days.

Acting Superintendent STRIPLING said the steward was sober when he came to the Police Station.

Further evidence, corroborative of the complainant's case, was given by the third officer, who also said he had never seen the steward drunk.

His WORSHIP sentenced him to one week's imprisonment for the disorderly conduct, and three weeks' hard labour for the assault—the latter being a heavier sentence than would otherwise have been imposed, but his misconduct had been aggravated by his wicked attempt in Court to damage the prosecutor's character by a malicious lie.

April 5th.

R. *v.* CHARLEY KETCHE.

Drunkenness and Assault with a Knife.

This case was remanded from Saturday for the attendance of witnesses. The defendant is a coloured man, and belongs to the steamer *Conquest*, and on Friday evening was making a disturbance at an eating-house in Hongkew, which P. C. Boysen endeavoured to quell, when the prisoner drew a clasp-knife and make a blow at him with it, at the same time using threatening language towards him. Prisoner also bit the constable on the arm and wrist, and behoved so violently that he (the constable) was obliged to call upon the by-standers to assist him. Upon the case being called on this morning,

ALEXANDER MCCAPPIN deposed—I was walking along the Broadway, on Friday night, when Boysen called me to assist him to take a knife from the prisoner. The knife was open in prisoner's hand. He was on the ground, and I put my foot on his wrist to prevent him using the knife. He tried to bite me. A Chinese policeman pulled me away, but I do not think he knew what was the matter.

Prisoner on being told that he had previously stated he had no knife, now said he did not know enough English to understand what was meant.

Deighton was accordingly called on to interpret the proceedings to the prisoner in Hindostanee. The latter still denied that he had a knife in his hand at the time in question, and said he did not see the last witness near the place at all.

Two other witnesses, speaking broken English, were also examined. Their depositions were to the effect that on the night named the prisoner was drunk and making a noise. They told him there was a policeman coming. He said he did not care for the policeman, but would go and fight him. Boysen then came, and told him to go on board. Prisoner said he did not want to go on board, then drew a knife from his pouch, and struck at the constable with it. The constable struggled with the prisoner, and the clasp-knife produced was afterwards picked up.

McCappin, recalled, said he received a clasp knife from one of the previous witnesses. It was not then open.

Boysen recalled, denied that he struck the prisoner at all. Prisoner drew the knife, and thinking he meant to stab him, he closed with him and called for help. Witness also produced the coat, through the sleeve of which, as also through a singlet sleeve, the prisoner had bitten him on the arm and wrist.

His WORSHIP directed the interpreter to inform the prisoner that he must be taught not to use a knife or his teeth in the manner described. He should sentence him to one month's hard labour.

R. (HA-KAT) *v.* ANDREW MACFIE.

Charge of Assault.

Complainant is carpenter, and defendant first mate of the steamer *Charlie Palmer*. Defendant admitted pushing the complainant, but said he did so under great provocation. He had told complainant to open some ports to give light between decks, and finding he had not done so, asked him the reason why. Complainant said he could not do it, and he (defendant) then told him there was a small side light, with only three or four nails to hold it, and that he could open that one. Complainant then put his face close to defendant's, and repeated that he could not do it. Defendant, who had taken up a small chisel and hammer, put them down and pushed the complainant, once on the breast and again on the shoulder, but did not touch his face. Complainant did not fall down.

Complainant (through Leon C. Weng, interpreter), stated that he was engaged painting a door, when the defendant called him to come and open the ports. He asked what ports he was to open, when the defendant said, "You are the carpenter, and ought to know what ports to open."

His WORSHIP asked how could the complainant know all this, if he did not understand English?

Defendant, on the question being interpreted to him, said the defendant spoke to him in the Malay language.

Defendant said he did not know Malay. A man was standing near them who could speak Malay, and perhaps complainant had spoken to him; but complainant understood English enough to know what was meant. He had always done the work before.

Complainant, on resuming his evidence, now accused the defendant of kicking him on the leg, knocking him down, and then kicking him on the chest and head.

The Malay tindal of the ship was called, but appeared to have seen very little of the affair, and seemed inclined to speak about it still less.

Defendant denied that he kicked the complainant at all. The latter had been fighting with the cook, and he was obliged to make them both fast in consequence. Complainant was bleeding from the face, and might then have received his injuries.

His WORSHIP considered the complainant had greatly exaggerated the facts of the case, and did not believe the defendant had kicked him in the way he stated.—Case dismissed, complainant to pay the cost of the summons.

April 6th.

Reg. (NIELS ABRAHAMSON (Dutchman), J. NIELSON (Dane), CHARLEY BROON, S SPARKS, J. BRICK (Italians), J. JEAN (Frenchman), A. FENECH (Norwegian), SAMUEL BRAY (Englishman), and GEORGE DEMETRI and THOMASI DEMETRI (Greeks), *v.* H. FRY.

Assaults.

Complainants are members of the crew of the British ship *Champion of the Seas*, and they summoned the defendant, the 3rd mate, for assaulting them at different times during the voyage from Cardiff to Shanghai.

The cases were investigated separately, and in several of them considerable difficulty was experienced in ascertaining the facts, owning to the complainants' ignorance of the English language. In the cases of the Italians, the services of an interpreter had to be obtained; the Frenchman's case was easily got over, the magistrate and the defendant both speaking the language; but in the others, a mixture of broken English and pantomime had to suffice, the facts however, coming out pretty clearly at the end. More than two hours were consumed in the hearing, but the circumstances of each case were so similar that repetition is needless, the defendant admitting that he did strike the complainants, but under great provocation of insolence, disobedience of orders, and neglect of duty. Disgusting language was alleged to have been used on both sides in some of the cases, and in one or two the blows were said to have been returned. From the tenor of the evidence, however, it was clear that the defendant had been too free with his fists.

Captain WILLSON said that the cook of the vessel, Harris, who was now in gaol, was the ringleader of all the disturbances. He had been to this port two or three times before, and put the complainants up to coming to Court, otherwise nothing would have been heard of the matter. Some of the complainants, in their own country ships, were accustomed to talk to their officers as to the men, and, when they came on board the *Champion of the Seas*, they began to teach both him and his officers their duty and position in the ship. He was sorry to say that such bad language as had been complained of, was quite common on board, although he had tried all in his power to check it. The men had, as he had been informed, behaved with great insolence to the third mate, and on some of them complaining to him that the third mate had struck them, he (the Captain) had told them he hoped if they ever again gave similar cause that they would get it worse. In one day, two belaying pins had been thrown at the boatswain, from the forecastle door, and since then they had treated that officer more like a boy than an officer. In most large ships, the third mate was really a youth,—a sort of loblolly boy among the crew, and they usually treated him as one—but the defendant was an officer who knew his work and would have it done, and the men did not like to have a third officer looking after them so sharply. That was about the secret of it all.

His WORSHIP asked the Captain if he wished to keep the complainants on board, after all this?

Captain WILLSON replied that he had no wish to discharge them. He believed they would not have thought of coming to Court at all, if it had not been for the man in prison.

His WORSHIP reminded the Captain that the complainant Nielson had said he had put down the date of the assault upon him; and also that the defendant, in the course of the hearing, admitted that Nielson had told him twenty times that he would summon him when he got to Shanghai. His Worship said it was most unfortunate that the Captain should have shipped so many foreigners, and asked how many men composed the crew?

Captain WILLSON said there were 20 able seamen in the forecastle, all told; the complainants were all the foreigners on board, the remainder being Englishmen. As to shipping so many foreigners, he could not help himself. He was unable to obtain men in Cardiff, and sent to Liverpool for some, the foreigners were sent to him, and he was obliged to take them.

His WORSHIP, addressing the defendant said—After making every allowance for you, and the position in which you are placed, and also remembering the bad language you say was sometimes used to you by these men, I am not at all clear that you did not lead to the bad language by using it yourself, and so provoking the men to retort upon you. It must be borne in mind that these men are foreigners, who are very touchy and passionate, and prone to violence, if they conceive they are being ill-used. And, taken altogether, there was such an amount of rough usage of them on your part, that I feel I must inflict what you will perhaps consider a severe punishment upon you. There are ten summonses taken out against you, and scarcely one in which the complainant was not justified in taking it out. The only case I have any feeling of uncertainty about is that of Abrahamson, but without expressing any particular view upon any one of them, I shall fine you $10, with costs $15; making $25 in all. In inflicting upon you what is but a light punishment, I am influenced by your conduct in Court. You have assisted me very materially in investigating the cases, and I am pleased with your conduct in that respect. You have spoken out plainly and told the truth, which is always the best plan to adopt in anything; but you should have borne in mind, these

foreigners do not understand your language, and when they receive an order they might be puzzled at first to understand it, and while they are thinking over it, you treat them in this rough way. You are no doubt a very able officer, but in these instances you have allowed your hands to come into play a little too soon. But I shall exercise the power I possess in inflicting a comparatively light penalty, for the reasons I have stated. The penalty and costs are, as I have said, $25.

R. (John Johnson and Anthony Fenech) *v.* J. Tooze.

Complainants are seamen of the same ship, defendant being first mate. The assaults complained of were committed during the voyage from Cardiff to this port, and consisted, as alleged, of striking and kicking.

Defendant said he called Johnson, who did not answer. He found him on the forecastlehead, and told him he must have been asleep, not to answer, to which Johnson retorted "You're a liar," and he (defendant) then struck him. Complainant struck back "like a man, for which he did not blame him, and there was a free fight."

His Worship told the defendant that, in his position, he ought to be ashamed of himself to speak in that way.

Fenech's case was that the mate on one occasion threw a belaying-pin at him, and on another occasion kicked him.

Defendant said this complainant was of no use in the ship, only as something for the men to play with.

His Worship—Well, I shall fine you $5 and costs for the first assault; and $1 and costs for the second.

R. (S. Sparks) *v.* C. Vardery and C. Scott.

All the parties to this case belonged to the same ship, and the charges were for assault.

Complainant said the defendants beat him both on board and shore on Monday. On being further questioned through the interpreter, complainant said it was Vardery only who beat him ashore, and the other man on board.

Scott said he spoke to the complainant about not handling the meat for dinner with dirty hands, and just touched him on the side, when he flew into a rage, and challenged any Englishman ashore to fight. He then ran on to the wharf, when Vardery followed him and they began to struggle. He (Scott) saw an open knife in complainant's hands, and ran and separated the combatants.

Vardery, on being asked by his Worship why he went ashore, replied, because Sparks challenged any Englishman to fight, and he went to try what he could do.

His Worship considered the charges were of a trivial nature, and dismissed the summonses.

April 8th.

R. (Captain Willson, ship *Champion of the Seas*) *v.* John Johnson, Niel Abrahamson, John Langmead, George Demetri, Thomasi Demetri, and Anthony Fenech, seamen of the same ship.

Refusal of Duty.

The first three defendants refused to work since Tuesday, and the last three since Wednesday.

Captain Willson deposed—I am master of the *Champion of the Seas*. The six defendants are A.B.'s belonging to her. The two Demetris and Fenech returned to the ship on Tuesday, from the Court, and in the evening asked for their discharge. I at once refused to give it them, and ordered them back to their duty. They refused to work, and said they would rather go to prison. Since then, they have done no work on board, and have been ashore most of the time. The other defendants came aft yesterday morning about 8.30, with the rest of the men who were then on board, and asked for money and leave. I told them the ship was going out into the stream, so that they must work and get her ready for sea, and afterwards I would give them twenty-four hours' leave and $5 a-piece. Longmead said, "What's $5, I had $15 the last time I was here." They muttered amongst themselves, and went forward. The mate afterwards reported that defendants would not turn-to, and I came ashore and got summonses for them.

His Worship called upon the defendants severally for an explanation of their conduct.

Abrahamson said he was afraid to go in the ship, and on Wednesday morning asked for his discharge, which the captain refused to give him.

Langmead said he refused duty on Wednesday morning. They asked the Captain for money and liberty,—and he said he would give both, when the ship was cleared up, got out into the stream, and sails bent. It was a bad ship altogether, and no one on board liked her. He refused duty for that reason.

His Worship told him that what he had said was no answer to the charge. It was not likely they would find what they would like all round.

Johnson nearly repeated Langmead's story, adding that he should be afraid to go in the ship.

His Worship—Why? Because you could not get the money? Do you intend to go back to the ship?

Defendant—Yes, if I get the money.

Abrahamson, recalled, said he did not ask for money or liberty, he asked for his discharge.

Fenech and the two Demetris were next questioned through the interpreter. The first-named said he refused to work because every officer in the ship was bad, and he was afraid to sail with them. He worked all Tuesday afternoon, and at 7.30 that evening asked for his discharge, which the Captain refused.

Thomasi Demetri said he refused to work any more because he did not feel inclined to. On being pressed for a more explicit answer, he said he wanted his discharge, and would not work any more. He had never been struck by an officer before, and so wanted to leave the ship.

Captain Willson said this man was made quartermaster on the voyage out. The striking he spoke about occurred in the early part of the voyage, as defendant had himself said on a former occasion. Nothing of the kind had occurred since, for he (the Captain) would not allow it. Defendant was a very good man and knew his work, only he did not know English thoroughly.

Defendant admitted that he had not been ill-treated since the early part of the voyage.

His Worship said he could not understand why the Captain wished to keep men who did not understand English, and wanted to leave the ship.

Captain Willson said it was a very hard matter now to get an English crew for a ship. A great many more foreigners than Englishmen sailed out of England now in English ships.

George Demetri gave exactly the same reasons as his brother, adding they were afraid they would be thrown overboard, and therefore asked to be discharged.

His Worship asked if the defendant knew he could not get his discharge unless both he and the Captain were agreed about it?

Defendant said he did not know that.

Thomas Demetri—If the Captain does not discharge us, we can discharge ourselves.

His Worship—If the Captain did not wish to ship you, could you ship yourselves?

No reply was given.

Captain Willson, in reply to a question, said there were five men out of his crew of twenty, on board and at work. They were Englishmen, and made no complaint.

His Worship—I shall order Langmead and Johnson back to the ship. The others, after what they have said, and after the cases they had preferred agains tthe officers, he could not think of ordering back, and he thought the Captain had better discharge them. There were ten distinct charges made against the third mate, all of which were, by his own admission, founded on fact, and in each of which more or less violence had been used. The two men he had named must go back to the ship and return to their duty, but the others he certainly could not order to do so.

Both Johnson and Langmead said they would not go back to the ship.

His Worship—I do not think I ought to send any of the ten men who brought charges against the officers, if they say they are afraid to go. It is is a very serious responsibility to take,

Captain Willson—Johnson was one them, and he says he also is afraid.

His Worship—He said he refused because he could not get the money. If that is true, it is no reason why he should not go back to the ship. Is the ship ready for sea?

Captain Willson replied that the ship was in the stream, waiting for her crew to bend sails and get away.

His Worship—Well, I shall send both Langmead and Johnson to prison for ten days' hard labour, and to be put on board at the expiration of the sentence, or earlier, if the ship sails.

Captain Willson—I was obliged to employ 25 Chinamen to take the ship out into the stream, because these men would not work.

His Worship—They must pay these expenses, and I shall make an order against them, that the expenses so incurred shall be deducted from their wages. But the recommendation I have given the Captain to discharge the men will probably be the best to take.

Captain Willson said he did not want the men to sail with him against their will, neither did he want to put the ship to any unnecessary expense. He had the interests of the owners to consider in the matter. He must avoid any unnecessary expense.

His Worship—If you can help it. You have come to me, and asked me to punish these men, and send them back to their duty. I cannot do that, and must refuse it. That will exonerate you.

Captain Willson ultimately said he would accept the advice and discharge the men.

Langmead and Johnson still refused to return to duty, and were taken to prison.

April 9th.

R. (Captain Willson, *Champion of the Seas*) *v.* John Osborn, John Todd, Charles Vardery, Henry Palmer, John Nielson, Samuel Bray, George Standley, and Jacques Jean, seamen.

Refusal of Duty.

The defendants were a portion of the crew of the ship named, and were summoned for refusal of duty. Three of them, Nielson, Jean, and Bray, had previously summoned the third mate for assaulting them, for which he was fined. Their excuse for refusing to do duty was that they were afraid to remain on board the ship because of the violence shown towards them, Bray adding that the third mate had threatened what he would do to him when the ship went out of this port. He (Bray) was afraid he would not have any life left in him.

Captain Willson said he had reason to believe that Bray had sailed in the same ship with the third mate on a previous occasion, and that there was something unpleasant between them.

His Worship asked if that were so?

Bray said he had sailed with the third mate for fifteen months in another ship, when he was a seaman before the mast, and was not worth much; but he had now got promoted, and thought he could do as he liked with the men.

The other five defendants gave various reasons for not doing duty, complaining of the water given them to drink and that they were sworn at by the officers. Vardery was very voluble in his complaints against the ship, and said she was not fit for decent men to be in.

Captain Willson said Vardery, who came aft for his discharge and was refused, said—if any man laid hands on him on board, he would cut his guts out.

Vardery admitted this, and said the Captain told him he was a terrible man, when he replied that there were other men as terrible as the Captain.

His Worship—But you appear to have been more terrible — the Captain did not use such language towards you.

Vardery went on to say that he wished to leave the ship, because he was sworn at by both the first and second mates.

Jean, the Frenchman, intimated that he was afraid to go another voyage in the ship, because of the bad treatment he had received. On Wednesday night he said he jumped into the river, and swam ashore.

Captain Willson (to whom his Worship interpreted this) said the man took his chest of clothes with him when he left the ship, and he must be a strong swimmer to swim ashore with a chest of clothes in such a strong current, from where the ship was moored. However he got ashore, the man was on board again the next night.

His WORSHIP asked Jean if that were true? Jean said it was true; he was hungry and went on board to get something to eat.

His WORSHIP hoped the men would be more sensible, and return to their duty. The ship, the Captain said, was a very good one, there was plenty of food allowed, and that they had all had their watch below.

Vardery said she was not a good ship, and was not fit for decent men to go in. He and others had been sent aloft, and also ordered to work at the pumps when there was no necessity for either, and at times when the petty officers were allowed to lie in their bunks and do nothing. The Captain was not a gentleman, and cared no more for a seaman than he would for a dog.

His WORSHIP.—There, that will do. I am very much pleased with the Captain's conduct here, and he seems to have done all that was necessary for you. The fact is, a feeling of dissatisfaction arose and spread among you. It is a pity he did not take my advice, and discharge those men who summoned the third mate. The three men—Bray, Nielson, and Jean, I cannot send to prison, for the reasons I have before stated; the other five will go to prison for ten days' hard labour each, to be put on board at the expiration of that time, or earlier if the ship sails.

Vardery—It is no use putting me on board; I do not mean to work any more.

His WORSHIP—We will see about that by-and-by.

April 10th.

R. *v.* F. BRICK, G. S. SPARKS and C. BROON.

Absent without Leave.

The three defendants are Italians, and seamen of the *Champion of the Seas*, and were charged with the above offence.

Police-Sergeant SKINNER stated that the three men gave themselves up at the Hongkew Police Station, at 10.30 on Friday night.

Louis Bertrand, a Chilian, who has acted as interpreter throughout the cases in which the *Champion of the Seas* was concerned, said—I was sitting in my room, when Brick came to me, dressed in Chinese clothing. He said he did not know what to do. I asked him where the other two men were. He went and fetched them. I asked them where they had been, and they said they had been for two days in a sampan on the river.

His WORSHIP—All three of them?

Bertrand—Yes, all three. Brick said the sampan-man gave him the Chinese clothes, and had also given them rice to eat. They had no money, but he (Bertrand) told the sampan-man to come to him on Monday, and he would pay him $3. The sampan-man made that charge.

His WORSHIP asked if the defendants were among those who had summoned the third mate, and was answered in the affirmative.

Bertrand informed the Court that the defendants went back to work on Tuesday, after they left Court, and in the evening went to the Captain and asked him for their discharge. The Captain refused it, and offered them three months' gaol. They came on shore that night, and he (Bertrand) went with them to see Mr. Wainewright, as Brick said he wanted legal advice. They could not see Mr. Wainewright, and went again next morning at seven o'clock. At twelve, the same day, that gentleman told them he could not undertake their case, and said the best thing they could do would be to go back to their ship. They were too frightened to go back, and thought they would be drowned if they were to do so—that they would get thrown overboard.

His HONOUR asked what were the men's wages?

Brick and Sparks said their wages were £3 per month. They had been on board the ship for five months, and had drawn about £6, besides tobacco and slops.

Sergeant SKINNER stated that when Bertrand and the defendants came to the Police Station, Bertrand did not inform him the men had been in a sampan on the river. He asked Bertrand where they had been since Tuesday, and he said he did not know. He had heard that Bertrand was harbouring them in his house.

Bertrand denied this, and said they had only called at his house, as they knew he was interpreting for them. The Sergeant did not ask him where the men had been. When they did come to his house, he (Bertrand) told them the best thing they could do was to give themselves up, and they had done so.

His WORSHIP—Tell them, I do not intend to send them back to their ship. The best thing they can do now is to go to the Sailors' Home, and see if Mr. Bowen will take them in.

The men then left the Court.

April 12th.

Reg. *v.* LUKE KOWKAND, ANTONIS THOMPSON, and EMANUEL ARACK, A.B.'s of the British ship *Sir Lancelot.*

The above named were charged with being drunk and fighting in Tien Dong Road at 6.30 p.m on the 11th inst. Prisoners admitted the charge.

His Worship said that they should have had better sense than to create a disturbance and get drunk on Sunday, and fined them $3 each.

Larceny.

ALFRED ROSE, GEORGE WHITE, RICHARD MOORE, and JOHN ROBINSON, A.B.'s, residing at the Sailors' Home, were charged with the larceny of two pairs of trousers and a shirt, the property of Lee-van-hee, tailor, No. 561, Broadway, Hongkew, on Saturday the 10th instant.

All the prisoners had been before his Worship lately for various offences—the two former having been sentenced to 14 days each for being drunk and assaulting the police, the two latter to three months' each for desertion.

With regard to the present charge, all denied having been implicated.

Sergeant SKINNER, sworn, deposed—On Sunday morning, the proprietor of No. 561, Broadway, tailor's shop, came to the station, and made a statement that he had been robbed by some Europeans on Saturday evening, of some clothes. He said that at about 9 p.m. twelve men came into the shop and looked at a number of articles, but did not purchase anything; they went away, and shortly afterwards he missed one pair of cloth trousers, one pair of dungaree trousers and a shirt. On Sunday morning, Rose, who was one of those who visited the shop on Saturday evening, came and asked if they had missed anything. On being told "yes," he said that if they would give him $2 he would get back the things that had been taken. He (Rose) then went away, and shortly after returned with another man (White) with the two pair of trousers concealed under their coats, and, on his trying to take possession of the articles, the two men left the shop. When witness arrived at the shop, he found Rose and White there and the other men. I took Rose and White into custody. I searched them, but found no property on them.

Lee-Van-Hee stated—On Saturday night, about 12 men came into the shop and looked at a number of articles, and then went away. I then missed two pair of trousers and a shirt. All the prisoners were there, except Moore. On Sunday morning, Rose came and said that he would get back the trousers, if I would give him $2. I said "very well." He went away and then returned with White, and wanted the money. I said, first give me the clothes. He then lifted his coat and I saw a pair of cloth-trousers concealed there; they were mine. The other man had the other pair concealed in a similar manner. I tried to seize them, but they got away. I sent for the Police. They came back again in a little while, and whilst talking the police came and took them into custody.

Rose.—Did not the master tailor give me 20 cents on Sunday morning?

Witness—No.

Rose—Your Worship, on Saturday three men at the Home received an order from Mr. Bowen for $3 each for clothes. I took them to this man's shop, and he gave me 20 cents on Sunday morning for so doing. I never left the shop after I entered it on Sunday morning until we were take into custody.

White denied being in the shop on Saturday, but was on Sunday morning, with Rose. They were called in by the master, and never left until taken into custody.

Two other men were called, named Holmes and Churchly, but their evidence threw no light upon the case.

George Bailey, constable of the Home, stated that, on Saturday night, he heard Robinson say some one has stolen "my new pants," to which he replied—"Well, don't make a noise, and perhaps you will get them back." Moore then said, "I have got your pants under my bed." Previous to this, I had been told that a Chinaman had lost some things. I looked under some of the beds in the room where ten men slept, and under Robinson's bed I saw a shirt, the same now in Court.

Cheng-Ah-Chen stated—I am an assistant in the shop. Four men came on Sunday morning and wanted $2. I was sent for the Police.

His WORSHIP questioned the first Chinese witness several times, as to how many men came and how many times, but the answers were so at variance that his Worship dismissed the case, at the same time time remarking that grave suspicion rested upon Rose and Robinson.

Reg. (Master of the *Charlie Palmer*) *v.* AH KAI, carpenter.

Refusal of duty.

Captain A. E. MACKINTOSH stated that the prisoner had refused duty on Thursday last, and left the ship on Friday without leave. He expected to get away from this port in about 10 days.

His WORSHIP ordered that the prisoner be kept in custody for 10 days, and then to be put on board, or sooner if the ship sailed.

April 13th.

R. (Master of the *Champion of the Seas*) *v.* JOHN OSBORN, JOHN LANGMEAD, CHARLES VARDERY, GEORGE STANDLEY, HENRY PALMER, HENRY GEORGE, JOHN JOHNSON, seamen of the said ship.

Continued Refusal of Duty.

Prisoners were put on board the ship this morning by the Police, and one and all refused to do any work.

His WORSHIP (to Standley)—What is your objection to go to your work?

STANDLEY—I am afraid to go in the ship, sir. I am afraid of all the officers.

The other prisoners all said the same—that they were afraid to go in the ship.

His WORSHIP—I think you are all behaving very badly, and it is nothing more than pure obstinacy on your part. You have been some four months in your ship, and from all I have heard, not one of you, with the exception of Johnson, has had a finger raised against him; but I suppose all I can say to you will not make any impression. Do you still determine not to work?

All—Yes, sir.

His WORSHIP—I cannot imagine how you can be so foolish. You know perfectly well that I have no alternative but to send you to prison. The Captain will not take men to sea with him that will not work. I shall send you all to prison for six weeks' hard labour each, except Johnson, who may have had some little ground of complaint, whom I shall sentence to two weeks' hard labour. You will all have to pay the cost of your maintenance in gaol, out of your wages, which will be paid into court. I am sorry to have to deal with you like this, but if you will persist in being so foolish I can't help it.

Henry George—The fact is, sir, we have kept quiet hitherto, thinking that we would be able to get our discharge. I have been fifteen years at sea, in all sorts of ships, and I was never yet called out of name.

His WORSHIP—Then you have been lucky.

U. S. CONSULATE-GENERAL.

April 13, 1875.

Before O. B. BRADFORD, Esq.

Charge of Desertion.

WILLIAM HAMILTON and CHARLES KRUSE, two seamen lately belonging to the barque *James S. Stone*, were arrested on the charge of desertion. They had refused duty before the vessel cleared, and were arrested and committed to jail, pending her departure. Two days before clearing, they asked to be released; and they each engaged to return to their duty, and give no more trouble. To this Captain Hallet consented, and the men were sent on board. During the evening, they put out the light in the forecastle, and while the watch was aft, went over the bows, taking their clothes with them. They were traced towards Sikawei and Woosung, but were not found until to-day. They both plead guilty to the charge of desertion, and were sentenced to sixty days imprisonment each.

MIXED COURT.

Shanghai, 6th April.

Before the Chinese Magistrate Chen and Dr. Yates, U. S. Assessor.

Robbing a Relation.

A native of Soochow was charged with stealing money and property, together worth $350, from his cousin, with whom he had resided in the above-named city. The robbery was committed several days ago, and the thief absconded to Shanghai. The cousin also arrived here, but gave no information of the occurrence to the police, although he wandered about the Settlement in search of the runaway. The latter was, however, observed by a native Municipal Constable on the 4th instant going into a lodging house, and although he had not heard of the robbery, the man's manner and appearance excited his suspicion, and he at once interviewed him. This being unsatisfactory, a search followed, the result being the discovery that he had $52 and several valuable articles of jewellery concealed on his person. Further enquiry led to information of the robbery, and that the prisoner was the thief.

Chên sentenced him to 300 blows with the bamboo, which were at once administered with more than usual severity, and the miserable wretch was afterwards sent into the city to be further dealt with by the Cheh-sien.

Wilful Damage to Trees.

Six men and boys were charged with wilfully breaking off branches of trees in different parts of the Settlement, and were sentenced to a day's imprisonment each.

Clippings.

Petty house robberies among the Chinese seem again becoming frequent in the Settlement. On Saturday afternoon, about two o'clock, 3,000 *cash*, two beds, and some wearing apparel were stolen from the lodge of a Godown-keeper, at No. 4, Yang-king-pang, and about twelve yesterday morning, a pistol, worth $5, was stolen from a house in the Honan-road.

On Saturday morning, from an early hour until after nine o'clock, frequent discharges of heavy artillery were heard from the direction of the Kiangnan Arsenal. We are informed that the Chinese gunners were being put through their numbers in accordance with Western drill and practice. The men are stated to have performed their duty with exactness.

We understand that the action which Mr. Edward Norton, of Norton, Lyall and Co., Hongkong, came home seventeen months since to institute against the owner of the s.s. *Parana* for breaches of charter-party on a voyage from China to Australia and back has, after a trial before Mr. Arthur Wilson, the arbitrator, appointed by the Court of Exchequer, lasting twenty-one days, resulted in an award in the plaintiff's favour. The damages are referred to the arbitrator for assessment. It will be remembered that, in June, 1873, the captain and agents of the *Parana* sued Messrs. Norton, Lyall and Co. for seven months' charter money, and obtained a verdict, it being the last cause tried before the late Mr. Justice Ball, and immediately preceded the memorial resulting in that gentleman's resignation. The owner (Mr. Malcomson) being resident in Ireland, refused to appear to Messrs. Norton, Lyall and Co.'s cross action, taking advantage of a certain clause of the Common Law Procedure Act regarding Irish and Scotch defendants, which had been inadvertently imported bodily into the Hongkong Ordinance. This question of absent defendants was raised in the Hongkong Legislative Council by the Hon. Richard Rowett, and it has, we believe, since been rectified by the new code recently introduced into the colony.—*Daily Press.*

The steamer *Olympia*, Captain Paulsen, left Hamburg Feb. 2nd, and arrived at Gibraltar on the 9th. Left again same day, and arrived at Port Said on the 19th. Left Suez on the 22nd, and arrived at Aden on March 2nd, leaving the same day. Arrived at Penang on the 18th and left on the 19th. Arrived at Singapore on the 21st and left on the 24th. Arrived at Hongkong on the 4th instant, left on the 5th, and arrived at Shanghai on the 11th, and went alongside the Wharf at 7.30 a.m. on the 12th inst. Had strong N.E. gales and heavy sea from Hongkong to Shanghai.

The following passage is taken from a letter in the *Alta California* of the 6th March, signed O. Shaw :—

AT SHANGHAI

We spent some ten days again at an Astor House, viewing the sights and working up our observations. We could not fail to be struck with the grand style in which everything is done here. The clerks receive large salaries, but their expenses are in proportion large. The large establishments of the leading merchants are remarkable, consisting as they do of several distinct stores — book store, stationery, hardware, ship chandlering, dry goods, fancy goods, and tailoring. I cannot help mentioning a few of the prices we paid. I have a little pamphlet guide-book of some sixty pages which cost a dollar and a half. Our worthy chief, deeming his locks too long, had them taken off, and paid a dollar without a murmur—but as it was at the "Toilet Club," the evident respectability of the place should have satisfied him. I would like also to give a free advertisement to the man who sold me a pack of cigarettes for fifty cents.

A few lines above I believe I said something about "clerks." I apologize. In these Englishfied settlements there are no such things. For some reason, to me unknown, they seem to be ashamed of their calling, and style themselves

MERCANTILE ASSISTANTS.

They tell stories of the clubs here (which, by the way, are magnificent affairs), that no man in trade is allowed to enter. But his "mercantile assistants," whom he employs at so much a month, are readily welcomed, the taint of trade not affecting them.

The steamer *Amoy*, Captain Drewes, left Hongkong at noon on the 5th instant. Had light winds and hazy weather for the first twelve hours. On the morning of the 6th encountered a heavy gale from the N.E. with rightful sea. Passed the steamer *Swatow* bound in to port, and another steamer at anchor under Namoa Island. Arrived at Swatow on the 6th, still blowing hard. Left on the 7th at 3 p.m., and had moderate N.E. wind with heavy sea until noon of the 9th. Engines going half speed during night of the 8th. Passed the steamer *China*, and was in company with the steamer *Olympia*, bound for Shanghai, on the 10th. Arrived at Shanghai at 3 p.m. on the 11th.

The British ship *Sir Lancelot*, Capt. Felgate, left Gravesend, Dec. 20th, 1874, and had a favorable run down channel ; then had light winds and moderate weather to the Equator, which was crossed on Jan. 12th in Long. 24°.50 W. Had very light S.E. trades. Passed the meridian of Greenwich on Feb. 2nd in Lat. 41° S. From thence to the Eastern Passage, light Westerly winds throughout. Made Alles Straits on the 11th March. Off the Island of O. B. Major, spoke the barque *Eleanor*, London to Hongkong, 121 days out. Cleared the Islands on the 20th March, and from thence to the Saddle Islands, had variable winds, the latter part strong breeze and heavy head sea. Arrived at Shanghai on the 8th instant, having made the passage from pilot to pilot in 107 days.

The German barque *Tek-li*, Captain E. C. Petersen, left Hamburg on the 18th October. On the 20th, experienced a heavy gale from the N.W. On the 23rd put back to Cuxhaven, through stress of weather. Sailed again on the 29th with Easterly wind and fine weather. On November 2nd, during thick weather, took the ground under the South Foreland ; got a tug and was towed into Dover roadstead the same day. Left again on Nov. 5th, and beat down channel with Westerly winds ; then had Easterly winds and fine weather. Nov. 19th, passed St. Antonio (Cape Verd Islands.) Same day, spoke German barque *Anna*, from Cardiff, for Singapore, 13 days out. Crossed the Equator on Dec. 9th, in Long. 26° 56' W. 34 days out. Experienced light and variable winds, and no decided trade winds, either north or south of the Equator. Passed the meridan of Greenwich on the 29th, in Lat. 35° South, 54 days out. Had four to five days calm off the Cape. Jan. 9th, spoke English ship *Rajmahal*, from Liverpool to Calcutta, 64 days out. In Lat. 36° South, and 5°44 E. Long., on Jan. 16th, British barque *Othello*, Liverpool to Bombay, 74 days out. In 39° South, and 21° 34' E., on the 17th, spoke British barque *Meridian*, Liverpool to Rangoon, 71 days out. In 38° South and Long. 25° 17' E.; on Feb. 1st, passed St. Paul's Island. From thence to the Sandalwood Islands, had moderate weather and variable winds. In the Gilolo Pass, spoke the English barque *Burton Stather*, from Madura, to Amoy, 26 days out ; on the 7th March, the English barque *Grasmere*, from Cardiff to Shanghai, 130 days out. Had light and variable winds and weather from the north end of Formosa until arrival. Made the Saddle Islands on the 3rd, and arrived at Shanghai on the 8th inst. Passage made in 151 days. General cargo, and 4,000 barrels of gunpowder and ammunition.

PASSENGERS.

Departed.—Additional per str. *Golden Age*, for Nagasaki—Messrs. W. G. Herdman, H. Jousberry and S. J. Yeo ; 15 Chinese. For Hiogo—Mr. and Mrs. C. F. Walsh, Messrs. A. L. Encarnação and H. Rattan. For Yokohama—General and Mrs. Allen, Mrs. C. S. Coy, Dr. Nesson, Messrs. C. V. Housman, R. M. Gray and S. Walker ; 10 Chinese. Additional per P. & O. str. *Pera*, for Hongkong—Mrs. Baxter, Maria Consigli, Messrs. Thomas White and J. M. Taylor. Per str. *Shinking*, for Tientsin—Capt. Hoskair, Messrs. Laen, Muller, Forster, Batt, Davidson ; two Mandarins. Per M. B. S. Co. str. *Tokio Maru*, for Nagasaki—Mrs. J. H. Mooney, Capt. Harrington. For Yokohama—Mrs. Brooke, Messrs. H. Finke and T. Kumashiro. Per P.M. str. *Nevada*, for Nagasaki—Mr. and Mrs. Kassburg, Messrs. E. Mitchell and J. Prentice. For Hiogo—Miss Winn, Messrs. R. W. Brown, W. Cance, G. R. Corner, E. P. Hague and J. A. Hawes. For Yokohama—Mrs. Geo. Harrison, Misses Cargill, Mr. and Mrs. Ede, Messrs. M. O. Fitzgerald, J. W. Lambuth, J. Clancey, G. Slade, N. P. Kingdon, J. F. Twombly and Capt. E. D. Shafts. For San Francisco—Mr. and Mrs. Houston and two children, Mrs. J. W. Lambuth and two children.

Arrived.—Per str. *Haining*—Mrs. Baxter ; 80 Chinese. Treasure—Tls. 80,000. Per M. B. S. Co. str. *Tokio Maru*—Mrs. W. H. Smith, infant and servt., Mrs. J. H. Brooke, Mrs. Bessie O'Connor, Messrs. P. V. Graut, E. Dupuy de Lome, H. Finke, Genda, G. H. Bright and Fung Su Lam. Steerage—6 Chinese ; 4 Japanese ; 2 Europeans. Treasure —$11,900. Per str. *Shanghai*, from Chinkiang —Messrs. Gibson, Wolff and Morgan. Per str. *Shingking*—Dr. W. Williams. Per str. *Appin*—Mr. Newbury. Arrived.—Per str. *Paouting*, from Tientsin—H.E. T. F. Wade, C.B., Mrs. Wade and family. From Chefoo —Mrs. and Mrs. Cooper. Per str. *Amoy*— One European ; 71 Chinese. Per str. *Gordon Castle*, from London—Mr. and Mrs. Williamson and family, and Mr. Quinton. Per str. *Taku*—One European ; 15 Chinese. Treasure —Tls. 46,160. Per str. *Peking*, from Hankow—Mr. and Mrs. Ede, and Mr. McLean. Per str. *Plymouth Rock*, from Hankow—Mr. and Mrs. S. C. Rose. From Kiukiang—Mr Claney. From Chinkiang—Mr. Goldspink, H.I.M. Customs. Per M.M. str. *Meiko* from Marseilles—Mrs. Allan and infant, Mr. Gordon, Mr. and Mrs. Jerdein and infant, Messrs. Mackellar, Stokes, Falconer, Carcey, Loureiro and Martinot. From Galle—Messrs. Eschoff, Colborne Baber. From Hongkong— Messrs. C. W. Siegfried, H. Hoppius, Groetz y Peil, Chevalier de Shaffer, H. Worms, C. W. Haskell, J. C. Caldwell and Nusen.

Leaving.—Per M.M. str. *Peiho*, for Hongkong—Messrs. W. L. Hunter, Symons, M Tickio-Choy and servant. For Port Said—Dr. L. Wells Williams, Mrs. and Miss Williams. For Marseilles—Mrs. Wade, five children and maid, Mr. and Mrs. Rose, Mrs. Symons, Messrs. J. Newbury and E. Seligmann.

COMMERCIAL INTELLIGENCE.

SHANGHAI, APRIL 14TH, 1875.

ARRIVALS.—From London, the *Sir Lancelot* and steamship *Gordon Castle;* from Hamburg, the *Tek-li* and steamship *Olympia;* and from Marseilles, with the London mails of 27th February last, the M. M. steamer *Meikong.*

TELEGRAMS.—London, 10th April.—*Cotton* market "firm;" *Mid. Orl.*, 8⅛d. per lb.; Manchester market "strong;" 8¼-lb. *Eagle Shirtings*, 10s. Export of *Plain Cottons*, during March, to Shanghai, 20,250,000 yards. *Iron*, £10, and W.B. *Lead*, £22 per ton.

PIECE GOODS.—Beyond the clearance of former settlements, there has been little done in PIECE GOODS between the foreigner and native since this day week; but the deliveries—for the North particularly—have been heavy, and there are considerable shipments still to be made ere the dealers can give much of their attention to further purchases. The cargoes of the steamers that have gone to the North since the arrangement of "the difficulty" have not yet been published by the Customs. The native advices from TIENTSIN are not unfavourable, and the market is not likely to be much affected by the large supplies lately sent thither. Low counts of 6 and 7-lbs., and Ordinary Mexicans 7-lbs. *T-Cloths*, were scarce and wanted, and so were good *Jeans*. Consequently, these articles have been in constant request here, but the week's receipts have been light, and are held for figures which are a little beyond the present ideas of buyers. As it is, dealers are offering higher rates than were current last Wednesday. Moreover, they have faith in the future, and are willing to buy of the desired qualities—to arrive—at present currencies. They have bought a fair Ordinary 8-lb. *T-Cloth*—afloat—at Tls. 1.70 per piece, and have offered Tls. 1.82 for Dewhurst's M. T. without success. They have also settled Common 7-lb., for arrival—at Tls. 1.29 per piece, and Mendel's *Pillar* in godown at Tls. 1.33 per piece, while Tls. 1.40 per piece has been refused for a Mexican, which, on 29th ultimo, was worth only Tls. 1.37 per piece. The finest descriptions are not in favour, and are to be had on easier terms than those quoted on this day fortnight.

Grey Shirtings.—The Shirting market is either not so strong as it was, or the dealers are doing all they can to lower it. They are in want of low medium makes of 8¼-lbs. goods, but expect to get them at a decline of 4 *a* 5 cands. per piece on the quotations of 31st ult., and aver that that is the established fall by recent retail sales. Holders as a rule disbelieve the statement, and although a few of them are inclined to allow a couple of candareens, the majority are against any reduction. At the Public Auction, last Thursday, the rate for C.P.H. *Peacock* 8¼-lbs. was dropped to Tls. 1.64¼ per piece, as against Tls. 1.67½ per piece at the previous sale; but, considering the absence of enquiry, and the determination of the northern men to abstain from business until the settlement of their differences, the decline was not surprising. Common 6 and 7-lbs. have been wanted, but their scarcity curtails business. Rates for these are very steady, with a slight upward tendency. The *Heavy Shirting* market has been less active. Still, stocks—which are light—and those parcels brought by late arrivals, which were not previously sold, command full rates, and buyers for early delivery are easily found.

White Shirtings.—A fair enquiry has prevailed for 60, 64, 66 and 72 Reeds, but the quantity sold has been small, the offers made being rather too low to induce business on a large scale. Former rates have been maintained.

Drills.—Quietness has ruled throughout, but stocks are getting into limited compass, and the supplies afloat are not heavy—so sellers are in no way anxious, and firmly decline the reduced offers of buyers.

Sheetings.—Business in these has taken place at previous quotations, which are Tls. 2.90 *a* 3.00 per piece for *English*, and Tls. 3.75 for *American*. The sales "to arrive" and "on the spot" of both kinds aggregate nearly 8,000 pieces.

Jeans.—The demand has been rather fitful and has not resulted in much, principally because there are few of the finer qualities in stock, and the holders of the commoner descriptions refuse to sell at the low prices tendered. Frequent enquiries have been made by the dealers for chops of which they know well enough there are none here, and none on the way, and they know also that they are perfectly safe in offering fancy prices for them. This gives the market an imaginary sort of a character, and may prove dangerous if owners are over-credulous.

Fancy Cottons.—Only a few *Chintzes*,—blue and assorted,—*Handkerchiefs*, *White Spots*, damaged *Turkey Red Shirtings*, and 18-inch *Velveteens* have been reported this week. Quotations will be found below.

Woollens.—There is but little new to notice in this department. Some C. P. H. *Long Ells*, assorted colours,—without scarlet—have been quitted at Tls. 6.70, and *Spanish Stripes* have realised full values, but *Camlets*, *Lastings*, *Crapes* and *Figured Orleans* are still most difficult to move, and prices continue irregular and low. The business of the week comprises 500 pieces *Long Ells* as above; 600 pieces *Spanish Stripes* at Tls. 0.55 *a* 0.58 per yard; 100 pieces Orange *Camlets* at Tls. 13.00, and 500 pieces assorted at Tls. 13.25 *a* 13.40 per piece; 500 pieces *Crape Lastings* No. 2 quality at Tls. 4.15 per piece; 3,500 pieces *Figured Orleans* at Tls. 3.05 *a* 3.20 per piece; 200 pieces *Dutch Camlets* Dark Blue at Tls. 19.00 per piece, and 90 pieces fine *Medium Cloths* at Tls. 1.17½ per yard.

From the outports there is nothing worthy of note. Matters were working smoothly at TIENTSIN. Business was going on at CHEFOO, but prices showed a loss on those ruling here. Quietness prevailed at CHINKIANG; the spring races formed an excuse for the limited trade at HANKOW; and the commerce of JAPAN by last advices was just as bad as ever.

SILK.—The last public telegrams from London report the tone of the silk market unchanged with slight demand, and quote Ku-kee's "Chin-jan" 16s. 6d., and common No. 5 Tsatlees 12s. 3d. per lb.

Total settlements for the past week are estimated at about 700 bales, fully two-thirds of which consist of re-reels. A few bales of Tso-ping's "Chick" chop are reported taken at Tls. 387½ per picul for No. 3, and about 100 bales China throwns, and some long reel Taysaams go forward by this steamer.

For the American mail which left this morning, nearly 500 bales were purchased, prices paid being Tls. 310 *a* 395 for common and chop re-reeled Hainings, and Tls. 290 *a* 320 for common and market re-reeled Tsatlees.

Arrivals have almost ceased, and the unsold stock does not exceed 500 bales.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods for the week ending 12th April, 1875, compiled from the "Customs Daily Returns," Nos. 75 @ 80, both numbers inclusive.

METALS.—*Nail-Rod Iron.*—No further transactions are reported, and quotations are unchanged. *Lead.*—The market continues depressed, and prices have again receded. To-day's quotations are nominal. *Tin.*—*Fong Hing* has been in a little request, and has been sold at 2 mace per picul advance on the rates of last week. There has been scarcely any enquiry for the commoner brands. *Copper.*—Best *Slab* finds buyers at quotations, but the qualities saleable at one time are small. *Quicksilver* has experienced a further decline of Tls. 10, and is to be bought at the reduced prices.

COTTON.—A slight concession in price has led to a small business in best staple, but the commoner descriptions have received no notice. Supplies from the country are still carefully regulated by the hongs, and as soon as enquiry improves, they will demand higher rates.

EXCHANGE.—Bank paper has ruled steadily at 5s. 9d. per Tael for this mail, and a fair amount of business has again been done in it at that, Credits being saleable, as previously, at 5s. 9½d. to Banks, and 5s. 9¼d. to private buyers. Documentary Bills have remained stationery at 5s. 9⅜d. per Tael; and Rupee quotations shew little change on those current at the close of last mail, being Rs. 306 on Calcutta, and 305½ on Bombay. Neither has the rate on Hongkong altered, and a moderate amount of demand Bank bills has been settled at 27⅛ per cent. discount. The following were the quotations at noon to-day.

CLOSING RATES OF EXCHANGE.

ON LONDON.—Bank Bills, at sight .....5s. 7½d.		₩ Tl.
,, ,, at 6 m/s. .....5s. 9d.		,,
Credits, at 6 months' sight .....5s. 9½d.		,,
Bills with Documents, 6 m/s. .....5s. 9⅝d.		,,
ON PARIS.—Banks at 6 months' sight ..... Fcs. 7.22½		,,
Credits, at 6 months' sight .....Fcs. 7.31¼		,,
Bills with Documents, 6 m/s. .....Frs. 7.33¾		,,
ON CALCUTTA.—Bank Bills, demand, ...Rs. 306	₩ 100 Tls.	
ON BOMBAY.— ,, ,, ,, ...Rs. 305½	₩ 100 ,,	
ON HONGKONG,—Bank Bills, demand, 27⅛ per cent. discount.		
Private Bills, at 15 days' sight, 27½ per cent. disc.		
INTEREST.—7 *a* 9 per cent. per annum on first-class securities.		

PRICES OF BULLION.

MEXICAN DOLLARS.—73.025 Tls. per 100 Dollars.
CAROLUS DOLLARS.—80.03 ,, ,, ,, ,,
PEKIN GOLD BARS.—98 Touch, 172.20 Taels, Shanghai Currency per Bar of Tls. 9.7.2 Chauping weight.
HAIKWAN SYCEE.—111.4.0 Taels Shanghai Currency per 100 Tls. Haikwan weight.
CANTON SYCEE.—109.5.0 Taels Shanghai Currency per 100 Taels Canton weight (nominal).
BAR SILVER.—998 Touch or 17½ Betterness, Tls. 111.25 Shanghai Currency per 100 Taels, Canton weight.
COPPER CASH.—1,580 per Tael.

EXPORTS.

TEA.—During the past week, very little has been done in Green Teas, but the purchases previously made—added to those given below—have been sufficient to fill one more ship for America. To England, shipments have been of a trifling nature, and as our stocks are reduced to a very small compass, the season may be considered almost at an and.

The settlements since last week have been—

Fychow, Moyune, &c.	2,600	½-chests.	Stock— 490	½-chests.
Pingsueys	2,600	,,	2,000	,,
Shanghai-packed.....	700	,,	1,300	,,
Total.....	5,900	,,	Total... 3,790	,,

No change in prices are quoted. Export figures, in the absence of departures, exhibit no change from those last given.

COMMERCIAL POSTSCRIPT.

April 15, 1875.

Arrivals.—(Not mentioned above.)—April 10th, Brit. schooner *Annie Mabel*, from Sydney; 14th, Brit. ship *Cuttg Sark*, from Sydney.

Departure.—April 8th, American schooner *Almatia*, for Singapore.

The French mail steamer *Peiho* takes 500 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 9d. First-class Credits to Bank, 5s. 9½d. First-class to Private buyers, 5s. 9¼d. Private and Documentary, 5s. 9⅝d. On Paris, Bank, Frs. 7.27½. Private, Frs. 7.33¾. On India—Bombay Bank, demand, Rs. 305, noml. Calcutta Bank, Rs. 306, noml. On Hongkong, Bank Bills, demand, 27⅛ per cent. discount. Private, 15 days' sight, 27⅜. Gold Bars, Tls. 172.00. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 73.00 per 100. Carolus dollars, Sh. Tls. 80.40 per 100. Copper cash, 1,580 per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

H. & S. Bank.—A limited business has been done at 16 *a* 16½ % *dis.*, Exch. 72¼ cash, at 16 % *dis.* and Exch. 72¼ for 31st July, and at 18 % *dis.*, and current Exch. for 31st Aug. The market closes with sellers.

S. S. N. Co.—A small business has been done at Tls. 77 and Tls. 76 for cash, the market closing with a few sellers at Tls. 76.

Fire Insurance.—There are sellers of *Hongkongs* at $480, of *Victorias* at $126, and of *Chinas* at $133.

Marine Insurance.—*Yangtszes* have been placed at Tls. 585, and *China & Japan* shares at Tls. 78. Shares are still obtainable at same rates.

Wharf Co.—A few shares have been placed at Tls. 96 for 30th instant.

The Weather continues changeable, as the wind varies between North and South pending the final setting in of the Southerly monsoon. Friday was cold, and Sunday and Monday were fine and warm. Tuesday was wet; yesterday again was bright and warm, but with a very depressing temperature. The thermometer has fluctuated between 43 and 69.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, SATURDAY, APRIL 24, 1875

ACCORDING to usually accepted ideas, the Chinese are a nation of great and undoubted antiquity, who, centuries before the traditional epoch of the Flood had advanced to a state at least bordering on civilisation. The more rigid believers in the usually received chronology of Archbishop Usher are, however, content to believe that some twenty-two or twenty-three centuries before the Christian era, three great emperors — Yao, Shun, and Yü, in some wonderful and unexplained manner, dug out the Yangtsze and the Yellow River, and so "reduced the land to order." The great Bunsen did not hesitate to state that Yü was as much a king as Charlemagne, and was content to swallow the Yü Kung, and even the tablet of Mount Hang, with all their crudities and absurdities; and because Bunsen did this, with the very limited knowledge of Chinese or China to which he could lay claim, hundreds are willing, in order to save themselves the inconvenience of reasoning on their own account, to accept the dictum as true. What we do know of the early history of China, is of a very different nature. It, however, strengthens the claim of the Chinese to a very respectable antiquity; and, had Chinese historians and their foreign followers confined themselves to what facts they had before them, they would have rendered a greater service to historical research in general, and have saved chronology many of the pitfalls into which it has fallen. The Chinese tell us that the Three Emperors—or rather gods, for "Ti" is the word used indiscriminately for either—were succeeded by a race of sovereigns, gradually deteriorating till the time of Kieh, and that he was so bad that Heaven took away the appointment, and conferred it on T'ang. Again we have the same story. T'ang's successors were much as Yü's, till at last we get to Chow, the exact counterpart of Kieh, who was superseded by

Wu-wang, in a contest the details of which correspond minutely with that of his supposed predecessor of some 650 years. The successors of Wu-wang get on well enough for a time, and appear as kings exercising an imperial sway; till at last, in the books of the Confucian epoch, we come across contemporary history, and find, instead of a vast and settled empire, there exist a number of disorganised and generally hostile states, acknowledging a common ancestry, like those of Greece, and looking up with a sort of ill-defined allegiance to the elder branch—that of Chow, but in little or nothing permitting the interference of the elder state with their own internal or external affairs. This exhibits a state of affairs so unlike the traditional China of antiquity, that we are well justified in asking what are the authorities, if any, for the so-called dynasties of prior antiquity. Investigation shows us absolutely none. Not one authentic scrap of writing; not one inscription or hieroglyph; not one work of art in any shape or form, which, upon the least exacting canon of traditional criticism, we could class as anterior to the time of the Chows, is in existence. It is in fact the blackness of darkness itself. Now, we have said that the Chinese can lay claim to a very respectable antiquity. Their authentic history goes back to the eighth century B.C., or some two hundred years earlier than that of Greece; and even beyond this, by the dim light of tradition, we can trace them some centuries earlier. Still, tradition is to be taken as by no means a safe guide, and is always liable to be upset by the discovery of some more authentic guide. Tradition does go back for some time further, and the pages of Mencius especially seem to hand down some which have at least the plausible appearance of truth. We may, by these means, trace a tribe coming from the far North-west, and finally entering China itself. Here it seems to have met other people of kindred origin, who had settled previously amongst the aborigines, but whose numbers were small, and whose purity of blood had probably degenerated. The nearest approach to an epic poem amongst the Chinese describes the conquest and subsequent amalgamation of these tribes. We may probably accept the usually received dates for these events, the twelfth century B. C., as approximating to the truth, and we at once begin to see the possibility of some connection between these events and those which forced down into India the civilising influences of the Aryan colonists. Such a connection affords us a standpoint to comprehend whence arose the long string of fables and repetitions which make up the so-called ancient history of China. They are, in fact, part of the old mythology common to the races which inhabited Central Asia prior to the dawn of history. The unimaginative mind of the Chinese tried to convert them into the record of fact, as if we should endeavour to euemerize the story of "Jack and the Beanstalk." With the historians we have little fault to find. Had they not preserved the stories in this form, they would have been lost to humanity ages ago. We do, however, blame the want of judgment and critical acumen which has allowed them to be accepted as sober facts by men whose training should have prevented them from falling into so palpable a trap. A Niebuhr is sadly wanted in the realm of Sinology.

Summary of News.

We have had no mail since our last issue. The P. & O. str. *Gwalior* left Singapore on the 10th, but has apparently broken down, and we have no news of her arrival at Hongkong.

A Mail leaves to-morrow for Europe by the M. M. steamer *Meikong*.

The following Reuter's telegrams have come to hand :—

Prospects of a termination of the South Wales Lock-out are reported.

The political uneasiness is subsiding. In the House of Commons, Mr. Disraeli stated that the Belgium incident was concluded, but if the independence or neutrality of Belgium was threatened, the Government would know its duty, and not fear to meet Parliament.

Baron Rothschild has issued a Russian loan of Fifteen Millions.

Revenue .....£75,685,000.
Expenditure .....£75,268,000.
Surplus.....£ 417,000.

The Budget proposes the readjustment of brewers licenses and stamp taxes reducing the Surplus £357.000

The *Devonshire* has returned to Aden with broken shaft.

The Crown Prince of Germany, will visit Italy incognito.

The suspension of Messrs. Fearon & Co., is announced.

Germany has sent another note to Belgium in which she disclaims interference with the Press.

The Prussian Parliament votes the abrogation of the privileges of Catholics.

At a special meeting of the S. Y. C., held Friday night, it was resolved that yachts competing for the Challenge Cup should continue to set one China sail only; and that, in future Corinthian Races, three members of the Club should be empowered to elect a member, if necessary, at the time of the race, to ensure the completion of a crew.

At the Municipal Council meeting of the 12th April, several topics of interest were discussed. A proposal to make the Municipal year co-terminal with the calendar year will be brought up at the next meeting of Ratepayers.—It was decided to place an appropriation of Tls. 1,500 for the Shanghai General Hospital, on the budget for the nine months ending on the 31st December next. The proposed sum is ¾ of the usual grant of Tls. 2,000; —the alteration of course having reference to the proposed change in the financial year. An invitation from the Trustees of the General Hospital, to the Chairman of the Municipal Council to become ex-officio member of their Board, was accepted.—It appears that some firms importing goods in the C. M. S. N. Co.'s steamers object to pay wharfage dues, on the ground that their goods are covered by the Taotai's commutation. The Taotai's commutation payment, however, was calculated before the C. M. S. N. Co. was instituted; and the Council very rightly purpose addressing the Consular Body on the subject.—In view of the expression of opinion in Mr. Seward's judgment on the "Municipal Council *v.* Fogg" case, it was resolved to postpone further steps for recovering the tax due, pending reference to the Ratepayers at the forthcoming meeting.—The Taotai has consented to the lowering of the Hongkew Creek bridge 2 feet.—Lieut. Mylne having resigned his commission in No. 3 Rifle Co., Major Hart was requested to take the usual steps for the election of a successor.

The minutes of the meeting of Treaty Consuls held on the 16th instant, have unusual interest. Certain Harbour regulations were first discussed, and three new rules were resolved on: 1°,—that no vessels except men-of-war are to use swinging booms, and that these shall be rigged in between sunset and sunrise. 2°, that buoys must be lighted between sunset and sunrise. 3°, that vessels having explosive or inflammable materials on board shall anchor at least a mile below the lower limit, and fly a red flag. The first two rules, it will be remembered, have reference to a letter from the Taotai representing that accidents have occurred to native boats through neglect of such precautions.—It was decided to make no change in the existing pilotage system. This question, it will also be remembered, had been brought up by a letter from a number of pilots, suggesting that the standard number should be reduced.—Messrs. Annecke, Medhurst and Seward have been elected to form the Court of Consuls for the current year.—An agreement has been made with certain engineers at Yokohama, to survey the Woosung Bar for Tls. 2,500. The Taotai will provide Tls. 1,000; the remainder will be forthcoming from the various local steamer companies and from the community. We print, below, the correspondence which passed between Messrs. Medhurst and Seward and the Taotai, on the subject. This will show that the duty of the Chinese Government to provide the necessary outlay was strongly urged upon the Taotai. It was with difficulty, however, and only after reference to Li, that Tls. 1,000 was forthcoming, "as a matter of

favour." The sum has been received under protest that the whole expense ought rightly to be borne by the territorial authorities.—Consultation has been had with the Committee appointed by the Ratepayers to revise the Land Regulations, and certain amendments are recommended, which are too concisely stated in the Report to bear further condensation. We refer our readersto it.—The amendment passed at the last Ratepayers' meeting in regard to proxy voting, is thought to want more precise definition. This is a question of detail, and can be settled at the meeting next month.

At a meeting of No. 3 Company, S.V.C., Captain Tucker announced the resignation of Lieutenant Mylne, and said he had received instructions from Major Hart to proceed to the election of an officer to supply the vacancy. He added that the Council desired, through him, to tender the thanks of the community to Lieutenant Mylne for his services and for the interest he had taken in the Corps. He proposed Sergeant Yeo, who, he said, felt great interest in the welfare of the Corps. —Private Fonseca seconded the proposition, and it was carried unanimously.

The annual meeting of Ratepayers is called for the 11th May.

The French Municipal elections have resulted in the election of Messrs. Seaman (172), Maignan (160), Scott (121), and Leroy (107). 172 electors voted, out of 204 registered.

The crew selected from the Shanghai Rowing Club to row the challenge race at the Nagasaki Regatta, are Messrs. Wyatt, bow; Johnston, 2; Mackenzie, 3; and Glass, stroke; with Cory, coxswain. Kobé will also send a crew; but we hear that Yokohama cannot, owing to various obstacles. The date fixed is the 6th of May, and the distance a mile-and-a-half. Both Nagasaki and Kobé will, it is said, send exceptionally strong crews, and considerable interest is manifested in each of the Settlements, as to the result of the race. There are also to be double and single sculling matches pulled between the rival crews. Could Nagasaki and Kobé be induced to send crews to our ensuing Spring Regatta?

The new prizes to encourage Rifle Shooting among beginners, have produced a fair number of entries,—11 for the Recruits' Cup (for men who have never competed before) and 14 for the Sweepstakes for men who have never won a prize. These numbers are fair, and represent all companies of the corps. It is expected that the entries for the general competition will number about 30, so that in all perhaps 50 volunteers will take part in this Prize Meeting. The weather is very favourable for practice, but the shooting is scarcely up to the average of the last two meetings—apparently from the deterioration in the ammunition.

We have the Customs Report on the trade of Shanghai for the first quarter of 1875. It shows a considerable increase in the quantity of shipping, both as regards number and tonnage, compared with the corresponding quarter of 1874. The import of Grey Shirtings was considerably less—1,276,000 against 1,615,000 pieces; the figures for other qualities vary; the total import of Shirtings of all kinds being some 350,000 pieces less than in 1874. A great decrease is shown under several other headings—notably Chintzes, Velvets, and Lawns and Muslins. In other cases, however, there is a marked increase. White Shirtings figure for 213,000 against 136,000 pieces, T-cloths for 389,000 against 216,000, Turkey Reds 39,000 against 11,000. A more or less considerable increase is shown in the import of all kinds of Woollens except Lustres which figure only for 37,000 pieces against 67,000. The increase is chiefly notable in Long Ells, which figure for 21,900 pieces, a larger import than in the corresponding quarter of either of the three previous years.—Opium shows a slight increase; Foreign Coal a decrease of one-third; while Native Coal figures for 60,000 against 26,000 piculs. 1,256 Transit Passes were issued, against 737 in 1874. The most notable increase seems to have been in the quantity of Nail Rod iron so covered—10,092 piculs against 5,710; the quantity of lead on the other hand having decreased by more than half. Kerosine oil again, of which 2,000 gallons were sent inland under transit pass in the first quarter of 1873, and 4,000 in 1874, figures only for 10 gallons in 1875. The Revenue shows a large and steady increase—Tls. 763,460 against Tls. 656,482 in 1874, and Tls. 649,910 in 1873.

We are able to publish a copy which has reached us from London, of Mr. Hart's famous memorandum on the Woosung bar, in which he predicts the closure of Shanghai, its supercession by Chinkeang, decadence of foreign interests, and an early display of Chinese flags in the docks of Liverpool and London. The memorandum was known to be existence, but was veiled, with the secrecy peculiar to Peking, from the eyes of those most interested in its contents. We are glad to be able to lift the veil, and to show what enormous nonsense can emanate even from Peking. The whole superstructure of prophecy seems built on the huge misconception that a channel exists round the north end of Tsung-ming—the channel which actually does exist to the south of Tsung-ming, between it and Bush Island, having apparently become misplaced in Mr. Hart's imagination.

We hear that Colonel Browne is expected here very shortly, from India, to consult with Mr. Wade on the measures to be taken for punishing the attack on the Expedition of which he was chief.

The Calcutta *Englishman* of the 12th March gives a few further particulars of the attack on Colonel Browne's party:—"The Chinese attacked the party with great fury, but were frightened at the rapid firing of the Sikhs with the Sniders, and took to the jungle. Fighting lasted eight hours, after which a Kachen Tsaubwa fired the jungle to enable the party to retire. The Burmese escort also fought well. The greater part of the baggage was lost.—Captain Cooke has returned to Bhamo from Minemow, whence he left Mr. Elias, the Chinese General having refused to allow them to proceed further.—Mr. Elias has since been recalled."—The belief in Calcutta was that the troops had been sent by the Governor of Momein. It was said that Mr. Forsyth, the late head of the Yarkand Mission, was to be sent to Mandalay, to talk to the King about various pending matters. Probably the question what share His Majesty may have had in conniving at the late outrage, will be made matter of serious enquiry.

We hear that Major Hart has asked the Trustees of the Recreation Fund to level the interior of the Race Course, in order to make it more suitable for Volunteer drill. It is not supposed that they wil have funds to level the whole area at once, but the outlay of a few hundred taels would improve a large space, and the work could be continued as means permit. That something should be done to utilise the large space now lying waste, has been often urged; and we hope that the Trustees will see their way to undertake the work.

Judgment was delivered yesterday at the U. S. Consulate-General, in a cause Henry Savage *v.* A. F. Tyree, which involves a rather curious point. The plaintiff sued to recover on a time bargain in lead. Defendant alleges that never made the contract. There were two brokers concerned—Mr. Gore-Booth who sold to Mr. Savage, and Mr. Limby who says he sold through Mr. Gore-Booth on behalf of the Defendant; both the brokers' contract notes were handed in. But they differ in date and in price, and Mr. Limby's note mentions—not a specific quantity of lead sold to plaintiff, but a lump quantity of 200 tons sold to "Sundry Foreign Merchants." The Court decided against plaintiff, holding that one broker cannot employ another to do business entrusted to him, without authority from his principal, and that the act of Mr. Gore-Booth cannot therefore bind the defendant.

Chinese law, like our own, prescribes that cases shall be tried in open Court. We are told that this practice is constantly departed from in the city; whether because the Hsien dislikes having cases reported in the Chinese newspapers, and tries to defeat reporters—we are not aware. One thing is certain, that secresy does not tend to give confidence in the purity of Courts, and is especially objectionable in the case of a man so prone to torture as the present magistrate. A correspondent suggests that the Foreign Consuls might have something to say in this matter; that if arrests are to be allowed in the foreign Settlement, we might at least insist on those arrested having what chance a public trial can give them. Our correspondent forgets that the Settlement is Chinese territory, and that it has been ruled from Peking that the Chinese can do what they like with their own subjects residing in it. It would of course be a righteous thing to object to Magisterial wrong-doing, but any such attempt would be certainly snubbed. We doubt even whether, if the Chehsien elected to torture a man on the Bund, Peking would not rule that the Foreign police ought to form a ring, and prevent interference.

At this time of the year, great crowds of people from all around the country go to the Loong-hwa temple to worship, and the creek is crowded from end to end with boats. It is rather notable to see small

steamers, plying between the Arsenal and the Powder-works, running several times a day through this crush. If Foreigners suggest small steamers on inland waters, injury to vested interests, danger of collisions, and fifty valid reasons for refusal are at hand. When the mandarins want to run steamers themselves, the objections melt; just as Arsenal chimneys appear not to interfere with Feng-shuy, while telegraph poles are fatal to that—myth.

The Cricket Ground was opened for play on Monday.

The Mih-ho-loong Challenge Cup was shot for on Monday, and won by Sergeant Dunman.

We hear that the *Modeste* is likely to leave for Hankow towards the end of the week.

The Chinese had a rumour yesterday that one of the old Empresses had died; they even went so far as to fix the 28th day of the 2nd moon (4th April) as the date of the occurrence. But this very precision seems enough to upset the report; for we have seven days later news from Peking and no mention of such an incident. We put it down therefore as a *canard*.

The *China Mail* understands that Sir Brooke Robertson is not likely to leave Canton for the ensuing year. Mr. Oxenham will, on arrival, proceed to Taiwan; Mr. Brenan leaves Hankow for Peking, where he will be Assistant Chinese Secretary; Mr. Hillier has gone to Chefoo, Mr. Watters to Swatow, and Mr Frater has been appointed to Amoy.

We understand that an arrangement has been effected between Mr. Seward and the P. M. S. S. Company, under which articles intended for exhibition at Philadelphia will be forwarded to New York *viâ* Panama, at 4½ cents a pound, which is about half the usual rate. First-class and steerage passengers, commissioned by the Chinese Government to attend the Exhibition, will be taken to New York at $250 and $90, instead of $410 and $160.

Information has been received at the United States Consulate-General, from the Superintendent of Foreign Mails in Japan, that the steamers of the Mitsu Bishi Company are now practically mail steamers, under the postal convention between the United States and Japan, as contemplated by Article V. of the new Treaty. The mails will be made up in the ordinary way, and passed through the U. S. Consulate-General. It is also notified that the officers of the steamers are no longer permitted to take cognizance of loose letters.

The March number of the *Wan Kwo Kung Pau* contains an article on a very important matter, which we have not seen noticed elsewhere. According to the writer, Li Hung-chang has memorialised the Throne, asking that Foreign learning and the sciences may be placed on a par with the standard subjects in the literary examinations of the Empire; and a correspondent writes us that he has reason to believe the memorial will receive the sanction of Government. The importance of such an innovation is great, and if it be really carried out, good results will certainly follow.

Most of our readers will remember the lecture delivered some years ago by Mr. Lang, under the title of "Shanghai considered socially." It was afterwards printed in a pamphlet, and had a considerable sale among the community. The demand continued after the first edition was exhausted, and we are told that Mr. Lang was about reprinting it when he died. The intention has now been carried out, and we have before us a copy of the second edition. It is printed in good clear type, and covers 64 pages. Its contents will be fresh in the memory of old residents. To later arrivals who wish to acquaint themselves with the local and social history of the place, we strongly recommend it. They will learn from it out of what a swamp the present well-ordered settlement has been created; how it has grown in population, and through what adventures it has passed.

We have received a volume (No. 8) of Medical Reports by the Surgeons to the Customs to the treaty ports, for the half year ended 30th September last. We hope to review the book shortly.

The steamer *Europe*, Captain Beckett, reports having been in collision with the steamer *Hochung* in the Peiho river, at 9 a.m. on the 13th inst. The *Europe* received considerable damage, the *Hochung* having made a clean sweep of boats, davits, awning stanchions &c., starting the bridge house, on the starboard side, and damaging the rail nearly the whole length of the ship. It is not known what damage was done to the *Hochung*. The *Europe's* troubles did not end there; for on coming up the river, when nearly abreast of the Naval Yard, she again came into collision at 2 a.m. yesterday with a large junk that was proceeding down the river with a fair wind. The *Europe's* starboard bow was stove in, the iron plates having been broken short off, with little or no bend in them. We are told that a Quarter-master, who was sleeping in his bunk at the time of the collision, was thrown out of his berth with the force of the blow. What was the cause of these disasters, we cannot of course judge, and pending the usual enquiry merely state the facts as reported to us. We hear that the junk, too, is badly damaged and had to anchor.

Our Tientsin correspondent protests energetically against the appointment of Sung Paou-hwa to the Yunnan Commission; and, if he is right in his premisses, we agree with him that nothing can be said too strongly in condemnation of the appointment. An attempt by the Peking Government to degrade the importance of the mission would not be a new feature in Chinese policy, and we emphatically endorse his protest. But it occurs to us that there is a possibility he may be mistaken as to the exact position Sung Paou-hwa is to occupy. We do not understand that Sung is to take any share in the enquiry. He is simply to act as escort to the two Foreign officials. Even for this position he is utterly unfit, but the appointment has not, from this point of view, the same insolent meaning it would have were he made a member of the Commission. Even as it is, however, Mr. Wade will be wrong to accept such a nomination. The expedition should be accompanied by an official of at least the rank of Taotai, and one accredited from the Tsung-li yamên, not from the Viceroy of Chihli.

Li Hung-chang is said to be massing troops all around Tientsin. He has brought in a number of regiments of the so-called Southern Legion, and has even brought in soldiers from Shantung. New forts are also being constructed.

The hulk (late *Esberne Snare*) at Kiukiang, belonging to the China Merchants Steam Navigation Company was totally destroyed by fire in the night of the 13th inst. The hulk was full of cargo, and it is said that the fire originated in the main hold through the coolies smoking below. We are informed that the fire was first discovered at about 9 p.m., and that nothing was saved from the vessel as the flames spread with great rapidity and she burnt until she sank at her moorings.—We hear that Mr. W. E. King, Vice-Consul at Kiukiang, will shortly go home on leave, and will be succeeded by Mr. W. G. Stronach.—The eclipse was well observed, and some photographs of the different stages were taken.—A correspondent writes:—Two firms have opened this year, and I expect a good many tea-tasters will visit this market in the season. The water is falling, after a great rise during March.—The forts at Hukow will soon be commenced, and appliances in the shape of foreign pile-drivers have already arrived by the river steamers. It is stated that a grant of about half-a-million taels was sanctioned when the trouble with Japan arose, but now, although the Futai is aware that there is no longer urgent need for these costly defences, he does not like to state that the appropriation is no longer required, so he is bound to spend the money. Doubtless many of the petty officials will grow rich in disbursing this sum. The Krupp guns have been ordered, and wood for piles, &c., is being purchased at Hankow.

The eclipse of the sun was well observed at Peking.—The Peking Gazette of the 27th March contains an edict announcing the death of the young Empress, widow of the Emperor Tungche, and extolling her virtues.—Another edict, in the Gazette of the 29th, adopts the recommendation of the officials deputed to select a site for the mausoleum of the late Emperor. A spot near the Eastern Hills is selected.

A Chinese newspaper published at Foochow reports a fight at Hangchow between the Tartar and Chinese soldiery! We fancy this news will be startling—to Hangchow.

Summaries of News Japan, Hongkong, and the Southern Ports will be found under the usual heading.

A Yokohama correspondent writes:—"Political affairs here are in a critical condition, which may result in an overthrow of the present Ministry. Shimadzu Saburo holds the power, and is supposed to be on the eve of taking some decisive action."

Editorial Selections.

THE YUNNAN OUTRAGE.

THERE seems to be a strong impression in India and in Rangoon, that the attack on Colonel Browne's party was pre-arranged between the Chinese and Burman authorities, and a very clear resolve that the guilty parties, whoever they may be, shall be fitly punished. That there was pre-arrangement seems beyond doubt. The only difficulty will be to place the responsibility on the right shoulders; and if a share in it can be brought home to the King of Burmah, we fancy his tenure of power will become precarious. The circumstantial evidence seems strong. The King was known to be hostile to Major Sladen's expedition, and is accused of having conspired to cause its failure if not its destruction. It is said in Rangoon that one of the frontier chiefs avows having received orders—which he disobeyed—that it should not return. The news of Mr. Margary's successful journey to Bhamo is said to have been received with evident annoyance at Mandalay; and a Burmese Mission preceded Colonel Browne's party along the route on which the latter was attacked—Colonel Browne having previously been hindered in the selection of another route. The evidence, so far, is purely circumstantial, but we repeat that, if the facts are as stated, they look bad; and the report that Mr. Forsyth is being sent on a special mission to Mandalay, looks as though importance were attached to them, at Calcutta. The King's behaviour has long been such as to alienate the sympathy of the Indian Government. He has impeded commerce by arrogating a monopoly of all the chief articles of trade; he has misgoverned the country, and has caused so much dissatisfaction among his people that it is believed a change to English rule would be viewed with satisfaction. The population of British Burmah is steadily increasing at the expense of the Native State, and this immigration is in itself a proof of the comparative estimation in which the two Governments are held. Under the one, exactions are heavy, property is insecure, and industry is hampered; under the other, the reverse conditions are assured. There can be no doubt that England would be conferring a boon on the people, by incorporating Burmah Proper with the seaboard territory over which she already rules. That she has not yet done so, is a proof of remarkable political honesty; but if complicity in this last outrage can be brought home to the King's Government, it is likely a much stronger position will be taken up at Mandalay than we have been hitherto content to hold.

The political advantage of occupying Burmese territory would not be confined to India. The contiguity of the British Indian frontier with that of Yunnan would mean a pressure on China that could hardly fail to be felt at Peking, as much as that of Russia upon Chinese Tartary in the North. And there seems every likelihood that, before long, China will incur the neighborhood of a third European power to increase her discomfort. There can be little doubt that the proceedings of the French in Tonquin will eventuate in annexation. We hear a rumour that arrangements have been made by the Government of Cochin China to pay off a loan of $300,000 contracted by the Tonquin Government from Manila, on the understanding that France shall exercise a protectorate over Tonquin, which will of course mean a real sovereignty and the presence of French troops upon the Southern frontier of Yunnan. If, therefore, England annex Burmah—and we imagine it is at most a question of time—China will have neighbors in the South and West, very much less amenable than the tributary barbarians to whom she has been hitherto able to dictate.

The steps that will be taken to punish the Chinese share in the Yunnan outrage, must of course depend on the result of the approaching investigation; but Lord Derby and Lord Salisbury, upon whom the conduct of the affair devolves, are men of character and decision, and unlikely to let it pass. The facts that the attack occurred in a Chinese prefecture, and that Margary was murdered in a Chinese town, are sufficient to make the Peking Government legally responsible. But the more interesting question is, to whom the practical guilt of ordering the attack will be brought home. Indian papers accuse the Governor of Momein; but if the report is true that news of the intended opposition to Colonel Browne's party had reached the French Missionaries in Hankow, the evidence of premeditation would be absolute, and we should have to carry the responsibility far higher. All these matters will of course become subject of investigation. We can only hope that the truth will be somehow elicited, from the cloud of falsehood and prevarication with which the real culprits will of course try to shroud it.

MR. HART'S MEMO. ON THE YANGTSZE.

WE have often protested against the secrecy which is observed at Peking, in regard to the most trivial as well as the most important matters; and there has seldom happened a better illustration of the wrong than Mr. Hart's memo. on the Woosung Bar. Here is a document, false in premiss and in conclusion, yet affecting very gravely the interests of the port because sufficiently plausible to mislead,—treated as official at Peking, and sent home by Foreign Ministers to their Governments, without an opportunity being given to those most interested, of exposing the blunder and repelling the inferences. That such documents do sometimes leak out, and find their way after many adventures into the columns of a newspaper, is not a reply. We contend that such a document ought to be at once communicated to the Shanghai Chamber of Commerce, and comment by the Chamber invited. There is no mistaking its drift, nor the effect it would have on Chinese action, if let pass unquestioned. It is true that Mr. Hart allows us another twenty years of existence, and concludes that even this respite makes dredging the bar worth while; but though that reflection might influence Chinese action, it would more likely convince Peking that the outlay would be waste. Nor does the importance of the document lie altogether in its bearing on the Woosung bar; the error of its general statements would tend to throw on a false scent officials who could have no opportunity, in Europe, of testing their [illegible] the community have, from every point of view, cause of complaint that the paper was not submitted to the Chamber of Commerce for report, directly it reached the hands of the Foreign Ministers. The mischief done by such papers is not to be measured by their worth. The present memorandum for instance is a tissue of mis-statement and nonsense; but it is sufficiently plausible—coming from a gentleman who has a certain reputation for ability—to gravely mislead persons having no intimate personal knowledge of the subjects dealt with. What official in Europe or America, for instance nay, what new-comer even at Peking, would suspect Mr. Hart of gravely mapping out a non-existent channel, and erecting thereon such a superstructure of false prophecy as he has been led to pen? The possibility of a man in his position making such a blunder could never suggest itself, and the whole document would be allowed solid weight in considering what steps should be taken to persuade the Chinese to conserve their harbours and water-courses.

But it is time we addressed ourselves more particularly to the enormous blunder which Mr. Hart has perpetrated. Reference to a map of the lower Yangtze will show, lying opposite the Hwangpoo, and stretching nearly equidistantly on either hand, the large island of Tsung-ming. Between this and the mainland again, and nearly opposite Woosung, is the islet known as Bush island. The main channel of the Yangtze runs between Tsung-ming and the South bank, and thence seaward, still to the south of the various banks and islets lying below and South-east of Tsung-ming. Mr. Hart sets out by declaring that this channel is narrowing and shallowing, and that a channel to the North and East of Tsung-ming has "of late been used occasionally, and is spoken of with growing approval." And he concludes that "it may be regarded as

certain that the southern channel will have less and less water on it, and that at some future day—it may be five years hence or it may be fifty—the only navigable channel to enter the Yangtze by, will be that from Shaweishan round the North end of Tsung-ming."

Could it be conceived that the channel to the North and East of Tsung-ming, which Mr. Hart describes as "spoken of with growing approval," has no existence? that the danger of the present channel closing, exists only in Mr. Hart's imagination? or that he would go on to predict physical changes in the estuary of the Yangtze, that are very shortly to destroy our port, upon so extravagant a misconception? Yet this is what he has done. There is no channel north of Tsung-ming used by anything larger than native craft, and no foreign sailing vessel or steamer has ever been, as Mr. Hart says, not spoken of ten years ago, but it is equally unknown to-day. The fact is that he has mistaken a channel which exists round the north of Bush Island and thence round the south of Tsung-ming; to be on the north of Tsung-ming, and the fact is notable as showing how much attention the needs of our river meet with at Peking. This channel was surveyed by the *Monocacy* in 1871, and is occasionally used by steamers plying between Shanghai and the North. We have no evidence to show that it is enlarging; nor that the channel which has been always used hitherto by steamers approaching Shanghai, is closing; but even if these changes were to happen, the only inconvenience would be to make vessels bound for Shanghai run between Bush Island and Tsung-ming, and then turn back three or four miles, to Woosung. The Hwangpoo might be trusted to make its way for that distance, in such a manner as to afford all necessary facilities for navigation. Mr. Hart's idea of the gradual closure of the Southern channel, and the gradual erosion instead of one to the North of Tsung-ming, has then no foundation whatever in fact, and his inferences are equally false. The origin of his blunder appears to be two-fold, as is the blunder itself. 1°.—He has mistaken the channel to the north of Bush island for one to the north of Tsung-ming; 2°.—He has mistaken a greater draught of water in steamers frequenting the port, for a gradual rising of the river bed. We have an experience of the southern channel extending over thirty years, and though the shoals on the north, and the banks on the south have become more marked, our oldest pilots see no diminution in the downward flow of the Yangtze through it. Whether the water is really less, or whether the changes are calculated only to define the channel more clearly, they cannot say. They only know that the decrease, if decrease there be, is imperceptible. The mistatement is the more dangerous because the case would be really serious if Mr. Hart's assumption were correct. If the channel between Woosung and the sea, to the south of Tsung-ming, silted up, vessels could only gain access to Shanghai by rounding the north end of that island and coming back to Woosung. And not only so, but the chances are that the upper part of the present channel would silt as well as the lower, if the process once began; and that access to Shanghai would be blocked altogether, to vessels of large [illegible] the Hwangpoo could clear for itself a long backward course "through the dead or checked waters of the Yang-tsze" and rapidly accumulating silt, till it joined the new channel off the north of Tsung-ming.—Yet we have seen how utterly groundless is the assumption that any such change threatens. We are assured on the contrary that, if change there is, the Kintoan flats are rather deepening than shallowing.

Having shown the gross misconception with which Mr. Hart sets out, it is almost needless to follow him through his enquiry into the future of the Shanghai River, and the consequent future of Shanghai, except to emphasise his fatuity; for his predictions are based on his original blunder. We need hardly stay to ask what would happen to the Hwangpoo if tides were to disappear; because there is no earthly likelihood of their disappearing. Very certainly vessels drawing twenty feet could not get over the bar without tides, because the depth of water on the bar is only ten feet when tides are out; but then we have tides, we are likely to continue to have them, and the bar only wants dredging out a few feet to admit the largest vessels that are likely to come to Shanghai. Equally certainly, if the Southern Channel of the Yangtsze closed, if the Hwangpoo were choked in its exit seaward, and ships couldn't get to Shanghai, the commercial future of the port would look extremely bad; but neither of these conditions is in the least likely to happen, so we have only to deal with things as they are. That the Hwangpoo is a sluggish stream, and requires conservation, we have always urged. Draining a large extent of country, it brings down a considerable body of water; but its course lies through land so level that it has little force of current, and has difficulty in overcoming obstacles whether wilful or adventitious. It needs that obstructions should not be run out along its banks, and that dredges should be employed to keep clear its channel from the mud banks that will always have a tendency to form; but there is no indication that, with this care, it will not serve as an outlet to the commerce of Shanghai for centuries to come.

THE BLOCKADE OF HONGKONG.

It is well that the Hongkong Chamber of Commerce has taken up with more zeal than before, the question of the blockade of Hongkong harbour by the Chinese Government cruisers. The position of Great Britain in this matter is, to say the least of it, undignified. It almost provokes a smile to see a number of little gunboats prowling round the entrance to a British harbour, and seizing what prey they can, while British men-of-war and British troops are stopping idly within, and not taking a step to put an end to a system of exaction which is seriously hurting the trade of the colony. The Chinese residents are coming to look upon British protection as a thing of the past; and are losing confidence in the future of the colony, now that it lets itself be overridden in matters so nearly affecting its own interest, by the Government of Kwantung; and, as a natural consequence, trade of every description is falling off, and the colony is gradually losing its position as a commercial centre. That we are not exaggerating the position of affairs, we have Captain Thomsett's report for 1874 to prove. A falling off in arrivals and departures of 10,000 vessels and of 654,000 tons cannot be accounted for by the natural fluctuation of trade. It is no salve to the wounded interests of the place, that this falling off was mainly in native craft; for the native trade of Hongkong is really the back-bone of the colony—in itself but a bare rock. Nor indeed do the statistics look much more wholesome for the foreign shipping. The decrease in the tonnage of the latter is over one-third; and when we remember that a large proportion of foreign vessels entering Hongkong, merely do so *en route* to the northern ports, we shall see that this reduction of tonnage entered really means far more loss to the local trade than one-third. The hindrance to the trade in native craft should, were trade able to be carried on at all, have resulted in an increased traffic in foreign bottoms with the Treaty ports. That this has not taken place, but the reverse, shows that the sources of trade are interfered with, and not only the channels by which it is carried on.

Hongkong has the same tale to tell as all the rest of China—the forcible repression, by exactions so heavy as to be prohibitory, of traffic of whatever nature. In the rest of China, we have allowed rights gained by treaty to be given up without even a word of protest. In Hongkong we have gone further. Not content with being smitten on one cheek, we have held out the other, and have permitted our own waters and our own trade to be obstructed by all sorts of irregular cruisers. During his tenure of office, Sir Richard MacDonnell incurred the suspicion of having more or less submitted to this infraction of the rights of the Colony. But it is satisfactory

to learn that so capable an administrator did not fail to perceive the very great damage being inflicted on Colonial interests. A Government which was, however, willing to submit to every infliction, overruled Sir Richard MacDonnell's protests, and the Chinese were given to understand that no notice would be taken of any obstructive steps it pleased them to adopt. It did not need much prescience to foretel the result. The hint was not thrown away, and a similar system of repression to that adopted at Hongkong, was made use of to hinder foreign trade all along the coast. Hongkong is not singular in its complaints; the returns of trade at all the Treaty ports tell the same tale—decreasing trade and increasing exactions. It is a notorious fact that the spur given to trade by the stipulations of the Treaty of Tientsin greatly helped the Chinese Government to struggle successfully through the Taiping Rebellion. It is equally notorious that, now the country is at peace, it cannot make both ends meet. It is, moreover, a fact that this impecuniosity has occurred concurrently with increased interferences with Foreign trade and increased exactions of every kind on Native trade. The inference is so plain that even Chinese themselves cannot shut their eyes to the cause. But, beyond the prosperity of the Empire, there is still a settled policy which the Peking Government struggles to uphold. That policy we succeeded for a time in 1860 in overturning, but our own carelessness and supineness has allowed it again to become rampant. Followed to its legitimate conclusion, it would mean the expulsion of every Foreigner from China—if no severer measures were adopted—and the locking up of the country as effectually as Japan was closed for more than two centuries. It is evident we must halt somewhere before arriving at this extreme; yet, for all the signs we have as yet perceived, European Governments seem as averse as ever from placing their hands upon the reins. As action must be taken somewhere, experience proves that it is better to take it early. No reasonable man can doubt that, in 1870, when the question of the revision of the Treaty came up for discussion, a determined word on our part would have been sufficient to have obtained a settlement satisfactory to ourselves and the Chinese. That word, however, was not spoken, and persistent encroachments have since been the result. Now, five words will not suffice, where one was then sufficient. Are we to go on at this pace, and renew the experience of 1836 and 1857? We counsel no injustice, we seek to inculcate no harsh measures; but, in the interests of both countries, we maintain that a firm and consistent policy is necessary.

A MARRIAGE ORDINANCE FOR HONGKONG.

The Hongkong Legislative Council seems to have been much exercised, lately, about a marriage ordinance. We have not the text before us, but we gather that it is intended to compel civil registry, on the principle which is finding general favour in Europe. But Hongkong is a very mixed colony, comprising probably as diverse a collection of nationalities and religions as any place in the world; and the Council are in the dilemma either of passing a very partial measure or of devising a bill so marvellously ingenious as to fit all conflicting interests. The former course seems to have been chosen; as we find Mr. Cecil Clementi Smith, who appears to have the bill in charge, stating in the Assembly that it was not intended to apply it to others than Christians. Even here, however, it is met by opposition. Bishop Raimondi protests on principle against the very basis of the scheme. Marriage, he affirms, is a sacrament, whose administration is purely and solely within the power of the priest. The priest must be free to administer the sacrament of marriage to whomsoever, whenever and wherever he judges necessary; no lay authority can limit such power, any more than it can exercise the duties of the confessional which is another sacrament. We presume that Bishop Raimondi was bound to express his principles, much as the Pope is bound to say *non possumus* when asked to recognise his loss of temporal power. But the result is the same in both cases. The temporal power has disappeared, and the Hongkong marriage ordinance has been passed. It will be a satisfaction to Bishop Raimondi to know that his co-religionists in Hongkong will be no worse off, under it, than they are in the most Catholic countries of Europe, where civil registration as a prelude to marriage is insisted on by the Civil power.

The Chief Justice appears to dislike the bill from another cause, as being too limited in its scope. He instanced the burning question of the deceased wife's sister; and brought out, in conversation, the amusing fact that the Duke of Buckingham had once laid down that Colonial officials must not vote against any measure ordered by the Home Government. Now the present measure, though drawn up in the Colony, had been sent to England, and remitted to Hongkong by the Secretary of State, with instructions that it should be passed. The Chief Judge, therefore, declined to make any motion or amendment on it. Mr. Smith protested against the assumption that members of the Council were prohibited from discussing the ordinance; and the acting Governor ruled that discussion might be had,—only, if any material change were made, the bill would have to be sent home again. The Chief Justice however declined to be persuaded. He had, he said, once received notice that he had been wrong in voting against a certain bill. And, after such an intimation, and the ruling of the acting Governor that any amendment would have to be sent home for approval, we are not surprised at his reticence. Is it not rather reducing legislation to a farce, when the Council is so constituted that the official members are always in a majority, and are officially instructed to vote all one way? So the deceased wife's sister dropped, and Hongkong has lost the chance of setting England an example of intelligent legislation. As *Punch* says in his last Essence of Parliament, among the remarkably sensible things that often find place there: "The time is not yet. But as the prohibition has no sufficient grounds in nature or revelation, and as the ill effects of maintaining it are certain in many cases, while those of relaxing it are conjectural, the chances are that the change will come." There remained, however, enough points of difficulty. When the last clause was reached, defining the application of the ordinance [illegible] Christian religion," the Council pointed out that this alone would open up a very great question; for how was the profession to be indicated? "This was the question raised in the famous case of Yelverton. The whole question in that distressing case rested on whether Yelverton was a professed Catholic or not. Further, what would they do with Jews, Chinamen and other Asiatics? And Chinamen had more than one wife! Had this Ordinance not come from home, he would have proposed an alteration. As it was, he was not free to do so." A conversation followed about the Chinese marriage law, of which the Acting Governor and Mr. Cecil Clementi Smith showed themselves ignorant, and the Chief Justice well-informed. The two former insisted on the difficulty of including Chinese in the ordinance, because they often had two or three wives, whereas Sir John Smale informed them that Chinese law does not recognise the second as a wife at all, though her children are declared to be legitimate. There would be no difficulty, therefore, on this score, about registering Chinese marriages; though it is by no means clear whether the rule would work well otherwise, or whether it would be possible to enforce it in practice. Still, as a matter of fact, the registration of marriages is not a religious but a legal precaution, and is quite as much needed in the case of people professing other religions as of those professing Christianity. We quite admit the difficulty of going farther, in the case of Hongkong. Still the present ordinance does seem to be a very partial measure, and it may be questioned whether it had not better been left alone, or more thoroughly considered.

Outports.

TIENTSIN.

Since the end of the last moon, we have been having extremely boisterous weather here, no matter from what quarter the wind

might come. After blowing a gale from the South, from daylight to nearly 4 p.m. on the 7th instant, the wind suddenly changed to the North ; afterwards we had a dense dust storm for an hour. It indeed became so dark, a few minutes after 4 p.m., that it was necessary to light the lamps to see to write and read. To-day, it is blowing a strong gale from the South. The thermometer has gone down these last few nights below the freezing point. This morning, it stood at 29°. About 2 a.m. on the 7th instant, a very large meteor was seen. It made its appearance in the North-West part of the sky, and travelled towards the South-east, where it apparently exploded.

A Rescript in the Peking *Gazette* of the 6th April, announces that Li Hung-chang had, in a memorial to the Throne, requested the Regents that orders be given to the functionary appointed to the office of Customs Taotai at Tientsin, urging him to repair immediately to his new post. Le Chaou-tang, the official in question, being at present at Kwangtung, the Regents command the Governor-General of the Two Kwang provinces and the Governor of Kwangtung province, to order the said official to lose not a moment in proceeding by sea to Tientsin, where his presence is required to attend to [illegible].

About five o'clock, Thomas Featherstone, the Constable of H.B.M.'s Consulate at this port, died very suddenly. He came to this country as a private in the 67th Regiment, in 1860, fifteen years ago ; and being a steady, well conducted, trustworthy man, when a constable was required, on the Consulate being established at this port in 1861, Thomas Featherstone was recommended as a suitable man for the post. The funeral took place this morning at nine o'clock, and the coffin was followed to the cemetery by almost every member of the community, showing that the deceased had gained the respect of the Foreign residents here by his good conduct. He has left a widow and two children ; and although both he and his wife were careful people, still the pay of a constable is not such that with a family they could possibly save but a small sum of money. Her Majesty's Government, in my opinion, would, under the circumstances, be justified in bestowing on the widow a sum of money sufficient to pay for her own and her children's passages home to England ; and to leave in the pocket of the widow a few pounds to enable her to commence the world in England.

April 9th.

In regard to the Chinese official who will form part of the Commission for the purpose of making investigations into the assassination of Mr. Margary, in a yamên of a Chinese territorial mandarin in the province of Yunnan, and into the subsequent brutalities committed—I am now able to report to you with accuracy. His Excellency Li Hung-chang, the Governor-General of this province and the Commissioner for Foreign Affairs has appointed a man called Sung Paou-hwa (宋寶華) as the officer deputed, on the part of the Chinese Government, to proceed to Yunnan for the above-mentioned purpose. Sung Paou-hwa will leave here in the S. S. N. Co's steamer *Chihli*, to-morrow, for Shanghai.

Sung Paou-hwa is a native of the Ningpo district, and was formerly in the employment of the Ningpo merchant Tae-kee (Yang-kee-tang), in his mercantile establishments of Shanghai and Ningpo ; and can speak the jargon known as "pidgin" English. When Li Hung-chang was [illegible] engaged in fighting against the Taeping rebels, and Tae-kee was likewise engaged in some fashion in aiding to put down the rebellion, his employé, Sung Paou-hwa, became known to Li Hung-chang. Soon after Li Hung-chang came to Tientsin in his position of Governor-General of this province of Chihli, Sung Paou-hwa made his appearance here as an attaché on his staff; and since then has been employed by Li Hung-chang in various subordinate capacities. He has latterly—for four or five months— been stationed at the village of Ko-ku, situated on this river half-way from Taku, in overseeing some Custom house or other such like business. His name will not be found in the list of mandarins published in the Red Book, as he does not hold any territorial position. He has no literary rank, and does not belong to the official lawyer class. As to the button which a Chinese may wear in his hat, such, now-a-days, does not indicate his position as an officer in the Government service. I can only [illegible] Paou-hwa for the last four years at Tientsin as an attaché on the staff of the Governor-General of Chihli, without any territorial rank. In the *North-China Daily News* of 8th inst., we read the following :—

"It is understood, however, that he (Mr. Wade, H. B. M.'s Minister) has "taken the case strongly up, threatening "even to haul down his flag unless a "[illegible] of British and Chinese officers is forthwith delegated to "look into the whole case and punish the "perpetrators."

I know not if the appointment of such a subordinate official as Sung Paou-hwa will be deemed by the British Government as an ample share, on the side of the Central Chinese Government, in forming "a powerful Commission." I may ask the question, however, what influence is it likely that Sung Paou-hwa will have over the Chinese territorial authorities in the province of Yunnan, when they become aware of the subordinate position which he fills at Tientsin—in carrying out a strict investigation into such a crime as Mr. Margary's assassination ? I will presume to give a reply, and that is that he will not be able, from his known subordinate position in the Government service, or rather the service of the Governor-General of Chihli, to effect what the British Envoy desires to know—namely, what share the Chinese functionaries in Yunnan had in committing the murder, in order that all those connected with the perpetration of it shall be punished. When we, for a single instant, reflect over the dastardly and cruel act committed on Mr. Margary, an officer in H.B.M.'s service, and a gentleman of education, who could speak the Peking mandarin language, the bearer of a duly sealed passport, and of despatches to the territorial functionaries on the route—in the yamên of a territorial authority ; and after that, for only a single instant, reflect on the invaluable aid Mr Wade, H.B.M.'s Envoy, lately rendered to the Chinese Central Government in their Formosa difficulty—will the British people consider the appointment of such a subordinate officer as Sung Paou-hwa, to proceed to Yunnan to investigate the case, and take steps that the perpetrators of the murder be arrested and brought to condign punishment—a proper one? I have no hesitation in saying on my part, that, taking the gravity of the case and all the circumstances in connection with it into mind, I consider the appointment of a subordinate officer of the position of Sung Paou-hwa as a gross insult to the British nation. My objection, I must state, is not against Sung Paou-hwa individually, but only against a Chinese officer of his position being appointed on the Yunnan Commission. I object to the officer, but not to [illegible], whom I know very well.

13th April.

In my letter of the 13th instant, I briefly and hurriedly informed you that I had heard H. E. Li Hung-chang, the Governor-General of Chihli, had appointed Sung Paou-hwa, a local mandarin, to the joint British and Chinese Commission, on the part of the Chinese Government, to go to the province of Yunnan to investigate the assassination of Mr. Margary in the yamên of the Chinese territorial authority of the town. I further mentioned that the mandarin in question was a man of a very subordinate position on the staff of the Governor-General, and who had latterly, for four months, been stationed at the village of Koku, in the customs (Chinese) service there—in charge, I am now told, of the mooring of the junks in that anchorage.

To shew how little the foreign community here, who all know Sung Paou-hwa well, expected the appointment of a man [illegible] to go on the important commission to Yunnan, I mention the following circumstance :—

On Sung Paou-wha, on the 13th instant, going to the office of the S. S. N. Company in this settlement, to take his passage in the steamer *Shingking* to Shanghai ; and on his mentioning he was going to Yunnan, the agent—never for a moment thinking that Sung Paou-hwa himself had been selected by the Chinese Government as the officer in the joint British and Chinese Commission, but thinking, from his being able to speak pidgin English, that he was going as interpreter to some high official—naturally asked him "What mandarin has been appointed as the officer of the Commission to go to Yunnan ?"—and was not a little astounded to get the reply—"I am the officer appointed." He well might be astonished, for the same Sung Paou-wha had only lately, on Ying Han the Governor-General of the Two Kwang intending to leave here for Shanghai, in the steamer *Shingking*, been engaged in haggling with the shipping clerk in the same office, about paying the regular passage money, which he had been told the Governor-General and his suite would have to disburse. This, then, is the high official whom the Governor-General has considered fit for the important duty, in concert with certain British officers, of making strict investigations into the assassination of Mr Margary—a British officer, carrying a passport bearing the official seals of Great Britain and China! There is something decidedly "rotten in the state of Denmark," if Sung Paou-hwa's nomination be accepted.

15th April.

The S. S. N. Company's str. *Shingking* leaves here to-morrow morning for Shanghai ; and she carries away, as a passenger, Sung Paou-hwa, the officer appointed by Li Hung-chang to go in the joint British and Chinese Commission, to the province of Yunnan.

As I consider it the duty of every Englishman in China—for the signal of Nelson ever flies aloft that "England expects every man to do his duty"—to proclaim his protest against the appointment of a man of the subordinate position of Sung Paou-hwa for the important international duty of investigating such a grave affair as the assassination of a British officer in the yamên of a territorial functionary of China,—in order that, on our part, every moral aid possible may be given to Mr. Wade in demanding strict and stern justice at the hands of the Central Government,—I trust that your readers will again allow me to bring forward the circumstance.

Sung Paou-hwa is well known to all here, as to his abilities and position ; and the Chinese people even, with whom I have lately conversed, and who see clearly the gravity of the Yunnan affair, have not hesitated to speak of the appointment with disgust. Putting even altogether aside his subordinate position as a Chinese officer, by his stinted education and his limited experience of official business—he has no literary degree, and he does not belong to

the lawyer class of China—he is totally unfit to fill the position of a colleague of the British officers whom Her Majesty's Minister deputes to Yunnan.

The mandarin whom the Central Government should have appointed, should have been of the rank of a Provincial governor, or a junior member of the Tsung-le-yamên. He would have been an official whom, from his rank, the territorial functionaries of Yunnan would have feared and respected. When he said—I want to question so and so, no matter how high their position, so and so would have been immediately produced. What influence can such a subordinate officer as Sung Paou-hwa possibly have over the authorities of Yunnan? In the opinion of even the educated Chinese here, to say nothing of the foreigners who know him well, none whatever, even over the most petty official in Yunnan. Consequently, Sung-Paou-hwa will not be of the smallest assistance to the British officers; but, I fear, rather a detriment and obstacle to them in obtaining accurate information.

I wish it to be distinctly understood that I do not write this from any ill-will to Sung Paou-hwa; for if he was to-morrow gazetted as a prefect (Chafoo) to an inland prefecture, I should be glad to learn the news for his sake; and I should leave it to the Chinese literati, and the aspirants for office generally, to criticize his qualifications for the post. I, however, protest, as I hope every Englishman in China will protest, against his being appointed on the Yunnan Commission; for I know him to be quite unfit to perform the duties demanded from him for the occasion.

There is, my countrymen must bear in mind, at this moment a great political principle at stake. Shall a passport, bearing the seals of Great Britain and China, in future possess the power to protect a British subject, while in the interior of China, from political assassination?

I must now mention another circumstance which will influence the investigations of the joint Yunnan Commission. Pwan Ting-sing, the Fantai or Commissioner of Finances in Yunnan—the next territorial authority to the Governor of Yunnan province—is a protégé of Li Hung-chang. I know Pwan Ting-sing personally, and I also know him to be an able man. As he will naturally stand up for his provincial subordinates, it is the more incumbent on the British side that every care be taken on the part of Her Majesty's Minister, that a High official—one not likely to be biassed by local officials—*be appointed by the Central Government of Peking for the Yunnan investigations.* Sung Paou-hwa came to the S. S. N. Co.'s office and engaged the passage of Pwan Ting-sing, when he left here for Yunnan. In fact they would be often in the habit of seeing each other while both were on the staff of Li Hung-chang at Tientsin. Pwan Ting-sing was here in 1872 and 1873, connected with Li Hung-chang's Southern Legion, in a civil position; and I understood that Li placed great confidence in him. During the winter of 1873 and spring of 1874, when the Peruvian Legation were in Peking, Pwan Ting-sing was residing in Peking, in a public building not far from the Legations, attending to Li Hung-chang's business in the capital and also his own. I was then informed by a petty officer, employed in carrying despatches to Pwan Ting-sing, that he, (Pwan Ting-sing,) had given a high lady in the metropolis presents to the value of Tls. 160,000, to use her influence to get him the post of Fantai; and, as we later learnt from the Peking *Gazette* that he had been appointed Fantai of Yunnan, we took it for granted that it was the post he had desired to get. Pwan Ting-sing, as Fantai of Yunnan, and as a Chinese mandarin views matters, is naturally not inclined to support British advances into Yunnan.

I came to know him first, personally, in this manner. A mandarin (not a territorial one) had called on me three times, and, thinking it time after his last visit to return his calls, I wrote to say I would call on him on the following day at 2 p.m., but if that hour did not suit to fix another hour. He replied he would be ready to see me at 2 p.m. On arriving at his door, he came out and led me into his reception rooms. I found there a tall, well-dressed, gentlemanly looking Chinese, who rose and bowed. After being seated, I directed my conversation to my host, paying no attention to the guest. After the host and myself had spoken together for five minutes, the guest, however, joined in the conversation. I soon perceived from the deference paid to the latter that he was some man of [illegible] that Pwan Ting-sing lived in that neighbourhood, I came somehow to the conclusion that I had that mandarin before me. I sat over an hour, during which we talked on various subjects, Chinese and foreign; in discussing which the guest showed himself to be a man of good sense and considerable knowledge. I did not ask his name, as Chinese are in the habit of doing, although I could see [illegible] there to speak to me; and, when leaving the room, I merely bowed to him, the host following me to the sedan. On reaching home, my servant told me that the Chinese guest was Pwan Ting-sing.

PURITAN.

17th April.

CHINKIANG.

We hear of another change of officials in charge at the British Consulate, making the third since the beginning of the year, without counting the interregnums when we have been left to the tender mercies of the constable—a very worthy man in his own sphere, but hardly suited to impress the Chinese with a sense of the dignity of the official he represented.

A gentleman who has seen long service as Acting Vice-Consul has been appointed to the port, but we hear is disinclined to come, as the accommodation is so bad. We can, however, assure him that the community will do anything in their power to make him comfortable, they are so anxious to obtain the boon of a real Vice-Consul—at last granted by Mr. Wade,—in place of the assistants-in-charge whom the Chinese officials have only condescended to notice in order to snub.

18th April.

Messrs. Spencer & Wolff write from Chinkiang on the 21st April:—"Since the date of our last circular, extreme dullness has pervaded our market in Imports. Prices have shewn a drooping tendency throughout, and the business reported is of so trivial a nature that it is extremely difficult to give reliable quotations. The value of 7-lbs. T-Cloths has been fairly maintained; but Shirtings show a decline of 1 to 4 cands. per picul."

FOOCHOW.

The *Foochow Herald* hears of another fight in Formosa, near Tai-wan-foo, between the Aborigines and Chinese—in which the latter came off only second best. —A large fire broke out in the Southern suburb of the city, at about midnight on the 4th-5th inst. More than 100 houses were burnt, and several lives lost.—The eclipse was as great a failure in Foochow as in Hongkong and Shanghai, owing to the cloudiness of the sky.—A [illegible] sailing boats came off at Pagoda Anchorage on the 2nd April. Six boats started. Capt. Bisbee's *Bay State* won, Dr. Somerville's *May* second.—The line of couriers between Foochow and Amoy will be re-established on the 1st proximo. The couriers will start from both ends at noon—daily; and complete the journey in 45 hours (3 hours less than last year). The service is so arranged that there will be an interval of 3 hours between the daily arrival and departure of the couriers. The subscription is fixed at $15 per month. The enterprise is a private one, and unconnected with the Great Northern Telegraph Company.

AMOY.

The late interruption in the cable was caused by the steamer *Yesso* catching the double cable and breaking it about 5 miles from Amoy, stopping the communication on both sides at once (Hongkong and Chinese have the idea of military execution for cowardice! On the 7th instant, at Taiwan, was beheaded Lee Chang Shing 李長興, late second in command of 500 soldiers, of whom Wang Kai Chaan 王開俊,—an official slaughtered with some ninety soldiers by savages in February last,—was chief commander. He was decapitated for showing cowardice in withdrawing assistance to Wang, during his fight with the savages.

CANTON.

A disastrous fire took place in Ta Toong Street, Canton, on the night of the 7th instant. The fire is said to have originated in a piece-goods shop, and spread to the next house, occupied by a stationer. The different brigades turned out with alacrity, but in the absence of any organization, the firemen began to fight, and one man was wounded with a knife. Another account states that the fight took place between the firemen and some yamên runners, the latter refusing to allow the former to draw water from the yamên. The fire was caused by the careless handling of joss paper.—The Prefect of Canton has issued a proclamation against indulgence in the Wai Sing lottery, and threatening offenders with condign punishment.—*China Mail.*

HONGKONG.

The *City of Hankow* brings a quantity of Hongkong papers, but they contain no very interesting news. The *Daily Press* learns that the National Bank of India intends shortly to open a branch at Shanghai, of which Mr. James Campbell, formerly manager of the branch in Hongkong, will take charge.—Further attacks have been made on the wreck of the *Dunmail*, but to no purpose. An ordinary 9-in. shell, exploded under the main hatch, had no good effect, and the proprietors have determined to abandon proceedings. —The C. M. S. N. Co.'s steamer *Aden* has returned from her putative search for the remains of the late P. M. S. S. *Japan*, her three months' charter having expired. Her engagement can hardly have been a profitable one to the charterers, as the *Scotland* found the wreck at once. —The *China Mail* says a number of gentlemen have decided on running a steam launch, morning and evening, to Kowloong, if a sufficient number of monthly tickets are taken by the public. The idea is to do away with individual tickets and charge a sum of $10, or under (if found sufficient) for a pass entitling all members of the holder's family to use the steam launch for the month. This sum is too high, but if slightly lowered the [illegible] this month, has again fallen to Hongkong. The fortunate individual is an assistant in a Hongkong mercantile house.

NAGASAKI.

As the *Ashuelot* was steaming out of the harbour for Shanghai, the top of her cylinder blew up, which will necessitate her detention for the next six weeks.—The Paymaster of that ship had a narrow escape from being drowned by the upsetting of a sampan. He contrived to extricate himself, and was saved by a boat from the *Curlew*.—Mr. Olarovsky is leaving Nagasaki for a short time, and Mr. Iwerssen will act as Russian Consul during his absence. —A public meeting was held on the 8th instant, to organise arrangements for the forthcoming regatta. Captain Furber, Messrs. Gribble, Ringer and Tileston were elected a Committee for the purpose. The Chairman (Mr. Gribble) stated that unusual interest would attach to the forthcoming Regatta, from the fact that Shanghai and [illegible] send a four-oared boat and crew to compete with the Nagasaki Rowing Club in one of the races. A similar invitation had also been addressed to Yokohama, but unfortunately that port could not send a crew for this year's regatta. With the additional attraction thus promised, he felt assured that the community would assist as much as possible by the liberality of their subscription towards making the "Nagasaki Spring Regatta of 1875" evidently felt in the approaching event, and the *Nagasaki Shipping List* (from whose report we quote) concludes "we will do our best to give a good reception to our contesting friends."—The programme of the regatta will be found in another column.—The *Rising Sun* notes the completion of the new church:—In consequence of the damage done to the English Church on Oura Hill last August, by the typhoon, it was deemed necessary to pull the edifice down and then reconstruct it. For this purpose a subscription list was sent round the foreign community, who subscribed most liberally. The old building was taken down and the work of reconstruction commenced as quickly as possible, and Divine Service was held in the Church last Sunday for the first time. The new building is a *fac simile* of the old, and is seated for about 150 persons.—The 15th April was the Grand Annual Kite Flying Festival day, and like last year it was celebrated on the top of Kompua. Many thousands of persons visited the spot during the day, and the sport was carried on with unabated zeal. The road as usual was lined with beggars, singing women, &c.

HIOGO.

Baron Holleben—who, pending the arrival of Mr. Von Eisendecher, will hold the post of German Minister Resident at Yedo—passed through Hiogo on the 4th instant, on his way to the capital.—Speaking of the approaching regatta at Nagasaki, the *Hiogo News* says the Boat Clubs of Kobe and Yokohama have been invited to take part in it, as well as Shanghai. Shanghai, we hear, has accepted, and so has Kobe. Yokohama has declined, but an effort will be made to induce her members to reverse this decision. It is proposed that the principal race shall be pulled in Canton fours, without sliding seats.—The eclipse was invisible in Hiogo also, owing to cloudy weather. However, an earthquake happened in the forenoon; and, as the *News* remarks, they could hardly expect two phenomena in the same day.—The Finance Department has issued a curious Notification, regulating the expenses of Shinto priests when travelling:—

"Travelling expenses are to be allowed to Shinto priests who have their quarters in Tokio, when they are appointed to distant situations or when they are removed from one place to another. Their expenses are also allowed when they retire from the priesthood and return to their native place. The money is first to be paid by the Department of Religion, and it will afterwards be refunded by the Finance Department."—The Osaka correspondent of the *News* says:—Intending visitors will do well to wait until the end of the month, not only on account of the weather, which has been particularly disagreeable, cold, and wet; but because the Exhibition itself is not at its best yet. Among the novel exhibits are dairy produce, milk (condensed) and butter. They are "great on boots" this year, too; specimens of the handiwork of St. Crispin's votaries being brought together from various parts of Japan. The *News* adds:—"The Kioto hotel-keepers are likely to do a good trade this season; in fact they must be doing one already, as every steamer which arrives brings fresh visitors for the ancient metropolis. The Shanghai people especially are [illegible] fares now prevailing. We would advise intending visitors to secure the return tickets, to Hiogo and back for $20, good for three months, as there is no knowing how soon the competing steamship companies may declare a truce, and although we hope and believe that we shall never see the fares at their old exorbitant figures, yet even double the present rates will [illegible] difference."—In view of the forthcoming boat race at Nagasaki, the managers of the K. R. and A. C. are busily occupied in selecting a crew from those who are both able and willing to take part in the contest. Of course it is not always that the most suitable men are to be found amongst those who can spare the time, and in this respect the Nagasakians have an undoubted advantage.

YOKOHAMA.

The *Mail* publishes a translation of a paragraph from the *Nichi Nichi Shimbun* to the effect that a man, father of a samurai, being a believer in Christianity, on his death-bed requested his son to bury him with Christian rites, but there being no shrines or temples where those rites are known, the son performed the funeral ceremony himself, for which he has been sentenced to thirty days' imprisonment. Upon this, the *Mail* asks—"Are the Japanese about to endanger and even to ruin their new-made reputation for liberality, by persecuting the native Christians again? and concludes some appropriate remarks by saying that Christian nations "will regard the granting of freedom to the Press as a very poor, if not a hypocritical thing by the side of a persecution of the native Christian converts."—Robberies, burglaries, and attempts at incendiarism, says the same paper, have constituted the chief local events of the week, and happy are they who have not missed valuables of some kind. Particulars of some of these incidents are given in the various papers, but none of them appear to have been of any magnitude.—The Rowing Club has ceased to exist for want of subscriptions. A small balance in hand, $77.73, was, at the annual meeting, held on the 2nd instant, resolved to be given as a prize for a four-oared race, to be rowed on the Queen's birth-day.—Another earthquake shock, of short duration but moderate intensity, occurred at half-past six on the morning of the 2nd instant. No great damage was done, but pictures and ornaments were thrown down, and in some instances in Tokio, the walls were cracked. The *Herald* describes it as the most severe shock which has been experienced for several years.—The telegraph between Tokio and Hakodate [illegible] during the week ending the 3rd instant.—A proclamation notifies that the Government reserves to itself the right to employ such steamvessels as have been acquired by Okmasho (*New York, Behar*, and others), in the conveyance of its mails to China and the outports.—A writer in the *Choya Shimbun*, says the *Advertiser*, draws attention to the increasing use of beef, which, he says, a few years since would have been spurned by all but the few Japanese versed in European customs. Butchers' shops are now commonly found not only in the cities, but far in the interior; and the question of future supply is already being agitated, which, the paper quoted is assured, the diminishing herds of Japan are quite inadequate to furnish.—H.B.M.'s Provincial Court was occupied all one day in hearing the case of "Miss Lucy Young *v.* G. T. M. Purvis." It was a claim for $460, deposited by plaintiff with defendant for safe keeping whilst he was manager of the Occidental Hotel. Plaintiff also claimed $100 damages, which she said she had incurred in hotel expenses, through being obliged to stay in Yokohama on account of defendant not returning the money. Defendant pleaded non-indebtedness, alleging that he, as a servant of the proprietors of the hotel, took the money and paid it into the bank to the hotel's account, and that the hotel was thus liable. His Honor gave a verdict for $460 and costs for plaintiff, at the same time disallowing the claim of $100 damages. —A second ship-load (the first having foundered at sea) of Austrian agricultural implements and seeds, has, says the *Advertiser*, been dispatched for Japan. The Japanese commissioners in 1873 were very much impressed with what they saw of Austrian agriculture in and around Vienna, and showed themselves particularly anxious to secure the objects in question for their own country.—*L'Echo du Japon* reports that a samurai living at Tokio, was, during the night of the 31st ultimo, murdered by his own son. The mother of the parricide, after having denounced her son to the law, committed *hara kiri*. The son has been condemned to death by the tribunal at Tokio.—The Kobe *Minato Shinbun* says the construction of the railway line between Osaka and Saikio (Kioto) is rapidly progressing. The section between the latter place and Fushimi is to be completed by next July, and the entire line during this year.—The *Japan Gazette* says the new buildings of the British Legation in Tokio have at length been completed, and H. M.'s representative has transferred the seat of his official residence to the Capital. The premises hitherto occupied by Sir Harry Parkes on the Bluff have been formally handed over to the Japanese Government.—A severe shock of earthquake was experienced on the morning of 2nd instant. Fortunately it was of short duration, and did little or no damage.—New teas will be in the market before the despatch of another mail, and this staple, at least, continues to exibit signs of vitality. Silk is not particularly lively, and the outlook for silk-worm egg producers during next season is anything but satisfactory.—The *Mail* says the eclipse was observed at intervals. The sky was overclouded during a great part of the time. "An interval of about ten minutes occurred during which it could be seen extremely well, the figure of the moon obscuring full half of the sun's surface. That peculiar light, observable during solar eclipses, which seems to change the complexion of nature, was very observable between five and six o'clock. When the sun, still eclipsed, was about fifteen degrees above the horizon, a heavy bank of clouds entirely obscured it, and amid these clouds it set."—A Canoe Club has been formed; one of the rules is that a man must own a canoe and be able to swim. —Messieurs Sewaki and Morowaka, both officials attached to the Foreign Department, have been appointed to visit China upon a special mission.—The Mikado took

a pleasure excursion upon the Sumida river on the 4th. The Empress paid a visit to the Prince of Hosokawa at his residence on the river. When shall we hear of the Emperor of China and his wife doing anything as rational?

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

March 23rd.—The Governor-General Tso Tsung-t'ang memorializes, reporting the facts elicited on an enquiry held into the conduct of the late acting Magistrate of the Yü-mên district, who was accused of levying a surreptitious tax on the opium poppy 私收烟稅. Although the Magistrate himself contended that all he had done was to issue a proclamation warning the people that he would impose a fine on any future cultivation of the poppy, having discovered on his accession to office that the cultivators had gathered in their crop for the year, and being fearful lest they should plant for another harvest,—it is evident that he is merely seeking to escape under cover of a misrepresentation of the actual facts; and the Governor-General asks that he be stripped of his rank in order that he may be regularly brought to trial.—Granted by rescript.

March 24th.—The Governor-General Tso Tsung-t'ang memorializes, denouncing an officer of the rank of Taotai, named Ho Yüan-tsin, whom, after he had been degraded for improper conduct in 1868, at the instance of the Governor-General of Hu Kwang, he took under his orders on the recommendation of that high functionary. A military command was given him, and after a time the restoration of his original rank was solicited of His Majesty. Having been appointed acting Taotai of the An-Suh Intendantship, with the special function of providing for the military requirements of General Sû Chan-piao's force, when operating against Suh chow, Ho Yüan-tsin not only altogether neglected this duty, but actually threw every possible difficulty in the way of the commander he was required to support. The Governor General confesses, with a feeling of mortification, that he has been mistaken in his estimate of the delinquent's capacity, as an officer suited for frontier service, and requests that be stripped of his rank and office, as also that he himself be adjudged a penalty for employing an improper person. (For rescript see *Gazette* of 11th inst.)

March 25th.—No documents of importance.

March 26th.—The Governor of Shensi, Shao Hêng-yü, memorializes reporting the penalties allotted to certain petty officials for their participation in a gambling party, the result of which was the suicide of one of their number, as previously recounted last year.

March 27th.—(1) A Decree. Her Majesty the Empress Kia Shun, from the time when in the 11th year of the reign T'ung Che (1872) she became consort to His Majesty now departed, to be the mistress of the Imperial halls, shewed herself a pattern of virtuous demeanour in the purity and diligence, the gentleness and affability, by which she was distinguished. She waited upon their Majesties the two Empresses Dowager with deference and a willing mind, rejoicing in the manifestation of a filial devotion which was never interrupted. When called upon, in the twelfth moon of last year, to lament the departure upon the Dragon of His Majesty the late Emperor to be a guest on high, Her grief was so excessive that it took the proportions of a fatal illness. This day, to our most profound distress, at the hour of four a.m., She has departed this life. Let She-toh, Prince of Li, Wang Ts'ing-li, the President of the Board of Ceremonies, Kw'eiling, Comptroller of the Household, and Kwei-ts'ing, Vice-President of the Board of Works, arrange with reverence the funereal rites. Let the proper departments attend according to precedent to all other ceremonies befitting the occasion.

(2) A Decree in the name of the two Empresses, expressing their profound sorrow at the calamity which has occurred so unexpectedly, in the decease of Her Majesty the Empress Kia Shun, before even the hundred days of mourning for her late Imperial consort have expired. Her Majesty's remains are to be temporarily deposited in the Show K'ang Kung (a building within the palace), until a time be fixed for their removal to the Yung En Tien (in the park where the remains of the late Emperor are temporarily reposing.) The Prince of Kung is directed to join the commission appointed for the arrangement of the funereal rites.

(3) A Decree, expressing the imperial sorrow on receipt of intelligence of the decease of the Governor-General of the Yellow River, K'iao Sung-nien.

(4).—A Decree appointing Tsêng Kwoh-[illegible] 曾國荃 to the vacant post of Governor-General of the Yellow River. The vacancy as Governor of Shen-si is to be filled by the promotion of the provincial Commissioner of Finance, T'an Chung-lin, 譚鍾麟.

March 28th.—(Court Circular). The Prince of Ch'un and his colleagues paid their respects on their return from the Western Mausolea.

(1).—Liu Kw'ên-yih, Governor of Kiangsi and acting Governor-General of the two Kiang, memorializes acknowledging with humble thanks his appointment to act in the vacancy caused by the retirement of Li Tsung-hi. In a strain of profuse self-depreciation, the newly appointed dignitary declares his unfitness for the post he is called upon to occupy, immediately after he has himself asked leave to retire for a time from public employ for the [illegible] of his health. He proposes proceeding to his new post at Nanking by steamer, leaving Kiukiang on the 23rd February.

(2) The same functionary memorializes—on a date previous to that of the above—requesting leave to retire from the service on the ground of continued ill-health. He is not yet fifty years of age, and has still a right to look forward to a long life, during which he trusts, so soon as his health is restored, to be able to discharge anew his duty to the State.

March 29th.—(1) A Decree, appointing Wên-che 文治 (Superintendent of the Imperial Manufactory at Hangchow), to the post of Taotai of Yen-p'ing circuit in Shansi.

(2) A decree of the two Empresses, adopting the recommendation of the Prince of Kung and his colleagues in favour of a site for the Mausoleum of his late Majesty. The only suitable spot discovered is a piece of ground near the Eastern Hills, which is accordingly to be adopted, with the designation Hwei Ling 惠陵. (N.B.—In selecting the Eastern Hills as the site for the interment of his late Majesty, the usage in force since the foundation of the present dynasty is interrupted. Each deceased sovereign has hitherto been interred at either the Eastern or the Western Hills, situated at a distance of about 100 miles from Peking on either side, in alternate order. The late Emperor, in accordance with this system, should have been interred at the Western Hills; but it is reported that on his Majesty's state visit thither last year, he expressed a strong dislike to the neighbourhood).

(3) The Governor-General of Chihli memorializes denouncing the authorities responsible in the case of an escape of seven prisoners from the jail of the Wei district, of whom three were under sentence of death for homicide, and four others awaiting trial. According to the statement of the jailers, they contrived to wrench off their fetters, and break out of their cages while the jailers were sleeping. The sub-assistant Magistrate or jailwarden has been stripped of his office by rescript, and ordered to be placed on trial.

(4) Liu Kw'ên-yih, Governor of Kiangsu, reports in a postscript Memorial, that toward the close of last year he sent up a memorial beseeching leave to retire from the service on the ground of continued infirmities, which, with a number of other memorials on provincial business, was handed over to one of his couriers named [illegible] addressed to the Memorial Presentation Office, for transmission to Peking. The courier has now returned, and made report to the effect that as he rode post-haste to Peking he encountered heavy storms of rain and snow, which completely drenched his effects. As he proceeded day and night, he did not pay proper attention to the circumstances, and when he reached Peking, although the box containing the [illegible] protected by its many folds of oiled paper from suffering injury, he discovered that the covering despatch had got soaked and had been reduced to a state of pulp by the motion on horseback. He consequently handed over the box of memorials to the Kiangsi Courier Office for safe keeping, and hastened back to the province to make report. The Governor states that the messenger has been flogged for his carelessness, and is sent back with all speed with a duplicate of the despatch. Owing to this miscarriage of his application for leave to retire, the Governor, although his rheumatic affection of the muscles still causes him great suffering, feels bound to obey the commands received in the interim and to proceed to take up his post, ill as he is, as acting Governor-General at Nanking.

March 30th.—(1) The Censor Wang Chao-lan memorializes, stating that, when taking his turn of duty last month as visitor of the Board of Punishments, he found that no less than ten of the inmates died during that single period; and that, on holding his inquest (or inspection) on the remains, he invariably found the bodies to present the most lamentable appearances of emaciation, being in fact simply skeletons. The explanation given by the jailers was that the deceased had been long confined in the prison. The Censor was informed that no small number of the prisoners were ill, and the state of affairs he witnessed caused him great distress. He would observe that the "Yih-King" contains a text enjoining on the virtuous ruler "wise precaution in the infliction of penal discipline." This should be the unalterable rule for those to whose charge prisoners are entrusted; and it is on these grounds that stringent rules exist, limiting the time within which judicial cases must be disposed of. The rules are not, however, strictly observed, owing to an increase in recent years in the number of cases before the tribunal, and the consequence is a perpetually increasing number of prisoners. The effects of starvation and cold, superadded to the torture undergone judicially, cause the inmates of the prison to fall ready victims to any epidemic that may break out; and the result is that, while on the one hand criminals of the deepest guilt escape, by death, the public infliction of the penalty of the law, others, whose offences are not of a capital nature, succumb to the same fate in the midst of their [illegible] The Censor would entreat that injunctions be laid upon the authorities of the Board of Punishments to use greater despatch in disposing of the cases before them, and at

the same time to exercise a vigilant care in the issue of rations and clothing, and in preventing malversation in this respect. The jailers and others should be stringently prohibited from the practice of cruelty or extortion toward the prisoners. (For rescript see *Gazette* of 17th instant.)

(1) The Governor of Kiangsu memorializes, reporting the despatch of the first detachment of the grain-junks for Tientsin. The measures adopted for the shipment by sea of the entire contingent of first and second quality rice 漕白二粮 due on account of the 1874 collection, from the prefectures of Soochow, Sung-kiang, Ch'ang-chow, Chên-kiang, and T'ai-ts'ang, including the rice purchased from the amount collected in money in the two districts of Tan-yang and Kin-t'an in Chên-kiang Fu, have already been reported. requisite number of junks have been chartered by the transportion office, and the grain, as forwarded to Shanghai, has at once been loaded on board. The operation has been completed as regards the first detachment of junks, numbering 180 sail, which have received a total lading of 333,594 piculs of rice, with an extra surplusage allowance of 28,127 piculs. All inspections having been held, the squadron left Shanghai, dropping down to Ts'ung-ming, there to await a favourable wind. In addition to the above-named amount, 100,000 piculs of rice, with 8,000 piculs extra waste allowance, have been handed over to the China Merchants' Steam Navigation Company for transmission. A steam gunboat from the Shanghai Arsenal has been detailed to convoy the junk squadron and expedite its movements.

(3) The Governor of Kiangsu further memorializes, presenting the solicitation of P'an Wei, Financial Commissioner of Fuhkien, on leave at his home, to retire from the service on the ground of ill-health. (Granted by rescript).

March 1st.—(Court Circular). The Board of Astronomers presented a copy of the Tables of Calculations for the Eclipse. (N.B.—The "Jih Shih T'u" 日食圖 is a pamphlet drawn up in Chinese and Manchu, setting forth the calculations for the eclipse of April 6th for Peking, each of the provincial capitals of the Empire, and the capitals of Anam and Corea. Each of these occupies a separate page, together with a diagram shewing the extent of obscuration of the solar disk, accompanied by a scale of measurement. The calculations are avowedly based on the "Su Li Tsing Yün" or Imperial cyclopædia of Mathematics and Astromony, published at the beginning of the 18th century).

(1) A decree ordaining that the great Council of State do deliberate with reference to the posthumous title to be conferred on her Majesty, the empress Kia Shun.

(2) The Governor of Yünnan memorializes reporting the amount of contributions by the people of the Province during the years of rebellion, upon which a request for increase in the number of examination degrees is based. Between the years 1856 and 1873, both inclusive, the total to be credited to popular contributions for the expenses of trainbands and local irregulars, amounts to Taels 8,023,442.2.4. In addition to this an amount under the head of *li-kuh* 厘谷 has been contributed in rice to the extent of 2,726,474 piculs, the official value of which is rated at one Tael per picul. The actual total to be credited to the province under the head of money contributions is therefore Taels 10,749,623.2.4. According to the rule established in 1853, for every Tls. 10,000 contributed in any province, an addition was to be allowed of one civil and one military degree at a triennial examination, and for every Taels 30,000 thus contributed the addition was to be made perpetual. Similar advantages were conceded to departments and districts for their respective contributions. In conformity with the tenor of successive regulations, it is now requested that an addition in perpetuity of ten degrees, both civil and military, be made to the limit assigned for the provincial examinations, and of from 110 to 115 similar degrees to the various district examinations.—(Referred by rescript for decision by the proper Board.)

(3) The Prince of Kung and his colleagues of the Grand Council memorialize, reporting the appointment of Fêng-kwang-yün 馮光勛 a titular Secretary of the Board of Punishments and supernumerary Secretary of the Grand Council, to fill a vacancy as Secretary on the establishment, caused by the retirement of Shao Wên-hü, who goes into mourning.

Official Papers.

MEMO. ON THE WOOSUNG BAR.

1st.—The question may be viewed in two ways, (A) as it affects and is affected by the natural and artificial agencies that are working at the mouth of the Yangtsze; and (B) as a mere dredging operation.

2nd.—Viewed as affecting and affected by other agencies, the question calls for a consideration of (A) the action of Nature at the mouth of the Yangtsze; (B) the action of Nature in the Shanghai river, (C) the results of the combined action, and the future of the river, and (D) the future of trade.

3rd.—*The mouth of the Yangtsze.*—The flood tide is felt as far up as Chinkiang. After passing Chinkiang, the down current of the Yangtsze meets a stronger and stronger flood tide as it approaches the [illegible] checked by the flood tide, the current began to deposit silt, and as the deep channel leaves the convex right bank to cross the river and hug the concave left bank of the Yangtsze below "Kiang Yin," the natural tendency to form a bar there marks that as the point from which, seawards, the formation of shoals, middle-grounds, &c., will be most noticeable, until the sea is reached, and the estuary is studded with growing islets.

The silting up in the estuary began long ago, and to-day we have the Yangtsze flowing out to the sea by two channels (1° 1° 1° and 2° 2° 2°) on either side of the island Tsung-ming.

All round Tsung-ming, islets and banks and shoals are forming, but more especially on its seaward side. The tendency is to form a triangular piece of ground—the apex being the upper end of Tsung-ming, and the base extending from Shaweishan, *viâ* the Ariadne and Amherst, to the Yangtsze Cape (3° 3° 3°). Ten years ago, the channel to the north and east of Tsung-ming (2° 2° 2°) was never mentioned, but of late it has been used occasionally, and is spoken of with growing approval. On the other hand, the channel on the west side of Tsung-ming, from Gutzlaff to Woosung (1° 1° 1°) has been narrowing and shallowing, and is likely to present various impediments to navigation in the future. At one point especially (A A A), known as the Beacon Flats, the silting-up is covering so extensive a superficies that the deep channel may either disappear there or become impracticable.

It would be an [illegible] waste of money, and useless fight with Nature, to attempt to keep a channel through the Beacon Flats open by dredging; and it may be regarded as certain that the channel (1° 1° 1°) will have less and less water on it; and that at some future day*—it may be five years hence, or it may be fifty—the only navigable channel to enter the Yangtsze by will be that marked 2°2°2°, from Shaweishan round the north end of Tsung-ming. Moreover, in proportion as that day comes nearer, the part of the channel between Woosung and the north end of Tsung-ming will become less navigable. Whether the down-flow of the Shanghai river will thereon work its way through the dead or checked waters of the Yangtsze, and join the seaward rush of the Yangtsze at the north end of Tsung-ming, or continue to find a way out to sea past Kintoan and the Yangtsze Cape, time will shew.

4th.—*The Shanghai river.*—The dotted line (.....) in the map on the first page is the deep channel of the Shanghai river. It will be seen that this channel hugs the concave sides of the river, and that at X, it leaves the right bank, which becomes convex, to seek the left bank, which grows concave. When a river's deep channel thus crosses from one bank to another, a bar begins to form.

The silt-laden waters of the Yangtsze were forced up the Shanghai river by the *flood tide* from the sea; and after passing Woosung they debouched from a comparatively narrow channel, and found a wide basin where the force of the expanded flood-tide slightly abated, and the down-flow of the Shanghai river (coming round a bend) made itself felt: deposit began, and now there is a large formation known as the Middle Ground or Gough's Island.

At this part of the river (M×M) there are two forces at work—the tendency to form a bar connected with the cross-river channel and the deposit of silt on the flood-tide.

These forces result—the latter in the narrowing of the navigable superficies, and the former in the derangement of the depth of water in the deep channel; (to these two forces may be added any other agencies set in motion, whether by natural causes, such as the down-flow of the Shanghai river, or artificial, such as steamer movements and harbour changes).

5th.—*The results of combined action in the estuary and in the river, and the future of the Shanghai river.*—Supposing that the natural navigable capacity of the Shanghai river be taken to be its depth of water when the tide is out, would not the port be closed to large vessels, were tides to disappear?

Were tides to disappear, the water superficies would certainly narrow,—would the channel deepen? or would it remain as it is? or would it become more shallow? It is on the answer to this trifling query that speculation as to the future of the Shanghai river depends, for it may be taken for granted that the formation of banks, and then dry land, from Shawieshan to the Yangtsze Cape, or even the further silting up of the Kintoan Flats, will result in less and less flood-tide waters in the Shanghai river.

(Indeed it may be quite possible that the want of water on the Woosung Bar during the last two or three years is really more attributable to the action of the uprising Kintoan Flats on the flood-tide, than to the elevation of the bottom of the river at the Bar. Soundings rather support this conjecture.)

In addition to the consideration of a diminishing and disappearing flood-tide, it must also be borne in mind that, from Woosung to the north end of Tsung-ming, the channel (1°1°1°) will gradually grow shallow and be blocked up, and that the

* "As we vaticinated last night, the P. & O. steamer *Orissa* did not succeed in reaching "the steam tender *Dragon* last night, "having been detained below the Beacon "Flats till the morning tide. The mails "arrived in 19 hours from Gutzlaff."—*Shanghai Evening Courier*, 25th Feb., 1874.—Received at Peking, 10th March.

probability is that Shanghai river will bend north after passing Woosung, and join the Yangtsze waters in a not very powerful stream above Tsung-ming, to flow seawards with the Yangtsze waters past Shaweishan. These considerations—the effects of natural agencies—speak badly for the future of the Shanghai river. What of another class of considerations—e.g., commercial?

6th.—*The future of trade.*—The trade consequent on opening the Yangtsze river has so far been diverted into a false channel by the vested rights or the money spent in Shanghai. This agency is in turn being counteracted by the opening of the Suez Canal, through which steamers have begun to pass, making London and Hankow their termini.

The tendency of the S. S. N. Company's steamers' operations is to bring teas to Shanghai; the competition of Holt's line does not altogether oppose this tendency; but Holt's line, a combination of river and sea-going steamers, is being followed by other lines, and this competition will tend to give foreign trade more and more to the steamers which do not call at Shanghai. Even the P. & O. preference for Shanghai will have to move on, and keener competition will weaken the influence of Shanghai's priority and vested rights. Add to all, the competition coming from the Chinese side, which, in ten or twenty years time, will have swept the foreign flag from the coasting trade of China, and displayed the Chinese colours in the London and Liverpool docks. The highway of trade for Central and Northern China will be the Yangtsze. Teas will be shipped at Hankow and Kiukiang, and Shanghai silks and Ningpo teas, at Chinkiang. They will be the return cargoes of the steamers which carry what China may continue to demand from Europe. In twenty years time, Chinkiang will have taken the place of Shanghai as a semi-terminus and trans-shipment port, but its foreign community will naturally be be a smaller one, (political) possibilities aside.*

7th.—Thus looked at, as it affects and is affected by natural and artificial agencies now at work at the mouth of the Yangtsze, the question of the Woosung Bar is seen to mean that dredging there may possibly be nothing more than a means of making the last days of Shanghai a little more comfortable than they would otherwise be; it will not prolong the life or avert the commercial death of the place, but it will make a show of vitality during its declining years more possible.

8th.—*The Woosung Bar, as a mere dredging question*—Can the Woosung Bar be dredged? Of course it can. Can the Channel be kept deep enough for such vessels as navigate the remainder of the river? Certainly; that can be done, but it will be useful to do so only so long as the flood-tide is not more apparently and more decidedly affected by the growth of the Kintoan Flats and the extension of Tsung-ming. When is the flood tide likely to be so affected? That question cannot be answered categorically; but once the silting-up in the estuary has reached a certain point, and the point is being neared with increasing rapidity, the effect of a diminished flood-tide will at once be felt in the Shanghai river to such an extent as to be as bad for the navigation of the river by vessels drawing say 18 or 20 feet, as if the flood tide had disappeared completely. Given the natural and commercial agencies at work, it may be taken for granted that—certainly for 10, perhaps for 20 or 30 years to come, the commercial status and Foreign Community of Shanghai will be such as to make it worth while to prevent the river from becoming blocked up at any one point—for instance by the Woosung Bar. Dredging can do this and no more, and then only for a time; it cannot secure for Shanghai either a navigable channel or a continuance of commercial prosperity.

9th.—*Supposing dredging to be decided on*—operations could not be begun on the spot for from a year to 18 months from the date of authorizing the works to be taken in hand. The first cost would be for a dredger delivered at Shanghai, say Tls. 60,000, and for the first year's work say, Tls. 40,000. Steady work for one year ought to suffice for the cutting of the Channel now required. But supposing the operation to occupy a year-and-a-half, three years [illegible] authorization to the date of declaring the Channel as navigable as it is desired to be. The three years' expenditure would be say Tls 120,000.

Subsequently, work would have to be done every year, to keep the channel in proper order, costing say Tls. 20,000 a-year. Lower estimates would not be safe; even these may prove to be low; still the expenditure of the first [illegible] suffice to shew whether the experiment ought to be persevered in.

The circumstances of Shanghai, its present position as a commercial centre, the interests of its community, and the revenue its yields China, are in themselves sufficient reasons why the demand for dredging ought to be assented to, but it must be borne in mind that no one can say how soon commerce may cease to ask for access to Shanghai, or natural forces acting elsewhere make dredging operations at Woosung useless.

(Signed) ROBERT HART.

Peking, 5th March 1874.

* The Taotai told me that it had been decided to send three of the war vessels built at Foochow, to Europe. Letter from Mr. Glover, Shanghai, 21st February, 1874.—Received 7th March.

Public Meetings.

[illegible] Y. C.

A special general meeting of members of the Shanghai Yacht Club was held on Friday night, present—Messrs. A. J. Little, Commodore, in the chair; G. B. Hill, Vice-Commodore; J. Wilson, J. C. Ashley, J. P. Croal, J. J. Tucker, A. G. Lambert, Committee; Messrs. Dillon, E. H. Oliver, J. H. Vail, W. Gubbins, H. Amoore, W. White, W. H. Rickard, J. Brown, J. Tregaskiss, H. Batten, J. B. Dudfield, and W. H. Hewett, hon. secretary.

The COMMODORE congratulated the meeting on so good an attendance, and hoped it betokened a reviving interest in the sport of yachting. He intimated that the business before them was the consideration of Rule 13, with a view to its alteration. The committee proposed that the rule should read thus—

In addition to the ordinary mode of election by ballot, it shall be lawful for candidates to be proposed and seconded at the general meetings and at the Committee meetings of the Club, without previous notice having been given, and be there and then elected as members by the meeting assembled; and, further, at any time within 48 hours, and up to the time of a race, any gentleman proposed by one member and seconded by another, accompanied by compradore order for his subscription, shall be accepted by the secretary of the club or president of the match, and enjoy all the privileges; provided always that a ballot can be demanded by two members, and should the so-proposed member be blackballed, it shall not disqualify the boat.

After some discussion,

Mr. J. W[illegible] moved as an amendment and Mr. W. HEWETT seconded—

That any gentleman proposed and seconded by a member of the Club, and approved by three members of the Committee, at any time prior to a Corinthian Race, be admitted to the full privileges of the Club, as if he had been duly balloted for.

The amendment was carried by a large majority.

The COMMODORE next said the Committee proposed that No. 20 of the Sailing Regulations should read thus—

There shall be no restriction as to sails, number of crew, amount of ballast, shifting ballast, and number of friends, with the exception only of Corinthian races, when only members of the Club are allowed on board.

Mr. J. WILSON moved as an amendment, and Mr. RICKARD seconded—

That the Committee shall have power to arrange (except for the Challenge Cup, which shall be sailed under one China sail), number of sails, number of crew, and number of friends, that shall be allowed in each race [illegible] conditions of the race.

Carried unanimously.

Messrs. Gundry and Balfour were elected honorary members.

A vote of thanks to the Chairman, terminated the meeting

The Committee afterwards sat to make arrangements for the Spring Regatta, and it was decided that the Challenge Cup value Tls. 250, should be sailed for on Thursday, the [illegible] Cup value $50, on Saturday, the 24th; and another Corinthian Cup, value $75, on Thursday, the 29th instant.

MEETING OF TREATY CONSULS.

MINUTES of a Meeting of Consuls held at Shanghai, on the 16th day of April 1875.

Present:—The Consular Representatives for Austria-Hungary, Denmark, Germany, Great Britain, Italy, Japan, Sweden and Norway, and the United States.

Letters from the Consul-General for France, and the Consul for Portugal, stating their inability to attend the Meeting, were read.

The Senior Consul's letter to the Harbor Master in terms of the Minutes of the [illegible] to the Taotai's request that the buoys placed in the Harbor be lighted, and the swinging booms of men-of-war be rigged in at night, in order to avoid accidents to boats such as have occurred sometimes resulting in loss of life, and the Harbor Master's responses to same, were laid before the Meeting. Also the Senior Consul's letter, as above, to the Harbor Master in regard to inflammable and explosive articles on board ship in harbor. After discussion, the following rules were adopted:—

"No vessels except men-of-war may use swinging booms. The swinging booms of men-of-war shall be rigged in from sunset until sunrise."

"No buoy may be laid down without the sanction of the Harbor Master. Unoccupied buoys must be lighted from sun[illegible]

"Vessels arriving with gunpowder, kerosine oil, dynamite, acids, or other explosive or inflammable materials on board beyond the customary stores, must anchor at least one mile below the lower limit, and fly a red flag (No. 5 Marryat's or *B* Commercial Code) at the fore during the day, and all such vessels shall abide by the instructions received from the Customs concerning the discharge of the same."

The Senior Consul then submitted a memorandum which had been prepared by the Harbor Master, with lists,—

1st.—Of the licensed Pilots for the Port of Shanghai.

2nd.—Of the supernumerary pilots.

3rd.—Of the pilots [illegible]

4th.—Of apprentices who have served their apprenticeship, and are waiting for examination.

In this connection a discussion ensued whether pilots should not be allowed to compete for business, making the charges, not to exceed a maximum rate, agreed upon between them and Commanders of vessels; whether the number of pilots might not be still further limited, or whether any limitation is desirable; whether the Harbor Master should be authorised to control the taking of apprentices by pilots; and whether any relief can be extended to the apprentices who are now waiting for examinations. It was determined to make no change in the existing system.

The letter of the Senior Consul, in terms of the Minutes of the Meeting of February, to Messrs. Davenport, Haas, and Yates asking for reports upon the Mixed Court, and reports by Messrs. Alabaster, Haas, and Yates were placed before the Meeting. It was agreed that these should be printed and circulated for the more perfect examination of the several members of the Consular Body.

The Senior Consul reported that the several Consuls had sent to him, as agreed upon at the last Meeting, the names of the Officers preferred by them for the Court of Consuls for 1875, and that the choice had fallen upon Messrs. Medhurst, Annecke, Messrs. Medhurst and Seward, a Committee of the Consuls appointed at their last meeting to deal with the Taotai and the Dutch Engineers, in regard to a survey of the Woosung Bar, presented a report. It was agreed that an offer of Taels 2,500 to cover all expenses of such survey should be submitted to the Engineers in question.

Report of the Committee appointed to deal with the Taotai and the Dutch Engineers in regard to a proposed survey of the Woosung Bar:—

Your Committee have secured from the Taotai a grant of Taels 1,000, and are assured that another like sum will be given by the Steam Companies and general public. Upon this understanding they have communicated with Mr. Korthals at Yokohama, and hope to be able to report soon that the Engineers will undertake the survey for the sum thus provided, with perhaps some allowances for expenses.

Your Committee append the letters which have passed between them and the Taotai. Also copies of telegrams to Japan and Mr. Korthal's answer to the first one.

Shanghai, April 15th, 1875.

Since the foregoing report was prepared, a further letter has been received from Mr. Korthals, saying that the Engineers will accept an offer of Tls. 2,500, this to cover their pay and travelling expenses.

W. H. Medhurst.
George F. Seward.

Shanghai, April 16th, 1875.

A letter from the Danish Consul in regard to the protection of submarine telegraph cables was presented. This subject was referred to a Committee, consisting of Messrs. Keswick, Seward and Haas.

Messrs. Annecke, Medhurst and Seward, a Committee of the Consuls, appointed at their Meeting of the 30th of June, 1874, to consult with the Ratepayers' Committee for the revision of the Land Regulations, submitted a report with a copy of the amended Code agreed upon by the two Committees in conference. It was agreed that the proposed Code should be circulated for examination by the Consuls.

Report of the Committee appointed to meet the Ratepayers' Committee appointed at a special meeting in May last, to prepare a [illegible] Land Regulations:—

Your Committee have met the Ratepayers' Committee, and with them agreed upon a proposed set of Amended Regulations which are presented herewith.

The features of the proposed Code which seem most worthy of notice are as follows:—

1st.—All unnecessary verbiage has been avoided, and the simplest, most brief, and direct language used. This should prove of great advantage in the practical application of the Code, and in translating it into Chinese.

2nd.—The qualifications of Electors and Councilors have been cut down somewhat, to meet changes in the social and business conditions of the community.

3rd.—The powers of the Electors and the Council are defined with greater precision.

4th.—A limitation of the power to borrow money, and partial limitations of powers to impose taxation are provided. These limitations appear desirable in view of the shifting character of the foreign population, the absence of many land renters, and the importance of the Chinese element.

5th.—It is made incumbent upon the Council to give the Consular Body notice of [illegible] information and that of the Chinese authorities, and to take other steps for the public safety.

6th.—An article for the expropriation of lands has been provided. But your Committee have some doubts whether this article can be practically worked.

7th.—Power to make Bye-Laws under the Regulations is given to the Electors, subject to the approval of the Consuls and Intendant [illegible] in other words all minor matters are left for local action. This provision is thought to be very necessary, and likely to avoid complicated references and vexatious delays.

8th.—Powers are given for the taxation of residents on outside roads, and for their admission to Municipal Elections and Meetings, and for the control of such roads, and other outside properties.

9th.—No change is proposed in regard to the tenure of land, but appropriate references are made to the existing system, and to the proprietorship or control of lands surrendered to the public use.

Your Committee invite your scrutiny of these proposed Regulations, and your instructions thereupon.

W. Annecke,
W. H. Medhurst,
George F. Seward.

Shanghai, April 15th, 1875

The two Resolutions in regard to Proxy Voting passed at the Ratepayers' Meeting of June 8th, 1874, the first expressing dissent from the opinion of the Consuls on this subject given in 1871, and the second proposing an Amendment of Article XIX of the Land Regulations, were considered. It was agreed that it is not necessary for the Consuls to re-consider their opinion of 1871, and that so far as the proposed Amendment is concerned, the Consuls, while desiring to forward the wishes of the Ratepayers as expressed in it, ought to point out that the amendment is not explicit and may work some hardship. The amendment reads,—"Provided always that no proxies shall be admitted at such Meetings of Ratepayers actually present in Shanghai." The question may arise under this wording whether the Ratepayer who is immediately outside of the Municipal limits may give a proxy, or whether he must be absent from the port or the Consular district. In either case, the port or the Consular district should be defined. Again, the amendment may be considered faulty in that it does not point out how the question of absence is to be tried. And hardship may happen under the amendment by the exclusion—contrary to the spirit of the Regulations, and of the amendment itself, of the proxies of persons who are ill. The Senior Consul was requested to write in this sense to the Chairman of the Municipal Council.

Sundry current correspondence was placed upon the table, as follows:—In regard to the Annual Election of Councilors for the Municipal Council; the Annual Municipal Meeting, and a Special Meeting; the Taotai's Commutation of wharfage dues, and the prohibition of the sale of game, and also letters in regard to the lowering of the Hongkew Creek Bridge; and a Proclamation of the Paoshan Hsiêu in regard to the Woosung Road.

J. Haas,
Acting Austro-Hungarian Consul.
E. Morel,
Consul for Belgium.
W. Keswick,
Acting-Consul for Denmark.
E. Godeaux,
Consul-General for France.
W. Annecke,
Consul for Germany.
W. H. Medhurst,
Consul for Great Britain.
L. Vignale,
Consul-General for Italy.
E. Shinagawa,
Consul for Japan.
A. Goetz,
Acting Consul for the Netherlands.
A. H. de Carvalho,
Consul in charge for Portugal.
J. E. Reding,
Vice-Consul for Russia.
A. de Garay,
Consul for Spain.
W. Scott Fitz,
Act. Consul-General for Sweden & Norway.
George F. Seward.
Consul-General for United States.

The following are copies of letters which have passed between Messrs. Seward and Medhurst and the Taotai, in regard to the Survey of the Woosung Bar:—

Messrs. Seward and Melhurst to the Taotai.

Sir,—You were good enough to favor us with an interview on the 16th instant, in order to afford us an opportunity of submitting for your consideration a proposition in respect to the Woosung Bar; namely that you should make an appropriation of Taels 2,000 for the purpose of engaging the services of two Dutch professional men, now in the employ of the Japanese Government, to survey and report upon the Bar. This proposition in no way contemplated interference with the general question now under submission to the Peking Government, its object being simply to embrace an opportunity happily offered for satisfying the Chinese and foreign local authorities, at a trifling cost, as to the actual nature and cause of the obstruction, and as to the most practical method of removing it. We were prepared to urge the proposal more warmly in view of the fact that the stay in Japan of the Engineers in question is very uncertain, and that consequently the opportunity to secure their services may be lost, if steps are not promptly taken.

Your first effort on learning our purposes was to represent the inutility of any attempt to improve the present condition of the river entrance, basing your arguments upon certain theories as to the action of the current upon the banks and channels of the river; but it was urged in reply that merely empirical theories can be of no service in elucidating the question, but that what is needed is professional knowledge; and an opportunity being now afforded for securing such knowledge, it should by all means be taken advantage of in the interest of all parties.

You thereupon fell back upon your official responsibilities, pleading firstly, that inasmuch as the matter had been made a subject of reference to Peking, it would be presumption on your part to forestall the result by independent action. Secondly, that if you did sanction the survey, and the result proved favorable to the claims of the Consuls, you would be committing your Government to a course of action which it might not be convenient for them to pursue. And, thirdly, that in any event you could not as Taotai expend public moneys for administrative purposes without previous reference to the higher authorities. We met these objections by representing that a mere survey could not have the effect of anticipating the decision of the supreme authorities, whilst it might be

of service to them in their consideration of the matter; that even if favorable to our views, it need not necessarily commit the Government to act upon the information gained, and that as regards funds we felt assured that a functionary charged with comprehensive administrative and fiscal authority such as yours, must find little difficulty in appropriating a small sum like Taels 2,000 to the furtherance of interests unquestionably public in their character. In support of this last consideration indeed, we had your own acknowledgement that you possessed the ability to make appropriations in certain directions without any reference to the higher authorities at all.

The discussion was protracted through two hours without effect, although we reduced our proposition to an appropriation of Taels 1,000, undertaking to induce the mercantile community to raise the other moiety by contributions amongst themselves, and eventually we took our leave grievously disappointed at the result of the interview.

The above is a summary of what passed upon the occasion, and we desire to place it on record in order to show our Consular colleagues and the foreign community generally, that no effort has been spared on our part to claim from you this very reasonable concession. It will no doubt appear to them as inexplicable as it seems to us, that, after several years persistent representation on our part of an evil which threatens to check the normal developement of this great port, you, as the local representative of the Government, should still be without instructions as to what attitude you should take up in respect thereto, and should prove unable or unwilling to go so far into the matter, as to take a step calculated only to gain for your Government information of a valuable character at an inconsiderable expense.

It is right to add that you were good enough to offer to make a representation forthwith to the higher authorities of this province, in the sense of our modified proposition, namely, to make the appropriation of Taels 1,000; but this we were compelled to discourage, because we felt that the entire cost should in propriety be disbursed by the Government, and because we could not but conclude, judging from the objections which you were so ready to raise, that there was little hope of our receiving a more favorable consideration at the hands of your provincial superiors.

We have &c.,

Shanghai, February 27th, 1875.

TAOTAI TO MESSRS. SEWARD AND MEDHURST.

Shanghai, March 1st, 1875.

GENTLEMEN,—I beg to acknowledge the receipt of your joint dispatch of February 27th, putting on record the substance of the conversation that took place at our recent interview regarding the Woosung Bar. Directly after that interview, I reported the facts to H.E. Li, the Superintendent of Foreign Trade, and I have now had the honor to receive a reply from him in which he says that the reason why no steps have hitherto been taken towards dredging the Woosung Bar, notwithstanding the repeated proposals that have been made, is that the undertaking presents numerous obstacles. But the sum of Taels 1,000 which the Consuls now ask for to assist in defraying the expense of employing Dutch [Engineers] to make a survey, may be given as a matter of favour.

I accordingly beg to hand you the Taels 1,000 for this purpose. Please acknowledge receipt and accept the assurance.

&c., &c., &c.

Translated by
G. JAMIESON.

MESSRS. MEDHURST AND SEWARD TO THE TAOTAI.

Shanghai, March 3rd, 1875.

We have to acknowledge the receipt of your letter of the 1st instant, inclosing an order for Taels 1,000 to be applied towards the expense of a survey of the Bar by certain Dutch Engineers, &c.

We will communicate in this matter with our Colleagues and the Chamber of Commerce, and thereafter advise you further.

We take this occasion to repeat our declaration that the whole expense of the survey should be borne by the territorial authorities, and that we do not feel satisfied with an appropriation of only one half of the required sum.

We have, &c.

MINUTES OF COUNCIL MEETING ON 12TH APRIL, 1875.

Present:—Messrs. J. G. Purdon (chairman), A. G. Wood, G. J. W. Cowie, F. E. Heyden, W. Kidner, F. W. Lemarchand, R. Mackenzie, S. D. Webb, and the Secretary.

The Summons calling the meeting was taken as read.

The minutes of the last meeting were read, confirmed and signed.

Shanghai Volunteer Corps.—Read letter from Major Hart, handing Lieut. Mylne's resignation and requesting [illegible] hold an Election for the purpose of filling up the vacancy.

It was moved, seconded and resolved—

That the resignation of Lieut. Mylne, No. 3 Company, S. V. C., be accepted with much regret, and that the thanks of the Community be conveyed to him for his past services.

The Secretary was directed to request Major Hart to take the usual steps for the election of a [illegible] fill the vacancy.

The Cash State for the 10th April, was handed round for inspection.

Shanghai General Hospital.—It was decided to place an appropriation of Tls. 1,500 for this Institution in the Budget, for the nine months ending 31st December, 1875.

Dues on Merchandize.—Firms refusing to pay re-export dues on goods imported by Chinese in the China Merchants' S. N. Company's steamers, and landed within the limits of the Settlement, on the ground that the import dues on such goods had been paid under the Taotai's commutation.

Decided to address the Consular Body as to whether the China Merchants' S. N. Co. should not be placed on the same footing, regarding liability for Municipal Dues, as the other Steamer Companies, and requesting that the Taotai be urged to increase the amount of [illegible]

Land Tax—re W. H. Fogg.—In view of the hope expressed in Mr. Seward's Judgment, "that the Council will find it convenient to compromise with the defendant upon some equitable basis, as many preceding Councils have done, or to bring the question before the Ratepayers for instructions,"—it was determined that further steps for the recovery of the amount for which judgment was given in the United States Consular Court, in favor of the Municipality, be postponed pending reference to the Ratepayers at the forthcoming meeting.

New Road—Keangsi to Honan Road.—Draft Bond to be executed by Mr. E. M. Smith and the Real Property Association, drawn up by the Council's Legal Adviser, was read and approved.

Lowering Hongkew Creek Bridge.—Read letter from U. S. Vice-Consul-General, covering copy of dispatch from H. E. the Taotai, agreeing to the bridge being lowered two feet.

A member, who asked for plans and specifications, was informed that it was proposed simply to lower the whole of the bridge.

The Secretary was directed to write to Mr. Seward, U. S. Consul-General, thanking him for the trouble he had taken in the matter.

Wheelbarrows.—Decided not to recommend any reduction in the number of licensed wheelbarrows, nor to increase the fee of 200 *cash* per month each, so long as the barrow traffic can be kept under [illegible]

Date of Ratepayers' Meeting.—Decided to suggest to the Foreign Treaty Consuls Tuesday, the 11th May, for the annual general meeting of Ratepayers.

Alteration of Municipal Year.—Resolved to request the Foreign Treaty Consuls to convene a special meeting of Ratepayers to be held immediately after the annual general meeting, to consider and decide on certain alterations being made in the Land Regulations, so as to make the Municipal year co-terminal with the calendar year, and for any other business, of which notice may be given 10 days prior to the meeting.

Shanghai General Hospital.—An invitation from the Chairman of the Trustees of the General Hospital, to the Chairman of the Council to become ex-officio a member of their Board, was accepted.

Reports from Heads of Departments were read and considered.

The Minutes of the last Meeting were approved and passed for publication.

AMUSEMENTS.

S. Y. C. REGATTA.

Judge.....Captain BULLER, R.N.
Starter .....ZEPH. BARTON, Esq.

The CHALLENGE CUP. Subscribed by the Shanghai Community. Value say Tls. 250. [illegible] of any one Race, and when the winner is finally won, second Yacht in contest to receive the $50 Cup. Entrance fee $10.—To be sailed over a course from Moorings off the Recreation Ground, round a stake boat at upper end of Seven mile Reach, and back to Police hulk. To be won at two consecutive Spring Regattas by a yacht, the *bonâ fide* property of the same owner; open to all yachts of the Shanghai Yacht Club. One China sail. Time allowance one minute per foot.—To be sailed under the laws of the Shanghai Yacht Club.

The above were the terms; and the entries for this, the first and principal race of the season, comprised the

		Ft.	in.
Nimrod	G. B. Hill	40	11
Lillie	J. Wilson	38	03½
Phantom	G. P. Chalhen	34	04
Wave	[illegible]		
Charm	C. J. Ashley	35	00

The appointed time for the start was 12 o'clock, and with unerring punctuality the gun fired at that time. All got off on the starboard tack, according to order, the wind being due south, blowing fresh, and the tide just turning flood. The positions drawn, were *Wave* 1, *Nimrod* 2, *Charm* 3, *Phantom* 4, and *Lillie* 5. Position 1 signifies nearest to the Recreation Ground. The *Charm*, after letting go her buoy, fouled that of the *Nimrod*, and a few minutes were lost in getting clear of it. *Nimrod*, *Wave*, *Phantom* and *Lillie* tacked simultaneously off Pootung Point. The *Charm* about this time just cleared from her difficulties. Short tacks were now made by all, hugging the Pootung shore to secure the benefit of the flood, which [illegible] making strong.

The four leading yachts being in such close proximity, it proved difficult to comply with the technical rules laid down for traverse sailing, and in endeavouring to carry out the law as laid down in the book of rules, the *Lillie* and *Nimrod* fouled slightly, opposite to the P. & O. Godowns. In beating through the junks, the respective positions were—*Nimrod*, *Wave*, *Phantom*, *Lillie* and *Charm*, the two former gradually going to the front, the *Lillie* and *Phantom* together, and the *Charm* bringing up the rear. Tunkadoo Dock was passed about 0.40 p.m. without any change in places, but on nearing the Arsenal, the *Charm* took third place, while the *Nimrod* went still further to the front. At Loong-wha, the [illegible] ahead, their followers being an [illegible] mile. On entering the seven mile reach, the *Wave* sprung her mast, and consequently showed signs of distress, first by taking in

a single reef, and shortly afterwards a double reef, and finally by the mast going by the board.

This mishap placed the *Wave* out of the race, and left the *Nimrod* a winner, bar accidents. The *Phantom* took second place, and the *Charm* last. The upper Stakeboat was rounded thus—

	h.	m.
Nimrod	2	49
Phantom	2	58
Lillie	3	02
Charm	3	03

The flood tide still running strong, the shore was closely hugged, and but little doubt existed as to the result; but however, as will be seen by the finish, the *Nimrod* won, and the time allowance barely saved. The winning post was passed thus—

	h.	m.	s.
Nimrod	5	03	28
Phantom	5	11	02
Lillie	5	18	05
Charm	5	21	36

The P. & O. tender *Dragon* attended the race, and a steam-launch from H. M. S. *Modeste* also. The latter rendered valuable assistance to the *Wave*, whilst under difficulties.

Never was there a more exciting race in Shanghai waters, and never was there such good competition. This being the first time the *Nimrod* has come to the front in the Challenge Cup, it still remains an open question as to who will be the final winner.

Our aquatic friends promise us more sport to-morrow, when we are credibly informed that the same field will put in an appearance to compete for a Corinthian cup.

MIH-HO-LOONG CHALLENGE CUP COMPETITION.

The shooting for the Mih-ho-loong Challenge Cup, value £50, took place yesterday morning, at the usual range, when, out of a total strength of about 60 members, only [illegible] turned out. The cause of such paucity of numbers is said to be the multiplicity of other sports prevailing in the Settlement, —cricket, pony racing, yachting, and boat racing, to say nothing of racquets—all of which have a tendency to lead away from that amount of practice with the rifle which is essential to success in target competition; and hence so few are found ready to join in the prize-shooting of the Volunteer Corps generally. We throw out the hint for what it is worth, at the same time expressing a hope that the forthcoming recruits' competition will ultimately result in a more numerous attendance at the range on prize-days.

The morning yesterday broke calm and clear, and at 6.30, the time the squad mustered, was in every respect suitable for the work to be done. The ranges were 200, [illegible] yards—five shots at each; but before the second and third stages could be got through, a slight haze obscured the target to some extent, and seemed to promise that the long range would be one of more than usual difficulty; but, fortunately, the mist cleared away just in time, and the final stage was shot in almost as clear weather as the first.

It will be seen from the appended scores that Serjeant Dunman was the winner, the Cup becoming his property, he having now won it twice in succession, the winner on the first occasion having been Private Glass. Five of the competitors received five points each from Sergeant Dunman and Privates Glass and Wyatt; and by a coincidence the [illegible] which, however, both the handicapped men made duck's eggs. Lieutenant R. Mackenzie was officer in charge, and although without previous practice, he consented to shoot, in consequence of the smallness of the squad. The following were the scores:—

	200 yds.	400 yds.	600 yds.	800 yds.	Total.	Handi-caps.	G. Total.

Hawtey	0

We are again requested to mention the fact that the cartridges served out were of very deteriorated quality, rendering the shooting uncertain, and of course unsatisfactory. It is said they have been in store for three years, and it is suggested that, in this climate, a longer storage than one year has a tendency to cause the powder to cake and thus lessen its explosive power.

HANKOW RACES.

First Day, 7th April, 1875.

Dull weather and Course holding, with rain on and off all day.

1.—Spa Pao Cup.

Mr. Monetary's *The Slug* 1
,, Braham's *Windmill* 2
,, Fitz-Arthur's *Surprise* 3

Won by four lengths, a length between second and third. Distance—Once round. Time 2m. 3½s.

2.—Hack Plate.

Mr. Haslam's *King Koffee* 1
,, Minor's *Bosh* 2
,, Cambist's *Catamaran* 3

Won hands down, rest nowhere. Distance—½ Mile. Time—1m. 3s.

3.—Maiden Stakes.

Mr. Monetary's *Rocket* 1
,, Mitchell's *Goloobchick* 2
,, Fitz-Arthur's *Eclipse* 3

Won by a length and a half, half a length between second and third. Distance—¾ mile. Time—1m. 39½s.

4.—Lottery Cup.

Mr. Monetary's *The Slug* 1
,, Mitchell's *Mongol* 2
,, Mitchell's *Cornet* 3

Won by two lengths, a length between second and third. Distance—1½ miles. Time—3m. 41s.

5.—Scurry Plate.

Mr. Thaw's *Monsieur* 1
,, Cherry's *Ting How Jigger* 2
,, Mitchell's *Goloobchick* 3

Won rather easily by half a length. Distance—¾ mile. Time—1m. 43s.

6.—Chaa Shan Cup.

Mr. Fitz-Arthur's *Eclipse* ... } Dead Heat.
,, Mitchell's *Mongol* ..... }
[illegible] 3

Mr. Monetary's *Scud* came in first, but a claim of a foul was lodged against his rider, and allowed. Division for the Dead Heat. Distance—Once round. Time—2m. 14s.

7.—Yang-tsze Cup.

Mr. Monetary's *Rocket* 1
,, Mitchell's *Cornet* 2
,, Basil's *Komar* 3

Won easily. Distance—1¼ miles. Time—3m. 10½s.

Second Day, 8th April, 1875.

Cloudy, course heavy, no rain.

1.—Flyaway Stakes.

Mr. Cherry's *Ting How Jigger* 1
,, Monetary's *Scud* 2
,, Cambist's *Gridiron* 3

Won by a length, same between second and third. Distance—½ mile. Time—1m. 5s.

2.—Taotai's Cup.

Mr. Basil's *Chervonetz* 1
,, Fitz-Arthur's *Echo* 2
,, Michell's *Mongal* 3

Won in a canter. *The Slug* fell shortly after starting, but fortunately the rider was not hurt. Distance—Once round. Time—2m. 9½s.

3.—Visitors' Cup.

Mr. Fitz-Arthur's *Eclipse* 1
,, Thaw's *Shiogoon* 2
,, Monetary's *Rocket* 3

Won easily by two lengths, half a length between second and third. Two Ponies (*Komar* and *Goloobchick*) fell at the same place as *The Slug* did in the previous race, luckily nobody hurt. This accident caused the ponies behind to pull out, thus losing all chance of winning the Race. Distance—1 mile. Time—2m. 18s.

4.—Hupeh Cup.

Mr. Monetary's *The Slug* 1
,, Fitz-Arthur's *Surprise* 2
,, Michell's *Cornet* 3

Won easily by 6 lengths. Distance—2 miles. Time—4m. 51s.

5.—Russian Cup.

Mr. Cherry's *Ting How Jigger* 1
,, Cambist's *Gridiron* 2
,, Thaw's *Shiogoon* 3

Won by ¾ of a length, a length and a half between second and third. Distance—¼ mile. Time—1m. 41½s.

6.—Consolation Stakes.

Mr. Basil's *Roosak* 1
,, Cambist's *Gridiron* 2
,, Braham's *Windmill* 3

Won by half a length, same between second and third. Distance—Once round. Time—2m. 4½s.

7.—Champion Sweepstakes.

Mr. Monetary's *The Slug* 1
,, Fitz-Arthur's *Eclipse* 2
,, Thaw's *Shiogoon* 3

Won by nearly a neck, 3 lengths between second and third. Distance—1 mile. Time—2m. 18s.

Correspondence.

THE CHANNEL OF THE YANGTSZE.

To the Editor of the

North-China Daily News.

Sir,—You have failed to notice the remarkable coincidences between Mr. Hart's memorandum, now so famous, on the mouth of Yangtsze, and two articles which appeared in the *North-China Herald* of the 6th February, 1873. It is however unfortunate that Mr. Hart, in so largely availing himself of the sources in question, should not only have failed to perceive their drift, but have been led into many and grave inaccuracies in speaking of the channels there described. Any claim which Mr. Hart may, therefore, set up for orginality in his description of the changes present and to come, may now be considered as disposed of; but he will find it difficult to account for the evident tendency displayed to limit the facts there presented to him to suit the prejudices of the Chinese Government.

The articles in question described the tendency of the Yangtsze to form a single channel, and spoke of the main stream setting out between Tsung-ming and Bush Island, and thence passing by Drinkwater point to the bar near Shaweishan. They mentioned particularly the closure of the old channel, marked in the charts as lying North of Tsung-ming—the particular channel which Mr. Hart would have people at a distance believe is now opening out, at such a distance from Shanghai as effectually to have sounded the death knell of the port. The articles spoke of the changes going forward at Beacon Spit, and of the causes which have led to the formation and growth of the Middle Ground and Woosung Bar. All these points have been taken up in Mr. Hart's memorandum, in a manner presenting so many coincidences that there can be little doubt whence the facts were derived. It is, however, unfortunate for Mr. Hart's case that, either through insufficient acquaintance with the localities, or with the object of making his remarks more pleasant to the Chinese, he should have permitted the inaccuracies noticed in your leader of this morning, to appear in a document pretending to be official.

The channel North of Tsung-ming exists now only in Mr. Hart's imagination; the channel South of that island, which Mr. Hart confounds with it, is described in one of the articles I have referred to, in the following terms:—

"A strong and deep current sets out between Bush Island and Tsung-ming, past Drinkwater point, towards Shaweishan, within a few miles of which it is obstructed by a bar with scarcely three fathoms of water at low tide. This bar makes the real mouth of the River."

It is unnecessary to point out how very different is this statement of the case from that put forward in Mr. Hart's memorandum.

Mr. Hart speaks of the *certainty* of the Beacon Flats closing up. The article in question remarked:

"Blockhouse Shoal and the Beacon Spit have encroached on one another, narrowing considerably the channel. A few years ago, the lead was a safe guide on entering; but, as at the Langshan crossing, the banks have assumed a steeper edge, so that greater care has to be exercised. The wash through the narrower channel has had the effect of partially deepening it, but in view of the decreasing area of the channel where the Red buoy is, it is more than doubtful how far this increase of depth can for the future be depended on." If the channel by the Red Buoy were to silt up, it was remarked that of course this would have the result of prolonging the channel of the Hwangpoo; but, is added, "It is not that any serious danger exists of the silting up of the river. The area drained by the Hwangpoo is too great to admit of this; but a continuance of the changes which have been in progress for some time back, might readily result in the closure of the small channel between the Red Buoy and Bush Island, while the growth of the shoals off Blockhouse Island prevents direct access to what is now the main channel of the Yangtsze." Every engineer knows that, at the mouth of a river like the Yangtsze, changes of the sort are constantly taking place. That changes will occur is inevitable, but this is no reason that they should be neglected. There is an old proverb that "a stitch in time saves nine," and in no respect is this truer than in guarding fluvial deposits. Except that no further appreciable decrease has taken place in the channel between the Red Buoy and Bush Island, the changes noted as going on in 1873 seem to have progressed much as anticipated. The worst danger to be dreaded for Shanghai was that a large detour would be necessary to enter from the Yangtsze. The river Hwangpoo and its tributaries drain about 9,000 square miles. There is, therefore, no fear that a sufficient amount of water will not be found to keep its channel open. What is to be feared is that neglect may lead it to seek other means of egress, or to extend its waters over a wide and shallow bed, instead of through a deep and comparatively narrow one. The articles in question, on which Mr. Hart has founded his memorandum, were the result of a good deal of personal observation, coupled with information derived from those who were in the habit of making use of the main channels. It is a pity that, in making use of these, Mr. Hart was not more careful to ascertain their exact drift.

Yours faithfully,
THOS. W. KINGSMILL.

Miscellaneous.

A SWIMMING BATH FOR SHANGHAI.

Anything that tends to add either to the prosperity or comfort and convenience of the foreign residents in a place like Shanghai, is worthy of notice; and a subject coming under [illegible] usefulness and comfort, has within the last few days been brought to our notice, consequent doubtless upon our publication of a paragraph describing the introduction of large public swimming baths on the Thames at London. The provision of such places within easy reach of the masses of the population is felt, for sanitary reasons, to be a desideratum at home; and though the same reason does not exist here—every foreigner having bath appliances in his own house, the want of a swimming bath for purposes of recreation has been constantly urged, and more than one scheme for creating one has been mooted. They have however all fallen through, and it has been reserved for individual enterprise to carry out the project.

For the past year and a half Mr. Silverthorne has been occupied with the excavation of a large swimming bath, just at the bend in the river at the present termination of the Yangtsze-poo road, and the water has now been let into it. Its dimensions are 266 feet in length by 99 feet in width; with a graduated depth, from about 3½ft. to 12ft. Soon after the excavation was begun, hard blue clay, much like the famous London clay in colour and texture, was found quite unexpectedly, and thus the bath is naturally almost impervious to percolation either from the inside or outside. Its waters will be constantly fresh, the mode of supply being through what is termed a settling-pond, an excavation of 90 feet by 50, into which the water runs direct from the river at high tide, and where it is allowed to remain for a time sufficient to settle and become clear. It is then conducted by means of iron pipes into the bath proper, the surplus water in which is discharged at the same time from the lower end into the river again. Thus constant purity is obtained, and the water now in the bath is so clear that in the shallower parts the bottom can be seen. The bath is hardly ready for use yet, but is rapidly approaching completion. It is surrounded by a closely-planted hedge of willows, now just bursting into leaf, and, outside these, evergreens have been set, and beyond these again flowering shrubs and plants are to come. The soil excavated has also been utilized to fill up the intervening space between the bath-hedges and the road, along the margin of which more willows are growing, which will prevent overlooking from the road or elsewhere, and render the whole place a quiet retreat. The space between the bath and the road is being sown with grass-seed, and will as soon as possible be converted into a croquet and lawn-billiards ground. Space is also reserved for a smaller bath for ladies, distinct from the larger one in every particular, and enclosed by a triple hedge of the same kind as above described. Bathing boxes are to be erected, facing the river, and each one will be separate; in fact the greatest care has been taken to ensure complete privacy. For the further accommodation of visitors, a convenient chalêt has been built, including tiffin-rooms, bar, and billiard-rooms, ladies' and children's room, &c., and altogether the place seems likely to become one of passing excellence of its kind. Not one of its least recommendations is the unobtrusive manner in which the work has been projected and so nearly carried to completion. It is not at all times either pleasant or safe to bathe openly in river or creek, and therefore, if for no other reason, Mr. Silverthorne's undertaking is to be the more welcomed.

NEWCHWANG TO PEKING OVERLAND.

As I am unacquainted with the inns of the South, I know not whether our Northern inns would compare favourably with them. On account of the enormous [illegible] to the north of Newchwang, large inns occur every few [illegible], separated by much greater distances on the way to Peking, but their construction is the same in Manchuria and Chihli.

Every house in the country has its own compound wall, composed of a mixture of straw and mud, and from four to seven feet high. The inn compound is ordinarily larger than that of the largest private house, and is easily recognised, for it throws open its large gate at dawn, closing it only with night. This mud wall is greatly reduced by our heavy summer rain, and requires periodical patching to prevent its being washed away. Inside the wall is a compound of some roods in extent.

Towards evening, carts are ranged in this compound in long rows from side to side, the first arrived taking [illegible] most convenient for the early morning start. The horses, mules and donkeys are also ranged in similar rows, each team having its own trough. There is not the slightest attempt to shield these animals from even the bitterest cold. The clear, bright, blue sky is overhead and the bare flinty earth underneath them. They are fed on the chopped straw of the "small" millet, over which water and bran are poured. Their desert consists of a liberal allowance of the common millet, which very much resembles barley in taste. The Chinese driver feeds his animals well, and is rarely guilty of cruelty.

The inn proper is a long line, or two parallel lines of houses, running East and West and facing South. The walls are made of brick, the outer half burnt, the inner sun-dried. They are fully 10ft. high, and, except in the cities, have flat roofs, the centre of the roof being one foot higher than the eaves. The beams support rafters; these, millet stalks; and millet stalks, mud, which has to be renewed every spring and autumn. In the centre of the long building is a door leading into the culinary department, and opposite, another opening to the North. To the East and West of this kitchen is built the "kang," running alongside of each wall to each end of the building. In the better inns, one half is divided into compartments, each with its own door and bar, and its own fire-place, and capable of accommodating four people. The other half, and in the smaller inns the whole, is completely open, and here carters lie huddled together.

The kang is 6ft. wide, by 2½ft. high. It is built with a facing of brick, five or six flues, or channels for smoke running along the whole length, communicating with the large hole, which forms the fire-place, and with the chimney at the other

end of the kang. Across these flues is laid a row of burnt brick, air-tight, to prevent the smoke escaping. Over this row of bricks is placed a straw-mat; above the straw mat, the usual small table one foot high. Chairs and tables exist, but are rarely used, the kang being sitting room, dining room and bedroom. The traveller throws his rug over the mat, his body over that, another rug over all, and sleeps most soundly, after a day's journey in the open air, beginning at 2 a.m. The fire is always of the never failing millet stalk, thrust into the fire-place; the smoke of this fire is retained in the large flues and the kang is soon heated. Thermometer, about zero, speedily reconciles one to the heat.

We daily fell in with droves of black swine, from fifty to a thousand in a drove. [illegible] travelled towards the capital at the rate of thirty *li* per day. The driver leaves the "Bien-wai" with a lot of pigs, small and lean, and no cash in his pocket. There are inns in nearly all the villages for the special accommodation of these slow travellers, where they are so sumptuously fed that they grow to a great size, and make as much fat as they can carry. When the driver wants money, he sells a pig, so that [illegible] easy to understand how it is that pork, like millet, becomes dearer as we approach the capital.

We saw great numbers of labourers from Chihli and the provinces to the South and South-west, who had finished their spring and autumn service in the Chinese settlements in Eastern Mongolia and Northern Manchuria, the region which supplies the droves we have just mentioned. They carried their wages (or, I should say, their wages carried them) in the form of small mules and donkeys. When hard up, these men followed the example of the swine-herd—live animals of all kinds being cheap in "Bien-wai," and growing in value the further they go.

When returning, the rivers were frozen over. What seemed to me a remarkable [illegible] over every stream (and their name is legion) there was a bridge made for use in winter, to accommodate the considerable traffic passing through the Fakua-mun to the West. These bridges were composed of millet stalks, thrown across beams of wood resting on posts from one to three feet high. The bridge was constructed at a trifling cost by a few of the neighbours, who demanded exorbitant rates from all carts. Carts from the same districts generally travel together, as well for companionship as mutual protection. On coming up to a bridge, the man who leads has to haggle for reasonable terms for his company. That party gone, the next leader follows suit, and thus a great deal of time is wasted. Mandarins alone take the right of the strongest; the ordinary carter, though followed by a hundred carts and opposed to a single bridge-keeper, never attempts to force his way. Many carts hoist the yellow flag of the Imperial household, as if carrying goods for the Emperor, in order to get rid of these vexatious pontages. Whether or not the device was at first successful, it does not now deceive. At one place, North of Jinchow, my cart came up late in the afternoon to a bridge, on the other side of which was a double row of carts, as far as my eye could see. One of them was on the bridge. Two hours was the shortest time in which it was said they could all cross. They were at the mercy of the bridge-man. It was impossible my cart could cross unless I descended, compelled the man on the bridge to let that first cart pass, and stand before the next to prevent his moving. This I had to do once, but I was loth to use the power which, as a foreigner, I had in my hands. In answer to a query, the toll-man eagerly cried out there was no possibility of crossing the ice above or below the bridge. Going forward to examine for myself, I found a small artificial bank of earth and millet stalks made at each side of the stream, which was almost level with the plain. The earth had been saturated with water in order to freeze and render it impossible for laden carts to cross. The object was evident, for thus the bridge was the only thoroughfare. In spite of the expostulations of the toll-man, I urged my driver to cross this embankment, and he did, as the cart was light. This bridge business is one of the cleverest devices for extorting money I have seen.

As soon as streams and pools are frozen over, hundreds of natives dig open a small well, 2 to 5 feet deep. These wells occur, sometimes a solitary one, sometimes many together, every 3, 6, to 10 *li*. Beside these wells are watertight troughs made of wicker work, out of which the thirsty draught animals drink as often as 6 times a day, for though our thermometer shows great cold, our atmosphere is so dry that draught animals are always hot. The charge at those wells is one cash per head. To the carter the well is extremely useful, while to the well-keeper, it seems more profitable than the ridiculously small charge would lead one to infer.

Small farmers are frequently met with who come to the road-side with bundles of their own straw or bags of their own grain, which they sell to the carter at a somewhat less figure than is charged at the inn. When the weather becomes very cold, they throw up a shield of millet stalks to protect them from the North and North-east winds. Sometimes they make three sides to their "shed," and in the more advanced stage, four sides and a roof with a mud coating. Occasionally, this substitute for the emigrant "shanty" is made the home of the petty trader.

Thousands of natives find a winter's occupation in following the carts, and the eagerness with which they strive with and jostle each other for the precious manure is amusing. The lean, hungry dogs attempt [illegible] the crow, he is nowhere to be seen, knowing well he has no chance.

As to the robber system—it is a scarcely legitimate inference that they are in possession of the country. They infest only the barren and sparsely populated districts, not daring to approach the cities and well populated road-side, except when they spring upon a village to hold it at ransom. The system is certainly chronic. The soldier has no pleasure in facing his more brave brother plunderer, and it is only after some great outrages at the beginning of the autumn and winter campaign, that an earnest attack is made, and from the small number of killed and wounded, compared with the numbers supposed to be ho'ly fighting, we infer that no attack is ever very serious. It is supposed that soldiers have good reasons for acting prudentially—the people believe it is "thief catch thief," and the catching in such a case depends on circumstances. I know not if there be any good grounds for supposing the small Mandarins capable of winking at a good deal of disorder, "for a con-si-der-a-tion." The father of the Mahommedan butcher who met me at Tien-jwang-tai, when starting for Peking, was sometime ago apprehended on the charge of complicity with the robbers. Several robbers were taken and decapitated at the time, but no charge was found proven against the aged prisoner. He would be set free on payment of Tls. 140. He offered Tls. 20 less; but less would not suffice, and for lack of the money he lay in prison. During his imprisonment, he has had 2,800 blows of the bamboo. To-day there were four robbers beheaded, three of the same surname as the prisoner. He heard of it, and some time after was found dead, fear having killed him. This was as respectable a man as was in Tien-jwang-tai. How much prizes of this sort help to keep the robber gangs from extinction cannot of course be ascertained. I believe a few military posts, well selected, would put an end to the nuisance. Shortly after my return from Peking, the route over which I had travelled was cleared, and the way to Moukden has been free all winter.

Some few days ago 800 soldiers were despatched to Fung-whang-chung, on the Corean border, to relieve that town, which was said to be besieged by several hundred robbers from the East and North-east—the "Bien-wai," neither Chinese nor Corean territory, though the robbers are all Chinese, and, as usual, principally Mahommedans.

I have heard it several times stated among the natives that if a man once casts in his lot with these robbers, he is entangled for life. They are sworn to defend each other, and they take care to revenge an attack upon one of their number—hence the natives are not eager to accuse or injure a robber. On the same principle of self-defence, a deserter is regarded as an enemy. Such desertion is supposed sure to lead to the divulging of names of some of his old associates; and like despotism of all kinds—whether monarchical, oligarchical, or anarchical, this robber fraternity thinks a quiet stab in the dark is the surest secrecy. Hence a reformed robber is never met.

There are believed to be many robbers in this town. But Manchurian robbers imitate the fox, so largely worshipped here, and never steal from the roosts of their neighbours. These go to a distance, while strangers come here.

Russia has not left her Baltic home to improve the barren solitudes of Siberia, nor does she regard the mouth of the Amoor as the finest port in the North of China. If she could raise this robber system into a petty rebellion, it would by-and-bye give an excellent opportunity for interference in the affairs of a province which could not manage its own business. A few thousand men sent across the Amoor would serve her purpose; and she could without very great difficulty gain an extensive kingdom, wealthy in all mineral resources, and a teeming population ready to work them. Her railways are not yet completed, but the future will develop greater improbabilities.

I am &c.,

John Ross.

Newchwang, 25th March.

THE CRAWL OF THE SILK WORM.

Under the above heading we gave, in 1868, in tabular form, the stocks, imports deliveries and prices of Silk, for the previous 27 years, as set forth in the tables of Messrs. Frederick Huth & Co. We now continue the tables to the close of 1874, availing ourselves of a circular of Messrs. Durant & Co.

FOREIGN *versus* CHINESE STEAMERS.

The following is a translation of a letter published a few days ago in the *Shunpao*, regarding the status of foreign and native steamers.

"I read with much interest your two able and straightforward articles on the transport of Government grain, and the China Merchants' Steam Navigation Company.

A native, myself, of the Central Provinces, I have resided many years as merchant in Shanghai. Having in this capacity been a large shipper to the Yangtze and Northern ports, I have acquired some insight into the position of the carrying trade, and venture to lay before you a few facts which will probably prove of interest to your readers.

The quantity of Rice to be shipped this year to the North by our Government is 1,270,000 "Shih"—equal to about 1,800,000 piculs; of this 448,000 "Shih"—*i.e.* about 627,000 piculs are to be conveyed by the China Merchants', the balance having to go forward, as heretofore, by junks *viâ* the Grand Canal or by sea route. Before reading the two articles in question, I had already heard it stated amongst my friends that the Foreign Companies had made a tender to the Tsung-li Yamên for the conveyance of Government Rice, but the terms were mentioned in a general way only as one-half of the present rate allowed to the China Merchants'; which varies materially from the statement put forward by your journal. At the same time, our Government would still be able to save about Tls. 100,000 per annum if the proposal were accepted—a matter of no small consideration.

As far as my memory tells me, this is not the first occasion of Foreigners directing their attention to the profits obtainable on the Rice transport; for I remember that in former years a certain firm offered, I think it was at 2 mace per picul, to convey the grain by steamer. The reasons then advanced by the Government for preferring to pay a higher price to the junks, was that a large population was engaged in this branch of trade, and that, if transferred to Foreigners, those depending on it for a livelihood would be reduced to destitution. But the Government, in at present entrusting the transit to to the China Merchants', is deserting the interests of junk-owners without deriving any pecuniary advantage—a policy which would certainly appear irreconcilable with principles of justice.

The arguments advanced by the China Merchants' are that the Government, in entrusting them with the grain transport, desires to throw in their way the means of making a handsome profit; in order that, in their trade along the coast and up the rivers, they may be able to cut under Foreign vessels in cheapness of freights, and thus compel them to transfer their field of operation to other waters. But being myself a merchant, and consequently interested in the future of the carrying trade, I would beg to put forward a few plain-spoken remarks, which will be found to be not without significance.

Cheap freights and attention to the convenience and interests of the shipper are the two great desiderata looked for by the trader. Now, the China Merchants' Co., it will be found, is entirely under the charge of Cantonese—no other Province man being in the management. And, although there are many able and honorable men amongst them, as my acquaintance with them proves, it is to be feared that they are not very experienced in the conduct of foreign steamer shipping trade; otherwise, whence the necessity for employing foreign captains, mates and engineers? On the other hand, Foreigners have all their years been engaged in the business, and cannot but be thoroughly skilled in its various branches. Let us take, for instance, the foreign Steam Navigation Companies of Shanghai. Their vessels are all of superior build and strongly equipped, their wharves and godowns are roomy and convenient, and in their rivalry with each other, speed of vessel and facility to the shipper form their great aim. In the trans-shipment of cargo and advances made on shipments, the interests of the merchants are all abundantly attended to, and it may said in fine that in no country in the world are greater facilities held out to the shipper than in China. Therefore, when the Cantonese appeal to us to ship all our cargo by their steamers, I reply and ask why should we, the merchants of other provinces, do this?

That all the Steam Companies should vie with each other is undoubtedly to the interest of merchants. Supposing, now, that the China Merchants', depending on their rice conveyance profits, were really able to run off Foreign vessels? I would then ask, what would be the result to us, merchants of the Central Provinces? We should see but one Steam Navigation Company in the country, the China Merchants' managed by Cantonese and controlled by the mandarins; and, while freights would be raised to a high level, there would be no guarantee that the interest of the shipper would any longer be attended to. In fact, the entire position of things would probably be reversed, and the owners of the goods have to solicit the Steamer Company as a favor, to convey their cargo. For this is but what the monopoly by one Company points to.

But this is not all. If the officials felt inclined to increase duties, the road to do so would be simplified, and they might even go further and heavily tax the Company. The end would then be heavy duties and high freights to the merchants—a burdensome tax and decrease in the shipping trade to the Company. The latter might find it difficult to make both ends meet; and inefficiency in the equipment of their boats would naturally follow, and conveyance by vessel would be fraught with danger. When matters had arrived at this stage, where then, I would ask, would be the merchants' interests?

The trade between the open ports has hitherto owed its steady development to the advantages held out by foreign vessels and to the adherence to a fixed tariff of duties. By now abandoning foreign vessels, should we Chinese merchants be paying regard to our own welfare?

While referring to your two articles, the above remarks have at the same time been elicited by a statement which appeared in the *Wui-pau*, stimulating Chinese merchants to ship all their cargo by the China Merchants' steamers. My ideas are perhaps crude, but they may yet be considered worthy of being placed before your readers; and I hope you will give them publicity.

AN EXPERIENCED MERCHANT.

THE OUTRAGE IN YUNNAN.

(Rangoon Gazette.)

It is not to be supposed that the King of Burma should be suspected of complicity in the check which Colonel Browne's Embassy has received, and in the murder of Mr. Margary. While we are perfectly willing to wait, before giving our verdict, for the fuller information, which, we trust, will not be long in coming, we cannot but feel it right to place before our readers those considerations which induce all who know Mandalay and its King to believe in the *mala fides* of that monarch.

It is well-known that Major Sladen's expedition, though outwardly patronized by the King of Burma, was secretly and effectually opposed by him, and that whatever success it attained, was achieved by the skill and conduct of its leader, in spite of the strenuous opposition of the Burmese Government. It is now also well-known, that a full account of all this was printed in Major Sladen's first report, which was suppressed by order of the Government of India. When the Secretary to the Chief Commissioner visited Bhamo in 1870, a Saubwah or Chieftain made his appearance on board the steamer, and openly boasted, as he had often done before, that he had received the royal orders not to allow Sladen's party to return, and that he had disobeyed those orders. That same Saubwah is now in Mandalay, petted for the present, and silenced by the King.

It is well-known that the most hateful English name that can be mentioned to the King is that of Sladen, who had the audacity to return in safety against the royal wishes.

It is fair to ask those who would be the apologists of his Burmese Majesty, why it was that the King positively and persistently refused his consent to Colonel Browne's party proceeding from Mandalay along the Thainee Route? Why did he shut the party up to the one route through which his own embassy was to pass in advance of them? Why did not that embassy take another route, or go with or after the English party? Why was the King so sulky and displeased when he heard of Mr. Margary's success?

It will greatly confirm our suspicions if we find that between Margary's first visit to Manwyne, where he was so well received, and his second when he was treacherously murdered, the Burmese embassy had passed through that town. Public opinion in Europe and India will demand a rigid investigation into this matter, and England surely is strong enough to punish the wrongdoer, whether he be a wild robber chief or the so-called Golden-footed Lord of the White Elephant. His Majesty, if innocent, will of before the world. And though we cannot but distrust him now,—none more than ourselves would rejoice to find our suspicions groundless.

Law Reports.

H. B. M. SUPREME COURT.

Shanghai, April 13th.

Before Sir Edmund Hornby, *Chief Judge.*

Henry Everall, William H. Short, *and* Henry Dyer *(trading together as* Hall and Holtz,*)* *v.* John West.

Application for an Injunction.

Mr. Wainewright for the plaintiffs.
Mr. Hannen for the defendant.

Petition.

1.—The plaintiffs are Ship Chandlers and General Storekeepers, carrying on business in partnership at Shanghai, and the defendant is a Tailor, carrying on business at Shanghai.

2.—By an Agreement, dated the 27th of November 1871, made between Henry Knight, since deceased, and other part, the defendant, for himself, his executors and Administrators, agreed with the said Henry Knight and the plaintiffs, and the survivors or survivor of them, amongst other things that he, the defendant, would, during the space of three years, to commence from the day he should arrive in Shanghai, serve as Foreman, Cutter and Manager of the Tailoring and Outfitting Department of the business of them, the said Henry Knight and the plaintiffs, and would not at any time thereafter correspond with any person or persons corresponding with the said Henry Knight and the plaintiffs, nor use or have any traffic or dealing in the way of the said Henry Knight and the plaintiffs, either for himself or for any other person or persons other than the said Henry Knight and the plaintiffs, or some or one of them, first had and obtained for that purpose; and that he, the defendant, would not at any time thereafter enter into the service of any other person or persons, nor set up in business for himself at Shanghai, without the written consent of the said Henry Knight and the plaintiffs, or the survivors or survivor of them. In consideration of all which said services to be done, observed and performed by the defendant, they, the said Henry Knight and the plaintiffs, did promise and agree to and with the defendant, his executors and administrators, that they, the said Henry Knight and the plaintiffs, would at their own costs and charges find and provide a passage for the defendant to Shanghai; and also would pay unto him the sum of £300 by way of salary for the first year of the said term of 3 years, and the sum of £350 by way of salary for the 2nd year of the afore said term and the like sum of £350 by way of salary for the third and last year of the aforesaid term; and would during all the said term find and provide for the defendant sufficient board, meat, drink and lodging, and by the said agreement it was also provided that, if the defendant should continue in the service of the said Henry Knight and the plaintiffs, or the survivors or survivor of them, until the expiration of the said term of 3 years, they, the said Henry Knight and the plaintiffs, or the [illegible] expense (provided the defendant should, immediately after the expiration of his service require it, but not otherwise) find and provide for him a passage home to England, as from the said Agreement, when produced to the Court, will more fully appear.

3.—In pursuance of the said Agreement, the said Henry Knight and the plaintiffs paid the defendant's passage to Shanghai, where he arrived on or about the 20th of January 1872, and he thereupon entered into the service of the said Henry Knight and the plaintiffs as Foreman, Cutter and Manager of the Tailoring and Outfitting Department of their said business, and continued in such service for the full term of three years, and was provided with board, meat, drink and lodging, and was paid his salary according to the terms of the said Agreement.

4.—The said Henry Knight died on or about the 6th of July, 1872, and since his death the said business referred to in the said Agreement, has been carried on by the plaintiffs alone

5.—In the month of September, 1874, the plaintiffs gave the defendant notice that they should not require his services after the expiration of the said term of three years, and that at the expiration of the said term they should be prepared to secure for him a passage to Europe.

6.—The defendant never applied to the plaintiffs to provide him with a passage to Europe, although the plaintiffs have always been ready and willing to provide him with one, but he left the plaintiffs' premises on the 3rd of January, 1875, and shortly afterwards he entered into the service of or into partnership with Messrs. Silverthorne and Co., who are carrying on the business of Tailors and Outfitters in Shanghai. The exact nature of the arrangements between the defendant and the said Messrs. Silverthorne and Co. is unknown to the plaintiffs, but the defendant is advertised as manager of the said business.

7.—In the month of February last, the plaintiffs caused to be written and sent to the defendant a letter drawing his attention to the fact that he had by the said agreement, hereinbefore set forth, bound himself not to enter into the service of any other person or persons, and not to set up in business for himself at Shanghai, without the written consent of the plaintiffs, and giving him notice that, unless he withdrew from all connection with the said Messrs. Silverthorne and Co., they, the plaintiffs, should take legal proceedings against him. To this letter the defendant has given no reply, and he still continues in, or in the employ of, the said firm of Silverthorne and Co.

8.—The acts and conduct of the defendant set forth in the 6th and 7th paragraphs of this petition are calculated and likely to inflict substantial damage and injury upon the plaintiffs.

1.—That an Injunction may issue to restrain the defendant from continuing to carry on business in Shanghai in connection with the said firm of Silverthorne & Co., either as a partner or as a shop or salesman, traveller, clerk, manager, cutter, assistant, or in any other capacity; and also to restrain him from exercising or carrying on in Shanghai the trade or business of Draper, Tailor or Outfitter, or either or any of them, or any other trade or business carried on or to be carried on by the plaintiffs or other, the partner or partners for the time being of the said firm of Hall and Holtz, in Shanghai, or from engaging with any person or persons, firm or Company, carrying on the said trades or businesses, or any of them, at Shanghai, as shop, or salesman, traveller, clerk, manager, cutter, assistant, or in any other capacity whatsoever.

2.—That the plaintiffs may have such further or other relief as the nature of the case may require.

The Answer.

Of the above-named John West, the defendant to the petition of the above-named plaintiffs, shows as follows:

1.—The defendant admits the allegations contained in the 1st, 2nd, 3rd, 4th, 5th, and 7th paragraphs of the petition.

2.—As to the allegations contained in the 6th paragraph of the said petition, he admits that he has entered the service of Messrs Silverthorne and Co., but denies that he is a partner in the said firm.

3.—As to the 8th paragraph of the said petition, the defendant denies that his acts and conduct are calculated or likely to inflict substantial or any damage and injury upon the plaintiffs.

4.—And the defendant further says that the plaintiffs, on or about the 10th day of September last, in writing [illegible] upon his accepting another situation in Shanghai, and consented to his so doing.

5.—Moreover, the defendant contends that the agreement set out in the 2nd paragraph of the said petition is unreasonable, and such as a Court of Equity will not enforce.

6.—And the defendant further says that the plaintiffs led him to believe that they would consent to his entering into the service of any person or persons carrying on business in Shanghai, and thereby induced the defendant to forego his right to a passage home upon the expiry of his agreement; and by false reports as to the ability and sobriety of the defendant, endeavoured to prevent, and for a time did prevent, his obtaining employment, and are now, that he has succeeded in finding such employment, endeavouring inequitably and contrary to the representations formerly made to him, by which he was induced to forego his right to a passage home, to prevent his continuing in such employment; and also endeavouring, after having induced him to give up the means of leaving this place, by false reports and by the present inequitable proceedings, to prevent his obtaining his livelihood in Shanghai, by himself, or in the service of any person in any capacity whatsoever

And the defendant therefore prays that the petition of the plaintiffs may be dismissed with costs.

Mr. Wainewright, in opening, said this was an application, on behalf of Messrs. Hall and Holtz, to restrain the defendant from carrying on business in Shanghai, either on his own account or as an employé of any other person. The case rested upon an agreement which the defendant entered into with the plaintiffs and a late partner of theirs, by which he bound himself to serve for three years, and at any time thereafter not to correspond with any person with a view to entering into business in the same way as the plaintiffs, without the written consent of the plaintiffs; also further, as was shown in the agreement, not at any time thereafter to set up in business for himself without their consent. The allegations of the petition were admitted, with the exception of those in paragraphs 6 and 8; therefore he (Mr. Wainewright) would not be called upon to prove the agreement, or the fact that the plaintiffs had performed their part of it. It was not denied that the agreement was for three years, and that it was one of the terms of the agreement that, at the termination of the defendant's engagement, he should be provided with a passage home. Part of the defendant's answer was taken up with some passages relating to that, and which he (Mr. Wainewright) hoped to be able to disprove. In paragraph 2, the defendant said he entered the service of Messrs. Silverthorne & Co., but he also said he was not a partner. As to the passage home, it said the plaintiffs, on or about the 10th of September last, withdrew the restriction in writing. Defendant further said the plaintiffs had, by detrimental reports, sought to injure him. The plaintiffs would be called, and would state what had passed between the defendant and them as to the passage home and his engagement in business in Shanghai. Some letters had passed between them, and one, dated September 10th, was that alluded to by the defendant in paragraph 4 of his answer. The reply of the defendant to that letter had been lost, but notice had been given to defendant to produce a copy. If that could not be done, he should be able to prove the answer generally. It was sent on the 12th of October following, and was to the effect that the defendant was unable to obtain another engagement, and asking for full pay until his arrival in England. This was declined by the plaintiffs, but they offered to give him half his passage. Defendant to that replied that he would remain in plaintiffs' employ until the expiration of his agreement, on the 25th of January. The plaintiffs then wrote to the defendant as to the clause in the agreement respecting his passage home, and said they were prepared to carry that out, sending him by the next mail steamer. To that letter the defendant made no reply. With reference to the construction the defendant sought to put on the letter of the 10th September, he (Mr. Wainewright) thought his Lordship would say there was not a general withdrawal of the agreement. They gave the defendant permission to join some "already established business." Those words were underlined in the letter. Defendant had, however, joined another individual here to establish another business in opposition to the plaintiffs. They particularly drew defendant's attention to their meaning that he was not to go into a new business, which might certainly have taken something from them. The concession contained in the letter was only a partial one, and the plaintiffs would further state to the Court what their intention was. He (Mr. Wainewright) did not know that he need say anything more about the matter, but there were some complaints by the defendant that the plaintiffs had made allegations as to his want of sobriety and steadiness; but the gist of the case lay on the 5th paragraph of the defendant's answer. Perhaps it was not the correct time to refer his Lordship to authorities on the case, but it was well-known that an agreement in restraint of trade was good if it was entered into for a good consideration, and if it was reasonable. The consideration in this case was good. The plaintiffs were to pay the defendant a good salary and provide him with board and lodging in addition,—and so on.

Mr. Hannen—Why do you say "and so on?" It is in the agreement that defendant is to pay for his boy and also for his medicines.

Mr. Wainewright went on to say that the plaintiffs were to provide the defendant with a passage home at the end of his engagement. The case of "Hitchcock *v.* Coker" (6 A. and E., 438), had been referred to over and over again in cases of contract, and so far as the point he had already mentioned went, it settled the question—that was, as to the restraint of trade. Then, the next question was—was it reasonable as regarded space? Upon that point, there were a great number of cases, but the law was summed up in that of "Ward *v.* Byrne" (5 M. & W., and 9. L. J., Ex. 14), in which Baron Parke held that any restraint in limit of space was good. In fact, all the cases cited turned on the question of space to which limit was given. But he had no wish to trouble the Court with English cases as to limit of space, because they did not apply to Shanghai. If they did apply at all, they would support the view that total exclusion from Shanghai was perfectly reasonable, for if that view were held to be incorrect, an agreement of the kind in question would be no good at all, and it would be dangerous to bring an assistant out to Shanghai. He, therefore, contended that accepting the full extent of Shanghai was reasonable as regarded space, particularly as defendant's passage was to be paid home again, or to any other place. As regarded time, he would refer his Lordship again to the case of "Hitchcock *v.* Coker," in which Lord Chief Justice Tindal, when that case was before him in error, held it not to be unreasonable in some circumstances to make the time co-extensive with the servant's life. Those were the chief authorities relied upon as to the limit of time and space in cases of this kind of contract. Of course, he was not aware what argument his friend on the other side intended to raise on the question of reasonableness. He might urge that the contract was unreasonable because it prevented defendant from setting up in a business of any kind. But if those words were taken literally, there was something to be said for the peculiarity of business in Shanghai. The plaintiffs carried on almost every business it was possible to; it was almost impossible to say what business they did not carry on. It was, therefore, impossible to say that the defendant might not trench on some portion of them and so injure the plaintiffs. He submitted the agreement must be taken as a whole, and all he asked the Court to do was to confirm the agreement so far as the businesses carried on by the plaintiffs were concerned. In their petition, the plaintiffs merely asked that the defendant might be restrained from taking part in the trade of a tailor, draper, and outfitter; but what they asked for did not affect the law of the case. He referred the Court to the cases of "Mallam *v.* May" (12, L.J., Ex. 377), "Green *v.* Price" (14, L.J., Ex. 105), and "Nicholls *v.* Stretton (10, Q.B., 346.) On

those cases, he contended, with regard to the clause in question, that if it was to be taken literally, it was not an unreasonable restriction in the defendant's case, and that it ought to be looked at in conjunction with the rest of the agreement. The businesses carried on by the plaintiffs must also be taken into consideration; and if it was held that that argument could not be supported, then the cases he had quoted could be applied, and the Court would enforce the clause, though it might be too wide in its wording. Even if he could not succeed in his argument on that clause, he contended he could succeed on the earlier clause. It was clearly a case in which the defendant was having traffic and dealing in the way of the plaintiffs, and the obvious construction to be placed upon it was that the defendant's course was a breach of agreement. It was a case of very considerable importance to all persons in business in Shanghai. If this kind of agreement could not be supported, it would create a great difficulty in the way of carrying on business in the Settlement. He might say that it almost amounted to a fraud for an assistant to come out here under an agreement, and then turn round and say the agreement he had himself signed was bad in law, and to take shelter under that. However, he need not prolong the argument, but would at once call his clients to prove the facts of the case. He then called—

HENRY EVERALL, who deposed—Our business is very general, and embraces almost every branch of trade. We sometimes take up new branches. I wrote the letter of the 10th September. By the words "established business," I meant a business already established. Defendant came to me and asked if I had any objection to his going into business with Mr. Silverthorne. I said, I certainly had. He then said somebody from Sayle's or Watson's would get the engagement. That was the first time I had heard of Mr. Silverthorne setting up in this business. When defendant came to me, it was about the time of his agreement terminating. I should not have objected to his going into any old established business, nor should I now. I never did anything to induce him to forfeit his passage home. All that I did, appears on paper. I wrote to him to remind him of his passage home.

By Mr. HANNEN—I did not know that all the old businesses were already filled. I knew there was a vacancy then at Lane, Crawford & Co.'s, and thought it might answer their purpose to take him on until their new cutter came out, and that it might also answer his purpose to accept it. I wrote the letter on the 10th September, but I did not know that the vacancy at Lane, Crawford & Co.'s was filled up on that day. I know Mr. Silverthorne, but I do not know that he has been engaged in several kinds of businesses. He had something to do with water from the Lakes, at one time, and is now at the Little Astor House. I have not told Mr. Wilson anything about the defendant's sobriety and ability. He is not an able man, and if you want me to swear that he is a sober man, I cannot do so. I have not said so to different people. I did not tell Mr. Silverthorne that he was not a sober man. I might have said he was a man not to be depended on. Mr. Silverthorne might have misconstrued the meaning.

Re-examined—I should not have objected to his going into an old established business, already in opposition to us. It might have done us good. I knew there was a vacancy at Lane, Crawford & Co.'s at that time.

W. H. SHORT—I am a partner in the firm of Messrs. Hall & Holtz. Whenever the defendant spoke about his engagement, I always referred him to Mr. Everall. I have done nothing either to prevent him getting other employ in Shanghai, or to induce him to forego his passage home. I have said nothing as to his character to people outside.

By Mr. HANNEN—I never spoke publicly as to his sobriety. I might have said he was of no use to us. That might have meant that we had no use for him. The tailoring department did not pay towards the end of the defendant's engagement. He said it was through sufficient publicity not being given to it. We had several complaints from customers. I do not know Messrs. Buckmaster, tailors, of London. It might pay a large firm to keep an incompetent cutter for five years. The character we had with the defendant was good. I am not a practical tailor.

H. DYER, another of the partners in the plaintiffs' firm, having given similar testimony,

Mr. HANNEN said he would reserve what he had to say until after he had examined the defendant.

JOHN WEST, deposed—I am the defendant in this case. I have been a cutter for 20 years. I have had four engagements in London during that time—two as chief cutter. I left three of them of my own accord, the other in consequence of the employer's son, whom I had trained, coming in. When I came out to Messrs. Hall and Holtz, I found that my predecessors had let the business down very much—$2,000 in the last three months of 1872. I found that the tailoring department was not made sufficiently known, while the outfitting department was. I advised them of that, but they did not condescend to take any notice of it. The tailoring department was profitable in my time. I found that they had spoken against my character, accusing me of insobriety. I thought it better to try to remain in Shanghai, to live it down. That was my motive for wishing to stay here. I applied to Messrs. Lane, Crawford & Co. for an engagement, but found their vacancy was filled up. I went to other firms to endeavour to induce them to open a tailoring branch, but failed. If it had not been for that letter of the 10th September, I should have done nothing to break my agreement. If I had been guilty of insobriety or was incompetent, they could have discharged me and sent me home at a moment's notice. They knew that in London, and I did not wish to go home with a tarnished reputation, as that would have been.

By Mr. WAINEWRIGHT—I know the business was profitable from the fact of my keeping the order books. I never saw a profit and loss account. I judge only from the amount of trade done in the department. I understood by the underlined words in the letter of September 10th, that I might join or go in with any one in business—that I might have gone to Mr. Polite, and asked him to start a tailoring and outfitting business; or if Messrs. Buckmaster had had an agent here, I should have thought he might have engaged me. I did not think it necessary to ask Messrs. Hall and Holtz for an explanation of the underlined words. I had a conversation with them about my passage home, and they never refused me a passage. I am a married man and have a family. I only recollect one complaint being made to me. That was connected with the business, and I never heard of any others.

Mr. HANNEN then addressed the Court in support of the defendant's case. He might say at once that the defendant knew of the way in which the plaintiffs had spoken of him, and of the reports that had arisen, and he was in hopes that they would have withdrawn them. The defendant desired an opportunity of denying those reports upon oath. This he had now done, and what was it he now wished to be permitted to do? He wished to remain here, and to live down the imputations which had been cast upon his character, either on previous occasions or to-day in the witness box. On his behalf, he (Mr. Hannen) had to ask, first, that the injunction, at any rate as applied for, should not be granted. He asked the Court to take into consideration the way in which the plaintiffs' prayer was framed (which he then read.) They prayed that he should be prevented engaging with Mr. Silverthorne in any way whatever, or with anyone else as a cutter. This amounted to a prayer for an absolute injunction against his getting his livelihood in Shanghai. He (Mr. Hannen) contended that such an injunction, being in restraint of trade, and the clause in the agreement upon which it was founded being too general, it would be against public policy to enforce it. In none of the reported cases had it entered into anyone's head to restrain a person from entering into any occupation whatever, and on that ground he should ask his Lordship to refuse the injunction. The next point to which he should turn his attention was, whether the letter of the 10th September was not a permission to the defendant to do what he had done, and he should contend that it was an absolute withdrawal of all restrictions: and that the plaintiffs could not go back from it;—that the letter really gave defendant permission which he had taken advantage of, to enter into any business. Mr. Everall admitted that by the word "business" used in that letter, he meant a business like his own, and that his own was a general one. He (Mr. Hannen) would submit that under these circumstances, and from the use made of the term "old-established business" by the plaintiffs, the defendant was entitled to engage with Messrs. Silverthorne. What the plaintiff wanted was that the defendant should not set up in business on his own account, so they put in the term "old-established business." That prevented him setting up in his own name, and that, he contended, was the sole restriction intended to be presumed by the letter. If the Court upheld this view, the injunction must be refused. If the Court was against him on this point, then would come the question of the reasonableness of the agreement. He had already said the agreement was in restraint of trade, and he contended it was not divisable. If any part of it was void, it was void altogether. The case of "Mallan *v.* May" was the only one cited to show that the contract was divisable, and he would draw his Lordship's attention to the latter part of the judgment in that case—from which it would appear that no reasons were given by the Court. It had been argued as lately as the case of the "Leather Cloth Company *v.* Lorsont" (9, L. R. Equity Series, page 345), that a contract of this kind was not divisable, and the judgment there proceeded on the ground that a trade secret had been sold. The cases cited by his friend did not bear out his position, because, in them, all restraints on trade were admitted to be *prima facie* bad and in restraint of public policy, and, therefore, void, when beyond what was necessary the protection of the covenantee. The restraint, it is admitted, must not be greater than necessary for the protection of the covenantee, and in this case he contended it was far greater than necessary. In every one of the cases Mr. Wainewright had quoted, the conditions were widely different from those of the present case, in which the plaintiffs sought to restrain the defendant from serving "any person in any capacity whatsoever" in Shanghai. If that was the true construction, the contract was void altogether, as being too general, there not being a single case in the books of the enforcement of terms so harsh. He should, therefore, have to contend that in the present case, the conditions of the contract were not reasonable and therefore not valid in law; and, if even valid in law, too harsh to be ordered to be specifically performed by a Court. He would now refer his Lordship to cases that were instances in which terms of restraint were held reasonable, but they were much less harsh. There were "Proctor *v.* Sargent" (7, M. and G. 31), "Gale *v.* Reed," (8, East, 79), "Benwell *v.* Inns" (26, L. J., Ch. 663). In the latter case, especially, there was an allegation of actual damage and of specific acts of interference; moreover, the prohibition was confined to a small area, two miles in circumference, and to one single trade, that of a milkman.

His LORDSHIP called Mr. Hannen's attention to the circular issued by Mr. Silverthorne, in which it was said that the defendant "would continue to give his services as before," &c.

Mr. HANNEN said it was a circular sent round to everybody, not to plaintiffs' customers only and not traced by evidonce to the defendant. In another case, "Leighton *v.* Wales," about a coach, a particular road was restrained. In all those cases, there was a narrow limit expressed, but in the present case the application was very wide, and he maintained that it was therefore unreasonable. In the present case also, there was a penalty named, £500, for the infringement of the agreement, and under those circumstances there ought not to be an injunction, for the plaintiffs' should have sued under the penalty clause, and upon that point he quoted "Carnes *v.* Nisbett" (31, L. J., Ex., 273).

His LORDSHIP said he thought Mr. Hannen would find the penalty in that case was specially with reference to the clause in restraint of trade.

Mr. HANNEN went on to say that, although the judges seemed to refuse the injunction, on the ground that the plaintiffs could not claim both, they did not expressly determine that he *could* get an injunction, even though he offered to undertake to give up the claim for damages. would not grant an injunction, but that they would give damages. He should much prefer that course to be taken in the present case. The only further point he would urge upon his Lordship was with reference to this. If his Lordship determined that a breach of

agreement had occurred, then the penalty or damages could be recovered. Would not his Lordship, sitting as a Court of Equity, say that some portion of the penalty should be paid, rather than grant an injunction which would stop this man getting a livelihood, and cause him to be sent home as a distressed British subject?

His Lordship intimated that he would not trouble Mr. Wainewright to reply, but would give Mr. Hannen leave to move on a single point—viz., whether the existence of the clause in the agreement for damages, prevented the plaintiff getting an injunction.

Mr. Wainewright said Mr. Hannen had said the plaintiffs were striving to deprive the defendant of all chance of getting his livelihood in any way whatever, whereas they merely wanted to sever his connection with Silverthorne, and to prevent him from engaging in a similar business to their own.

His Lordship in giving his decision said—I consider the plaintiffs are clearly entitled to the injunction for which they ask, although I shall not exactly give it in the terms in which they pray for it. I must, however, observe, with reference to the alleged imputations by the plaintiffs against the character of the defendant, that not a tittle of evidence has been brought forward in support of the statements to this effect, made in the answer to the plaintiffs' petition and relied on as an [illegible] A man has no right to come into Court and resist an application of this kind, on the ground that he wants to stay in a place to live down imputations thrown out against him, and not produce any evidence that such imputations were made. If any imputations were made,—and I am not going to assume that any were made,—the Court should have been told under what circumstances they were made, because it might well be that what was said, the plaintiffs were, perhaps, under a moral obligation to say, and ought to say, in which case they would be privileged. All, however, I have before me, is an assertion by the defendant that the plaintiffs had spread reports about the Settlement reflecting upon his abilities and moral character; but not a single individual is called to prove that such was the fact. With regard to the law of the case, I have carefully looked through the chief leading cases with reference to agreements on restraint of trade, and I do not find that this agreement at all falls within what in those cases are called illegal agreements, because against the policy of the law. The defendant for a good and sufficient consideration undertook not to set up in business, or take employment with any one else in any similar business to that carried on by the plaintiffs, in Shanghai, after the expiration of his agreement with them, and he has done so. It is absurd to say that, in so doing, he has not committed a gross breach of his contract. He is not to carry on, or assist any one in carrying on the business of a tailor or outfitter in Shanghai, and he enters the service of Mr. Silverthorne, who sets up a tailoring business, which he has not hitherto carried on, and issues a circular to the community, which the defendant must be held to have known and acquiesced in, "that he has secured the services of Mr. West, late in the employment of Hall and Holtz, as cutter, &c., who will *continue* to give his attention," &c., &c. Nothing can be worse than this, for it constitutes a flagrant breach of the terms of the agreement which he made with his eyes open, and upon the faith of which Messrs. Hall & Holtz brought him out from England, and for three years paid him a very sufficient salary. Neither is the restraint imposed by the agreement more than sufficient for the protection of the plaintiffs; for if the defendant is allowed to remain in the service of Mr. Silverthorne, he may be able to seriously injure his late employers by drawing their customers in the tailoring department away from them. The injunction I intend to give will effectually protect the plaintiffs, by preventing the defendant from continuing in the service of Mr. Silverthorne, or from carrying on the business or trade of the employment in any capacity of any one who carries on such a trade. It appears to me that not only are such agreements as the present fair and reasonable, but I cannot conceive, if they were not upheld, how people carrying on such business as Hall & Holtz, Lane, Crawford & Co., Watson & Co., could safely carry them on, unless they protected themselves and were assisted by this Court in so doing.

Mr. Wainewright—Does your Lordship intend that he might carry on the business of a general storekeeper?

His Lordship—He is not to carry on any business in which the plaintiffs are concerned, or in which drapery, tailoring, and outfitting are included.

Mr. Hannen—Then your Lordship strikes out the words, "or any other business to be carried on by the plaintiffs."

His Lordship—I am not prepared to go further than their present business.

Mr. Hannen—But for those words, we should perhaps have withdrawn.

His Lordship—But you come here to defend your client's character, which has never been assailed, so far as I see. Without agreements of this kind, I cannot see how trade can be carried on in a place like Shanghai. Assistants are engaged and paid liberally, and their passage home is provided for them. They suffer no harm, and there is no hardship to them. They enter into contracts of this kind with their eyes open, and for a good and sufficient consideration. I think the defendant has been guilty of a gross breach of his contract, and ought to be restrained from doing what he is doing.

Mr. Hannen asked that the decision should be without any order as to costs.

His Lordship declined to accede to this, and ordered the costs to be borne by the defendant.

April 20th.

Ching Chong *v.* J. Hume.

Plaintiff, a native storekeeper in Hongkew, sued the defendant, a pilot, to recover $164.80 for goods sold and delivered.

Defendant denied his liability, saying, in an informal answer he had addressed to the Judge, that he had paid all the plaintiff's claims upon him, and held receipts for the same.

Plaintiff now stated that the money had been owing for two or three years, that the defendant had in the meantime gone home to England, and on his return to Shanghai on being applied to for payment, said he had paid the money and held receipts for it, whereas he had not paid anything of the sum sued for.

N. de Grew, plaintiff's clerk and collector, deposed that the accounts produced were copied by him from the plaintiff's books. It was a running account, commencing in 1869, and the witness read over sundry items of payments made by the defendant, but the dates were so obscure that, in the absence of the plaintiff's books, to show the exact time of the transactions and how the accounts had been kept, it was impossible to understand them correctly.

Defendant produced several receipts for cash paid on account, and said that since the date of the last of them he had had no dealings with the plaintiff.

His Lordship pointed out that in the account rendered, a large number of things had been debited to the defendant since the date of the last receipt produced by him. Did defendant mean to say he had not had them, and that the items had been invented by the plaintiff?

Defendant said the whole of the goods were supplied prior to the date of the last receipt he had handed in. He had taken the compradoreship of three pilot boats from the plaintiff, and had also told his wife not to deal any more with him, as he thought he was not dealing fairly, and had not dealt with him since.

Plaintiff explained that the defendant went home in September, 1873, and came back in May, 1874, when he asked for payment of the balance due to him. Defendant was then badly off, and, being an old customer, he (plaintiff) did not press him for payment. Two or three months afterwards he again applied for payment, and defendant then denied his indebtedness and had [illegible] since.

Defendant said if the payments he had made on account were added up, they would be found to amount to more than the plaintiff's bill.

His Lordship—But there are a whole lot of things charged as supplied to you. Will you swear you have had none of them?

Defendant—Yes.

His Lordship—Then will you tell me why you paid him $80 since the date of the last receipt held by you?

Defendant—I suppose my wife paid it.

His Lordship—Why should she have paid, if you had not gone on dealing with him?

Defendant—She was a very careless woman in money matters, my Lord. When plaintiff rendered his account, I told my wife to pay him off and have no more to do with him.

His Lordship—Then, according to your account, these are things he must have invented as having supplied to you. Who did you deal with after 1871?

Defendant gave the names of several foreign storekeepers and tradesmen he had dealt with since that date.

His Lordship ultimately adjourned the case for the production of the plaintiff's books, saying it was clear some mistake had been made. The plaintiff could not have invented all the items charged against the defendant, and he had given credit for all the receipts held by the latter as payments on account.

CIVIL SUMMARY COURT.

Shanghai, April 19th.

Before R. A. Mowat, Esq.

Rosina Elman *v.* J. M. Walker.

Complainant sued to recover $26.50, for goods sold and delivered. Mr. H. Brougham Miller again appeared for the defendant, who denied the alleged debt altogether.

Plaintiff stated that the amount was made up by $12 for a bedstead and mattress, $4.50 for a dozen of claret, $7.50 for curry powder, salt, and other small stores. She had not charged him for a lot of preserves he had had. She had received a chair from him, which was worth $3.25, and was willing for that sum to be deducted from the amount due; and with reference to the bedstead and mattress, was willing to take them back if defendant was not satisfied with the price, although he had agreed to pay it. He was very poor at that time, and she told him if he did not not like it, he could use it until he could get another, and then return it. He had neither returned it, nor paid her anything for it. Some of the claret he had carried away himself, and his Indian servant had fetched the remainder, seven or eight bottles. If he thought the price for the chair was not sufficient, he could have it back again. She had sent in a bill three times to the defendant, and had also asked him for payment.

By Mr. Miller—I sent in a bill for $8 only at first, because I did not wish to press him for the whole of the money, as he was still poor. I do not know what he paid for the chair.

Defendant, sworn, deposed—I do not owe this money. When I went to her house first, it was a drinking saloon, and I paid for some of the liquor for which she has now summoned me. I was teaching her, for six months, at $6 per month, one hour per day, and she has not paid me any of that money. I admit having the bedstead, but she made me a present of it, which I can prove by my servant. I took a chair to her house the other day, for which I had paid $7. She told me she had the loan of one from a lady in Hongkew, and would be much obliged to me to buy one for her, and I did so. As to the claret, I never had it, as I can prove by my servant, in the way she has said. I had three bottles only. I received one bill for $7.30, about five days ago, and the present bill has been made out since. It was a bill for drinks that I received. I never had any conversation with her about these money matters, and the bedstead was not included in the bill she sent to me.

Plaintiff repeated that she did not include the bedstead because defendant was poor. He told her his income would soon be some hundreds of taels per month, and she allowed it to remain unpaid for.

Defendant, in reply to his Honour, said he [illegible] $7.30 and no more, while she owed him $36.

Plaintiff said she wished to learn to read and write English, and defendant came to teach her. He used to come to the house tipsy, and every time asked for brandy; so she found the teaching was becoming too expensive, and that the liquor would cost more than she paid for learning—he used to

finish a bottle of Hennessy in two days. He came eight days, and she then told him not to come any more. He was all for drinking, and never gave her any teaching.

His Honour (to defendant)—What about the bedstead?

Defendant—I do not want it, and will send it back to her, although she gave it to me. I made her a present at the same time.

Plaintiff—I never receive presents. I am willing to receive the bedstead back.

Defendant—And I must have my chair back.

Plaintiff—I have not used the chair. It was broken, and cost me 35 cents for repairs.

Defendant (to his Honour)—I know nothing about the curry powder and preserves; I admit owing $7.50 for drinks, and for three bottles of claret, at $2.50 per dozen,

His Honour—But she has charged $4.50 per dozen.

Defendant—I do not admit that price.

Plaintiff again said that her bill was a correct one. Defendant had been with the priests, but had left them. He had got no money, and wanted her to pay for some boards to make seats to open a school.

His Honour said he should order the defendant to pay $7.50, and to return the bedstead and mattress, the plaintiff to return the chair. If defendant wished to be paid for his services as a tutor, he must sue her before her own authorities. But before he could do that, he would have to pay into this Court the $7.50 debt and $3 costs, the $7.50 to remain in Court until after the decision in the other Court. That action must be brought within a week, but if the defendant would take his advice he would not bring it at all.

The parties then withdrew.

POLICE COURT.

Shanghai, April 15th.

Before R. A. Mowat, Esq.

R. (G. A. Samuelson) *v.* R. M. Roger Tillstone.

Assault.

Complainant, a seaman of the *Sir Lancelot* charged the second officer with assaulting him, about a month after the ship left London, and again on Friday last. In answer to his Worship, defendant denied the charge, and said that on Friday last, complainant, who had been in the lock-up all night, came on board with another man named Carlston, and both went into the forecastle. He went forward to turn them to, and found complainant in his bunk. He called him and told him that he would give him five minutes to get on deck, and that if he was not out in that time he should haul him out. He distinctly denied having laid hands on him.

John Carlston, who had also been in the lock-up the previous night, stated that he came on board on Friday last at 11 o'clock with Samuelson, and went into the forcastle. The second mate came down and seized Samuelson by the throat. (In answer to his Worship.)—I am not sure whether he was in his bunk or on his chest at the time.

His Worship dismissed the summons and ordered complainant to pay the costs.

R. (John Carlston) *v.* Master of the *Sir Lancelot.*

Assault.

Complainant said, that on the 28th January he was at the wheel. The Captain struck him on the face, making his nose bleed, and then turned him away.

Defendant admitted having boxed the man's ears for not steering properly. The men were at work unbending the mizen top-gallant sail and royal. He remonstrated repeatedly with the complainant for bad steering, and at last he turned him away from the wheel and took it himself, after having boxed his ears. He is a very indifferent sailor.

His Worship—That is perhaps the reason you struck him, but that kind of treatment does not make indifferent sailors better ones. I shall order you to pay the cost of the summons.

April 19th.

R. (— Felgate, master of *Sir Lancelot*) *v.* R. Williams.

Absent without leave.

Defendant, who was brought up by Sergeant Skinner, is an ordinary seaman of the above-named vessel, and came ashore on Thursday night. He was apprehended on Saturday morning, and had since been in prison. He now said he came on shore to obtain a summons against the chief mate. He had been beaten with a hawser and kicked, and was afraid to go back. He admitted that he did not say so when he applied for the summons on Friday.

His Worship said if defendant had said, when he applied for the summons, that he was afraid to return to the ship, he would have been kept on shore until the case was settled. Instead of making any such complaint, however, he remained ashore without leave until he was apprehended.

Captain Felgate, in reply to his Worship, said he wished the defendant to be punished, as since the ship had been in Shanghai there was a growing feeling of discontent among the crew, without any reason for it. He had brought two of the crew on shore for his Worship to question them, if he wished to do so.

His Worship asked if the men were here of their own accord?

Captain Felgate replied in the negative, adding that he had brought them ashore for the purpose he had stated.

His Worship did not question the men. He ordered Williams to forfeit six days' pay to the ship, and to pay costs.

R. (R. Williams) *v.* Andrew Hepburn.

Charge of Assault.

Complainant is an ordinary seaman of the ship *Sir Lancelot*, and was defendant in the former case. He charged Hepburn, who is first mate, with assaulting him.

Complainant deposed—As we were leaving the buoy on Wednesday forenoon, defendant ordered me to pass the hawser to the quarter. He did not say which quarter, and I was passing it to the port side, when he struck me three times on the thigh with the end of it. I felt the effects of the blows all that day. I did not look to see if there were any marks made. The defendant had never ill-used me before.

By Defendant—It was the hawser that we were towed up with that you struck me with.

Defendant denied this, and said it was only a small line that [illegible]. It caught round his legs, and he could not swing it to hit the complainant heavily. The end might have struck him once or twice, but very lightly. It was not the hawser complainant was passing. He pointed to the place he wished the complainant to pass the hawser to.

Complainant said it was the same hawser, and was in thickness as much as he could grasp with his hands.

Two witnesses, seamen of the ship, were called for the defence, and deposed that the line was 3½ or 4 inches round, and was not the hawser that was being passed. The witnesses both agreed that if the complainant was struck at all it was very lightly indeed, and he did not cry out.

His Worship said he could not see that it was a case in which a summons should have been applied for. It was a very trifling affair, and complainant himself admitted that he had not been previously ill-treated.

Defendant said since the ship's arrival in Shanghai, the defendant and several others of the crew had done all they could to make themselves disagreeable both to himself and the second officer, with a view of getting their own discharge.

His Worship dismissed the case, and told the complainant to go back to the ship.

Drunkenness.

Andrew McLuckie, a quartermaster of the the steamship *Ocean*, was charged with being drunk and incapable in a native store in Hongkew, on Sunday. Defendant offered no excuse, and was fined $2.

R. (Rosina Elman) *v.* J. M. Walker.

Charge of Assault.

Mr. H. Brougham-Miller appeared for the defendant.

Complainant, who said she was an Austrian subject, deposed—I formerly kept a store on the Rue du Consulat, and live there now, at No. 45. Defendant came to my house on Thursday night last, and asked for a chair. I was speaking to a gentleman in German, and defendant said something about not knowing he was in Jews' society. Defendant afterwards became very excited, and felt his pockets as if for a pistol. He then took up a glass from the table, and seemed as if he intended to throw it at me. He afterwards went away, but on Friday morning, he came again, and I told him, in consequence of his behaviour the previous night, to go away and not come any more to my house. He then held up his fist, began to swear at me, and said he would put a ball through me. I told my boy to fetch a policeman, when defendant ran outside, and when the policeman came, he was gone.

By Mr. Miller.—It was about ten o'clock on the Friday morning, when he came. He was alone. He brought nothing with him. He owes me some money, and had previously brought me a chair, the price of which I meant to set off against his account. He owes me for salt, curry-powder, and such small stores. He brought a policeman to take the chair away, and I told him he should not have it until he had paid me what he owed. I am married, but my husband has gone to Europe. He went home because he was sick.

His Worship told the defendant that he could not be sworn, but if he chose to give his version of the affair he could do so.

Defendant then stated that he had been in the habit of going to the complainant's house for some months, as her teacher, for which she was to have paid him $6 per month.

His Worship—I thought you were a merchant, and dealt in opium?

Defendant—I am a merchant, and teach as well. When I went to the house on the Thursday night, I found that man (pointing to a person in Court) there. After I had been there a short time I went away. I did not act as the complainant has described.

Complainant—There was an old man, 67 years of age, in the house, when defendant came on the Friday morning, who would have come here to-day, but he had to make arrangements for the funeral of a lady.

His Worship told the defendant he should bind him over to keep the peace towards the complainant.

Mr. Miller said as there had been witnesses mentioned, they ought to be called. At present there was only one statement against another.

His Worship consenting,

Adolphe Lustig, a Dutchman, deposed that he was at complainant's house on Thursday night, with another man. The defendant came in, and witness and his companion began to speak German. Defendant said, "I did not think I was in the company of Jews," and afterwards became very violent, and behaved as the complainant described.

The other witness, whose name did not transpire, but who described himself as a hairdresser's assistant from San Francisco, now employed in Shanghai, gave similar testimony. He and his friend were sitting on a sofa, and the complainant on the table, when the defendant came in. He got excited, used very bad language, and began to feel behind his coat, as if for a revolver—that being where they are usually carried. He did not produce one, but took [illegible] complainant, but did not do so. He then left the house.

His Worship said he should bind the defendant over in his own recognizances of $50, and two sureties of $25 each, to keep the peace against the complainant for six months, and to pay the cost of the summons. He ought to have known better than to conduct himself in so threatening a manner towards a woman, and had no right to go to her house and behave in the way he had.

Defendant said he could find two sureties, and was perfectly satisfied with the decision, as he did not intend to go to the house any more.

April 20th.

Reg. *v.* William Hannan, a seaman of the *Assault and wilfully damaging a Jin-rik-sha.*

Wing Ah-sing stated—I was taking two foreigners in my carriage over Hongkew bridge yesterday at noon. Defendant came and pushed behind, and then took hold of the wheel and pulled it from off the

axle. The Jin-rik-sha capsized, and the wheel was broken. I called "Police," and then took hold of the defendant. He then struck me several times in the face.

Sergeant Skinner corroborated this—as, when the coolie came to the station he was bleeding from the mouth.

Defendant denied having taken hold of the wheel of the Jin-rik-sha, but admitted that he was pushing behind.

A seaman came forward and said that he engaged the 'rik-sha to take himself and a shipmate from the Consular compound gate to the Sailors' Home; they came to a bridge and William (defendant) pushed behind. He did not remember anything very clearly after that, as the carriage was upset and the wheel broken, and they were thrown out. He was quite certain that defendant did not take hold of the wheel.

Mr. Bonne, the owner of the vehicle, stated that the amount of damage done would cost three dollars to repair, the spokes and nave of the wheel being all broken.

In answer to his Worship, defendant denied having assaulted the complainant, but said that the coolie took hold of him by the coat collar, and hung on to him. At the Police Station, the complainant was willing to receive $1 for the damage done.

His Worship ordered defendant to pay $3 for the damage, and $3 fine for the assault, $1 of which would be paid to the complainant. Several men, speaking together from the body of the Court, which was crowded, said that defendant was innocent of the charge of the assault, and that he had only struck the coolie in self defence.

His Worship remarked that the coolie was perfectly justified in taking hold of and detaining the defendant, until he could be assured that he would be paid; and under these circumstances the defendant had no right to strike the complainant. Besides, he was a big, powerful man, in comparison with the coolie, and the violence he used was unnecessary.

Defendant—I would rather go to prison than pay $6.00.

His Worship endeavoured to point out the stupidity of defendant's choice of one week's imprisonment, as he would have to pay for his maintenance, which would probably amount to more than the fine.

Defendant however allowed his visit until his Worship left the Court, when he thought better of it, and said that he would pay the fine.

April 21st.

Reg. *v.* Andrew McLuckie (quarter-master of the steamer *Ocean.*)

Drunk and Incapable.

His Worship observed that defendant had been charged with the same offence on Monday last.

Defendant admitted the fact, and begged his Worship to let him off, and he would promise not to get drunk again.

His Worship said that it appeared he could not be trusted, as he made a similar promise before. He should have to lock him up for a week.

Defendant—But, sir, I am to be paid off from my ship to-day.

His Worship—That is the more reason for keeping you out of harm's way.

Defendant begged hard to be let off, but His Worship considered that would not be the kindest course to pursue, and ordered him to prison for one week.

Reg. *v.* John Myles, A. B. of the British barque *Grasmere.*

Drunk and Assaulting the Police.

Defendant was charged by P.-C. No. 36, Thos. Piper, with being drunk and fighting in Hongkew at 11.20 p.m. on the 20th inst., and assaulting him in the execution of his duty.

P.-C. Piper stated that, at 11.20 p.m. on Tuesday, the prisoner was fighting with another man in Broadway, Hongkew. He [illegible] the act of striking the other man with a slung shot. Prisoner then turned upon him and made three attempts to strike him with the shot, but did not, as he was too close. Prisoner was violently drunk.

Prisoner said, in answer to His Worship. I don't remember anything about it. I must have got the slung shot after I came on shore, but I cannot say from whom, or where from. I did not know that I struck the constable at all. I am very sorry, but after a man has been cooped up for nearly six months on board ship, a few glasses of this whiskey that you get here makes one mad drunk.

His Worship—What countryman are you?

Prisoner—An Irishman.

His Worship—Well, that is a most improper weapon for you to carry, wherever you got it. I shall have to lock you up for some time.

Prisoner—Will you take a fine, sir?

His Worship—What are your wages?

Prisoner—£3. 7s. 6d. per month, and we have been nearly six months coming out.

His Worship—I always prefer inflicting a fine instead of sending a man to prison, but in this case I must communicate with your Captain, so that you will not be allowed to come on shore again while your vessel is in port. I shall fine you $6.

Prisoner—I am satisfied with that, sir.

His Worship—It is very lucky for you that you did not succeed in striking the constable, or I should not have taken a fine. The Court constable will see you on board your ship, and mention what I have said about your not being allowed on shore again.

April 22nd.

Reg. *v.* Archibald Murray, a seaman on board the British ship *Sir Lancelot.*

Drunk and Incapable.

His Worship, after exacting a promise from the defendant that he would not get drunk again, allowed him to go on board his ship.

NAVAL COURT OF ENQUIRY.

Amoy, 5th April, 1875.

Before Francis Raymond Pelly, *Lieutenant, H.B.M.S. Growler.—President.*

Geo. Phillips, *H.B.M. Consular Assist.,*

Thos. E. Cocker, *Master, British Mercantile Marine.*

re loss of s.s. *Yuen-tze-fei.*

On the 5th instant, a Naval Court was held at Her Britannic Majesty's Consular Office at [illegible] Walter Stewart, of H.B.M.'s ship *Growler,* and senior Naval officer present in port, dated the 2nd instant, for the purpose of investigating the circumstances attending the loss of the British steamer *Yuen tze-fei,* on Dodd's Island, on the 28th March, when the following order was made:—

This Court having deliberately weighed and considered the statement made by Captain Nicholas Moalle, as well as the evidence (upon oath) given by the several witnesses called,—is of opinion that the aforesaid Mr. Nicholas Moalle, late master of the *Yuen-tze-fei,* lost that vessel by an error in judgment:—

Firstly, in such thick weather not keeping further off the coast; and not first sounding to ascertain his position, before altering course to the north, (by striking 19 fathoms bottom.)

We are also of opinion that, with the exception of the above error, he shewed every attention to his vessel from the time of leaving Amoy to the time of leaving the wreck. He displayed skill and courage in remaining by his vessel, and conducted everything in a seaman-like manner after his ship struck.

Taking everything into consideration, we only deem it necessary to suspend his certificate of competency as Master (Colonial No. 500) for a period of three calendar months from this date.

With reference to the conduct of Mr. James M. Johnson, 2nd officer on this occasion, we are of opinion that he did not keep a good look-out, either himself, or by allowing the "look-out man" to leave his post in such thick weather; and he is hereby censured.

U. S. CONSULATE-GENERAL.

Shanghai, April 19th.

Before O. B. Bradford, Esq.

Henry Dennis, a seaman, was charged with desertion from the *James S. Stone.* He pleaded guilty, and was sentenced to sixty days' imprisonment.

MIXED COURT.

Shanghai, April 20th.

Before the Chinese Magistrate, Chen, and Dr. Yates, U. S. Assessor.

A Suspected Murderer.

A native of Soochow was apprehended in this Settlement on Saturday evening, by a yamên runner from the city, on suspicion of being concerned in a murder and robbery committed some weeks ago in the above-named city. It was suspected that the persons implicated would come to Shanghai, and a watch was kept, resulting in the apprehension of the prisoner, on whom were found $28, a number of pawn-tickets, and some articles of jewellery. The man at first declined to say how he became possessed of the property; but, by direction of Chên, a few smart blows with the cheek-strap made him confess that he had robbed his cousin; but he denied being implicated in committing murder. The culprit was sent into the city to be dealt with by the Chehsien.

COMMERCIAL INTELLIGENCE.

SHANGHAI, APRIL 23RD, 1875.

ARRIVALS.—From London, the steamship *Glenfalloch;* from Antwerp, the steamship *Fiyen;* and from New York, the *Messenger*.

TELEGRAMS.—London, 20th inst.—*Cotton* and *Cotton Goods* as quoted last week; markets dull. Export to Shanghai for the fortnight 8½ million yards. *Iron*, £10, and *Lead*, £22, 10s.

PIECE GOODS.—Nine days have elapsed since the issue of our last report, and the sales, chronicled and commented upon below, are those published during that interval. For the earlier half of the period under review, the tone of the market continued much the same as last advised. Business in all plain Cotton fabrics,—*T-Cloths* excepted—languished, and sellers were beginning to shows signs of weakness; but latterly, enquiry has improved and firmness is again the rule.

Grey Shirtings—8¼-lbs.—Early this week, C.P.H. *Peacock* chop was sold at Tls. 1.63½, free of brokerage; and yesterday, at Auction, it realised Tls. 1.65½ per piece. That chop and others of kindred quality have been wanted by the Northern men, who apparently see their way to buy on more liberal terms than they were disposed to offer some ten days ago. Butterworth's *Green Globe* has been re-sold at Tls. 1.68, and Cloths that were valued at Tls. 1.66 *a* 1.68 last mail, have changed hands—on re-sale—at Tls. 1.67 *a* 1.70 per piece. Medium descriptions have not yet shared in the improvement, and for the finest, although in fair demand, buyers hesitate to advance on last quotations. Holders, however, are exceedingly firm, and Tls. 2 per piece is named by some of them as their lowest figure for Dewhurst's unlettered and best lettered *Eagle*; and they are not unlikely to get it, as there are only a few here, and not many on the way from home. The settlements of 8¼-lbs. from first hands, so far, have been light, but greater activity now prevails, and the probability is that considerable purchases will be made in the course of the ensuing week. 6-lbs. Between 7,000 and 10,000 pieces of these have found a market—portion of them being for arrival—at Tls. 1.34 *a* 1.37 per piece, which transactions indicate weakness, rather, on the part of importers, and a declining tendency in prices. 7-lbs. have not been so easily worked off. They have, however, been, and still are saleable, and by reason of their scarcity the lower counts are unchanged in value. Sales—9,000 pieces at Tls. 1.43 *a* 1.49 per piece. Business in *heavy Shirtings* goes on as before—quietly but steadily, and goods afloat, in steamers shortly expected, still find merchants at former currencies. But, for distant arrival, buyers are now cautious, refusing to deal, excepting when the chances are all in their favor. Thus, a fine Cloth—in stock—has been sold for Tls. 2.82½, and a good medium—in Hongkong—has realized Tls. 2.70; while for a very fair make—only recently shipped at home—only Tls. 2.58 has been paid. Sales—estimated at 13,000 pieces.

White Shirtings.—Quietness has ruled. Enquiry has confined itself almost exclusively to special chops, and consequently the sales form no criterion as to the state of the general market. Dewhurst's best 56 Reed has been placed at Tls. 1.87½ per piece, and other good chops of 64 *a* 66 Reeds have brought from Tls. 2 *a* Tls. 2.25 per piece. Fine qualities have been wanted, and small sales of them have transpired.

T-Cloths.—Common 6-lbs., as well as 14 *a* 16 square, and ordinary Mexican 7-lbs. have been in continuous request, and there is no stock here,—of the latter weight more especially—to satisfy the demand. The *Glenfalloch* landed a few thousand pieces of the lower counts, which were immediately taken up at Tls. 1.12 *a* 1.17 for the 6-lbs., and Tls. 1.33 *a* 1.35 for the 7-lbs. The latter figure shows a marked improvement on the rates of last mail. On the other hand, a parcel of Dewhurst's T.—7-lbs.—four weeks distant—has been booked by a *Ma-Loo* shopkeeper, at Tls. 1.31½ per piece. But the ordinary Mexican has been run after the most, and a great portion of the Shanghai supplies supposed to be between Singapore and this place, have recently changed ownership, the ruling rates being Tls. 1.40 *a* 1.44 per piece. As an evidence of the present strong state of the market, I may mention that Mendel's *Hand* and *Branch* chop—Mildewed—realised Tls. 1.46¼ per piece at Auction. There has not been much done in 8-lbs., but the stock is light, and holders are patiently waiting for a renewal of demand. Dewhurst's M.T. is worth by sales Tls. 1.82½ per piece. *Tai-Wo* Y.X. and X.M. are in special favor. Estimated sales of all weights—65,000 *a* 70,000 pieces.

Drills.—A forced resale of some 14-lbs. *Pillar*, at Tls. 2.34, cash, was reported last Saturday, but its effect on holders was only momentary. Immediately the parcel was gone, the dealers set up enquiry, and endeavoured to lower the market to the above level. They have been unsuccessful.

Jeans.—The finest kinds only have been asked for, and the demand for them has been unsteady, resulting in scarcely any sales.

Sheetings.—Business in English *Sheetings*, at an advance on last quotations, has taken place, and the market closes with an upward tendency. Sales to arrive are still practicable.

Fancy Cottons and Woollens.—In regard to these there is but little to report. Dulness in every department has prevailed, and dealers have not bought beyond what has been necessary for current requirements. At the public Auction yesterday, a rise of about one mace per piece in the value of *Camlets* was established, but this was more owing to the small lot exposed for sale, than to any unusual buoyancy in the demand. On the other hand, the usual complement of *Spanish Stripes* had a depressing effect, and rates were a trifle easier. The sales of *Fancies* and *Woollens* (auction sales excepted) reported since 14th instant, are thus summed up:—6,000 dozen *Handkerchiefs* at Tls. 0.53 *a* 0.67 per dozen; 420 pieces *Damasks* at Tls. 4.27½ *a* 4.40 per piece; 1,295 pieces *Chintzes* at Tls. 1.32½ *a* 1.35 per piece; a few 48-yards *Turkey Red T-Cloths* at Tls. 6.20 per piece; 1,500 pieces 3 *a* 3¼-lbs. *Turkey Red Cambrics* at Tls. 1.97 *a* 2.25 per piece; 500 pieces *Camlets* at Tls. 12.25 for Black, and Tls. 13.40 for Assortment; 1,000 pieces U.U. Scarlet *Long Ells* at Tls. 7.00 per piece; 300 pieces *Crape Lastings* at Tls. 8.20 per piece; 200 pieces best *Lastings*—Gentian, at Tls. 12.60 per piece; 1,700 pieces *Figured Orleans* at Tls. 3.00 *a* 3.20 per piece; 312 pieces *Spanish Stripes* at Tls. 0.55 *a* 0.57 per yard; and 100 pieces *Medium Cloths* at Tls. 0.80 per yard.

Outports.—From the Outports, the last received foreign advices contain nothing of interest. According to them, the markets everywhere were stagnant. But the natives have fairly good accounts; and at Tientsin more particularly, the recent receipts were going off speedily at prices contrasting favourably with cost.

METALS.—*Nail-Rod Iron.*—Easier prices have induced a fair amount of business during the past week—sales aggregating about 18,000 bundles. Transactions have been chiefly in common Belgian, bought at a decline of 2 m. 5 c. per picul, and the large stocks of this class of Iron, combined with a general desire to sell, point to lower currencies. Supplies of best qualities being small, holders are firm at the under-noted quotations. *Lead.*—The late telegrams from home, private and public, noting an active market, and a rise of 10s. per ton, the business in Hongkong, and sales in Amoy at high rates as compared with those ruling here, have influenced this market. Buyers appear anxious to have the article now, but cannot get supplied at their offers—viz., Tls. 5.95 *a* 6.00 per picul cash, for L.B. *Tin.*—A growing demand has been experienced, and *Foong Hing* shows a further improvement; nor can *Fok-chok* or the commoner brands any longer be bought at the old quotations. At the close, prices are against buyers. *Copper.*—The most of the recent imports have been re-exported. Our own market is dull.

QUOTATIONS—Duty Paid.

COTTON.—The tone of the market has not altered since the date of last report. Only a limited business has been done, and supplies having been kept just sufficient for the requirements, prices have been sustained.

EXCHANGE.—In sterling, business, both in Bank and Private, has been small. Rates continued steady during the week at last quotations. On India, the demand for remittances has been trifling, and at the close, rates are weak at Rs. 306 on Calcutta, and Rs. 305 Bombay. Hongkong, steady at quotations.

CLOSING RATES OF EXCHANGE.

EXPORTS.

SILK.—The following is the report of the London silk market by latest public telegrams:—"Some business at lower prices. Koo-fong-sing's chop No. 3, 20s. Blue Elephant, 16s., and fair No. 5 Tsatlee, 12s. 6d. @ 13s. per lb."

The P. & O. s.s. *Khiva* left on the 18th instant with 176 bales, (of which 136 were shipped for London, 33 for the Continent, and 7 for America), and the business for the past week is limited to 300 bales, chiefly market Tsatlees at Tls. 260 @ Tls. 295 per picul—making total estimated settlements to date, 71,400 bales against 56,900 at same date last year.

Small lots of silk continue to arrive from the country and river ports, and the unsold stock on the market is about 300 @ 400 bales.

TEA.—During the past week, a few small settlements have been made of Green Tea, at about former prices, say—

Fychow & Moyune,	294	½-chests.	Stock—	220 ½-chests.
